EXCLUSIONS: The following may not be used towards BIOC 3620: lab work that is part of another scheduled course at a learning institution, study that would qualify for Special Topics courses, co-op work terms, and paid work. Only one experiential learning course per degree is permitted. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or BIOC 4605.
FORMATS: Lab

BIOC 3700 Biomolecular Chemistry
CREDIT HOURS: 3
This course covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.
PREREQUISITES: BIOC 2300.03, 2610.03, CHEM 2401.03, and CHEM 2402.03 (all with a grade of B- or higher); MATH 1000.03 or 1215.03, or instructor's consent
EXCLUSIONS: BIOC 3200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOC 4001 Special Topics in Biochemistry
CREDIT HOURS: 3
Students interested in topics not covered in formal courses may ask the department for special courses to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area. COORDINATOR: C. Too
PREREQUISITES: BIOC 3300.03, BIOC 3400.03, and BIOC 3700.03 (average of B or higher and consent of coordinator)

BIOC 4010 Bioinformatics
CREDIT HOURS: 3
This course presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
CROSSLISTED: BIOC 5010.03
FORMATS: Lecture | Lab

BIOC 4027 Molecular Mechanisms of Cancer
CREDIT HOURS: 3
The multi-step nature of ‘carcinogenesis’ is the focus of this course. This course dissects the role of oncogenes, tumor suppressors, cell death and survival, differentiation, angiogenesis, metastasis, inflammation, and anticancer immunity in cancers. Major research techniques routinely used in cancer research are discussed to fully understand the process of cancer development, progression and persistence.
PREREQUISITES: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class. Permission of instructor required
CROSSLISTED: PATH 5027.03 and MICI 5027.03/4027.03
FORMATS: Lecture | Discussion

BIOC 4302 Biochemistry of Lipids
CREDIT HOURS: 3
The biochemistry and metabolism of a variety of lipids is studied, especially of those, such as fatty acids, glycolipids, eicosanoids, steroids and phospholipids, with specialized physiological or lipid-second messenger functions. Intracellular and inter-tissue transport and regulatory processes are emphasized. The chemistry and physics of insoluble lipids in an aqueous environment are explored and problems in the interaction of lipids with soluble and insoluble enzymes are considered.
PREREQUISITES: BIOC 3300.03 and 3700.03
FORMATS: Lecture

BIOC 4305 Mechanisms of Signal Transduction
CREDIT HOURS: 3
The emphasis of this course is to introduce concepts and key mediators of signal transduction. Topics include protein kinases, tumour suppressors, oncogenes, G-protein coupled receptors, calcium signalling, lipids in signalling, integration of signalling cascades, cytoskeletal reorganization, cellular metastasis, apoptosis, anoikis, genomic stability, and stem cell biology.
PREREQUISITES: BIOC 3300.03 or instructor's consent
EXCLUSIONS: BIOC 4301.03
FORMATS: Lecture

BIOC 4306 Nutritional Biochemistry
CREDIT HOURS: 3
Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This course considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.
PREREQUISITES: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission
FORMATS: Lecture | Other (explain in comments)

BIOC 4403 Genes and Genomes
CREDIT HOURS: 3
This course discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organellar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organellar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.
PREREQUISITES: BIOC 3400.03 or BIOL 3046.03 or instructor's consent
CROSSLISTED: BIOC 5403.03
FORMATS: Lecture

BIOC 4404 Gene Expression
CREDIT HOURS: 3
The different mechanisms for regulation of gene expression in bacterial and eukaryotic cells, and their viruses, are emphasized. Particular topics include genomic, transcriptional, and post-transcriptional modes of regulation.
PREREQUISITES: BIOC 3400.03 or instructor’s consent

CROSSLISTED: BIOC 5404.03
FORMATS: Lecture

BIOC 4501 Medical Biotechnology
CREDIT HOURS: 3
This course covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, DNA sequencing, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.
PREREQUISITES: BIOC 3400.03 or instructor's consent
CROSSLISTED: BIOC 5501.03
FORMATS: Lecture | Discussion

BIOC 4604 Research Project I
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one course without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, BIOC 3400.03 and BIOC 3700.03.
FORMATS: Lab

BIOC 4605 Research Project II
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: BIOC 4604.03
FORMATS: Lab

BIOC 4700 Proteins
CREDIT HOURS: 3
Our theme is the relationship between structure and function. The kinetic and thermodynamic determination of the protein fold is explored. Specific details of how form determines function in binding other molecules both small and large in membranes, and in energy transduction are provided. Protein evolution and turnover are examined.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601.03 AND CHEM 2301.03 AND CHEM 2304.03), or instructor's consent.
CROSSLISTED: BIOC 5700.03
FORMATS: Lecture

BIOC 4701 Enzymes
CREDIT HOURS: 3
Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent.
CROSSLISTED: BIOC 5701.03
FORMATS: Lecture

BIOC 4702 Biophysical Characterization of Macromolecules
CREDIT HOURS: 3
This course covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent. Recommended: PHYC 1190.03 and 1290.03, or 1310.03 and 1320.03
CROSSLISTED: CHEM 4602.03
EXCLUSIONS: BIOC 5702.03, CHEM 5602.03
FORMATS: Lecture

BIOC 4703 Structural Biology
CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomicresolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700 or CHEM 3601 or instructor's consent.
CROSSLISTED: CHEM 4603.03

EXCLUSIONS: BIOC 5703.03, CHEM 5603.03
FORMATS: Lecture

BIOC 4813 Biochemistry of Clinical Disorders
CREDIT HOURS: 3
This course is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction, and acid-base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.
PREREQUISITES: BIOC 3300.03 and BIOC 3400.03 and BIOC 3700.03 or consent of instructor
CROSSLISTED: PATH 5013.03, BIOC 5813.03
EXCLUSIONS: BIOC 4811.03 and BIOC 4812.03
FORMATS: Lecture | Discussion

BIOC 4835 Human Genetics
CREDIT HOURS: 3
For science students with special interest in human genetics. Topics include errors of metabolism, human development, transmission genetics, DNA structure, gene function, mutation and chromosomal alterations, population genetics, genetics of immunity and cancer, genetic technology in medicine, and ethical and social issues related to medical genetics.
PREREQUISITES: BIOC 3400.03 or permission from instructor
CROSSLISTED: BIOL 4035.03, 5035.03, PATH 5035.03
FORMATS: Lecture | Tutorial

BIOC 8891 Co-op work term 1
CREDIT HOURS: 0

BIOC 8892 Co-op work term 2
CREDIT HOURS: 0

BIOC 8893 Co-op work term 3
CREDIT HOURS: 0
CALENDAR NOTES: CHEM 3601.03 and PHAC 3001.03 are considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4001.03 to be BIOC 4000-level courses when taken as part of Biochemistry & Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), cannot be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry & Molecular Biology.

BIOC 8894 Co-op work term 4
CREDIT HOURS: 0

Bioinformatics

Much of the current research in the biological sciences today requires the handling of "Big Data". Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Minor in Bioinformatics
This minor is available to students registered in a 120 credit hour Bachelor of Science or Bachelor of Science (Computer Science) program.

Much of the current research in the biological sciences today requires the handling of "Big Data". Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

To qualify for a Minor in Bioinformatics, students must take **all Required Courses** and enough courses from the **Selectives** list to total 18 credit hours above the 2000 level that count uniquely toward the Minor (e.g. do not also count toward a Major or Honours degree). In addition all students must complete the prerequisite 1000-level courses.

Pathways to obtaining the Minor in Bioinformatics have been designed for students majoring in Computer Science, Biochemistry & Molecular Biology, Biology, Marine Biology, Statistics and Neuroscience. Students in other programs may obtain the Minor by fulfilling the general requirements below, but should be aware that most of the courses listed have prerequisites, and that they may need to complete a number of courses in addition to the required and selective courses.

Irrespective of path, students with a Bioinformatics Minor will end up having taken a common set of courses in Computer Science, Calculus, Statistics, Genetics, and Molecular Biology or Biochemistry. All students will also receive training in use of ACENET.

Minor in Bioinformatics – General requirements

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor)

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry & Molecular biology

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080.03/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101.03/MARI 3101.03: Microbial Ecology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4010.03: Bioinformatics
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Biochemistry & Molecular Biology students
Coordinator: Dr. Claudio Slamovits (claudio.slamovits@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required course:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOL 3046.03: Molecular Evolution
- BIOC 4010.03: Bioinformatics *
- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Biology or Marine Biology students
Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)

- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 3046.03: Molecular Evolution * or BIOC 3400.03: Nucleic Acid Biochemistry & Molecular Biology *

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
    - BIOL 3101/MARI 3101.03: Microbial Ecology *
    - BIOL 3042/MARI 3042.03: Molecular Ecology *
    - BIOL 3046.03: Molecular Evolution *
    - BIOC 3400.03: Nucleic Acid Biochemistry & Molecular Biology *
    - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
    - CSCI 4181.03: Bioinformatics Algorithms
    - BIOC 4010.03: Bioinformatics *
    - BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Computer Science students
Coordinator: Dr. Robert Beiko (beiko@cs.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics *
    - BIOL 2030.03: Genetics and Molecular Biology
    - BIOL 2040.03: Evolution
    - BIOL 3046.03: Molecular Evolution

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development *
- CSCI 3110.03: Design and Analysis of Algorithms I *
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics *
    - CSCI 4181.03: Bioinformatics Algorithms *
    - BIOC 4403.03: Genes and Genomes (Highly recommended)

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Statistics or Mathematics students
Coordinator: Dr. Hong Gu (hgu@mathstat.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)

- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1500.06 X/Y: Calculus)

Required courses

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 3046.03: Molecular Evolution

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03 :Intro to Computational Biology and Bioinformatics
- CSCI 4181.03 :Bioinformatics Algorithms
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Neuroscience students
Coordinator: Dr. Tamara Franklin (tamara.franklin@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry & Molecular biology

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101/MARI 3101.03: Microbial Ecology
    - BIOL 3042/MARI 3042.03: Molecular Ecology
    - CSCI 3110.03: Design and Analysis of Algorithms I
    - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
    - CSCI 4181.03: Bioinformatics Algorithms
    - BIOC 4010.03: Bioinformatics
    - BIOC 4403.03: Genes and Genomes (Highly recommended)

Introduction
Welcome to the Department of Biology. It has been said that the 21st century will be the century of Biology. We are inclined to agree. Biologists study the entire hierarchy of living systems from molecules, cells, organelles and organs to individuals, populations, and ecosystems. Increasingly, the focus of biological inquiry has shifted from reducing living systems into their parts to investigating how these parts interact in complex systems from which novel and unique properties emerge.

The Department of Biology offers both undergraduate and graduate students a wide range of learning experiences and training in the biological sciences. The undergraduate core introduces the student to the whole biological hierarchy and provides an excellent introduction to the biodiversity of species and their habitats. There are multiple avenues for more tailored learning as well, including independent research opportunities, special topics courses, experiential learning, specialty certificates, and honours research. State of the art laboratories provide experience in current technology and experimental design. Our Seaside Program includes a large number of summer field courses covering freshwater, marine, and terrestrial ecosystems. We excel in Marine Biology as proximity to the Atlantic Ocean gives us the capacity to provide hands-on marine training. In 2014, the Department of Biology began participating in a unique Medical Sciences program that was developed collaboratively by the Faculty of Science and the Faculty of Medicine.

There has never been a more exciting time to be a Biologist, nor has the need to understand the intricacies of nature been more urgent. Our comprehensive programs prepare students for a wide range of career options, including research and education, field and laboratory positions, environmental management and conservation, medical sciences and biotechnology, bioengineering, industry, and business. Not every student will use this degree to be a biologist but each one will have the opportunity to participate in and contribute to one of the most worthwhile endeavors in humanity's near future: understanding nature and how humanity can live better without endangering the multitude of living systems around us, and in turn, ourselves.

Degree Programs
The Department of Biology offers the following degree programs in Biology

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Biology
- Minor in Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Biology undergraduate academic advisor.

Prospective Biology students should be aware that to advance to second year Biology courses, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chair
Bentzen, P., MSc (UBC), PhD (McGill)

Biology Program Advisors
For Biology program advising, please email biology.advising@dal.ca for an auto-reply with advisors' office hours.

Professors Emeriti
Hall, B. K., DSc (UNE), LLD (Calgary), PhD (UNE), FRSC, University Research Professor Emeritus
McLaren, I. A., MSc (McGill), PhD (Yale), George S. Campbell Professor Emeritus
O'Dor, R. K., PhD (UBC)
MacRae, T. H., MSc, PhD (Windsor)

Professors
Adamo, S., BSc (Toronto), PhD (McGill), major appointment in Psychology
Bentzen, P., MSc (UBC), PhD (McGill), Killam Professor
Bielawski, J. P., PhD (Texas A & M Univ)
Budge, S., PhD (Memorial), major appointment in Process Engineering
Burton, D. L., BSc (Dalhousie), MSc (Guelph), PhD (Alberta), major appointment in Plant, Food, and Environmental Sciences (Agr)
Caldwell, C. D., BSc (Mt. A), MSc (Dalhousie), PhD (East Anglia), major appointment in Plant, Food, and Environmental Sciences (Agr)
Croll, R., PhD (McGill), major appointment in Physiology/Biophysics (Medicine)
Cutler, C., BSc Hons (Memorial), MPM (SFU), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)

Dustin, J., major appointment in Faculty of Agriculture
Filgueira, R., major appointment in Marine Affairs
Fredeen, A., BSA (Saskatoon), MSc (Guelph), PhD (California), major appointment in Animal Science and Aquaculture (Agr)
Gunawardena, A., BSc (Peradeniya), PhD (Oxford Brookes)
Hutchings, J., MSc, PhD (Memorial), Killam Chair
Iverson, S. J., PhD (Maryland)
Johnston, M. O., PhD (Chicago), Campbell Chair
Lada, R., BSc, MSc (Hort) (TNAU), PhD (Adelaide), major appointment in Plant, Food, and Environmental Sciences (Agr)
Lane, P. A., MSc (SUNY Binghamptom), PhD (SUNY Albany)
Leonard, M. L., PhD (Ottawa)
Lotze, H. K., BSc (Gottingen), MSc, PhD (Kiel)
Lynch, D. H., BSc, MSc (Agr) (McGill), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
MacLaren, L., major appointment in Faculty of Agriculture
MacNeil, M. A., BSc (Hons) (Dalhousie) MSc (Georgia), PhD (Newcastle)
Meinertzhagen, I. A., DSc, PhD (St. Andrews), University Research Professor, major appointment in Psychology
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie), major appointment in Oceanography
Miar, Y., major appointment in Faculty of Agriculture
Nams, V. O., BSc (Toronto), MSc (Alberta), PhD (Victoria), major appointment in Environmental Sciences (Agr)
Percival, D. C., BSc (Agr), MSc, PhD (Guelph), major appointment in Environmental Sciences (Agr)
Prithiviraj, B., BSc (Agr) (Annamalai), MSc, PhD (BHU)
Rathgeber, B., major appointment in Faculty of Agriculture
Ruzzante, D. E., PhD (Dalhousie), Killam Professor
Scheibling, R. E., BSc, PhD (McGill)
Simpson, A. G. B., BSc, PhD (Sydney Australia)
Stewart-Clark, S., major appointment in Faculty of Agriculture
Stone, S. L., PhD (York)
Walde, S. J., PhD (Calgary)
Wang-Pruski, G., BSc (China), PhD (Alberta), major appointment in Plant and Animal Science (Agr)
Whitehead, H., MA, PhD (Cambridge)
Worm, B., PhD (Kiel)

Associate Professors
Crossin, G. T., BA (Maine), BSc (New Hampshire), MSc, PhD (UBC)
Cutler, C., BSc Hons (Memorial), MPM (SFU), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
El Hiani, Y., PhD (Universite' de Picardie Jules Verne), major appointment in Physiology and Biophysics (Medicine)
Gujar, S., DVM (Marathwarda), PhD (Memorial), MHA (Dalhousie), major appointment in Pathology and Microbiology & Immunology (Medicine)
Herbinger, C. M., PhD (Dalhousie)
Latta, R., MSc (Toronto), PhD (Colorado)
Pinder, A., PhD (Mass)
Rupasinghe, H. P. V., BSc (Peredeniya), MSc (Iowa), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Staicer, C. A., MSc (Northern Arizona), PhD (Univ Mass Amherst)

Assistant Professors
Bertrand, E., BSc (Bates College), PhD (MIT/WHOI)
Côté, P. D., BSc (Ottawa), PhD (McGill)
McLean, N. L., BSc (Agri), MSc (McGill), PhD (Dalhousie), major appointment in Plant, Food and Environmental Sciences (Agr)
Myles, S. A., BA (St. Thomas), MSc (Oxford), PhD (Max Planck), major appointment in Plant, Food and Environmental Sciences (Agr)

Summer Education and Applied Science Institute at Dalhousie in Ecology (S.E.A.S.I.D.E.)
Staicer, C. A., MSc (Northern Arizona), PhD (Univ Mass Amherst), Director

Adjunct
Baillie, S., BSc (Acadia), MSc (Memorial), PhD (New Zealand)
Bowen, W. D., PhD (UBC), B.I.O.
Bradbury, I. R., BSc, BEd, MSc (Memorial), PhD (Dalhousie)
Broders, H., BSc (Hons) (Acadia), MSc (Memorial), PhD (UNB)
Cameron, R., BScF (New Brunswick), MSc (Acadia)
Dalziel, A., BSc (Acadia), MSc (Queens), PhD (UBC)
Davidsen, J., PhD (Tromso)
Devillers, R., BSc (Lyon), MSc (Montreal), PhD (Morne-La-Vallee)
Ells, T., BSc, MSc (Acadia), PhD (Dalhousie)
Franz-Odendaal, T., BSc (Hons), MSc, PhD (Cape Town)
Frasier, T. R., BSc (North Dakota), PhD (McMaster)
Froese, R., PhD (Hamburg)
Gero, S., BSc, MSc, PhD (Dalhousie)
Guderley, H., BA (Indiana), PhD (UBC)
Harvey-Clark, C., BSc (Univ of Victoria), DVM (Saskatoon)
Heiss, S., PhD (Cologne)
Hipfner, M., BSc (Guelph), MSc (Ottawa), PhD (Memorial)
Horn, A., BSc (Cornell), PhD (Toronto)
Keith, D., BSc, MSc (Calgary), PhD, BEng (Dalhousie), DEng (Cape Breton)
Kuparinen, A., MSc, PhD (Helsinki)

LaCroix, C., BSc, MSc (McGill), PhD (Guelph)
Lee, R. W., PhD (Stoney Brook)
Litvak, M., BSc (York), MSc, PhD (Toronto)
Love, O., BSc (Concordia), MSc (McGill), PhD (SFU)
Mallory, M., BSc (Queens), MSc, PhD (Carleton)
Moors-Murphy, H., BSc, MSc (UNB), PhD (Dalhousie)
Papadadopoulos, Y. A., MBA (St. Mary's), PhD (Guelph)
Qaderi, M. M., MSc, PhD (Western)
Quaas, M., Diplom (Duisburg), PhD (Heidelberg)
Ronconi, R. A., BSc (Alberta), PhD (Victoria)
Ross, N., BSc, PhD (McGill)
Rossolimo, T., MSc (Moscow State Univ), PhD (Russian Academy of Science)
Schmitz-Streit, R. A., PhD (Marburg)
Shackell, N. L., BSc (McGill), PhD (Dalhousie)
Skinner, M. A., BSc (UCB), MSc, PhD (UNB)
Stokesbury, M. J. W., BA (Acadia), BSc (UNB), MSc (Acadia), PhD (Dalhousie)
Swain, D. P., PhD (UBC)
Tittensor, D. P., BSc (Aberdeen), MSc (Memorial), PhD (Dalhousie)
Weilgart, L., BA (Luther), MSc (Memorial), PhD (Dalhousie)
Weir, L., BSc (Concordia), MSc, PhD (Dalhousie)
Whoriskey, F. G., PhD (Laval)

University Teaching Fellow
McAllister-Irwin, N., PhD (Dalhousie)
McCarville, M., BSc, MSc (Dalhousie)
Welsh, E., BSc, (McMaster), MSc (Guelph), BEd (Dalhousie)

Senior Instructors
Bishop, T., BSc, MSc (Memorial)
Cooper, M., PhD (Dalhousie), BEd (Ottawa)
Gass, G., PhD (Toronto)
Gibson, L., BSc (Victoria), MSc (Dalhousie)
Grantham, D., BSc (Hons), MSc (Dalhousie)
Schmidt, A., MSc, PhD (Dalhousie)
Van Dommelen, J., MSc (Dalhousie)

Instructors
Ewart, K. V., PhD (Memorial), major appointment in Biochemistry & Molecular Biology
Rajaselvam, R. J., MScF (Toronto), MSc (Oxford), MPhil (Peradeniya), BSc (Peradeniya)

Post Doctoral Fellows
Batista, D., PhD (VUB)
Boerden, K., PhD (Dalhousie)
Brownscombe, J., PhD (Carleton)
Einfeldt, A., PhD (UNB)
Godwin, S., PhD (SFU)
Murphy, G., PhD (Dalhousie)
Pardo, S., PhD (Simon Fraser)

BSc or BA (120 credit hour) Concentrated Honours in Biology

Students who want a challenging program resulting in a broad background in Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in the core Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility).

- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science IIor equivalent)
- An additional 3 credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plant and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

A minimum of 30 additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level, of which at least 18 credit hours must be at or above the 3000 level. One of the following course options must be included:

Core Biology Courses

- BIOL 3050.03: Developmental Biology
  OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, students must complete an Honours Thesis:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Combined Honours in Biology and another subject

Students who wish to study Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in BIOL or BIOL-equivalent courses, whether Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area.For Biology, this requirement is satisfied through BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. To be admitted to the Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the Honours subject.
    - If Biology is to be the primary subject area, students must
        - Identify and gain the support of a thesis supervisor during their third year of studies (see Biology Honours webpage for supervisor eligibility).
        - With the supervisor's input, draft and submit a thesis proposal to the Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in theAcademic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Scienceor SCIE 1506.09 Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science IIor equivalent)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You or equivalent
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

Core Biology Courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

If Biology is the primary subject, students must complete 12 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. If Biology is the secondary subject, you must complete 18 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. In either case, one of the following course options must be included:

Core Biology Courses

- BIOL 3050.03: Developmental Biology
  OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, if Biology is the primary subject, students will also complete:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines, and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Major in Biology

The Major degree programis suited to students who want to focus on Biology, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Biology and is designed for students not anticipating subsequent experimental graduate-level training in Biology or related disciplines. Biology Majors complete a minimum of 42 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. Biology Majors do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics coursesand experiential learningcourses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Biology. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science IIor equivalent)
- An additional three credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of BIOL or BIOL-equivalent courses.

Students are encouraged to consult Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Double Major in Biology and another subject

The Double Major degree program allows students to combine a study of Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in BSc Double Major with Biology as the primary subject. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)

- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent) (if planning to take BIOL 2060.03: Introductory Ecology)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- An additional three credit hours of MATH or STAT (BSc)

2000 level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- Any TWO of
    - BIOL 2003.03: Animal Diversity
    - BIOL 2004.03: Diversity of Plants and Microorganisms
    - BIOL 2060.03: Introductory Ecology
- Three additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level

3000/4000 level

- A minimum of 18 credit hours of BIOL or BIOL-equivalent courses at or above the 3000 level whether Biology is the primary or the secondary subject

Please note that a double major in Biology and Marine Biology is not offered.

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (90 credit hour) Minor in Biology

The 90 credit hour degree with Minor in Biology is appropriate for students who want to study some Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Biology is usually the preferred option for students who wish to combine studies in Biology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be **BIOL-equivalent**.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (120 credit hour) degree program with a **Minor in Biology** is also available to students in the Faculty of Science.

Minor in Biology
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to students majoring in Marine Biology.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (90 credit hour) degree program with a Minor in Biology is also available to students in the Faculty of Science.

Contact Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Biology

Co-op Academic Advisor: Mindy McCarville mindy.mccarville@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biology, or in Combined Honours or Double Major programs with Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Biology Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biology, please see the Biology department webpage.

Minors available to students in Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Biology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Biology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Biology and from the Faculty of Engineering in their first year of study.

Required Biology courses for a BSc/BEng or BA/BEng program in Biology

- A minimum of 18 credit hours in BIOL above the 1000 level

Note that there are prerequisite requirements for entry into upper level Biology courses.

Course Selection Guidelines

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select courses that fit their interests and goals, we have identified three general areas in Biology:
A. Ecology and Evolution,
B. Organismal Biology,
C. Cell/Molecular Biology.

Below, we list courses associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

IMPORTANT: Students should choose 2000 level courses in their second year with care, so that they will have the necessary pre-requisites to enroll in third and fourth year courses in their interest areas.

NOTE: These are not requirements. Students may select courses from any or all areas, provided they meet requirements for their degree program.

Ecology and Evolution

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded course of study in Ecology or Evolution or both will include some courses in basic principles applicable to all organisms and habitats/ecosystems, as well as

more specific courses on the details of how these principles play out in particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well-developed numerical skills as well as exposure to the application of E&E in broader society. Students wishing to emphasize E&E in their degree program should select courses from the following:

Principles: BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3101

Biodiversity: BIOL 3080, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, BIOL 3620, BIOL 3622, BIOL 3626, MARI 3090

Ecosystems: BIOL 3101, BIOL 3623, BIOL 3624, BIOL 3664, BIOL 3761, BIOL 4002, BIOL 4323, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

Evolution: BIOL 3102, BIOL 3326, ERTH 2205, ERTH 2420, MARI 4090

Applications: BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3328, BIOL 3329, BIOL 3580, BIOL 3601, BIOL 3623, BIOL 3624, BIOL 3634, BIOL 4001, BIOL 4065, BIOL 4160, BIOL 4335, BIOL 4369, HSTC 2204, MARI 3602, MARI 3603, MARI 3604

Methods and Data Skills: BIOL 3633, BIOL 3664, BIOL 3680, BIOL 4061, BIOL 4062, BIOL 4323, MARI 4600

Organismal Biology

Organismal biology includes areas such as development, physiology and anatomy, as well the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select courses from the following:

Developmental Biology: BIOL 3050

Physiology/Anatomy: BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3336, BIOL 3421, BIOL 3430, PHYL 3120

Microbes: BIOL 2004, BIOL 3101, BIOL 3102

Algae/plants: BIOL 3221, BIOL 3225, BIOL 3226

Animals: BIOL 3080, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3336, BIOL 3622, BIOL 3626, ERTH 2420, MARI 3090, MARI 3627, MARI 4090

Organisms in the environment: BIOL 3062, BIOL 3101, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4323, BIOL 4369, BIOL 4370

General: BIOL 3024, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4664

Cell/Molecular Biology

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider the courses listed below. Note that Biology credit can be obtained for Microbiology, Biochemistry and Physiology courses above the 2000 level.

Biology: BIOL 3046, BIOL 3102, BIOL 4020, BIOL 4035

Microbiology: all MICI courses 2000 level or higher

Biochemistry: all BIOC courses 2000 level or higher

Neuroscience: NESC 2570, NESC 3970

Physiology: all PHYL courses 2000 level or higher

BIOL-Equivalent Courses

Several other Dalhousie departments offer courses in one or more areas of Biology. Students enrolled in a 120 credit hour BSc or BA program in Biology may count any of the following courses toward their Biology program course requirements:

Please note that BIOL-equivalent courses will not count towards a minor program in Biology.

Any course cross-listed as a BIOL course	
Agriculture (AGRI)	AGRI 1000
Anatomy (ANAT)	All ANAT courses 2000 level or higher
Animal Science (ANSC)	ANSC 2002, ANSC 2005, ANSC 2006, ANSC 3000, ANSC 3006, ANSC 4008
Aquaculture (AQUA)	AQUA 2000, AQUA 3000
Biochemistry (BIOC)	All BIOC courses 2000 level or higher
Biology (BIOA)	BIOA 2000, BIOA 2001, BIOA 2002, BIOA 2004, BIOA 2005, BIOA 2006, BIOA 2007, BIOA 2008, BIOA 3002, BIOA 3003, BIOA 3004, BIOA 3006, BIOA 3008, BIOA 4000, BIOA 4003, BIOA 4004
Environmental Science (ENVA)	ENVA 4002, ENVA 4003
Genetics (GENE)	GENE 3000, GENE 3001, GENE 4000, GENE 4003, GENE 4004
Health Promotion (HPRO)	HPRO 3250
History (HIST)	HIST 2074, HIST 2995, HIST 3073, HIST 3074

History of Science and Technology (HSTC)	HSTC 1200, HSTC 2200, HSTC 3212
Microbiology (MICI)	All MICI courses 2000 level or higher
Microbiology (MCRA)	MCRA 2000, MCRA 3000, MCRA 4000
Marine Biology (MARI)	All MARI courses
Neuroscience (NESC)	NESC 3125, NESC 3440, NESC 4374, NESC 4375, NESC 4376, NESC 4377
Nutrition (NUTR)	NUTR 3000, NUTR 3001, NUTR 3002, NUTR 4000
Pathology (PATH)	PATH 2115, PATH 3000
Pharmacology (PHAC)	PHAC 3001.03, PHAC 4001.03
Physiology (PHYL)	All PHYL courses 2000 level or higher
Plant Science (PLSC)	PLSC 3000, PLSC 4000, PLSC 4002, PLSC 4003, PLSC 4004
Psychology (PSYO)	PSYO 2160, PSYO 3162
Research Methods /Project Seminars (RESM)	RESM 4002, RESM 4003, RESM 4008, RESM 4009, RESM 4010, RESM 4011
Science, Interdisciplinary (SCIE)	SCIE 2000
Statistics (STATS)	STAT 4570

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
The normal entry requirement for admission to upper level courses in Biology is a grade of C or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or in SCIE 1505.18. Students with a lower grade and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

Consult the Biology Department's website for updates on new courses and suggested course combinations.

Course Descriptions

BIOL 1010 Principles of Biology Part I
CREDIT HOURS: 3
This course, which prepares students for more advanced courses in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or BIOL 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
EXCLUSIONS: BIOL 1020.03, SCIE (15XX), BIOA 1002.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOL 1011 Principles of Biology Part II
CREDIT HOURS: 3
Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology. Knowledge of high school mathematics, chemistry and biology is recommended
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (BIOL 1020) and BIOL 1011 (BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements
EXCLUSIONS: BIOL 1021.03, SCIE 15XX, BIOA 1003.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOL 1020 Introductory Biology I: Cells, Genetics & Evolution
CREDIT HOURS: 3
Biology 1020.03 is the equivalent of BIOL 1010.03, and is offered primarily online in the fall, winter and summer terms. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, and recorded lectures.

CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees. Midterm and final exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1010.03, SCIE 15XX, BIOA 1002.03
FORMATS: Online Delivery

BIOL 1021 Introductory Biology II: Organismal Biology & Ecology
CREDIT HOURS: 3
Biology 1021.03 is the equivalent of BIOL 1011.03, and is offered primarily online in the fall, winter and summer terms. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, and recorded lectures.
CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees. Midterm and final exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1011.03 or SCIE 15XX, BIOA 1003.03
FORMATS: Online Delivery

BIOL 1050 Biology and Society
CREDIT HOURS: 3
Health, climate change, genetically modified organisms, species and the evolution of disease. Designed for non-majors this course introduces the basics of cell biology, genetics and evolution and how they affect our society. Students acquire a foundation for life-long learning and critical thinking in biology through lectures, independent study and lab activities. NOTE: This course is for students in an Arts program or program other than Biology.
PREREQUISITES: None
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, SCIE 15XX
FORMATS: Lecture | Lab

BIOL 2003 Animal Diversity
CREDIT HOURS: 3
Surveys the diversity of forms and functions of invertebrate and vetebrate animals. The course takes a phylogenetic approach, exploring the evolutionary relationships and key transitions between metazoan taxa. Examples of the different life forms are introduced.
PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1505.18).
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 2004 Diversity of Plants and Microorganisms
CREDIT HOURS: 3
Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things - Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 2020 Cell Biology
CREDIT HOURS: 3
An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03) or SCIE 1505.18 or equivalent. RECOMMENDED: CHEM 1011.03 and CHEM 1012.03
EXCLUSIONS: BIOA 2001.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 2030 Genetics and Molecular Biology
CREDIT HOURS: 3
The power and prominence of modern genetics are emphasized through a blend of classical and molecular approaches. Topics: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene expression; gene mutations; and genetic engineering. Course-based authentic research in lab.
PREREQUISITES: A grade of C or higher in BIOL 1010 or BIOL 1020.03 or BIOA 1002.03 or BIOL 1031.03 or DISP (SCIE 15XX) or equivalent.
RECOMMENDED: CHEM 1011.03 and CHEM 1012.03
EXCLUSIONS: GENE 2000.03
FORMATS: Lecture | Lab | Tutorial

BIOL 2040 Evolution
CREDIT HOURS: 3
A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.
CALENDAR NOTES: Recommended: SCIE 1111.03 Writing for the Sciences.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or BIOL 1020.03 or BIOL 1031.03 or BIOA 1002.03 and BIOA 1003.03, or SCIE 1506.09 and SCIE 1507.09 or equivalent.
EXCLUSIONS: none

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOL 2060 Introductory Ecology
CREDIT HOURS: 3
Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The course has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.
PREREQUISITES: A grade of C or higher in BIOL 1011.03, BIOL 1021.03, BIOA 1003.03, ENVS 1100.03, ENVS 1000.06, BIOL 1030.03, or (SCIE 1505.18); and a grade of D or higher in MATH/STAT 1060.03 or MATH/STAT 2080.03.
EXCLUSIONS: BIOA 3001.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

BIOL 2601 The Flora of Nova Scotia
CREDIT HOURS: 3
Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: One year of university courses
EXCLUSIONS: BIOL 3219.03
FORMATS: Lecture | Lab

BIOL 2605 Introduction to Marine Life of Nova Scotia
CREDIT HOURS: 3
Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Marine Biology students may NOT use this course as part of their major degree requirements. This course is aimed at non-majors who have completed at least one year of university.
PREREQUISITES: One year of university courses
FORMATS: Lecture | Lab

BIOL 3003 Introduction to Field Oceanography
CREDIT HOURS: 3
See course description for OCEA 3003.03 in the Oceanography section of the calendar.

BIOL 3024 Microscopy
CREDIT HOURS: 3
See course description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

BIOL 3037 Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
CREDIT HOURS: 3
This course introduces students to gene editing and synthetic biology tools (eg.CRISPR) as well as both current and future applications of those tools for conservation, medicine, and food production. This course empowers students to develop informed opinions about the ethics of using such tools in science and society.
PREREQUISITES: A mark of B- or better in both BIOL 2020 (Cell Biology) and BIOL 2030 (Genetics and Molecular Biology) or instructor's consent.
RESTRICTIONS: E1 and E2. Reservation for Biology majors to register first.
FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 3042 Molecular Ecology
CREDIT HOURS: 3
We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.
PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03.
CROSSLISTED: MARI 3042.03
EXCLUSIONS: BIOL 4042.03
FORMATS: Lecture

BIOL 3044 Ecological Genetics
CREDIT HOURS: 3
An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.
PREREQUISITES: BIOL 2040.03 or BIOL 3041.03
EXCLUSIONS: BIOL 4044.03
FORMATS: Lecture

BIOL 3046 Molecular Evolution
CREDIT HOURS: 3
This course examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The course culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This course is complementary to BIOC 4010.03 (Bioinformatics).
PREREQUISITES: BIOL 2030.03 (or GENE 2000.03) and BIOL 2040.03
FORMATS: Lecture

BIOL 3050 Developmental Biology
CREDIT HOURS: 3
Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2030.03 (or GENE 2000.03)
FORMATS: Lecture | Lab | Discussion

BIOL 3060 Environmental Ecology
CREDIT HOURS: 3
The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the course is ecological sustainability of the human economy.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) (or see instructor)
FORMATS: Lecture | Tutorial
LAB HOURS PER WEEK: 3

BIOL 3061 Communities and Ecosystems
CREDIT HOURS: 3
Part 1 includes ecosystem history and theory, species interactions, modelling, complex systems theory, systems ecology, and quantitative approaches such as computer simulation. Part 2 discusses food webs, ecological networks, trophic cascades, ecological complexity and stability, and qualitative approaches such as loop analysis.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or INTD 2001.03 or INTD 2002.03
RESTRICTIONS: E1, E2
FORMATS: Lecture

BIOL 3062 Behavioral Ecology
CREDIT HOURS: 3
This course examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03)
FORMATS: Lecture

BIOL 3063 Resource Ecology
CREDIT HOURS: 3
This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and MATH 1000.03 (or MATH 1215.03 or SCIE 1505.18) and STAT 1060.03 (or SCIE 1505.18)
CROSSLISTED: MARI 3063.03
FORMATS: Lecture | Tutorial
LAB HOURS PER WEEK: 2

BIOL 3065 Conservation Biology
CREDIT HOURS: 3
This course offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay, and an in-depth discussion of controversial topics.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
FORMATS: Lecture | Tutorial

BIOL 3078 Principles of Animal Physiology Part I
CREDIT HOURS: 3
Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.
CALENDAR NOTES: Students must complete 3078.03 before 3079.03
PREREQUISITES: BIOL 2003.03, and BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: MARI 3074.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 3079 Principles of Animal Physiology Part II
CREDIT HOURS: 3
This course is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03.

This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.
PREREQUISITES: BIOL 3078.03 or MARI 3074.03
CROSSLISTED: MARI 3076.03
EXCLUSIONS: BIOA 3005.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 3080 The Ecology and Evolution of Fishes
CREDIT HOURS: 3
The class examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.
PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.02 (or BIOA 3001.03)
CROSSLISTED: MARI 3080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lecture

BIOL 3101 Microbial Ecology
CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03), and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: MARI 3101.03
FORMATS: Lecture

BIOL 3102 Microbial Eukaryotes: Biodiversity and Evolution
CREDIT HOURS: 3
Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This course provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 (or MICI 2100.03)
FORMATS: Lecture | Lab

BIOL 3219 Flora of Nova Scotia
CREDIT HOURS: 3
Hands-on introduction to the plants of Nova Scotia, with an emphasis on taxonomy and a focus on the flowering plants. Includes identification, morphology, distribution, habitat, and ecology. Takes several day-long and half-day field trips. Evaluation includes a plant collection, field notebook, field report, presentation, and lecture and lab exams.
CALENDAR NOTES: Instructor approval required. Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: BIOL 2004.03, and 2060.03, or equivalents
EXCLUSIONS: BIOL 2601.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3221 Diversity of Algae
CREDIT HOURS: 3
This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see http://www.seaside.science.dal.ca
PREREQUISITES: BIOL 2004.03 or equivalent
CROSSLISTED: MARI 3221.03
EXCLUSIONS: BIOL 3212.03, MARI 3212.03
FORMATS: Lecture | Lab

BIOL 3225 Plants in the Human Landscape
CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better); or SCIE 1505.18 (C+ or better) or PLAN 2001.03 (C+ or better) or instructor permission
CROSSLISTED: ENVS 3225, PLAN 3225
FORMATS: Lecture | Tutorial
LAB HOURS PER WEEK: 2

BIOL 3226 Economic Botany: Plants & Civilization
CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of B- or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: ENVS 3226.03
FORMATS: Lecture | Tutorial

BIOL 3301 Invertebrate Biology
CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSLISTED: MARI 3301.03
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 3322 Parasitology
CREDIT HOURS: 3
The course emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.
CALENDAR NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.
PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 3326 Vertebrate Design: Evolution and Function
CREDIT HOURS: 3
Vertebrate Design explores 600 million years of vertebrate evolution, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology of swimming, flying and terrestrial locomotion is also covered, along with the effect of body size on function.
PREREQUISITES: BIOL 2003.03 and BIOL 2040.03
FORMATS: Lecture

BIOL 3327 Entomology
CREDIT HOURS: 3
The course is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOA 3000.03
FORMATS: Lecture | Lab

BIOL 3328 Medical Entomology
CREDIT HOURS: 3
Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For date, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2003.03 or permission of instructor
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOL 3329 Applied Entomology
CREDIT HOURS: 3
Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this course students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab

BIOL 3336 Vertebrate Functional Morphology
CREDIT HOURS: 3
Vertebrates are mechanical machines that move through the environment in a wide variety of ways and find and process food. We use simple physics and mathematics (vectors, lever mechanics) to explore running, digging, climbing, swimming, flying etc., the mechanics of feeding and chewing and the materials from which vertebrates are built.
PREREQUISITES: BIOL 2003.03 and MATH 1000.03 (or MATH 1215.03) or permission of Instructor
RESTRICTIONS: Restricted from students with fewer than 60 credit hours.
FORMATS: Lecture | Tutorial

BIOL 3421 Comparative Vertebrate Histology
CREDIT HOURS: 3
See course description for ANAT 3421.03 in the Anatomy and Neurobiology section of this calendar.

BIOL 3430 Introduction to Human Histology
CREDIT HOURS: 3
See course description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

BIOL 3580 Philosophy of Biology
CREDIT HOURS: 3
See course description for PHIL 3420.03 in the Philosophy section of this calendar.

BIOL 3601 Nature Conservation
CREDIT HOURS: 3
This interdisciplinary course explores relationships between humans and the natural world, including damage caused to species and ecosystems. The course looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.
PREREQUISITES: BIOL 1010.03 (orBIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.05); or SCIE 15XX, or permission of instructor
FORMATS: Lecture | Tutorial

BIOL 3614 Field Ecology
CREDIT HOURS: 3
This course provides practical experience in field ecology by collecting, analysing, and interpreting field data and preparing formal reports. Class research projects address questions in animal or plant ecology within intertidal, freshwater or forest ecosystems. Instruction includes data analysis and scientific writing skills. Evaluation is based on individual written papers.
CALENDAR NOTES: Includes several weekend field trips, some overnight camping; contact instructor for details and application; auxilliary fee charged to cover costs of field expenses; course aimed at 4th year majors and 3rd year honours students. Signature required.
PREREQUISITES: BIOL 2060.03 and STAT 1060.03; STAT 2080.03 recommended
RESTRICTIONS: E1, E2
EXCLUSIONS: BIOL 3615.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3620 Field Survey of Terrestrial Biodiversity
CREDIT HOURS: 3
Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station. Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) or permission of instructor
FORMATS: Lecture | Lab

BIOL 3622 Ornithology
CREDIT HOURS: 3
Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 or BIOL 2060.03 or BIOA 3001.03, or permission of instructor
FORMATS: Lecture | Lab

BIOL 3623 Applied Coastal Ecology
CREDIT HOURS: 3
Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other classwork, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: ENVS 3623.03, MARI 3623.03
FORMATS: Lecture | Lab

BIOL 3624 Urban Freshwater Systems
CREDIT HOURS: 3
Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 and MATH 1060.03 (or STAT 1060.03 or DISP) or permission of instructor

CROSSLISTED: ENVS 3624.03
FORMATS: Lecture | Lab

BIOL 3626 Field Studies of Marine Mammals
CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and MATH 1060.03/STAT 1060.03
CROSSLISTED: MARI 3626.03
FORMATS: Lecture | Lab

BIOL 3628 Marine Ornithology
CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSLISTED: MARI 3628.03

BIOL 3630 Field Methods in Animal Behaviour
CREDIT HOURS: 3
First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor
FORMATS: Lecture | Lab

BIOL 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 (or MATH 1060.03 or SCIE 1505), or their equivalents, or permission of instructor. STAT 2080 is recommended.
CROSSLISTED: MARI 3632.03, ENVS 3632.03
FORMATS: Lecture | Lab

BIOL 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
CROSSLISTED: ENVS 3633.03, GEOG 3633.03, MARI 3633.03
EXCLUSIONS: PLAN 2006.03, GEOG 2006.03
FORMATS: Lecture | Lab

BIOL 3634 Agroforestry
CREDIT HOURS: 3
Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive course provides a foundation for understanding this traditional practice and its applications in North America.
CALENDAR NOTES: Offered in summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03 or AGRI 1000.03 or BIOA 3001.03 or permission of the Instructor. An addditional class on the biology, ecology, diversity or physiology of plants is recommended.

BIOL 3639 Herpetology
CREDIT HOURS: 3
Through a combination of lectures, labs and field activities, this course provides an overview of the global diversity, evolution, ecology and conservation of herpetofauna (amphibians and reptiles), and the natural history and identification of Nova Scotian herpetofauna. Students gain experience with common field research and monitoring techniques for herpetofauna.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03, BIOL 2003.03
FORMATS: Lecture | Lab | Other (explain in comments)
LAB HOURS PER WEEK: 5

BIOL 3640 Tropical Ecology and Biodiversity Field Class
CREDIT HOURS: 6
Hands-on introduction to tropical ecology, biodiversity, and conservation. Includes an 18-day field trip to Sri Lanka to visit a variety of tropical terrestrial and aquatic ecosystems, quantify habitats, identify species, and study agroforestry, ecological interactions and animal behavior. Evaluation includes lecture tests, field notebooks, class research projects, presentations and reports.
CALENDAR NOTES: Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2004.03 or equivalent and BIOL 2060 or equivalent or instructor's permission. An introductory course in statistics (STAT 1060.03 or similar) is recommended.

BIOL 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and STAT 1060.03 (or MATH 1060.03 or SCIE 15xx), and BIOL 2003.03
CROSSLISTED: ENVS 3664.03, MARI 3664.03
EXCLUSIONS: BIOL 3662.03, BIOL 3663.03
FORMATS: Lecture | Lab

BIOL 3680 Scientific Diving Methods for Marine Ecology
CREDIT HOURS: 3
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03, BIOL 2060.03 or BIOA 3001.03, STAT 1060.03 or DISP, internationally recognized diving certification, diving physical; recommended: BIOL 3321.03, BIOL 3301.03
CROSSLISTED: MARI 3680.03
FORMATS: Lecture | Lab

BIOL 3761 Marine Ecology
CREDIT HOURS: 3
Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and (BIOL 2003.03 or BIOL 2004.03), and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)
CROSSLISTED: MARI 3761.03
RESTRICTIONS: This course is restricted to 3rd and 4th year students.
FORMATS: Lecture | Lab

BIOL 3762 Terrestrial Ecology
CREDIT HOURS: 3
This course provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see seaside.science.dal.ca
PREREQUISITES: BIOL 2003.03 or BIOL 2004.03, and BIOL 2060.03 (or BIOA 3001.03), or instructor's permission.
FORMATS: Lecture | Lab

BIOL 3800 Experiential Learning
CREDIT HOURS: 3
Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.
CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of course coordinator.
CROSSLISTED: MARI 3800.03
EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics course, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

BIOL 3872 The Biologist's Toolkit
CREDIT HOURS: 3
Best practices for scientific computing and data handling, theory of visualisation, and scripting, teaching students how to create, store, and manipulate data using the object-oriented programming language R. Examples and projects will be drawn from a wide variety of biological areas, covering typical problems encountered with computer use.
CALENDAR NOTES: This course is aimed at biology and marine biology majors who are looking to pursue future research in any discipline.
PREREQUISITES: BIOL 2030.03 or BIOL 2040.03 or BIOL 2060.03 or permission of Instructor
FORMATS: Lecture | Lab

BIOL 4001 Environmental Impact Assessment
CREDIT HOURS: 3
This course serves as the capstone to the EIA certificate. It is a hands-on training course that guides students through a nine-step framework for preparing individual EIAs on a physical project as well as a Strategic Environmental Assessment on a policy. International, national, provincial examples illustrate the framework.
CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credit hours and be in their fourth year of study, or have permission of instructor.
PREREQUISITES: ENVS 1100.03 and 1200.03 (or ENVS 1000X/Y.06) or BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06
CROSSLISTED: ENVS 4001.03
RESTRICTIONS: E1, E2, and E3 This course is open to all students with the necessary prerequisites regardless of whether they are applying for the EIA certificate or not.
FORMATS: Lecture | Tutorial

BIOL 4002 The Science of Wetland Ecosystems
CREDIT HOURS: 3
See ENVS 4002.03 in the Environmental Science section of the calendar.

BIOL 4020 Advanced Cell Biology
CREDIT HOURS: 3
This advanced class focuses on how the animal cell interacts with its environment and integrates information to proceed with an appropriate course of action. Consequences of disrupting signaling pathways are also examined. Lectures are supplemented with assigned readings of original research articles for discussion in class.
PREREQUISITES: BIOL 2020.03 or BIOA 2001.03 with a minimum grade of B- or instructor's consent.
EXCLUSIONS: BIOL 3020.03
FORMATS: Lecture | Discussion

BIOL 4035 Human Genetics
CREDIT HOURS: 3
See BIOC 4835 in the Biochemistry section of the calendar.

BIOL 4061 Design of Biological Experiments
CREDIT HOURS: 3
This course introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.
PREREQUISITES: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students
FORMATS: Lecture

BIOL 4062 Analysis of Biological Data
CREDIT HOURS: 3
The course introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods. Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.
PREREQUISITES: STAT 2080.03 or ECON 2280.03 or MATH 2080.03

BIOL 4065 Sustainability and Complexity
CREDIT HOURS: 3
Sustainability is a transdisciplinary area integrating equitable societies, protected environments, and robust economies. Achieving sustainability is a challenge that has only had limited success in our complex world. Complexity studies offer new approaches for achieving sustainability beyond the traditional ones mostly focused upon reducing unsustainability.
CALENDAR NOTES: Course open to students in: Faculty of Science, College of Sustainability, and International Development students in FASS
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2001.03/2002.03 (or OCEA 2000X/Y.06) or SUST 2000.06 or SUST 2001.06
RESTRICTIONS: E1, E2, E3 Restricted to students in: Faculty of Science, College of Sustainability and International Development students in FASS
FORMATS: Lecture | Tutorial | Discussion

BIOL 4080 Laboratory Studies of Fishes
CREDIT HOURS: 3
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.
PREREQUISITES: BIOL 3080.03 or MARI 3080.03
CROSSLISTED: MARI 4080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lab
LAB HOURS PER WEEK: 3

BIOL 4160 Political Ecology
CREDIT HOURS: 3
Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or permission of instructor
FORMATS: Discussion

BIOL 4220 Plant Cell Biology
CREDIT HOURS: 3
This course covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall. Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The course consists of lectures, student seminars, and report writing.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 or permission of the instructor
FORMATS: Lecture

BIOL 4302 Clinical and Molecular Immunology
CREDIT HOURS: 3
See course description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

BIOL 4323 Biologging in Ecology
CREDIT HOURS: 3
This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: MARI 4323.03
FORMATS: Lecture | Lab

BIOL 4335 Environmental Impacts in Marine Ecosystems
CREDIT HOURS: 3
See course description for OCEA 4335.03, in the Oceanography section of this calendar.

BIOL 4369 Fisheries Oceanography
CREDIT HOURS: 3
See course description for OCEA 4160.03 in the Oceanography section of this calendar.

BIOL 4370 Deep Sea Biology
CREDIT HOURS: 3
See course description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.
PREREQUISITES: (BIOL 2060 or BIOA 3001) and OCEA 2000 or (OCEA 2001 and OCEA 2002)

BIOL 4500 The Evolution of Life Histories
CREDIT HOURS: 3
Life history describes how reproductive effort changes with age to create strategies that influence survival and reproduction. Life-history research is fundamental to population ecology, evolutionary biology, sustainable harvesting, and conservation biology. Life-history theory provides an explanatory/predictive framework for understanding why organisms differ in how they propagate genes to future generations.
CALENDAR NOTES: This course is restricted to 4th year students
PREREQUISITES: Minimum of B- in each of BIOL 2003.03, BIOL 2040.03, and BIOL 2060.03 or Instructor's approval. One of BIOL 3044.03, BIOL 3060.03, or BIOL 3080.03 is strongly recommended.
RESTRICTIONS: E1, E2, E3
FORMATS: Lecture

BIOL 4510 Cultural Evolution
CREDIT HOURS: 3
Culture is socially learned and group-specific information or behaviour. This course explores the nature of culture across the animal kingdom, how it evolves, and its relationship to ecology, genetic evolution and conservation. Students consider and discuss the controversies and uncertainties as to the role of culture in biology.
PREREQUISITES: BIOL 2040.03, and BIOL 3062.03 or PSYO 3162.03
FORMATS: Lecture | Discussion | Other (explain in comments)
LAB HOURS PER WEEK: 0

BIOL 4661 Biological Oceanography
CREDIT HOURS: 3
See course description for OCEA 4140.03, in the Oceanography section of this calendar.
PREREQUISITES: OCEA 2000 or (OCEA 2001 and OCEA 2002) and OCEA 2020 and OCEA 2021

BIOL 4662 Biology of Phytoplankton
CREDIT HOURS: 3
See course description for OCEA 4230.03 in the Oceanography section of this calendar.

BIOL 4664 History of Marine Sciences
CREDIT HOURS: 3
See course description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

BIOL 4666 Benthic Ecology
CREDIT HOURS: 3
See course description for OCEA 4330.03 in the Oceanography section of the calendar.

BIOL 4806 Independent Research I
CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4807 Independent Research II
CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. BIOL 4811 Special Topics
CREDIT HOURS: 3
Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.
CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required

BIOL 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 4520.03/GEOG 4520.03
PREREQUISITES: ENVS 3500 or ERTH3500 or GEOG 3500; and permission of instructor.
CROSSLISTED: ENVS 4850/ERTH 4850/GEOG 4850/SCIE 4850
RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 4901 Honours Research and Thesis I
CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (4901 and 4902) are taken in the students' final year.
CALENDAR NOTES: BIOL 4901 and BIOL 4902 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.

RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.
FORMATS: Other (explain in comments)

BIOL 4902 Honours Research Thesis II
CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (4901 and 4902) are taken in the students' final year.
CALENDAR NOTES: BIOL 4901 and BIOL 4902 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.
FORMATS: Other (explain in comments)

BIOL 8891 Co-op Work Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03

BIOL 8892 Co-op Work Term II
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8891.00

BIOL 8893 Co-op Work Term III
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8892.00

BIOL 8894 Co-op Work Term IV
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8893.00

Introduction
Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with courses develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

Degree Programs
The Department of Chemistry offers the following degree programs in Chemistry

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Chemistry
- Minor in Chemistry

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment in the Faculty of Science, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects; otherwise the student should consult the calendar of the appropriate year.

The 120 credit hour Concentrated Honours and Major degrees, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Chemistry undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department
Schepp, N. P., BSc, PhD (Toronto)

Undergraduate Advising
To contact a Chemistry academic advisor, please go to the Chemistry Main Office (Chemistry Room 212), phone 902 494-3305 or visit the Chemistry Website (www.dal.ca/faculty/science/chemistry.html)

Professors Emeriti
Aue, W. A., PhD (Vienna), FCIC
Becke, A. D., BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emerita)
Boyd, R. J., BSc (UBC), PhD (McGill), FCIC
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)

Coxon, J. A., BA (Cambridge), MSc, PhD (East Anglia)
Kwak, J. C. T., BSc, MSc, PhD (Amsterdam), FCIC
White, M. A., BSc (Univ of Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Sciences

Professors
Bearne, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill), cross-appointment from Biochemistry and Molecular Biology
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), Canada Research Chair in Battery and Fuel Cell Materials, NSERC/3M Canada Inc. Industrial Research Chair and cross-appointment from Physics and Atmospheric Science
Doucette, A. A., BSc (Dalhousie), PhD (Alberta)
Jakeman, D. L., BSc, PhD (Sheffield), cross-appointment from College of Pharmacy
Johnson, E. R., BSc (Carleton), PhD (Queen's), Herzberg-Becke Chair in Theoretical Chemistry, cross-appointment with Physics and Atmospheric Science
Martin, R. V., BS (Cornell), MSc (Oxford), PhD (Harvard), cross-appointment from Physics and Atmospheric Science
Obrovac, M. N., BSc (Simon Fraser), MSc, PhD (Dalhousie), Industrial Research Chair in Materials Science, cross-appointment with Physics and Atmospheric Science
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto) Director of NMR-3, cross-appointment from Biochemistry and Molecular Biology
Stradiotto, M., BSc, PhD (McMaster), FRSC, Alexander McLeod Professor of Chemistry
Thompson, A., BSc (Leicester), PhD (Sheffield), Faculty of Science Killam Professor
Wentzell, P. D., BSc (Dalhousie), PhD (Michigan State)
Zhang, P., BSc, MSc (Jilin Univ, China), PhD (Western), cross appointment with School of Biomedical Engineering
Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, cross-appointment with Physics and Atmospheric Science

Associate Professors
Andreas, H. A., BSc, PhD (Calgary)
Cozens, F. L., BSc (York), PhD (Toronto)
Schepp, N. P., BSc, PhD (Toronto)
Speed, A. W., BSc (Dalhousie), PhD (Harvard)
Turculet, L., BSc (Massachusetts Institute of Technology), PhD (Berkeley)

Assistant Professors
Dasog, M., BSc (Saskatchewan), PhD (Alberta)
Chitnis, S. S., BASc (McMaster), PhD (Victoria)
Kelly, A. T., BSc (Memorial), PhD (Toronto)

Senior Instructors
Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana), MSc, PhD (Dalhousie)
Moya Barrios, R., BSc (Univ of Havana, Cuba), MSc, PhD (Dalhousie)

Instructors
Aish, G. A., ACBT dip. (Camosun College), BSc, MSc (Dalhousie)
Bates, J. I., BSc (Queen's), PhD (UBC)
Chisholm, R. A., BSc (St. Mary's), PhD (Alberta)
Crane, A. K., BSc (Memorial), PhD (UBC)
MacDonald, J. L., BSc, BTech (Cape Breton Univ), PhD (Dalhousie)
Whalen, J. M., BSc (Dalhousie), PhD (McMaster)

Adjunct Professors
Becke, A. D.,BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emerita)
Boyd, R. J., BSc (UBC), PhD (McGill), FCIC
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)
Chatt, A., BSc (Calcutta), MSc (Roorkee), MSc (Waterloo), PhD (Toronto), FCIC
Grindley, T. B., BSc, MSc, PhD (Queen's), FCIC
Grossert, J. S., BSc, MSc, PhD (Natal), FCIC
Kompany-Zareh, M., MSc (Shiraz, Iran), PhD (Shahid B., Iran), IASBS, Zanjan, Iran
Matta, C., BPharm Sci (Alexandria Univ, Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster), Mount Saint Vincent University
Pinto, D. M., BSc (McGill), PhD (Alberta), Institute for Marine Biosciences
Quilliam, M., BSc, PhD (Manitoba), National Research Council, Institute for Marine Biosciences
Ramaley, L., BA (Colorado), MA, PhD (Princeton), FCIC
Werner-Zwanziger, U., Vordiplom (Mathematics), Diploma (Chemistry), PhD (Westfälische Wilhelms-Universität Münster, Germany)
White, M. A., BSc (Univ of Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Sciences

Part-time Academics
Perrott, A., BSc (Dalhousie), BEd (Acadia), PhD (Dalhousie)

Postdoctoral Fellows, Research Associates/Assistants
Cao, Y., BS, PhD (Tsinghua Univ, China)
Dale, S., BSc (UWA, Australia), PhD (UC, Merced)
Figliola, C., BSc, MSc (Univ of Parma, Italy), PhD (Univ of Birmingham)
Garaga Nagendrachar, M., BSc (Sahyadri Science College, Shimoga, Karnataka state, India), MSc (Kuvempu Univ, Shankaraghatta, Karnataka state, India), PhD (Univ of Orleans, France)
Hatchard, T., BSc, BComm (St. Mary's), MSc, PhD (Dalhousie)

Hall, D., BSc (Western), PhD (Ottawa)
Johnson, M., BSc (Dalhousie), MSc (Univ of Western Ontario)
Juhan, N., BSc, MSc (Univ of Karachi, Pakistan), PhD (HEJ Research Inst of Chem, Pakistan)
Kahwaji, S., MSc (American Univ of Beirut), PhD (Dalhousie)
Li, Z., BSc, PhD (Univ of Science and Technology, China)
Ma, X., BSc, ME (Tongji Univ, China), PhD (Florida State)
Ogawa, T., BEng, MEng, PhD (Nagoya Institute of Technology, Nagoya, Japan)
Ramao, C., BSc (McGill), PhD (Dalhousie)
Todorova, T., BSc, MSc (Univ of Sofia, Bulgaria), PhD (Sheffield)
Werner-Zwanziger, U., Vordiplom (Mathematics), Diploma (Chemistry), PhD (Westfalische Wilhelms-Universitat Munster, Germany)

BSc or BA (120 credit hour) Concentrated Honours in Chemistry

Students who want a challenging program resulting in a broad and in-depth background in Chemistry that includes an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider the Honours program. Honours students complete a minimum of 54 credit hours above the 1000 level in Chemistry with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of CHEM 4902.03 and CHEM 4903.03. The Honours program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Chemistry. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Chemistry should consult with a Chemistry Academic Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Concentrated Honours program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3301.03: Quantum Mechanics and Chemical Bonding
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

4000 level

- CHEM 4902.03: Honours and Major Research Project I and CHEM 4903.03: Honours and Major Research Project II (minimum grade of B-)

Additional Requirements

- MATH 1030.03 (or MATH 2030.03): Matrix Theory and Linear Algebra I and MATH 2001.03: Intermediate Calculus
- A minimum of 15 additional credit hours in CHEM courses at or above the 2000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.
- Minimum grade of C in all Honours subject courses (except CHEM 4902.03 and CHEM 4903.03, which require a minimum grade of B-)

BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject

Students who wish to study Chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. The Combined Honours program is not accredited by the Canadian Society for Chemistry.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Chemistry, this requirement is satisfied through CHEM 4902.03 and CHEM 4903.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- A minimum of 18 additional CHEM credit hours above the 2000 level (including CHEM 4902.03 and CHEM 4903.03 if applicable).

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (120 credit hour) Major in Chemistry

The 120 credit hour Major is suited to students who want to focus on Chemistry, but wish to have a program that is somewhat less constrained than the Honours program. Chemistry Majors complete a minimum of 45 credit hours in Chemistry courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes. Like the Honours degree, the 120 credit hour Major program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Chemistry. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics, or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II

- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3305.03: Materials Science
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

Additional Requirements

- Six additional hours from a combination of MATH 1030.03, MATH 2XXX, any STAT course, CSCI 1100.03, CSCI 1101.01, CSCI 1105.03, CSCI 1110.03
- A minimum of 12 additional CHEM credit hours at or above the 2000 level, including at least 3 credit hours at or above the 3000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.

BSc or BA (120 credit hour) Double Major in Chemistry and another subject

The Double Major degree program allows students to combine a study of Chemistry with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. The Double Major program is not accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in BSc Double Major with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 2101.03: Introductory Inorganic Chemistry and CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I or CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy
- A minimum of 18 additional CHEM credit hours above the 2000 level.

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (90 credit hour) Minor in Chemistry

The 90 credit hour degree with Minor in Chemistry is appropriate for students who want to study some Chemistry but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Chemistry. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies and is not accredited by the Canadian Society for Chemistry. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Chemistry is usually the preferred option for students who wish to combine studies in Chemistry with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Chemistry section.

Minor in Chemistry
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium)

Contact Chemistry for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Chemistry

Co-op Academic Advisor: Dr. Alan Doucette alan.doucette@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs, or in Combined Honours or Double Major programs. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Chemistry Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Chemistry please see the departmental page www.dal.ca/faculty/science/chemistry/programs/undergraduate-studies/degree-programs/co-operative-education.html

Minors available to students in Chemistry

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Chemistry may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Chemistry, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements is available. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Chemistry include:

- Certificate in Materials Science
- Certificate in Medicinal Chemistry
- Certificate in Science Leadership and Communication

BSc/BEng Concurrent Program (Chemistry)

Chemistry is known as the central science because its main theme is transformations of matter and energy that are at the core of many fields of science and engineering. A strong background in Chemistry has direct relevance to fields such as biological/biomedical engineering, chemical engineering, environmental and resource engineering, food science technology, materials engineering, mining/petroleum engineering and process engineering. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Chemistry. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Chemistry. A concurrent BEng/BSc Major or Honours in Chemistry (120 credit hours) can be designed for interested candidates.

	Fall	Winter

Registered in BEng		
Year 1	CHEM 1021 *Engineering Chemistry I* MATH 1280 *Engineering Math I* ENGI 1103 *Engineering Design I* PHYC 1190 *Physic I* ENGM 1081 *Computer Programming* CPST 1103 *Technical Communications I*	CHEM 1022 *Engineering Chemistry II* MATH 1290 *Engineering Math II* ENGI 1203 *Engineering Mechanics I: Statics* PHYC 1290 *Physics II* ENGM 1041 *Applied Linear Algebra* CPST 1203 *Technical Communications II*
Apply for admission into concurrent BEng/BSc [a]		
Year 2	ENGM 2101 *Applied Vector Calculus* ENGM 2032 *Applied Probability & Statistics* [b] Writing course (Humanities) **Two of CHEM 2201, CHEM 2301, CHEM 2401** **One social science course**[c]	ENGM 2022 *Applied Differential Equations* HSTC 1801 *History of Engineering II* [d] One Engineering elective **Two of CHEM 2101, CHEM 2304, CHEM 2402** **One social science or humanitiescourse**[c]
Year 3	IENG 2005 *Engineering economics* ECED 2000 *Electric circuits* ENGI 2102 *Thermo-Fluid Engineering I* **One 2000 level (or higher) CHEM course** **One Science/FASS course (may be CHEM)**	ENGI 2203 *Engineering design II* [d] Two Engineering electives **One 2000 level (or higher) CHEM course** **One Science/FASS course (may be CHEM)**
Graduate with Diploma in Engineering and BSc 90 credit degree		
Year 4	Continue in BEng program	
Year 5	Complete BEng program	

[a] To meet the BSc 90 credit hour Minor in Chemistry requirements, students complete 30 credit hours in addition to their Engineering requirements: a minimum of 18 credit hours of CHEM courses at or above the 2000 level, 6 credit hours of social science/humanities courses, and 6 additional credit hours in Science/FASS courses (which may be CHEM). Students may not select CHEM courses that cannot be counted toward a Chemistry Major degree.

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] See Engineering section of the calendar for details

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
Undergraduate courses that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at http://chemistry.dal.ca. Students should note the following.

- Not all courses are offered every year. Please consult the Academic Timetable for the details of courses offered in a particular academic year.
- The first digit of the course number is the year of a student's program that a course would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level course can be taken in the fourth year and 4000 level course can be taken in the third year.
- The second digit of the course number defines the general sub-discipline:

0 = General Chemistry	
1 = Inorganic Chemistry	5 = Interdisciplinary
2 = Analytical Chemistry	6 = Biological Chemistry
3 = Physical Chemistry	8,9 = Research Classes
4 = Organic Chemistry	

- The extension following the course number (e.g. XXXX.03) indicates the number of credit hours assigned to the course (e.g. three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry courses, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry courses. Students with grades below C- in the prerequisite chemistry courses can only register with the permission of the instructor for the course.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry course is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

Chemistry Resource Centres
First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and course material. First-year students are encouraged to make use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with course material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

Course Descriptions

CHEM 1011 Concepts in Chemistry: Structure and Reactivity
CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.
COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1021.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 1012 Concepts in Chemistry: Energy and Equilibrium
CREDIT HOURS: 3
The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.
PREREQUISITES: CHEM 1011.03 or equivalent
EXCLUSIONS: CHEM 1022.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 1021 Engineering Chemistry I
CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.
COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1011.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 1022 Engineering Chemistry II
CREDIT HOURS: 3
The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.
COORDINATOR: A. Crane
PREREQUISITES: CHEM 1021.03 or equivalent
EXCLUSIONS: CHEM 1012.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 2101 Introductory Inorganic Chemistry
CREDIT HOURS: 3
The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent (grade of C- or better)
FORMATS: Lecture | Lab

CHEM 2201 Introductory Analytical Chemistry
CREDIT HOURS: 3
The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Topics include chemical equilibria, spectroscopy, electrochemistry and chromatography. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 or equivalent (grade of C- or better)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEM 2301 Introduction to Physical Chemistry I
CREDIT HOURS: 3
The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent; MATH 1000.03 or equivalent (grade of C- or better). PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 is strongly recommended.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 2304 Introductory Physical Chemistry II
CREDIT HOURS: 3
The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent; MATH 1000.03 and MATH 1010.03 or equivalent (grade of C- or better). PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 is strongly recommended.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 2401 Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy
CREDIT HOURS: 3
Organic chemistry is introduced through an examination of bonding, conformation and stereochemistry. Spectroscopic methods (MS, IR, 1H and 13C NMR) are used to determine the structures of compounds. Alkanes, alkenes, alkynes and alkyl halides are presented with an emphasis on the mechanisms of their reactions.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent (grade of C- or better)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 2402 Introductory Organic Chemistry: Reactivity of Functional Groups
CREDIT HOURS: 3
Building on CHEM 2401, the properties and reactions of alcohols, ethers, amines, nitriles, the carbonyl-containing functional groups and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. The concepts of resonance and aromaticity become familiar. The use of spectroscopic methods is reinforced.
PREREQUISITES: CHEM 2401.03 (grade of C+ or better)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 2442 Organic Chemistry for Pharmacy Students
CREDIT HOURS: 3
Aspects of organic chemistry relevant to the requirements for the degree of Bachelor of Science in Pharmacy are presented. This course does not serve as a prerequisite for any other chemistry course.
RESTRICTIONS: Restricted to students in the Bachelor of Science in Pharmacy program.
FORMATS: Lecture

CHEM 2488 Our Organic World
CREDIT HOURS: 3
Pharmaceuticals, plastics, and some fuels are organic compounds with dramatic roles in our health and economy. Drugs or poisons? Caraway or spearmint? Bendable or stiff? Aspects of organic chemistry are surveyed so that issues such as these can be debated and the chemical facts applied to the world around us.
PREREQUISITES: CHEM 1011.03 or equivalent
EXCLUSIONS: CHEM 2488.03 does not serve as a prerequisite for any other chemistry class nor does it count as a chemistry credit towards any degree with a major in chemistry.
FORMATS: Lecture

CHEM 3103 Intermediate Inorganic Chemistry
CREDIT HOURS: 3
Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and organometallic complexes. The compounds prepared in the laboratory introduce more advanced synthetic procedures for the preparation of inorganic compounds.
PREREQUISITES: CHEM 2101.03 (grade of C- or better)
EXCLUSIONS: CHEM 3101.03, CHEM 3102.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEM 3203 Advanced Analytical Laboratory
CREDIT HOURS: 3
An introduction to the fundamentals of instrumental chemical analysis is presented in a laboratory environment, with emphasis on selection of appropriate analytical techniques, sample treatment, data handling, and communication of experimental results. Instrumental techniques include chromatography, spectrophotometry, mass spectrometry, and electrochemistry, with applications in biological, environmental, forensic and health-related areas.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 3201
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 8

CHEM 3301 Quantum Mechanics and Chemical Bonding
CREDIT HOURS: 3
The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.
PREREQUISITES: MATH 2001.03 and MATH 1030.03, and CHEM 2304.03, (grade of C-or better), and PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03
FORMATS: Lecture

CHEM 3305 Materials Science
CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, and (CHEM 2301.03 and CHEM 2304.03) or PHYC 3200.03 (can be a corequisite) or (ERTH 2001.03 and ERTH 2002.03)
EXCLUSIONS: PHYC 3303.03, CHEM 3303.03
FORMATS: Lecture | Lab

CHEM 3401 Intermediate Organic Chemistry
CREDIT HOURS: 3
Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEM 3404 Intermediate Organic Chemistry—Physical Organic and Spectroscopy
CREDIT HOURS: 3
This course provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
EXCLUSIONS: CHEM 3402.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEM 3601 Chemistry of Living Systems
CREDIT HOURS: 3
The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and biosynthesis, enzyme catalysis, coenzymes and prochirality.

PREREQUISITES: CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture

CHEM 3801 Experiential Learning in Chemistry
CREDIT HOURS: 3
This is an outside-the classroom learning experience in which students work to acquire knowledge and skills relevant to chemistry under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial setting.
CALENDAR NOTES: To register for this course, each student must first find a supervisor willing to supervise the chemistry work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: At least four of the following courses: CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03 and CHEM 2402.03.
RESTRICTIONS: Restricted to students in third year and above.
EXCLUSIONS: The following may not be used towards CHEM 3801: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.

CHEM 4101 Advanced Main Group Chemistry
CREDIT HOURS: 3
Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
CROSSLISTED: CHEM 5101.03
FORMATS: Lecture

CHEM 4102 Advanced Transition Metal Chemistry
CREDIT HOURS: 3
Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
CROSSLISTED: CHEM 5102.03
FORMATS: Lecture

CHEM 4105 Inorganic Materials Synthesis
CREDIT HOURS: 3
Methods for the preparation of advanced functional inorganic materials for energy, optoelectronics, catalysis and other applications are presented. Topics in the course include solid-state chemistry, sol-gel synthesis, nucleation and growth of nanoparticles, thin film fabrication, and soft lithography.
PREREQUISITES: CHEM 2101.03, CHEM 2301.03
EXCLUSIONS: CHEM 5105.03
FORMATS: Lecture

CHEM 4120 Advanced Organometallic Chemistry
CREDIT HOURS: 3
Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4201 Advanced Topics in Separations
CREDIT HOURS: 3
Classical methods (solvent extraction and ion exchange) are reviewed for pre-concentration of metal ions prior to their determination by spectroscopic methods. Chromatographic topics include gas, liquid, and supercritical chromatography with emphasis on multidimensional techniques. Examples in environmental and biological analysis are drawn from the current literature.
PREREQUISITES: CHEM 2201.03
CROSSLISTED: CHEM 5201.03
FORMATS: Lecture

CHEM 4205 Chemometrics
CREDIT HOURS: 3
The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
CROSSLISTED: CHEM 5205.03
FORMATS: Lecture

CHEM 4206 Analytical Mass Spectrometry
CREDIT HOURS: 3
This course offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)

CROSSLISTED: CHEM 5206.03
FORMATS: Lecture

CHEM 4301 Theory of Chemical Bonding
CREDIT HOURS: 3
This course develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.
PREREQUISITES: CHEM 3301.03 (grade of C- or better)
CROSSLISTED: CHEM 5301.03
FORMATS: Lecture

CHEM 4302 Introduction to Surface Science
CREDIT HOURS: 3
The fundamental theory and principles of surface science are introduced. Topics include the atomic structure of solid surfaces, thermodynamic and kinetic properties of surfaces, electronic and bonding behavior of surfaces, catalytic processes by surfaces, and typical surface analysis techniques.
PREREQUISITES: CHEM 2301.03 and CHEM 2304 or PHYC 3200.03 and PHYC 3640.03
CROSSLISTED: CHEM 5302.03
FORMATS: Lecture

CHEM 4311 Fundamental and Applied Electrochemistry
CREDIT HOURS: 3
This course provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).
PREREQUISITES: CHEM 2301.03 and CHEM 2304.03 (grade of C- or better)
CROSSLISTED: CHEM 5311.03
FORMATS: Lecture

CHEM 4401 Synthesis in Organic Chemistry
CREDIT HOURS: 3
A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.
PREREQUISITES: CHEM 3401.03 (grade of C- or better)
CROSSLISTED: CHEM 5401.03
FORMATS: Lecture

CHEM 4402 Organic Structure Determination
CREDIT HOURS: 3
Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.
PREREQUISITES: CHEM 3404.03 (grade of C- or better)
CROSSLISTED: CHEM 5402.03
FORMATS: Lecture

CHEM 4502 Polymer Science
CREDIT HOURS: 3
Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.
PREREQUISITES: CHEM 2201.03 and CHEM 2301.03 and CHEM 2304.03 and CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4504 Diffraction Techniques in Solid State Chemistry
CREDIT HOURS: 3
All chemical elements and compounds can exist as crystalline solids. This course studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.
PREREQUISITES: CHEM 2101.03 (grade of C- or better) and MATH 2001.03 and MATH 1030.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEM 4595 Atmospheric Chemistry
CREDIT HOURS: 3
Fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.
PREREQUISITES: MATH 1000.03, PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03, and CHEM 1012.03 (grade of C- or better)
CROSSLISTED: PHYC 4595.03, OCEA 4595.03, OCEA 5595.03
FORMATS: Lecture

CHEM 4601 Principles of Biomolecular and Drug Molecule Design
CREDIT HOURS: 3
The course covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem. Students in chemistry are strongly recommended to take CHEM 3601.03 prior to registering in this course.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
CROSSLISTED: CHEM 5601
FORMATS: Lecture

CHEM 4602 Biophysical Characterization of Macromolecules
CREDIT HOURS: 3
Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluoroescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03 or (CHEM 3601.03 and CHEM 2301.03 and CHEM 2304.03), all with grades of B or higher, or permission of instructor.
Recommended: PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03.
CROSSLISTED: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03
FORMATS: Lecture

CHEM 4603 Structural Biology
CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomic-resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700.03 or CHEM 3601.03
CROSSLISTED: BIOC 4703.03
FORMATS: Lecture

CHEM 4801 Research Project in Chemistry I
CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.
PREREQUISITES: CHEM 2101.03, 2201.03, 2301.03, 2304.03, 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B-, or permission of instructor; GPA 3.0

CHEM 4802 Research Project in Chemistry II
CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This course is intended for those students in the Major program who wish greater exposure to independent scientific research.
PREREQUISITES: CHEM 4801.03

CHEM 4902 Honours and Major Research Project I
CREDIT HOURS: 3
Together with CHEM 4903, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, a written report and oral presentation.
CALENDAR NOTES: Students should apply for this course in the winter term prior to their final year by contacting the Honours Coordinator. A grade will not be assigned for CHEM 4902 until both CHEM 4902 and CHEM 4903 have been completed. To receive credit, CHEM 4902 and 4903 must be completed in the same academic year.
PREREQUISITES: Minimum GPA of 3.0 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06
FORMATS: Experiential Learning

CHEM 4903 Honours and Major Research Project II
CREDIT HOURS: 3
Together with CHEM 4902, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, an honours thesis and oral presentation.
PREREQUISITES: Completion of CHEM 4902 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06
FORMATS: Experiential Learning

Earth Sciences

Location: Life Sciences Centre
1459 Oxford Street
Room 3006

Introduction
Earth Science is a holistic discipline whose focus of study is the Earth System. It includes the geosciences which address the solid earth, but necessarily also extends to study of the atmosphere, hydrosphere, oceans and biosphere. Broadly, Earth scientists work to understand

1. how the Earth System works;
2. how it evolved to its current state;
3. the processes for and distribution of Earth's physical resources such as fossil fuels, minerals, and water; and
4. limits to and consequences of the use of physical resources by humans.

Examples of specific questions within Earth Sciences include: How was the Earth formed? What is its composition? Where do we look for oil? Where do we look for reliable water supplies? What are the relationships between glaciers, rivers, and climate, both now and in the deep past? To answer questions such as these, Earth scientists typically use methods from the foundation sciences -- physics, chemistry, biology, mathematics - along with discipline-specific methods and modern tools including computing and satellite mapping. Some Earth scientists also consider or draw expertise from the social sciences, particularly as humans collectively become a significant agent in modifying components of the Earth System.

Career paths

Earth Science is of tremendous importance to Canadians and can be an immensely satisfying profession. Earth scientists are employed in universities, government agencies, the oil, gas and mineral industries, environmental consulting, and beyond. The Earth Sciences department offers programs and courses designed to meet the needs of students with varying goals for her/his undergraduate education. In general, the following summary recommendations can be made:

- To prepare to become a professional geoscientist, students should enroll in a 120 credit hour BSc or BA degree (Major, Honours or Combined) and meet the knowledge requirements for professional registration by following the Geoscience Knowledge and Experience handbook available at https://geoscientistscanada.ca.
- To prepare for postgraduate study (MSc or PhD) in Earth Sciences or a related field, students should pursue a BSc Concentrated Honours in Earth Sciences or Combined Honours with a related subject, and consider meeting requirements of professional registration (above).
- Students seeking an undergraduate preparation for Law, Education, or another professional program outside of Earth Sciences, or to complement another subject, should consider a BSc or BA Major or Double Major.
- Electives courses and Minors: Earth Sciences is about understanding how the Earth 'works'. As such it makes an excellent general education subject. Several ERTH courses that may be suitable electives are listed below.

General interest courses

These courses are designed to be accessible to students who want to know something about the Earth, but whose major field of study is not Earth Sciences. For example, the course may be of interest to an economics student concerned with resources, a history student interested in the role played by Canada's geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

Courses without prerequisites

- ERTH 1030.03: Introduction to Physical Geography
- ERTH 1060.03: Earthquakes, Volcanoes and Natural Disasters
- ERTH 1080.03: Geology I (lab course)

Courses with prerequisites

- ERTH 1090.03: Geology II (with lab)
- ERTH 1091.03: Geology II (non-lab course)
- ERTH 2410.03: Environmental Issues in Earth Sciences
- ERTH 2420.03: Dinosaurs
- ERTH 2205.03: Introduction to Paleontology (lab course)
- ERTH 3440.03: Geomorphology

High School Preparation

Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is required as a prerequisite, but the others are strongly recommended. A student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

Degree Programs

The Department of Earth Sciences offers the following degree programs in Earth Sciences

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Earth Sciences
- Minor in Earth Sciences

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Earth Sciences undergraduate academic advisor.

Staff

Dean
Moore, C., BA Honours, PhD (Cambridge), Professor (Psychology)

Chair of Department
Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

Undergraduate Advisor
Young, M. (902) 494-2364

Co-op Academic Advisor
Cox, R. (902) 494-3362

Graduate Coordinator
Gosse, J. (902) 494-6632

Professors Emeriti
Cooke, H. B. S., MSc, DSc (Witwatersrand)
Gibling, M. R., BA (Oxon), PhD (Ottawa)
Milligan, G. C., MSc (Dalhousie), PhD (Harv)
Reynolds, P. H., BSc (Toronto), PhD (UBC)
Scott, D. B., BSc (Washington), MSc (Washington State), PhD (Dalhousie)
Zentilli, M., BSc (Chile), PhD (Queen's), PGeo

Professors
Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)
Gosse, J. C., BSc Honours (Memorial), PhD (Lehigh)
Grujic, D., BSc (Belgrade), PhD (ETH Zurich)
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)
Wach, G. D., BA (Hons) (Western Ontario), MSc (South Carolina), DPhil (Oxford)

Associate Professors
Coutand, L., BSc, PhD, (Univ of Rennes, France)
Fedortchouk, Y., MSc (Mosow State Univ), PhD (Victoria)
Sterling, S., PhD (Duke Univ)

Assistant Professors
Plug, L., BA (McGill), PhD (Univ of Alaska - Fairbanks)
Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)

University Teaching Fellows
Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) cross appointed with Environmental Science

Senior Instructors
Young, M., BSc (Dalhousie), MSc (Queen's)

Instructors
Cox, R., BSc Hons, MSc (Glasgow Univ), PhD (Memorial)
Green, C., BSc Honours (Acadia), MES (York), MSA, PhD (Ryerson)

Cross Appointment
Rainham, D., PhD (Ottawa), principal appointment in Environmental Science

Adjunct Faculty
Barr, S., BSc (UNB), PhD (UBC), Acadia University
Brown, D., BSc (Dalhousie) Canada-NS Offshore Petroleum Board (CNSOPB)
Calder, J., BSc (SMU), PhD (Dalhousie), Nova Scotia Department of Natural Resources
Campbell, C., BSc Honours (SMU), PhD (Dalhousie), Geological Survey of Canada Atlantic
Claire, T., BSc (Mount Allison), MSc (Ottawa), PhD (McMaster)
Clarke, B., BSc, MSc (Toronto), PhD (Edinburgh)
Deptuck, M., BSc (St. Mary's), PhD (Dalhousie), CNSOPB
Dostal, J., BSc (Charles), PhD (McMaster), Saint Mary's University
Dyke, A., BSc Honours (Carleton), MA, PhD (Univ. of Colorado)
Easton, R., PhD, Ontatio Geological Survey
Fedak, T. J., BA (NSCAD), PhD (Dalhousie), Fundy Geological Museum
Fensome, R., BSc, MSc (Saskatchewan), PhD (Nottingham) GSC Atlantic
Forbes, D., BA Honours (Carleton), MA (U of T), PhD (UBC)
Fowler, M., BSc Honours (Leicester Univ.), MSc, PhD (Univ. of Newcastle upon Tyne)
Froese, D. G., BSc (Univ Lethbridge), MSc, PhD (Univ of Calgary), University of Alberta
Gerbi, C., AB (Amherst College), MS (UC Davis), PhD (Univ of Maine)
Gibling, M., BA (Oxon), PhD (Ottawa)
Gibson, D., BA (Colgate Univ.), MSc, PhD (Carleton), Simon Fraser University
Godin, L., BSc, MSc (Univ. du Que a Montreal), PhD (Carleton), Queen's University
Hanley, J., BASc, MSc, PhD (Toronto), Saint Mary's University
Jamieson, R. A., BSc (Dalhousie), PhD, (Memorial)
Keen, C., BSc Honours, MSc (Dalhousie), PhD (Cambridge), Geological Survey of Canada Alantic
Kellman, L., BA (McMaster), MSc (McGill), PhD (Univ du Quebec à Montreal), St. Francis Xavier University
Kettanah, Y., BSc (Baghdad Univ), PhD (Southampton Univ, UK)
Kirby, E., BA Honours (Hamilton College), MSc (Univ. of New Mexico), PhD (MIT)
Lakeman, T., BSc First Class Honours (U of A), MSc (Simon Fraser), PhD (U of A)
Lavigne, M., BScF (UNB), M. Phil, PhD (Yale), National Research Council New Brunswick
Louden, K. E., BA (Oberlin), MEd (Temple), PhD (MIT)
Marsh, J., BS (Univ of California, Santa Barbara), MS (San Diego State Univ.), PhD (Univ. of Maine)**,** Queens College
Martel, T., BSc Honours, PhD (Dalhousie), Corridor Resources Inc.
Melchin, M., MSc (Waterloo), PhD (Western), St. Francis Xavier University
Mosher, D., BSc (Acadia), MSc (Memorial), PhD (Dalhousie), GSC Atlantic
Mudie, P. J., BSc (Cape Town), BSc (Leicester), PhD (Dalhousie), National Research Council
Mukhopadhyay, P., BSc, MSc, PhD (Jadavpur Univ), Global Geoenergy Research Limited
Mungall, J.E., BSc (Univ of Waterloo), MSc, PhD (McGill), University of Toronto
Murphy, J. B., BSc (Dublin), MSc (Acadia), PhD (McGill), St. Francis Xavier University
Neuweiler, F., Diplom, Dr. rer. nat. (FU Berlin), Laval University
Parsons, M., BSc (Dalhousie), PhD (Stanford), GSC Atlantic
Piper, D. J. W., BA Honours (St. Catharine's Col, Cantab), MA (Cantab), PhD (Darwin Col, Cantab), GSC Atlantic
Pufhal, P., BSc Honours, MSc, PhD, Acadian University
Richards, F. W., BSc Honour (Bristol), MSc (Imperial College), ESSO
Risk, D., BSc (Toronto), MSc (St. FX), PhD (Dalhousie), St. Francis Xavier University
Shaw, C. S. J., BSc Honours (Univ of London), MSc, PhD (UWO), University of New Brunswick
Shimeld, J., BApplied Sci (Waterloo), MSc (Dalhousie), GSC Atlantic
Silva, R., BSc, PhD (University of Coimbra), Universityof Exeter
Simpson, D. W., BSc Honours, MSc (Dalhousie), PhD (Australian National University), IRIS Consortium
Swinden, S., BSc (Dalhousie), MSc, PhD (Memorial), NS Department of Natural Resources, retired
Vincent, H., BSc (University of West Indies), MSc (Imperial College), PhD (Dalhousie), BP Trinidad and Tobago
Waldron, J., BA (Cambridge), PhD (Edinburgh), University of Alberta
Warren, C., BA (Oxford), MSc (Univ College London), DPhil (Oxford)
Webster, T., BSc (UNB), MSc (Acadia), PhD (Dalhousie), COGS, Lawrencetown, NS, Open University
Whipp, D. M., BSc, PhD (Univ of Michigan), University of Helsinki
Wilson, B., BSc Honours (Univ College of Whales), MSc, PhD (Univ of Whales), The University of West Indies
Zentilli, M., BSc (Univ of Chile), PhD (Queen's)

Adjunct Scholars
Fulthorpe, C., BSc (Univ of Leeds), MSc, PhD (Northwestern), University of Texas
Harding, A., BA, MA, PhD (Cambridge), Scripps Institution of Oceangraphy
Oakey, G., BSc, MSc (Dalhousie), Bedford Institute of Oceangraphy
Ruffman, A., MSc (Dalhousie), Geomarine Associates Ltd.

Shillington, D., BSc (Univ of Georgia), PhD (Univ. of Wyoming), Columbia University
Ziegler, S., BSc (Univ of Massachusetts), PhD (Univ of Texas), Memorial University

Core Requirements for all BSc and BA (120 credit hour) Degrees
All 120 credit hour degrees in Earth Sciences (Concentrated Honours, Combined Honours, Major, Double Major) share the following required courses:

1000 level

- ERTH 1080.03: Geology I and ERTH 1090.03 (recommended) or ERTH 1091.03: Geology II
- MATH 1000.03: Differential and Integral Calculus I (recommended) or MATH 1215.03: Life Sciences Calculus or equivalent
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity AND CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Students in the Integrated Science Program should contact the department regarding first year equivalencies.

2000 level

- ERTH 2001.03: Mineralogy
- ERTH 2002.03: Introduction to Petrology
- ERTH 2110.03: Field Methods
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2380.03: Geochemistry

3000 level

- ERTH 3001.03: Field School
- ERTH 3140.03: Structural Geology
- ERTH 3303.03: Stratigraphy

Field Work
Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field Schools ERTH 3001 is required for most degree programs and is offered for about 15 days in late August, just before the start of the University fall term.

BSc or BA (120 credit hour) Concentrated Honours in Earth Sciences
Students who want a challenging program that includes an in-depth background in Earth Sciences and an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Earth Sciences with a minimum GPA of 3.5 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of ERTH 4200.06.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Earth Sciences.

Admission to Honours
Students must apply for admission to Honours programs, usually by the end of their third year. Students considering Honours in Earth Sciences should consult with an Earth Sciences Academic Advisor early in their studies.

Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in the Concentrated Honours program in Earth Sciences must complete the following:

Core Requirements (Section A)

1000 level

- MATH 1010.03: Differential and Integral Calculus II, or MATH 2030.03: Matrix Theory and Linear Algebra I, or MATH 2300.03: Mathematical Modelling, or STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics
- PHYC 1190.03: Introduction to Physics and PHYC 1290.03: Introduction to Physics (recommended), or PHYC 1300XY.06: Physics In and Around You

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- ERTH 4200XY.06: Honours Thesis
- Minimum of 21 additional credit hours of ERTH courses at or above the 2000 level, of which at least 15 credit hours must be at or above the 3000 level

Additional Requirements

- Minimum GPA of 3.5 in Honours subject courses, with no grade less than a C
- First-class Honours; Minimum GPA of 3.7 in Honours subject courses, with at least an A- in ERTH 4200.06

BSc or BA (120 credit hour) Combined Honours in Earth Sciences and another subject

Students who wish to study Earth Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Earth Sciences, this requirement is satisfied through ERTH 4201.03/ERTH 4202.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirementssections, students in a Combined Honours program in Earth Sciences and another subject must complete the following:

Earth Sciences as primary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2030.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- A minimum of nine additional credit hours in ERTH at or above the 3000 level, which includes ERTH 4200XY.06 (Honours Thesis)

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

Earth Sciences as secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2030.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- A minimum of three additional credit hours in ERTH at or above the 3000 level

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (120 credit hour) Major in Earth Sciences

The 120 credit hour Major is suited to students who want to focus on Earth Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Earth Sciences Majors complete a minimum of 42 credit hours in Earth Sciences courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Earth Sciences.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Earth Sciences must complete the following courses:

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2030.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03 (BSc only)

2000 level and higher

- A minimum of 15 credit hours in ERTH at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Earth Sciences and another subject

The Double Major degree program allows students to combine a study of Earth Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Earth Sciences and another subject must complete the following:

Earth Sciences as the primary or secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2030.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03 (BSc only)

2000 level and higher

- A minimum of nine additional credit hours in ERTH at or above the 3000 level

Students in Double Major programs should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (90 credit hour) Minor in Earth Sciences

The 90 credit hour degree with Minor in Earth Sciences is appropriate for students who want to study some Earth Sciences but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Earth Sciences. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Earth Sciences is usually the preferred option for students who wish to combine studies in Earth Sciences with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Earth Sciences section.

Minor in Earth Science

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Requirements

Students starting in 2014-15 or later:

- ERTH 1080.03: Geology I and ERTH 1090.03 or ERTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Students starting prior to Fall 2014-15:

- ERTH 1080.03: Geology I and one of ERTH 1030.03: Introduction to Physical Geography, ERTH 1060.03: Natural Disasters, ERTH 1090.03: Geology II, ERTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Contact Earth Sciences for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Earth Sciences

Co-op Academic Advisor: Dr. Richard Cox richard.cox@dal.ca

Science Co-op is a program of academic study in a science subject, combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Earth Sciences, or in Combined Honours or Double Major programs with Earth Sciences as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Earth Sciences Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html

Minors available to students in Earth Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Earth Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Earth Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc or BA program in Earth Sciences include:

- Certificate in Environmental Impact Assessment (EIA) (contact: Dr. Patricia Lane, Biology, patricia.lane@dal.ca)
- Certificate in Geographic Information Science (GIS) (contact: Dr. Chris Greene, Earth Sciences, csgreene@dal.ca)
- Certificate in Materials Science (contact: Dr. Mita Dasog, Chemistry, mita.dasog@dal.ca)
- Certificate in Science Leadership and Communication (contact: Dr. Anne-Marie Ryan, Earth Sciences, AMRyan@dal.ca)

Knowledge Requirements for Professional Practice as a Geoscientist

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In Nova Scotia, the Association of Professional Geoscientists of Nova Scotia (APGNS) is the licensing body which fulfils this mandate. APGNS and other provincial geoscience associations, under the guidance of Geoscientists Canada, ensure high standards of geoscience practice and education.

Students who intend to pursue geoscience as a profession, or simply want the most in-depth education in geoscience, should follow the guidelines laid out in the Geoscience Knowledge and Experience handbook provided by Geoscientists Canada. The Geoscience Knowledge and Experience handbook outlines comprehensive sequences of courses intended to prepare a student for professional practice in modern geoscience, and to meet formal requirements for registration in the Geology and Environmental Geoscience streams.

Professional geoscience knowledge requirements are more specific and stringent than degree requirements in terms of the courses required in Earth Sciences and in the Foundation Sciences (mathematics and physics in particular). Earth Science students can meet the knowledge requirements within a 120 credit hour degree by careful

selection of ERTH courses and Foundation Science courses, and this should begin in the first year. Less than judicious course selection, and/or combining Earth Science with another subject which also has numerous specific course requirements, may result in a student needing extra courses (beyond the 120 credit hours) in order to meet knowledge requirements for registration. Consult the professional associations -- Geoscientists Canada and APGNS - for additional information on registration.

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Earth Sciences and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see undergraduate advisors from Earth Sciences and from the Faculty of Engineering in their first year of study.

Field Work

Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field School, ERTH 3001, which is required for most degree programs, is offered for about 15 days in late August, just before the start of the University fall term.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

NOTE: Some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

Course Descriptions

ERTH 1030 Introduction to Physical Geography
CREDIT HOURS: 3
This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety maps.
CALENDAR NOTES: There are no pre-requisites for this course, and students may take this course in addition to any other first year Earth Science course.
CROSSLISTED: GEOG 1030.03
FORMATS: Lecture | Tutorial

ERTH 1060 Earthquakes, Volcanoes and Natural Disasters
CREDIT HOURS: 3
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.
CROSSLISTED: GEOG 1060.03
FORMATS: Lecture

ERTH 1080 Geology I
CREDIT HOURS: 3
This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth.The course meets the needs of students who require a science course with a lab component, is a required prerequisite course for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.
EXCLUSIONS: Credit will be given for only one of ERTH 1080, 1010, 1040 or 1041.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 1090 Geology II
CREDIT HOURS: 3
Earth systems introduced in Geology I are explored in greater detail, with an emphasis on change through time, earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the required course for Earth Sciences majors.
PREREQUISITES: ERTH 1080 is a pre- or co-requisite for ERTH 1090 or ERTH 1091.
EXCLUSIONS: credit will only be given for one of ERTH 1090, 1091, 1020, or 1050
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 1091 Geology II
CREDIT HOURS: 3
ERTH 1091 builds on the earth systems introduced in Geology I and explores them in greater detail. The emphasis is on change through time, earth resources, and on geologic systems that are connected to human actions. This non-lab course provides a strong background to pursue further work in the environmental sciences and is the required course for earth sciences majors.
CALENDAR NOTES: This course is required for Earth Sciences majors. ERTH 1080.03 is a pre- or co-requisite.
COREQUISITES: ERTH 1080.03
PREREQUISITES: ERTH 1080.03 or permission of instructor.
EXCLUSIONS: Credit will be given for only one of ERTH 1091.03, ERTH 1090.03, ERTH 1020.03 or ERTH 1050.03.
FORMATS: Lecture

ERTH 2001 Mineralogy
CREDIT HOURS: 3
Earth Materials Science I ERTH 2001 introduces the chemical/physical properties of minerals, their origins and distribution. Labs include mineral indentification, crystal chemistry, crystallography, and optical mineralogy. X-ray diffraction and electron microprobe methods are introduced.
PREREQUISITES: ERTH 1080.03 (or SCIE 1505) and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor) (or SCIE 1515 or SCIE 1530) and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03: Chemistry majors should consult the department. Students who have not taken CHEM 1010.03 (or equivalent) are encouraged to take this concurrently.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 2002 Introduction to Petrology
CREDIT HOURS: 3
Through a thorough and systematic examination of hand specimens and thin sections, and the detailed description of mineral assemblages and textures, students will be able to formally classify a wide range of igneous, metamorphic and sedimentary rock types. Case studies representing the geology of Nova Scotia will also be presented.
PREREQUISITES: ERTH 2001.03 and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 2020 Journey Through The Solar System
CREDIT HOURS: 3
An introduction to the geological features of the planets, asteroid belt, and major satellites of our solar system, and the current understanding as to their formation. The course uses the earth as an analog to compare the landforms, and both the measured and inferred geology of the solar system.
CALENDAR NOTES: There are no prerequisites, however a basic understanding of mathematics and the physical sciences is required.
RESTRICTIONS: Restricted from students in first year (E1).
FORMATS: Lecture | Online Delivery
LAB HOURS PER WEEK: 0

ERTH 2110 Field Methods
CREDIT HOURS: 3
This is intended as an introduction to field techniques useful to the practicing geologist, particularly those concepts essential for the accurate field description and identification of rocks and the use and construction of geological maps. Computer techniques and elementary structural geology are also considered.
PREREQUISITES: ERTH 1080.03 (or SCIE 1505) and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 2203 Sediments and Sedimentary Rocks
CREDIT HOURS: 3
The course deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork may include description of beaches and bedrock in Nova Scotia.
PREREQUISITES: ERTH 1080.03 (or SCIE 1506.09/1507.09 or SCIE 1505.18) and (ERTH 1090.03 or ERTH 1091.03)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 2270 Introduction to Applied Geophysics
CREDIT HOURS: 3
An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.
PREREQUISITES: ERTH 1080 (or SCIE 1505 or SCIE 1506/SCIE 1507) and first year Mathematics (MATH 1000) and Physics (PHYC 1190/ 1290 or PHYC 1300X/Y), or SCIE 1515Y, or SCIE 1530Y
CROSSLISTED: PHYC 2270.03
FORMATS: Lecture | Tutorial

ERTH 2380 Geochemistry
CREDIT HOURS: 3
An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the mobility of elements in geologic environments, and the use of geochemical data in solving geological and paleo- environmental problems.

PREREQUISITES: ERTH 1080 /(ERTH 1090 or 1091) or SCIE 1506/SCIE 1507 and ERTH 2001 & CHEM 1011/CHEM 1012 or equivalent, or permission of the instructor
FORMATS: Lecture | Tutorial

ERTH 2410 Environmental Issues in Earth Sciences
CREDIT HOURS: 3
Geology underlies many of the environmental problems facing humans today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1000 or ENVS 1100 or ENVS 1200, SUST 1001 with a grade of B or above, or DISP with Earth Sciences
CROSSLISTED: ENVS 2410
EXCLUSIONS: This class is not available for Earth Sciences Majors
FORMATS: Lecture

ERTH 2420 Dinosaurs
CREDIT HOURS: 3
Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.
CALENDAR NOTES: This course may not be offered every year. Please consult spring timetable or Department on whether course will be offered.
PREREQUISITES: ERTH 1080.03 or any two of ERTH 1010, ERTH 1020, ERTH 1030, ERTH 1040, ERTH 1041, ERTH 1050, ERTH 1060, ERTH 1090, ERTH 1091, or SCIE 1515, SCIE 1515 or SCIE 1530, or permission of instructor
FORMATS: Lecture

ERTH 2430 Forensic and Medical Geology
CREDIT HOURS: 3
Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 1080 and one other Earth Sciences course or instructor's permission.
FORMATS: Lecture | Tutorial

ERTH 3001 Field School
CREDIT HOURS: 3
This field-intensive course provides two weeks of geological mapping in northern Nova Scotia and entails: (1) identifying, measuring and localizing rocks and geological structures; (2) drawing geological maps from field observations and (3) writing a report describing and interpreting the data.
CALENDAR NOTES: The class is held for two weeks at the end of summer just prior to the start of the fall term and is required for the BSc Major and Honours programs. It can be a physically demanding course involving day-long traverses - prior consultation with instructors is required
PREREQUISITES: ERTH 2002.03, ERTH 2110.03, ERTH 2203.03 and permission of the instructor.

ERTH 3010 Igneous Petrology
CREDIT HOURS: 3
Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work consists of laboratory petrographic examination and weekend field trips.
PREREQUISITES: ERTH 2002.03 and ERTH 2380.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3020 Metamorphic Petrology
CREDIT HOURS: 3
Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.
PREREQUISITES: ERTH 3010.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3140 Structural Geology
CREDIT HOURS: 3
Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.
PREREQUISITES: ERTH 2002.03, ERTH 2110.03, ERTH 2203.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3205 Paleobiology
CREDIT HOURS: 3
This course examines fossil plants and animals and their interactions with the physical world throughout Earth's history. Lectures and lab encompass the concepts of fossil preservation, fossil morphology, fossil identification, systematics, evolution, extinction, paleoecology and biostratigraphy.
PREREQUISITES: ERTH 2203.03 or permission of the instructor.
EXCLUSIONS: ERTH 2205.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3302 Quaternary Sedimentary Environments
CREDIT HOURS: 3
The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.
PREREQUISITES: ERTH 2203.03
CROSSLISTED: GEOG 3302
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3303 Stratigraphy
CREDIT HOURS: 3
Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.
PREREQUISITES: ERTH 2203.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3401 Hydrogeology
CREDIT HOURS: 3
Hydrogeology examines the space-time characteristics of groundwater quantity and quality. It includes physical processes occurring in natural groundwater systems and the governing relations for flow and transport; emphasizing Darcy's Law, steady state and transient flow. It provides an overview of groundwater resource development, evaluation, contamination, and remediation.
PREREQUISITES: ERTH 3701 or permission of instructor
EXCLUSIONS: ERTH 3400.03, ERTH 3402.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ERTH 3440 Geomorphology
CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth’s surface processes and landforms with applications in geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080 (or SCIE 1506/1507 or SCIE 1505) and (ERTH 1090 or ERTH 1091); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor
CROSSLISTED: GEOG 3440.03
FORMATS: Lecture
LAB HOURS PER WEEK: 0

ERTH 3500 Geoscience Information Management
CREDIT HOURS: 3
Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The course is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.
PREREQUISITES: Two years of university study or equivalent or instructor’s permission
CROSSLISTED: ERTH 5600, GEOG 3500, ENVS 3500
EXCLUSIONS: Credit will only be given for one of ERTH 3500.03, ERTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 3601 Global Biogeochemical Cycles
CREDIT HOURS: 3
We currently face daunting environmental challenges at the global scale that are expected to worsen in the 21st century, including a global water crisis, climate change and pollution of our waters and atmosphere; this course examines the science behind these environmental issues from the multidisciplinary framework of global biogeochemical cycling. With the global scale as the focus, this course pulls together the many disparate fields that are encompassed by the broad reach of biogeochemistry. You will learn about the processes that drive the movement of carbon, water, nitrogen, phosphorus, and sulphur, through the earth system, and the

residency of these elements in the atmosphere, soils, lithosphere, oceans and freshwaters. In the quantitative and analytical exercises you calculate and compare the effects of industrial emissions, land clearing, agriculture, and rising population on the processes driving the Earth's chemical cycles. Weekly journal readings for discussion in laboratory group cover the latest developments in this exciting and rapidly changing field. This course provides an excellent framework for those interested in the science of global change.
PREREQUISITES: CHEM 1011/ CHEM 1012 or equivalent, and one of ENVS 1000, SUST 1001, ERTH 1080, or one of SCIE 1502XY/SCIE 1504/ SCIE 1510XY, and completion of 2 years of an undergraduate degree.
CROSSLISTED: ENVS 3601.03

ERTH 3701 Fundamentals of Hydrology
CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03, AND one of ENVS 1100/1200 (or ENVS 1000), SUST 1001.06, ERTH 1080.03, SCIE 1506/1507 (or 1505), AND completion of 2 years of an undergraduate degree. PHYC 1190 and PHYC 1290.03 (or PHYC 1310/1320) are recommended.
CROSSLISTED: ENVS 3701.03
FORMATS: Lecture | Lab

ERTH 4001 Sponsored Geologic Experience
CREDIT HOURS: 1.5
These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.
FORMATS: Lab

ERTH 4002 Advanced Field School
CREDIT HOURS: 3
This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.
CALENDAR NOTES: The field camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.
PREREQUISITES: ERTH 3001, ERTH 3140 permission from instructor

ERTH 4010 Advanced Topics in Petrology and Geochemistry
CREDIT HOURS: 3
This course advances students' knowledge of modern aspects of petrology, volcanology, and geochemistry, chosen to reflect instructor and students interests. The focus is on learning thermodynamic and computational methods as well as advanced petrographic work and field mapping for interpretation of igneous and metamorphic rocks.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010, ERTH 3020, ERTH 3001
CROSSLISTED: ERTH 5010

ERTH 4101 Research Project
CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201/4202.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. No grade is assigned for ERTH 4101 until both ERTH 4101 and 4102 have been completed.
FORMATS: Lecture

ERTH 4102 Research Project
CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201.03/4202.03.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. Credit cannot be given for a single term.
PREREQUISITES: ERTH 4101.03
FORMATS: Lecture

ERTH 4110 Geological Oceanography
CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of and past climates (2/3 of the course).
CALENDAR NOTES: Some training in calculus and statistics will prove to be advantageous to the student's outcome.
PREREQUISITES: OCEA 2001.03/OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03; OCEA 2021.03; ERTH 1080.03 or equivalent; or permission of instructor.
CROSSLISTED: OCEA 5110.03; OCEA 4110.03
EXCLUSIONS: Students in third year and above.
FORMATS: Lecture

ERTH 4131 Advanced Petroleum Geoscience
CREDIT HOURS: 3
This is an advanced course in petroleum geoscience applications and interpretation of basin/prospect evaluation. Students work in a team interpreting industry data,

including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.
PREREQUISITES: ERTH 3303.03, ERTH 4153.03, and permission of the instructor.
CROSSLISTED: ERTH 5131.03
FORMATS: Lecture

ERTH 4151 Mineral Deposits
CREDIT HOURS: 3
This course is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The course integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010.03, 3140.03
CROSSLISTED: ERTH 5151.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 4153 Petroleum Geology
CREDIT HOURS: 3
The course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.
PREREQUISITES: ERTH 2270.03, ERTH 3140.03, ERTH 3303.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 4157 Petroleum Geoscience Field Methods
CREDIT HOURS: 3
This course provides an advanced-level overview of petroleum systems and petroleum geology field methods including basin analysis, source rock evaluation, seismic and well log sequence stratigraphy and depositional facies analysis, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics. The course comprises lecture, presentations, and a one-week field seminar.
PREREQUISITES: ERTH 3303.03 and ERTH 4153.03 and permission of instructor

ERTH 4201 Honours Thesis
CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and 4202.03 are completed in consecutive terms. No grade is assigned for ERTH 4201 until ERTH 4202 has also been completed.
EXCLUSIONS: ERTH 4200X/Y.06
FORMATS: Lecture

ERTH 4202 Honours Thesis
CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and 4202.03 are completed in consecutive terms.
EXCLUSIONS: ERTH 4200X/Y.06
FORMATS: Lecture

ERTH 4350 Tectonics
CREDIT HOURS: 3
This is a required course for Earth Sciences honours students. It is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the course is on tectonic processes and the ways in which these processes create and modify the Earth's crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including pate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.
PREREQUISITES: ERTH 2270.03, 3140.03
CROSSLISTED: ERTH 5350.03
FORMATS: Lecture

ERTH 4410 Environmental Geoscience
CREDIT HOURS: 3
Environmental geoscience integrates various aspects of earth sciences to critically examine the interaction between humans and the geologic environment. Topics include: environmentally sensitive elements and minerals, geologic hazards, water, soil, mineral and energy issues, use of isotopes as tracers, as well as waste management, radioactivity, and the urban environment.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
COREQUISITES: ERTH 2380.03
PREREQUISITES: ERTH 2380.03, ERTH 3303.03 and two additional ERTH courses at the 3000 level or above, or permission of instructor
RESTRICTIONS: Restricted to students in third year or above.
FORMATS: Lecture | Tutorial

ERTH 4470 Introduction to Seismic Imaging
CREDIT HOURS: 3
This course teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.
PREREQUISITES: ERTH 2270.03 or consent of instructor
CROSSLISTED: ERTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03
FORMATS: Lecture | Lab

ERTH 4480 Advanced Seismic Imaging
CREDIT HOURS: 3
This course teaches more advanced techniques of seismic imaging of earth structures. Lectures introduce techniques that will be applied in the computer lab to the processing of multi-channel reflection and wide-angle refraction seismic datasets. Concepts covered include: multiple removal, pre-stack migration in time and depth, amplitude analysis, velocity modeling and inversion.
CALENDAR NOTES: This course is not offered ever year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 4470.03 or consent of instructor
CROSSLISTED: ERTH 5480.03, OCEA 4480.03, PHYC 4480.03, PHYC 5480.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 4510 Directed Reading
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to ERTH 4511.
PREREQUISITES: Permission of Department

ERTH 4511 Directed Readings
CREDIT HOURS: 3
See ERTH 4510.
PREREQUISITES: Permission of Department

ERTH 4520 GIS Applications to Environmental and Geological Sciences
CREDIT HOURS: 3
Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This course builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The course concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03
CROSSLISTED: GEOG 4520.03, ERTH 5520.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 4530 Environmental Remote Sensing
CREDIT HOURS: 3
The goal of this course is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3500.03, GEOG 3500.03, ENVS 3500.03 or ERTH 5600.03 or SCIE 3600.03
CROSSLISTED: GEOG 4530.03, ERTH 5530.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ERTH 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: SCIE 4850.03, ENVS 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Introduction
Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

Degree Programs

The Department of Economics offers the following degree programs in Economics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Economics
- Minor in Economics

* May be combined with Minor programs from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Economics undergraduate academic advisor.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department
Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)

Faculty Advisors
Ntantamis, C., Undergraduate Coordinator, econadvisor@dal.ca
Giusto, A., Co-op Academic Advisor, andrea.giusto@dal.ca
Rosenblum, D., Graduate Coordinator (MDE), BA (Williams College), MA, MPhil, PhD (Yale), econgrad@dal.ca
Yuksel, M., Graduate Coordinator (MA/PhD), BSc (METU), MA, PhD (Houston), econgrad@dal.ca

Professor Emeritus
Lesser, B. BComm (Dalhousie), MA, PhD (Cornell)
Sinclair, A., BA (Dalhousie), MA, BPhil (Oxon), PhD (Harvard)

Professors
Burton, P., BSc (Saskatchewan), MA, PhD (UBC)
Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)

Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale), McCulloch Professor of Economics
Phipps, S. A., BA (Hons) (Victoria), MA, PhD (UBC), Maxwell Chair of Economics
Xu, K., Dip. (Beijing Teachers' Univ), MBA, PhD (Concordia)

Associate Professors
Akbulut-Yuksel, M., BS (Middle East Tech), MA, PhD (Houston)
Cyrus, T., BA (UCLA), PhD (Berkeley)
Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)
Kotlyarova,Y., Dip. Software Eng (Lviv Poly Inst), MSc (Univ of Illinois - Urbana), PhD (McGill)
Okoye, D., BA Hons, PhD (UWO)
Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)
Tumennasan, N., BA (Univ of Mongolia), MA (Colorado-Denver), AM, PhD (Brown)
Ward, C., BA (Saskatchewan), MA (Queen's), PhD (Toronto)
Warman, C., BA (Combined Hons), MA, PhD (Carleton)
Yuksel, M., BSc (METU), MA, PhD (Houston)

Assistant Professors
Zhou, W., BE, MA (Tokyo Inst of Technology), PhD (UBC)

Adjunct Professors
Amirkhalkhali, S. I., BA Hons (Shiraz), MA, PhD (Dalhousie), St. Mary's
Cross, M. L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas A&M)
Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)
de Lamirande, P., BA, MA (Laval), PhD (Montreal)
Dufour, M., PhD (Univ of Mass), MA (UBC)
Marfels, C. T., Diplom-Volkswirt, Dr.Rer.Pol. (Berlin)
McAllister, R. I., MA (Oxon), MA (Cantab), LLD (Dalhousie)
Kivinen, S., BA Hons (Lakehead), MA (SFU), PhD (Queen's)
Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI

Senior Instructor
Boulatoff, C., MS (Université Catholique de l'Ouest), PhD (Utah State)
Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Queen's), PhD (Simon Fraser)

Instructors
Ntantamis, C., Dip. Naval Architecture & Marine Eng. (Athens), MSc (Piraeus), PhD (McGill)
Shamsuddin, M., BA (Lafayette), PhD (Georgetown)

Cross-Appointed Faculty
Clark, S., BA (Guelph), MSc (Saskatchewan), PhD (North Carolina), Faculty of Agriculture
Yiridoe, E. I., BSc (Univ Science and Tech Ghana), MSc, PhD (Guelph), Faculty of Agriculture
Zhao, Y., MSc (Western Kentucky), PhD (British Columbia), Professor of Finance, Faculty of Management

BSc or BA (120 credit hour) Concentrated Honours in Economics

Students who want a challenging program that results in a broad background in Economics and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Economics with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of ECON 4201.03 / ECON 4202: Honours Thesis I and II.

Students interested in eventually pursuing a Masters in Economics are advised to choose the BSc Honours option in order to acquire the needed analytical skills. In contrast, the the BA Honours program provides a broad background in Economics which is excellent prepation for a wide variety of other post-graduate programs.

Admission to Concentrated Honours

Students must apply for admission to Honours programs. Students considering Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON3339.03: Econometrics II prior to applying to Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I

- Have completed at least 12 credit hours of additional advanced Economics courses including 3000-level courses.
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Concentrated Honours program in Economics must complete the following courses:

BSc Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 21 credit hours in Economics at or above the 2000 level

BA Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 33 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

BSc or BA (120 credit hour) Combined Honours in Economics and another subject

Students who wish to study Economics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Economics, this requirement is satisfied through ECON 4201.03/ECON 4202.03: Honours Thesis.

Combined Honours students interested in eventually pursuing a Masters in Economics, are advised to choose the BSc option (with Economics as the primary subject) in order to acquire the needed analytical skills. To contrast, the BA Combined Honours program or BSc or BA (with Economics as a secondary subject) provides a broad background in Economics and another subject which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Combined Honours

Students must apply for admission to Combined Honours programs. Students considering Combined Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Combined Honours program (Economics as primary subject)**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON3339.03: Econometrics II prior to applying to Combined Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Combined Honours program (Economics as primary subject) or BA/BSc Combined Honours program (Economics as secondary subject)** students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Combined Honours program in Economics and another subject must complete the following:

BSc Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 3 credit hours in Economics at or above the 2000 level

Economics as secondary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- An additional 15 credit hours in Economics at or above the 2000-level, 12 of which must be at or above the 3000-level if (ECON3310.03 or ECON3349.03) is chosen or all of which must be at or above the 3000-level if (ECON2233.03 or ECON2239.03) is chosen.

BA Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 15 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Economics as secondary subject

- Same requirements as for BSc. Combined Honours with Economics as a secondary subject

BSc or BA (120 credit hour) Major in Economics

The 120 credit hour Major is suited to students who want to focus on Economics, but wish to have a program that is somewhat less constrained than the Honours program. BSc Economics Majors complete a minimum of 42 credit hours in Economics courses above the 1000 level; BA Economics majors complete a minimum of 36 credit hours in Economics courses above the 1000 level. Research and other experiential learning opportunities are available through special topics and experiential classes.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.003/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- An additional 9 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03: Econometrics I
- An additional 21 credit hours in Economics at or above the 3000 level

BA Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 credit hours in Economics at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Economics and another subject

The Double Major degree program allows students to combine a study of Economics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 2280.03: Statistics II (or MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference)
- An additional 3 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03:Econometrics I
- An additional 15 credit hours in Economics at or above the 3000 level

BA requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 additional credit hours in Economics at or above the 3000 level

BSc or BA (90 credit hour) Minor in Economics

The 90 credit hour degree with Minor in Economics is appropriate for students who want to study some Economics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general arts or science degree with some specialization in Economics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Economics is usually the preferred option for students who wish to combine studies in Economics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Economics section of this Calendar.

Minor in Economics
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science and in the Faculty of Arts and Social Sciences.

Requirements

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Contact Economics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. A. Giusto (andrea.giusto@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/co-operative-education.html.

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate.

Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

Certificate in Data Analytics

Certificate in Science Leadership and Communication

BEng/BSc (90 credit hour) concurrent degree (Economics)
This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 *Chemistry I* MATH 1280 *Engineering Math I* ENGI 1103 *Engineering Design I* PHYC 1190 *Physic I* ENGM 1081 *Computer Programming* CPST 1103 *Technical Communications I*	CHEM 1022 *Chemistry II* MATH 1290 *Engineering Math II* ENGI 1203 *Engineering Mechanics I: Statics* PHYC 1290 *Physics II* ENGM 1041 *Applied Linear Algebra* CPST 1203 *Technical Communications II*
Apply for admission into concurrent BEng/BSc Option 1: **Summer: ECON 1101 and ECON 1102** [a]		
Year 2	ENGM 2101 *Applied Vector Calculus* ENGM 2032 *Applied Probability & Statistics* [b] Writing course (Humanities) Option 1 [a] **Two 2000 level (or higher) ECON courses** Option 2 [a] **ECON 1101 and ECON 1102**	ENGM 2022 *Applied Differential Equations* HSTC 1801 *History of Engineering II* [c] One Engineering elective Option 1 **Two 2000 level (or higher) ECON courses** Option 2 **Two 2000 level or higher ECON courses**
Year 3	IENG 2005 *Engineering economics* ECED 2000 *Electric circuits* ENGI 2102 *Thermo-Fluid Engineering I* Option 1 **One 2000 level (or higher) ECON course** **One Science/FASS course (may be ECON)** Option 2 **Two 2000 level (or higher) ECON courses** **One Science/FASS course (may be ECON)**	ENGI 2203 *Engineering design II* [c] Two Engineering electives Option 1 **One 2000 level (or higher) ECON course** **One Science/FASS course (may be ECON)** Option 2 **Two 2000 level (or higher) ECON courses** **One Science/FASS course (may be ECON)**
Graduate with Diploma in Engineering and BSc 90 credit degree		
Year 4	Continue in BEng program	
Year 5	Complete BEng program	

[a] Under either Option (1 or 2) students must complete ECON 1101/ECON 1102, and a minimum of 18 credit hours of ECON courses at or above the 2000 level, and an additional 6 credit hours of Science/FASS courses (which may also be ECON courses)

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

[c] See Engineering section of the calendar for details

Graduate Studies
The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate courses, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate courses at the discretion of the instructors concerned.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
Recent course outlines are available on the department's website (http://economics.dal.ca)

All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

Course Descriptions

ECON 1101 Principles of Microeconomics
CREDIT HOURS: 3
How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.
FORMATS: Lecture

ECON 1102 Principles of Macroeconomics
CREDIT HOURS: 3
Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2013? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these.
CALENDAR NOTES: ECON 1101.03 is not required before taking ECON 1102.03. ECON 1101.03 and ECON 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.
FORMATS: Lecture

ECON 2064 Economic History of the Early Modern West 1500 - 1800
CREDIT HOURS: 3
The course provides an overview of Europe's growing economic power - agriculture, manufacturing, commerce, consumption and fiscality - in the centuries between the first overseas exploration and the onset of the Industrial Revolution. Along with the lectures, students are introduced to a variety of period sources, transcribed and translated.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
CROSSLISTED: HIST2064.03
FORMATS: Lecture | Seminar

ECON 2200 Intermediate Microeconomics
CREDIT HOURS: 3
This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03 with a minimum grade of C.
EXCLUSIONS: ECON 2220.03, ECON 2210.03
FORMATS: Lecture

ECON 2201 Intermediate Macroeconomics
CREDIT HOURS: 3
An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1102.03 with a minimum grade of C.
FORMATS: Lecture

ECON 2210 Managerial Microeconomics
CREDIT HOURS: 3
An extension of microeconomic theory and its applications that satisfies the minimum microeconomic theory requirements for Majors in economics. Especially of interest to Commerce students or others not majoring in economics, it pays particular attention to applications of theory in a practical context. Serves as the microeconomic prerequisite for higher-level classes in economics.
CALENDAR NOTES: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.
PREREQUISITES: ECON 1101.03 or ECOA 1000.03 with minimum grade of C
EXCLUSIONS: ECON 2200.03, ECON 2220.03
FORMATS: Lecture

ECON 2211 Economics of Innovation
CREDIT HOURS: 3
Innovation involves the creation and diffusion of new products, processes and methods that drive productivity increases and sustainable growth. This course uses microeconomics to examine the public sector's role in promoting innovation and firms' receptor capacity to recognize and address productivity gaps with investments in innovative products, processes and methods.
PREREQUISITES: ECON 1101 or ECON 1102 with minimum grade of C
FORMATS: Lecture

ECON 2212 Law and Economics
CREDIT HOURS: 3
Law and Economics is the study of optimal legal frameworks. This course uses microeconomic theory to study the efficiencies of property, contract, tort, criminal, and antitrust law. A critical analysis of the role of the Competition Bureau in Canadian markets is presented, along with the tools used to evaluate transactions.
PREREQUISITES: ECON 1101 with minimum grade of C
FORMATS: Lecture

ECON 2213 Emerging Giants: The Economic Rise of China and India
CREDIT HOURS: 3
This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?
CALENDAR NOTES: The student is recommended to have some knowledge of Statistics prior to taking this course.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: CHIN 2290.03
FORMATS: Lecture

ECON 2216 Economics of Global Warming
CREDIT HOURS: 3
This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?
PREREQUISITES: ECON 1101.03 with minimum grade of C
EXCLUSIONS: ECON2850.06, PHYC2850.06
FORMATS: Lecture

ECON 2217 Women and the Economy
CREDIT HOURS: 3
This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: GWST 2217.03
FORMATS: Lecture

ECON 2218 Canadian Economy: Policy Issues
CREDIT HOURS: 3
Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03, with minimum grades of C
CROSSLISTED: CANA 2218.03
FORMATS: Lecture

ECON 2219 Euros and Cents: From Common Market to European Union
CREDIT HOURS: 3
The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2220 Microeconomic Theory
CREDIT HOURS: 3
This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.
CALENDAR NOTES: Students may not receive credit for both 2200.03 and 2220.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: Econ 1101.03, MATH 1000.03 (or equivalent) with minimum grades of C
EXCLUSIONS: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.
FORMATS: Lecture

ECON 2231 Perspectives in Health Economics
CREDIT HOURS: 3
This course introduces students to the economics of health, health care, and health policy. It surveys major topics in health economics and the ongoing debate over health care policy. Topics include the economic determinants of health, markets for medical care and health insurance and the government's role in health care.
PREREQUISITES: ECON 1101.03 and any MATH or STAT course with minimum grades of C
FORMATS: Lecture

ECON 2233 Canadian Economic History
CREDIT HOURS: 3
An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.
CALENDAR NOTES: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this course.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: CANA 2233.03
FORMATS: Lecture

ECON 2239 The European Economy Since 1900
CREDIT HOURS: 3
This course applies economic theories to interpret quantitative economic changes in major European countries during the turbulent 20th century. Issues addressed include sources of growth and unevenly improved welfare, war, inflation, depression; Nazi economy; Communism's nature, success, and ultimate failure; reparations and the transfer 'problem'; and the 'transition.'
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2260 Statistics I
CREDIT HOURS: 3
See course description for MATH 2060.03, in Mathematics section of this calendar.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and either MATH 1010.03 or 2030.03 or DISP
CROSSLISTED: MATH 2060.03, STAT 2060.03
EXCLUSIONS: ENGM 2032.03

ECON 2280 Statistics II
CREDIT HOURS: 3
See course description for MATH 2080.03, in Mathematics section of this calendar.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: STAT 1060.03 or STAT 2060 or DISP
CROSSLISTED: MATH 2080.03, STAT 2080.03

ECON 2326 Money and Banking
CREDIT HOURS: 3
The course concerns the nature and operation of the financial system with particular reference to the Canadian experience. It investigates financial instruments (including money) and institutions and the social control of the supply of money and credit.
CALENDAR NOTES: Approved with Canadian Studies
PREREQUISITES: ECON1101.03, ECON1102.03 with minimum grades of C
EXCLUSIONS: ECON3326.03
FORMATS: Lecture

ECON 2334 Perspectives on Economic Development
CREDIT HOURS: 3
Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there is a role for the state in directing a nation's economic affairs. These debates continue. We assess critiques of economic analysis of development and students are encouraged to debate these issues.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2336 Regional Development
CREDIT HOURS: 3
Why are some countries or regions poor? Why have the relative positions of different countries and regions shifted over the last several decades? Economic development issues, policies, and theories are analyzed to answer these questions.
PREREQUISITES: ECON 1101.03, 1102.03 with minimum grades of C
CROSSLISTED: GEOG 2336.03
FORMATS: Lecture

ECON 2400 Economic Demography
CREDIT HOURS: 3
This course investigates the economic determinants and consequences of the size, growth, and age structure of human populations. Topics include: why and how households save for retirement and related policy; how age structure affects the employment and well-being of particular generations; and how demographic change and economic growth interact.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2850 The Science and Economics of Climate Change
CREDIT HOURS: 6
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any First year MATH or STAT course
CROSSLISTED: PHYC 2850.06
EXCLUSIONS: PHYC 2800.03, ECON 2216.03
FORMATS: Lecture

ECON 3111 Writing in Economics
CREDIT HOURS: 3
This course provides instruction in principles and practice of good writing about economics. Students read and examine writing samples and practice writing for various venues (such as government, firms, and news media) in various formats (such as opinion editorials, government policy papers, proposal writing and journal articles).
PREREQUISITES: ECON 2200.03 or (ECON 2210.03 or ECON 2220.03) and a Dalhousie writing course with minimum grades of C

ECON 3231 Topics in Health Economics
CREDIT HOURS: 3
This course comprises a survey of major topics in health economics and introduces the issues, theory and practice of health economics. The course frames health care as an input into the production of health. It thus differentiates the concepts of healthcare and health addressing both throughout the term.
CALENDAR NOTES: ECON 2231.03 is a recommended prerequisite
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2280.03/STAT 2080.03/MATH 2080.03, with minimum grades of C
FORMATS: Lecture

ECON 3310 Economic Growth in Historical Perspective
CREDIT HOURS: 3
This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3315 Labour Economics
CREDIT HOURS: 3
This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3319 Industrial Organization
CREDIT HOURS: 3
The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3320 The Economics of Professional Sports
CREDIT HOURS: 3
This course applies microeconomic theory to explain the peculiar nature of professional sports. Topics may include the organization of leagues, ticket pricing, advertising, competitive balance, franchise valuation, stadium financing, broadcasting and sports labour markets. "Controversial" topics, such as gambling, cheating, performance enhancing drugs (PEDs) and discrimination may also be covered.
PREREQUISITES: ECON1102.03, (ECON2200.03 or ECON2220.03) and (STAT1060 or STAT2060) each with minimum grades of C.
FORMATS: Lecture

ECON 3330 International Trade
CREDIT HOURS: 3
This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3331 International Finance
CREDIT HOURS: 3
This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.
PREREQUISITES: ECON 2201.03 with minimum of grade C
FORMATS: Lecture

ECON 3332 Resource Economics
CREDIT HOURS: 3
This course focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture

ECON 3333 Economic Development
CREDIT HOURS: 3
This course surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, with minimum grades of C
FORMATS: Lecture

ECON 3335 Environmental Economics
CREDIT HOURS: 3
This course serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3338 Econometrics I
CREDIT HOURS: 3
The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.
PREREQUISITES: MATH 1000.03 (or equivalent) and ECON 2280.03/MATH 2080.03/STAT 2080.03 with minimum grades of C
FORMATS: Lecture

ECON 3339 Econometrics II
CREDIT HOURS: 3
This course is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this course include: panel data, binary-choice models, instrumental variables, time series and forecasting.
PREREQUISITES: ECON 3338.03 with minimum grade of C
FORMATS: Lecture

ECON 3345 Public Finance
CREDIT HOURS: 3
This class studies the economics of taxes and transfers. Equity and efficiency effects of both are considered. Approved with Canadian Studies.
PREREQUISITES: (ECON 2200.03 or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3349 History of Economic Thought
CREDIT HOURS: 3
This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.
PREREQUISITES: (ECON 2200.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3426 Monetary Policy
CREDIT HOURS: 3
Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed. Particular attention is given to the Canadian experience and the effectiveness of Canadian policy.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2201.03 and ECON 2326.03 with minimum grades of C
EXCLUSIONS: ECON4426
FORMATS: Lecture

ECON 3500 Public Economics
CREDIT HOURS: 3
Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.
CALENDAR NOTES: While a background of ECON 3700 is helpful, it is not a prerequisite.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and MATH 1000.03 with minimum grades of C or instructor permission
FORMATS: Lecture

ECON 3600 Strategic Behaviour in Economics
CREDIT HOURS: 3
Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's

action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.
PREREQUISITES: ECON 2200.03 or ECON 2210.03 or ECON 2220.03, MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture

ECON 3700 Mathematics for Economists
CREDIT HOURS: 3
This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.
PREREQUISITES: ECON 2200.03 or ECON 2210.03 or ECON 2220.03, ECON 2201.03, and MATH 1000.03 with minimum grades of C or permission of the instructor
CROSSLISTED: MATH 3700.03
FORMATS: Lecture

ECON 3800 Financial Economics
CREDIT HOURS: 3
This course is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes “hands-on” learning using Canadian and international case studies.
PREREQUISITES: ECON 2200.03 or ECON 2210.03 or ECON 2220.03, ECON 2201.03 with minimum grades of C
CROSSLISTED: MATH 3800.03
FORMATS: Lecture

ECON 3900 Financial Mathematics
CREDIT HOURS: 3
See course description for MATH 3900.03 in the Mathematics section of this calendar.
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03 or MATH 2135.03) with minimum grades of C or instructor's permission
CROSSLISTED: MATH 3900.03
FORMATS: Lecture

ECON 4002 Experiential Learning (in Economics)
CREDIT HOURS: 3
Experiential learning recognized the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.
PREREQUISITES: ECON 1101.03, ECON 1102.03, ECON 2200.03 or ECON 2210.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, ECON 3339.03 with minimum grades of C. To be eligible, students should have a minimum average GPA of 3.0 in Economics.
EXCLUSIONS: Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

ECON 4201 Honours Thesis I
CREDIT HOURS: 3
This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.
CALENDAR NOTES: Students must complete both ECON4201.03 and 4202.03, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis courses, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339 is a recommended prerequisite for B.Sc. students.
PREREQUISITES: ECON 2200.03 or ECON 2210.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, with minimum grades of C and permission of instructor
EXCLUSIONS: ECON4200.06 X/Y
FORMATS: Seminar

ECON 4202 Honours Thesis II
CREDIT HOURS: 3
This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.
CALENDAR NOTES: Students must complete both ECON4201.03 and ECON4202.03, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis course, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339 is a recommended prerequisite for B.Sc. students.
PREREQUISITES: (ECON 2200.03 or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON4201.03, all with minimum grades of C, and permission of instructor
EXCLUSIONS: ECON4200.06 X/Y
FORMATS: Seminar

ECON 4317 Poverty and Inequality
CREDIT HOURS: 3
Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.
CALENDAR NOTES: Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 4317.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON2201.03, with minimum grades of C.

EXCLUSIONS: ECON 3317.03; ECON 5317.03
FORMATS: Lecture

ECON 4350 Social Cost Benefit Analysis
CREDIT HOURS: 3
Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 3335.03 (or ECON 3330.03 or ECON 3319.03 or ECON 3332.03), with minimum grades of C
EXCLUSIONS: ECON3350.03
FORMATS: Lecture

ECON 4360 Ethics, Justice, and Economics
CREDIT HOURS: 3
Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism Nozickian libertarianism, Sen's capabilities approach and equality of opportunity.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03, with minimum grades of C
CROSSLISTED: PHIL 4360.03
EXCLUSIONS: ECON 3360.03, ECON 5360.03, PHIL 3361.03
FORMATS: Lecture

ECON 4420 Microeconomic Theory
CREDIT HOURS: 3
In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.
PREREQUISITES: ECON 2200.03 or ECON 2210.03 or ECON 2220.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03 with minimum grades of C
FORMATS: Lecture

ECON 4421 Macroeconomic Theory
CREDIT HOURS: 3
Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.
PREREQUISITES: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03 with minimum grades of C
FORMATS: Lecture

ECON 4427 Market Design
CREDIT HOURS: 3
The course studies how the organization of centrally administered markets affects their performance. Students learn several mechanisms that are currently used, and evaluate their properties. The course has a strong emphasis on applications, e.g., the allocation of students to public schools, interns to hospitals or organ donors to recipients.
PREREQUISITES: ECON3700 or MATH 2001 with a minimum grade of C
EXCLUSIONS: Econ 5427.03
FORMATS: Lecture

ECON 4440 Time Series in Economics
CREDIT HOURS: 3
This is a course in econometrics that focuses on time series models. The topics cover estimation and inference procedures for univariate and multivariate time series models with stationary and nonstationary data, including vector autoregressive models and Markov switching models.
PREREQUISITES: ECON 3338.03 (grade of C or higher), ECON 3339.03 (grade of B or higher)
EXCLUSIONS: ECON 5440.03
FORMATS: Lecture

ECON 4700 Advanced Mathematics for Economists
CREDIT HOURS: 3
The course emphasizes abstract analytical methods via a selection of topics in mathematics which prepares the advanced undergraduate student for pursuing graduate studies in economics. Topics include elements of mathematical logic, sets and correspondence, vector spaces, metric spaces, topological concepts, fundamentals of analysis, multivariate calculus, fixed point theorems, dynamic optimization.
PREREQUISITES: ECON 3700.03 with minimum grade of C
FORMATS: Lecture

ECON 8891 Co-op Work-Term I
CREDIT HOURS: 0

ECON 8892 Co-op Work-Term II
CREDIT HOURS: 0

ECON 8893 Co-op Work-Term III
CREDIT HOURS: 0

Environment, Sustainability and Society

Location: College of Sustainability
1459 LeMarchant Street
Suite 1401
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-4581

Fax: (902) 494-8923

Email: sustainability@dal.ca

Degree Programs
The College of Sustainability offers a BSc Double Major, Combined Honours and Minor in Environment, Sustainability and Society with any major/honours subject in the Faculty of Science and the Faculty of Computer Science. For complete details about the College, its programs and courses please see the College of Sustainability.

Students in the ESS Program are eligible to pursue the following Certificates offered by the Faculty of Science:

- Certificate in Environmental Impact Assessment
- Certificate in Geographical Information Systems

BSc Combined Honours, Environment, Sustainability and Society
The BSc Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Science or the Faculty of Computer Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s).

Admission to ESS Honours (ESS as primary subject):
Students must apply for admission to the ESS Honours Program by completing the "Intent to Register for ESS Honours Thesis" form before the end of the winter term prior to starting the ESS Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BSc Combined Honours Graduation Requirements
Students must fulfill the requirements for the 120 credit hour degree requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A cumulative GPA of 3.0 is required in all Honours Subject courses at 2000 level or above, with no individual grade less than C.

Course Requirements
In addition to fulfilling the 120 credit hour degree requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Combined Honours program in ESS and another subject must complete the following:

ESS Course Requirements:
1000-level Requirements:

- SUST 1000.06: *What is Sustainability?* **or** SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements:

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- SUST 3701.03: *The Community as a Living Laboratory***or** SUST 3502.03: *The Campus as a Living Laboratory* *
- 6 more credit hours SUST at 3000 level or above (SUST 4000XY.06 recommended)
- **ESS as primary subject in BSc Combined Honours:**
  - 6 more credit hours SUST or ESS Electives at **2000 level or above**
  - SUST 4900XY.06: *ESS Honours Thesis*
- **ESS as secondary subject in BSc Combined Honours:**
  - 6 more credit hours SUST or ESS Electives at **3000 level or above**
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 54 credit hours in SUST/ESS Electives at 2000-level or above

* For students whose **Allied Subject is Environmental Science**, SUST 3701/SUST 3502 is replaced with 3 credit hours SUST at 3000-level or above.

Allied Subject Requirements:
Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

General Degree Requirements satisfied by SUST courses:
SUST 1000.06 satisfies the 6 credit hours writing requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For all General Degree Requirements please see College of Arts and Science Degree Requirements.

BSc Double Major, Environment, Sustainability and Society

The BSc Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Science or the Faculty of Computer Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s).

Course Requirements

In addition to fulfilling the 120 credit hour degree requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Double Major program in ESS and another subject must complete the following:

ESS Requirements:

1000-level requirements:

- SUST 1000.06: *What is Sustainability?***or** SUST 1400.03 *Exploring Sustainability* (online)
- SUST 1001.06: *A Sustainable Future*
- With **Foundation Year Program (FYP)** or **Dalhousie Integrated Science Program (DISP)**: Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements:

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision-Making*
- SUST 3701.03: *The Community as a Living Laboratory***or** SUST 3502.03: *The Campus as a Living Laboratory* *****
- SUST 4000XY.06: *Environment, Sustainability and Society Capstone*
- 6 more credit hours SUST or ESS Electives at 3000 level or above
- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

***** For students whose **Allied Subject is Environmental Science**, SUST 3701/SUST 3502 is replaced with 3 credit hours SUST at 3000-level or above.

Allied Subject Requirements:

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses:

SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For all General Degree Requirements please see College of Arts and Science Degree Requirements.

Minor in Environment, Sustainability and Society
The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

- any 1000-level SUST course
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact College of Sustainability for more information.

Introduction
Environmental Science in the Faculty of Science offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Science, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Science, Faculty of Arts and Social Sciences (FASS) or with the College of Sustainability. The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning also offer a Minor in Environmental Studies which is administered through Environmental Science.

Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The courses required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

Degree Programs
The Faculty of Science offers the following degree programs in Environmental Science

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in Environmental Science
- Minor in Environmental Studies

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Program Requirements can be seen by following the links to the right. In addition to the program requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Environmental Science undergraduate academic advisor.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Director
Rainham, D., PhD (Ottawa) (902) 494-1286 daniel.rainham@dal.ca

Faculty
Gass, S., PhD (Open Univ, UK) (902) 494-4530 susan.gass@dal.ca

Supporting Faculty
Environmental Science draws on faculty from the departments below:
Biology
Chemical Engineering
Chemistry
Earth Sciences
Economics

Environmental Engineering
International Development Studies
Mathematics
Oceanography
Philosophy
Physics and Atmospheric Science
Political Science
School for Resource and Environmental Studies
School of Planning
Sociology and Social Anthropology
Statistics

Note: This field is rapidly expanding. Students interested in these types of programs should ask about courses related to the environment, other than those listed on the following pages, through the departmental contacts noted above.

BSc (120 credit hour) Major in Environmental Science

The 120 credit hour Major is suited to students who want to focus on Environmental Science, but wish to have a program that is somewhat less constrained than the Honours program. Environmental Science Majors complete 36 credit hours in Environmental Science courses. Research and other experiential learning opportunities are available through laboratories, field, special topics and internship courses.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Environmental Science. See Co-operative Education Program.

Program requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Major program in Environmental Science must complete the 1000 level courses (listed below) and the Common Core courses - Majors (also listed below).

1000 Level Courses (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

Or

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses - Majors

To be completed over the course of a four year degree program: Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods of Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2310.03: Energy and the Environment
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II

- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods of Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in Social Science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Languages and Humanities.

BA (120 credit hour) Major in Environmental Science

BA Major in Environmental Science

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet 1
    - OCEA 2002.03: The Blue Planet 2
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any additional 3000 or 4000 level ENVS courses
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

BSc Double Major in Environmental Science and Community Design

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Double Major program in Environmental Science and Community Design must complete the following:

1000 Level

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03: Introduction to Community Design I and PLAN 1002.03: Introduction to Community Design II

OR

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity and CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- ERTH 1030.03: Introduction to Physical Geography
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03 and PLAN 1002.03
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions

Common Core Courses - as listed for BSc Major, except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

Community Design Courses

- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Design Methods
- PLAN 2005.03: Community Design Context
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3006.03: Reading the Landscape
- An additional three credit hours in PLAN

BSc or BA (120 credit hour) Double Major in Environmental Science and another subject

The Double Major degree program allows students to combine a study of Environmental Science with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, the College of Sustainability or Community Design in the Faculty of Architecture and Planning. Environmental Science may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Double Major program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Double Major, ENVS as primary or secondary subject

Students must complete the following:

1000 Level (to be taken the first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses as listed for BSc Major except:

- ENVS 2310.03: Energy and the Environment is not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

BA Double Major, ENVS as primary or secondary subject

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet I
    - OCEA 2002.03: The Blue Planet II
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any additional 3000 or 4000 level ENVS courses
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

BSc or BA (120 credit hour) Combined Honours in Environmental Science and another subject

Students who wish to study Environmental Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Environmental Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by

Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Environmental Science, this requirement is satisfied through ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Combined Honours in Environmental Science and another subject

ENVS as primary or secondary subject

1000 Level (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

Also required but normally taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics

Common Core Courses as listed for BSc Concentrated Honours except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

If ENVS is the primary subject: a minimum of six additional credit hours of ENVS or ENVS-equivalent courses, which may be ENVS 4901.03/ENVS 4902.03 (Honours Thesis and Qualifying Exam).

If ESS (Environment, Sustainability and Society) is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

BA Combined Honours in Environmental Science and another subject

Requirements are the same for ENVS as primary or secondary subject. Students must complete the following:

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first-year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03: Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2000.06: The Blue Planet
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any ENVS course
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

If ENVS is the primary subject, a minimum of six additional credit hours of ENVS or ENVS equivalent courses, which may be ENVS 4901.03, ENVS 4902.03 (Honours Thesis and Qualifying Exam).

*If ESS is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

BSc (120 credit hour) Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Environmental Science. See Co-operative Education Program.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

Program Requirements
In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Environmental Science must complete the following:

1. 1000 level courses (below)
2. Common Core courses (Honours) (below)
3. ENVS 4901.03 and ENVS 4902.03 (Honours thesis and Qualifying Exam)
4. An additional 12 credit hours of ENVS or ENVS-equivalent courses at or above the 2000 level

1000 Level

- SCIE 1505.18: Integrated Science or Integrated Science I and II (SCIE 1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

The courses listed above should be taken in the first year, if possible, if ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions are not taken in the first year, it should be taken in the second year.

Also required but usually taken in the second year.

- ECON 1101.03: Principles of Microeconomics* or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses
Completed at various times over a four year degree program, the Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods for Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I

- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods for Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in social science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Language and Humanities.

BA (120 credit hour) Concentrated Honours in Environmental Science

BA Concentrated Honours in Environmental Science
Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet 1
    - OCEA 2002.03: The Blue Planet 2
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any additional 3000 or 4000 level ENVS courses
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

Minor in Environmental Science

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Sciences) program.

Requirements:

- Between 18 and 36 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher.

Minor in Environmental Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA Minor

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (e.g. a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03: Introduction to Environmental Law, at least nine credit hours must be at the 3000 level or above.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship

- ENVS 3100.03: Environmental Analytics
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4004.03: Pathways to Sustainable Energy
- ENVS 4100.03: Environmental Science Capstone

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHIL 3670.03: Philosophy of Science
- PHIL 4120.03: Theory of Rational Decision-Making
- POLI 3585.03: Politics of the Environment
- POLI 4228.03: Interest Groups
- POLI 4380.03: Politics of Climate Change
- SOSA 2100.06: Environment and Culture
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3200.03: Environment and Society
- SOSA 3220.03: Coastal Communities
- SOSA 4210.03: Tourism and Development
- SPAN 2070.03: Area Studies on Mexico and Central America
- GWST 3310.03: Gender and Development in Africa

Other Electives

- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning

BACSc, BSc, BCSc, BInf, BComm, BMgmt Minor
Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (e.g. a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03 Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3302.03: Quaternary Sedimentary Environments
- ERTH 3400.03: Fundamentals of Hydrogeology
- ERTH 3402.03: Practical Hydrogeology
- ERTH 3410.03: Environmental Geology 2
- ERTH 3420.03: Geochemistry of Aquatic Environments
- ERTH 3440.03: Geomorphology
- ERTH 3500.03: Geoscience Information Management
- ERTH 4450.03: Introduction to Landscape Simulation
- ERTH 4502.03: Micropaleontology and Global Change

- ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- ERTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology

- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- POLI 3590.03: Politics of the Sea II
- SOSA 2100.06: Environment and Culture
- SOSA 3200.03: Environment and Society

- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

BCD Minor
The Minor in Environmental Studies is a 30 credit hour Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP) or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03 Environmental Problem Solving II

Elective requirements:
12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- ERTH 3302.03: Quaternary Sedimentary Deposits
- ERTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- SOSA 2100.06: Environment and Culture
- SOSA 3200.03: Environment and Society

- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Environmental Science

Co-op Academic Advisor: Dr. Tarah Wright tarah.wright@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Environmental Science, or in Combined Honours or Double Major programs with Environmental Science as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Environmental Science Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Environmental Science, please see www.dal.ca/environment.

Minors available to students in Environmental Science
Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Environmental Science may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc or BA in Environmental Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements.

Certificates of particular interest to student enrolled in a BSc or BA in Environmental Science include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

Environmental Science Approved Courses from other departments

Agriculture

- AGRI 4001: Agriculture, Food and Well-being

Biology

- BIOL 2060: Intro Ecology
- BIOL 3036: Transgenic Organism
- BIOL 3060: Environmental Ecology
- BIOL 3061: Communities and Ecosystems
- BIOL 3063: Resource Ecology
- BIOL 3065: Conservation Biology
- BIOL 3329: Applied Entomology
- BIOL 3602: Introduction to Aquaculture
- BIOL 3601: Nature Conservation
- BIOL 3620: Field Survey of Terrestrial Biodiversity

- BIOL 3623: Applied Coastal Ecology
- BIOL 3640: Tropical Ecology and Biodiversity Field Class
- BIOL 3666: Species Invasions
- BIOL 4065: Sustainability and Global Change
- BIOL 4160: Political Ecology
- BIOL 4664: History of Marine Science

Chemical Engineering

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ENVS 1100 Foundations of Environmental Science: Ecosphere, Resources & Sustainability
CREDIT HOURS: 3
This course introduces students to key topics in Environmental Science including science literacy, environmental ethics, principles of ecology, evolution, biodiversity, human population growth, soil, agriculture, forestry, and oceans and freshwater systems. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

ENVS 1200 Current Environmental Challenges: Analysis and Solutions
CREDIT HOURS: 3
This course introduces current issues and challenges in Environmental Science including air pollution and climate change, non-renewable and renewable energy, waste, urbanization, environmental law, and sustainability and education. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

ENVS 2000 Urban Field School
CREDIT HOURS: 3
This field course offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings within the Halifax Regional Municipality.
CALENDAR NOTES: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1000.06 or SCIE 1505.18 or ENVS 1100.03 and ENVS 1200.03, or equivalent and open only to students in the BSc or BA Environmental Science Programs
FORMATS: Lecture | Lab

ENVS 2100 Environmental Informatics
CREDIT HOURS: 3
Environmental Informatics is the knowledge, skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop analytical skills using a variety of software including spatial querying in GIS. Identification of fallacies in the media and effective science communication are introduced and applied to current environmental issues.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, and STAT 1060.03
FORMATS: Lecture | Lab

ENVS 2310 Energy and the Environment
CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.
PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300X/Y.06 or CHEM 1011.03/1012 and MATH 1000.03 or MATH 1215.03 or permission of the instructor.
CROSSLISTED: PHYC 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

ENVS 2410 Environmental Issues in Earth Sciences
CREDIT HOURS: 3
Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1100.03 and ENVS 1200.03, or ENVS 1000.06, SUST 1001 with a grade of B or above, or DISP with Earth Sciences
CROSSLISTED: CANA 2410.03, ERTH 2410.03
EXCLUSIONS: This class is not available for Earth Sciences Majors
FORMATS: Lecture

ENVS 2500 Field Methods in Environmental Science
CREDIT HOURS: 3
A field-based immersion into environmental field sampling methods. Students gain skills in flora and fauna identification and inventory, assessment of ecosystem health, and sampling methods for air and soil. GPS, GIS, and basic remote sensing skills are utilized in sampling design, collection and visualization of results.
CALENDAR NOTES: Includes a number of field trips. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, (or ENVS 1000.06)
RESTRICTIONS: Restricted to students in BSc and BA Environmental Science programs
FORMATS: Lab
LAB HOURS PER WEEK: 3

ENVS 3000 Environmental Science Internship
CREDIT HOURS: 3
This course allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.
CALENDAR NOTES: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.
PREREQUISITES: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science

ENVS 3001 Environmental Science Field School
CREDIT HOURS: 3
Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.
PREREQUISITES: ENVS 2100 and must be an ENVS student

ENVS 3100 Environmental Analytics
CREDIT HOURS: 3
This course takes a hands-on approach to data analysis to support environmental conservation. Topics include experimental design, spatial pattern analysis, visualization of 3D data, ecological modelling, and animated mapping of time series data. Emphasis is placed on learning skills directly applicable to conducting environmental research in a variety of settings.
PREREQUISITES: ENVS 2100.03 and STAT 2080.03
FORMATS: Lecture | Tutorial

ENVS 3200 Introduction to Environmental Law
CREDIT HOURS: 3
This course will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multi-disciplinary aspects which make this area of law part science, part art and part soothsaying.
PREREQUISITES: Must be a third year student
FORMATS: Lecture

ENVS 3225 Plants in the Human Landscape
CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better)or DISP or PLAN 2001.03
CROSSLISTED: PLAN 3225, BIOL 3225
FORMATS: Lecture | Tutorial

ENVS 3226 Economic Botany, Plants and Civilization
CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: BIOL 3226.03
FORMATS: Lecture | Lab

ENVS 3300 Contaminated Site Management
CREDIT HOURS: 3
Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips

augment the class. Class offered in alternate years.
PREREQUISITES: CHEM 1011.03/1012.03; ERTH 1010.03/1020.03; OR permission of the instructor
FORMATS: Lecture

ENVS 3400 Environment and Human Health
CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: GEOG 3400.03
FORMATS: Lecture | Lab

ENVS 3500 Geoscience Information Management
CREDIT HOURS: 3
See course description for ERTH 3500 in the Earth Sciences section of the calendar.

ENVS 3501 Environmental Problem Solving I
CREDIT HOURS: 3
This course introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST 1001.06(with a grade of B- or higher). Must be a 3rd year student OR have permission of instructor.

ENVS 3502 Environmental Problem Solving II: The Campus as a Living Laboratory
CREDIT HOURS: 3
In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST 1001.06(with a grade of B- or higher). Must be a 3rd year student OR have permission of instructor.
CROSSLISTED: SUST 3502.03
EXCLUSIONS: MGMT 3701.03

ENVS 3601 Global Biogeochemical Cycles
CREDIT HOURS: 3
An interdisciplinary course that examines example global cycles of water, carbon, nitrogen, phosphorus, and sulphur, and human impacts on these cycles, as manifested in our atmospheric, soil, ocean and freshwater environments. This course involves discussion of the latest developments in this rapidly changing field and will provide a framework for those interested in global change.
PREREQUISITES: An introductory Chemistry class and one of ENVS 1000.06 or ENVS 1100.03 and ENVS 1200.03, SUST 1001.06, ERTH 1080.03, or ERTH 1090.03, or OCEA 2000.06, or OCEA 2001.03 and OCEA 2002.03
CROSSLISTED: ERTH 3601.03

ENVS 3615 Methods in Ecology
CREDIT HOURS: 3
See course description for BIOL 3615 in the Biology section of the calendar.

ENVS 3623 Applied Coastal Ecology
CREDIT HOURS: 3
See course description for BIOL 3623 in the Biology section of the calendar.

ENVS 3624 Urban Freshwater Systems
CREDIT HOURS: 3
See course description for BIOL 3624 in the Biology section of the calendar.

ENVS 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
See course description for BIOL 3632 in the Biology section of the calendar.
FORMATS: Lecture | Lab

ENVS 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03
CROSSLISTED: BIOL 3633.03, GEOG 3633.03, MARI 3633.03

ENVS 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
See course description for BIOL 3664 in the Biology section of the calendar.

ENVS 3701 Fundamentals of Hydrology
CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and one of ENVS 1000.06 or ENVS 1100.03 and ENVS 1200.03, SUST 1001.06, ERTH 1080.03, or ERTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MATH 1010.03 are recommended.
CROSSLISTED: ERTH 3701.03
FORMATS: Lecture | Tutorial

ENVS 3702 Sustainable Industries
CREDIT HOURS: 3
This course introduces concepts and methods for analyzing industrial sustainability through an interdisciplinary lens including economic, social and environmental considerations. The business case for industrial sustainability, the tools necessary to decouple economic growth of our business sectors from resource use and environmental degradation, and the role of sustainable industries in the sustainable development agenda are explored.
PREREQUISITES: (ENVS 1100.03 and ENVS 1200.03) or MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)
CROSSLISTED: MGMT 3702.03
FORMATS: Lecture

ENVS 3801 Directed Readings in Environmental Science
CREDIT HOURS: 3
This course is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other courses offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 2001.03 or (ENVS 1100.03 and ENVS 1200.03) and third year student status.

ENVS 4001 Environmental Impact Assessment
CREDIT HOURS: 3
This courses provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The courss traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.
CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 1100.03 and ENVS 1200.03 or BIOL 2060.03 or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.
CROSSLISTED: BIOL 4001.03
FORMATS: Lecture | Tutorial

ENVS 4002 The Science of Wetland Ecosystems
CREDIT HOURS: 3
An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.
PREREQUISITES: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03
CROSSLISTED: BIOL 4002.03
FORMATS: Lecture

ENVS 4003 Coral Reefs and Environmental Change
CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the the protection of biodiversity.
PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level.
CROSSLISTED: MARI 4003
RESTRICTIONS: Restricted to exclude E1, E2, E3.

ENVS 4004 Pathways to Sustainable Energy
CREDIT HOURS: 3
Students gain a practical understanding of how to move towards a low-carbon energy future. Students learn about international, national, and subnational policies that drive adoption of renewable energy, energy efficiency, and carbon capture and storage technologies and how the technologies work. The technological barriers to their widespread adoption and how to overcome these barriers are also discussed.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or SUST 2006.06 and be a 4th year student, or have permission of instructor.
CROSSLISTED: SUST 4004.03
FORMATS: Lecture

ENVS 4100 Environmental Science Capstone
CREDIT HOURS: 3
Students apply the multidisciplinary knowledge they have acquired during their program of study to real world environmental issues. Students work individually and in groups in preparation towards a formal debate. They evaluate evidence from science, economics, philosophy and other ways of understanding the world to develop mastery and nuance among current environmental topics.
PREREQUISITES: (ECON 1101.03 or ECON 1102.03), PHIL 2480.03, STAT 2080.03, ENVS 2100.03, ENVS 3200.03, and ENVS 3501. Must be a fourth year student.
RESTRICTIONS: E1, E2, E3
FORMATS: Seminar | Discussion

ENVS 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: BIOL 4850.03, SCIE 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students.
FORMATS: Lecture

ENVS 4901 Honours Thesis Part A
CREDIT HOURS: 3
Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member.Required for Honours Environmental Science.
PREREQUISITES: Fourth year Environmental Science and permission of Instructor/Director
FORMATS: Lecture | Seminar

ENVS 4902 Honours Thesis Project Part B
CREDIT HOURS: 3
Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists.Required for Honours Environmental Science.
PREREQUISITES: ENVS 4901.03 with a grade of B+ or higher

ENVS 4950 Advanced Topics in Environmental Science
CREDIT HOURS: 3
This course will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the course will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.
PREREQUISITES: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.
FORMATS: Lecture | Seminar

ENVS 8891 Co-op Work Term I
CREDIT HOURS: 0
Co-op Work Term I. See Environmental Programmes for details.

ENVS 8892 Co-op Work Term II
CREDIT HOURS: 0
See Environmental Programmes for details.

ENVS 8893 Co-op Work Term III
CREDIT HOURS: 0
See Environmental Programmes for details.

ENVS 8894 Co-op Work Term IV
CREDIT HOURS: 0
See Environmental Programmes for details.

First Year Interest Groups (FIGs) for Science Students

a start for university success

What is a FIG and why sign up?
A First Year Interest Group, or FIG, is a group of students who meet weekly for an hour during the fall term of their first year at Dal. Groups are composed of about 15 students who have similar academic interests or goals, and who are enrolled in one or more of the same first year courses.

FIGs are designed to complement the classroom experience. It's a place to ***meet like-minded students***, and to discuss some of the big ideas emerging in your future field of study. Signing up for a FIG can help you get involved, meet people, and maybe even form lasting friendships. FIGs are free, informal, interactive groups that will help you make the most out of your first year at Dal.

What will you do in a FIG?

- Get to know like-minded students (maybe you'll find a study partner)
- Meet Dal faculty or professionals who work in your area of interest
- Find out how to get involved (volunteer opportunities, events, clubs)
- Learn about future opportunities for students with your interests (scholarships, summer research, co-op, study abroad)
- Talk!

Who should enrol in a FIG?
Any student in the Faculty of Science who has been accepted as an undeclared Science student and is in their first year of studies can enrol in a FIG.

How do I enrol in a FIG?
You enroll in a FIG when you registered for your regular courses, using the same registration procedure. First, make sure that the time slot of the FIG doesn't conflict with the lecture, lab or tutorial times of your other courses. Then register for the appropriate FIG section (FIGS 0001, 0002, etc.).

Does a FIG count toward my degree?
The FIG will appear on your academic transcript – it can be seen by future employers along with the credit courses you complete. However, because it is not for credit, a FIG does not count as part of the 90 or 120 credit hours you must complete for a BSc degree.

Will I receive a grade for my FIG?
If you complete the FIG, it will appear on your academic transcript with Pass noted beside it. Letter grades are not given for FIGs, and FIGs are not included in calculation of your GPA. However, to receive a Pass you must participate in the FIG sessions.

What if I don't like my FIG?
We expect that most students will enjoy their FIG, and will feel that the time has been well spent. After all, finding others with similar interests is a key part of an enjoyable and successful university experience. However, if for some reason you find that you do not want to participate in your FIG, you may withdraw. The FIG will then not appear on your transcript.

Can I sign up for more than one FIG?
No. We want to offer the opportunity to participate in a FiG to as many students as possible, and so students may not register in more than one FIG.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

FIGS 0001 Psychology: Behaviour and Mental Health
CREDIT HOURS: 0
Who should register: You are coming to Dal to learn more about human behaviour, the brain, and mental health. You probably want to learn about the underlying causes or triggers of mental illness. Or, you may want to explore the scientific evidence underlying the various treatments for psychological disorders such as depression, anxiety, or schizophrenia. Your long-term goal may be to work as a clinical psychologist, to obtain a medical degree in psychiatry, or to participate in clinical research on mental health issues. Or you may simply find these topics fascinating and want to learn more! In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore these interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Psychology, Neuroscience
CALENDAR NOTES: This FIG is for first year students enrolled in the Faculty of Science as Undeclared Science majors. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: PSYO 1011
RESTRICTIONS: Restricted to UNDS and Foundation Year (King's) students who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0002 Neuroscience: Studying the Brain
CREDIT HOURS: 0
Who should register: You are coming to Dal to learn about the brain, how it works and why that matters. You may be interested in finding out how the brain remembers, or you may want to explore how stress can influence brain function. Perhaps your career goal is to practice medicine with a focus on helping people after brain trauma. Or maybe your dream is to be part of the next big research breakthrough linking mental function and the physical brain. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore these interests and the options for shaping your academic pathways, with senior peers and with experts, all in a small group setting. Relevant Science programs: Neuroscience, Psychology
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: PSYO 1011.03 or BIOL 1010.03

RESTRICTIONS: Restricted to UNDS and BSc Foundation Year (King's) students with fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0003 Health and Medicine
CREDIT HOURS: 0
Who should register: You are coming to Dal to learn as much as you can about the human body in all its complexity. You may be most interested in human physiology, in understanding the links between the immune response and nutrition or physical activity, for example. Or you may want to focus on disease, learning about causes of leukemia in children, or the treatment of malaria in the tropics. Your career goals are likely related to relieving human suffering through a medical profession, as a practicing physician or perhaps through medical research. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore these interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Biology, Biochemistry, Chemistry, Microbiology, Neuroscience
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: BIOL 1010.03 or CHEM 1011.03
RESTRICTIONS: Restricted to UNDS students with fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0004 The Ocean
CREDIT HOURS: 0
Who should register: You are coming to Dal to learn more about the ocean. You may be interested in marine mammal conservation or in finding out how to run a sustainable fishery. Or you may be mostly curious about the organisms themselves – what exactly is a wolf fish and where does it live? Perhaps your goal is to understand the ocean as a whole – how large-scale ocean processes influence climate change, for example. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore these interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Marine Biology, Ocean Sciences
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: BIOL 1010 or CHEM 1011
RESTRICTIONS: Restricted to UNDS students with fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0005 Earth and Environment
CREDIT HOURS: 0
Who should register: You are coming to Dal with an interest in the natural world. You may want to focus your studies on how our world came to be as it is today – continental drift, mountain building, ice ages, river migration, paleobiology, or you may be most interested in how we as humans are changing that world – our impacts on climate, land, water and ecosystems. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore your interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Earth Sciences, Environmental Science, Biology, Chemistry, Economics, Marine Biology, Physics, Statistics, Sustainability
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors or as BSc students in the College of Sustainability. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: One Science course or SUST 1000
RESTRICTIONS: Restricted to UNDS or BSc (College of Sustainability) students with fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0007 Genes, Proteins and Technology
CREDIT HOURS: 0
Who should register: You are coming to Dal with a curiosity about genetics and the technologies of molecular biology: how do genes and proteins work and what can they tell us? You may want to study how genetic information can be used to diagnose and cure diseases and how new technologies are revolutionizing the field of medicine. You may be curious about how genomics are used in forensics or to trace the ancient routes of humans as they spread through the world. Or you may be most interested in how genetic signatures are used in the areas of ecology and behaviour, to assess paternity in chimpanzee societies, to discover sea turtle migration patterns and to measure biodiversity. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore your interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Biochemistry & Molecular Biology, Chemistry, Physics, Statistics Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: CHEM 1011 or BIOL 1010
RESTRICTIONS: Restricted to UNDS and Foundation Year (King's) students with fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0008 Patterns and Puzzles
CREDIT HOURS: 0
Who should register: You are coming to Dal to learn logical thinking and problem solving, and to apply these skills to problems in science, technology and everyday life. You may be curious about the math behind Rubik's cube and other puzzles, the mathematical laws of the universe, the role of prime numbers in online security, or how quantum computing depends on advanced algebra. You may want to learn the skills to predict financial markets, to discover patterns in large sets of data, or to understand the spread of epidemics. In this FIG, you and a few other first year students with similar interests will explore some of these interests and talk about future opportunities. But most of all, we will have fun with math! Relevant Science programs: Mathematics, Statistics, Economics, Physics, Actuarial Science
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: Any first or second year MATH course
RESTRICTIONS: Restricted to new students in the Faculty of Science and Faculty of Computer Science (less than 16 credit hours)
FORMATS: Seminar

FIGS 0009 Navigate Your Science Degree
CREDIT HOURS: 0
This is a not-for-credit course for first year Science students. The class meets seven times throughout the winter semester leading up to the March course registration date. We start by matching you with career goals based on your interests. Throughout the seven sessions you explore career options based on these interests, identify employable skills required for 21st century careers, and match these skills with academic courses, co-curricular experiences, work and volunteering opportunities.
RESTRICTIONS: E2, E3, E4

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans
Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)
Moore, C., BA (Hons), PhD (Cambridge)
Harvey, F., BA, MA, PhD (McGill)

Geography Coordinators
Architecture and Planning: **Manuel, P.,** BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)
Arts and Social Sciences: **TBD**
Science: **Ryan, A. M.,** BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) (amryan@dal.ca)

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems
- GEOG 2070.03/PLAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100X/Y.06/SOSA 2100.06: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Introduction to Development
- GEOG 2202.03/INTD 2002.03: Introduction to Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03: Climate Change
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Environment and Development
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3370.03/HIST 3370.03: North American Landscapes
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 4440.03/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450.03/ERTH 4450.03: Introduction to Landscape Simulation

- GEOG 4520.03/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Contact Geography for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

GEOG 1030 Introduction to Physical Geography
CREDIT HOURS: 3
This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.
CALENDAR NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.
CROSSLISTED: ERTH 1030.03
FORMATS: Lecture | Tutorial

GEOG 1035 Introduction to Human Geography
CREDIT HOURS: 3
Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
FORMATS: Lecture

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters
CREDIT HOURS: 3
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.
CROSSLISTED: ERTH 1060.03
FORMATS: Lecture

GEOG 2000 Cartography
CREDIT HOURS: 3
Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one's decisions.
PREREQUISITES: ERTH/GEOG 1030, or ERTH 1080
FORMATS: Lecture

GEOG 2001 Landscape Analysis
CREDIT HOURS: 3
Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.
PREREQUISITES: ERTH 1030.03
CROSSLISTED: PLAN 2001.03
FORMATS: Lecture | Lab

GEOG 2006 Space, Place and Geographic Information Systems
CREDIT HOURS: 3
Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. this course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public

realm.
PREREQUISITES: PLAN/GEOG 2001
CROSSLISTED: PLAN 2006.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 2070 Area Studies on Mexico and Central America
CREDIT HOURS: 3
Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.
PREREQUISITES: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2383.03. SPAN 2070.03
FORMATS: Lecture | Discussion

GEOG 2100 Environment and Culture
CREDIT HOURS: 6
Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.
CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06
CROSSLISTED: SOSA 2100.06
FORMATS: Lecture

GEOG 2201 Introduction to Development I
CREDIT HOURS: 3
Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term “development” and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.
PREREQUISITES: Completion of five full credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2001.03
FORMATS: Lecture | Tutorial

GEOG 2202 Introduction to Development II
CREDIT HOURS: 3
This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.
PREREQUISITES: Completion of five credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2002.03
FORMATS: Lecture | Tutorial

GEOG 2206 Africa: An Introduction
CREDIT HOURS: 3
This course will focus on contemporary Africa. Sterotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.
CROSSLISTED: INTD 2106.03
FORMATS: Lecture | Tutorial

GEOG 2336 Regional Development
CREDIT HOURS: 3
Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.
PREREQUISITES: ECON 1101.03 and 1102.03
CROSSLISTED: ECON 2336.03
FORMATS: Tutorial | Seminar

GEOG 2800 Climate Change
CREDIT HOURS: 3
Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El

Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.
CROSSLISTED: PHYC 2800.03 and OCEA 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 3001 Landscape Ecology
CREDIT HOURS: 3
Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.
PREREQUISITES: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor
CROSSLISTED: PLAN 3001.03
FORMATS: Lecture | Lab

GEOG 3002 Reading the City
CREDIT HOURS: 3
Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.
CROSSLISTED: PLAN 3002.03
FORMATS: Lecture | Lab

GEOG 3005 Cities and the Environment
CREDIT HOURS: 3
The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.
CROSSLISTED: PLAN 3005.03
FORMATS: Lecture | Seminar

GEOG 3006 Reading the Landscape
CREDIT HOURS: 3
Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.
PREREQUISITES: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03
CROSSLISTED: PLAN 3006.03
FORMATS: Lecture | Lab

GEOG 3110 Migration and Development
CREDIT HOURS: 3
The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study
CROSSLISTED: INTD 3110.03
FORMATS: Lecture | Seminar

GEOG 3114 Environment and Development
CREDIT HOURS: 3
This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.
CROSSLISTED: INTD 3114.03
FORMATS: Lecture | Seminar

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies
CREDIT HOURS: 3
This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. **Approved with International Development Studies.**
PREREQUISITES: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06
CROSSLISTED: SOSA 3165.03
EXCLUSIONS: SOSA 2370.03
FORMATS: Lecture

GEOG 3210 Canadian Cultural Landscapes
CREDIT HOURS: 3
This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.
CROSSLISTED: HIST 3210.03, CANA 3020.03
FORMATS: Lecture | Discussion

GEOG 3220 Coastal Communities in the North Atlantic
CREDIT HOURS: 3
Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.
PREREQUISITES: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
CROSSLISTED: SOSA 3220.03
FORMATS: Lecture

GEOG 3284 Living in Cities
CREDIT HOURS: 3
2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.
PREREQUISITES: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06
CROSSLISTED: SOSA 3284.03
FORMATS: Lecture | Seminar

GEOG 3302 Quaternary Sedimentary Environments
CREDIT HOURS: 3
The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.
PREREQUISITES: ERTH 2203.03
CROSSLISTED: ERTH 3302.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 3370 North American Landscapes
CREDIT HOURS: 3
Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.
CROSSLISTED: HIST 3370.03
FORMATS: Lecture | Discussion

GEOG 3400 Human Health and Sustainability
CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: ENVS 3400.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

GEOG 3440 Geomorphology
CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth’s surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080, ERTH 1090; or SCIE 1505, or SCIE 1515, or SCIE 1530, or permission of the instructor AND completion or concurrent enrollment of a 1000-level mathematics class, a 1000-level physics class, and a 1000-level chemistry class.
CROSSLISTED: ERTH 3440.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 3500 Exploring Geographic Information Systems
CREDIT HOURS: 3
Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.

PREREQUISITES: Two years of university study or equivalent or instructor's permission
CROSSLISTED: ERTH 3500, ERTH 5600, ENVS 3500
EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, ERTH 3500, ERTH 5600, ENVS 3500
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03
CROSSLISTED: ENVS 3633.03, BIOL 3633.03

GEOG 4520 GIS Applications to Environmental and Geological Sciences
CREDIT HOURS: 3
Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This class builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.
CALENDAR NOTES: This class is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03
CROSSLISTED: ERTH 4520.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 4530 Environmental Remote Sensing
CREDIT HOURS: 3
The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.
PREREQUISITES: ERTH 3500.03, ENVS 3500.03, or ERTH 5600.03 or SCIE 3600.03 or GEOG 3500.03
CROSSLISTED: ERTH 4530.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

GEOG 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: BIOL 4850.03, ENVS 4850,03, SCIE 4850.03, ERTH 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Humanistic Studies in Science

Attention is drawn to the following courses, offered in several departments. All of these courses are concerned with the humanistic aspects of scientific thought and its development. For complete course descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

History of the Sciences

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

Philosophy of the Sciences

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning

- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

Integrated Science Program

Location: Life Sciences Centre
1355 Oxford Street
Room 827
P.O. Box 15000

Telephone: (902) 494-2765

Fax: (902) 494-1123

Website: disp.science.dal.ca

Email: disp@dal.ca

Introduction
Dalhousie's Integrated Science Program is a unique and engaging way for a serious and well-prepared student to complete the first year of a BSc degree. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferrable skills, and conduct research, all in their first year. The goals of the program are:

1. To engage students in the process of scientific inquiry with hands-on experience in scientific research skills.
2. To provide a strong academic background for second-year courses in the subjects covered by the program.
3. To identify links among the science disciplines.
4. To learn effective team skills.
5. To explore the relevance of science for society at large.

The Integrated Science program exposes first year students to a broad range of science disciplines in an integrated manner, and provides a strong foundation for most BSc programs. Students learn from a team of instructors with expertise in particular subject areas, who also highlight the natural links among disciplines. Integrated Science students are members of a small cohort (maximum 80) who take the majority of their lectures, labs and field trips together.

The Integrated Science program has a strong emphasis on research-relevant training. Students study experimental design, collect and analyze data in the laboratory and during field trips, work on communication skills, including scientific writing, and are introduced to some of the ethical questions that arise in the practice of science. In the winter term, students undertake an independent research project under the supervision of a Dalhousie-affiliated researcher, which culminates in a presentation at a conference-style event.

Integrated Science consists of a core program taken only by IS students, and auxiliary courses taken together with other first year BSc students. The core program covers Biology, Psychology, Earth Sciences, Statistics, and Ethics in Science. Auxiliary courses include Chemistry, Math and Physics (optional). Exposure to multiple science disciplines can also be helpful for students who are unsure which subjects interest them most, and early training in research is especially valuable for those considering an Honours program. Integrated Science is also excellent preparation for professional graduate programs, such as Law or Medicine.

Integrated Science candidates should be highly-motivated, have a strong interest in science, and be willing to think across discipline boundaries. They should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to learn to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome the challenge to work hard, to think critically, and to solve problems.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Mathematics and 70% English, and a minimum of 75% in two of Grade 12 Chemistry, Biology or Physics. The average high school mark of incoming Integrated Science students is around 90%. Students must be accepted to the Integrated Science Program as well as be accepted to the BSc at Dalhousie University.

Choosing an Integrated Science Option

Integrated Science is a full-time, first-year program designed to prepare BSc students for second year courses in multiple science programs. The IS program emphasizes the connections among the different science disciplines, and provides students with research training and experience. Students take the core program as a cohort (max 80 students).

The core consists of two 9-credit-hour courses, Integrated Science I (SCIE 1506.09), and Integrated Science II (SCIE 1507.09), as well as Ethics in Science (PHIL 1050.03). In the fall, students have lectures, laboratories and field trips in Biology, Psychology and Statistics, and receive training in research skills (experimental design, analysis, scientific writing). The winter term consists of lectures and laboratories in Biology, Psychology and Earth Sciences, and students conduct a 10-week independent research project in a Dalhousie or Dalhousie-affiliated research lab. Students present the results of their research at a conference-style event.

Integrated Science I and II are equivalent to two terms of Biology and Psychology, and one term of Earth Sciences and Statistics. Together with PHIL 1050: Ethics in Science, the core fulfills the writing requirement for BSc students.

Students also register for several auxiliary or co-requisite courses; these are taken along with other BSc students, typically in larger classes. Students take a full year of Chemistry (CHEM 1011.03/CHEM 1012.03) and a half year of Calculus (MATH 1000.03 or MATH 1215.03). Students have the option to enroll in a second term of Calculus (MATH 1010.03) and to take Physics (full year or half year). See co-requisite details below:

Fall term* co-requisite courses taken at the same time as Integrated Science I (SCIE 1506.09)

Required:

1. Ethics in Science (PHIL 1050.03)
2. Concepts in Chemistry: Structure and Reactivity (CHEM 1011.03)
3. Differential and Integral Calculus I (MATH 1000.03) ***OR*** Life Sciences Calculus (MATH 1215.03)

Optional:

1. Introduction to Physics I (PHYC 1190.03) ***OR*** Physics in and Around You I (PHYC 1310.03)

Winter term co-requisite courses taken at the same time as Integrated Science II (SCIE 1507.09)**

Required:

1. Concepts in Chemistry: Energy and Equilibrium (CHEM 1012.03)

Optional:

1. Differential and Integral Calculus II (MATH 1010.03).
2. Introduction to Physics II (PHYC 1290.03) ***OR*** Physics in and Around You II (PHYC 1320.03)

**In the fall term Integrated Science students take a course overload with 18-21 credit hours (21 credit hours if Physics is included). 15 credit hours is a full course load for regular BSc students. Students enrolling in 21 credit hours can expect a significantly heavier work load. Students planning to take only one term of calculus have the option of taking MATH 1000.03 in the winter to lighten their fall course load.*

***In the winter term, Integrated Science students may take an overload (18 credit hours), a regular full course load (15 credit hours,) or a lighter course load of 12 credit hours (if they choose not to take MATH or PHYSICS in winter).*

Choice of Math and Physics courses

Prior to selecting Math or Physics courses please consult the course descriptions in the Dalhousie Academic Calendar.

- PHYC 1190/PHYC 1290 is designed for students in Physical Sciences and Engineering, and PHYC 1310/ PHYC 1320 is designed for students in Life Sciences.
- MATH 1000 should be taken by students interested in math, economics or the physical sciences, while MATH 1215 is designed for life sciences students.
- One calculus course (MATH 1000.03 or MATH 1215.03) together with SCIE 1506.09 (Statistics) satisfies the full math requirement for BSc students. Students who do not require MATH 1010 for their programs have the option to take only one calculus course.

BSc Programs	First year Math courses	First year Physics courses
Actuarial Science	MATH 1000/MATH 1010	
Biochemistry & Molecular Biology	MATH 1000 (or MATH 1215) MATH1010 (recommended)	
Biology	MATH 1215 (or MATH1000)	
Chemistry	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320
Economics	MATH 1000/MATH 1010	
Earth Science	MATH 1000 (or MATH 1215) and MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320 *
Environmental Science	MATH 1215 (or MATH 1000)	
Mathematics	MATH 1000/MATH 1010	
Marine Biology	MATH 1215 (or MATH 1000)	PHYC 1310/PHYC 1320** or PHYC 1190/PHYC 1290 (recommended)
Microbiology & Immun.	MATH 1215 (or MATH 1000)	
Medical Sciences	MATH 1215	PHYC 1310 (required), PHYC 1320 recommended
Neuroscience	MATH 1000 (or MATH 1215)	
Ocean Sciences	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320
Physics	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290
Psychology	MATH 1215 (or MATH 1000)	
Statistics	MATH 1000/MATH 1010	

***** *Physics is required for all Earth Science Honours programs. PHYC 1190/PHYC 1290 is recommended, as PHYC 1310/PHYC 1320 may not be recognized for PGeo (Professional Geologist) certification. Physics is not required for Earth Sciences Major programs.*

*** *Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2001/OCEA 2002: The Blue Planet) in their programs should take PHYC 1310/PHYC 1320 (or PHYC 1190/PHYC 1290).*

BSc degree requirements and the Integrated Science program
The Integrated Science program core satisfies the Writing requirement, the Social Science and Science subject requirements, and with MATH 1000 or MATH 1215, the Math requirement for BSc students at Dalhousie. It satisfies *half* of the Humanities/Language requirement; another Humanities or Language course is needed before graduation.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1506 Integrated Science I
CREDIT HOURS: 9
This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: PHIL 1050.03, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

SCIE 1507 Integrated Science II
CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

Marine Biology

Location: Life Sciences Centre

Introduction
The Marine Biology Program offers students the opportunity to study and experience marine life, from the tiny plankton that drive ocean ecosystems to the sharks and marine mammals at the top of the food chain. In the first two years of the program, Marine Biology students obtain a basic grounding in Biology and start to learn the basics of how the ocean works. They then use their third and fourth years to study in greater depth the diversity, physiology, ecology, and evolution of marine animals and plants. Many students combine their studies of marine biology with courses in the chemistry or physics of the ocean. Marine Biology students are offered a Co-op option, where three work terms in industry, government or university laboratories, or ecotourism are included within the program.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.

Our students have many opportunities to participate in marine-related research; examples can be viewed on our website. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences serve as supervisors for our Honours students.

An undergraduate major in Marine Biology at Dalhousie qualifies you for technical positions in places like government fisheries laboratories, aquaculture farms, and consulting firms. In the Marine Biology program's summer field courses or in the honours research courses, you'll get plenty of hands-on opportunities to explore the ocean—preparing you for the exciting challenges of diverse marine-related careers.

Degree Programs
The Department of Biology offers the following degree programs in Marine Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Marine Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Marine Biology undergraduate academic advisor.

Prospective Marine Biology students should be aware that to advance to the second year Biology courses in the Marine Biology program, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Undergraduate Program Co-ordinator
McAllister-Irwin, N. (irwinn@dal.ca) 902 494-3818

Program Advisors
For Marine Biology program advising, please email biology.advising@dal.ca and indicate whether you are interested in Majors or Honours advising.

BSc or BA (120 credit hour) Concentrated Honours in Marine Biology

Students who want a challenging program resulting in a broad background in Marine Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours with a grade of C or better above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology and Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of MARI 4901.03 AND MARI 4902.03.

A Science Co-op option is available for students enrolled in a BSc Concentrated Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology and Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level
Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other required courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000/4000 level
Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

Students must choose **15** credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae
- BIOL 3301/MARI 3301 Invertebrate Biology
- MARI 3602 Introduction to Aquaculture
- BIOL 3761/MARI 3761 Marine Ecology
- MARI 4350 Cutting Edge in Marine Science
- MARI 4665 Hacking the Blue Planet
- Any two MARI SEASIDE course
- Any two OCEA course cross-listed as MARI

In addition, students must complete an Honours Thesis:

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

In addition, students must complete at least another **12** credits hours in MARI or MARI-Equivalent courses to achieve the minimum of 54 credit hours in their honours subject above the 1000 level. This may include additional SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Combined Honours in Marine Biology and another subject

Students who wish to study Marine Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in Marine Biology/Biology, whether Marine Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology/Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Marine Biology, this requirement is satisfied through MARI 4901.03/MARI 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology/Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- If Marine Biology is to be the primary subject area, students must
    - Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
    - With the supervisor's input, draft and submit a thesis proposal to the Honours Committee preferably no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other recommended courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 levels

Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

If Marine Biology is the primary subject, students must choose an additional **9** credit hours from any of the following courses. If Marine Biology is the secondary subject, you must choose an additional **15** credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae

- BIOL 3301/MARI 3301 Invertebrate Biology
- MARI 3602 Introduction to Aquaculture
- BIOL 3761/MARI 3761 Marine Ecology
- MARI 4350 Cutting Edge in Marine Science
- MARI 4665 Hacking the Blue Planet
- Any two MARI SEASIDE courses
- Any two OCEA courses cross-listed as MARI

If Marine Biology is the primary subject, students will also complete

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

BSc or BA (120 credit hour) Major in Marine Biology

The 120 credit hour Major is suited to students who want to focus on Marine Biology, but wish to have a program that is more flexible than the Honours program. It provides a four-year survey of Marine Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Marine Biology or related disciplines. Marine Biology Majors complete a minimum of 42 credit hours in Marine Biology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Marine Biology. See Co-operative Education Program.

Course Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology
- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II

3000/4000 level

- A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of Marine Biology (MARI) or MARI-equivalent courses. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

The Double Major degree program allows students to combine a study of Marine Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Marine Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in Marine Biology/Biology courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in a Double Major with Marine Biology as the primary subject. See Co-operative Education Program.

Course Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- A minimum of **18** credit hours of Marine Biology (MARI) or MARI-equivalent courses at or above the 3000 level whether Marine Biology is the primary or secondary subject. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

Please note that a double major in Biology and Marine Biology is not offered.

Minor in Marine Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher

Contact Marine Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Marine Biology

Co-op Academic Advisor: Dr. N McAllister-Irwin (nancy.mcallister-irwin@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Marine Biology, or in Combined Honours or Double Major programs with Marine Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. For entry into Marine Biology Co-op, a minimum grade of B+ in BIOL 1010.03 is required. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students meet contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Marine Biology/Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Marine Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/marinebio/what_will_I_learn/coop_work_terms.html

Minors available to students in Marine Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Marine Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Marine Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc in Marine Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

MARI-Equivalent Courses

The following courses given by other departments may be taken as a Marine Biology course toward a BA, BSc and BSc (Honours) Marine Biology degrees.

Please note that MARI-equivalent courses will not count towards a minor program in Marine Biology.

Any course cross-listed as a MARI course	
Aquaculture (AQUA)	AQUA 2000, AQUA 3000, AQUA 4000, AQUA 4001
Biology (BIOA)	BIOA 3006
Nutrition (NUTR)	NUTR 3002
Research Methods/Project Seminars	RESM 4010, RESM 4011

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The normal entry requirement for upper level courses in Biology and Marine Biology is a grade of C+ or better in BOTH terms of first year Biology or in SCIE 15050.18. Students with extenuating circumstances may appeal to the departmental Undergraduate curriculum committee. Students should go to the Biology Main Office for further details.

Course Descriptions

MARI 3003 Introduction to Field Oceanography
CREDIT HOURS: 3
See course description for OCEA 3003.03 in the Oceanography section of the calendar.

MARI 3042 Molecular Ecology
CREDIT HOURS: 3
We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and

study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.
PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03
CROSSLISTED: BIOL 3042.03
EXCLUSIONS: BIOL 4042.03
FORMATS: Lecture

MARI 3063 Resource Ecology
CREDIT HOURS: 3
This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), MATH 1000.03 (or MATH 1215.03 or SCIE 15xx), STAT 1060.03 (or SCIE 15xx)
CROSSLISTED: BIOL 3063.03
FORMATS: Lecture | Tutorial

MARI 3074 Physiology of Marine Animals, Part I
CREDIT HOURS: 3
Animals in a marine environment are quite different from those found in air or fresh water, but the "physiological principles" are similar. This course deals with the same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories. Note: Students must complete MARI 3074.03 before MARI 3076.03
PREREQUISITES: BIOL 2003.03 and BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: BIOL 3078.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MARI 3076 Physiology of Marine Animals Part II
CREDIT HOURS: 3
Animals in a marine environment are quite different from those found in air or fresh water, but the "physiological principles" are similar. This course deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.
PREREQUISITES: MARI 3074.03 OR BIOL 3078.03
CROSSLISTED: BIOL 3079.03
RESTRICTIONS: BIOA 3005.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MARI 3080 The Ecology and Evolution of Fishes
CREDIT HOURS: 3
The course examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.
PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lecture

MARI 3090 Marine Mammalogy
CREDIT HOURS: 3
This course examines the characteristics of marine mammals, the roles of marine mammals in oceanic ecosystems and general principles of marine mammal population biology. Students use information on the biology of marine mammals to explore conservation/management issues. They learn of these animals and explore how they interact with humans.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
EXCLUSIONS: BIOL 4060.03, MARI 4060.03
FORMATS: Lecture

MARI 3101 Microbial Ecology
CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03) and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3101.03
FORMATS: Lecture

MARI 3221 Diversity of Algae
CREDIT HOURS: 3
This course is a taxonomic introduction to the major algal groups (marcophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see http://www.seaside.science.dal.ca
PREREQUISITES: BIOL 2004.03 or equivalent
CROSSLISTED: BIOL 3221.03
EXCLUSIONS: BIOL 3212.03, MARI 3212.03

MARI 3301 Invertebrate Biology
CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSLISTED: BIOL 3301.03
RESTRICTIONS: This course is restricted to MARI majors.
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MARI 3602 Introduction to Aquaculture
CREDIT HOURS: 3
This course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03
FORMATS: Lecture

MARI 3603 Practical Aquaculture
CREDIT HOURS: 3
This course provides students with aquaculture practical experience. Two field trips expose students to real life issues for aquaculturists. The laboratories help students acquire skills useful for experiments with aquatic animals (e.g., marking, measuring, anaesthesia, etc.). Students collect real data and learn to conduct exploratory graphical and statistical analyses.
COREQUISITES: MARI 3602.03
PREREQUISITES: STAT 1060.03 and BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03
FORMATS: Lab
LAB HOURS PER WEEK: 3

MARI 3604 Field Aquaculture
CREDIT HOURS: 3
Hands-on learning of aquaculture techniques through field trips to several aquaculture-related facilities (e.g. farms, hatcheries, research institutes, government offices) in the Maritimes and through laboratory exercises in water quality analysis, necropsies, fish processing, knots/rope handeling, and culturing of artemia, rotifers, microalgae and other species in the Aquatron's on-going research.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxillary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.
PREREQUISITES: BIOL 2003.03 or Instructor's approval. MARI 3602.03 is recommended.
RESTRICTIONS: Restricted from students with fewer than 60 credit hours.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 40

MARI 3623 Applied Coastal Ecology
CREDIT HOURS: 3
Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other coursework, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3623.03, ENVS 3623.03
FORMATS: Lecture | Lab

MARI 3626 Field Studies of Marine Mammals
CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BI0L 2060.03 (or BIOA 3001.03), and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and STAT 1060.03 (or equivalent)
CROSSLISTED: BIOL 3626.03
FORMATS: Lecture | Lab

MARI 3627 Biology and Conservation of Sharks, Skates and Rays
CREDIT HOURS: 3
This course offers a combination of lectures, labs, and field trips that explore the elementals of elasmobranches (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03
FORMATS: Lecture | Lab

MARI 3628 Marine Ornithology
CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSLISTED: BIOL 3628.03
FORMATS: Lecture | Lab

MARI 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOL 2003.03 or BIOA 3001.03 and STAT 1060.03 or their equivalents or permission of instructor. STAT 2080 is recommended.
CROSSLISTED: BIOL 3632.03, ENVS 3632.03
FORMATS: Lecture | Lab

MARI 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
CROSSLISTED: ENVS 3633.03, GEOG 3633.03, BIOL 3633.03
EXCLUSIONS: PLAN 2006.03, GEOG 2006.03
FORMATS: Lecture | Lab

MARI 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03 and (MATH 1060.03/STAT 1060.03 or SCIE 15xx)
CROSSLISTED: BIOL 3664.03, ENVS 3664.03
EXCLUSIONS: BIOL 3662.03, BIOL 3663.03
FORMATS: Lecture | Lab

MARI 3680 Scientific Diving Methods for Marine Ecology
CREDIT HOURS: 3
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.
CALENDAR NOTES: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 or SCIE 15xx, and an internationally recognized diving certification, and a diving physical. Recommended: BIOL 3221.03/MARI 3221.03, BIOL 3301.03
CROSSLISTED: BIOL 3680.03
FORMATS: Lecture | Lab

MARI 3682 Tropical Marine Biology
CREDIT HOURS: 3
This course provides a practical introduction to tropical marine biology, including a multi-day field trip to tropical marine ecosystems (reef, mangrove, seagrass). Identification of species, ecological interactions and tropical marine conservation will be discussed. Evaluation includes, but is not limited to, lecture and field tests, presentations, field observations and reports.
CALENDAR NOTES: Field work involves snorkeling; students must be comfortable swimming for extended periods in open water. Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 or equivalent courses; or Instructor's permission. An introductory course in statistics and familiarity with spreadsheets (e.g. Excel) will be useful.
FORMATS: Lecture | Lab

MARI 3685 The Gulf of Eilat Ecosystem: Coral Reef and Subtropical Sea
CREDIT HOURS: 3
Introductin to physical, chemical, and biological ocenography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.
CALENDAR NOTES: This is a field course given at the Eilat Ocean Studies Centre in Isreal. Entry is restricted and requires submissionof an application form
PREREQUISITES: OCEA 2000, STAT 1060 or permissin of instructor
CROSSLISTED: OCEA 3685.03
FORMATS: Lecture | Lab

MARI 3761 Marine Ecology
CREDIT HOURS: 3
Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)
CROSSLISTED: BIOL 3761.03
RESTRICTIONS: This course is restricted to 3rd and 4th year students.
FORMATS: Lecture | Lab

MARI 3800 Experiential Learning
CREDIT HOURS: 3
Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.
CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.
PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology or Marine Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of the course coordinator.
CROSSLISTED: BIOL 3800.03
EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

MARI 4003 Coral Reefs and Environmental Change
CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This course introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 and BIOL 2060.03 and 6 credit hours in ENVS or BIOL or MARI at or above the 3000 level.
CROSSLISTED: ENVS 4003
RESTRICTIONS: This course is restricted to fourth year students.

MARI 4080 Laboratory Studies of Fishes
CREDIT HOURS: 3
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.
PREREQUISITES: BIOL 3080.03 or MARI 3080.03
CROSSLISTED: BIOL 4080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lab
LAB HOURS PER WEEK: 3

MARI 4090 Evolutionary ecology of marine mammals
CREDIT HOURS: 3
Mammals evolved on land and then made their way into the ocean. The course considers how marine mammals adapted to this major change in habitat, so that they are now highly successful participants in the marine ecosystem. Students examine adaptations ranging from the cellular to social structure.
PREREQUISITES: One of MARI 3090.03, BIOL 3626.03, MARI 3626.03, BIOL 4060.03, MARI 4060.03 or permission of Instructor
EXCLUSIONS: BIOL 5651
FORMATS: Lecture

MARI 4323 Biologging in Ecology
CREDIT HOURS: 3
This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: BIOL 4323.03
FORMATS: Lecture | Lab

MARI 4335 Environmental Impacts in Marine Ecosystems
CREDIT HOURS: 3
See course description for OCEA 4335.03, in the Oceanography section of this calendar.

MARI 4350 Cutting Edge in Marine Science
CREDIT HOURS: 3
This course focuses on current, often hotly debated topics in marine science. We discuss recently published papers and current research initiatives on urgent issues, including biodiversity, fisheries, conservation, management, climate change, and human-ocean interactions. Class format includes lectures, case-studies, as well as active discussion, debates, group work and hands-on assignments.
PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and one of any of the following; BIOL 3065.03, MARI 3063.03, BIOL 3067.03, MARI 3067.03, MARI 3080.03, BIOL 3600.03, MARI 3600.03, MARI 3602.03 or MARI 3761.03.
CROSSLISTED: MARI 5350.03
FORMATS: Lecture | Tutorial

MARI 4369 Fisheries Oceanography
CREDIT HOURS: 3
See course description for OCEA 4160.03, in the Oceanography section of this calendar.

MARI 4370 Deep Sea Biology
CREDIT HOURS: 3
See course description for OCEA 4370.03, in the Oceanography section of this calendar.

MARI 4600 Ecosystem Modelling for Aquaculture
CREDIT HOURS: 3
Learn a collection of tools for the sustainable utilization of aquatic resources. Emphasis is on bilateral interactions between aquaculture and the environment. Topics include water/sediment/biota variability, carrying capacity, invasive species, habitat destruction/creation, ecosystem functions/services, climate changes, etc. Tools include data analysis/modelling/visualization/mapping using Python™ (prior programming experience is not required).
PREREQUISITES: MARI 3602.03 or Instructor's approval
RESTRICTIONS: Restricted from students with fewer than 60 credit hours
FORMATS: Lecture

MARI 4661 Biological Oceanography
CREDIT HOURS: 3
See course description for OCEA 4140.03, in the Oceanography section of this calendar.

MARI 4662 Biology of Phytoplankton
CREDIT HOURS: 3
See OCEA 4230.03 in the Oceanography section of the calendar.

MARI 4664 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03
FORMATS: Lecture

MARI 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization
CREDIT HOURS: 3
This course explores the biology, ecology, biogeochemistry and ethical and legal dimensions of purposeful ocean fertilization. Through lectures, discussion, case studies, and group projects, students consider the biological and oceanographic basis of ocean fertilization and its use as a 1) scientific tool and 2) controversial geoengineering strategy for climate change mitigation.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: OCEA 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

MARI 4666 Benthic Ecology
CREDIT HOURS: 3
See course description for OCEA 4330.03, in the Oceanography section of this calendar.

MARI 4806 Independent Research I
CREDIT HOURS: 3
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4807 Independent Research II
CREDIT HOURS: 3
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the class coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4809 Independent Research III
CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4901 Honours Research and Thesis I
CREDIT HOURS: 3
This course is required for, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (4901 and 4902) are normally taken in the students' final year. See Marine Biology and Biology Honours webpage for more details (https://www.dal.ca/faculty/science/biology/honours.html).
CALENDAR NOTES: MARI 4901 and MARI 4902 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
PREREQUISITES: Permission of Honours Coordinator
CROSSLISTED: BIOL 4901.03
RESTRICTIONS: RESTRICTIONS: Students in the Marine Biology Honours Programme
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06
FORMATS: Other (explain in comments)

MARI 4902 Honours Research and Thesis II
CREDIT HOURS: 3
This course is required of, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (4901 and 4902) are normally taken in the students' final year.
CALENDAR NOTES: MARI 4901 and MARI 4902 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated. See Biology Honours homepage for more details (https://www.dal.ca/faculty/science/biology/honours.html). https://www.dal.ca/faculty/science/biology/honours.html
PREREQUISITES: Permission of Honours Coordinator
CROSSLISTED: BIOL 4902
RESTRICTIONS: Students in the Marine Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06
FORMATS: Other (explain in comments)

MARI 8891 Co-op Workterm I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03

MARI 8892 Co-op Workterm 2
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, MARI 8891.00

MARI 8893 Co-op Workterm 3
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, MARI 8892.00

MARI 8894 Co-op Workterm 4
CREDIT HOURS: 0
PREREQUISITES: MARI 8893.00 and SCIE 2800.03

Introduction
The Mathematics division offers a full range of programs aimed at students of diverse interests and levels. This includes honours, major, minor and joint degree programs. We work closely with students to choose a program that is the right fit for their interests and goals. Mathematics is a creative activity with its own intrinsic value and beauty. Mathematics also provides a solid foundation for every scientific field. A degree in mathematics can prepare students for a career in academia, industry, management, information technology, banking, teaching, and other areas.

General Interest Courses
We offer a number of courses for students not majoring in Mathematics:

- MATH 1000.03/MATH 1010.03: These core calculus courses are the starting point for any degree program in the sciences.
- MATH 1030.03 This course along with 2040.03 serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- MATH 1060.03: This course serves as an introduction to the basic ideas of statistics, through examples drawn from a wide variety of disciplines.
- MATH 1115.03: Linear algebra and calculus are arranged to meet the needs of commerce students, but of interest to anyone wishing a brief introduction to these topics.
- MATH 1215.03: This course emphasizes the application of calculus to the life sciences.
- MATH 2112.03: Whereas calculus deals with continuous phenomena, this course deals with discrete objects, especially varieties of ways to count.
  MATH 2040.03: This course along with 1030.03 serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- MATH 2300.03: Topics from science and technology are used to motivate and illustrate basic mathematical tools of linear algebra and calculus. Mathematical software such as Matlab and Maple is also introduced.

Six credit hours of Mathematics or Statistics are required for a BSc degree. The following courses may not be used to satisfy this requirement: MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1115.03.

Degree Programs
The Department of Mathematics and Statistics offers the following degree programs in Mathematics

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Mathematics
- Minor in Mathematics (added to a 120 credit hour degree)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A BSc degree is the choice of most students in Mathematics; however, a BA degree option is also available for each of the programs listed below. The Departmental requirements for each BA degree program are the same as those of the corresponding BSc degree program; however, students are advised that some of the general College of Arts and Science requirements differ for the BA and BSc degrees. Minors and certificates that can be combined with a BSc degree can also be combined with a BA degree.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Mathematics undergraduate academic advisor. Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Students in any Mathematics program are strongly encouraged to include CSCI 1100.03 and CSCI 1101.03 in their programs.

BSc (120 credit hour) Concentrated Honours in Mathematics

An Honours degree offers an in-depth preparation in undergraduate mathematics, including an independent research experience. This degree option is recommended for students interested in eventually pursuing graduate studies in mathematics. Honours students complete a minimum of 54 credit hours above the 1000 level in Mathematics with a minimum GPA of 3.0 and write an Honours Comprehensive Examination.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Mathematics should consult with a Mathematics Honours Advisor early in their studies to have their programs approved.

Departmental requirements
The Department offers two Honours streams in Mathematics: (A) Pure Mathematics and (B) Applied Mathematics. Stream A emphasizes the power and beauty of mathematics as an independent academic discipline. Stream B emphasizes the connections between mathematics and other scientific disciplines. Both streams follow the same courses for the first two years. Students decide which stream to pursue during their second year.

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Mathematics must complete the following courses:

1000 level

- Math 1030.03: Matrix Theory and Linear Algebra 1

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
  Math 2135.03: Linear Algebra and Math 2505.03: Introductory Analysis
- Fifteen additional credit hours in mathematics at or above the 2000 level - not including courses listed below

3000 level

- MATH 3031.03: Abstract Algebra I and MATH 3501.03: Intermediate Analysis I
- Students in Stream A are required to take MATH 3032.03: Abstract Algebra II and MATH 3502.03: Intermediate Analysis II
- Students in Stream B are required to take MATH 3080.03: Introduction to Complex Variables and MATH 3260.03: Applied Differential Equations

4000 level

- MATH 4950.03: Honours Research Project
- Twelve additional credit hours at or above the 4000 level

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

Students in Stream A are advised to include a selection of courses from the following list in their programs:

- MATH 2051.03: Problems in Geometry
- MATH 2113.03: Discrete Structures II
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3260.03: Applied Differential Equations
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability

Students in Stream B are advised to include a selection of courses from the following list in their programs:

- MATH 2060.03: Introduction to Probability and Statistics
- MATH 2300.03: Mathematical Modelling
- MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- PHYC 3050.03: Introduction to Numerical Programming
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability
- MATH 3400.03: Classical Game Theory
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

Honours Comprehensive Examination

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper is done as part of the required course MATH 4950.03: Honours Research Project.

BSc (120 credit hour) Combined Honours in Mathematics and another subject

Students who wish to study Mathematics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students contemplating a Combined Honours program in Mathematics and another subject should bear in mind, however, that the work in either subject may be insufficient for admission to a regular graduate program.

Students planning to enrol in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Mathematics, this requirement is satisfied through MATH 4950.03.

Departmental Requirements

Students in a BSc Combined Honours program in Mathematics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A combined total of 66 credit hours above the 1000 level must be completed in two subjects, with a minimum of 30 credit hours above the 1000 level in each subject. In addition, students must complete a minimum of 18 credit hours at the 3000 level or above in each of the primary and secondary subjects.

Mathematics as the primary subject
The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject. Students will normally complete MATH 4950.03 Honours Research Project.

Mathematics as the secondary subject
The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject.

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc (120 credit hour) Major in Mathematics

The 120 credit hour Major is suited to students who want to focus on Mathematics, but wish to have a program that is somewhat less constrained than the Honours program. Students in a Major program normally choose to concentrate in Pure Mathematics, Applied Mathematics or Mathematics Education.

Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Major program in Mathematics must complete the following courses:

1000 level

- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least one of MATH 2112.03: Discrete Structures I, MATH 2051.03: Problems in Geometry or MATH 2505.03: Introductory Analysis
- Six additional credit hours in MATH at or above 2000 level
- Three credit hours in a STAT course at or above 2000 level

3000 level

- 24 additional credit hours in MATH at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Students wishing to concentrate in Applied Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Students wishing to concentrate in Pure Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables

Students contemplating a career in Mathematics Education should choose the additional MATH courses from

- MATH 2051.03: Problems in Geometry
- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2112.03: Discrete Structures I/MATH 2113.03: Discrete Structures II

- MATH 2300.03: Mathematical Modelling
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3140.03: Introduction to Wavelets
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc or BA (120 credit hour) Double Major in Mathematics and another subject

The Double Major degree program allows students to combine the study of Mathematics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program are advised to review their proposed program of study with advisors in both subject areas.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Mathematics and another subject must complete the following:

Mathematics as the primary subject
Student completing a double major with Mathematics as the primary subject can fulfill the Mathematics requirements by following one of two programs below.

Pure Mathematics

2000 level

- MATH 2001.03: Intermediate Calculus I and MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least two of MATH 2112.03: Discrete Structures I, MATH 2051.03: Problems in Geometry, MATH 2505.03: Introductory Analysis

3000 level

- 18 additional MATH credit hours at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Applied Mathematics

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- MATH 2120.03: Methods for Ordinary Differential Equations and MATH 2002.03: Intermediate Calculus II
- MATH 2060.03: Introduction to Probability and Statistics or MATH 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 level

- MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations
- At least 15 credit hours selected from MATH 3080.03: Introduction to Complex Variables, MATH 3210.03: Statistical Mechanics, MATH 3300.03: Optimization, MATH 3330.03: Applied Graph Theory, MATH 3400.03: Classical Game Theory, MATH 3900.03: Financial Mathematics, MATH 4190.03: Ordinary Differential Equations, MATH 4220.03: Introduction to Partial Differential Equations, MATH 4230.03: Partial Differential Equations, MATH 4250.03: Asymptotic Analysis, MATH 4320.03: Combinatorial Optimization, MATH 4370.03: Combinatorics: Techniques and Structures, MATH 4540.03: Applied Analysis

Mathematics as the secondary subject
A student enrolled in a Double Major with Mathematics as the secondary subject also fulfills the Mathematics requirements by following one of the programs listed above for a Double Major with Mathematics as the primary subject.

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03.

BSc (90 credit hour) Minor in Mathematics

The 90 credit hour Minor in Mathematics is appropriate for students who want to study some Mathematics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Mathematics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Mathematics is usually the preferred option for students who wish to combine studies in Mathematics with a degree in Engineering (see BSc/BEng Concurrent Program).

See the Minor in Mathematics section of this Calendar.

Minor in Mathematics
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1500.06X/Y: Calculus
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential equations
- twelve additional credit hours of Math at or above the 2000 level
- This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

NOTE: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

Contact Mathematics and Statistics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Mathematics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Mathematics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Mathematics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc in Mathematics include:

- Certificate in Actuarial and Financial Mathematics
- Certificate in Applied and Computational Mathematics

BSc/BEng Concurrent Program
BEng/BSc (90 credit hour) concurrent degree (Mathematics)

This degree combines an engineering degree with a deeper knowledge of mathematics, and provides a strong foundation for students interested in areas such as robotics, telecommunications, systems analysis and modelling. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Mathematics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Mathematics and Statistics. A concurrent BEng/BSc Honours Mathematics program can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 *Chemistry I* MATH 1280 *Engineering Math I* ENGI 1103 *Engineering Design I* PHYC 1190 *Physic I* ENGM 1081 *Computer Programming* CPST 1103 *Technical Communications I*	CHEM 1022 *Chemistry II* MATH 1290 *Engineering Math II* ENGI 1203 *Engineering Mechanics I: Statics* PHYC 1290 *Physics II* ENGM 1041 *Applied Linear Algebra* CPST 1203 *Technical Communications II*
Apply for admission into concurrent BEng/BSc		
Year 2 [a]	ENGM 2101 *Applied Vector Calculus* ENGM 2032 *Applied Probability & Statistics* [b] Writing course (Humanities) **Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)** **One social science course [c]**	ENGM 2022 *Applied Differential Equations* HSTC 1801 *History of Engineering II* [d] One Engineering elective **Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)** **One social science or humanities course [c]**
Year 3 [a]	IENG 2005 *Engineering economics* ECED 2000 *Electric circuits* ENGI 2102 *Thermo-Fluid Engineering I* **One 3000 level (or higher) MATH [e] course (may not be MATH 2001 or MATH 2120)** **One Science/FASS course (may be MATH)**	ENGI 2203 *Engineering design II* [c] Two Engineering electives **One 3000 level (or higher) MATH [e] course (may not be MATH 2001 or MATH 2120)** **One Science/FASS course (may be MATH)**
Graduate with Diploma in Engineering and BSc 90 credit degree		
Year 4	Continue in BEng program	
Year 5	Complete BEng program	

[a] To meet the BSc 90 credit hour Minor in Mathematics requirements, students complete 30 credit hours in addition to their Engineering requirements: 12 credit hours of MATH courses at or above the 2000 level, as specified above, 6 MATH credit hours at or above the 3000 level, 6 credit hours of social science/humanities courses, and 6 credit hours in Science/FASS courses (which may be MATH)

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] See Engineering section of the calendar for details

[e] Upper level courses that may be of particular interest to Engineering students include MATH 4220, MATH 4230 and MATH 4165

Notes:

- For a BEng/BSc with Minor in Math, students will not receive credit for MATH 1030, MATH 2001 or MATH 2120
- Completion of ENGM 2101, ENGM 2022 and ENGM 2032 fulfill the Math Minor requirements for MATH 2001 and MATH 2120
- ENGM 1041 fulfills the MATH 1030 requirement for the Math minor

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes
Course descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Courses with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

The following three courses below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see College of Continuing Education for more details).

Course Descriptions

MATH 0009 Academic Math
CREDIT HOURS: 0
Academic Math has been developed to prepare you for the math involved in non-calculus courses. If you have solid math skills (at least grade 11 academic level) and want to develop them to the university level necesary for entrance to the Faculty of Arts, Bachelor of Commerce, Management, or Nursing programs, this course is designed for you. MATH 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.
PREREQUISITES: At least grade 10 academic math or equivalent
FORMATS: Lecture | Tutorial

MATH 0010 Pre-Calculus Accelerated
CREDIT HOURS: 0
This single-term accelerted course has been designed for calculus bound students, who have a firm grasp of grade 11 and 12 math skills. Focus is placed on pre-calculus key concepts, assuming students have current knowledge of grade 11 and 12 math concepts. Students requiring review of grade 11 and 12 concepts should take Pre-Calculus Plus (MATH 0011.00). Topics are explored in class following a clear, logical progression, with mastery generally occurring after assignments are completed.
PREREQUISITES: Recommend at least 80% in grade 11 and 12 math
FORMATS: Lecture | Tutorial
LAB HOURS PER WEEK: 1

MATH 0011 Pre-calculus Plus
CREDIT HOURS: 0
This full year course has been designed for the majority of students either requiring pre-calculus to gain admittance to the Dalhousie BSc program or as preparation for MATH 1000.03. This course provides a more in depth coverage of math concepts than found in the accelerated 1 term class, and adds a review of relevant 11 and 12 material, as well as a study of area under a curve. Students who have been away from math for 2 or more years, or have a heavy schedule, will find this course a better fit than the accelerated MATH 0010.00. Throughout the course, algebra, and applied geometric problem solving skills needed for calculus, are emphasized.
PREREQUISITES: Grade 11 and 12 math or equivalent
FORMATS: Lecture | Tutorial

MATH 1000 Differential and Integral Calculus I
CREDIT HOURS: 3
This course offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this course is MATH 1010.03.
PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1215.03, MATH 1280.03, MATH 1500X/Y.06
FORMATS: Lecture

MATH 1010 Differential and Integral Calculus II
CREDIT HOURS: 3
A continuation of the study of calculus with topics including: Riemann sums, techniques of integration, elementary differential equations and applications, parametric equations and polar coordinates, sequences and series, Taylor series.
PREREQUISITES: MATH 1000.03, or MATH 1215.03 with a grade of B or better
FORMATS: Lecture | Tutorial

MATH 1030 Matrix Theory and Linear Algebra 1
CREDIT HOURS: 3
This course is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include : subspaces, linear transformations, determinants, eigenvalues and eigenvectors, systems of linear equations.
PREREQUISITES: Nova Scotia Advanced Mathematics 11 or 12 (or equivalent)
EXCLUSIONS: Math 2030.03
FORMATS: Lecture

MATH 1060 Introductory Statistics for Science and Health Sciences
CREDIT HOURS: 3
See course description for STAT 1060.03 in the Statistics section of this calendar.

MATH 1115 Mathematics for Commerce
CREDIT HOURS: 3
An introduction to matrices, linear programming, mathematics of finance, probability and differential calculus. All topics are taught with an emphasis on applications to business. This course cannot be used to partially satisfy the BSc Mathematics requirement.
PREREQUISITES: Nova Scotia Advanced Mathematics 11 or 12 or equivalent
EXCLUSIONS: MATH 1110.03, MATH 1120.03 Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, Math 1280.03 or MATH 1215.03.
FORMATS: Lecture

MATH 1215 Life Sciences Calculus
CREDIT HOURS: 3
This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.
CALENDAR NOTES: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.
PREREQUISITES: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.
EXCLUSIONS: MATH 1000.03, MATH 1280.03, MATH 1500.06
FORMATS: Lecture | Tutorial

MATH 1280 Engineering Mathematics I
CREDIT HOURS: 3
This forms an introduction to differential and integral calculus for Engineering students. All topics of MATH 1000.03 are covered, but in greater depth. In addition, this course covers functions, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, Taylor series, antiderivatives and definite integrals, Riemann sums, polynomial approximations, and numerical approximations of integrals.
CALENDAR NOTES: Students who have already received credit for MATH 1280.03 cannot subsequently receive credit for MATH 1000.03 or MATH 1115.03
PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1000.03, MATH 1215.03
FORMATS: Lecture | Tutorial

MATH 1290 Engineering Mathematics II
CREDIT HOURS: 3
This course is a sequel to MATH 1280. All topics of MATH 1010.03 are covered, but in greater depth. This course also introduces the students to the application of mathematics in engineering problems.
CALENDAR NOTES: 1: Students who have already received credit for MATH 1290.03 cannot subsequently receive credit for MATH 1010.03 2: MATH 1010.03 is not equivalent to MATH 1290.03
PREREQUISITES: MATH 1280.03
FORMATS: Lecture | Tutorial

MATH 2001 Intermediate Calculus I
CREDIT HOURS: 3
Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector functions, derivatives and integrals of vector functions, arc length and curvature, functions of several variables and partial derivatives, directional derivatives and double and triple integrals.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2002 Intermediate Calculus II
CREDIT HOURS: 3
Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture

MATH 2040 Matrix Theory and Linear Algebra II
CREDIT HOURS: 3
This course is a continuation of MATH 2030.03. Topics include: vector spaces and linear transformations, eigenvalues and eigenvectors, similarity and diagonalization, inner product spaces and orthogonal transformations, diagonalization of symmetric matrices and quadratic forms.
PREREQUISITES: MATH 1030.03 or 2030.03, and MATH 1000.03 or MATH 1215.03
EXCLUSIONS: MATH 2135.03
FORMATS: Lecture

MATH 2051 Problems in Geometry
CREDIT HOURS: 3
This is a basic course for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2052 Introduction to Numerical Programming
CREDIT HOURS: 3
See PHYC 2050
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent , or Math 1010.03 or equivalent
CROSSLISTED: PHYC 2050.03
EXCLUSIONS: Math 2400.03
FORMATS: Lecture

MATH 2060 Introduction to Probability and Statistics
CREDIT HOURS: 3
See course description for STAT 2060.03 in the Statistics section of this calendar.
PREREQUISITES: Math 1000 or Math 1215 or Math 1500 or 1500X/Y

MATH 2080 Statistical Methods For Data Analysis and Inference
CREDIT HOURS: 3
See course description for STAT 2080.03 in the Statistics section of this calendar.

MATH 2112 Discrete Structures I
CREDIT HOURS: 3
This course together with MATH 2113.03 offers a survey of the following areas: set theory, mathematical induction, number theory, relations, functions, algebraic structures and introductory graph theory. The topics to be discussed are fundamental to most areas of Mathematics and have wide applicability to Computer Science.
PREREQUISITES: Nova Scotia Mathematics 441 or equivalent
CROSSLISTED: CSCI 2112.03
FORMATS: Lecture

MATH 2113 Discrete Structures II
CREDIT HOURS: 3
This course continues CSCI 2112.03/MATH 2112.03. This course covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, Chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, Boolean algebra.
PREREQUISITES: CSCI 2112.03 or MATH 2112.03
CROSSLISTED: CSCI 2113.03
FORMATS: Lecture

MATH 2120 Methods for Ordinary Differential Equations
CREDIT HOURS: 3
A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1010.03 or permission of the instructor

MATH 2135 Linear Algebra
CREDIT HOURS: 3
This course is a continuation of MATH 1030.03 or 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations. Additional topics include inner product spaces, symmetric and orthogonal transformations, bilinear forms, similarity and diagonalization, the solution of linear differential equations, and various applications in mathematics, physics and computer science.
PREREQUISITES: MATH 1030.03 (or MATH 2030.03) and MATH 1000.03
EXCLUSIONS: MATH 2040.03
FORMATS: Lecture

MATH 2300 Mathematical Modelling
CREDIT HOURS: 3
By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the course is learning to use MAPLE as a mathematical tool.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1000.03
CROSSLISTED: STAT 2300.03
FORMATS: Lecture

MATH 2505 Introductory Analysis
CREDIT HOURS: 3
This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of

Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture

MATH 2600 Theory of Interest and Life Contingencies
CREDIT HOURS: 3
Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.
PREREQUISITES: MATH 1010.03, MATH 1115.03 or MATH 1215.03
CROSSLISTED: STAT 2600.03
FORMATS: Lecture

MATH 3030 Abstract Algebra
CREDIT HOURS: 6
In this first course in abstract algebra the following topics are treated: groups, subgroups, factor groups, homomorphisms, rings, ideals, Euclidean domains, polynomial rings, fields, unique factorization, irreducible polynomials, Sylow theorems, solvability of polynomial equations, Galois theory, and the Jordan canonical form.
CALENDAR NOTES: MATH 3030X/Y.06 is equivalent as a credit to MATH 3031.03 and MATH 3032.03
PREREQUISITES: MATH 2040.03 or MATH 2135.03
EXCLUSIONS: MATH 3031.03, MATH 3032.03
FORMATS: Lecture

MATH 3031 Abstract Algebra I
CREDIT HOURS: 3
Groups, subgroups, permutation groups, cosets, direct products, fundamental theorem of finitely generated abelian groups, simple groups, group homomorphisms, factor groups, isomorphism theorems of groups, series of groups, Sylow theorems and applications. Additional topics may include free groups, group actions, and groups in Topology.
PREREQUISITES: MATH 2040.03 or MATH 2135.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3032 Abstract Algebra II
CREDIT HOURS: 3
Rings, fields, integral domains, Fermat's theorem, Euler's theorem, ideals, quotient rings, prime and maximal ideals, factorization of polynomials, Grobner bases, Unique Factorization Domains, Euclidean Domains and Gaussian integers, and applications as time allows.
PREREQUISITES: MATH 3031.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3045 Curves and Surfaces
CREDIT HOURS: 3
The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.
PREREQUISITES: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor
FORMATS: Lecture

MATH 3070 Theory of Numbers
CREDIT HOURS: 3
Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.
PREREQUISITES: MATH 2040.03 (or MATH 2135.03)
FORMATS: Lecture

MATH 3080 Introduction to Complex Variables
CREDIT HOURS: 3
An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.
PREREQUISITES: MATH 2002.03
FORMATS: Lecture

MATH 3120 Differential Equations
CREDIT HOURS: 3
The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.
PREREQUISITES: MATH 2120.03 or MATH 2135.03 or PHYC 2140.03
FORMATS: Lecture

MATH 3140 Introduction to Wavelets
CREDIT HOURS: 3
Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals. This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.

PREREQUISITES: MATH 2002.03, and MATH 1030.03 (or MATH 2030.03)
FORMATS: Lecture

MATH 3210 Introduction to Numerical Analysis
CREDIT HOURS: 3
This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.
PREREQUISITES: MATH 2001.03 or (MATH 2120.03 and one of MATH 1030.03 or MATH 2030.03)

MATH 3260 Applied Differential Equations
CREDIT HOURS: 3
This course provides an introduction to a variety of mathematical techniques that are used in modelling real-world problems. Topics may include: population dynamics and hysteresis; diffusion, the heat kernel and Fourier series; spread of disease and phase plane analysis; networks, image processing and spectral clustering; delay differential equations; traffic modelling, first order PDE's and method of characteristics; and numerical schemes for differential equations.
PREREQUISITES: MATH 2120.03.03 or MATH 2135.03 or PHYC 2140.03 or consent of the instructor

MATH 3300 Optimization
CREDIT HOURS: 3
An introduction to the concepts and applications of linear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis. Some of these topics are illustrated by means of interactive computer packages.
PREREQUISITES: MATH 1030.03 or 2030.03
FORMATS: Lecture

MATH 3330 Applied Graph Theory
CREDIT HOURS: 3
This course offers an introduction to graph theory, with an emphasis on applications and modelling. Topics include: paths and cycles, shortest route problem, connectivity and trees, minimum spanning trees, network flow, planar graphs, matchings, assignment problem, graph colouring and applications to scheduling, Hamilton cycles, and the Travelling Salesman Problem.
PREREQUISITES: MATH 2112.03 or MATH 1030.03 or 2030.03

MATH 3340 Regression and Analysis of Variance
CREDIT HOURS: 3
See course description for STAT 3340.03 in the Statistics section of this calendar.

MATH 3350 Design of Experiments
CREDIT HOURS: 3
See course description for STAT 3350.03 in the Statistics section of this calendar.

MATH 3360 Probability
CREDIT HOURS: 3
See course description for STAT 3360.03 in the Statistics section of this calendar.

MATH 3380 Sample Survey Methods
CREDIT HOURS: 3
See course description for STAT 3380.03 in the Statistics section of this calendar.

MATH 3400 Classical Game Theory
CREDIT HOURS: 3
This course will cover the important concepts of classical game theory: game trees, dominance, zero-sum games, saddle points, utility theory, non-zero sum games, Nash equilibrium, non-competitive solutions, Prisoner's dilemma, Chicken, Newcomb's problem. There will be applications to many areas including anthropology, biology, business, economics and philosophy.
PREREQUISITES: MATH 1030.03 or 2030.03, or permission of the instructor
FORMATS: Lecture

MATH 3460 Intermediate Statistical Theory
CREDIT HOURS: 3
See course description for STAT 3460.03 in the Statistics section of this calendar.

MATH 3500 Intermediate Analysis
CREDIT HOURS: 6
MATH 3500.06 continues the analysis sequence begun in MATH 2505.03. Topics include: number systems, metric spaces, compactness, continuous functions on metric spaces, Stone-Weierstrass theorem, Arzela-Ascoli theorem, sequences and series of functions and their properties, inverse and implicit function theorems, extrema, co-ordinate transformations.
CALENDAR NOTES: MATH 3500X/Y.06 is equivalent as credit to MATH 3501.03 and MATH 3502.03.
PREREQUISITES: MATH 2135.03, 2505.03
EXCLUSIONS: MATH 3501.03, MATH 3502.03
FORMATS: Lecture

MATH 3501 Intermediate Analysis I
CREDIT HOURS: 3
MATH 3501.03 continues the analysis sequence begun in MATH 2505.03. Topics include: Metric spaces, point-set topological notions, sequences, completeness, separability, compactness (Heine-Borel, Bolzano-Weierstrass, Finite Intersection, complete and totally bounded), limits and continuity, continuity in topological terms,

connectedness, path and local-path connectedness, homeomorphisms, uniform continuity, Lipschitz continuity, contractions, contraction principle, sequences of functions, uniform convergence. Further topics may include: Arzela-Ascoli theorem, Stone-Weierstrass theorem.
PREREQUISITES: MATH 2135.03, MATH 2505.03
EXCLUSIONS: MATH 3500X/Y.06
FORMATS: Lecture

MATH 3502 Intermediate Analysis II
CREDIT HOURS: 3
Topics include: The full derivative for functions between Euclidean spaces, directional derivatives, Jacobian matrix, differentiability, C&sup1 functions, multilinear maps, higher derivatives, Taylor's theorem, extrema, inverse and implicit function theorems, extrema subject to constraints, Lagrange multipliers. Further topics may include: normed vector spaces and basic functional analysis, basic theory of manifolds in Rn, Fourier series.
PREREQUISITES: MATH 3501.03
EXCLUSIONS: MATH 3500X/Y.06

MATH 3700 Mathematics for Economists
CREDIT HOURS: 3
See course description for ECON 3700 in the Economics section of this calendar.

MATH 3790 Mathematical Problem Solving: Techniques & Methods
CREDIT HOURS: 3
This class will provide an introduction to techniques for solving mathematical problems of the sort encountered in competition (such as the mathematical olympiad or the William Putnam competition). There will be self-contained modules developing techniques from several branches of mathematics including number theory, combinatorics, geometry and analysis. The majority of the class time, however, will be devoted to examining examples. Students will be expected to prepare and present in class solutions to assigned problems.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1000.03, MATH 1010.03 or equivalent, and consent of instructor.

MATH 3800 Financial Economics
CREDIT HOURS: 3
See course description for ECON 3800.03 in the Economics section of this calendar.

MATH 3900 Financial Mathematics
CREDIT HOURS: 3
This course is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 2135.03), or permission of the instructor
CROSSLISTED: ECON 3900.03

MATH 4001 AARMS Summer School I
CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: STAT 4001.03
FORMATS: Lecture

MATH 4002 AARMS Summer School II
CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: STAT 4002.03
FORMATS: Lecture

MATH 4010 Introduction to Measure Theory and Integration
CREDIT HOURS: 3
Lebesgue's theory of measure and integration. The topics include: sigma-algebras, measures, construction of measures,Lebesgue measure on the real line, measurable functions, the Lebesgue integral and convergence theorems, Lp spaces, product measures and the Fubini-Tonelli theorem.
PREREQUISITES: MATH 3501.03
CROSSLISTED: MATH 5010.03
FORMATS: Lecture

MATH 4020 Analytic Function Theory
CREDIT HOURS: 3
Topics include: review of analytic complex functions including topological properties of the plane, Mobius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.
PREREQUISITES: MATH 2002.03 (MATH 3080.03 recommended)
CROSSLISTED: MATH 5020.03

MATH 4025 Commutative Algebra I
CREDIT HOURS: 3
This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.

PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5025.03
FORMATS: Lecture

MATH 4035 Topics in Commutative Algebra
CREDIT HOURS: 3
This course covers special topics in commutative algebra.
PREREQUISITES: MATH 4045.03 or permission of the instructor
CROSSLISTED: MATH 5035.03
FORMATS: Lecture

MATH 4045 Advanced Algebra I
CREDIT HOURS: 3
Introduction to module theory: modules, submodules, quotient modules, module homomorphisms, generators for modules, direct sums, free modules, tensor products, exact sequences, projective modules, injective modules, and flat modules. Modules over principal ideal domains. Additional topics may include homological algebra, Ext and Tor Functors, symmetric and exterior algebras.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5045.03
FORMATS: Lecture

MATH 4055 Advanced Algebra II
CREDIT HOURS: 3
Field theory, field extensions, Galois theory and applications.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5055.03
FORMATS: Lecture

MATH 4065 Algebraic Geometry
CREDIT HOURS: 3
This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout's Theorem, Riemann-Roch Theorem.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5065.03
FORMATS: Lecture

MATH 4066 Advanced Statistical Theory I
CREDIT HOURS: 3
See course description for STAT 4066.03 in the Statistics section of this calendar.

MATH 4070 Algebraic Number Theory
CREDIT HOURS: 3
An introduction to algebraic number theory, with special emphasis on quadratic and cyclotomic fields. A more general study of rings of integers of algebraic number fields focuses on divisibility properties. Other topics include Dedekind domains, ideals and their factorization into prime ideals, and class groups and class numbers.
PREREQUISITES: MATH 3032.03 (MATH 3070.03 recommended)
CROSSLISTED: MATH 5070.03
FORMATS: Lecture

MATH 4116 Cryptography
CREDIT HOURS: 3
This course is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.
PREREQUISITES: MATH 1000.03, MATH 1010.03, MATH 1030.03 (or MATH 2030.03), and at least six additional credit hours in Mathematics beyond the first year, or permission of the instructor.
CROSSLISTED: CSCI 4116.03

MATH 4130 Design and Analysis of Algorithms II
CREDIT HOURS: 3
See course description for CSCI 4113.03 in the Computer Science section of this calendar.

MATH 4135 Introduction to Category Theory
CREDIT HOURS: 3
Categories, functors, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.
PREREQUISITES: MATH 3031.03 and MATH 3501.03 or permission of the instructor.
CROSSLISTED: MATH 5135.03
FORMATS: Lecture

MATH 4136 Topics in Category Theory
CREDIT HOURS: 3
Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern mathematics such as found in

courses on algebra and topology would be an asset.
PREREQUISITES: MATH 3031.03 and consent of instructor
CROSSLISTED: MATH 5136.03

MATH 4140 Introduction to Functional Analysis
CREDIT HOURS: 3
An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn-Banach Theorem, the principle of uniform boundedness, dual spaces, weak topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5140.03
FORMATS: Lecture

MATH 4165 Mathematical Methods in Physics
CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor.
CROSSLISTED: PHYC 4160.03
EXCLUSIONS: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

MATH 4170 General Topology
CREDIT HOURS: 3
An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5170.03
FORMATS: Lecture

MATH 4175 Topics in Mathematical Physics
CREDIT HOURS: 3
This course is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the Green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.
PREREQUISITES: MATH 4165.03
CROSSLISTED: PHYC 4170.03, PHYC 5170.03

MATH 4180 Introduction to Algebraic Topology
CREDIT HOURS: 3
An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.
PREREQUISITES: MATH 2505.03, MATH 4170.03
CROSSLISTED: MATH 5180.03
FORMATS: Lecture

MATH 4190 Ordinary Differential Equations
CREDIT HOURS: 3
A graduate-level introduction to ordinary differential equations. Topics covered include flows, existence and uniqueness theorems, continuity of solutions, coordinate transformations, symmetry methods and reductions, linearization of dynamical systems, and ODEs on manifolds.
PREREQUISITES: (MATH 3120.03 or MATH 3260.03) and MATH 2505.03 or permission of the instructor
CROSSLISTED: MATH 5190.03
FORMATS: Lecture

MATH 4200 Ordinary Differential Equations - Qualitative Theory
CREDIT HOURS: 3
Qualitative theory is concerned with determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor’s discretion.
PREREQUISITES: MATH 4190.03
CROSSLISTED: MATH 5200.03
FORMATS: Lecture

MATH 4220 Introduction to Partial Differential Equations
CREDIT HOURS: 3
This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz Raleigh theory.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor
CROSSLISTED: MATH 5220.03
FORMATS: Lecture

MATH 4230 Partial Differential Equations
CREDIT HOURS: 3
This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of the instructor
CROSSLISTED: MATH 5230.03
FORMATS: Lecture

MATH 4250 Asymptotic Analysis
CREDIT HOURS: 3
Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.
PREREQUISITES: MATH 2030.03 and (MATH 3120.03 or MATH 3260.03), or permission of the instructor
CROSSLISTED: MATH 5250.03
FORMATS: Lecture

MATH 4330 Topics in Graph Theory
CREDIT HOURS: 3
This course is intended for math and computer science students. Items to be selected from the following topics: graphs and matrices, graphs and groups, network analysis, extremal graph theory, enumeration problems, and algebraic methods in graph theory.
PREREQUISITES: MATH 3330.03 or CSCI 3110.03 or permission of the instructor
CROSSLISTED: MATH 5330.03, CSCI 4115.03
FORMATS: Lecture

MATH 4340 Discrete Random Structures
CREDIT HOURS: 3
This course will cover basics of probability and stochastic processes, and then focus on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.
PREREQUISITES: MATH 4330.03/MATH 5330.03 or MATH 2113.03 or permission from the instructor
CROSSLISTED: MATH 5340.03
FORMATS: Lecture

MATH 4360 Combinatorial Modelling
CREDIT HOURS: 3
This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.
PREREQUISITES: MATH 2060.03 and MATH 3032.03 or permission of the instructor.
CROSSLISTED: MATH 5360.03
FORMATS: Lecture

MATH 4370 Combinatorics: Techniques and Structures
CREDIT HOURS: 3
We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Advanced techniques include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and finite geometries
PREREQUISITES: MATH 2112.03 or MATH 2051.03 or MATH 3070.03 or MATH 3330.03
CROSSLISTED: MATH 5370.03
FORMATS: Lecture

MATH 4410 Cosmology
CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modelling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: MATH 5410.03, PHYC 4660.03/PHYC 5660.03
FORMATS: Lecture

MATH 4500 Introduction to Harmonic Analysis
CREDIT HOURS: 3
This course covers the basic elements of L^p-spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L&sup2 -Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.
PREREQUISITES: MATH 4010.03/MATH 5010.03, or MATH 3502.03 with permission of instructor
CROSSLISTED: MATH 5500.03
FORMATS: Lecture

MATH 4530 Differential Geometry
CREDIT HOURS: 3
This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.
PREREQUISITES: MATH 3045.03 or MATH 3502.03 or permission of the instructor
CROSSLISTED: MATH 5530.03
FORMATS: Lecture

MATH 4540 Applied Analysis
CREDIT HOURS: 3
This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.
PREREQUISITES: (MATH 3120.03 or MATH 3260.03) and MATH 3501.03, or consent of instructor
CROSSLISTED: MATH 5540.03
FORMATS: Lecture

MATH 4650 General Relativity
CREDIT HOURS: 3
A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzchild solution, gravitational collapse, black holes, and cosmology.
PREREQUISITES: MATH 3045.03 or permission of the instructor
CROSSLISTED: MATH 5650.03, PHYC 4650.03/PHYC 5650.03
FORMATS: Lecture

MATH 4660 Theory of Computation
CREDIT HOURS: 3
See course description for CSCI 4112.03 in the Computer Science section of this calendar.

MATH 4680 Topics in Logic and Computation
CREDIT HOURS: 3
This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
COREQUISITES:
Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.
CROSSLISTED: MATH 5680.03
FORMATS: Seminar

MATH 4800 Introduction to Mathematical Research
CREDIT HOURS: 3
This course is intended to introduce students to the science and methodology of research in the mathematical sciences. The course will be organized around topics from a wide spectrum of mathematics from which students will be guided to investigate open problems. Conjectures will be formulated and evidence will be developed.
PREREQUISITES: MATH 3031.03 and MATH 3501.03, or permission of the instructor
FORMATS: Lecture

MATH 4900 Combinatorial Game Theory
CREDIT HOURS: 3
This course looks at 2-player games of strategy where there are no chance devices and both players have perfect information. The surprising mathematical structure underlying these games will be introduced along with the evaluation scheme and its application to specific hot, all-small and impartial games.
PREREQUISITES: (MATH 2040.03 or MATH 2135.03) and MATH 2002.03
CROSSLISTED: MATH 5900.03

MATH 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrolment must be approved by the mathematics honours coordinator.
CALENDAR NOTES: Students are required to take twelve additional credit hours at or above the 4000-level in addition to this one.

MATH 8891 Co-op Work-Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2700.03

MATH 8892 Co-op Work-Term II
CREDIT HOURS: 0
PREREQUISITES: MATH 8891.00

MATH 8893 Co-op Work-Term III
CREDIT HOURS: 0
PREREQUISITES: MATH 8892.00

MATH 8894 Co-op Work-Term IV
CREDIT HOURS: 0
PREREQUISITES: MATH 8893.00

Introduction
The Medical Sciences program is a 4-year Bachelor of Science aimed at students who wish to initiate studies in medical science as undergraduates. The program will introduce students to subjects such as human anatomy, physiology, neuroscience, epidemiology, and health ethics.

In the first two years of the program, students take core courses in Biology, Chemistry, Mathematics, Statistics, Psychology, Microbiology, Sociology, Neuroscience, Biochemistry, and Physiology. These courses will not only provide a solid background in basic sciences, but will prepare students for admission tests for various medical sciences disciplines (such as the MCAT), meet (or exceed) the early prerequisites for acceptance into medically related professional faculties (such as Medicine, Dentistry, and Pharmacy) locally and across the country, and meet (or exceed) the early prerequisites required for acceptance into biomedical sciences graduate programs at Dalhousie and across the country. In their third and fourth years, students take core and selective courses in various subjects within the medical sciences. These courses come from Pharmacology, Microbiology & Immunology, Physics, Anatomy, Pathology, Philosophy, and Community Health & Epidemiology departments. In fourth year, students will either pursue an Honours, with an associated research project, or a one-term case-based Capstone course.

Career path advising and the course selection process are critical to the success of the Medical Sciences undergraduate program. In addition to guidance with respect to professional schools and their entry requirements, academic advising is provided so that students are aware of what courses are required should they want to enter graduate programs in the various biomedical science disciplines. Opportunities are available to concentrate in areas of special interest, explore scientific curiosities further, or fulfil professional school prerequisites. Students will graduate with a broad biomedical science background that will prepare them for a variety of clinical professional programs, graduate school, employment in the biotechnology industry, health administration, and in government.

Degree Programs
The curriculum offers core courses from 14 different departments, providing a broad background in biomedical science and a guided learning experience throughout the program. Students are also required to take a minimum of 21 credit-hours in “Selective” courses (chosen from a predetermined list provided by the program) in relevant medical sciences fields. These selective courses allow students to focus their interests in a particular area (including advanced courses in year 4), explore their interests further, and fulfil professional school prerequisites. Furthermore, for those interested, selectives will aptly prepare students in pursuit of senior research projects, subsequently providing the necessary groundwork to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have prerequisites with minimum grade requirements in those prerequisite courses. Please consult the appropriate calendar section for these requirements.

The program also offers 21 credit hours in open "Electives", which allows students to take any course offered at Dalhousie (at the appropriate level). Students are encouraged to fulfil the Writing requirement using one or both Electives in the first year and it is recommended that students take the writing course from the English department, since some professional schools require six credit hours in ENGL courses.

Students can choose to do a concentrated Honours in their fourth year, where they have the option of completing the research project at any Dalhousie research site, provided the Medical Sciences Honours Committee approves the project and supervisor. Despite the research site where students complete the project, they will still receive an Honours degree in Medical Sciences. If students do not choose Honours, they will take a case-based Capstone course that integrates multiple medical sciences disciplines by examining 5 medically-related cases, through expert lectures, group discussions, and student presentations.

The Medical Sciences program offers the following degree options:

- BSc (Medical Sciences) Honours - 120 credit hour
- BSc (Medical Sciences) - 120 credit hour

Students also have the option of doing a Minor. Core courses and required selectives may not be double-counted as Minor courses; extra selectives and electives may be used towards the minor. If a minor is added, students may find that they need to take more than 120 credit hours to complete all of their degree requirements.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Medical Sciences undergraduate academic advisor.

Program requirements can be seen by following the links to the right. In addition, students must satisfy the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Assistant Dean
Wells, S. M., BSc (Western), PhD (Toronto), Associate Professor (Biomedical Engineering), joint appointment in Physics & Atmospheric Sciences

Program Coordinator
Jordan, J., BSc (St. FX), PhD (Dalhousie)

Medical Sciences Clerk
Huggett, C., BA (Queen's)

BSc (Medical Sciences)

The Bachelor of Science (Medical Sciences) degree is a 120 credit hour program, typically completed in 4 years. It will provide an educational experience that offers a broad, interdisciplinary background in all relevant subjects in biomedical sciences. The degree also meets the general degree requirements for the Faculty of Science. This program may fulfill the Dalhousie Faculty of Graduate Studies requirements for graduate school, but may not satisfy department-specific or other school-specific graduate school entry requirements.

Requirements
In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "Degree Requirements" section for the College of Arts and Science. For the required Writing class, students can choose from the list of "Writing Across the Curriculum" approved classes. Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

1000 Level

- BIOL 1010.03: Principles of Biology Part I *or* BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution *with* BIOL 1011.03: Principles of Biology Part II *or* BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology *or* SCIE 1506.09 + 1507.09: Integrated Science
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity *and* CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Sciences Calculus *or* MATH 1000.03: Differential and Integral Calculus I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences *or* SCIE 1506.09 + 1507.09: Integrated Science

- CH&E 4010.03: Epidemiology Principles
- SCIE 4005.03: Medical Sciences Capstone

24 credit hours of Selectives, including at least 3 credit hours of Advanced Selectives

List of Selectives and Advanced Selectives

BSc (Medical Sciences) Honours

Students who want a challenging program resulting in a broad background in medical sciences, including independent research experience, may want to enrol in an Honours program. An Honours degree in the Medical Sciences program aims to prepare students for future thesis-based graduate studies in a number of medically related fields. In addition to specific core course requirements with a minimum GPA of 3.3, students must identify a faculty member who has agreed to be their research supervisor. Students will have the flexibility to do their Honours research at a Dalhousie Research site of their choice (Faculty of Science, Faculty of Medicine, or other), subject to the approval of the Honours class coordinator. All students conduct an independent research project in their final year under the supervision of a faculty member. Students must attend weekly classes, submit a satisfactory Interim Report and thesis, and deliver a satisfactory symposium presentation of the thesis research in an Honours student research forum.

Students should consult with an advisor and choose their electives and selectives carefully in their second, third and fourth years to ensure that they are prepared for Honours and potentially graduate studies in their field of interest. Students with an Honours degree will also be well prepared for entry into professional schools.

Requirements

1000 Level

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3001.03: Pharmacology I (in-class or distance)
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- CH&E 4010.03: Epidemiology Principles
- SCIE 4901.03 + SCIE 4902.03: Medical Sciences Honours Research and Thesis I and II

21 credit hours of Selectives (see list below), including at least 3 credit hours of Advanced Selectives

Required standing for graduation:
GPA 3.30 in core courses
GPA 3.70 in core and selective courses for first class

* See Writing Course Requirements. Before selecting a writing course, students are encourged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

List of Selectives and Advanced Selectives

List of Selectives and Advanced Selectives
Medical Sciences Honours students must include in their program at least 21 credit hours in the following courses. Students not in the honours program must include at least 24 credit hours of these courses. In both cases, at least one of the Selectives must be an Advanced Selective.

Selectives:

Biochemistry and Molecular Biology

- BIOC 2610: Introductory Biochemistry Lab
- BIOC 3300: Intermediary Metabolism
- BIOC 3400: Nucleic Acid Biochemistry & Molecular Biology
- BIOC 3610: Laboratory Techniques in Biomedical Sciences
- BIOC 3700: Biomolecular Chemistry

Biology

- BIOL 2003: Animal Diversity
- BIOL 2040: Evolution
- BIOL 2060: Introductory Ecology
- BIOL 3046: Molecular Evolution
- BIOL 3050: Developmental Biology
- BIOL 3078: Animal Physiology I
- BIOL 3322: Parasitology
- BIOL 3328: Medical Entomology (only offered in Summer)
- BIOL 3336: Vertebrate Functional Morphology
- BIOL 3421/ANAT 3421: Comparative Vertebrate Histology
- BIOL 3430/ANAT 2160: Introduction to Human Histology

Biomedical Engineering

- BMNG 3000: Technology in Medicine

Chemistry

- CHEM 2301: Introduction to Physical Chemistry I
- CHEM 2304: Introduction to Physical Chemistry II
- CHEM 3601: Chemistry of Living Systems

Economics

- ECON 2231: Perspective in Health Economics
- ECON 3231: Topics in Health Economics

Environmental Science

- ENVS 3400: Environment and Human Health

Humanities and Social Sciences

- ENGL 2030: Literature, Health, and Healing (offered in alternate years to ENGL 3320)
- ENGL 3320: Literature and the History of Medicine (offered in alternate years to ENGL 2030)
- HSTC 2200: Introduction to History of Science
- HSTC 2202: The Beginnings of Western Medicine: The Birth of the Body
- HSTC 2206 - Biopolitics: Human Nature In Contemporary Thought
- HSTC 2350 - The Body in Early Modern Europe
- HSTC 3121 - In Search of the Philosopher's Stone: The History of European Alchemy
- INTD 3115: Global Health in the 21st Century
- PHIL 2805: Ethics and Health Care: Patient Care (students can only count PHIL 2805 *or* 2810 as selective and other as core ethics course)
- PHIL 2810: Ethics and Health Care: Social Policy (students can only count PHIL 2805 *or* 2810 as selective and other as core ethics course)
- PHIL 3800: Philosophy of Medicine

- SOSA 2502: Biomedicine and the Illness Experience
- SOSA 3135: The Social Organization of Health Care
- SOSA 3143: Health, Illness, and the World System
- SOSA 3145/GWST 3145: Gender and Health
- SOSA 3147: Aging Cross Culturally
- SOSA 3148: The Sociology of Addiction/ Drugs, Health, and Society
- SOSA 3403: Qualitative and Field Methods

Interprofessional Health Education

- IPHE 2201/IDHS 2201: Introduction to Aboriginal Peoples' Health and Healing

Kinesiology

- KINE 2465: Introductory Biomechanics

Mathematics

- MATH 1010: Differential and Integral Calculus II

Medical Neuroscience

- ANAT 2160/BIOL 3430: Introduction to Human Histology
- ANAT 3421/BIOL 3421: Comparative Vertebrate Histology

Microbiology and Immunology

- MICI 2400: Laboratory Methods in Microbiology and Immunology
- MICI 3114: Virology
- MICI 3119: Physiology of Prokaryotic Cell
- MICI 4115: Medical Immunology
- MICI 4218: Clinical Microbiology

Neuroscience

- NESC 2130/PSYO 2130: Introduction to Cognitive Psychology
- NESC 2570/PSYO 2570/PHYL 2570: Cellular Neuroscience
- NESC 3043/PSYO 3043: Neurobiology of Learning
- NESC 3170/PSYO 3170: Hormones and Behaviour
- NESC 3227/PSYO 3227: Principles of Human Neuropsychology
- NESC 3670: Genes, Brain and Behaviour

Physics

- PHYC 1290: Introduction to Physics
- PHYC 1320: Physics In and Around You II
- PHYC 2250: Physics of Biological and Medical Technology
- PHYC 2610: Introduction to Biomechanics

Physiology and Biophysics

- PHYL 3120: Exercise Physiology in Health & Disease
- PHYL 3320: Human Cell Physiology
- PHYL 3420: Sensory Physiology
- PHYL 3520: Core Concepts in Medical Physiology
- PHYL 3600: Driected Project in Physiology

- PHYL 3620: Human Physiology Lab

Psychology

- PSYO 2080: Social Psychology
- PSYO 2090: Developmental Psychology
- PSYO 2130/NESC 2130: Introduction to Cognitive Psychology
- PSYO 2220: Abnormal Behaviour
- PSYO 2770: Brain & Behaviour (offered in alternate years)
- PSYO 3043/NESC 3043: Neurobiology of Learning
- PSYO 3129: Childhood Psychopathology
- PSYO 3170/NESC 3170: Hormones and Behaviour
- PSYO 3227/NESC 3227: Principles of Human Neuropsychology

Science

- SCIE 3100: Experiential Learning in Medical Sciences

Advanced Selectives:

Biochemistry and Molecular Biology

- BIOC 4010: Bioinformatics (offered in alternate years)
- BIOC 4302: Biochemistry of Lipids
- BIOC 4305: Mechanisms of Signal Transduction
- BIOC 4403: Genes and Genomes
- BIOC 4501: Medical Biotechnology I
- BIOC 4700: Proteins
- BIOC 4701: Enzymes
- BIOC 4835/BIOL 4035: Human Genetics

Biology

- BIOL 3079: Animal Physiology II
- BIOL 4020: Advanced Cell Biology
- BIOL 4035/BIOC 4835: Human Genetics

Humanities and Social Sciences

- SOSA 4006: Issues in Critical Health Studies
- PHIL 4801: Topics in Ethics and Healthcare (offered every 3-4yr)
- POLI 4260: The Politics of Health Care

Medical Neuroscience

- ANAT 4010: Advanced Human Anatomy

Microbiology and Immunology

- MICI 4027: Molecular Mechanisms of Cancer (offered in alternate years)
- MICI 4033: Advanced Microbial Genetics
- MICI 4100: Processes & Mediators of Inflammation
- MICI 4114: Advanced Topics in Molecular & Medical Virology
- MICI 4116: Current Topics in Mucosal Immunology
- MICI 4302: Clinical and Molecular Immunology (alternate years)

Neuroscience

- NESC 3180/PSYO 3180: Psychoneuroimmunology/Ecological Immunology (offered in alternate years)
- NESC 3970/PSYO 3970: Molecular Neuroscience
- NESC 4185/PHYL 4000: Current Advances in Synaptic Function or Plasticity

Pathology

- PATH 4100: Critical Thinking in Neuropathology

Pharmacology

- PHAC 4001:Pharmacology II

Physiology and Biophysics

- PHYL 4000/NESC 4185: Current Advances in Synaptic Function and Plasticity
- PHYL 4324: Endocrine Physiology
- PHYL 4504: Respiratory Physiology
- PHYL 4680: Cardiovascular Physiology (alternate years)

Psychology

- PSYO 3180/NESC 3180: Psychoneuroimmunology/Ecological Immunology (offered in alternate years)
- PSYO 3224: Forensic Psychology
- PSYO 3970/NESC 3970: Molecular Neuroscience

Science

- SCIE 4101 & SCIE 4102: Directed Project in Medical Sciences I and II

Introduction
Microbiologists study small cells (microorganisms) and viruses. Among other things, immunologists want to know how larger organisms (such as humans) respond to foreign objects, many of which are very small. These two disciplines are thus inextricably linked, and when taken together comprise a major strength of the Dept. Another focus of the department is cancer biology, a natural fit with other interests, as cancers can be thought of as foreign objects, and many are caused by bacteria and viruses.

Degree programs in Microbiology and Immunology at Dalhousie focus on education and training in bacteriology, virology and immunology, with an understanding that biochemistry, genetics, and cell and molecular biology are also essential elements of a comprehensive academic program. A degree in Microbiology and Immunology provides a firm foundation for future employment in a variety of laboratory environments, for the pursuit of an advanced post- graduate degree, and/or for entry into the health professions (e.g. medicine).

Degree Programs
The Department offers the following degree programs in Microbiology and Immunology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*

- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Microbiology and Immunology

* BSc Co-op option available
* May be combined with Minors from other disciplines.

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Microbiology and Immunology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Microbiology and Immunology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18
- SCIE 1506.09 and SCIE 1507.09

BSc (120 credit hour) Concentrated Honours in Microbiology and Immunology

Students who want a challenging program that results in a broad and in-depth background in Microbiology and Immunology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Microbiology and Immunology subject courses, with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of MICI 4901/4902.06. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as MICI-subject courses (see below).

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Microbiology and Immunology.

Admission to Honours
Students who wish to enrol in a Microbiology and Immunology Honours program should apply for admission after receiving their 2nd year Fall term grades. To be admitted, students must have:

- Consulted with a departmental academic advisor
- Completed the required 1000 level classes
- A GPA of B+ at the time of application

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- MICI 4901/4902.06: Honours Research and Thesis*
- One additional 4000-level MICI course
- A minimum of three additional courses from the list below, at least one of which is at the 4000 level
    - MICI 2115.03: Human Organs and Tissues, MICI 3024.03: Microscopy, MICI 3620.03: Experiential Learning in Microbiology and Immunology, MICI 4027.03: Molecular Mechanisms of Cancer, MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4218.03: Clinical Microbiology, MICI 4302.03: Molecular Immunology
    - BIOC 4010.03: Bioinformatics, BIOC 4403.03: Genes and Genomes, BIOC 4404.03: Gene Expression, BIOC 4501.03: Medical Biotechnology, BIOC 4835.03/BIOL 4035.03: Human Genetics
    - BIOL 2004.03: Diversity of Life II,BIOL 3037.03 Gene Editing, and Synthetic Biology, BIOL 3101.03: Microbial Ecology, BIOL 3102.03: Microbial Eukaryotes, BIOL 3322.03: Parasitology, BIOL 4020.03 Advanced Cell Biology
    - PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
    - FOSC 3080.03: Food Microbiology

* The Honours research thesis (MICI 4901/4902.06) is normally supervised by a faculty member from Microbiology and Immunology or from Biochemistry and Molecular Biology (including joint and cross appointments). Students who wish to undertake their honours research project in another department must first have the project approved by the Microbiology and Immunology Undergraduate Studies Committee.

Grade requirements for Honours:

- In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum grade of B in five and a minimum grade of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Combined Honours in Microbiology and Immunology and another subject

Students who wish to study Microbiology and Immunology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Microbiology and Immunology, this requirement is satisfied through MICI 4901/4902.06.

A Co-op option is available for students enrolled in BSc Combined Honours with Microbiology and Immunology as the primary subject.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Microbiology and Immunology and another subject must complete the following:

Microbiology and Immunology as the primary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 4901/4902.06: Honours Research and Thesis
- One additional MICI course at the 4000 level

Requirements for a Combined Honours with Biochemistry & Molecular Biology as the secondary subject can be met by completing the following courses in addition to the above list:

- BIOC 3300.03: Intermediate Metabolism, BIOC 3700.03: Biomolecular Chemistry
- Two courses from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
- Three additional MICI or BIOC courses at or above the 2000 level

Microbiology & Immunology as the secondary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introduction Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular BiologyMICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- One additional MICI or MICI-approved course at or above the 3000 level.
- One additional MICI course at the 4000 level

Grade requirements for Combined Honours:

In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum of B in five and a minimum of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Major in Microbiology and Immunology

The 120 credit hour Major is suited to students who want to focus on Microbiology and Immunology, but wish to have a program that is somewhat less constrained than the Honours program. Microbiology and Immunology Majors complete a minimum of 42 credit hours in program courses above the 1000 level. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as program courses (see below). Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Microbiology and Immunology.

It is required that a student consult with a MICI departmental advisor.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- One of the following courses: MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology
- Three additional credit hours in MICI-approved courses at or above the 3000 level

Grade requirements for Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

BSc (120 credit hour) Double Major in Microbiology and Immunology and another subject

The Double Major degree program allows students to combine a study of Microbiology and Immunology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Microbiology and Immunology as the primary subject.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Microbiology and Immunology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000/4000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 3XXX-4XXX (or MICI approved): one course or 6 credit hours if the second subject is Biochemistry
- One of MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology

The same set of core courses is required in a Double Major with Microbiology and Immunology as the primary or secondary subject.

Grade requirements for Double Major:
For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

Minor in Microbiology and Immunology

The 90 credit hour degree is suited to students who want to focus on Microbiology and Immunology, but wish to graduate in three years rather than four in the event of acceptance into a professional school that has the prerequisite of an undergraduate degree. Students will complete a minimum of 18 credit hoursin Microbiology and Immunology above the 1000 level. Certain specified courses from other departments (BIOC, CHEM) are also required.

Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a 90 credit BSc Minor program in Microbiology and Immunology must complete the following courses:

1000 level
BIOL 1010 and 1011 or BIOL 1020 and 1021

CHEM 1011 and 1012

2000 level and above

MICI 2100.03: Introductory Microbiology and Immunology, and MICI 2400.03: Laboratory Methods in Microbiology and Immunology, plus 12 additional credit hours in MICI (or MICI-approved) courses above the 1000 level. Note that 3000 level MICI courses will, for the most part, require certain prerequisite grades within courses provided by other departments, such as BIOL 2020, BIOL 2030 and BIOC 2300.

It is required that a student considering the 90 credit hour degree consult with a MICI departmental advisor.

Contact Microbiology and Immunology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Microbiology and Immunology

Co-op Academic Advisor: Dr. D.B. Stoltz (dstoltz@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Microbiology and Immunology, or in Combined Honours or Double Major programs with Microbiology and Immunology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.3 is required for admission and for continuation in the Co-op program as is a grade of B+ in MICI 2100.03. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Microbiology and Immunology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html For more information on Co-op Education in Microbiology and Immunology, please see the Department webpage www.dal.ca/academics/programs/undergraduate/mbim/what_will_I_learn/coop_work_terms.html

Minors available to students in Microbiology and Immunology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally embedded within 120 credit hour programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Microbiology and Immunology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Microbiology and Immunology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Microbiology and Immunology Major or Honours program include:

- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
For more detailed information on the following courses please see the departmental webpage http://microbiology.medicine.dal.ca

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of course may be deleted from course lists; students are therefore advised that being signed into a course is no guarantee of continued registration.

Course Descriptions

MICI 1050 Basic Microbiology and Immunology for Pharmacy
CREDIT HOURS: 3
This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or instructor's consent
FORMATS: Lecture | Lab | Tutorial

MICI 1100 Health Science Microbiology
CREDIT HOURS: 3
An introduction to microbiology and infectious diseases only for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect human's well being.
CALENDAR NOTES: This course is also offered by distance education to all students.
RESTRICTIONS: This course is restricted to Nursing and Kinesiology students. It is not for students registered in the Faculty of Science.
FORMATS: Lecture

MICI 1200 Introduction to General and Oral Microbiology
CREDIT HOURS: 3
See course description in the Dental Hygiene section of the Dentistry, Law and Medicine Calendar (DEHY 2850.03).

MICI 2100 Introductory Microbiology and Immunology
CREDIT HOURS: 3
An introduction to the basic concepts of microbiology and immunology. Topics include: structure, genetics and biology of microorganisms, basic immunology and host defence mechanisms. The class is designed to interrelate the major research themes within the Department (bacteriology and microbial pathogenesis, immunology, microbial and molecular genetics, virology and cancer biology).
CALENDAR NOTES: This class is also offered by distance education with online labs.
PREREQUISITES: Grade of B- or better in BIOL 1010.03 and 1011.03, (or BIOL 1020.03 and BIOL 1021.03) and CHEM 1011.03 and CHEM 1012.03
FORMATS: Lecture | Lab | Online Delivery

MICI 2400 Laboratory Methods in Microbiology and Immunology
CREDIT HOURS: 3
An introduction to techniques in Microbiology and Immunology through a rigorous wet laboratory experience that includes training in how to explore safely and effectively the properties of viruses, bacteria and immune cells. This course is directed to students in Microbiology and Immunology, Biochemistry & Molecular Biology, and Biology programs.
COREQUISITES: BIOL 2020.03 and BIOL 2030.03
PREREQUISITES: Grade of B- or better in MICI 2100 or instructor's consent
FORMATS: Lab

MICI 3024 Microscopy
CREDIT HOURS: 3
Biological ultrastructural analysis concentrating on transmission and scanning electron microscopy. Topics include: physical and chemical principles governing technical procedures such as fixation, staining, freeze-fracture, immunocytochemistry, autoradiography, X-ray microanalysis and photography. During laboratory periods, students have the opportunity through individual projects to participate in some techniques covered in lectures.
PREREQUISITES: Grades of B- or better in MICI 2100.03 and BIOL 2020.03
CROSSLISTED: BIOL 3024.03
FORMATS: Lecture | Lab

MICI 3114 Virology
CREDIT HOURS: 3
Viruses play important roles in infectious diseases and cancer as well as in model systems for gene regulation, molecular evolution and gene therapy. Topics include: virus structure, assays, classification, gene organization and expression, host-cell interactions, cell transformation, gene therapy and molecular mechanisms of pathogenesis.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). BIOC 3400.03 should be taken either prior to or concurrently with this course; the same grade requirement applies.
FORMATS: Lecture | Tutorial

MICI 3115 Immunology
CREDIT HOURS: 3
An introduction to cellular and molecular immunology. Topics include: cells and tissues of the immune system, the structure and synthesis of antibodies, complement pathways, lymphocyte subsets and their functions, hypersensitivity reactions, and the genetics of the immune response.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses)
FORMATS: Lecture

MICI 3119 Physiology of the Prokaryotic Cell
CREDIT HOURS: 3
An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, adaptation responses to host and environmental challenges, and host-pathogen interactions.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, (a minimum of B- in each of these courses).

MICI 3620 Experiential Learning in Microbiology and Immunology
CREDIT HOURS: 3
This lab-based course is designed to give students an introduction to general microbiological lab procedures along with molecular and cellular techniques. Topics are centered around major research themes in the Department and are hosted in Faculty laboratories and may include bacteriology, genetics, virology, immunology, and cancer biology. In collaboration with a Faculty supervisor and course coordinator, students draft a learning agreement specifying learning outcomes and how these will be achieved. A separate dedicated team project aligned to the Tiny Earth format (tinyearth.wisc.edu) is also possible through this course offering and will aim to isolate and characterize microbes that produce antimicrobial compounds.
CALENDAR NOTES: To register in this course students will need to find a research supervisor and contact the course coordinator to receive approval before registration. Registration must be completed by the last day of fall term - this is an internal departmental deadline.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). Permission of instructor required.
RESTRICTIONS: Normally restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator.
EXCLUSIONS: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one experiential learning course per degree is permitted. Students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

MICI 4033 Advanced Microbial Genetics
CREDIT HOURS: 3
This advanced course focuses on select aspects of bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.
PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent.
EXCLUSIONS: MICI 5033.03
FORMATS: Lecture

MICI 4100 Processes and Mediators of Inflammation
CREDIT HOURS: 3
This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling. Current research questions and emerging treatments are emphasized.
PREREQUISITES: Grade of B+ or better in MICI 3115.03 and instructor’s consent
EXCLUSIONS: MICI 5100.03, PATH 5100.03
FORMATS: Lecture | Discussion

MICI 4114 Advanced Topics in Molecular and Medical Virology
CREDIT HOURS: 3
This advanced course focuses on selected aspects of molecular and medical virology and consists of lectures and student presentations based on review articles and current research papers. Topics include: Hepatitis C virus and innate immunity, influenza virus pathogenesis, virus interactions with host cells, viruses as vectors for gene therapy and applications.
PREREQUISITES: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on performance in MICI 3114.03 (minimum A- or instructor's consent)
CROSSLISTED: MICI 5114.03
FORMATS: Lecture | Discussion

MICI 4115 Medical Immunology
CREDIT HOURS: 3
This advanced course focuses on mechanisms involved in the host immune response to pathogens and tumour cells and consists of lectures and student presentations based on review articles and current research papers. Topics also include: allergic inflammation and transplantation immunology.
PREREQUISITES: Minimum grade of B in MICI 3115.03 or instructor's consent
FORMATS: Lecture | Discussion

MICI 4116 Current Topics in Mucosal Immunology
CREDIT HOURS: 3
This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.
PREREQUISITES: MICI 3115.03 with a grade of B or better or instructor’s consent
CROSSLISTED: MICI 5116.03

MICI 4118 Molecular Bacterial Pathogenesis
CREDIT HOURS: 3
This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.

PREREQUISITES: Grade of B or better in MICI 3119.03 or instructor's consent
EXCLUSIONS: MICI 5118.03

MICI 4119 Host Pathogen Interactions
CREDIT HOURS: 3
This is an advanced undergraduate course, focusing on how pathogens modify, disrupt or utilize cellular functions for their own purposes and the significance of these interactions in both pathogenesis and host defense. It will help students critically evaluate the scientific literature, develop hypotheses and design experiments to test these hypotheses.
PREREQUISITES: Students must have taken 2 out of 3 of the following: MICI 3114, MICI 3115, MICI 3119, or receive permission from the instructor. Students require a B average in these classes, with a minimum B- in any one.
FORMATS: Lecture

MICI 4218 Clinical Microbiology
CREDIT HOURS: 3
This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.
PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent
FORMATS: Lecture

MICI 4302 Clinical and Molecular Immunology
CREDIT HOURS: 3
This advanced course focuses on understanding the generation and expression of immune responses. Topics include: regulation of cytokines, antibody diversity by immunoglobulin gene rearrangement, class switching, structure/function of cell surface receptors including the T cell antigen receptor, MHC and adhesion molecules, receptor signaling and the genetics of immune regulation.
PREREQUISITES: MICI 3115.03 with a grade of B or instructor's consent
CROSSLISTED: BIOL 4302.03/5302.03, MICI 5302.03
FORMATS: Lecture | Discussion

MICI 4701 Advanced Topics in Microbiology and Immunology
CREDIT HOURS: 3
This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4702 Advanced Topics in Microbiology and Immunology
CREDIT HOURS: 3
This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4703 Directed Research Project 1
CREDIT HOURS: 3
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703 and MICI 4704 are completed in consecutive terms, and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI, 3114.03, 3115.03 and 3119.03.
EXCLUSIONS: MICI 4700.06

MICI 4704 Directed Research Project 2
CREDIT HOURS: 3
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703 and MICI 4704 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as supervisor. At least a B average for MICI 3114.03, 3115.03, and 3119.03.
EXCLUSIONS: MICI 4700.06

MICI 4901 Honours Research and Thesis 1
CREDIT HOURS: 3
This advanced course requires at least one day per week (or equivalent) of laboratory research in the laboratory of an approved departmental faculty member. This course is for students in a MICI or combined MICI B.Sc. Honour's program. Students must meet the course instructor prior to registering for the course.
CALENDAR NOTES: This course must be taken consecutively with MICI 4902. No grade is provided until both MICI 4901 and MICI 4902 are completed.
PREREQUISITES: B average in at least three of MICI 3114, 3115, 3119 and BIOC 3400 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements.

MICI 4902 Honours Research and Thesis 2
CREDIT HOURS: 3
This advanced course requires at least one day per week (or equivalent) of laboratory research in the laboratory of an approved departmental faculty member. This

course is for students in MICI or combined MICI BSc Honour's program. Students must meet the course instructor prior to registering for the course.
CALENDAR NOTES: This course must be taken consecutively with MICI 4901. No grade is provided until both MICI 4901 and MICI 4902 are completed.
PREREQUISITES: B average in at least three of MICI 3114, 3115, 3119 and BIOC 3400 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements.

MICI 8891 Co-op Work Term I
CREDIT HOURS: 0

MICI 8892 Co-op Work Term II
CREDIT HOURS: 0

MICI 8893 Co-op Work Term III
CREDIT HOURS: 0

Neuroscience

Location: Life Sciences Centre
Department of Psychology and Neuroscience
1355 Oxford Street
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3417

Introduction
The primary goal of the field of Neuroscience is to understand the brain. Neuroscientists examine all aspects of the structure and function of nervous systems and use a variety of experimental strategies to understand them, including molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity and neuroplasticity. Knowledge obtained from research in Neuroscience may be applied to a variety of human health problems, including Alzheimer's disease, Parkinson's disease, and a variety of drug- or injury-induced behavioural disorders.

Degree Programs
The Department of Psychology and Neuroscience offers the following degree programs in Neuroscience:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Neuroscience

* May be combined with Minor programs from other disciplines (except Psychology).

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Neuroscience undergraduate academic advisor.

Staff

Dean
Moore, C. L., BA, PhD (Cantab)

Chairperson of Department
Perrot, T. S., BSc, PhD (Western)

Academic Advisors
To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

Professors Emeriti
LoLordo, V. M., AB (Brown), PhD (Penn)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

Professors
Adamo, S., BSc (Toronto), PhD (McGill)
Barrett, S. P., BA (St. FX), PhD (McGill), Clinical PhD Program Director of Training
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Deacon, S. H., BSc (UPEI), PhD (Oxon), Faculty of Science Killam Professor in Psychology
Duffy, K., BA (St. Thomas), PhD (McMaster)
Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry
Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia
Kay-Raining Bird, E., BA (Queen's), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders
Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Klein, R. M., BA (SUNY), MA, PhD (Oregon), FRSC, University Research Professor
McMullen, P., BSc, MSc (Toronto), PhD (Waterloo)
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews), University Research Professor
Moore, C. L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC, joint appointment in Psychiatry
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors
Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry
Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy
Crowder, N. A., BSc, PhD (Alberta)
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria)
Phillmore, L., BA (UWO), MA, PhD (Queen's), Undergraduate Program Coordinator
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Rosen, N. O., BA (Queen's), PhD (McGill)
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry

Assistant Professors
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in the School of Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry
Weaver, I. C. G., BSc (Alberdeen), MSc (Bristol), PhD (McGill)

University Teaching Fellows
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)

Senior Instructors
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Ply, E., BS Education (Univ of N Texas), MA, PhD (Texas Women's Univ)

Instructor
Christie, J., BSc, MSc, PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie)

Adjunct Professors
Backman, J., BA (Dalhousie), MA, PhD (Carleton), Erica Baker Psychological Services
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Church, E., BA (St. John's), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Cohen, A., BA (McGill), MA, PhD (Queen's), Psychology/University of Prince Edward Island
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Ellsworth, C., BA (McMaster), MA, PhD (Queen's), Psychology/IWK Health Centre
Flanagan, H.,BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary's
Hauf, P., PhD (Johann Wolfgang Goethe Univ, Frankfurt), Psychology/St. Francis Xavier
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
Krigolson, O. E., BEd (Victoria), MSc (Indiana), PhD (Victoria), School of Exercise Science, Health and Physical Education/Univ of Victoria
LoLordo, V. M., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
MacDonald, G. W., BA (St. FX), MA, PhD (Windsor), Private Practice
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
O'Neill, P., MSc, PhD (Yale), Professor Emeritus/Acadia
Pohlmann-Eden, B., MD, PhD (Univ of Heidelberg), major appointment in Neurology
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Rodger, R. S., MA (Edin), PhD (Queen's, Belfast)
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Smith, S. M., BA (Bishop's), MA, PhD (Queen's), Psychology/Saint Mary's
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier
Yoon, M. G., BS (Seoul), PhD (Berkeley)

Postdoctoral Fellows
Corsini-Munt, S., PhD (Montréal)
Gaililee, A., PhD (Birmingham)
Levesque, K., PhD (Dalhousie)
Miyashita, A., PhD (Tokyo)
Rigney, G., PhD (South Australia)
Ryan, K., PhD (Dalhousie)
Sorenson-Duncan, T., PhD (Alberta)
Tagarelli, K., PhD (Georgetown)
Vannier, S., PhD (UNB)

BSc (120 credit hour) Concentrated Honours in Neuroscience

The Honours program is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program. In the first year of study, students take courses which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in courses drawn from Neuroscience, Psychology and Biology. These include a number of required core courses that emphasize the acquisition and application of laboratory skills.

Honours students complete a minimum of 54 credit hours above the 1000 level in Neuroscience with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of NESC 4501.03 and NESC 4502.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enrol in Honours in Neuroscience should consult with the Neuroscience Honours Advisor in January of their third year. Students may not apply for Honours before January of their third year of studies. A detailed description of the Honours application process can be found on the departmental website www.dal.ca/psychandneuro.

Admission requirements include:

- A grade of B or better in NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- A minimum of A- or better in the most recently completed:
    - 18 credit hours of NESC courses (for admission in January of 3rd year)
      OR
    - 27 credit hours of NESC courses (for admission at end of 3rd year)

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Neuroscience must complete the following:

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) and Principles of Biology II (BIOL 1011.03; or equivalent) each with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology
- Six credit hours selected from: NESC 2130.03: Introduction to Cognitive Psychology, NESC 2140.03: Learning, NESC 2150.03: Perceptual Processes, NESC 2160.03: Animal Behaviour, BIOC 2300.03: Introduction to Biochemistry, BIOL 2030.03: Genetics and Molecular Biology, PHYC 2250.03: Physics of Biological and Medical Technology

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods (or equivalent) and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level

- PSYO 3502.03: Statistical Methods II (**must be taken in third year**)
- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3165.03: Neuroethology, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory
- Six additional credit hours selected from NESC 3043.03: Neurobiology of Learning, NESC 3052.03: Sensory Neuroscience II Hearing and Speech, NESC 3131.03: Research Methods in Attention, NESC 3132.03: Research Methods in Visual Cognition, NESC 3133.03: Research Methods in Memory, NESC 3134.03: Research Methods in Psycholinguistics, NESC 3162.03: Advanced Animal Behaviour, NESC 3170.03: Hormones and Behaviour, NESC 3180.03: Psychoneuroimmunology/Ecological Immunology, NESC 3190.03: Psycholinguistics, NESC 3227.03: Principles of Human Neuropsychology, NESC 3237.03: Drugs and Behaviour, NESC 3260.03: Biological Rhythms, NESC 3264.03: The Science of Sleep, NESC 3270.03: Developmental Neuroscience, NESC 3670.03: Genes, Brain and Behaviour, NESC 3770.03: Behavioural Neuroscience, NESC 3790.03: Neurolinguistics, NESC 3970.03: Molecular Neuroscience, BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4501.03 and NESC 4502.03: Honours Thesis and Qualifying Exam
- Six credit hours selected from NESC 4000.03: Senior Seminar, NESC 4007.03: Contemporary Issues in Neuroscience, NESC 4050.03: Topics in Perception, NESC 4070.03: Chemical Neurobiology, NESC 4130.03: Topics in Cognition, NESC 4140.03: Animal Learning Topics, NESC 4160.03: Topics in Behavioural Biology, NESC 4170.03: Topics in Behavioural Neuroendocrinology, NESC 4177.03: Theoretical Neuroscience, NESC 4185.03: Current Advances in Synaptic Function and Plasticity, NESC 4230.03: Human Performance Topics, NESC 4740.03: Topics in the Neurobiology of Learning and Memory, PHAC 4001.03: Pharmacology II, BIOL4510.03: Cultural Evolution
- Six additional credit hours from Neuroscience 3000-level or 4000-level courses

Other regulations

- Students in the Honours program should find a thesis supervisor and begin the preparation for their Honours research (reading, learning laboratory methodology, submitting ethics forms) no later than the summer preceding their thesis year.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc (120 credit hour) Combined Honours in Neuroscience and another subject

Students who wish to study Neuroscience in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Neuroscience, this requirement is satisfied through NESC 4501.03 and NESC 4502.03.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Neuroscience and another subject must complete the following:

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) and Principles of Biology II (BIOL 1011.03; or equivalent) each with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

Neuroscience as the primary subject

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*
- Three credit hours selected from: NESC 2130.03: Introduction to Cognitive Psychology, NESC 2140.03: Learning, NESC 2150.03: Perceptual Processes, NESC 2160.03: Animal Behaviour, BIOC 2300.03: Introduction to Biochemistry, BIOL 2030.03: Genetics and Molecular Biology, PHYC 2250.03: Physics of Biological and Medical Technology

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level

- PSYO 3502.03: Statistical Methods II (**must be taken in third year**)
- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3165.03: Neuroethology, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory
- Three additional credit hours selected from NESC 3043.03: Neurobiology of Learning, NESC 3052.03: Sensory Neuroscience II Hearing and Speech, NESC 3131.03: Research Methods in Attention, NESC 3132.03: Research Methods in Visual Cognition, NESC 3133.03: Research Methods in Memory, NESC 3134.03: Research Methods in Psycholinguistics, NESC 3162.03: Advanced Animal Behaviour, NESC 3170.03: Hormones and Behaviour, NESC 3180.03: Psychoneuroimmunology/Ecological Immunology, NESC 3190.03: Psycholinguistics, NESC 3227.03: Principles of Human Neuropsychology, NESC 3237.03: Drugs and Behaviour, NESC 3260.03: Biological Rhythms, NESC 3264.03: The Science of Sleep, NESC 3270.03: Developmental Neuroscience, NESC 3670.03: Genes, Brain and Behaviour, NESC 3770.03: Behavioural Neuroscience, NESC 3790.03: Neurolinguistics, NESC 3970.03: Molecular Neuroscience, BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4501.03 and NESC 4502.03: Honours thesis and Qualifying Exam
- Six credit hours selected from NESC 4000.03: Senior Seminar, NESC 4007.03: Contemporary Issues in Neuroscience, NESC 4050.03: Topics in Perception, NESC 4070.03: Chemical Neurobiology, NESC 4130.03: Topics in Cognition, NESC 4160.03: Topics in Behavioural Biology, NESC 4170.03: Topics in Behavioural Neuroendocrinology, NESC 4177.03: Theoretical Neuroscience, NESC 4185.03: Current Advances in Synaptic Function and Plasticity, NESC 4230.03: Human Performance Topics, NESC 4740.03: Topics in the Neurobiology of Learning and Memory, PHAC 4001.03: Pharmacology II, BIOL4510.03: Cultural Evolution
- Six additional credit hours from Neuroscience 3000-level or 4000-level courses

Neuroscience as the secondary subject

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory
- 12 additional credit hours selected from NESC courses at the 3000 or 4000 level, including BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHAC 4001.03: Pharmacology II, BIOL4510.03: Cultural Evolution

* If students undertake another program of study that requires BIOL 2020.03: Cell Biology, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

Other regulations

- Students in the Honours program should find a thesis supervisor and begin the preparation for their Honours research (reading, learning laboratory methodology, submitting ethics forms) no later than the summer preceding their thesis year.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc (120 credit hour) Major in Neuroscience

The 120 credit hour Major is suited to students who want to focus on Neuroscience, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Neuroscience, and is designed for students not anticipating subsequent graduate-level training in Neuroscience or related disciplines. Neuroscience Majors complete a minimum of 45 credit hours in Neuroscience courses above the 1000 level and do not have thesis (or related) requirements.

Students should plan their programs carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or (902) 494-3417), or by visiting the Psychology and Neuroscience website.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Neuroscience must complete the following courses:

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) and Principles of Biology II (BIOL 1011.03; or equivalent) each with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology

- Six credit hours selected from: NESC 2130.03: Introduction to Cognitive Psychology, NESC 2140.03: Learning, NESC 2150.03: Perceptual Processes, NESC 2160.03: Animal Behaviour, BIOC 2300.03: Introduction to Biochemistry, BIOL 2030.03: Genetics and Molecular Biology, PHYC 2250.03: Physics of Biological and Medical Technology

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3165.03: Neuroethology, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory
- Six more credit hours selected from NESC 3043.03: Neurobiology of Learning, NESC 3052.03: Sensory Neuroscience II Hearing and Speech, NESC 3131.03: Research Methods in Attention, NESC 3132.03: Research Methods in Visual Cognition, NESC 3133.03: Research Methods in Memory, NESC 3134.03: Research Methods in Psycholinguistics, NESC 3162.03: Advanced Animal Behaviour, NESC 3170.03: Hormones and Behaviour, NESC 3180.03: Psychoneuroimmunology/Ecological Immunology, NESC 3190.03: Psycholinguistics, NESC 3227.03: Principles of Human Neuropsychology, NESC 3237.03: Drugs and Behaviour, NESC 3260.03: Biological Rhythms, NESC 3264.03: The Science of Sleep, NESC 3270.03: Developmental Neuroscience, NESC 3670.03: Genes, Brain and Behaviour, NESC 3770.03: Behavioural Neuroscience, NESC 3790.03: Neurolinguistics, NESC 3970.03: Molecular Neuroscience, BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHAC 4001.03: Pharmacology II, PHYL 3420.03: Sensory Physiology
- An additional 12 credit hours from Neuroscience 3000-level or 4000-level courses

BSc (120 credit hour) Double Major in Neuroscience and another subject

The Double Major degree program allows students to combine a study of Neuroscience with another subject. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Neuroscience may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Neuroscience and another subject must complete the following:

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) and Principles of Biology II (BIOL 1011.03; or equivalent) each with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

Neuroscience as the primary subject

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3165.03: Neuroethology, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory

- Six more credit hours selected from NESC 3043.03: Neurobiology of Learning, NESC 3052.03: Sensory Neuroscience II Hearing and Speech, NESC 3131.03: Research Methods in Attention, NESC 3132.03: Research Methods in Visual Cognition, NESC 3133.03: Research Methods in Memory, NESC 3134.03: Research Methods in Psycholinguistics, NESC 3162.03: Advanced Animal Behaviour, NESC 3170.03: Hormones and Behaviour, NESC 3180.03: Psychoneuroimmunology/Ecological Immunology, NESC 3190.03: Psycholinguistics, NESC 3227.03: Principles of Human Neuropsychology, NESC 3237.03: Drugs and Behaviour, NESC 3260.03: Biological Rhythms, NESC 3264.03: The Science of Sleep, NESC 3270.03: Developmental Neuroscience, NESC 3670.03: Genes, Brain and Behaviour, NESC 3770.03: Behavioural Neuroscience, NESC 3790.03: Neurolinguistics, NESC 3970.03: Molecular Neuroscience, BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHAC 4001.03: Pharmacology II, PHYL 3420.03: Sensory Physiology
- An additional six credit hours from Neuroscience 3000-level or 4000-level courses

Neuroscience as the secondary subject

2000 level

- NESC 2007.03: Neuroscience Principles and Methods (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*

Note: It is recommended that NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03: Laboratory Methods of Learning and Conditioning, NESC 3051.03: Sensory Neuroscience I Vision, NESC 3137.03: Research Methods in Cognitive Neuroscience, NESC 3161.03: Measuring Behaviour, NESC 3165.03: Neuroethology, NESC 3370.03: Neuroscience Laboratory I, NESC 3371.03: Neuroscience Laboratory II, NESC 3440.03: Neuroanatomy, NESC 3775.03: Behavioural Neuroscience Laboratory
- 12 additional credit hours selected from NESC courses at the 3000 or 4000 level, including BIOL 3020.03: Advanced Cell Biology, PHAC 3001.03: Pharmacology, PHAC 4001.03: Pharmacology II, PHYL 3420.03: Sensory Physiology, BIOL 4510 Cultural Evolution

* If students undertake another program of study that requires BIOL 2020.03: Cell Biology, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

Minor in Neuroscience
This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Neuroscience courses at the 2000 level or higher, other than NESC 2007.03: Neuroscience Principles and Methods and PSYO 2501.03: Statistical Methods I, which are available only to students in a Major/Honours program.

Contact Neuroscience for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Neuroscience

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Neuroscience may choose to include a Minor selected from the list of approved Minors (except Psychology). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Neuroscience, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc in Neuroscience include:

- Certificate in Animal Behaviour
- Certificate in Science Leadership and Communication

BSc/BEng Concurrent Program

Students wishing to combine their interest in Neuroscience with a degree in Engineering may choose a BSc/BEng Concurrent Program. Students take courses toward, and complete the requirements for a BSc 120 credit hour Major in Neuroscience, at the same time as they fulfill their BEng requirements. Such a program normally takes 5 years (or longer) to complete. Interested students should see undergraduate advisors from Neuroscience and from the Faculty of Engineering in their first year of study.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
Students going on in Neuroscience are recommended to take PSYO 1011.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1032.03 with the lab component.

4000-Level Seminars
These seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. The topics covered in these courses vary from year to year. Go to the departmental website www.dal.ca/psychandneuro for more detail about the topics to be covered in the current academic year.

Course Descriptions

NESC 2007 Neuroscience Principles and Methods
CREDIT HOURS: 3
This course introduces methods used to investigate contemporary issues in Neurobiology. Characteristics of these methods, including their strengths and limitations, are presented conceptually in lectures, and then practically in the form of supervised laboratory experiments where students implement in the lab what they encountered first in lectures.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better AND Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better. Or SCIE 1506.09/1507.09 (or SCIE 1505X/Y.18) with a grade of B- or better.
RESTRICTIONS: Students registered in Neuroscience Major or Honours programs.
EXCLUSIONS: PSYO 2000.03
FORMATS: Lecture | Lab

NESC 2130 Introduction to Cognitive Psychology
CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2130.03
FORMATS: Lecture

NESC 2140 Learning
CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2140.03
FORMATS: Lecture

NESC 2150 Perceptual Processes
CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2150.03

EXCLUSIONS: NESC/PSYO 3005.03
FORMATS: Lecture

NESC 2160 Animal Behaviour
CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2160.03
FORMATS: Lecture

NESC 2470 Systems Neuroscience
CREDIT HOURS: 3
This lecture class examines the brain's role in controlling experience and behaviour in both animals and humans. The course will focus on the functional anatomy of several psychological systems, in particular the brain pathways involved in sensation, perception, movement, motivation, mood, memory, sleep, emotion, and language. There will be emphasis on recent research findings and understanding methodology for asking questions in neuroscience.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better OR Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2470.03
RESTRICTIONS: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.
EXCLUSIONS: PSYO 2770.03, PHYL 2041.03
FORMATS: Lecture

NESC 2570 Cellular Neuroscience
CREDIT HOURS: 3
This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2570.03, PHYL 2570.03
FORMATS: Lecture

NESC 3001 Directed Project in Neuroscience
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03 or PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project.Note: This course cannot be used to fulfill the department's research laboratory requirement. **SIGNATURE REQUIRED**
COORDINATOR: L. Phillmore
CALENDAR NOTES: This course provides only a half-year research experience. Students wanting a full-year research experience in a lab should register for NESC 3000X/Y.06.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, AND PSYO 2501.03 and previous or concurrent enrolment in two other 3000-level courses.
CROSSLISTED: PSYO 3001.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 300X/Y.06, PSYO 3000X/Y.06
FORMATS: Lab
LAB HOURS PER WEEK: 4

NESC 3011 Experiential Learning in Science Communication I
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011 and PSYO1012 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3012.03 and no credit can be given for one course without the other. A grade will be given for NESC 3011.03 only after NESC 3012.03 is completed.
PREREQUISITES: B+ or better in NESC 2007 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor's consent.
CROSSLISTED: PSYO 3011.03
EXCLUSIONS: PSYO 3010.06
FORMATS: Lecture | Lab | Seminar
LAB HOURS PER WEEK: 1

NESC 3012 Experiential Learning in Science Communication II
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011 and PSYO1012 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken after, and in conjunction with, NESC 3011 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: NESC 3011.03
CROSSLISTED: PSYO 3012.03
EXCLUSIONS: NESC 3010.06
FORMATS: Lecture | Lab | Seminar
LAB HOURS PER WEEK: 1

NESC 3043 Neurobiology of Learning
CREDIT HOURS: 3
This course examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03
CROSSLISTED: PSYO 3043.03
FORMATS: Lecture

NESC 3044 Laboratory Methods of Learning and Conditioning
CREDIT HOURS: 3
A hands-on course on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.
CALENDAR NOTES: Students should be aware that some data collection occurs outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and one of NESC 2140.03/PSYO 2140.03 or NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3044.03
EXCLUSIONS: PSYO 3042.03
FORMATS: Lab

NESC 3051 Sensory Neuroscience I Vision
CREDIT HOURS: 3
This course examines the neural basis for the perception of light, colour, movement, depth, and form. The course covers developmental events important for vision, and the extent to which vision is constrained by anatomical and physiological development.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 or PSYO 2770.03, and NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3051.03
FORMATS: Lecture | Lab

NESC 3052 Sensory Neuroscience II Hearing and Speech
CREDIT HOURS: 3
This course explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and NESC 2470.03/PSYO 2470.03
CROSSLISTED: PSYO 3052.03
FORMATS: Lecture

NESC 3100 Independent Research in Neuroscience I
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED.
COORDINATOR: L. Phillmore
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3101.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3100.03 only after NESC 3101.03 is completed.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: PSYO 3100.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning
LAB HOURS PER WEEK: 4

NESC 3101 Independent Research in Neuroscience II
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED.
COORDINATOR: L. Phillmore
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3100.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3011.03 only after NESC 3012.03 is completed.
PREREQUISITES: NESC 3100.03 and Coordinator's consent
CROSSLISTED: PSYO 3101.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students

EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning
LAB HOURS PER WEEK: 4

NESC 3131 Research Methods in Attention
CREDIT HOURS: 3
The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3131.03
EXCLUSIONS: NESC 3130.06/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3132 Research Methods in Visual Cognition
CREDIT HOURS: 3
Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3132.03
EXCLUSIONS: NESC 3130.03/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3133 Research Methods in Memory
CREDIT HOURS: 3
This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3133.03
EXCLUSIONS: NESC 3130.03/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3134 Research Methods in Psycholinguistics
CREDIT HOURS: 3
Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 3190.03/PSYO 3190.03
CROSSLISTED: PSYO 3134.03
EXCLUSIONS: NESC 3130.06/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3137 Research Methods in Cognitive Neuroscience
CREDIT HOURS: 3
An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3137.03
FORMATS: Lecture | Lab

NESC 3161 Measuring Behaviour
CREDIT HOURS: 3
Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03
CROSSLISTED: PSYO 3161.03
FORMATS: Lab

NESC 3162 Advanced Animal Behaviour: Theories and Applications
CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.
PREREQUISITES: PSYO 2000.03 or NESC 2007 or BIOL 3062.03 or BIOL 3630.03, and NESC 2160.03/PSYO 2160.03
CROSSLISTED: PSYO 3162.03
FORMATS: Lecture

NESC 3165 Neuroethology
CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons work together to produce behaviour. Neural control of selected behaviours from a wide range of animals, both

invertebrate and vertebrate, are examined. From this comparative perspective an attempt is made to tease out common themes in the physiological control of behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve insects. Students are required to handle insects during the lab.
PREREQUISITES: NESC 2160.03/PSYO 2160.03 or BIOL 3062.03; and NESC 2570.03/PSYO 2570.03 or BIOL 3078.03 and BIOL 3079.03 or MARI 3074.03 and MARI 3076.03; and PSYO 2000.03 or NESC 2007.03 or one of following Biology courses: BIOL 2003.03, BIOL 2004.03, BIOL 2020.03, BIOL 2030.03, BIOL 2060.03
CROSSLISTED: PSYO 3165.03
FORMATS: Lab

NESC 3170 Hormones and Behaviour
CREDIT HOURS: 3
How chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour. How neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 (with a grade of B- or better)
CROSSLISTED: PSYO 3170.03
EXCLUSIONS: NESC 2170.03/PSYO 2170.03

NESC 3180 Psychoneuroimmunology/Ecological Immunology
CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03 or MICI 2100.03; or BIOL 2020.03
CROSSLISTED: PSYO 3180.03
FORMATS: Lecture

NESC 3190 Psycholinguistics
CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3190.03
EXCLUSIONS: NESC 2190.03/PSYO 2190.03
FORMATS: Lecture

NESC 3227 Principles of Human Neuropsychology
CREDIT HOURS: 3
Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130 is recommended
CROSSLISTED: PSYO 3227.03
FORMATS: Lecture

NESC 3237 Drugs and Behaviour
CREDIT HOURS: 3
An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and one of NESC 2470.03/PSYO 2470.03, NESC 2570.03/PSYO 2570.03, or PSYO 2770.03
CROSSLISTED: PSYO 3237.03
FORMATS: Lecture

NESC 3260 Biological Rhythms
CREDIT HOURS: 3
Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This course examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3260.03
FORMATS: Lecture

NESC 3264 The Science of Sleep
CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and either NESC 2470.03/PSYO 2470.03 or PSYO 2770.03; OR BIOL 2020.03

CROSSLISTED: PSYO 3264.03
FORMATS: Lecture

NESC 3270 Developmental Neuroscience
CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3270.03
FORMATS: Lecture

NESC 3370 Neuroscience Laboratory I
CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3370.03
FORMATS: Lab

NESC 3371 Neuroscience Laboratory II
CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3371.03
FORMATS: Lab

NESC 3440 Neuroanatomy
CREDIT HOURS: 3
This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate course ANAT 5100 Human Neuroanatomy. ORGANIZER: W. Baldridge
PREREQUISITES: BIOL 2020.03 or permission of the instructor
FORMATS: Lecture | Lab

NESC 3670 Genes, Brain and Behaviour
CREDIT HOURS: 3
The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, SCIE 1520X/Y.30 or SCIE 1540.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended
CROSSLISTED: PSYO 3670.03
EXCLUSIONS: NESC 2670.03/PSYO 2670.03
FORMATS: Lecture

NESC 3770 Behavioural Neuroscience
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3770.03
FORMATS: Lecture

NESC 3775 Behavioural Neuroscience Laboratory
CREDIT HOURS: 3
Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels. **SIGNATURE REQUIRED**
PREREQUISITES: PSYO 2000.03 or NESC 2007, NESC 2470.03/PSYO 2470.03 or PSYO 2770.03, PSYO 2501.03, and one of NESC 2160.03/PSYO 2160.03 or NESC 3237.03 /PSYO 3237.03 or NESC 3770.03/PSYO 3770.03, and instructor's consent
CROSSLISTED: PSYO 3775.03
FORMATS: Lab

NESC 3790 Neurolinguistics
CREDIT HOURS: 3
The course covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03

CROSSLISTED: PSYO 3790.03
FORMATS: Lecture

NESC 3970 Molecular Neuroscience
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: NESC 2570.03/PSYO 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: PSYO 3970.03
FORMATS: Lecture

NESC 4000 Senior Seminar
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program. **SIGNATURE REQUIRED**
COORDINATOR: L. Phillmore
CROSSLISTED: PSYO 4000.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
FORMATS: Seminar

NESC 4007 Contemporary Issues in Neuroscience
CREDIT HOURS: 3
This is a seminar course that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the department for the details about course content. **SIGNATURE REQUIRED**
PREREQUISITES: NESC Honours student, permission of the instructor.
FORMATS: Seminar

NESC 4050 Topics in Perception
CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: NESC 3051.03/PSYO 3051.03 or instructor's consent
CROSSLISTED: PSYO 4050.03
FORMATS: Seminar

NESC 4070 Chemical Neurobiology
CREDIT HOURS: 3
The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03, or instructor's consent
CROSSLISTED: NESC 5070.03
FORMATS: Seminar

NESC 4130 Topics in Cognition
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4130.03
FORMATS: Seminar

NESC 4140 Animal Learning Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CALENDAR NOTES: PSYO 2140.03/NESC 2140.03 recommended
CROSSLISTED: PSYO 4140.03
FORMATS: Seminar

NESC 4160 Topics in Behavioural Biology
CREDIT HOURS: 3
>b>SIGNATURE REQUIRED>/b>
CROSSLISTED: PSYO 4160.03
FORMATS: Seminar

NESC 4170 Topics in Behavioural Neuroendocrinology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4170.03
RESTRICTIONS: Restricted to NESC/PSYO Honours Students
FORMATS: Seminar

NESC 4177 Theoretical Neuroscience
CREDIT HOURS: 3
An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic

plasticity, network-level concepts such perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This course includes an introduction to MATLAB programming. **SIGNATURE REQUIRED**
PREREQUISITES: Intended for third- or fourth-year Neuroscience students.
FORMATS: Seminar

NESC 4185 Synaptic Function and Plasticity
CREDIT HOURS: 3
Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.
PREREQUISITES: NESC 2570/PHYL 2570 or permission of course instructors
CROSSLISTED: PHYL 4000.03
FORMATS: Seminar

NESC 4230 Human Performance Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4230.03
FORMATS: Seminar

NESC 4501 Honours Thesis I
CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4502.03 and no credit can be given for one course without the other. The work undertaken in NESC 4502.03 should be a continuation of that initiated in NESC 4501.03. A grade will be given for NESC 4501.03 only after NESC 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: PSYO 4501.03
RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.
EXCLUSIONS: NESC 4500.06
FORMATS: Lecture | Lab | Experiential Learning

NESC 4502 Honours Thesis II
CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4501.03 and no credit can be given for one course without the other. PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: PSYO 4502.03
RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.
EXCLUSIONS: NESC 4500.06
FORMATS: Lecture | Lab | Experiential Learning

NESC 4587 Topics in the History of Neuroscience
CREDIT HOURS: 3
This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour. This involves the examination of the theories, methods and experimental data which have attempted to link neural activity with thought and behaviour. Historical documents and web-based resources are used to examine original sources.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent
EXCLUSIONS: HSTC 4301.03
FORMATS: Seminar

NESC 4670 Behavioural Neuro(epi)genetics and Genomics
CREDIT HOURS: 3
This senior seminar course examines the primary scientific literature on the use of (epi)genetic techniques to study the molecular and cellular bases of behaviour. Transgenic-technology is discussed combined with recent advances in next-generation biological techniques (e.g., DNA/RNA methylome sequencing, optogenetics) and genome editing (e.g., CRISPR/Cas9) tools for investigation of neural circuits underlying brain function.
CALENDAR NOTES: Course aimed at NESC Honours students
RESTRICTIONS: NESC Honours student, Instructor permission required.
FORMATS: Seminar
LAB HOURS PER WEEK: 0

NESC 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as

hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, SCIE 4705
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

NESC 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**

Ocean Sciences

Location: Life Sciences Centre
Department of Oceanography
1355 Oxford Street
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3557

Fax: (902) 494-3877

Website: www.dal.ca/oceanography

Email: oceanography@dal.ca

Introduction
Ocean Sciences includes the study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, marine biodiversity, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at effective solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

Degree Programs
The Department of Oceanography offers the following degree programs in Ocean Sciences:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Ocean Sciences

* May be combined with Minor programs from other disciplines

NOTE: There is no 90 credit hour (3 year) degree program in Ocean Sciences.

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Ocean Sciences undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Ocean Sciences program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1540.27, MATH 1000.03/MATH 1010.03 and PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03
- SCIE 1505.18, Option A or B (MATH 1000.03/MATH 1010.03, PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03)

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department
Hill, P. S. (902) 494-1435

Undergraduate Advisor
Algar, C. (902) 494-7192

Graduate Studies Coordinator
Kienast, M. (902) 494-8338

Professors Emeriti
Bowen, A. J., MA (Cantab), PhD (Scripps), FRSC
Cullen, J. J., AB (California), PhD (Scripps), FRSC
Fournier, R. O., MSc (Wm & Mary), PhD (URI)
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)
Mills, E., BSc (CARL), MS, PhD (Yale), FLS
Moore, R. M., BA (Oxon), PhD (Southampton)

Professors
Fennel, K., MSc, PhD (Rostock)
Finkel, Z. V., BSc (Manitoba), MSc (Dalhousie), PhD (Rutgers)
Grant, J., BSc (Duke), PhD (South Carolina), NSERC - Cooke IRC
Hay, A., BSc, MSc (Western), PhD (UBC)
Hill, P. S., AB (Dartmouth), MSc, PhD (Wash)
Kelley, D., BSc (Mt. A), PhD (Dalhousie)
Kienast, M., BSc (Clausthal), MSc (Kiel), PhD (UBC)
MacIntyre, H. L., BA (Cambridge), MA (UT Austin), PhD (Delaware)
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie)
Sheng, J., BEng (East China Tech Univ), MSc, PhD (Memorial)
Taggart, C. T., BSc (Carleton), MSc (York), PhD (McGill)
Thomas, H., Diplom (Düesseldorf), PhD (Rostock)
Thompson, K. R., BSc, MSc (UManc), PhD (Liv), jointly with Mathematics and Statistics
Wallace, D. W., BSc (Univ of East Anglia), PhD (Dalhousie), Canada Excellence Research Chair (CERC)

Associate Professors
Kienast, S., MSc (Kiel), PhD (UBC)

Assistant Professors
Algar, C. K.,BSc (Laurentian), PhD (Dalhousie)
Barclay, D.,BSc (McGill), PhD (Scripps, Univ of California)
Buchwald, C., BSc (MIT), PhD (MIT/WHOI)
Musgrave, R., BSc (Melbourne), BSc (Hons) (Monash), PhD (Scripps)
Oliver, E., BSc (Acadia), MSc (Ottawa), PhD (Dalhousie)

Instructor
deGelleke, L., BS (Univ of Hawaii at Manoa), MSc (Dalhousie)

Adjunct (FGS)
Azetsu-Scott, K., BSc, MSc (Japan), PhD (Dalhousie)
Baumgartner, M., BSc (Notre Dame), MSc (Southern Mississippi), PhD (Oregon State)
Brillant, S., BSc, MSc (UNB), PhD (Univ of Sydney)
Brown, C., BSc (Univ Reading), PhD (Univ of Portsmouth)
Davies, K., BSc (UVic), PhD (Dalhousie)

BSc (120 credit hour) Concentrated Honours in Ocean Sciences

Students who want a challenging program that results in a broad and in-depth background in Ocean Sciences, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Ocean Sciences with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of OCEA 4201.03 and OCEA 4202.03.

Admission to Honours

Students considering Honours should consult with an Ocean Sciences Honours Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Concentrated Honours program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06): Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A "B+" average (3.3) must be attained in the following 2000, 3000, and 4000 level courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas.
- One additional six credit hours from any of the four Ocean Science areas.

- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography must be included in one of the preceding two requirements.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II
- OCEA 4201.03 and OCEA 4202.03: Honours Research

BSc (120 credit hour) Combined Honours in Ocean Sciences and another subject

Students who wish to study Ocean Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Ocean Sciences, this requirement is satisfied through OCEA 4201.03 and OCEA 4202.03.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Ocean Sciences and another subject must complete the following:

Ocean Sciences as the primary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 Physics In and Around You (or PHYC 1300.06)
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Conceptsin Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- Six credit hours selected from: OCEA 3002.03: Introduction to Chemical Oceanography, OCEA 4110.03: Geological Oceanography, OCEA 4140.03: Introduction to Biological Oceanography
- An additional nine credit hours from the Ocean Science areas. See Ocean Science Areas.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II
- OCEA 4201.03 and OCEA 4202.03: Honours Research

Ocean Sciences as the secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06)
- MATH 1000.03
- MATH 1060.03/STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, ERTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Sciences areas (18 credit hours total). See Ocean Sciences areas.
- OCEA 4000.03: Oceans and Global Change

BSc (120 credit hour) Major in Ocean Sciences

The 120 credit hour Major is suited to students who want to focus on Ocean Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Ocean Science Majors complete a minimum of 42 credit hours in OCEA courses. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06): Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II

BSc or BA (120 credit hour) Double Major in Ocean Sciences and another subject

The Double Major degree program allows students to combine a study of Ocean Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students must fulfill the requirements listed for the BSc (120 credit hour) Major in Ocean Sciences.

The Ocean Science course requirements for students in a Double Major program, with Ocean Sciences as the primary or secondary subject, are the same as for the Major program (above).

Minor in Ocean Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see Department of Oceanography course listings).

Contact Ocean Sciences for more information.

Ocean Science Areas
NOTE: Classes marked with an asterisk* are required in that area.

Physical Oceanography
OCEA 3001.03 and/or OCEA 4120.03*, OCEA 4210.03, OCEA 4220.03, OCEA 4222.03, OCEA 4311.03, OCEA 4411.03, OCEA 4412.03, OCEA 4505.03, OCEA 4520.03, OCEA 4541.03, OCEA 4550.03

Biological Oceanography
OCEA 3685.03, OCEA 4140.03*, OCEA 4160.03, OCEA 4230.03, OCEA 4330.03, OCEA 4335.03, OCEA 4370.03, OCEA 4380.03, OCEA 4665.03

Chemical Oceanography
OCEA 3002.03*, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Geological Oceanography Ocean Science Area, but not both), OCEA 4130.03, OCEA 4595.03

Geological Oceanography
OCEA 3004.03, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Chemical Oceanography Ocean Science Area, but not both), OCEA 4110.03*, OCEA 4115.03, OCEA 4470.03, OCEA 4480.03

See Oceanography section for course descriptions.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Ocean Sciences
Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc programs

Students in a BSc program in Ocean Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc in Ocean Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirementssection.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

OCEA 1001 Conversations with Ocean Scientists: Part I
CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001 and OCEA 1002 are completed in the same academic year
COREQUISITES: MATH 1000.03 or MATH 1215.03 or MATH 1060.03/STAT 1060.03
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 1002 Conversations with Ocean Scientists: Part II
CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001 and OCEA 1002 are completed in the same academic year
PREREQUISITES: OCEA 1001.03 (must have been taken in same academic year)
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 2001 The Blue Planet I
CREDIT HOURS: 3
This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea.
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2002 The Blue Planet II
CREDIT HOURS: 3
This course provides a general survey of biological oceanography. Students learn about marine biology and marine ecosystems. Consideration is also given to human impacts.
PREREQUISITES: OCEA 2001.03
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2020 Tools and Concepts in Ocean Sciences I
CREDIT HOURS: 3
Students gain practical insights into oceanographic concepts introduced in OCEA 2001.03/2002.03 through lab exercises. Labs focus on navigation and position, instruments and calibration, ocean optics and acoustics, water movement, and basic marine chemistry. Labs involve data acquisition and analyses to develop quantitative skills. Students will become familiar with the 'R' programming language.
COREQUISITES: OCEA 2001.03; or permission of instructor.
PREREQUISITES: MATH 1000.03; STAT 1060;03; PHYC 1190/1290.03 (or PHYC 1310.03/1320.03 or PHYC 1300.06); at least one of: CHEM 1011.03/1012.03, ERTH 1080.03/1090.03, or BIOL 1010/1011 or (BIOL 1020.03/1021.03); or permission of instructor.
FORMATS: Lab
LAB HOURS PER WEEK: 3

OCEA 2021 Tools and Concepts II
CREDIT HOURS: 3
Students gain practical insights into oceanographic concepts introduced in OCEA 2001/2002 through lab exercises. Labs focus on particle dynamics and life in the ocean and involve data acquisition and analysis to develop quantitative skills. At the end of the course, students observe a mesocosm to synthesize concepts from both OCEA 2020.03 and OCEA 2021.03. Students will continue to use the 'R' programming language.
COREQUISITES: OCEA 2002.03; or permission of instructor
PREREQUISITES: OCEA 2020.03
FORMATS: Lab
LAB HOURS PER WEEK: 3

OCEA 2800 Climate Change
CREDIT HOURS: 3
See course description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.
CROSSLISTED: PHYC 2800.03, GEOG 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

OCEA 3001 Introduction to Physical Oceanography
CREDIT HOURS: 3
This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.
PREREQUISITES: MATH 1000.03 or permission of Instructor
FORMATS: Lecture

OCEA 3002 Introduction to Chemical Oceanography
CREDIT HOURS: 3
This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 (or equivalent), OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor
EXCLUSIONS: OCEA 3170
FORMATS: Lecture

OCEA 3003 Introduction to Field Oceanography
CREDIT HOURS: 3
This course explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.

CALENDAR NOTES: The OCEA 3003 requirement could be waived in light of equivalent course workload at another institution.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)
CROSSLISTED: MARI 3003.03, BIOL 3003.03
FORMATS: Lecture

OCEA 3004 The Last Billion Years
CREDIT HOURS: 3
This course examines major events in Earth history. The geological and geochemical evidence will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop an understanding of the functioning of the earth/ocean/atmosphere system, how it has reacted to perturbations in the past and how it will react to current perturbations in the future.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or ERTH 1080.03
FORMATS: Lecture

OCEA 3420 Geochemistry of Aquatic Environments
CREDIT HOURS: 3
This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.
PREREQUISITES: CHEM 1011.03/1012.03 or equivalent and ERTH 1080.03/1090.03
CROSSLISTED: ERTH 3420.03
FORMATS: Lecture

OCEA 4000 Oceans and Global Change
CREDIT HOURS: 3
This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.
PREREQUISITES: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor
FORMATS: Lecture

OCEA 4110 Geological Oceanography
CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of past climates (2/3 of the course).
CALENDAR NOTES: Some training in calculus and statistics will prove to be advantageous to the student’s outcome.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), OCEA 2020.03, OCEA 2021.03, and ERTH 1080.03; or permission of instructor.
CROSSLISTED: OCEA 5110.03, ERTH 4110.03
FORMATS: Lecture

OCEA 4115 Micropaleontology and Global Change
CREDIT HOURS: 3
See course description for ERTH 4502 in the Earth Sciences section of this calendar.
CROSSLISTED: ERTH 4502.03

OCEA 4120 Physical Oceanography
CREDIT HOURS: 3
This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.
PREREQUISITES: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor
CROSSLISTED: OCEA 5120.03
RESTRICTIONS: Third- and fourth-year students only
FORMATS: Lecture

OCEA 4130 Chemical Oceanography
CREDIT HOURS: 3
This course covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), and OCEA 3002.03, or instructor's consent
CROSSLISTED: OCEA 5130.03
FORMATS: Lecture | Lab

OCEA 4140 Biological Oceanography
CREDIT HOURS: 3
The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.
CALENDAR NOTES: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in mathematics through calculus. Permission of instructor is required.

PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor
CROSSLISTED: OCEA 5140.03, BIOL 4661.03, 5661.03, MARI 4661.03
FORMATS: Lecture

OCEA 4160 Fisheries Oceanography
CREDIT HOURS: 3
Oceanographic influences on ecology of marine fish: on population dynamics, distribution, abundance, reproduction, life history, feeding, growth, metabolism, mortality, and recruitment. Emphasis on contemporary hypotheses and primary literature and some on fishery management. Primary-publication-style research paper required. Competence with fundamental population dynamics, ecology, physical oceanography, mathematics, and statistical analyses expected.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); BIOL 2060.03 or BIOL 3080.03 or equivalent; STAT 1060.03 or STAT 2080.03 or equivalent; or instructor's consent.
CROSSLISTED: BIOL 4369.03, MARI 4369.03, OCEA 5160.03
FORMATS: Lecture | Tutorial

OCEA 4201 Honours Research - Part I
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201 and OCEA 4202 are completed in consecutive terms. Partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.
EXCLUSIONS: OCEA 4200.06

OCEA 4202 Honours Research - Part II
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201 and OCEA 4202 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.
EXCLUSIONS: OCEA 4200.06

OCEA 4210 Time Series Analysis in Oceanography and Meteorology
CREDIT HOURS: 3
See course description for STAT 4390.03 in the Statistics section of this calendar.
PREREQUISITES: Instructor's consent
CROSSLISTED: STAT 4390.03
EXCLUSIONS: STAT 5390.03, OCEA 5210.03
FORMATS: Lecture

OCEA 4220 Numerical Modelling of Atmospheres and Oceans
CREDIT HOURS: 3
This course discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.
PREREQUISITES: 1000-level calculus course and instructor's consent
CROSSLISTED: OCEA 5220.03
FORMATS: Lecture

OCEA 4221 Ocean Dynamics
CREDIT HOURS: 3
An advanced course for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface forcing (steady and unsteady).
CROSSLISTED: OCEA 5221.03

OCEA 4222 Estuary, Coast and Shelf Dynamics
CREDIT HOURS: 3
This course discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, themohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.
PREREQUISITES: OCEA 4120.03
CROSSLISTED: OCEA 5222.03
FORMATS: Lecture

OCEA 4230 Biology of Phytoplankton
CREDIT HOURS: 3
This class presents the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.
PREREQUISITES: Instructor's consent

CROSSLISTED: BIOL 4662.03, OCEA 5230.03, MARI 4662.03
FORMATS: Lecture

OCEA 4250 Acoustical Oceanography
CREDIT HOURS: 3
This class covers the basic theory of sound propagation and scattering in the ocean environment, and the applications to acoustic remote sensing of the ocean interior. Topics include: normal modes; ray theory; scattering from particles, bubbles and biota; sonar theory and operation.
PREREQUISITES: MATH 2001.03 and 2002.03 or equivalent and instructor's consent
CROSSLISTED: OCEA 5250.03
FORMATS: Lecture

OCEA 4290 Advanced Chemical Oceanography
CREDIT HOURS: 3
This course presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic C02 system and its relation to climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.
PREREQUISITES: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this course.
CROSSLISTED: OCEA 5290.03
RESTRICTIONS: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

OCEA 4301 Special Topics in Ocean Science
CREDIT HOURS: 3
This course provides upper level undergraduate students with the opportunity to study an area of Ocean Science that is not offered through the existing curriculum. Students consult with a faculty member to arrange the topic of study and together develop course proposal. The course proposal must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: Instructors are regular faculty members in the Department of Oceanography and serve as supervisors of the Special Topics course. A maximum of 3 credit hours can be taken as a Special Topics course. The Special Topics course cannot replace one of the required core OCEA courses. The course coordinator is the Chair of the Curriculum Committee or designate. The student, with approval from the instructor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least two 3000-level OCEA course. An average grade of 'B' (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.
RESTRICTIONS: Material produced during a Special Topics course cannot fulfill the requirements for an Honours thesis. For additional restrictions, please see http://
EXCLUSIONS: E3
FORMATS: Other (explain in comments)

OCEA 4302 Independent Research in Ocean Science
CREDIT HOURS: 3
Students in their 3rd or 4th year of study conduct supervised, independent research in Ocean Science. The student and a faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. The course outline must be approved by the course coordinator before the student is permitted to register. The course coordinator is the Chair of the Curriculum Committee or designate.
CALENDAR NOTES: This course builds on field work, lab experiment(s) or measurements, literature meta-analysis, and/or modeling exercise(s). The course is to be started and completed within one term. Supervisors are regular faculty in the department of Oceanography who conduct research in an area related to the course. A maximum of 3 credit hours can be taken as an Independent Research course. The Independent Research course cannot replace one of the required core OCEA courses. The student, with approval from the supervisor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least one 3000-level OCEA course. An average grade of 'B' average (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.
RESTRICTIONS: Material prepared for an Independent Research course cannot be used in an Honours thesis. Students cannot take OCEA 4302.03 and the Honours course (OCEA 4201.03 and OCEA 4202.03) in the same academic year. For additional restrictions, please see http://
EXCLUSIONS: E2
FORMATS: Other (explain in comments)

OCEA 4311 Fluid Dynamics I
CREDIT HOURS: 3
An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.
PREREQUISITES: Intended for first-year graduate students in physical oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)
CROSSLISTED: PHYC 4311.03, PHYC 5311.03, OCEA 5311.03
FORMATS: Lecture

OCEA 4331 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03
FORMATS: Lecture

OCEA 4370 Deep Sea Biology
CREDIT HOURS: 3
We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.
PREREQUISITES: BIOL 2060.03 and OCEA 2000.06
CROSSLISTED: BIOL 4370.03, MARI 4370.03, OCEA 5370.03

OCEA 4380 Marine Modelling
CREDIT HOURS: 3
This course provides an overview of modelling techniques applied to biological and biogeochemical topics in oceanography, including the philosophy of modelling, population dynamics, linear and non-linear regression analysis, Principal Component Analysis, numerical approaches to solving differential equations, and visualization. All techniques are introduced with concrete examples and applied to specific problems.
PREREQUISITES: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; or permission of instructor.
CROSSLISTED: OCEA 5380.03
FORMATS: Lecture

OCEA 4401 Marine Management I
CREDIT HOURS: 3
This course exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)
RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4402 Marine Management II
CREDIT HOURS: 3
Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.6); OCEA 4401.03
RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4411 Atmospheric Dynamics I
CREDIT HOURS: 3
See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: OCEA 5411.03. PHYC 4411.03/5411.03

OCEA 4412 Atmospheric Dynamics II
CREDIT HOURS: 3
See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent
CROSSLISTED: OCEA 5412.03, PHYC 4412.03/ PHYC 5412.03

OCEA 4470 Introduction to Seismic Imaging
CREDIT HOURS: 3
See course description for ERTH 4470.03 in the Earth Sciences section of this calendar.
PREREQUISITES: ERTH 2270.03, or instructor's consent
CROSSLISTED: OCEA 5470.03, ERTH 4470.03/5470.03

OCEA 4480 Advanced Seismic Imaging
CREDIT HOURS: 3
See course description for ERTH 4480.03 in the Earth Sciences section of this calendar.
PREREQUISITES: ERTH 4470.03, or instructor's consent
CROSSLISTED: ERTH 4480.03, ERTH 5480.03, OCEA 5480.03

OCEA 4505 Atmospheric Physics
CREDIT HOURS: 3
See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.
CROSSLISTED: OCEA 5505, PHYC 4505/5505

OCEA 4520 Introduction to Atmospheric Science
CREDIT HOURS: 3
See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: OCEA 5520.03, PHYC 4520.03/5520.03

OCEA 4541 Synoptic Meteorology I
CREDIT HOURS: 3
See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.

COREQUISITES: OCEA 4411.03
PREREQUISITES: At least one third-year Physics course
CROSSLISTED: OCEA 5541.03, PHYC 4541.03/5541.03

OCEA 4550 Synoptic Meteorology II
CREDIT HOURS: 3
See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4541.03, or PHYC 4540
CROSSLISTED: OCEA 5550.03, PHYC 4550.03/5550.03

OCEA 4595 Atmospheric Chemistry
CREDIT HOURS: 3
See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03 and a first-year chemistry course
CROSSLISTED: OCEA 5595.03, PHYC 4595.03, PHYC 5595.03, CHEM 4595.03

OCEA 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization
CREDIT HOURS: 3
See course description for MARI 4665.03 in the Marine Biology section of this calendar.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: MARI 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

Introduction
How does the world work? What are the rules that govern how things happen? These are the questions that intrigue physicists who try to explain the great diversity of nature with the fewest and simplest hypotheses. They discover that there are underlying similarities between things that look very different on the surface. Good physicists have the imagination to see these similarities, coupled with the understanding of the fundamentals of their science to determine the rules that govern the universe. Our programs are designed to allow you to learn physics in a systematic manner and understand how physics applies to the world around us.

Physicists are employed in many areas in universities, government departments and industry and are valued for their ability to discover and apply fundamental insights to a variety of situations.

This intellectual rigor can be applied in many fields beyond physics including meteorology, engineering, education, law, medicine, dentistry, health sciences, and business. Because practicing physicists often have knowledge of several fields, we have a number of combined programs with other science disciplines to provide that broader approach.

Our Honours program is our most comprehensive program aimed at those intending to become career physics specialists. Our various major and combined programs described below provide the opportunity to pursue a broad education in both physics and other areas.

First Year Courses
PHYC 1451/PHYC 1452 are general interest courses for BA students and are not acceptable as a prerequisites for further courses in physics. PHYC 1190/PHYC 1290, and PHYC 1310/PHYC 1320 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190/PHYC 1290 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics courses. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that PHYC 1190/PHYC 1290 be taken consecutively, but PHYC 1190 is not a prerequisite for PHYC 1290.

PHYC 1310/PHYC 1320 is an introduction to physics that is oriented towards the health sciences and is primarily intended for students in biology, pre-medicine, pre-dentistry and allied health sciences. The course incorporates labs and tutorials, and is accepted as a prerequisite for advanced physics courses when MATH 1000.03 and MATH 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). Nova Scotia Grade XII Physics or its equivalent is highly recommended.

Students who are participating in the Integrated Science Program, and are interested in continuing in Physics, should consult the Undergraduate Advisor.

Second Year Courses
There are five 2nd year core physics courses (PHYC 2050, PHYC 2140, PHYC 2150, PHYC 2510, PHYC 2515). These courses are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

Third and Fourth Year Courses
Not all courses are offered each year. Students should take careful note of the year in which each of these courses is planned to be offered. This information can be found at the department website http://www.physics.dal.ca

Prizes are awarded to the top students in each year of the program. Please refer to Awards.

Degree Programs
The Department of Physics and Atmospheric Science offers the following degree programs in Physics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Major combined with a Diploma in Meteorology*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit) Minor in Physics
- Minor in Physics
- One year Diploma in Meteorology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Physics undergraduate academic advisor.

Staff

Dean
Moore, C. L., BA, PhD (Cantab)

Chair of Department and George Munro Professor
Rotermund, H. H. (902) 494-2342

Undergraduate Advisor/Coordinator, Diploma in Meteorology
Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Graduate Coordinator
Monchesky, T. (902) 494-3582 theodore.monchesky@dal.ca

Coordinator, Atmospheric Science
Martin, R. V. (902) 494-3915 randall.martin@dal.ca

Co-op Academic Advisor
Labrie, D. (902) 494-2322 daniel.labrie@dal.ca

Professors Emeriti
Drummond, J. R., BA, MA, PhD (Oxford), FRSC, Canada Research Chair, Remote Sounding of Atmospheres
Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Research
Jericho, M. H., BSc, MSc (Dalhousie), PhD (Cantab), FRSC
Kreuzer, H. J., MSc, DSc (Bonn), FRSC, A.C. Fales Professor of Theoretical Physics
Stroink, G., BSc, MSc (Delft), PhD (McGill), PEng

Professors Research
Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC, Research

Professors
Beyea, S., PhD (UNB), primary appointment with Diagnostic Radiology
Chapman, S. C., BSc, MSc, PhD (UBC)
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), FRSC, NSERC/3M Canada Inc. Industrial Research Chair, Canada Research Chair in Materials for Batteries and Fuel Cells, cross appointment with Chemistry

Hall, K. C., MSc, PhD (Toronto), Canada Research Chair, Ultrafast Science
Hewitt, K., BSc (Toronto), PhD (SFU), PPhys
Hill, I. G., BSc, PhD (Queen's)
Johnson, E.R. BSc (Carleton, PhD (Queen's)
Kreplak, L., MSc (Supelec), PhD (Univ Paris XI), cross appointment with Biomedical Engineering
Martin, R. V., BS (Cornell), MS, PhD (Harvard), Killam Professor, cross appointment with Environmental Programs, Chemistry
Monchesky, T., BASc (Toronto), PhD (SFU)
Robar, J., MSc (McGill), PhD (UBC), primary appointment with Radiation Oncology
Rotermund, H. H., PhD (Berlin), George Munro Professor of Physics
Rutenberg, A. D., BSc (Toronto), PhD (Princeton)
Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, primary appointment with Chemistry

Associate Professors
Duck, T., BSc, PhD (York)
Folkins, I., BSc (Dalhousie), MSc, PhD (Toronto)
Kyriakidis, J., BSc, MSc (Dalhousie), PhD (Basel)
Labrie, D., BSc (Montreal), MSc, PhD (McMaster)
Maksym, G. N., PhD (McGill), primary appointment in the School of Biomedical Engineering
Obrovac, M., PhD (Dalhousie), primary appointment in Chemistry

Assistant Professors
Bennett, P., PhD (UBC), St. Mary's
Brewer, K., PhD (Dalhousie)
Chang, R. Y. -W., BASc, MASc, PhD (Toronto), Canada Research Chair in Atmospheric Science
Cherpak, A., PhD (Carleton)
Chytyk-Praznik, K., PhD (Manitoba)
Hashmi, J., PhD (Toronto)
Lesins, G. B., PhD (Toronto)
Maassen, J., BEng, MASc (Ecole Polytechnique de Montreal), PhD (McGill)
Syme, A., PhD (Alberta)
Thomas, C., BSc (St. Mary's), MSc (Dalhousie), PhD (Western)
Yewondwossen, M., PhD (Dalhousie)

Senior Instructor
Payne, S. H., BSc, PhD (Canterbury)

Instructor
de Vet, S. J., MSc (Dalhousie), PhD (Western)

Adjunct Professors
Azzouz, M., PhD (J. F., France), Physics and Astronomy, Laurentian University
Bennett, J. C., PhD (Waterloo), Physics, Acadia
Bowen, C., BSc (St. FX), MSc (McMaster) PhD (Western), Institute for Biodiagnostics, NRC
Grabtchak, S., PhD (UPEI)
Hornidge, D., PhD (Saskatchewan) Physics, Mount Allison
Isaac, G., BSc, MSc, PhD (McGill)
Kanungo, R., PhD (Calcutta Univ), Astronomy and Physics, St. Mary's
Pierce, J., BS (Northeastern), PhD (Carnegic Mellon), Colorado State
Ritchie, H. C., MSc, PhD (McGill), Meteorological Service of Canada - Atlantic
Sarty, A., PhD (Saskatchewan) Astronomy and Physics, St. Mary's
Sham, E., BASc (UBC), MSc (McGill), PhD (McGill)
Titus, L., BSc (St. Mary's), DMet, MSc (Dalhousie)
***White, M. A**., BSc (Univ Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita)

*Retired

Postdoctoral Fellows/Research Associates
Chaubey, J., PhD (Kerala)
Cooper, M., PhD (Dalhousie)
Croft, B., PhD (Dalhousie)
Genovese, M., PhD (Toronto)
Hall, D., PhD (Ottawa)
McDuffie, E., PhD (Colorado)
Monfared, Y., PhD (Dalhousie)
Nagare, B., PhD (ETH Zurich)
Perro, C., PhD (Dalhousie)
Weagle. C., PhD (Dalhousie)
Xu, J., PhD (Dalhousie)

BSc or BA (120 credit hour) Concentrated Honours in Physics

Students who want a challenging program resulting in a broad and in-depth background in Physics, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in the Physics courses listed below with a minimum GPA of 3.0, and write a research-based Honours thesis. The thesis requirement is satisfied through completion of PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Physics.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Physics should consult with a Physics Undergraduate Advisor early in their second year.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03: Physics Tools: Theory/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2030.03: Matrix Theory and Linear Algebra I/PHYC 2050.03: Computer Simulation in Science

3000 and 4000 level

- PHYC 3000.03: Experimental Physics I/PHYC 3010.03: Experimental Physics II
- PHYC 3640.03: Quantum Physics I/PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3200.03: Thermodynamics/PHYC 3210.03: Statistical Mechanics
- MATH 3120.03: Differential Equations/PHYC 3100.03
- PHYC 4151.03: Quantum Physics II
- PHYC 4160.03: Mathematical Methods of Physics
- PHYC 4800.03/PHYC 4850.03: Honours Research Project
- An additional six credit hours of 3000 or 4000 level PHYC courses, other than PHYC 3160.03, PHYC 3170.03, PHYC 3330.03, PHYC 4540.03: Synoptic Meteorology I, PHYC 4550.03: Synoptic Meteorology II

* Up to 30 credit hours of general electives may be chosen from the Faculty of Engineering.

Honours Qualifying Exam

The Honours Qualifying Exam grade is the average of best ten grades obtained in 3000 and 4000 level Honours courses.

BSc or BA (120 credit hour) Combined Honours in Physics and another subject

Students who wish to study Physics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. In recent years, students have combined Physics with

- Mathematics
- Biology
- Earth Sciences
- Chemistry
- Computer Science
- History of Science and Technology
- Contemporary studies

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Physics, this requirement is satisfied through PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Physics and another subject must complete the courses listed below. Elective Physics courses should be chosen in consultation with a Physics undergraduate advisor. If courses are not selected carefully, students in a Combined Honours program may not be qualified to enter a regular graduate program in Physics after graduation.

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/ PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03: Physics Tools: Theory/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 15 credit hours in PHYC courses at or above the 3000 level

If Physics is the primary subject

- An additional six credit hours at or above the 3000 level, which may be PHYC 4800.03/PHYC 4850.03: Honours Research Project

BSc or BA (120 credit hour) Major in Physics

The 120 credit hour Major is suited to students who want to focus on *Physics*, but wish to have a program that is somewhat less constrained than the Honours program. Physics Majors complete a minimum of 42 credit hours in Physics courses past the 1000 level as listed below. Research and other experiential learning opportunities are available through laboratories, special topics and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Physics.

Departmental requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03: Physics Tools: Theory/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II

- PHYC 2050.03: Computer Simulation in Science
- Six additional physics credit hours at or above the 2000 level

3000 and 4000 level

- A minimum of 21 additional physics credit hours at or above the 3000 level

BSc (120 credit hour) Major in Physics combined with a Diploma in Meterology

This is an integrated Physics/Meteorology program. In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03: Physics Tools: Theory/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2030.03: Matrix Theory and Linear Algebra I/PHYC 2050.03: Computer Simulation in Science
- Three additional physics credit hours at or above the 2000 level

3000 level

- PHYC 3100.03 or PHYC 3210.03: Statistical Mechanics or PHYC 3250.03: Computational Methods in Physics or PHYC 3590.03: Advanced Classical Mechanics or PHYC 4311.03: Fluid Dynamics I
- PHYC 3200.03: Thermodynamics

4000 level: Meteorology course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03: Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

Students are encouraged to ensure that their program meets the requirements for the 90 credit hour BSc by the end of Year 3.

After completion of the Major in Physics and Diploma in Meteorology program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

BSc or BA (120 credit hour) Double Major in Physics and another subject

The Double Major degree program allows students to combine a study of Physics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Physics and another subject must complete the following:

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03: Physics Tools: Theory/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 15 credit hours in PHYC courses at or above the 3000 level

BSc or BA (90 credit hour) Minor in Physics

The 90 credit hour degree with Minor in Physics is appropriate for students who want to study some Physics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Physics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Physics is usually the preferred option for students who wish to combine studies in Physics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below). Students with a 90 credit hour BSc in Physics may also want to consider the one year Diploma in Meteorology program.

See the Minor in Physics section of this Calendar.

Diploma in Meteorology

Students with a general 90 credit hour BSc degree in Physics, Mathematics, Chemistry, or other quantitative disciplines, may apply for admission into a one year Diploma in Meteorology program, provided they have completed the appropriate Physics and Mathematics courses. A strong background in Physics and Mathematics is necessary, and courses taken should cover Vector Calculus and differential equations. More information on the Diploma in Meteorology program is available at http://atm.dal.ca/Diploma_in_meteorology/.

Course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03:Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

After completion of the Diploma program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher, to a maximum of 36 credit hours, not including Physics (PHYC) courses that do not count toward a 120 credit hour degree in Physics.

Contact Physics and Atmospheric Science for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Physics

Co-op Academic Advisor: Dr. D. Labrie (daniel.labrie@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Physics, or in Combined Honours or Double Major programs with Physics as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four month prior to the first work term.

Details are available from the Physics Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Physics, please see the departmental webpage www.dal.ca/academics/programs/undergraduate/pas/what_will_I_learn/coop_work_term.html.

Minors available to students in Physics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Physics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Physics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Physics include:

- Certificate in Information Technology
- Certificate in Materials Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

BEng/BSc (90 credit hour) concurrent degree (Physics)

This degree prepares students for research and development careers in a broad range of sectors such as materials engineering, optoelectronics and clean technologies. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Physics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Physics. A concurrent BEng/BSc Honours Physics program can be designed for interested candidates.

Graduate with Diploma in Engineering and BSc 90 credit Minor in Physics degree		
Year 4	Continue in BEng program	
Year 5	Complete BEng program	

[a] To meet the BSc 90 credit hour Minor in Physics requirements, students complete 30 credit hours in addition to their Engineering requirements: 18 credit hours of PHYC courses at or above the 2000 level (excluding any PHYC course that does not count toward a 120 credit hour degree in Physics), 6 credit hours of social science/humanities courses, and 6 credit hours of elective courses from Science or FASS (may be additional PHYC courses)

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements.

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] Selection of engineering electives depends on engineering discipline. See Engineering section of the calendar for details.

Notes:

- ENGM 2101 and 2022 fulfill the MATH 2001/2002 requirement for the Physics Minor
- ENGM 1081 fulfills the PHYC 2050 requirement for the Physics Minor

Geophysics
For students interested in Geophysics, two options are recommended:

- Combined Honours program in Physics and Earth Sciences,

OR

- Concentrated Honours in Physics
- Elective courses: ERTH 2270.03, ERTH 3270.03, ERTH 4470.03, ERTH 4480.03.

PHYC-Equivalent Courses
Other Dalhousie departments offer courses in one or more areas of Physics. Students enrolled in a 120 credit hour BSc or BA program in Physics may count any of the following courses toward their Physics program course requirements:

Please note that PHYC-equivalent courses will not count towards a minor program in Physics.

Any course cross-listed as a PHYC course	
Department	Courses
Electical and Computer Engineering	ECED 4350

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHYC 0010 University Prep Physics
CREDIT HOURS: 0
This course can be used as a prerequisite for PHYC 1100X/Y.06 and PHYC 1300X/Y.06. The course will develop problem-solving techniques in preparation for topics to be covered in PHYC 1100X/Y.06 and PHYC 1300X/Y.06. This course is offered by the College of Continuing Education. Students may register and pay for this course at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375. This course is offered in the Fall and Summer sessions only (see College of Continuing Education for more details http://collegeofcontinuinged.dal.ca).
PREREQUISITES: Grade 12 Pre-Calculus Math

PHYC 1190 Introduction to Physics
CREDIT HOURS: 3
This course concentrates on mechanics (forces and motion). Primarily for students interested in Physical Sciences and Engineering. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of 1190.03, 1280.03, or 1310.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PHYC 1290 Introduction To Physics
CREDIT HOURS: 3
This course concentrates on oscillations and waves, optics, electricity and magnetism. Primarily for students interested in Physical Sciences and Engineering. This course is required for all Engineering programs. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently.Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PHYC 1310 Physics in and Around You I
CREDIT HOURS: 3
This is an introduction to physics for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC1320, MATH 1000.03 and 1010.03. Basic concepts in mechanics, waves, sound and fluids are applied, where possible, to realistic biological models, e.g. forces and torques are related to muscles and joints.
CALENDAR NOTES: This course is not acceptable for the Engineering program
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03, 1280.03, 1300X/Y.06, or 1310.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PHYC 1320 Physics in and Around You II
CREDIT HOURS: 3
This is a continuation of the introduction to physics presented in PHYC 1310. Topics include optics, electricity, atomic and nuclear physics with applications to vision, cellular activity, imaging and radiation treatment. The course is designed for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC 1310, MATH 1000.03 and 1010.03.
CALENDAR NOTES: This course is not acceptable for the Engineering program.
PREREQUISITES: PHYC 1310.03 or PHYC 1190.03
EXCLUSIONS: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1290.03, 1300X/Y.06, or 1320.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PHYC 1451 Astronomy I: The Sky and Planets
CREDIT HOURS: 3
An introduction to solar system astronomy for non-science students. This course introduces students to the night sky, and particularly, to the Sun, Moon and planets and their apparent motions in the sky. Naked eye astronomy, the revolution in our understanding of the nature of the solar system, and the underlying laws of nature derived from this discovery, are key aspects of the course. The focus will be on the planets of our solar system, and their major satellites.
CALENDAR NOTES: BSc students may not take this course for credit
RESTRICTIONS: BSc students may not take this course for credit
EXCLUSIONS: PHYC 2451.03, PHYC 1450X/Y.06
FORMATS: Lecture

PHYC 1452 Astronomy II: Stellar & Galactic Astronomy
CREDIT HOURS: 3
This companion course to PHYC 1451 continues the exploration of the universe with an introduction to stellar and galactic astronomy, and cosmology for non-science students. Exoplanets – extrasolar planets recently discovered around other stars – will be discussed, followed by the Sun as a star. The formation, evolution, and death

of stars will be discussed. The hierarchy of structures of stars: star clusters, our own Milky Way Galaxy, the Local Group, and other clusters of galaxies making up the observable universe will be examined. The role of dark matter and dark energy, and the future of the universe will be studied.
CALENDAR NOTES: BSc students may not take this course for credit
PREREQUISITES: PHYC 1451.03
RESTRICTIONS: BSc students may not take this course for credit
EXCLUSIONS: PHYC 2452.03, PHYC 1450X/Y.06
FORMATS: Lecture

PHYC 1600 Understanding Weather
CREDIT HOURS: 3
The changing weather is a topic of almost universal interest. This course provides an introductory explanation for the basic processes that comprise the day to day weather changes in a non-mathematical way. Topics include weather maps and the wide range of atmospheric phenomena.
FORMATS: Lecture

PHYC 2050 Computer Simulations in Science
CREDIT HOURS: 3
Computer simulation plays an essential role in all fields of science. This class introduces techniques in computer simulation, including finite-difference calculations, Monte Carlo methods, and scientific visualization. A modern programming language and practical tools will be used. The course is suitable for students in Science, Computer Science and Engineering.
PREREQUISITES: PHYC 1190.03/PHYC 1290.03, MATH 1000.03/MATH 1010.03

PHYC 2140 Physics Tools: Theory
CREDIT HOURS: 3
The character of physical laws is most lucidly expressed in mathematical terms. The objective of this course is the acquisition of mathematical tools and gainful proficiency in their use. Topics will include complex numbers, partial derivatives, vector calculus, linear transformations and differential equations. Theorems and proofs will be kept to a minimum. Instead, lectures, homework and tutorials will be largely driven by example problems from a wide variety of physics fields. Text book: Boas, Mathematical Methods in the Physical Sciences.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06 and a 1000 level calculus class or permission from the instructor.
FORMATS: Lecture | Tutorial

PHYC 2150 Physics Tools: Experiment
CREDIT HOURS: 3
Introducing experimental tools and techniques within a theoretical framework, this course explores concepts in oscillations, waves, electricity and magnetism. The aim is to learn and apply techniques commonly used in Physics research. The following experimental tools and techniques are explored: Instrumentation; Fourier series; Data analysis; building AC and DC circuits; Detection and production of ultrasonic, acoustic, visible, microwaves; Mechanical systems. For example, the concept of resonance is applied to electronic (e.g. Radio), optical, acoustic (e.g. Music), mechanical and nuclear (e.g. MRI) systems in the lab. Textbook: An Introduction to Error Analysis, John R. Taylor.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1500X/Y.30 and a 1000-level calculus course, or permission of instructor
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

PHYC 2250 Physics of Biological and Medical Technology
CREDIT HOURS: 3
This course focuses on the nature of different forms of radiation and their interactions with living organisms. Particular attention is given to imaging techniques for the examination of internal organs, and the resulting effects of radiation. Topics may include ultrasound, nuclear medicine, X-ray tomography, magnetic resonance imaging, and exposure to ultraviolet and nuclear radiation.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06: MATH 1000.03/1010.03 or SCIE 1500X/Y.30, 1501X/Y.30, 1501X/Y.27, 1502X/Y.21 1503X/Y.21, 1504X/Y.27, or 1510X/Y.33 or permission of the instructor.
FORMATS: Lecture

PHYC 2310 Energy and the Environment
CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.
PREREQUISITES: PHYC 1190.03/1290.03 (or PHYC 1310/1320), CHEM 1011.03/1012.03, and MATH 1000.03 (or MATH 1215.03), or permission of the instructor.
CROSSLISTED: ENVS 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

PHYC 2451 Solar System Astronomy & the Night Sky
CREDIT HOURS: 3
An introduction to solar system astronomy and the night sky for science students. The historical development of astronomy, and celestial coordinate systems are discussed, with focus on the planets and satellites of our solar system. Planetarium sessions are included, as are opportunities to observe the night sky through small telescopes.
PREREQUISITES: A first year science course
EXCLUSIONS: PHYC 1451
FORMATS: Lecture

PHYC 2452 Stellar & Galactic Astrophysics
CREDIT HOURS: 3
This companion course to PHYC 2451 will serve as a general introduction to the astrophysics of stars and galaxies for science students. The basic properties of stars, star formation, stellar evolution, stellar populations, star clusters, and the late stages of stellar evolution will be discussed. The course will examine the interstellar medium, and galactic structure and evolution, and compact objects (neutron stars, black holes, quasars) at an introductory level. The role of dark matter and dark energy in the formation of the universe, and in establishing the present-day large scale structure of the universe will be reviewed.
PREREQUISITES: A first year science course, and one of MATH 1000, 1215, 1500, or 1280
EXCLUSIONS: PHYC 1452, PHYC 2450
FORMATS: Lecture

PHYC 2510 Electricity and Magnetism
CREDIT HOURS: 3
The course will develop the vector calculus needed for the description of electric and magnetic fields. Other topics include scalar and vector potentials, forces on charges, magnetic induction and Maxwell's equations. The course will give students the necessary foundation for an understanding of more advanced topics in electricity and magnetism.
PREREQUISITES: PHYC 2140.03, a multi-variable calculus course (MATH 2001.03/2002.03, which can be taken concurrently), or permission of the instructor
FORMATS: Lecture | Tutorial

PHYC 2515 Modern Physics
CREDIT HOURS: 3
This course introduces two physics revolutions: Einstein's theory of special relativity and the theory of quantum mechanics. Important early experiments are considered throughout the course. We consider length contraction, time dilation, and relativistic kinematics. Then, to account for wave-like properties of matter, we introduce complex wave functions in one-dimension and show how they lead to energy quantization, Schrodinger's equation, and penetration into classically forbidden regions. Other topics of modern physics, such as random walks (transport theory) may be introduced. A tutorial is offered.
PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300.06 or SCIE 1500.03, and a 1000 level calculus course
FORMATS: Lecture | Tutorial

PHYC 2610 Introduction to Biomechanics
CREDIT HOURS: 3
This course provides an introduction to mechanical and analytical concepts applied to the study of biological systems, particularly human movements and tissues. It expands on the knowledge acquired in PHYC 1310, the mechanics as it applies to the human body. It deals with the muscle forces required for the different tasks, the role of the centre of mass in balance and motion and the stresses and strains endured by the different biological tissues.The primary goal of the course is to learn to apply basic mechanical concepts to human movements.
PREREQUISITES: PHYC 1310.03 or PHYC 1190.03 or permission of the instructor
EXCLUSIONS: KINE 2465.03
FORMATS: Lecture

PHYC 2800 Climate Change
CREDIT HOURS: 3
The workings of the Earth's climate system are examined and then applied to help understand contemporary climate change. The role of numerical climate models is discussed with the aim of interpreting climate change predictions for the coming decades. Finally the impacts of climate change are studied with a focus on the various mitigation and adaptation strategies needed.
CROSSLISTED: GEOG 2800.03, OCEA 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

PHYC 2850 The Science and Economics of Climate Change
CREDIT HOURS: 6
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any first year science or math course or permission of the instructor.
CROSSLISTED: ECON 2850.03
EXCLUSIONS: PHYC 2800, ECON 2216
FORMATS: Lecture

PHYC 3000 Experimental Physics I
CREDIT HOURS: 3
This course introduces students to electronics and measuring techniques. Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics; R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays. The course also introduces students to modern data acquisition methods (including LabVIEW), skills which will be applied in the design and execution of experiments that illustrate fundamental concepts in physics. This course is open to Honours students only.
CALENDAR NOTES: This course has no final examination. Student evaluation is through performance on assignments and projects, and evaluation of written lab reports.
PREREQUISITES: PHYC 2150.03 and PHYC 2515.03, or permission of the instructor.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 6

PHYC 3010 Experimental Physics II
CREDIT HOURS: 3
Designed to give the students a chance to do non-set experiments and thereby encounter and solve the problems of experimentation. Original approaches by the students are encouraged. As the number of experiments is small (three) students should achieve a real understanding of a few physical phenomena. Lecture topics include data& analysis as encountered in the different areas of physics.

PREREQUISITES: PHYC 3000.03 with a minimum grade of B, or permission of the instructor
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 6

PHYC 3100 Electrodynamics
CREDIT HOURS: 3
Topics include electrostatics and magnestostatics, boundary value problems, fields in matter, time-dependent phenomena, Maxwell's equations, electromagnetic waves, radiation and special relativity.
PREREQUISITES: PHYC 2510.03, PHYC 2140.03
EXCLUSIONS: PHYC 4100.03
FORMATS: Lecture

PHYC 3180 Contemporary Physics
CREDIT HOURS: 3
This course covers a variety of current research topics in physics within a format that introduces students to the learning techniques used in research in academic or industrial settings. Through this course, students will: (i) learn how to read and digest current physics topics using the standard presentation in physics journals; (ii) develop skills required to communicate topics of current interest in physics to classmates through written summaries and oral presentations; and (iii) develop skills required for collaborative discussion to solve research problems.
PREREQUISITES: MATH 2001.03 and at least one of PHYC 2515.03 or PHYC 2150.03 or permission of the instructor
FORMATS: Lecture

PHYC 3200 Thermodynamics
CREDIT HOURS: 3
An introduction to the basic concepts and laws of thermodynamics. There will be a short survey of required Mathematics (partial derivatives). Topics include: thermometry, equations of state, energy and entropy, thermodynamic potentials, heat engines, thermodynamic efficiency and phase transitions.
PREREQUISITES: PHYC 2140.03, MATH 2001.03/2002.03, or permission of the instructor.
FORMATS: Lecture | Tutorial

PHYC 3210 Statistical Mechanics
CREDIT HOURS: 3
Using statistical entropy, we will explore how macroscopic thermodynamic behavior emerges from microscopic models. We will consider the microanonical, canonical, and the grand canonical statistical ensembles. We will examine two-state systems as well as non-interacting Fermionic and Bosonic systems. Finally, we will learn about deceptively simple interacting systems such as the Ising model.
PREREQUISITES: PHYC 3200.03 or equivalent; MATH 2001.03/2002.03

PHYC 3250 Computational Methods in Physics
CREDIT HOURS: 3
The objective of this course is to teach students the use of computers in physical analysis. The UNIX operating system will be introduced and used throughout the course. A modern programming language will be applied to a selection of problems drawn from physical theory and experiment. This is a hands-on, practical, and interactive class with an emphasis on the development of computational skills that scientists use.
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent, MATH 1010.03 or equivalent, PHYC 2050.03 or equivalent

PHYC 3303 Materials Science
CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course holds lectures together with CHEM 3305. CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and ERTH 2002.03)
EXCLUSIONS: CHEM 3305.03
FORMATS: Lecture

PHYC 3340 Electronics
CREDIT HOURS: 3
Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics: R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays.
CALENDAR NOTES: Credit cannot be given for both PHYC 3000.03 and PHYC 3340.03
PREREQUISITES: PHYC 2150.03; or ENGI 2001.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PHYC 3540 Optics and Photonics
CREDIT HOURS: 3
Topics in physical and geometrical optics will be covered. Selected applications will be presented in certain areas of photonics, including micro-optic sensors, semiconductor lasers and detectors, optical waveguides and fibres, optical signal processing and telecommunications.
PREREQUISITES: PHYC 2150.03 and PHYC 2510.03 or MATH 2002.03
FORMATS: Lecture

PHYC 3590 Advanced Classical Mechanics
CREDIT HOURS: 3
Topics include: central force motion, the principle of virtual work, Lagrange’s equations, the principle of least action, Hamilton’s equations, canonical transformations, Hamilton-Jacobi equation.

PREREQUISITES: PHYC 2140.03, MATH 2002.03
FORMATS: Lecture

PHYC 3640 Quantum Physics I
CREDIT HOURS: 3
This course introduces the formal structure of quantum mechanics as well as quantum mechanical calculations. The emphasis is on problem solving. The course starts with quantum measurement, then considers particles in a box and the quantum harmonic oscillator. The course starts with one-dimensional quantum mechanics and ends with higher dimensional problems. The course introduces quantum mechanical operators, time-evolution, quantum angular momentum, and the solution of the hydrogen atom.
PREREQUISITES: MATH 2002.03, MATH 2030.03, PHYC 2515.03 and PHYC 2140.03

PHYC 3810 Microcomputers and the Real World
CREDIT HOURS: 3
Subject material: measurement theory, modern sensors, microcomputer architecture, and software simulation of digital electronic circuits. Interfacing techniques including serial, parallel USB and GPIB ports. The graphical programming language is used throughout.
PREREQUISITES: PHYC 2150.03, PHYC 3340.03
CROSSLISTED: CSCI 3122.03
FORMATS: Lecture | Lab

PHYC 3900 Introduction to Soft Condensed Matter Physics
CREDIT HOURS: 3
The aim of this course is to provide an introduction to some concepts used in soft condensed matter physics through the study of three systems, polymers, colloids and liquid crystals.The course will be divided in four modules:I) Brownian dynamics and diffusionII) Polymers shape, molecular mass distribution, osmotic pressure, gel, entropic elasticityIII) Colloids: van der Waals and electrostatic interactions, Hamaker constant, DLVO theory, polymer layers (brushes), gel electrophoresisIV) Liquid crystals: order parameter, optical properties of nematics (birefringence), phase transitions, LCD
PREREQUISITES: MATH 2001.03, 2002.03: Intermediate Calculus I and II
FORMATS: Lecture

PHYC 4098 The Physical Cosmology
CREDIT HOURS: 3
The course is intended to provide a sound physical foundation to modern cosmology and the formation and evolution of the Universe. The course introduces the principles of geometrical and astrophysical cosmologh and emphasizes the direct confrontation of observational data with contemporary theories.
PREREQUISITES: PHYC 2515, PHYC 2140, or permission of instructor
FORMATS: Lecture

PHYC 4099 Stellar Structure and Evolution
CREDIT HOURS: 3
This course introduces consepts in stellar astronomy, building an understanding of stellar physics to probe the evolution of stars. Topics covered include stellar timescales, energe generation, and derivation of equations of stellar structure, evolution of stars from the pre-main sequence, through the main sequence hydrogen burning, and beyond.
PREREQUISITES: PHYC 2515, PHYC 2140, or permission of instructure
FORMATS: Lecture

PHYC 4151 Quantum Physics II
CREDIT HOURS: 3
This course builds on the concepts and theory of quantum mechanics presented in “Quantum Physics I” (PHYC 3640) by introducing additional topics of fundamental importance, including: spin, identical particles, time-independent perturbation theory, variational approach, WKB approximation, time-dependent perturbation theory, and scattering theory.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5151.03
FORMATS: Lecture

PHYC 4160 Mathematical Methods of Physics
CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 3120.03, PHYC 2140.03 or permission of instructor.
CROSSLISTED: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

PHYC 4180 Nuclear and Particle Physics
CREDIT HOURS: 3
This is an introductory course in nuclear physics. Topics discussed include: nucleon-nucleon interactions, nuclear structure, gamma transitions, alpha decay, beta decay, nuclear reactions and elementary particle physics, with applications to the interior of stars and the earlier universe.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5180.03
FORMATS: Lecture

PHYC 4230 Introduction to Solid State Physics
CREDIT HOURS: 3
An introduction to the basic concepts of solid state physics which are related to the periodic nature of the crystalline lattice. Topics include crystal structure, X-ray diffraction, phonons and lattice vibrations, the free electron theory of metals, energy bands, magnetism and superconductivity.
PREREQUISITES: PHYC 3640.03 and 3210.03 which may be taken concurrently, or permission of instructor

EXCLUSIONS: PHYC 5230.03
FORMATS: Lecture

PHYC 4250 Topics in Numerical Computing
CREDIT HOURS: 3
This class focuses on discrete and stochastic techniques of computational physics. Topics may include stochastic methods, global optimisation techniques, spectral methods, linear algebra, correlations, and computational modelling.
PREREQUISITES: PHYC 1280.03/1290.03 or equivalent, MATH 1010.03 / PHYC 2050 or equivalent
FORMATS: Lecture

PHYC 4311 Fluid Dynamics I
CREDIT HOURS: 3
An introduction to the theory of fluid dynamics with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics.
PREREQUISITES: Subject to instructor approval
CROSSLISTED: PHYC 5311.02, OCEA 4311.03/5311.01
FORMATS: Lecture

PHYC 4411 Atmospheric Dynamics I
CREDIT HOURS: 3
The basic laws of fluid dynamics are applied to studies of atmospheric motion, including the atmospheric boundary layer and synoptic scale weather disturbances (the familiar highs and lows on weather maps). Emphasis will be placed on the blend of mathematical theory and physical reasoning which leads to the best understanding of the dominant physical mechanisms.
PREREQUISITES: PHYC 2140.03 or permission of the instructor
CROSSLISTED: PHYC 5411.03, OCEA 4411.03/5411.03.
FORMATS: Lecture

PHYC 4412 Atmospheric Dynamics II
CREDIT HOURS: 3
The approach is the same as for PHYC 4411.03, with emphasis on synoptic-scale wave phenomena, frontal motions and the global circulation. Additional topics including tropical meteorology, middle atmospheric dynamics, severe storms, mesoscale meteorology and numerical weather prediction may be included.
PREREQUISITES: PHYC 4411.03 or permission of the instructor.
CROSSLISTED: PHYC 5412.03, OCEA 4412.03/5412.03
FORMATS: Lecture

PHYC 4460 Advanced Optics
CREDIT HOURS: 3
This class covers a selection of topics in advanced optics, that may include: a quantum treatment of light-matter interactions, strong field effects, quantum optics, nonlinear optics, optical resonators, laser physics, laser dynamics, and photonic devices.
PREREQUISITES: PHYC 3540.03 and PHYC 3640.03
CROSSLISTED: PHYC 5460.03
FORMATS: Lecture

PHYC 4505 Atmospheric Physics
CREDIT HOURS: 3
Moist thermodynamics is applied to a variety of atmospheric phenomeon. These include aerosols, cloud droplets, precipitation formation, convection, supercells, hurricanes, lightning, and the boundary layer. We also discuss the radar equation and the interpretation of radar images.
PREREQUISITES: PHYC 2140 and PHYC 4520, or permission of the instructor
CROSSLISTED: PHYC 5505, OCEA 4505/5505
FORMATS: Lecture

PHYC 4520 Introduction to Atmospheric Science
CREDIT HOURS: 3
The general overview of the atmosphere provides the student with an understanding of the composition and thermal structure of the atmosphere, air mass and frontal theory and weather generating physical processes and their consequences. Other topics include atmospheric radiation, dynamic meteorology, climatology and the physics of clouds and storms.
PREREQUISITES: PHYC 2140.03 or permission of instructor
CROSSLISTED: PHYC 5520.03, OCEA 4520.03/5520.03
FORMATS: Lecture

PHYC 4540 Synoptic Meteorology I
CREDIT HOURS: 3
This course introduces the practical skills of meteorological observation and analysis. Emphasis is on developing skills in drawing and interpreting weather maps, and on studying the three-dimensional structure of weather systems. Satellite and radar remote sensing of the atmosphere is also introduced. Case studies of atmospheric systems and processes are carried out during the tutorial-laboratory period.
COREQUISITES: PHYC 4411.03
PREREQUISITES: At least one third-year physics course
CROSSLISTED: PHYC 5540.03,OCEA 4541.03/5541.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4550 Synoptic Meteorology II
CREDIT HOURS: 3
This course extends the analysis and diagnosis of atmospheric dynamics and weather processes introduced in PHYC 4540.03. Emphasis is on the practical application of meteorological theory, particularly in the area of diagnosing the cases of weather events. Modern computer and statistical methods are discussed, and students receive an introduction to weather forecasting.
PREREQUISITES: PHYC 4540.03
CROSSLISTED: PHYC 5550.03, OCEA 4550.03/5550.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4570 Light Scattering, Radiative Transfer, and Remote Sensing
CREDIT HOURS: 3
The equations of radiative transfer through the atmosphere will be developed and used. Special topics include transfer of infrared radiation. Mie scattering, absorption by atmospheric gases and aerosols, transfer through clear and cloudy atmospheres. Also remote sensing techniques and radiative transfer models are covered.
PREREQUISITES: PHYC 2140.03, PHYC 2510.03
CROSSLISTED: PHYC 5570.03, OCEA 5570.03
FORMATS: Lecture

PHYC 4595 Atmospheric Chemistry
CREDIT HOURS: 3
A fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Climate and the greenhouse effect. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.
PREREQUISITES: MATH 1000.03, PHYC 1190.03/1290.03 (or PHYC 1310.03/1320.03 or 1300.06) and CHEM 1011.03/1012.03
CROSSLISTED: PHYC 5595.03, CHEM 4595.03, OCEA 4595.03/5595.03
FORMATS: Lecture

PHYC 4650 General Relativity
CREDIT HOURS: 3
A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzchild solution, gravitational collapse, black holes, and cosmology.
PREREQUISITES: MATH 3045.03 or permission of the instructor
CROSSLISTED: PHYC 5650.03, MATH 4650.03/5650.03
FORMATS: Lecture

PHYC 4660 Cosmology
CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modeling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: PHYC 5660.03, MATH 4410.03/5410.03
FORMATS: Lecture

PHYC 4800 Honours Research Project I
CREDIT HOURS: 3
Students in the honours stream in Physics and Atmospheric Science will do a research project under the direction of a faculty member. A research plan, interim progress reports and a formal final report are required. The final grade will be based on an evaluation of the reports and an oral presentation. Students in the major stream can apply to the department to take this course.
PREREQUISITES: PHYC 3010 and permission of the coordinator and supervisor.

PHYC 4850 Honours Research Project II
CREDIT HOURS: 3
Students in the honors stream will do a second research project or continue the project started in PHYC 4800 under the direction of a faculty member. A research plan, interim progress reports and a formal, final report are required. The final grade will be based on an evaluation of the reports and an oral presentation.
PREREQUISITES: PHYC 4800 and permission of the coordinator and supervisor.

PHYC 8891 Co-op Work-Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.00

PHYC 8892 Co-op Work-Term II
CREDIT HOURS: 0

PHYC 8893 Co-op Work-Term III
CREDIT HOURS: 0

PHYC 8894 Co-op Work-Term IV
CREDIT HOURS: 0

Staff

Dean
Moore, C. L., BA, PhD (Cantab)

Chairperson of Department
Perrot, T. S., BSc, PhD (Western)

Academic Advisors
To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

Professors Emeriti
Klein, R. M., BA (SUNY), MA, PhD (Oregon)
LoLordo, V. M., AB (Brown), PhD (Penn)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

Professors
Adamo, S., BSc (Toronto), PhD (McGill)
Barrett, S. P., BA (St. FX), PhD (McGill)
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Deacon, S. H., BSc (UPEI), PhD (Oxon), Faculty of Science Killam Professor in Psychology
Duffy, K., BA (St. Thomas), PhD (McMaster)
Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry
Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia
Kay-Raining Bird, E., BA (Queen's), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders
Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews), University Research Professor
Moore, C. L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC, joint appointment in Psychiatry
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan), Clinical PhD Program Director of Training
Smith, I. M.,BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors
Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry
Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy
Crowder, N. A., BSc, PhD (Alberta)
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria)
Phillmore, L., BA (UWO), MA, PhD (Queen's), Undergraduate Program Coordinator
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance

Rosen, N. O., BA (Queen's), PhD (McGill)
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry

Assistant Professors
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in the School of Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Lee-Bagley, D., BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), joint appointment in Psychiatry

University Teaching Fellows
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)

Senior Instructors
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Ply, E., BS Education (Univ of N Texas), MA, PhD (Texas Women's Univ)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie)

Instructors
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)

Adjunct Professors
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Church, E., BA (St. John's), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Cohen, A., BA (McGill), MA, PhD (Queen's), Psychology/University of Prince Edward Island
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Day. A., BA (Manitoba), MSc, PhD (Waterloo),Psychology/Saint Mary's
Ellsworth, C., BA (McMaster), MA, PhD (Queen's), Psychology/IWK Health Centre
Flanagan, H., BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary's
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
LoLordo, V. M., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
O'Neill, P., MSc, PhD (Yale), Professor Emeritus/Acadia
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Rodger, R. S., MA (Edin), PhD (Queen's, Belfast)
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychologie/Univ. de Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Smith, S. M., BA (Bishop's), MA, PhD (Queen's), Psychology/Saint Mary's
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier

Postdoctoral Fellows
Al-Hamdani, M., PhD (SMU)
Corsini-Munt, S., PhD (Montréal)
Dawson, S., PhD (Queen's)
Ferguson, L., PhD (Western)
Gaililee, A., PhD (Birmingham)
Levesque, K., PhD (Dalhousie)
Miyashita, A., PhD (Tokyo)
Nogueria-Argoria, R., PhD (Univ. Malaga)
Romero-Sanchiz, P., PhD (Univ. Malaga)
Ryan, K., PhD (Dalhousie)

Introduction
Psychology is an experimental science: Its purpose is to discover the conditions that control the activities of animals and people, to measure these conditions and the responses they produce, and to use this knowledge to predict and change behaviour. It is a subject for inventive but also scientifically rigorous people, better suited to those who want to find out for themselves than to those who want to be told what to believe.

Psychology at Dalhousie treats behaviour as a natural phenomenon, and in that sense shares much with the other life sciences. The boundaries that historically separated psychology from zoology, physiology, and cellular biology are blurred. As well, important ties are being made to such disciplines as anthropology, sociology, and philosophy. The student will find that the diverse subject matter includes three major levels of analysis: the organism, the organism's biological machinery, and the broader social-environmental context in which particular behaviour patterns are expressed. Meaningful integration of these diverse levels and forms of analysis is an intellectual challenge of major proportions. Similarly, the time perspectives of immediate causation, development, evolution, and function all contribute to the modern approach to behavioural science and each must be evaluated in relation to the others.

A. Enrolment Limitations

Psychology is a popular program, and we have a high enrolment of students. Potential Major and Honours students, and those intending to enrol in the 90 credit hour BA or BSc Minor program in Psychology should note that there are limitations on the number of students that can be accepted into these programs in any given year. Passing introductory psychology courses with the required grade of B- and declaring an intent to Major in Psychology does not guarantee a place in any of these programs. Students are advised to register as early as possible for required courses to secure a space within a program.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students, and those enrolled in a 90 credit hour program, should review carefully program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Psychology may enrol in PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology courses, or a B- in the psychology component of the Integrated Science Program, to be permitted to register in any second-year course in Psychology.

C. Laboratories

Psychology laboratories typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (PSYO 2000.03) and at least one third-year research laboratory course (six credit hours for Honours students).

Degree Programs
The Department of Psychology and Neuroscience offers the following degree programs in Psychology:

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Psychology
- Minor in Psychology

* May be combined with Minor programs from other disciplines (except Neuroscience).

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Psychology undergraduate academic advisor.

A detailed description of the Psychology programs is available in a pamphlet titled "A Student's Guide to Psychology Classes". The pamphlet is available from the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263) and online from the Department's website (www.dal.ca/psychandneuro).

BSc or BA (120 credit hour) Concentrated Honours in Psychology

Students who want a challenging program resulting in a broad background in Psychology, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Psychology with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of PSYO 4501.03 and PSYO 4502.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enrol in Honours in Psychology should consult with an Honours Advisor. Students may not apply for Honours before January of their third year of studies. A detailed description of the Honours application process can be found on the departmental website www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B or better in PSYO 2000.03: Methods in Experimental Psychology
- A minimum of A- or better in the most recently completed:
    - 18 credit hours of PSYO courses (for admission in January of 3rd year)
      OR
    - 27 credit hours of PSYO courses (for admission at end of 3rd year)

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Concentrated Honours program in Psychology must complete the following:

1000 level

Introduction to Psychology and Neuroscience I and II (six credit hours)

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03)with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology (with grade of B or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)
- Three courses selected from:
  PSYO 2080.03: Social Psychology
  PSYO 2090.03: Developmental Psychology
  PSYO 2130.03: Introduction to Cognitive Psychology
  PSYO 2140.03: Learning
  PSYO 2150.03: Perceptual Processes
  PSYO 2160.03: Animal Behaviour
  PSYO 2220.03: Abnormal Behaviour
  PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

- PSYO 3502.03: Statistical Methods II **(must be taken in third year)**
- An additional 15 credit hours of which a minimum of 6 credit hours must be designated LAB courses

Students are encouraged to also take PSYO 3100.03 and PSYO 3101: Independent Research in Psychology I and II or PSYO 3001.03: Directed Project in Psychology as preparation for their thesis work in fourth year.

4000 level

- PSYO 4501.03 and PSYO 4502.03.: Honours Thesis and Qualifying Exam
- Six credit hours of 4000-level seminar courses
- Six additional credit hours of 3000- or 4000-level courses

Other regulations

- Students in the Honours program should find a thesis supervisor and begin the preparation for their Honours research (reading, learning laboratory methodology, submitting ethics forms) no later than the summer preceding their thesis year.
- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc or BA (120 credit hour) Combined Honours in Psychology and another subject

Students who wish to study Psychology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Psychology may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Psychology, this requirement is satisfied through PSYO 4501.03 and PSYO 4502.03..

Departmental requirements

All students must fulfill the requirements outlined in theAcademic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Combined Honours program in Psychology and another subject must complete the following program requirements:

Psychology as the **primary** subject

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours):
- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology (with grade of B or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)
- An additional 9 credit hours at the 2000 level

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level

- PSYO 3502.03: Statistical Methods II **(must be taken in third year)**
- Six credit hours in 3000 level LAB courses
- An additional six credit hours in 3000 level PSYO courses

4000 level

- PSYO 4501.03 and PSYO 4502.03.: Honours Thesis and Qualifying Exam
- Six credit hours of 4000-level seminar courses

Other regulations

- Students in the Honours program should find a thesis supervisor and begin the preparation for their Honours research (reading, learning laboratory methodology, submitting ethics forms) no later than the summer preceding their thesis year.
- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

Psychology as the **secondary** subject

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours):
- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology (with grade of B or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)
- An additional 9 credit hours at the 2000 level

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

- Three credit hours in 3000 level LAB courses
- An additional 15 credit hours in 3000/4000 level PSYO courses

BSc or BA (120 credit hour) Major in Psychology

The 120 credit hour Major is suited to students who want to focus on Psychology, but wish to have a program that is somewhat less constrained than the Honours program. Psychology Majors complete a minimum of 42 credit hours in Psychology courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes.

Students should plan carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or (902) 494-3417) or by visiting the department's website.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Major program in Psychology must complete the following courses:

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours)
- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)
- Three courses selected from:
  PSYO 2080.03: Social Psychology
  PSYO 2090.03: Developmental Psychology
  PSYO 2130.03: Introduction to Cognitive Psychology
  PSYO 2140.03: Learning
  PSYO 2150.03: Perceptual Processes
  PSYO 2160.03: Animal Behaviour
  PSYO 2220.03: Abnormal Behaviour
  PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

- A minimum of 24 credit hours at or above the 3000 level, which must include a minimum of three credit hours of a laboratory (LAB) course.

BSc or BA (120 credit hour) Double Major in Psychology and another subject

The Double Major degree program allows students to combine a study of Psychology with another subject. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. A Double Major in Psychology requires 30 credit hours beyond the 1000 level. Psychology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Double Major program in Psychology and another subject must complete the following:

Psychology as the **primary** or **secondary** subject

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours)
- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1505.18: Integrated Science Program, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)
- Three additional second-year courses selected from:
- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Abnormal Behaviour
- PSYO 2570.03: Cellular Neuroscience

  Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level

- Three credit hours of a 3000 level LAB course
- An additional 15 credit hours at the 3000/4000 level in Psychology

BSc or BA (90 credit hour) Minor in Psychology

The 90 credit hour degree with a Minor in Psychology is appropriate for students who want to study some Psychology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general Science degree with some specialization in Psychology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Psychology is usually the preferred option for students who wish to combine studies in Psychology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below).

See the Minor in Psychology section of this Calendar.

Minor in Psychology
This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is also available.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I, which are restricted to students in a Major/Honours program

Please note that entry into upper level Psychology (PSYO) courses requires completion of six credit hours, with a minimum grade of B-, at the first year level:

Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03)

and

Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03)

or SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent.

Contact Psychology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Psychology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Psychology may choose to include a Minor selected from the list of approved Minors (except Neuroscience). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Psychology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Psychology include:

- Certificate in Animal Behaviour (Biology, Psychology and Neuroscience)
- Certificate in Science Leadership and Communication
- Certificate in Neurotechnology

BSc/BEng or BA/BEng Concurrent Program
Students interested in combining their interest in Psychology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Psychology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Psychology and from the Faculty of Engineering in their first year of study.

Required Psychology courses for a BSc/BEng or BA/BEng program in Psychology

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours):
- PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 (with grade of B- or better)
- PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 (with grade of B- or better)
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent.
- A minimum of 18 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03 and PSYO 2501.03, which are restricted to students in the Major and Honours programs

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

Students going on in Psychology are recommended to take Introduction to Psychology I and II courses with the lab component.

4000-Level Seminars

These seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. Courses offered and the topics covered vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

PSYO 1011 Introduction to Psychology and Neuroscience I: From Neuron to Person
CREDIT HOURS: 3
Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03). COORDINATOR: L. Stevens
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1021.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03
FORMATS: Lecture | Lab

PSYO 1012 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
CREDIT HOURS: 3
This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) COORDINATOR: L. Stevens
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03
FORMATS: Lecture | Lab

PSYO 1021 Introduction to Psychology and Neuroscience I: From Neuron to Person
CREDIT HOURS: 3
Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03
FORMATS: Lecture

PSYO 1022 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
CREDIT HOURS: 3
This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture

PSYO 1031 Introduction to Psychology and Neuroscience I: From Neuron to Person
CREDIT HOURS: 3
PSYO 1031 is the online distance education equivalent of PSYO 1011. Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. Recorded lectures, lab activities and write-ups, quizzes, and class discussions will be delivered through the University's learning management system.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1021.03, SCIE 1500X/Y.30 SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03
FORMATS: Online Delivery

PSYO 1032 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
CREDIT HOURS: 3
PSYO 1032 is the online distance education equivalent of PSYO 1012. Material covered includes psychological development, problem solving, reasoning, intellegence, motivation and emotion, social behaviour, personality, health psychology, psychological disorders, and treatment. Recorded lectures, lab activities and write-ups, quizzes, and discussion will be delivered through the University's learning management system.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1022.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03
FORMATS: Online Delivery

PSYO 2000 Methods in Experimental Psychology
CREDIT HOURS: 3
The course provides a thorough grounding in scientific research methods used by psychologists. Lectures explore analytic procedures commonly employed to investigate human and animal behaviour. Students conduct and analyze in written reports a series of experiments in the laboratory to illustrate important concepts discussed in class.
CALENDAR NOTES: Restricted to students registered in Psychology or Neuroscience programs. It is highly recommended that students take PSYO 2501.03, Statistical Methods I, concurrently with PSYO 2000.03. Students must attend the first lecture session.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
EXCLUSIONS: NESC 2007.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

PSYO 2080 Social Psychology
CREDIT HOURS: 3
The course undertakes a critical analysis of social theory and research promoting a close and skeptical evaluation of our knowledge, our obedience and rebellion, our affections and hostilities, our willingness to help and injure, our attempts to explain ourselves and others, our erotic orientations, and our gender roles.
PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2090 Developmental Psychology
CREDIT HOURS: 3
People change with age. This course examines the changes that occur in humans from conception through adolescence. Biological, social, cognitive, and linguistic aspects of development are considered. Theory, research, and practical implications are integrated throughout the course.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2130 Introduction to Cognitive Psychology
CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2130.03
FORMATS: Lecture

PSYO 2140 Learning
CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2140.03
FORMATS: Lecture

PSYO 2150 Perceptual Processes
CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) with a grade of B- or better, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03
CROSSLISTED: NESC 2150.03
EXCLUSIONS: PSYO 3005.03/NESC 3005.03
FORMATS: Lecture

PSYO 2160 Animal Behaviour
CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) each with a grade of B- or better, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03
CROSSLISTED: NESC 2160.03
FORMATS: Lecture

PSYO 2220 Abnormal Behaviour
CREDIT HOURS: 3
This course involves the study of a broad range of manifestations of abnormal behaviour in adults (e.g., anxiety disorders, substance abuse/dependence, schizophrenia, affective disorders, personality disorders). Causes of abnormal behaviour and the scientific techniques developed to better understand and intervene with various forms of behavioural dysfunction are appraised.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2470 Systems Neuroscience
CREDIT HOURS: 3
This course provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).
CALENDAR NOTES: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: NESC 2470.03
EXCLUSIONS: PHYL 2041.03, PSYO 2770.03
FORMATS: Lecture

PSYO 2501 Statistical Methods I
CREDIT HOURS: 3
This course provides an introduction to research design and statistics within Neuroscience and Psychology. Particular emphasis is placed on conducting and interpreting various statistical procedures, including descriptive and inferential statistics (z-test, t-test, ANOVA, chi-square tests), frequently used in these fields.
CALENDAR NOTES: Only students undertaking a Major or Honours degree in Psychology or Neuroscience are eligible for enrolment. This course does not fulfil any part of the Faculty of Science Mathematics requirement.
COREQUISITES: PSYO 2000.03 or NESC 2007.03 or instructor’s consent
EXCLUSIONS: PSYO 3501.03
FORMATS: Lecture

PSYO 2570 Cellular Neuroscience
CREDIT HOURS: 3
This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: NESC 2570.03, PHYL 2570.03
FORMATS: Lecture

PSYO 3001 Directed Project in Psychology
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. **SIGNATURE REQUIRED**
COORDINATOR: L. Phillmore
CALENDAR NOTES: This course provides only a half-year research experience. Students wanting a full-year research experience in a lab should register for PSYO

3000X/Y.06.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: NESC 3001.03
EXCLUSIONS: PSYO 3000X/Y.06/NESC 3000X/Y.06
FORMATS: Lab
LAB HOURS PER WEEK: 4

PSYO 3011 Experiential Learning in Science Communication I
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011 and PSYO1012 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3012.03 and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: B+ or better in PSYO 2000 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor's consent.
CROSSLISTED: NESC 3011.03
EXCLUSIONS: NESC 3010.06
FORMATS: Lecture | Lab | Seminar
LAB HOURS PER WEEK: 1

PSYO 3012 Experiential Learning in Science Communication II
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011 and PSYO1012 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken after, and in conjunction with, PSYO 3011 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: PSYO 3011.03
CROSSLISTED: NESC 3012.03
EXCLUSIONS: PSYO 3010.06
FORMATS: Lecture | Lab | Seminar
LAB HOURS PER WEEK: 1

PSYO 3030 Psychometrics
CREDIT HOURS: 3
This course focuses on the theory and method of psychological measurement. Basic and advanced analytic methods employed in quantifying human abilities, traits, and syndromes are examined. Students contribute to the design of, and report on, a new measure of behaviour in the laboratory component of the course.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03
FORMATS: Lecture | Lab

PSYO 3043 Neurobiology of Learning
CREDIT HOURS: 3
This course examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03
CROSSLISTED: NESC 3043.03
EXCLUSIONS: PSYO 3041.03
FORMATS: Lecture

PSYO 3044 Laboratory Methods of Learning and Conditioning
CREDIT HOURS: 3
A hands-on course on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.
CALENDAR NOTES: Students should be aware that some data collection occurs outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and one of PSYO 2140.03/NESC 2140.03 or PSYO 2470.03/NESC 2470.03 or PSYO 2770.03
CROSSLISTED: NESC 3044.03
EXCLUSIONS: PSYO 3042.03
FORMATS: Lab

PSYO 3051 Sensory Neuroscience I Vision
CREDIT HOURS: 3
This course examines the neural basis for the perception of light, colour, movement, depth, and form. The course covers developmental events important for vision, and the extent to which vision is constrained by anatomical and physiological development.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2470.03/NESC 2470.03 or PSYO 2770.03, and PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3051.03
FORMATS: Lecture | Lab

PSYO 3052 Sensory Neuroscience II Hearing and Speech
CREDIT HOURS: 3
This course explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2470.03/NESC 2470.03
CROSSLISTED: NESC 3052.03
FORMATS: Lecture

PSYO 3082 Experimental Social Psychology
CREDIT HOURS: 3
This course attempts to develop students' skill level in empirical analysis of social psychology phenomena. Students complete two research projects during the term. The projects involve testing subjects, coding data, computer data analysis, and report writing. Familiarity with computer-based statistical analysis and text processing is strongly recommended.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2080.03
FORMATS: Lecture | Lab

PSYO 3084 Social Cognition
CREDIT HOURS: 3
This course focuses on the understanding people develop of themselves and others as social beings. The contributions of evolution, historical, and cultural factors are considered. The ways in which human development of social perception and cognition differs from that of other species are also examined.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03
FORMATS: Lecture

PSYO 3091 Methods in Developmental Psychology
CREDIT HOURS: 3
This course provides a survey of research methods in developmental psychology. It assumes knowledge of basic methodology and design, and concentrates on methods of relevance to the study of human development. In addition to lectures, students conduct a number of research exercises to gain experience in conducting research with children.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2090.03
FORMATS: Lecture | Lab

PSYO 3092 Early Development
CREDIT HOURS: 3
This course examines development in infancy and the preschool period. The main theme of the course is to examine the integration of perceptual, cognitive, emotional, social, and linguistic changes occurring during the first five years of life.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03
FORMATS: Lecture

PSYO 3093 Development of Language and Literacy Abilities
CREDIT HOURS: 3
This course examines the cognitive and linguistic processes underlying language acquisition and how they interact in influencing the development of language and literacy abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03
FORMATS: Lecture

PSYO 3100 Independent Research in Psychology I
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. COORDINATOR: L. Phillmore
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3101.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.
PREREQUISITES: PSYO 2000.00 or NESC 2007.03 and PSYO 2501.03
CROSSLISTED: NESC 3100.03
RESTRICTIONS: Restricted to Psychology Majors and Honours Students
EXCLUSIONS: PSYO 3001.03, PSYO 3000.06
FORMATS: Lab | Experiential Learning
LAB HOURS PER WEEK: 4

PSYO 3101 Independent Research in Psychology II
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. COORDINATOR: L. Phillmore
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3100.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.
PREREQUISITES: PSYO 3100.03 and Coordinator's consent
CROSSLISTED: NESC 3101.03

RESTRICTIONS: Restricted to Psychology Majors and Honours Students
EXCLUSIONS: PSYO 3000.06, PSYO 3001.03
FORMATS: Lab | Experiential Learning
LAB HOURS PER WEEK: 4

PSYO 3122 Methods in Experimental Clinical Psychology
CREDIT HOURS: 3
Students learn how to conduct research on topics in applied clinical psychology. Students conduct a series of research projects in the laboratory by serving both as subjects and experimenters, and analyze the results of these studies in written lab reports. Research studies serve to illustrate concepts discussed in class.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2220.03
FORMATS: Lecture | Lab

PSYO 3129 Childhood Psychopathology
CREDIT HOURS: 3
This course examines a wide range of mental health disorders in children (e.g., reading disability, autism, ADHD). The goal is to gain a better understanding of the nature of these disorders, to learn about evidence-based assessment and treatment, and to review research findings in relation to children's mental health.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03; PSYO 2220.03 is recommended
FORMATS: Lecture

PSYO 3131 Research Methods in Attention
CREDIT HOURS: 3
The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3131.03
EXCLUSIONS: PSYO/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3132 Research Methods in Visual Cognition
CREDIT HOURS: 3
Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3132.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3133 Research Methods in Memory
CREDIT HOURS: 3
This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3133.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3134 Research Methods in Psycholinguistics
CREDIT HOURS: 3
Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 3190.03/NESC 3190.03
CROSSLISTED: NESC 3134.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3137 Research Methods in Cognitive Neuroscience
CREDIT HOURS: 3
An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3137.03
FORMATS: Lecture | Lab

PSYO 3161 Measuring Behaviour
CREDIT HOURS: 3
Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behaviour using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03
CROSSLISTED: NESC 3161.03
FORMATS: Lab

PSYO 3162 Advanced Animal Behaviour: Theories and Applications
CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in PSYO 2160.03/NESC 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03 or BIOL 3062.03 or BIOL 3630.03, and PSYO 2160.03/NESC 2160.03
CROSSLISTED: NESC 3162.03
FORMATS: Lecture

PSYO 3165 Neuroethology
CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons work together to produce behaviour. Neural control of selected behaviours from a wide range of animals, both invertebrate and vertebrate, are examined. From this comparative perspective an attempt is made to tease out common themes in the physiological control of behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve insects. Students are required to handle insects during the lab.
PREREQUISITES: PSYO 2160.03/NESC 2160.03 or BIOL 3062.03; and PSYO 2570.03/NESC 2570.03 or BIOL 3078.03 and BIOL 3079.03, or MARI 3074.03 and MARI 3076.03; and PSYO 2000.03 or NESC 2007.03 or one of following Biology classes: BIOL 2003.03, BIOL 2004.03, BIOL 2020.03, BIOL 2030.03, BIOL 2060.03
CROSSLISTED: NESC 3165.03
FORMATS: Lab

PSYO 3170 Hormones and Behaviour
CREDIT HOURS: 3
How chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour. How neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: PSYO 2770.03 or PSYO 2470.03/NESC 2470.03 or PHYL 2041.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03
CROSSLISTED: NESC 3170.03
EXCLUSIONS: PSYO 2170.03/NESC 2170.03

PSYO 3180 Psychoneuroimmunology/Ecological Immunology
CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of PSYO 2770.03 or PSYO 2470.03/NESC 2470.03 or PHYL 2041.03 or MICI 2100.03; OR BIOL 2020.03
CROSSLISTED: NESC 3180.03
FORMATS: Lecture

PSYO 3190 Psycholinguistics
CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language; and non-linguistic gesture.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3190.03
EXCLUSIONS: PSYO/NESC 2190.03
FORMATS: Lecture

PSYO 3220 Clinical Psychology
CREDIT HOURS: 3
A survey of professional issues relevant to the practice of clinical psychology in hospitals, private practice, schools, the court system, and the community. Students gain knowledge about psychological services, and an understanding of the training, ethics, and expertise that clinical psychology brings to the delivery of mental health and healthcare.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2220.03
EXCLUSIONS: PSYO 2120.03
FORMATS: Lecture

PSYO 3224 Forensic Psychology
CREDIT HOURS: 3
This course provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., courts, corrections, policing). In addition, consideration is given to professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.
PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), AND any 2000-level Psychology class, or PHYL 2041.03 or SOSA 2503.03
FORMATS: Lecture

PSYO 3225 Health Psychology
CREDIT HOURS: 3
A study of psychological influences on how people stay healthy and how they respond when they become ill. Using a biopsychosocial model, this course examines

topics such as health behaviours and prevention, stress and coping, the patient in treatment settings, and management of chronic and terminal illness.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2220.03
FORMATS: Lecture

PSYO 3227 Principles of Human Neuropsychology
CREDIT HOURS: 3
Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130.03 is recommended
CROSSLISTED: NESC 3227.03
FORMATS: Lecture

PSYO 3237 Drugs and Behaviour
CREDIT HOURS: 3
An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2470.03/NESC 2470.03, PSYO 2570.03/NESC 2570.03, or PSYO 2770.03
CROSSLISTED: NESC 3237.03
FORMATS: Lecture

PSYO 3260 Biological Rhythms
CREDIT HOURS: 3
Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This course examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and PSYO 2470.03/NESC 2470.03 or PSYO 2770.03
CROSSLISTED: NESC 3260.03
FORMATS: Lecture

PSYO 3264 The Science of Sleep
CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and either PSYO 2770.03 or PSYO 2470.03/NESC 2470.03; OR BIOL 2020.03
CROSSLISTED: NESC 3264.03
FORMATS: Lecture

PSYO 3270 Developmental Neuroscience
CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3270.03
FORMATS: Lecture

PSYO 3280 Personality
CREDIT HOURS: 3
Personality deals with questions such as: Is a science of persons possible? Are there types of personalities, or is each individual's personality unique? Is an individual's life history an expression of his or her personality, or is personality description merely a summary statement of behaviour whose cause lies elsewhere?
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03
FORMATS: Lecture

PSYO 3370 Neuroscience Laboratory I
CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3370.03
FORMATS: Lab

PSYO 3371 Neuroscience Laboratory II
CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03

CROSSLISTED: NESC 3371.03
FORMATS: Lab

PSYO 3390 Cognitive Development
CREDIT HOURS: 3
In this course we trace the development of the child's knowledge from birth to adolescence. Piaget's theory provides the background for the study of recent progress in our understanding of children's concepts of the physical world.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03
FORMATS: Lecture

PSYO 3502 Statistical Methods II
CREDIT HOURS: 3
This course is the continuation of PSYO 2501.03, with the examination of more complex, but commonly used, inferential statistics. Topics include factorial ANOVA, ANCOVA, and multiple regression. This course is for prospective Honours students in Psychology or Neuroscience. Class work includes computer-based assignments.
CALENDAR NOTES: PSYO 3502.03 is to be taken **prior** to enrolling in PSYO 4500X/Y.06/NESC 4500X/Y.06.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03 (with a grade of B or above), PSYO 2501.03, or instructor's consent
FORMATS: Lecture | Lab

PSYO 3581 History of Psychology I
CREDIT HOURS: 3
Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of historical explanation, explanation in science, knowledge and truth, life, human nature, the domains of animal and man, neuroscience, and personality. Usually offered in the Fall term.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or Instructor's consent
EXCLUSIONS: PSYO 3580.06
FORMATS: Lecture

PSYO 3582 History of Psychology II
CREDIT HOURS: 3
Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of learning, thinking, memory, intelligence, mental illness and treatment, the unconscious, dreams, development, and the self. Usually offered in the Winter term. Familiarity with ideas developed in PSYO 3581 is helpful.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent
EXCLUSIONS: PSYO 3580.06
FORMATS: Lecture

PSYO 3670 Genes, Brain and Behaviour
CREDIT HOURS: 3
The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515.X/Y36, SCIE 1520X/Y.30, or SCIE 1540X/Y.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended.
CROSSLISTED: NESC 3670.03
EXCLUSIONS: PSYO/NESC 2670.03
FORMATS: Lecture

PSYO 3770 Behavioural Neuroscience
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2470.03/NESC 2470.03 or PSYO 2770.03
CROSSLISTED: NESC 3770.03
FORMATS: Lecture

PSYO 3775 Behavioural Neuroscience Laboratory
CREDIT HOURS: 3
Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels. SIGNATURE REQUIRED
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2470.03/NESC 2470.03 or PSYO 2770.03, PSYO 2501.03, and one of PSYO 2160.03/NESC 2160.03 or PSYO 3237.03/NESC 3237.03 or PSYO 3770.03/NESC 3770.03, and instructor's consent
CROSSLISTED: NESC 3775.03
FORMATS: Lab

PSYO 3790 Neurolinguistics
CREDIT HOURS: 3
The course covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03
CROSSLISTED: NESC 3790.03
FORMATS: Lecture

PSYO 3970 Molecular Neuroscience
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: PSYO 2570.03/NESC 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: NESC 3970.03
FORMATS: Lecture

PSYO 4000 Senior Seminar
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrollment is contingent upon securing a faculty member to supervise the study program.
SIGNATURE REQUIRED
COORDINATOR: L. Phillmore
CROSSLISTED: NESC 4000.03

PSYO 4001 Contemporary Issues in Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4040 Learning Applications in Clinical and Social Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4050 Topics In Perception
CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: PSYO 3051.03/NESC 3051.03
CROSSLISTED: NESC 4050.03
FORMATS: Seminar

PSYO 4080 Topics in Social Psychology and Personality
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4090 Development of Social Behaviour
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4092 Topics in Developmental Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4120 Topics in Clinical Psychology
CREDIT HOURS: 3

PSYO 4224 Topics in Forensic Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
RESTRICTIONS: Restricted to Psychology Honours students
FORMATS: Seminar

PSYO 4230 Human Performance Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4230.03
FORMATS: Seminar

PSYO 4501 Honours Thesis I
CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4502.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade will be given for PSYO 4501.03 only after PSYO 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4501.03
RESTRICTIONS: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4502 Honours Thesis II
CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4501.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade for 4501.03 will only be given when 4502.03 is complete.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, and PSYO 4501.03 admission to the honours program, and instructor's consent.

PSYO 4581 Topics in the History of Psychology
CREDIT HOURS: 3
This course will cover in depth a particular topic in Psychology as it changes through history, from conception, development, and study, including important figures and historical context. Topic changes from year to year.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent.
FORMATS: Seminar

PSYO 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
Intensive 2-week course in neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics.
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent
CROSSLISTED: NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

PSYO 4740 Topics in the Neurobiology of Learning and Memory
CREDIT HOURS: 3
SIGNATURE REQUIRED

CROSSLISTED: NESC 4740.03
FORMATS: Seminar

Science, Interdisciplinary

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1111 Writing for the Sciences
CREDIT HOURS: 3
This course satisfies the Faculty of Science Writing Requirement. The course covers the history of writing and information theory, grammar and punctuation, sentences and paragraphs, scientific style, proposals, the scientific paper, citations and references, graphics, posters, and ethics. Weekly assignments/quizzes develop and reinforce writing skills introduced in lectures.
FORMATS: Lecture | Tutorial

SCIE 1506 Integrated Science I
CREDIT HOURS: 9
This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: PHIL 1050.03, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

SCIE 1507 Integrated Science II
CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

SCIE 2000 Introduction to the History of Science
CREDIT HOURS: 6
This course is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this course clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call science. In uncovering the sources and character of each of these transformations in the theory and practice of science, the course will challenge conventional views about the nature and place of science. This course may be taken as an arts or science credit.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06
EXCLUSIONS: HSTC 2201.03, BIOL 3502,03, HIST 3072.03, SCIE 4000.03, HIST 3074X/Y.06
FORMATS: Lecture | Tutorial

SCIE 2800 Science Co-op Seminar Orientation
CREDIT HOURS: 0
This course is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This course is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required complete this course at least four months prior to the first workterm. A grade of Pass is required before students undertake the first work term experience.
FORMATS: Seminar

SCIE 3100 Experiential Learning in Medical Sciences
CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works to acquire knowledge and skills relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty. This course is intended for students with no prior research experience.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. Students are advised to take SCIE 3100 prior to SCIE 4900X/Y (Honours Project) or SCIE 4100X/Y (Directed Project). To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of course coordinator required. To register for this class, a student must find a supervisor willing to supervise the work experience. This course is intended for students in their third year with no prior research experience. It is strongly recommended that students take SCIE 3100 prior to SCIE 4900X/Y or SCIE 4100X/Y.
RESTRICTIONS: Open only to students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 3100. Only one experiential learning course per degree is permitted. Cannot be taken concurrently with PHYL 3600, SCIE 4900X/Y (Honours Project) or SCIE 4100X/Y (Directed Project).
FORMATS: Other (explain in comments)

SCIE 3111 Communicating Science
CREDIT HOURS: 3
A course for senior science students to hone communication skills. Students (1) learn to communicate scientific information to various non-specialist audiences, and (2) prepare and deliver tutorials to small groups of SCIE 1111.03 students. The course allows students to use different communication styles and topics to build a portfolio.
PREREQUISITES: Permission of instructor

SCIE 3333 Science Education: Introduction to Principles and Practices
CREDIT HOURS: 3
Students investigate and apply key principles related to teaching and learning in sciences. Emphasized are: (1) conveying how science works; (2) the nature of learning; (3) the science-society connection; (4) teaching concepts that cross the sciences such as patterns, scale, visualization, complexity, uncertainty, bias, and multiple perspectives. Experiential learning is an integral component.
PREREQUISITES: Minimum of 4 courses at or above the second year level AND permission of the Instructor.
RESTRICTIONS: E1 and E2
FORMATS: Tutorial | Seminar | Experiential Learning

SCIE 3600 Exploring Geographic Information Systems
CREDIT HOURS: 3
This course provides a general overview of Geographic Information Systems (GIS), examining what GIS is, what it can do, and how it works. The course is aimed at students studying in all disciplines and will involve creating, understanding, manipulating and displaying geographic data. Topics will include data models, analysis of vector and raster data, creation of spatial databases, the Global Positioning System and other aspects of spatial data. Lectures (3 per week) will explore basic aspects of GIS in detail and introduce material to be covered in the labs. Labs are held once per week and will provide practical experience in data manipulation and problem solving.
PREREQUISITES: Two years of university study
EXCLUSIONS: ERTH 3500.03, ENVS 3500.03, GEOG 3500.03, ERTH 5600.03

SCIE 4001 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03
FORMATS: Lecture

SCIE 4005 Major Capstone Course in Medical Sciences
CREDIT HOURS: 3
Integration of multiple Medical Sciences disciplines through in-depth analysis of a series of 5 medical "cases" through expert lectures, group discussion, and small group presentations. Cases are selected from across all biomedical disciplines (Medicine, Dentistry, Nursing, Physiotherapy, Occupational Therapy, etc), reflecting a wide range of patient ages and demographics. This course is required by Medical Sciences students not pursuing Honours. Medical Science Honours students take SCIE 4900X/Y.06 instead.
PREREQUISITES: Writing requirement, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2810.03
RESTRICTIONS: Open only to fourth year Major students in the Bachelor of Sciences Medical Sciences Program
FORMATS: Lecture

SCIE 4100 Directed Project in Medical Sciences
CREDIT HOURS: 6
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a

learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).
RESTRICTIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 4100X/Y. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4900X/Y.
FORMATS: Other (explain in comments)

SCIE 4101 Directed Project in Medical Sciences I
CREDIT HOURS: 3
This is the first half of an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to Major students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. Grades will not be assigned for SCIE 4101 until SCIE 4102 has also been completed.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).
EXCLUSIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4901 or SCIE 4902.
FORMATS: Other (explain in comments)

SCIE 4102 Directed Project in Medical Sciences II
CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to Major students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. No grade will appear for SCIE 4101 until SCIE 4102 has also been completed.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).
EXCLUSIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4901 or SCIE 4902.
FORMATS: Other (explain in comments)

SCIE 4444 Leadership in Science
CREDIT HOURS: 3
Students will develop leadership skills and build confidence while applying their scientific knowledge. Through in-class activities and a science-based practicum, students gain experience with various aspects of leadership, allowing for integration and application of their expertise.
PREREQUISITES: Instructor permission. Students should have completed at least three (3) third year courses in their declared major and have a minimum of B+ average in their major.
CROSSLISTED: BIOL 4444.03

SCIE 4445 Science Leadership and Communication Portfolio
CREDIT HOURS: 0
This zero-credit course is the final component of the Science Leadership and Communication Certificate requirement. Students should only register for this course in the semester that they are submitting their completed portfolio for evaluation. The portfolio represents an opportunity for you to highlight and synthesize your learning about leadership and communication in science throughout your undergraduate years in a concise package, and includes reflection on each of the required Certificate courses, their interconnections, and the practica involved.
CALENDAR NOTES: 1. This is a zero-credit course, carrying a pass-fail grading scheme. 2. Deadline for submission of the portfolio is 6 weeks prior to graduation.
PREREQUISITES: Registration in the Science Leadership and Communication Certificate. Completion or co-completion of the required Certificate courses.
FORMATS: Other (explain in comments)
LAB HOURS PER WEEK: 0

SCIE 4701 Science and Technology Innovation, Commercialization, and Entrepreneurship I
CREDIT HOURS: 3
Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4702.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.
COREQUISITES: SCIE 4702.03
PREREQUISITES: Registration by instructor's permission. Undergraduates should have completed at least three full years (90 credit hours) of university study, and have previous exposure to innovation and entrepreneurship such as events offered by Dalhousie sandbox programs.
RESTRICTIONS: Registration by instructor's permission.
EXCLUSIONS: NESC/PSYO 4705.03
FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4702 Science and Technology Innovation, Commercialization, and Entrepreneurship II
CREDIT HOURS: 3
Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4701.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.
PREREQUISITES: SCIE 4701.03. Registration by instructor's permission.
RESTRICTIONS: Registration by instructor's permission
EXCLUSIONS: NESC/PSYO 4705.03
FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

SCIE 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: BIOL 4850.03, ENVS 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

SCIE 4901 Medical Sciences Honours Research & Thesis I
CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
CALENDAR NOTES: Students will not receive a grade for SCIE 4901 until both SCIE 4901 and SCIE 4902 have been completed.
PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.3 calculated from the following core courses: BIOL 2020, BIOL 2030, PHYL 2041, PHYL 2044, MICI 2100, BIOC 2300, SOSA 2503, PHIL 2810 or 2805, PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, CHEM 2401, and CHEM 2402. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.3 (B+ average). A GPA of at least 3.3 is also required for all core courses at the time of graduation.
EXCLUSIONS: SCIE 4900.06
FORMATS: Other (explain in comments)

SCIE 4902 Medical Sciences Honours Research & Thesis II
CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
CALENDAR NOTES: A cumulative grade for SCIE 4901 & SCIE 4902 will be granted in the Winter term, once SCIE 4902 has been completed.
PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.3 calculated from the following core courses: BIOL 2020, BIOL 2030, PHYL 2041, PHYL 2044, MICI 2100, BIOC 2300, SOSA 2503, PHIL 2810 or 2805, PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, CHEM 2401, and CHEM 2402. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.3 (B+ average). A GPA of at least 3.3 is also required for all core courses at the time of graduation.
EXCLUSIONS: SCIE 4900.06
FORMATS: Other (explain in comments)

Introduction
It doesn't matter if you want to design computer games, study the safety of nuclear power plants, analyze the stock market or conduct political polls: scientists of all kinds work with numbers to measure and explore the world. That's where statistics comes in. Statistics is the study of the collection, organization, analysis, interpretation and presentation of data. Extracting knowledge from data helps us plan for the future and improve our quality of life.

The Dalhousie Statistics program is the only program in the Maritimes that offers a full range of undergraduate and graduate programs. Our undergraduate courses are also approved by the accreditation committee of the Statistics Society of Canada, so that our graduates can apply for the Associate Statistician designation.

Statistics makes a great undergraduate degree with wide applicability and is an essential component of any program in the sciences or social sciences.

Degree Programs
The Department of Mathematics and Statistics offers the following degree programs in Statistics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Statistics
- Minor in Statistics

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Statistics undergraduate academic advisor.

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chair of the Department
Janssen, J. C., MSc (Eindhoven), PhD (Lehigh)

Director of Division
Dowd, M., PhD (Dalhousie)

Faculty Advisor
Smith, B., MSc (Calgary), PhD (Berkeley), Honours and Undergraduate Advisor, Statistics
Kenney, T., BA (Hons), MMath, PhD (Cambridge), Honours and Undergraduate Advisor, Actuarial Science

Professor Emeritus
Field, C. A., MSc, PhD (Northwestern)
Hamilton, D. C., MA, PhD (Queen's)

Professors
Beiko, R., PhD (Ottawa), cross appointment with Computer Science
Bielewski, J., MA, PhD (Texas A & M), jointly with Biology
Dowd, M., PhD (Dalhousie)
Gu, H., MSc (Peking), PhD (Hong Kong)
Mills-Flemming, J., MSc (TUNS), PhD (Dalhousie), Graduate Advisor Statistics
Sarhan, A., PhD (Gdansk)
Smith, B., MSc (Calgary), PhD (Berkeley)
Susko, E., PhD (Waterloo)
Thompson, K., MSc (Manchester), PhD (Liverpool) (CRC Chair), jointly with Oceanography
Zhao, Y., MSc (Western Kentucky), PhD (UBC), cross appointment with Management

Assistant Professors
Kenney, T., BA (Hons), MMath, PhD (Cambridge), cross appointment with Mathematics
Ho, L, PhD (Univ of Wisconsin)

University Teaching Fellows
Sarhan, A., PhD (Gdansk)

Adjunct Professors
Gupta, R. P., PhD (Delhi) Dalhousie
Herbinger, C., MSc (Paris), PhD (Dalhousie), jointly with Biology
Millar, M., PhD (Dalhousie) MSVU
Sneddon, G., PhD (Dalhousie) MSVU
Wang, X., PhD (Waterloo) St. FX

Statistical Consultant
Wang, H., PhD (Ottawa)

Please refer to the entry for the Department of Mathematics and Statistics for a full listing of the members of the Department and information on other programs offered by the Department.

BSc or BA (120 credit hour) Concentrated Honours in Statistics

Students who want a challenging program resulting in comprehensive knowledge of both theoretical and applied Statistics may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students must write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of STAT 4950.03.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Statistics should consult with a Statistics Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirementssections, students in a BSc or BA Concentrated Honours program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]
- MATH 1030.03: Matrix Theory and Linear Algrbra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference[3]
- STAT 2450.03 Introduction to Data Mining with R
- At least two additional statistics[4] courses at or above the 2000 level (6 credit hours)

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3350.03: Design of Experiments
- STAT 3360.03: Probability
- STAT 3380.03: Sample Survey Methods
- STAT 3460.03: Intermediate Statistical Theory
- At least two mathematics[5] courses at the 3000 level (6 credit hours)

4000 level

- STAT 4066.03: Advanced Statistical Theory I
- One of STAT 4350.03: Applied Multivariate Analysis, STAT 4390.03: Time Series Analysis and STAT 4620.03: Data Analysis

- STAT 4950.03: Honours Research Project

[1]The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

[3]Some students may take STAT 2080.03 in the first year of their degree program.

[4]Statistics courses are any courses listed or cross-listed as STAT. The following math courses also count as credit hours in statistics:

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II

[5]The 3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Combined Honours in Statistics and another subject

Students who wish to study Statistics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits at the second year or above), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete a research thesis and an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Statistics, this requirement is satisfied through STAT 4950.03.

Departmental requirements

Students in a BSc or BA Combined Honours program in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least one STAT course (3 credit hours) at the 4000 level

If Statistics is the primary subject, students will also complete

- STAT 4950.03: Honours Research Project
- At least nine additional credit hours of Statistics[4] courses at or above the 2000 level, at least three of which must be a MATH course at the 3000 level.

If Statistics is the secondary subject, students will also complete

- At least 9 credit hours at or above the 2000 level, at least 6 credit hourse of which must be at the 3000 level (and may include a 3 credit hour 3000 level MATH course).

[4]Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II

BSc or BA (120 credit hour) Major in Statistics

The 120 credit hour Major is suited to students who want to focus on Statistics, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]
- Math 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference3
- STAT 2450.03: Introduction to Data Mining with R

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3380.03: Sample Survey Methods or STAT 3350.03: Design of Experiments
- STAT 3460.03: Intermediate Statistical Theory
- At least 2 additional Statistics[4] courses (6 credit hours) at or above the 3000 level, including at least one course (3 credit hours) at the 4000 level

[1]The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

[3]Some students may take STAT 2080.03 in the first year of their degree program.

[4]Statistics courses are any courses listed or cross-listed as STAT. The following are also counted as statistics credit hours:

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.04: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II

BSc or BA (120 credit hour) Double Major in Statistics and another subject

The Double Major degree program allows students to combine a study of Statistics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

Students in a BSc or BA Double Major in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I

- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least 4 additional statistics courses[4] at or above the 2000 level (12 credit hours), including at least 9 credit hours at or above the 3000 level (these 9 credit hours must comprise at least 3 credit hours of STAT, with the remaining 6 credit hours being in either STAT or MATH).

[4] Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II

BSc or BA (90 credit hour) Minor in Statistics

The 90 credit hour Minor in Statistics is appropriate for students who want to study some Statistics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Statistics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Statistics is usually the preferred option for students who wish to combine studies in Statistics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Statistics section of this Calendar.

Minor in Statistics
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a minor in Statistics is also available.

Requirements

A minimum of 18 to a maximum of 36 credit hours in Statistics, which must include:

- MATH 1030.03: Matrix Theory and Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 3340.03: Regression and Analysis of Variance
- At least two additional statistics[1] course (6 credit hours) at the 2000 level or above
- At least one additional statistics course (3 credit hours) at the 3000 level or above

[1] Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted as 2000 level statistics credit hours:

- MATH 2001.03: Intermediate Calculus
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II
- BIOL 4062.03: Analysis of Biological Data

Contact Statistics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Statistics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs.

Students in a BSc or BA (120 credit hour) program in Statistics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Statistics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Statistics include:

- Certificate in Actuarial and Financial Mathematics
- Certificate in Applied and Computational Mathematics

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Statistics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Statistics and from the Faculty of Engineering in their first year of study.

Required Statistics courses for a BSc/BEng or BA/BEng program in Statistics

- A minimum of 18 credit hours in Statistics courses at the 2000 level or higher, which must include STAT 2060.03, STAT 2080.03, STAT 3340.03 and at least one other STAT course[4] at or above the 3000 level

[4]Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03
- MATH 2040.03

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions
Course Notes
Certain courses have been approved for use in fulfilling the educational requirements of the Associate Statistician (A.Stat.) designation of the Statistical Society of Canada (SSC). See the Department or the SSC website (http://ssc.ca/en/accreditation/apply/suggested-courses-use-towards-astat-designation) for details.

Credit may not be obtained twice for the same course even if the numbers have been changed.

STAT 1060 Introductory Statistics for Science and Health Sciences
CREDIT HOURS: 3
This course gives an introduction to the basic concepts of statistics through extensive use of examples. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use the statistical package MINITAB. NOTE: Students who have already taken university level Calculus should consider taking STAT 2060.03 instead of STAT 1060.03.
CALENDAR NOTES: Students will not receive credit for taking STAT 1060.03 after receiving credit for STAT 2060.03.
PREREQUISITES: Academic or advanced Grade 12 Mathematics (or pre-calculus) or equivalent
CROSSLISTED: MATH 1060.03
EXCLUSIONS: COMM 2501.03, MGMT 1501.03, DISP
FORMATS: Lecture | Tutorial

STAT 2060 Introduction to Probability and Statistics
CREDIT HOURS: 3
Rigorous introduction to probability and statistical theory. Topics covered include elementary probability, random variables, distributions, estimation and hypothesis testing. Estimation and testing are introduced using maximum likelihood and the generalized likelihood ratio. Natural sequels for this course are STAT 2080.03 and 3360.03
PREREQUISITES: MATH 1000.03 or MATH 1215.03 or MATH 1550 OR MATH 1500X/Y
CROSSLISTED: MATH 2060.03, ECON 2260.03
EXCLUSIONS: ENGM 2032.03
FORMATS: Lecture

STAT 2080 Statistical Methods for Data Analysis and Inference
CREDIT HOURS: 3
The usual sequel to STAT 1060.03 or STAT 2060.03. This course introduces a number of techniques for data analysis and inference commonly used in the experimental sciences. Topics covered include two-sample inference one-way and two-way analysis of variance, correlation, linear regression, and the analysis of categorical and count data. A natural sequel for this course is STAT 3340.03.
PREREQUISITES: STAT 1060.03 or STAT 2060.03 or DISP
CROSSLISTED: MATH 2080.03, ECON 2280.03
EXCLUSIONS: COMM 2502.03, MGMT 2502.03, PSYO 2501.03
FORMATS: Lecture

STAT 2300 Introduction to Mathematical Modelling I
CREDIT HOURS: 3
See course description for MATH 2300.03 in the Mathematics section of this calendar.

STAT 2450 Introduction to Data Mining with R
CREDIT HOURS: 3
This course provided as introduction to data mining and R programming, suited for science students. Data mining methods include a vast set of tools developed in different areas for identifying the patterns in data. Students will learn programming methods for manipulating and exploring data through learning the basic ideas of some clustering, regression and classification methods. No prior programming knowledge is assumed.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and either (STAT 1060.03 or MATH 1060.03) or (STAT 2060.03 or MATH 2060.03
FORMATS: Lecture

STAT 2600 Theory of Interest
CREDIT HOURS: 3
See course description for MATH 2600.03 in the Mathematics section of this calendar.

STAT 3340 Regression and Analysis of Variance
CREDIT HOURS: 3
A thorough treatment of the theory and practice of regression analysis. Topics include: fitting general linear models using matrices, optimality of least squares estimators (Gauss-Markov theorem), inferences, simple and partial correlation, analysis of residuals, case-deletion diagnostics, polynomial regression, transformations, use of indicator variables for analysis of variance and covariance problems, model selection, and an introduction to nonlinear least squares. This course makes extensive use of computer packages.
PREREQUISITES: STAT 2080.03, MATH 2030.03 or Math 1030.03, and one of MATH 1010.03, STAT 2060.03 or DISP (except SCIE 1540X/Y.27)
CROSSLISTED: MATH 3340.03
FORMATS: Lecture

STAT 3345 Environmental Risk Assessment
CREDIT HOURS: 3
Statistical methods for assessing risk are discussed, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk trend analysis and association risks. Case studies are used to illustrate the methods.
PREREQUISITES: MATH 1000.03 or MATH 1215.03, STAT 2080.03 or equivalent

STAT 3350 Design of Experiments
CREDIT HOURS: 3
The aim of the course is to develop the fundamental statistical concepts required for designing efficient experiments to answer real questions. The first main subject is unit variation and control. The basic concepts of replication, blocking and randomization are each examined. The second main subject is treatment questions and structure. The ideas of factorial designs, split-plot and incomplete plot designs are presented. We conclude with a look at response surface methodology.
PREREQUISITES: STAT 2080.03, MATH 2030.03 or Math 1030.03, and one of MATH 1010.03, STAT 2060.03 or DISP (except SCIE 1540X/Y.27)
CROSSLISTED: MATH 3350.03
FORMATS: Lecture

STAT 3360 Probability
CREDIT HOURS: 3
The concepts and application of probability. Topics include the classical discrete and continuous distributions, including the binomial, hypergeometric, multinomial, Poisson, uniform, exponential and normal; definitions and properties of random variables; independence; sums of independent random variables, including the law of large numbers and central limit theorem; conditional probability; and the bivariate normal distribution. Examples will be taken from the natural and physical sciences.
PREREQUISITES: STAT 2060.03 and MATH 2001.03
CROSSLISTED: MATH 3360.03
FORMATS: Lecture

STAT 3380 Sample Survey Methods
CREDIT HOURS: 3
The development of design and analysis techniques for sample surveys. Topics include simple, stratified and systematic random sampling, ratio and regression estimation, sub-sampling with units of equal and unequal size, double-multistage and multiphase sampling, non-sample errors and non-respondents.
PREREQUISITES: STAT 2060.03
CROSSLISTED: MATH 3380.03
FORMATS: Lecture

STAT 3460 Intermediate Statistical Theory
CREDIT HOURS: 3
This course provides an intermediate level coverage of statistical theory to provide a framework for valid inferences from sample data. The methods developed are based on the likelihood function and are discussed from the frequentist, likelihood, and Bayesian approaches. The problems of point estimation, interval estimation and

hypothesis testing and the related topics of sampling distributions, sufficiency, and Fisher Information are discussed.
PREREQUISITES: STAT 3360.03
CROSSLISTED: MATH 3460.03
FORMATS: Lecture

STAT 3703 Actuarial Models I
CREDIT HOURS: 3
This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance. This course covers the part of the syllabus for the professional actuarial examination concerned with the Construction and Evaluation of Actuarial Models.
PREREQUISITES: STAT 3360.03 OR MATH 3360.03
CROSSLISTED: ACSC 3703.03
EXCLUSIONS: STAT 4701.03
FORMATS: Lecture

STAT 3720 Life Contingencies I
CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.
PREREQUISITES: STAT 3360.03, STAT 2600.03
CROSSLISTED: ACSC 3720.03
FORMATS: Lecture

STAT 3750 Credibility Theory
CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small but very relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.
COREQUISITES: ACSC 3703.03
PREREQUISITES: STAT 3360.03
CROSSLISTED: ACSC 3750.03

STAT 4066 Advanced Statistical Theory I
CREDIT HOURS: 3
This course, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution theory, the Bayesian and classical theories of estimation and testing are introduced.
PREREQUISITES: STAT 3460.03 or instructor's consent
CROSSLISTED: MATH 4066.03/5066.03, STAT 5066.03
FORMATS: Lecture

STAT 4100 Survival Analysis
CREDIT HOURS: 3
This course is an introduction to survival analysis methods and will cover both the statistical theory behind the methods, and the application of various techniques. Topics to be discussed include survivorship and hazard functions and their relationship to lifetime distributions and densities; modes of censoring; the Kaplan-Meier estimate of the survivor function; parametric survival time distributions; proportional hazard models and their semi-parametric estimation; accelerated life models, log rank tests, including the Mantel-Haenszel test; and goodness of fit measures.
PREREQUISITES: STAT 3340.03 and STAT 3460.03, or equivalent
CROSSLISTED: STAT 5100.03
FORMATS: Lecture

STAT 4130 Bayesian Data Analysis
CREDIT HOURS: 3
This course introduces the student to the Bayesian methods in applied statistics. The course covers all the fundamental concepts of Bayesian methods, and works from the simplest ideas (characterizations of probability; comparative inference; prior, posterior and predictive distributions) up through hierarchical modes applied to various data. Computational methods include MCMC for posterior simulation.
PREREQUISITES: MATH 2030.03 or Math 1030.03, and STAT 3460.03
EXCLUSIONS: STAT 5130.03
FORMATS: Lecture

STAT 4300 Topics in Statistics and Probability
CREDIT HOURS: 3
CROSSLISTED: STAT 5300.03

STAT 4350 Applied Multivariate Analysis
CREDIT HOURS: 3
The course deals with the stochastic behaviour of several variables in systems where their interdependence is the object of analysis. Greater emphasis is placed on practical application than on mathematical refinement. Topics include classification, cluster analysis, categorized data, analysis of interdependence, structural simplification by transformation or modelling and hypothesis construction and testing.
PREREQUISITES: STAT 3340.03 and MATH 2135.03 or 2040.03
CROSSLISTED: STAT 5350.03
FORMATS: Lecture

STAT 4360 Robust Statistics
CREDIT HOURS: 3
Robust statistics are those which provide protection against violation of assumptions underlying the statistical procedure. We will develop basic concepts including sensitivity, influence and breakdown of estimates and tests. Classical procedures will be evaluated in terms of robustness and alternate techniques developed based on weighted least squares and/or median based generalizations. We will also consider robust techniques in time series.
PREREQUISITES: STAT 3340.03 and STAT 3460.03
CROSSLISTED: STAT 5360.03

STAT 4370 Stochastic Processes
CREDIT HOURS: 3
The theory and application of stochastic processes. Topics to be discussed include the Poisson process, renewal theory, discrete and continuous time Markov processes, and Brownian motion. Applications will be taken from the biological and physical sciences, and queueing theory.
PREREQUISITES: STAT 3360.03 or instructor's consent
CROSSLISTED: STAT 5370.03
FORMATS: Lecture

STAT 4390 Time Series Analysis
CREDIT HOURS: 3
Time series analysis in both the time and frequency domain is introduced. The course is applied and students are required to develop their own computer programs in the analysis of real time series with an emphasis on oceanographic data. Topics to be discussed include the nature of time series, stationarity, auto and cross covariance, ARMA models, spectral analysis, and state space models (the Kalman filter and the particle filter).
PREREQUISITES: STAT 3340.03, 3360.03, STAT 3460.03, or instructor's consent
CROSSLISTED: OCEA 4210.03
EXCLUSIONS: OCEA 5210.03, STAT 5390.03
FORMATS: Lecture

STAT 4570 Statistical Genetics
CREDIT HOURS: 3
Statistical aspects of several ideas in genetics are discussed. Topics of some or all the following: gene frequency estimation, Hardy-Weinberg equilibrium, linkage analysis, association studies, quantitative traits, microarrays.
PREREQUISITES: STAT 3460 or permission of instructor
CROSSLISTED: STAT 5570
FORMATS: Lecture

STAT 4620 Data Analysis
CREDIT HOURS: 3
A variety of statistical models which are useful for the analysis of real data are discussed. Topics include: generalized linear models, such as logistic regression and Poisson regression, models for multidimensional contingency tables, ordered categories and survival data.
PREREQUISITES: STAT 3340.03, 3460.03, or instructor's consent
CROSSLISTED: STAT 5620.03
FORMATS: Lecture

STAT 4701 Actuarial Models I
CREDIT HOURS: 3
This course develops the theoretical basis of a number of probabilistic models useful for the study of life contingencies, including survival models, Markov chains, Poisson processes, with application to life insurances and annuities.
PREREQUISITES: STAT 3360.03
FORMATS: Lecture

STAT 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity and ruin models.
PREREQUISITES: STAT 3703 or ACSC3703
CROSSLISTED: ACSC 4703.03
FORMATS: Lecture

STAT 4720 Life Contingencies II
CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that afect life insurance policies. We introduce multiple-state models, pensions, interest rate risk and profit testing.
PREREQUISITES: STAT 3720.03
CROSSLISTED: ACSC 4720.03
FORMATS: Lecture

STAT 4950 Honours Research Project
CREDIT HOURS: 3
This course is required for students in the honours program. It will consist of a research project carried out under the supervision of a faculty member. The results of the research will be submitted to the statistics honours advisor as a written report. Students wishing to enroll in this course must have a suitable background in statistics, and must meet with, and obtain the approval of, the statistics honours co-ordinator before undertaking their project.

STAT 8892 Co-op Work-Term II
CREDIT HOURS: 0

STAT 8893 Co-op Work-Term III
CREDIT HOURS: 0

Journalism (University of King's College)

Minor in Journalism Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

Bachelor of Arts and Bachelor of Management

Minimum requirement of 24 credit hours in Journalism which must include:

Core Requirements

- JOUR 1001.06: Foundations of Journalism
- JOUR 2700.03: Introduction to Reporting

Elective Requirements

Students must complete 15 credit hours in electives from the list below:

- JOUR 2006.03: Is it true? Journalism Verification Techniques
- JOUR 2400.03: Science and the Media
- JOUR 2701.03: Intermediate Reporting
- JOUR 3002.03 Introduction to Audio
- JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition
- JOUR 3339.03: Ethics and Law for Journalists
- JOUR 3440.03: Creative Nonfiction
- JOUR 3441.03: Advanced Creative Nonfiction
- JOUR 3540.03: Feature Writing
- JOUR 3542.03: Business Reporting for Journalists
- JOUR 3550.03: Copy Editing
- JOUR 3560.03: Great Journalists
- JOUR 3660.03: Photojournalism
- JOUR 3661.03 Sports Journalism
- JOUR 3662.03: Journalist as Documentarian
- JOUR 3670.03: Opinion Writing
- JOUR 3671.03: Freelance Journalism

Bachelor of Science

Minimum requirement of 24 credit hours in Journalism which must include:

Core Requirements

- JOUR 1001.06: Foundations of Journalism
- JOUR 2700.03: Introduction to Reporting
- JOUR 2400.03: Science and the Media

Elective Requirements

Students must complete 12 credit hours in electives from the list below:

- JOUR 2006.03: Is it true? Journalism Verification Techniques
- JOUR 2701.03: Intermediate Reporting
- JOUR 3002.03: Introduction to Audio
- JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition
- JOUR 3339.03 Ethics and Law for Journalists
- JOUR 3440.03: Creative Nonfiction
- JOUR 3441.03: Advanced Creative Nonfiction
- JOUR 3540.03: Feature Writing
- JOUR 3542.03: Business Reporting for Journalists

- JOUR 3550.03: Copy Editing
- JOUR 3560.03: Great Journalists
- JOUR 3660.03: Photojournalism
- JOUR 3661.03: Sports Journalism
- JOUR 3662.03: Journalist as Documentarian
- JOUR 3670.03: Opinion Writing
- JOUR 3671.03: Freelance Journalism

Contact University of King's College for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Core Requirements
Students must complete one and a half full credits of core courses:
JOUR 1001X/Y.06 Foundations of Journalism
JOUR 2000.03 Basic Reporting Techniques

Elective Requirements
Students must complete an additional 15 credit hours in electives from the complete list of Journalism 'Course Descriptions' above

Course Descriptions

JOUR 1001 Foundations of Journalism
CREDIT HOURS: 6
This course gives students a theoretical and practical introduction to journalism. In the lecture component, students examine the principles and evolution of journalism. They gain an understanding of the role of journalists in society, and the political and legal environment in which they operate. The tutorial port of the course teaches students how to write imaginative and interesting prose using correct English and effective storytelling methods. Students have frequent writing assignments and have their work assessed by professional journalists.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

JOUR 2006 Is it true? Journalism Verification Techniques
CREDIT HOURS: 3
Reporters and news consumers face a barrage of questionable information every day. This course will explore the sources and range of disinformation from honest mistakes to inaccurate and "fake" news. It will also give students basic tools to query and verify - or debunk - news stories on social media and elsewhere.
PREREQUISITES: JOUR 1001.06
FORMATS: Lecture

JOUR 2400 Science and the Media
CREDIT HOURS: 3
From the first Babylonian astronomical records on cuneiform to the public understanding of science on television, the various media have long been crucial to the success and spread of science. This course provides a history of science in the media from the ancient and medieval use of geometrical diagrams, astronomical figures and anatomical illustration through early modern printed texts, popular broadsheets and color botanical plates all the way to the ubiquity of science in literature, cinema and on the Internet. This expanding presence of science in the media is examined against the backdrop of three revolutions: literary and artistic (ancient and medieval worlds), mechanical (early modern period) and electronic (contemporary age). Specific themes considered include the increasing accuracy of scientific illustration, the rise of scientific journals, public scientific demonstrations, science in poetry and prose fiction, science and art, radio and television documentaries, the advertising and marketing of science, scientific apocalypses and techno-utopias, bioethics, Soviet era technological iconography, environmentalism and science-religion relations in the journalistic press, science fiction from H.G. Wells' *War of the Worlds* to *Star Wars* and *Jurassic Park*, and science in computing and cyberspace.
CROSSLISTED: HSTC 2400.03
FORMATS: Lecture | Seminar

JOUR 2700 Introduction to Reporting
CREDIT HOURS: 3
This course builds on the writing foundation provided in JOUR 1001X/Y.06 and gives students a comprehensive introduction to news reporting in a digital environment. Students will learn how to develop and pitch original story ideas, and ground them with research. They learn how to write with minimal factual and grammatical error, and craft a story with nuance.
PREREQUISITES: JOUR 1001.06
FORMATS: Lecture

JOUR 2701 Intermediate Reporting
CREDIT HOURS: 3
The course builds on the essential reporting skills learned in JOUR 2700.03 (Introduction to Reporting) to help students craft publishable pieces of multimedia journalism. Students will pitch, research and publish news and feature stories for the public. They will focus on headlines, editing and online publishing practices. Students will demonstrate an ability to keep abreast of changing news and technology environments.
PREREQUISITES: JOUR 2700.03
FORMATS: Lecture

JOUR 3002 Introduction to Audio
CREDIT HOURS: 3
This course will introduce students to writing and reporting for the ear, emphasizing skills such as writing to deadline, interviewing and live performance. In the process students will learn ethical and professional standards of audio production. This course will focus on radio reporting and podcasting.
PREREQUISITES: JOUR 1001.06

JOUR 3004 Journalism Research
CREDIT HOURS: 3
This course will focus on the essential skills journalists need to produce fair, balanced and accurate stories. It will include methods of finding facts and sources, digging below the surface and analysing the evidence. There will be special emphasis on interviewing. Students will learn how to find and use information tucked away in court, business and property records as well as in libraries and on the Internet. There will be instruction on using Freedom of Information laws to get access to government files as well as how to read a budget and analyze polls.
PREREQUISITES: JOUR 2001.06, or JOUR 2700.03 or JOUR 2701.03 all with a grade of C or higher or permission of Instructor

JOUR 3005 Advanced Reporting 2
CREDIT HOURS: 3
This course expands on the skills learned in JOUR 2702.03 Introduction to Visual Storytelling as students focus on broadcast techniques. Students will learn how to create a story using an array of forms, including packaged and live reports from the field. They will also practise shooting and editing a proper video sequence, learn the basics of interviewing for audio and video and apply journalistic broadcast ethics in the field.
PREREQUISITES: JOUR 2701.03 Intermediate Reporting and JOUR 2702.03 Intro to visual Storytelling both with a grade of C or better.
FORMATS: Lab

JOUR 3304 Through her Eyes: Women and the Documentary Tradition
CREDIT HOURS: 3
This course will explore the rarely examined historical and contemporary involvement of women in the field of documentary filmmaking. Women documentary makers have produced extensive bodies of engaging work that challenge many societal assumptions about gender, class, race, the function of political power, sexuality and peace-war. They have worked at every level within the process: as directors, cinematographers, editors, sound recordists, producers, writers and fund-raisers. A variety of documentaries made by women from diverse backgrounds will be screened and analyzed along with a close reading of selected critical texts. Students will identify the similarities and differences in subjects, themes, style, aesthetics, and approached to creation, production and distribution.
CROSSLISTED: CTMP 3304.03
FORMATS: Seminar

JOUR 3339 Ethics & Law for Journalists
CREDIT HOURS: 3
This course will give students the ethical and legal knowledge they need to operate as journalists in the field. Students will develop an understanding of the criminal court process and the journalistic protocol for working with sources. Discussion will focus on topics such as the law regarding defamation, the process for civil proceedings and restrictions imposed by public bans.
FORMATS: Lecture

JOUR 3440 Creative Nonfiction
CREDIT HOURS: 3
Narrative nonfiction writing includes literary journalism, memoir and essay. In this introductory course, students will learn about the historic development of this genre as well as read and discuss some of the best examples of historical and contemporary narrative nonfiction. The goal is to make students better informed readers as well as to provide them with the tools to produce this kind of writing themselves.
PREREQUISITES: JOUR 1001.06 with a grade of C or better or permission of the instructor

JOUR 3441 Advanced Creative Nonfiction
CREDIT HOURS: 3
This class is about stories - long-form feature writing, essay, memoir and experimental narrative. It's a writing and reading course designed to hone students' storytelling craft and get them thinking about what makes a great nonfiction read.
PREREQUISITES: JOUR 3440.03 with a grade of C or better.
RESTRICTIONS: This course is not available to BJH students
FORMATS: Lecture

JOUR 3540 Feature Writing
CREDIT HOURS: 3
This course will introduce students to the more creative writing aspects of journalism - the writing of stories behind the breaking news of the day, or the small human dramas that make up the world around us. Students will study feature writing styles and techniques, and experiment with several feature formats, from color stories and personality profiles to substantial background articles. Students will produce a major, term-end feature story and several smaller assignments.
PREREQUISITES: JOUR 2700.03 or permission of the Instructor.

JOUR 3542 Business Reporting for Journalists
CREDIT HOURS: 3
Budgets, stock markets, statistics, polls, securities, mergers and takeovers. This course will give students a working knowledge of how business functions. It will

provide students with the tools to analyze and present complex economic situations in clear language.
PREREQUISITES: J1001.06 or permission of the instructor

JOUR 3550 Copy Editing
CREDIT HOURS: 3
In this course, students will edit real stories selected for their potential as well as their problems. They will work on them for tightness, polish, accuracy and style. The goal is to help students develop the copy editor's "double vision" - the ability to see the story as a whole and line by line as a collection of parts, to see both the forest and the trees. This course is not only for students who want to become copy editors, but also for students who want to become better editors of their own writing.
PREREQUISITES: JOUR 2700.03

JOUR 3560 Great Journalists
CREDIT HOURS: 3
This course provides an introduction to some of the greatest journalists of all time. Students will discover the beautiful work these journalists created, and learn how and why they did it. This course also focuses on improving students' writing. By carefully considering great journalists' work, students learn techniques that make them better writers. Amazing characters students will meet include James Cameron, the only journalist to have a ringside seat at three atomic bomb blasts. Students get to know Ida B. Wells, who founded a newspaper exposing lynchings and racism when most media were ignoring the truth. Students will consider the work of Joan Didion, Martha Gellhorn, Peter Gzowski, Seymour Hersh, and many more. By the end of the course students will have a strong understanding of journalism's honourable legacy. They will know the brilliant qualities of great journalists, how hard they work, and how they changed the world.

JOUR 3575 Special Topics
CREDIT HOURS: 3
An examination of a topic in journalism not covered in depth in other courses. Topics may vary from year to year.
CALENDAR NOTES: Instructor permission required.
PREREQUISITES: Instructor permission required.
RESTRICTIONS: E3 students only. Instructor permission required.
FORMATS: Experiential Learning

JOUR 3660 Photojournalism
CREDIT HOURS: 3
This course will explore visual perception as applied to photojournalism. Students will be taught to "see" photos and explore ideas visually, especially as applied to the essence of news photography. Students will also examine the beginnings of news photography and modern developments in the business. Students must have their own digital or smartphone camera to take this course.
RESTRICTIONS: BJH students are not eligible to take this course.
EXCLUSIONS: JOUR 2702.03

JOUR 3661 Sports Journalism
CREDIT HOURS: 3
Students will study and discuss excellence in sports writing. They will learn how to craft lively and well-researched narratives about players, teams and the environment they operate in. The course will use real-life examples in an examination of various storytelling formats, from long-form narratives to on-deadline game reports to social media updates. It will also look at ethical issues related to sports reporting and the challenges of covering specific beats.
PREREQUISITES: JOUR 2700.03 or permission of the instructor.

JOUR 3662 The Journalist as Documentarian
CREDIT HOURS: 3
This course is about the journalist as a visual long-form storyteller, in short, a documentarian. Students will watch, analyze, and write about a curated program of Canadian and international documentaries. Discussion topics will include research, documentary structure and approach, editorial decision making, and journalistic and ethical considerations.
FORMATS: Lecture

JOUR 3670 Opinion Writing
CREDIT HOURS: 3
Do you aim to influence people with your perceptions, insights and ideas? If so, you need to know the difference between a rant and proving your point. You need to consider the tone and flow of what you write. Writing Opinion teaches these practices and more.

JOUR 3671 Freelance Journalism
CREDIT HOURS: 3
By choice or by circumstance, most journalists will freelance for at least part of their careers. This course examines the role of the freelancer in contemporary journalism and introduces students to the skills and strategies required for a successful freelance practice across all platforms: pitching, time and money management, networking, ethics and personal brand management.
PREREQUISITES: JOUR 2700.03
FORMATS: Lecture

JOUR 4858 Visual Storytelling Workshop
CREDIT HOURS: 9
PREREQUISITES: JOUR 4002.03 with a grade of C or better.

JOUR 4960 Online Features Workshop
CREDIT HOURS: 9
Longform journalism brings depth, engaging storytelling and compelling images to the world of digital news. In this workshop, students research, write and photograph a major feature on an important local issue for publication online in The Signal, and work as a team to edit, produce and promote their work through social media. Students also explore the magazine industry and freelance writing opportunities.

PREREQUISITES: JOUR 4950.03 with a grade of C or better
RESTRICTIONS: Include JNLH major.

JOUR 5857 Digital Reporting Workshop
CREDIT HOURS: 9
Students in this workshop will serve as reporters and editors for the school's online news portal, which serves the Halifax community. Beginning with a daily story meeting, students will report on news events as they happen each day, using a range of mulitmedia tools, They will also learn to pitch story ideas quickly and succinctly, and develop them into focused stories that put their research and critical thinking skills to work. The course places a heavy emphasis on using social media as a newsgathering and engagement tool. It gives students practice in headline writing and tagging, and also an understanding of analytic measures of story performance.
PREREQUISITES: JOUR 4002.03 with a grade of C or better
RESTRICTIONS: Must be enrolled in BJ
FORMATS: Other (explain in comments)

Centres and Institutes

Introduction
A number of centres and institutes for study and research in specific fields are based at the University. These are:

Atlantic Institute of Criminology

Director: D.H. Clairmont, BA, MA, PhD

The Atlantic Institute of Criminology (AIC) is a research institute that is heavily policy-oriented in the field of crime and the criminal justice system. Its mandate is to foster the exchange of information among researchers and policy makers in those areas. Consultative services are provided to fellow scholars and researchers, including graduate students and visiting professors, with respect to the planning and execution of research projects and related undertakings. The AIC is an entity that itself conducts extensive research in criminology, especially with respect to policing, the administration of justice, youth justice issues, race, ethnic and equity issues in justice. It has produced a significant body of policy-oriented research on Aboriginal and African-Canadian justice issues. The AIC Dalhousie website (Dalhousie - SOSA-AIC), which is regularly updated, provides a clear indication of the research products of recent years even though the website is largely restricted to research output that does not include articles in professional journals or edited books available elsewhere.

Atlantic Research Centre (ARC)

Director: Neale Ridgway
Phone: (902) 494-7133
Website: http://arc.medicine.dal.ca/

Established in 1967, the ARC conducts basic biomedical research in the fields of lipid metabolism and cell signalling, areas of fundamental importance to a variety of disorders including cancer, neurological, heart and infectious diseases. It also provides education and expertise in these fields to undergraduate and graduate students, other researchers, and the general public. The ARC houses state-of-the-art facilities for biochemical and molecular biological research. The Centre's staff hold appointments in the Departments of Pediatrics and Biochemistry and Molecular Biology in the Faculty of Medicine. Research at the ARC is supported by agencies such as the CIHR, NSERC, CFI, Heart and Stroke Foundation, National Cancer Institute, Atlantic Innovation Fund, and the IWK Health Centre.

Beatrice Hunter Cancer Research Institute

Director: Dr. Gerry Johnston
Administrative Director: Cindy Pettipas
Telephone: 902 494-4513
Fax: 902 494-8472
Email: cpettipas@dal.ca
Website: www.bhcri.ca

In 1999, Beatrice Hunter bequeathed $12.5 million to the Dalhousie Medical Research Foundation for cancer research, in memory of her parents, Dr. Owen and Mrs. Pearle Cameron. The bequest was placed in the Cameron Endowment Fund, with the annual earnings supporting cancer research at Dalhousie Faculty of Medicine. Early on, Beatrice Hunter's generosity sparked the creation of the Dalhousie Cancer Research Program (DCRP) that united key players within charitable, University and government sectors to create and support a thriving cancer research community. Over a short period of time, talented researchers and trainees were recruited to the region and collectively now secure millions of dollars of cancer research funding from outside granting agencies.

In 2009, the DCRP and its funding partners took the next bold step to become the Beatrice Hunter Cancer Research Institute (BHCRI), which was created to foster a more powerful, productive and collaborative cancer research environment throughout Atlantic Canada. The Institute provides regular workshops, lectures and symposia that serve as a common forum for researchers to share ideas and forge new collaborations within Atlantic Canada and beyond. The Institute also provides a key entry point for members of the public who want to learn more about cancer research in the region. The Institute represents the major resource within our region for those seeking training and careers in cancer research as well as those interested in supporting cancer research. The BHCRI has over 300 active members (both principal investigators and trainees at all career stages) throughout Atlantic Canada. BHCRI is supported by advisory committees populated by cancer experts and informed members of the public that provide advice on all aspects of cancer research and training. BHCRI receives financial support from a broad range of local and national organizations and the Institute takes responsibility for allocation of financial resources that support all aspects of cancer research and training, with funds allocated through peer-review processes that meet international standards.

Researchers within the Beatrice Hunter Cancer Research Institute share a collective vision and work toward the same goal: to save lives and ease the burden of cancer on individuals, families and society. Even though our funding comes from many sources, all of this funding stays in Atlantic Canada to build and support cancer research within our own region.

The Beatrice Hunter Cancer Research Institute was approved as an institution by Dalhousie on November 29, 2017.

Brain Repair Centre

Chair: Dr. Victor Rafuse, Director
Website: http://www.brainrepair.ca/

The Brain Repair Centre (BRC) is a collaboration of Dalhousie University, the Capital District Health Authority and the IWK Health Centre. The BRC is a multi-disciplinary unit focusing on research that can lead to the diagnosis, treatment, and repair of the brain to overcome the effects of neurological and psychiatric disorders such as Parkinson's disease, Huntington's disease, Amyotrophic Lateral Sclerosis (ALS), Epilepsy, Muscular Sclerosis (MS), stroke and spinal cord injury. The BRC grew out of the clinical Neural Transplantation Program, collaboration between basic neuroscientists and clinicians interested in treating Parkinson's disease. The

success of the Neural Transplantation Program led clinical and basic neuroscientists to decide to form the Brain Repair Centre. The BRC was formed in 1999 and has focused on stem cell transplantation, Parkinson's disease, spinal cord injury, psychotic disorders, stroke and neuroimaging as areas of innovation at Dalhousie University, Capital Health and the IWK Health Centre.

Examples of BRC achievements include:

- Attracted capital funding from private donors, institutions and the public sector to support construction and fit-up of the new Life Sciences Research Institute. When the LSRI is completed, the Brain Repair Centre will become the anchor tenant of this new research and commercialization building with state-of-the-art research, equipment and facilities.
- Establishment of collaboration agreements with research teams at McLean Hospital/Harvard University; Jilin University, China; Cardiff University, Wales; and Neurodyn, Inc.
- Establishment of a $12 million magnetic resonance imaging facility with the national Research council's Institute for Biodiagnostics (NRC-IBD).
- In 2006, the BRC was awarded $5.5 million for infrastructure from the Canadian Foundation for Innovation, the largest such award to date in Atlantic Canada. Also in 2006, BRC received a $3 million Atlantic Innovation Fund award for research, a follow-on to an earlier $3 million research award.
- Dr. David Clarke, a member of the Brain Repair Centre used a virtual model of a patient's brain to remove a simulated brain tumour before removing the actual tumour the following morning. Developed by a partnership of the National Research Council and a team of about 50 people in 10 Centres across Canada, this was the first such surgery performed in the world.
- Medtronic Canada, Capital District Health Authority, QEII Foundation, and the Brain Repair Centre established a Canadian Centre of Excellence and Training at the Halifax Infirmary. This new $3.5 million centre provides important new clinical facilities for training and development in imaging, spinal cord and neuromodulation.
- In the neurotransplantation field, the BRC is unique in Canada and one of only four centres worldwide involved in clinical application of neural transplantation, with the "Halifax Protocol" accepted as the world gold standard.
- The BRC is an innovative collaboration that integrates its research expertise with pioneers in the fields of imaging, neurology, stem cell neurobiology, vision, molecular neurobiology, pharmacology, psychiatry, clinical trials and cognitive neuroscience.
- The BRC brings together the expanding fields of neuroimaging and stem cell technologies with application to the treatment of neurological and psychiatric disorders.
- The BRC is the Atlantic Canada presence in the Stem Cell Network, a National Centre of Excellence in stem cell research.

The BRC places emphasis on moving basic science research from the bench to the clinical bedside and from the bedside back to the bench. A key objective of the BRC is to produce innovative technologies that will be commercialized.

Canadian Center for Vaccinology

Director:	Scott Halperin, MD
Associate Directors:	Robert Anderson, MD
	Joanne Langley, MD
	Janice Graham, PhD
Website:	www.centerforvaccinology.ca
Email:	ccfv@iwk.nshealth.ca
Facebook:	CCfVhfx
Twitter:	@VACCres
Phone:	902 470-8141
Fax:	902 470-7232

Vision
CCfV is an integrated collaborative multidisciplinary vaccine research team committed to excellent research. CCfV unites the biomedical and clinical sciences with the social sciences and humanities to effectively span the research continuum from basic discovery to translation into useful vaccines to prevent disease in humans and to change population and public health outcomes.

Organization
Activity within CCfV is organized into three groups

- Vaccine Discovery Group
- Vaccine Evaluation Group
- Health Policy & Translation Group

An **Advisory Committee** of CCfV investigators and external advisors provides counsel on the strategic direction and objectives of CCfV research.

Members
Anyone with an interest in vaccine-related research may apply for membership at http://www.centerforvaccinology.ca/about-ccfv/join-us/

For a list of current members go to http://www.centerforvaccinology.ca/about-ccfv/members/

CCfV is made possible by a continuing collaboration of Dalhousie University, the IWK Health Centre, and Capital Health. The CCfV's 20,000 square foot facility in the IWK Health Centre includes laboratories for microbiological and molecular research, ambulatory and inpatient clinical trial facilities, data analysis, training and conference space. It was founded in 2007 with financial assistance from the Canada Foundation for Innovation, the Nova Scotia Research and Innovation Trust, and the

Government of Nova Scotia's Department of Economic Development, among others. The Clinical Research/Vaccine Challenge Unit, which opened in 2009, was made possible by additional funding from Sanofi Pasteur.

Canadian Institute of Fisheries Technology (CIFT)

Director: A. T. Paulson, PhD
Phone: (902) 494-3280
Fax: (902) 420-0219
Website: http://cift.engineering.dal.ca

CIFT was established in 1979 at the former Nova Scotia Technical College (later TUNS). The federal Department of Fisheries and Oceans provided much of its early specialized laboratory and seafood pilot scale processing equipment, and Industry Canada provided start-up funding and designated CIFT a centre of excellence. As a government-approved laboratory for advanced technology, it also provides R&D services on a cost-recovery basis to industry and to various governmental agencies. The Institute promotes technology transfer and the development of advanced technologies aimed at more effective commercial utilization of both marine and terrestrial resources in Canada and throughout the world.

In addition, CIFT offers unique opportunities for post-graduate training and research through the Food Science program. Major areas of emphasis are: food biochemistry and microbiology; fats, oils, nutraceuticals and other bioactives; physical properties of foods; fish/food process engineering; food safety and preservation; food rheology, food fermentation and beverage science.

Facilities
CIFT is located in the MacDonald Building of Sexton Campus at 1360 Barrington Street in downtown Halifax. The Institute's facilities include:

- fats and oils laboratory
- food chemistry laboratory
- food development laboratory
- sensory evaluation laboratory
- food process engineering pilot plant
- low temperature storage facility
- food physical properties laboratory
- food microbiology laboratory

These areas contain specialized instrumentation and food processing equipment to enable experimental processing, laboratory analysis, and product storage evaluation. In addition to a computer- controlled cold-storage facility, the pilot plant is equipped for experimental processing including freezing, chilling, thermal processing, drying, centrifugal separation, and meat-bone separation.

The pilot plant is well equipped for thermal processing with an automated retort capable of steam, steam-air, or water immersion processing research. The specially designed cold-storage facility is computer controlled and particularly useful for the study of changes in foods as a result of frozen storage history. The pilot plant is also equipped with a custom-built computer-controlled heat pump dryer that is used in food dehydration experiments.

Specialized laboratory equipment includes: automated high performance and fast protein liquid chromatography systems, gas chromatography/mass spectroscopy system, preparative ultracentrifuge, multi-purpose refrigerated centrifuge, microtube centrifuge, analytical and preparative electrophoretic/isoelectric focusing equipment, pulsed field electrophoresis system, thermocycler, DNA gel electrophoresis, Hoefer Daltsix for 2D eletrophoresis, Image Master 2D elite software, capillary electrophoresis system, ultra-low temperature freezer, universal texture testing machine, various colorimeters, U.V. and visible spectrophotometer, spectrofluorometer, electrokinetic analyzer, workstation for mathematical modelling and computer simulation, Linkham shearing stage/microscope, Nikon microscope (various attachments), controlled stress rheometer with a high temperature/pressure attachment, controlled rate rheometer, Viscomat, and a rolling ball viscometer.

Educational Opportunities
Graduate (MSc and PhD) programs are available through the Food Science and Technology program. Also post-doctoral research opportunities are offered. Graduate level class work and research opportunities relate to food science, seafood processing technology, marine oils, engineering design, packaging technology, fish post-mortem biochemistry, food microbiology, food rheology and food process science. Students with degrees in food science, engineering, chemistry/biochemistry, microbiology or biology are invited to apply.

Centre for African Studies

Phone: (902) 494-3814/494-1377
Fax: (902) 494-2105
Director: Theresa Ulicki, PhD

The mandate for this Centre is under review.

This centre, established in 1975, advances instruction, publication, research and development education programs in African Studies. Associated faculty offer classes through the Departments History, International Development Studies, Political Science, French, Sociology and Social Anthropology and Philosophy. The Centre organizes academic and informal seminars and public policy conferences on Africa and encourages interdisciplinary interaction at all levels on African subjects and issues. It co-operates with the International Development Studies department and with the International Research and Development office.

Centre for Comparative Genomics and Evolutionary Bioinformatics

Director: Andrew J. Roger, PhD
Coordinator: Wanda Danilchuk
Phone: (902 494-2620
Fax: (902) 494-1355
Website: http://www.cgeb.dal.ca

The Centre for Comparative Genomics and Evolutionary Bioinformatics (CGEB) at Dalhousie University encompasses an interdisciplinary group of researchers in the Faculties of Medicine, Science and Computer Science. Although microbial genome evolution and diversity is at the heart of many of the CGEB researchers' activities, our work spans computational biology, computer science, statistical modeling and comparative genomics, with a strong focus on method and theory. The application of DNA sequencing technologies to characterize the genomes of a wide diversity of microbes has generated vast quantities of genome sequence data. Now the intellectual challenge is to develop from this enormous resource more comprehensive and theoretically robust phylogenetic, genetic and ecological models to further our understanding of the many roles of microbes in the biological world.

CGEB researchers are united by the common goal of using this vast resource of genomic information to elucidate evolutionary patterns and processes: the pathways by which microbial organisms have diversified over the last 3.5 billion years of Earth's history and through which they continue to shape the global environment. Only through the integration of experimental genomic approaches and sophisticated bioinformatic modeling will we be able to achieve this goal.

CGEB researchers and trainees are supported by grants from the Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), and the Nova Scotia Health Research Foundation (NSHRF). The Centre itself is supported by funding from the Tula Foundation (http://www.tula.ca), the Faculties of Medicine, Science, and Computer Science, and the Provost and Vice President Academic. CGEB is also supported by a large grant from the Tula Foundation (http://www.tula.ca) that provides funds for training top-notch postdoctoral and graduate trainees in the CGEB research specialties. CGEB also has a regular seminar series that brings world renowned scientists to speak at Dalhousie University and interact with faculty members and trainees.

Centre for Environmental and Marine Geology

Contact: Ann Bannon, Administrator

This Centre was originally founded as the Centre for Marine Geology in 1983 to promote interdisciplinary studies of various types of problems in marine Geology, capitalizing on our unique position in Canada with links to related departments such as Oceanography, Physics, Biology, the Bedford Institute of Oceanography and our hosting of the Canadian office of the Ocean Drilling Program. Since 1983 the role of the Centre has changed, reflected in the new name, which better describes the work being done now where marine geology is combined with environmental problems. We have three new faculty that expand our expertise into new chronological techniques and permafrost as well as strengthening our capacity in the petroleum-related environmental geology. Some of the objectives of the Centre are to: 1) continue to expand our participation in a revitalized east coast offshore energy related problems; 2) continue our climate-change work with a variety of approaches both offshore and on land; 3) expand into Arctic regions both with major oceanographic and shore-based programs; and 4) expand our capacity to help solve some of the many environmental geology problems associated with urbanization.

Centre for European Studies

Director: Jerry White (Canada Research Chair in European Studies)
Email: jerry.white@dal.ca

The Centre for European Studies was established in 2007 to promote research on all aspects of European society and its relations with the rest of the world. The Centre facilitates the work of Europeanist scholars at Dalhousie, including the participating Canada Research Chairs in European Studies, enables research collaboration with scholars from Canada and around the world on projects related to Europe and the European Union.

Centre for Innovation in Infrastructure

Director: John Newhook, PhD, PEng
Location: Room B233, Sexton Campus
1360 Barrington Street
PO Box 1000
Halifax, NS B3J 2X4
Phone: (902) 494-2847
Email: forgeron@dal.ca

The Centre for Innovation in Infrastructure is an industry-oriented research centre with the Faculty of Engineering and with strong affiliations with the Department of Civil and Resource Engineering. Established in 1983 as the Nova Scotia CAD/CAM Centre, the Centre originally focussed on assisting Atlantic Canadian industry with the integration of computer added manufacturing and computer aided design technology in their operations. Since the 1990's the Centre has continued to evolve to meet the needs of industry in other areas and to take a more active role in research and development in civil infrastructure.

Today the Centre act as a focal point for research, innovation and technology transfer in Civil Infrastructure related areas. The major funding partnerships are with the Atlantic Canadian departments of transportation, industries related to bridge and structural engineering and with companies developing new materials and products for infrastructure.

Our combined areas of expertise and research interests include:

- Structural Analysis and Design
- Structural Health monitoring
- Bridge engineering and innovations
- Soil-steel structures
- Fibre reinforced polymers
- Fibre reinforced concrete
- NDT of bridge decks and pavements
- Sustainable asphalt technology

The Centre has acquired and maintains significant testing equipment related to these research areas and contributes to the maintenance and operation of the research facilities within the Department of Civil and Resource Engineering.

Centre for International Trade and Transportation

Location:	6100 University Avenue, Room 4065
	PO Box 15000
	Halifax, NS B3H 4R2
Director:	M. Ali Ülkü
Phone:	(902) 494-3848
Email:	ulku@dal.ca
Fax:	(902) 494-1107
Website:	http://citt.management.dal.ca

The Centre for Research in Sustainable Supply Chain Analytics (CRSSCA), housed in the Rowe School of Business, is the supply chain research hub in Eastern Canada. We conduct interdisciplinary research that sheds light on complex issues in supply chain management. Focusing on economic, environmental, and social sustainability, CRSSCA aims to create new knowledge in prescribing solution models for data-driven industrial problems, devise analytical tools for better decision-making, and develop insights into the intricate relationships between supply chain operations, green logistics (global trade, inventory, process and product design, procurement, manufacturing, transportation), and sustainable consumption. CRSCCA supports an nnual workshop on Supply Chain and Logistics Management.

Centre for Marine Vessel Development and Research (CMVDR)

Contact: Josh Leon, Dean of Engineering

The mandate for this Centre is under review.

Centre for the Study of Security and Development

Director: Brian Bow

Established in 1971 the Centre is concerned with teaching, research, publication, policy advice and other professional activities in the various aspects of foreign policy, security studies, development studies, and international politics.

The Centre's work is concentrated in the areas of Canadian and comparative maritime security and oceans policy, Canadian and American foreign and security policies, and global security and international development. Its geographical specializations include Canada, North America, Europe, and the South (especially Africa, Asia, and the Caribbean). The Centre encourages activities in these areas by Faculty, Research, and Doctoral Fellows, and advances communication among local and international communities in these fields through seminars, workshops conferences and colloquia, often in collaboration with local, national, and/or international organizations. It publishes occasional papers and monographs on Maritime Security, Canadian Defence and Security, and Global Security issues.

The Centre is an integral part of the Department of Political Science. Centre faculty offer classes through the Department in foreign and defence policy, international relations and development, and maritime affairs at both undergraduate (majors and honours) and graduate (MA and PhD) levels. They also supervise masters and doctoral theses in these fields.

For further information, consult the Centre's website: dal.ca/sites/cssd.html.

Centre for Transformative Nursing and Health Research

Director: Dr. Ruth Martin-Misener
Research Coordinator: Julie Barry
Location: School of Nursing, 5869 University Avenue, Halifax NS B3H 4R2
Phone: (902) 494-6125

The Centre for Transformative Nursing and Health Research is a designated Research Centre at Dalhousie University. The vision of the Centre is to undertake collaborative research that develops, enhances, expands and disseminates evidence and knowledge to inform ways to improve and sustain people's health and wellbeing. The mission of the Centre is to generate nursing research and inspire discovery that is methodologically sound, actionable, and dedicated to improving outcomes for those requiring health care, their providers and the overall system. Through strong research partnerships and extensive research capacity building

initiatives, the Research Centre will be acknowledged as a key resource for health system planning. This collective strength creates a more research-intensive environment, transforming the culture of health research within and beyond the School so that evidence and the quest for new knowledge are well integrated into teaching and clinical practice. The overall improved scholarly environment ensures graduates engage in original research, advance professional knowledge and are well positioned to be leaders in practice and health system change.

In concert with the School of Nursing's transformation strategy, Academic Plan and Research Strategy and informed by Boyer's Model of Scholarship, the Centre's activities will focus on four research pillars: the health needs of people, health workforce and health systems planning, marginalized populations and health equity, and knowledge translation.

Centre for Water Resources Studies

Director:	Graham Gagnon, PhD, PEng
Location:	Office D-514
	1360 Barrington Street
Phone:	(902) 494-3268
Email:	cwrs@dal.ca

The Centre for Water Resources Studies was established in December 1981, by a resolution of the Board of Governors (TUNS). The objectives of the Centre are to carry out applied research which contributes to the effective and sustainable protection of water resources in Atlantic Canada, nationally and internationally, and to facilitate the transfer of new knowledge to potential users. Research programs directed by the Centre address the design of cost-effective on-site wastewater systems, soil erosion processes, drinking water treatment, the use of roofwater cisterns for domestic water supply, eutrophication, watershed management and the computer modeling of hydrodynamic and hydrochemical processes. The Centre also has a number of research advisory panels, which involve professionals from industry, government and academia in applied research related to water use and water management.

Facilities
The Centre for Water Resources Studies is located on the fifth floor of "D" Building on Sexton Campus. Laboratory and office space is available for specific graduate research topics, as well as ongoing research carried out by Centre personnel. Analytical equipment includes instrumentation for determining low levels of major ions and nutrients, as well as trace quantities of metal ions in water. The Centre has apparatus for laboratory investigation and pilot scale testing of innovative water treatment methods using Dissolved Air Floatation (DAF) and ozonation and has worked with local consultants and municipalities to develop new applications of the technologies. The Centre is a North American leader in the development of on-site sewage disposal and has had an active research program in this area since 1987. In conjunction with the Faculty of Agriculture, the Centre has a field laboratory investigating sloping sand filters and septic disposal.

Educational Opportunities
The Centre co-operates with academic units in the training of undergraduate and graduate students who have an interest in water resources. The Centre also participates in the program leading to a dual degree in water resources engineering and planning, in conjunction with the School of Planning into the Faculty of Architecture and Planning.

Children and Youth in Challenging Contexts Institute

Director: Dr. Michael Ungar

The Children and Youth in Challenging Contexts (CYCC) Institute is an interdisciplinary research initiative and a network of Canadian and international researchers committed to making a lasting difference in the lives of vulnerable children and youth. CYCC Institute researchers examine the political, social, psychological and biological factors that pose serious risks to children and youth exposed to adversity across contexts and cultures. Through interdisciplinary collaboration and innovation, the Institute promotes change at the program and policy level that will improve the protection and well-being of young people around the world. More than 200 policy makers, mental health practitioners, directors of local and international NGOs, law enforcement officers, Aboriginal child welfare advocates, national defence personnel, and researchers are among the community partners who provide leadership to, and benefit from, the work of the Institute.

Clean Technologies Research Institute

Director:	Daniel Boyd, PhD
Administrative Offices:	6414 Coburg Road
	PO Box 15000
	Halifax, NS B3H 4R2
Phone:	(902) 494-6373
Fax:	(902) 494-8016
Website:	http://irm.dal.ca

Established in 2002, Clean Technologies Research Institute is made up of over 90 faculty members in six faculties (Science, Engineering, Dentistry, Medicine, Architecture and Planning and Health). The goals of the Institute include advancing the collective interdisciplinary research efforts in materials science and engineering at Dalhousie University, facilitating interdisciplinary teaching in materials science within the existing discipline structure, and enhancing interactions between materials researchers at Dalhousie University with relevant government laboratories and industry, especially within the region. The Institute leads collaboration within the university on interdisciplinary applications to funding agencies for major equipment and research infrastructure, and collaborates with external organizations to pursue research opportunities.

All Dalhousie University faculty members carrying out research in the area of materials are eligible to be Members of Clean Technologies Research Institute. Postdoctoral fellows and graduate students associated with these research groups are invited to become Associate Members of Clean Technologies Research Institute.

In addition to equipment operated by individual members of the Institute, Clean Technologies Research Institute has established (2003) the Facilities for Materials Characterization, an $11 million suite of instruments managed by the Institute.

The equipment includes:

- High-field solid-state NMR spectrometer (managed by the Nuclear Magnetic Resonance Research Resource)
- Scanning electron microscope
- Focused ion beam
- X-ray photoelectron spectrometer (XPS)
- Secondary ion mass spectrometer (SIMS)
- Physical property measurement system (PPMS)
- Scanning thermal microscope (SThM)
- Hot press
- Grindo Sonic
- High-speed motion recorder/analyzer
- FT-Raman spectrometer

These facilities are open to external users. Please contact IRM@dal.ca for details.

Dalhousie Institute for Society and Culture (DISC)

Director: Associate Dean, Research in the Faculty of Arts and Social Sciences
Email: discfass@dal.ca
Website: http://arts.dal.ca/Research

Established in 2008, the Dalhousie Institute on Society and Culture serves as the virtual home for the many divergent research activities and initiatives within the Faculty of Arts and Social Sciences. Its primary function is to support research within the Faculty through various fellowship programs, publicity and fund raising initiatives, publishing ventures, conferences and lecture series, and cross-disciplinary exchanges.

The Institute encompasses two broad and overlapping research clusters: *Societies in Local, National, and Global Contexts*, and *Cultural Representations and Presentations*. The former cluster aims to develop new knowledge about political, social, and economic transformations, about national and regional identities, and about global relations, whereas the latter seeks to investigate and preserve cultural traditions, literatures, and languages, to foster studies and theories of cultural identity, to stimulate artistic innovation, to examine the shaping influence of beliefs and religions, and to contribute to the cultural life and profile of the province. These two clusters, with a flexibility and breadth unequalled in Eastern Canada, are uniquely equipped to analyze social and cultural change.

Global Health Office

Director: Shawna O'Hearn
Location: C-241, 5849 University Avenue
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-1965
Fax: (902) 494-2799
Email: gho@dal.ca
Website: http://dal.ca/globalhealth

Working through an interprofessional lens, the Global Health Office is committed to training global health leaders who strengthen health systems for vulnerable populations in Canada and abroad. The office prepares students, residents and faculty doing clinical electives, training or research with our international partners as well as leads local and global electives.

- Events focusing on relevant and timely global health issues are organized through the office including global health rounds, speaker series, conferences.
- Opportunities to become involved in research and mentorship.
- A certificate in “Advocates in Global Health”.
- Annual awards are presented to a student, resident and faculty member who demonstrate leadership in global health
- Partnerships with organizations strengthen the global reach including CSIH (Canadian Society for International Health), CCGHR (Canadian Coalition for Global Health Research), National Network on MNCH (Maternal, Newborn and Child Health), ACIC (Atlantic Council for International Cooperation), GHEC (Global Health Education Consortium), and International Centre (Dalhousie)

Health Law Institute

Director:	Constance MacIntosh, BA, MA, LLB
Location:	Dalhousie University
	6061 University Avenue
	PO Box 15000
	Halifax, NS B3H 4R2
Phone:	902 494-6881
Email:	902 494-6879
Email:	hli@dal.ca
Website:	http://www.dal.ca/hli

An Interdisciplinary Institute of the Faculties of Law, Medicine, Health, and Dentistry, the Institute is committed to the advancement of health law and policy and the improvement of health care practice and health systems through scholarly analysis, professional education, and public service. Its objectives are:

1. To foster strong and innovative health law and policy scholarship by:
   - cultivating interdisciplinary health law and policy research networks
   - engaging in principled analysis of both recognized and emerging areas of health law and policy
   - enabling knowledge transfer
2. To advance health law and policy education by:
   - designing and implementing education programs for law, medicine, health professions and dentistry students
   - providing continuing education opportunities for health professionals and legal practitioners
3. To serve the public in our areas of expertise by:
   - contributing to the societal understanding of health law and policy issues
   - providing expertise and consulting to organizations in the public sector
   - engaging in and supporting the policy-making process at local, regional, provincial, national and international levels.

Healthy Populations Institute

Managing Director:	Maureen Summers, MSc
Scientific Director:	Lois Jackson, PhD
	Project Coordinators,
Other:	
	Research Scholars, Research Assistants, and students
Phone:	(902) 494-2240
Fax:	(902) 494-3594
Website:	www.dal.ca/hpi

The Healthy Populations Institute or HPI (formerly Atlantic Health Promotion Research Centre, AHPRC) is a leading Canadian health promotion research centre based at Dalhousie University. HPI was established in 1993 to conduct interdisciplinary, collaborative population health and prevention research that informs policies and programs to improve the health and well-being of Canadians.

The centre is conducting research on health services and health systems, healthy eating and physical activity, knowledge translation, prevention of chronic illness and disability, oral health of seniors, youth obesity, aboriginal health, and harm reduction.

The HPI is currently supported by the Faculties of Health, Dentistry, and Medicine, and the Office of the Provost and Vice President Academic at Dalhousie University. Support for specific research projects comes from agencies such as Canadian Institutes for Health Research, Social Sciences and Humanities Research Council of Canada, Nova Scotia Health Research Foundation, and charitable sector research institutes, and private foundations.

Our research associates hold appointments in the Faculties of Health, Architecture, Management, Medicine, Dentistry and Science.

Institute for Big Data Analytics at Dalhousie University

Director: Dr. Stan Matwin

Location: Goldberg Computer Science Building

6500 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-4320

Email: bigdata@cs.dal.ca

Website: https://bigdata.cs.dal.ca

Big data is not a single breakthrough invention, but rather a coming together and maturing of several technologies: huge, inexpensive data harvesting tools and databases, efficient, fast data analytics and data mining algorithms, the proliferation of user-friendly data visualization methods and the availability of affordable, massive and non-proprietary computing. Using these technologies in a knowledgeable way allows us to turn the masses of data that are created daily by businesses and government into an important asset that will result in better, more informed decisions. This could lead, for an example, to intelligent, personalized electric power pricing for consumers, to optimized port traffic management or to the discovery of interesting patterns of migrations in marine life.

The Institute for Big Data Analytics (Big Data @ Dal) acts as a catalyst and a container in which a number of Dalhousie researchers and internationally renowned experts in all of the above areas can work together on Big Data.

The Institute has three main goals. Firstly, we want to become an international hub of excellence in big data research - a place to which scientists will come to work on interesting problems, but also in search of interesting, real-life applications. Our second goal is to make the Institute very relevant to local industries in Nova Scotia, and in Canada. To achieve this goal, we want to focus - for example - on becoming a world leader in the analytics of marine data and all aspects relating to marine biology, fisheries and shipping. Thirdly, we will develop a focused and advanced training program that covers all aspects of big data, preparing our next generation of researchers and practitioners for this important field of study.

Law and Technology Institute

Director: Robert J. Currie, BA, MA, LLB, LLM

Associate Director: Steve Coughlan, BA, MA, LLB, PhD

Location: Schulich School of Law

6061 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: 902 494-1469

Fax: 902 494-1316

Email: lynda.corkum@dal.ca

Website: www.dal.ca/faculty/law/LATI.html

The Law and Technology Institute was established at the Schulich School of Dalhousie in 2001 to provide teaching, research, and continuing education on technology law issues to students, faculty members, and the practicing Bar. The Institute participates, with the faculties of Computer Science and Management, in Dalhousie's Master of Electronic Commerce Program, and has been involved in collaborative projects with the private sector and governments on information technology issues. Also, in conjunction with Dalhousie's Industry Liaison and Innovation Office, the Institute sometimes offers a student placement program in intellectual property and commercialization. Its faculty members provide graduate supervision to students interested in the developing field of technology law, and are active in law and technology organizations, such as IT.Can and the International Society for Law and Technology. Faculty members of the institute are writers of the English edition of IT.Can bi-weekly newsletter. The Institute hosts an Eminent Speakers Series, which brings leading IT lawyers and academics to Dalhousie to share their expertise. The Institute is home to the Canadian Journal of Law and Technology, co-edited by Professors Currie and Coughlan. The CJLT is the pre-eminent technology law review in Canada.

Classes Offered:

- Law and Technology
- Internet and Media Law
- Privacy Law
- Intellectual Property Law
- Information Technology Transactions

- Entertainment Law
- Intellectual Property and Commercialization Placement
- Special Topics on Intellectual Property (IPII)
- Copyright Law
- Patent law

Students also have the opportunity to pursue specialized interests in fields such as criminal law, health law and alternate dispute resolution, as they relate to law and technology.

MacEachen Institute for Public Policy and Governance

Scholarly Director: Kevin Quigley, PhD

The MacEachen Institute for Public Policy and Governance at Dalhousie University is a nationally-focused, non-partisan, interdisciplinary institute designed to support the development of progressive public policy and encourage greater citizen engagement. The MacEachen Institute is named in honour of Allan J. MacEachen, retired federal cabinet minister and senator and one of Nova Scotia's most accomplished political leaders.

The MacEachen Institute is a collaboration between Dalhousie's Faculties of Arts & Social Sciences, Law and Management, as well as the Office of the Vice-President, Research. It stimulates debate, discussion and research by engaging thought leaders from across Canada and internationally.

The Institute builds on Allan J. MacEachen's legacy and passion by promoting vigorous debate on progressive public policy issues. Each fall, the MacEachen Institute hosts the *Policy Matters Speaker Series*, a weekly panel discussion held on Dalhousie campus that is open to the public. It encourages and engages the active participation of Canadian citizens in civic activities, on topics ranging from community and neighbourhood issues to those of national concern.

Marine & Environmental Law Institute

Location:	Schulich School of Law 6061 University Avenue PO Box 15000 Halifax, NS B3H 4R2
Phone:	902 494-1988
Fax:	902 494-1316
Email:	MELAW@dal.ca
Website:	http://www.dal.ca/law/MELAW

The Institute, which is housed in the Schulich School of Law, carries out teaching, research capacity-building and consultancy activities and also directs the MELP academic specialization. MELAW provides a specialization in marine and/or environmental law to JD students. In addition to their scholarly research and publication activities, MELAW faculty, associates and staff carry out research projects and provide advisory services to agencies of the United Nations, international non-governmental organizations, and regional organizations as well as assisting government departments, private sector institutions and non-governmental organizations in Canada and overseas.

The Marine & Environmental Law Institute is home to the editorial office of the Ocean Yearbook and the Journal of Environmental Law and Practice (JELP). The Ocean Yearbook is a major international interdisciplinary annual, devoted to ocean affairs, published in collaboration with the International Ocean Institute in Malta. Dalhousie law students have the chance to gain experience working as research assistants on the Institute's research projects and workshops, and assisting with editing the Ocean Yearbook. JELP is the leading environmental law journal for practitioners and academics in Canada.

MELAW supports student collaboration in addressing environmental issues through the Environmental Law Students' Society (ELSS) and the East Coast Environmental Law Association (ECELAW), a non-governmental organization dedicated to environmental law education and law reform. MELAW encourages interdisciplinary collaborations within the Dalhousie University community including the School for Resource and Environmental Studies (SRES), the Marine Affairs Program (MAP), the College of Sustainability, the International Development Studies Program (IDS), the Ocean Frontier Institute (OFI), the Ocean Tracking Network (OTN) led by the Department of Oceanography and the Institute for Ocean Research Enterprise (IORE). MELAW also participates in national collaborations such as, the *OceanCanada* Partnership. International linkages include: the Global Forum on Oceans, the IUCN Academy of Environmental Law, the Australia Canada Ocean Research Network (ACORN) as well as numerous other partner institutions in Asia, the Caribbean, Europe, South America and the United States.

Minerals Engineering Centre

Director: Josh Leon, PhD, PEng

Location: G Building, Sexton Campus

1360 Barrington Street

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-3955

Fax: (902) 494-3506

Email: mec@dal.ca

Website: http://minerals.engineering.dal.ca

The Minerals Engineering Centre was established from the Laboratory for the Investigation of Minerals. The Minerals Engineering Centre provides research, analytical and advisory services to industries, universities, and government bodies in Atlantic Canada, Canada and International. The Centre is located in G Building on Sexton Campus and is affiliated with the Materials Engineering program. The services offered include:

- Sample preparation of ores, soils, silts, rocks, cores, clay fraction and wood pellets
- Size analysis, including screening, sieving, and sub-sieve analysis
- Minerals separation using dense liquids
- Physical and chemical analytical methods using atomic adsorption, XRD, ICP-OES, AA, x-ray fluorescence spectographic, wet chemical techniques and carboy/sulphur analysis
- Analysis of samples including geological, metalliferous ores, industrial minerals, coals, metals, alloys and water
- Mineral processing test work covering the whole range of investigative techniques from bench scale to pilot plant, including crushing, grinding, classification, gravity separation, dense medium separation, magnetic separation, electrostatic separation, flotation, flocculation, thickening, filtration, and drying
- Evaluation of biomass fuels calositic value of raw material and wood pellet.

The Minerals Engineering Centre provides opportunities for undergraduate and graduate students to learn various analytical and testing techniques applicable in their course of studies. It also offers services to faculty members to assist in their teaching and research activities.

Further information may be obtained from the Director of the Centre.

Neuroscience Institute

Contact: neuroscience.institute@dal.ca

Website: http://www.neuroscience.dal.ca

The Neuroscience Institute was founded in 1990 to promote and coordinate research in neuroscience, the modern interdisciplinary study of the brain and nervous system.

It serves as an umbrella organization to foster research and training in neuroscience at Dalhousie. A major objective is to increase understanding of the functions of the nervous system in health and disease. To this end, the Institute coordinates the activities of neuroscientists in the Faculty of Medicine, the Faculty of Science, the Faculty of Computer Science and the School of Biomedical Engineering, facilitating collaboration between clinical and basic scientists in these Faculties. Some foci of current research activity include: development and plasticity of the nervous system; cognitive neuroscience; motor control; autonomic function; synaptic function; and sensory physiology. The Institute also provides a vehicle to seek new sources of funding, and encourages new initiatives in all areas of neuroscience research at Dalhousie. In addition, the Institute promotes and coordinates training programs in neuroscience currently offered through its constituent departments at both the undergraduate and graduate levels. It sponsors seminar series annually, and coordinates a variety of community outreach events.

Norman Newman Centre for Entrepreneurship

Director: Dr. Mary Kilfoil, BBA (St. FX), MA (Carleton), PhD (Dalhousie)

Lead Researcher: Dr. Mary Kilfoil

Phone: (902) 494-3066

Website: http://launchDal.ca
http://entrepreneurship.dal.ca

Dalhousie's Norman Newman Centre for Entrepreneurship was established to be a platform that supports entrepreneurial activity and initiatives across all faculties within Dalhousie University and with external stakeholders in the community through its three primary objectives; research, curriculum development and extracurricular programming.

The Norman Newman Centre carries out this mandate under its branded banner of **Launch Dal** - the flagship innovation-driven entrepreneurship program at Dalhousie University that supports the university's strategic direction. The work of the Centre contributes to cultural and economic vitality, locally and globally and has fostered creativity, innovation and entrepreneurship. This is exemplified through research, the development of award-winning curriculum based on this research, the delivery of high-impact extracurricular entrepreneurship programming, and the emergence of successful startup ventures generating economic impacts in the local ecosystem.

Since 2004, we've been cultivating and promoting entrepreneurship and innovation through curriculum, workshops, seminars, and competitions so that students, faculty and members of the community can develop the skills and creativity needed to bring ideas to market. We cultivate a pipeline of creators and entrepreneurs for the local and regional economy who have the skills to turn ideas into successful ventures.

The Centre has been successful in building deep connections to the regional innovation ecosystem that transcend the university, government and industry boundaries. We have positioned ourselves as an enabling organization that works with students across the university and builds bridges to the community at large. As we continue this work we have the potential to make a substantive contribution to the University, and specifically strategic priority 3.1.

The Centre is attached to the Rowe School of Business, within the Faculty of Management, Dalhousie University. NNCE promotes entrepreneurship in its many forms, through innovative curriculum, applied research and collaborative extension work (outreach). Our definition of entrepreneurship is broad and includes the development or growth of enterprises for profit, for social benefit and for sustainability. Our research is field-based and involves working with real ventures, on real projects, using state-of-the-art methodologies. Our extension work is multi-disciplinary and ranges from internships with entrepreneurs to collaborations with other faculties throughout the university.

All of our programs are designed to enhance the student's entrepreneurial knowledge, skills, and networks. In addition to supporting technology and technical start-ups through mentoring, coaching and training efforts, the Centre will provide mentoring, coaching and training to entrepreneurial students, create exemplars of technology and technical entrepreneurship through research projects and further expand the relationship with the business community.

Nuclear Magnetic Resonance Research Resource (NMR3)

Director: J. K. Rainey, BSc, MSc, PhD
Facility Coordinator: M. D. Lumsden, BSc, PhD
Solid-state NMR Coordinator: U. Werner-Zwanziger, BSc, PhD

Established in 1982 with assistance from the Natural Sciences and Engineering Research Council, the Resource is located in the Department of Chemistry and is used by faculty, researchers and graduate students in all Maritime universities, the NRC, local industry and many Dalhousie Departments. It is concerned with applications of magnetic resonance spectroscopy to problems in chemistry, materials science, biology, biochemistry and related areas. Its current instrumentation includes Bruker, Avance 300 and Avance 500 NMR spectrometers for liquids and Bruker Avance DSX 400 and Avance 700 NMR spectrometers for solids. NMR^3 users also have direct access to a Bruker Avance III 700 NMR spectrometer with cryoprobe capabilities for liquids experiments. The Avance 500 and Avance 700 NMR spectrometers were installed in 2003 with funding from NSERC, the Canadian Foundation for Innovation and the Atlantic Innovation Fund. The cryoprobes on the Avance III 700 were purchased in 2009 by Dalhousie University through an Atlantic Canada Opportunities Agency Grant. The Resource offers facilities for hands-on use by researchers and also provides NMR spectra and expertise to scientists throughout the Atlantic Region and beyond.

For more information see: http://nmr3.chemistry.dal.ca.

Trace Analysis Research Centre

Director: A. Doucette, BSc, PhD

The Trace Analysis Research Centre (TARC) was established in 1971 with the assistance of a grant from the National Research Council. Its mission is to train analytical chemists and, through research, to contribute to the advancement of analytical chemistry. Members of TARC from Dalhousie and associated institutions comprise a group with expertise in a wide range of chemical analysis techniques in areas such as spectroscopy, chromatography, mass spectrometry, electrochemistry, and nuclear analytical chemistry.

Resources and Services

Academic Advising

Academic advisors are available across campus to provide students with academic advising and support. They coach, support and guide students to set and meet educational and career goals.

For students in the Faculty of Arts & Social Sciences, Faculty of Science and Faculty of Agriculture, Student Success Advisors can help you:

- clarify your education and career goals
- monitor your plan of study
- choose courses that relate to your goals and interests
- address concerns about your studies
- apply strategies for academic success
- identify skill-building opportunities such as co-op or study abroad
- develop an action plan if you are struggling in school
- explore academic options (including academic policies) when faced with a personal/family emergency
- determine where to go for additional support

For students in other faculties, there are faculty-specific advisors available to help.

Find out more: www.dal.ca/advising
Halifax campuses: advising@dal.ca or (902) 494-3077
Agricultural campus: ssdalac@dal.ca or (902) 893-6672

Access Services

The Student Accessibility Centre (Halifax Campus) and the Student Success Centre (Agricultural Campus) serve as Dalhousie's centres of expertise on student access and accommodation. The work of our access centres is governed by Dalhousie's Student Accommodation Policy, to best support the needs of our students. We advise students who require accommodation to ensure full access to their on-campus living and learning communities.

Student Accessibility advisors can help you:

- implement an accommodation plan to reduce or remove barriers to your learning
- provide access to technology supports to enhance your learning
- identify scholarship and bursary options
- connect with on and off-campus resources
- navigate accessibility challenges

If you've had accommodations previously, or have questions about accommodations, early consultation with an advisor is strongly encouraged. An advisor will meet with you to determine how to facilitate your success, and if accommodations are required, we implement those accommodations by liaising with your instructors. We also consult with faculty, staff, parents and prospective students, who have questions regarding access and accommodation.

Find out more: www.dal.ca/access

Halifax campuses: access@dal.ca or (902) 494-2836
Agricultural campus: ssdalac@dal.ca or (902) 893-6672

Alumni Engagement

As a Dal student, you are joining a diverse global family of current students and over 135,000 Dalhousie graduates. These graduates, called alumni, are available to provide support to you in many ways throughout your time at Dalhousie. As students, you can interact and network with alumni at events, participate in meaningful volunteer opportunities with alumni, and gain valuable career advice.

Students are invited to events and initiatives planned by alumni and hosted by the alumni engagement team, on campus and around the world. There are social events, educational opportunities, formal dinners, networking events, Homecoming and much more. Throughout Dalhousie's 200th anniversary in 2018, there are even more exciting events and initiatives to look out for. You can also volunteer with the alumni engagement team, getting involved in initiatives at Dalhousie and within the Halifax community. Dalhousie alumni are always willing to provide you with career advice, the inspiration for where you can go with your Dal degree and a general community of support to you as a student.

Once you graduate with your Dal degree, you will become a member of our growing alumni community. Your interactions with alumni will grow too: you can attend social and networking events around the world, volunteer as an alum, join a global alumni network, and have access to a range of alumni benefits and discounts.

Visit the alumni website at alumni.dal.ca to learn more and follow us on Twitter, Facebook, LinkedIn and Instagram to find ways to get involved with the alumni community throughout your time at Dalhousie and beyond.

Athletics and Recreation

Dalhousie offers a wide array of programs, facilities and services to suit the diverse sport, recreation and wellness needs of our students. Located on the Studley Campus, Dalplex is the university's largest fitness centre. Dalplex membership is included in full-time student fees, so students can simply bring their DalCard and swipe it in the turnstile for access to:

- the Cardio Plus Centre
- two climbing facilities
- two weight rooms
- more than 35 weekly fitness classes
- an eight-lane, 50m indoor pool
- a 1/6-mile indoor track
- drop-in times for recreational basketball and volleyball
- racquet courts
- two outdoor tennis courts
- the Fun Zone play area for children.

The F. H. Sexton Memorial Gymnasium includes a fitness centre, a gym with hardwood courts, group fitness classes, two squash courts, and change rooms with lockers for easy access for students on the Sexton Campus.

Athletics and Recreational Services in Halifax also offers many climbing, fitness, and recreation programs and classes each term, along with a broad range of intramural leagues and tournaments. Intramural sports are fun, free and an excellent way to meet other students. Sports offered include soccer, flag football and hockey in the fall, to curling, basketball and inner tube water polo in the winter term - and that's just the tip of the iceberg! In Halifax students have the opportunity to take part in more than 20 different recreational and competitive sports clubs, which are organized and run by students. The Tigers varsity programon the Halifax campuses consists of 14 teams (men's and women's basketball, cross country, hockey, soccer, swimming, track and field, and volleyball) that compete regionally in the Atlantic University Sport (AUS) conference and nationally in U Sports.

The Langille Athletic Centre is the sport and recreation facility for students on the Agricultural Campus. Intramurals and student activities on the Agricultural Campus include co-ed soccer and softball, basketball, volleyball, badminton, winter ski trips to Wentworth Skil Hill and recreation time dedicated for students and members on Sunday evenings. The DAL AC Rams varsity program includes opportunities for participation on 9 competitive teams in basketball, women's rugby, men's and women's soccer, women's volleyball, badminton, cross country, equestrian and woodsmen. The Rams belong to the Atlantic Collegiate Athletic Association (national association is the Canadian Collegiate Athletic Association), the Atlantic Intercollegiate Equestrian League and the Canadian Intercollegiate Lumberjacking Association for their various sports.

For more information about sport, fitness and recreation opportunities at Dalhousie visit www.dal.ca/athletics or www.dal.ca/rams.

Black Student Support

The Black Student Advising Centrestrives to foster a sense of community among all students, especially those who are of black/African descent. Our advisor provides support for all of Dalhousie's students of black/African descent, helping you transition in and through your degree program. We welcome you to make use of our cultural, educational and career resources to enhance your university experience.

The Black Student Advising Centre provides:

- one-on-one advising
- academic support through tutoring, study skills and writing skill development
- quiet study spaces and a computer lab
- access to cultural activities, networking and mentoring events
- information on scholarships and bursaries
- peer support

For more information, drop by the Centre on the second floor of 1321 Edward Street, contact us at (902) 494-6648 or bsac@dal.ca or visit us online at www.dal.ca/bsac.

Career Supports

The advisors at the Bissett Student Success Centre in Halifax and the Student Success Centre in Truro can help you:

- explore a full range of career and work possibilities that match your career goals;
- prepare job-search documents, including cover letters and resumes, to present yourself effectively as a candidate for employment;
- learn more about employment opportunities and prospective employers;
- connect with career opportunities through campus interviews, job and volunteer listings, referrals, direct application, networking, job search events, publications, and/or information technology.

Find out more: www.dal.ca/leadwell

Halifax Campuses: careerservices@dal.ca or (902) 494-3077
Agricultural Campus: ssdalac@dal.ca or (902) 893-6672

Centre for Learning and Teaching

The Centre for Learning and Teaching (CLT) works in partnership with the Provost's office, academic units, faculty members, and graduate students to enhance the practice and scholarship of learning and teaching at Dalhousie University. CLT takes an evidence-based approach to advocating for effective and inclusive learning and teaching practices, curriculum planning, services to support the use of technology in education, and institutional policies and infrastructure to enhance the Dalhousie learning environment. The CLT is dedicated to aligning its activities with the strategic directions of the university, including the Belong report and its recommendations. For further information, teaching resources, or a confidential consultation, you are invited to contact the Centre for Learning and Teaching, located at Suite G90, Killam Library, 6225 University Avenue, (902) 494-1622, CLT@dal.ca, or you can visit the CLT website at: dal.ca/clt

Programming: Workshop series, presentations, discussion groups, and demonstrations are scheduled to address the full spectrum of educational issues, including curriculum design, inclusive practices, classroom design, evaluation of student learning, teaching and learning strategies, e-learning and the effective integration of classroom technology.

Confidential Consultations: Educational developers at CLT provide confidential consultation services to teaching assistants, faculty, and administrators on a wide range of learning and teaching issues, including cultural competence and other aspects of inclusivity.

Annual Events: On an annual basis, CLT coordinates New Academic Staff Orientation, TA Day, Teaching Dossier Workshops, and the Dalhousie Conference on University Teaching and Learning that brings together presenters from across the University and the country to explore issues related to specific themes.

eLearning: The eLearning team with CLT offers eLearning advice and support to the Dalhousie community. With two experienced instructional designers, the eLearning team is available to offer guidance with both online and blended/hybrid course initiatives, including ensuring that these course initiatives are accessible.

Curriculum Renewal: CLT provides support for curriculum design and renewal at the level of a course, program, department and faculty. Facilitated department and faculty-specific workshops or retreats assist the formation of cohesive programs by considering how courses and content develop throughout the duration of a program. Departments or programs in the early stages of an MPHEC proposal, internal program review, or accreditation process can take advantage of CLT's resources to design learning outcomes and map the curriculum.

The Faculty Certificate in Teaching and Learning: This professional development program offers faculty and staff the opportunity to participate in courses, workshops and peer exchanges. The Certificate emphasizes evidence-based practices and provides hands-on, practical opportunities to apply these in their own teaching context. The program is offered in partnership with Executive Education in the Faculty of Management.

Certificate in University Teaching and Learning and the Teaching Assistant Enhancement Program: These programs are offered to graduate students by the CLT in partnership with the Faculty of Graduate Studies. The purpose of the program is to assist academic departments in preparing students for their teaching responsibilities and to enhance their professional development opportunities for both academic and non-academic careers.

Classroom Planning: CLT offers expertise and support to the university in the area of classroom design including support for faculty considering the use of learning spaces in the context of course design and pedagogical approaches.

Teaching Awards: CLT administers several university-wide teaching awards, including the Dalhousie Alumni Association Award of Excellence for Teaching, Early Career Faculty Award of Excellence for Teaching, Contract and Limited-term Faculty Award for Excellence in Teaching, Sessional and Part-time Instructor Award of Excellence for Teaching, President's Graduate Student Teaching Award, Educational Leadership Award for Collaborative Teaching, Academic Innovation Award, Award for Excellence in Education for Diversity, and the Award for Excellence in Graduate Supervision.

Student Ratings of Instruction (SRI): Higher education institutions in Canada and abroad encourage faculty to use teaching evaluations to rate their teaching for effectiveness. The CLT is responsible for the administration of the university-wide Student Ratings of Instruction. The ratings are administered online towards the end of each term. Quantitative and qualitative data are collected and the opportunity for departments and individual instructors to add questions to the form is available. Students may access the results of the universal questions, Part A of the form, when instructors consent to release the results of their own course(s).

Grants: CLT offers a number of Teaching and Learning Grants each year for instructors to develop and evaluate new teaching methods, curriculum innovation, elearning and teaching with technology opportunities. The Centre also organizes the Change One Thing Challenge award, inviting instructors to submit their student engagement ideas that they have implemented into their teaching.

Publications: The CLT newsletter, *Focus on University Teaching and Learning*, is published three times a year and is available online on the CLT website (dal.ca/clt). CLT's lending library provides resources on topics related to teaching. CLT's LibGuide of links to electronic sources can be found at: dal.ca.libguides.com/clt.

Co-Curricular Experiential Learning

Part-time work, volunteering, and leadership programs are great ways to get hands-on experience throughout your degree. You can develop certain skills and maybe discover other career options that interest you. Look for workshops on campus to develop your leadership skills.

With DALConnects you'll do great work for meaningful causes, develop new skills, and build up the experience you'll need for your future career. It's a free leadership program that connects you with the off –campus community and develops your leadership potential. By pairing interactive workshops, conferences, and teambuilding retreats with community volunteer opportunities, you develop practical skills that help you become a stronger leader in the classroom, the community, your future career, and in everyday life. In Truro, the Student Advancement in Leadership program offers the opportunity for students to develop skills in areas such as career exploration, personal growth, communication and leadership development. Students participate in volunteer activities, attend professional development seminars, participate in international and cultural events and learn the process of program development.

The Co-curricular Record (CCR) is a document that officially recognizes your accomplishments and experiential learning outside the classroom. The CCR program is available to all Dalhousie students and acknowledges your accomplishments in leadership, campus and community engagement, course-related service learning or experiential learning, awards and recognition, and training and development.

Agricultural Campus: ssdalac@dal.ca or (902) 893-6672

DalCard

The DalCard is your university identification card that has many uses on and off campus. It must be presented at officially scheduled examinations, to receive bursary or scholarship cheques and to use library facilities. It functions as an access pass to Dalhousie athletic facilities including Dalplex, your meal hall pass with a meal plan and a door key to your residence if you live on campus. Your DalCard can be used as a debit card at many locations on campus including the Bookstore and select food vendors. It can also be used for printing and photocopying, for laundry in residence (Halifax only), and for food purchases at many off-campus locations in Halifax.

The DalCard Office is located at 6230 Coburg Road. Students on the Sexton campus may obtain their DalCard at the Enrolment Services Centre, B Building, 1360 Barrington Street.

Students on the Agricultural Campus may obtain their DalCards from the Enrolment Services Center, Cox Institute, Room 100.

Find out more: dal.ca/dalcardEmail: dalcard@dal.caPhone: 902-494-2334

Dalhousie Arts Centre

Designed as a multipurpose facility, the Dalhousie Arts Centre is home to the Rebecca Cohn Auditorium, Dalhousie Art Gallery, and the Fountain School of Performing Arts. The Arts Centre is an integral part of the cultural experience in our community and stands as the only arts complex of its kind in Nova Scotia.

Of the numerous performing arts spaces in the Dalhousie Arts Centre, the Rebecca Cohn Auditorium is the most familiar and prestigious. The 1,023 seat concert hall is the home of Symphony Nova Scotia, as well as the venue of choice for a wide variety of performers ranging from Ballet Jorgen, Just For Laughs, Billy Connolly, Vance Joy, Bill Burr, Ron Sexsmith, John Prine and Gord Downie, to name a few. Other performing and visual arts spaces in the Arts Centre include: The Sir James Dunn Theatre (194 seats), the David Mack. Murray Theatre, the MacAloney Room, and the Art Gallery.

The Dalhousie Art Gallery offers the public access to national and international touring exhibitions and initiates many ambitious and exciting exhibition programs.

The Fountain School of Performing Arts maintains a full production schedule including student theatre and music productions, faculty recital series and weekly student noon-hour recitals. Further information on the Fountain School of Performing Arts can be found at dal.ca/performingarts.

Find out more at dal.ca/artscentre
Phone: 902-494-3820

Dalhousie Student Union (DSU)

Every Dalhousie student is automatically a member of the Dalhousie Student Union (DSU). The student union is recognized by an Act of the Nova Scotia legislature as the single voice of Dalhousie students. All student activities on campus are organized through the Dalhousie Student Union, and the DSU is the focus of all student representation. The business of the DSU is conducted by a Council made up of approximately 40 members.

One of the most important resources of the DSU is the Student Union Building (SUB) located at 6136 University Avenue between Seymour and LeMarchant Streets. The SUB was opened in 1968 as a centre for student activity on campus. The Student Union Building provides a wide range of services for students including the Student Advocacy Service, The Grawood, Campus Copy, food services, the Society Hub, and much more.

Every student has the opportunity to take advantage of the Union's financial, physical, and organizational resources whether by coming to events, applying for grants, or getting involved in a committee or campaign. The DSU also oversees almost 400 student societies. All students are invited to satisfy their curiosity by visiting the DSU offices located on the second floor of the SUB and is open from 8:30 am to 4:30 pm Monday through Friday.

Telephone number (902) 494-1106, email info@dsu.ca. Check out the website at www.dsu.ca.

Dalhousie Agriculture Students' Association (DASA)

The Dalhousie Agriculture Students' Association (DASA) is the official organization of students on the Agricultural Campus. In addition to representing the students to the administration, DASA spends much of their time organizing events, clubs, groups and committees to improve student life on the Agricultural Campus. They are also responsible for publications such as the Golden Ram (student newspaper), yearbook and student agendas. The Students' Association can be found in Room 32 of the Cox Institute.

All members of the Dalhousie Agriculture Students' Association are automatically also members of the Dalhousie Student Union. Visit www.dsu.ca to learn more about the DSU.

DSU Health and Dental Plan

You **must have a valid provincial health insurance card** to cover services at Student Health and Wellness, or at any hospital. Canadian students paying full-time fees are automatically covered by the Dalhousie Student Union (DSU) Health and Dental Plan - details below! If students have comparable coverage, they may be eligible to opt-out of the DSU Health and Dental Plan during the appropriate opt-out period. Please contact the DSU Health Plan Office for the opt-out period dates.

International students coming to Dalhousie University are **required to have a comprehensive health plan**. For more information visit the International Centre website.

DSU Health and Dental Plan

The Dalhousie Student Union (DSU) Health and Dental Plan is a student-oriented benefits plan that provides students with coverage for prescriptions, dental, travel, accident, vision, and many other services and perks.

If you are a **full-time** student beginning classes in September, you are **automatically enrolled** in the DSU Health Plan and the cost of the plan is included in your student fees. You must **opt in** to the plan if:

- you are a **part-time** student
- you are **beginning classes in January or May**
- you are **on co-op or exchange**
- you are **taking distance classes exclusively**

All students covered by Quebec Provincial Health Care will be required to pay for their office visit (and any additional service fees) at the time of their appointment. The cost of a regular office visit is currently **$40**. Charges for additional or uninsured services will vary but will be based on the amount currently paid by MSI (Nova Scotia provincial health coverage). All patients will be issued a receipt which they can personally submit to the Regie de Quebec for reimbursement.

The DSU Health and Dental Plan Office is located on the third floor of the Student Union Building at 6136 University Avenue. The Office is open Monday–Friday 9:30 am–4:30 pm or you can contact the office by phone at (902) 494-2850 or email at dsuhealth@dal.ca. Visit the website for more information regarding coverage, opt out/in procedures and deadlines www.studentvip.ca/dsu.

DSU International Health Plan

All international students studying in Canada **must have** health insurance coverage ("coverage" refers to all of the things that your health plan includes/covers).

Most new Dal students are automatically enrolled into one or both of Dalhousie's Health Insurance Plans.

The Dalhousie Student Union (DSU) International Health Plan is provided to all international students. Please note that co-op students are not billed and enrolled for the International Health Plan and must opt in should they wish to have coverage. The fee for the DSU International Health Plan is billed to each student's account and is compulsory unless the student has comparable private health insurance or MSI. If students have comparable coverage or MSI, they may be eligible to opt out of (cancel) the DSU International Health Plan during the appropriate opt out period. Please contact the DSU Health Plan Office for the opt out period dates.

Students are also eligible to add immediate family members to the plan when they arrive in Nova Scotia by completing an application and paying an additional fee.

The DSU Health and Dental Plan Office is located on the third floor of Student Union Building at 6136 University Avenue. The Office is open Monday–Friday 9:30 am–4:30 pm. Should you need to contact the office please phone (902) 494-2850 or email dsuhealth@dal.ca. More information regarding coverage, opt out/in procedures and deadlines is available at the DSU Health and Dental Plan Office.

Email, Computer and Tech Support

Information Technology Services (ITS) empowers the success of students, faculty and staff through an overall focus on service, advising and consulting. ITS supports university instructional, research and administrative requirements. The department is responsible for all centrally managed computing, networking and telecommunications facilities including university email, My.Dal, the central information system (Banner), wired and wireless network connections and student computer labs.

Need help with a technical problem? Visit one of three Help Desks located on the Halifax campus, or our Help Desk at the Dalhousie Agricultural Campus in Truro.

With a range of new and emerging technologies, ITS staff will help you explore options to make the most of your experience at Dalhousie. See dal.ca/its for more information.

First Year Experience

There's a lot to know about your first year at university; from choosing the right courses to juggling student life. To help you prepare for your time at Dalhousie, take part in On Track, a suite of programs available to you in your first year, focused on your transition to Dalhousie and discovering your strengths and passions.

if you've got questions, the Bissett Student Success Centre in Halifax and the Student Success Centre in Truro are a great place to start! Their knowledgeable staff can help you navigate the transition through your first year of university life and answer questions such as:

- What can I expect in university?

- How can I become involved in activities on campus?
- I'm feeling overwhelmed with all my work - what should I do?
- How do I get the most out of my university experience?
- How does my degree/program relate to future careers?

In addition to one-on-one advising, the Centres offer peer support, workshops and programming throughout the year.

Find out more: www.dal.ca/firstyear or www.dal.ca/studentsuccess (Halifax) www.dal.ca/acstudentsuccess (Truro)

Halifax Campuses: advising@dal.ca or (902) 494-3077
Agricultural Campus: ssdalac@dal.ca or (902) 893-6672

Food Services

Dalhousie Food Services operates 3 dining halls on the Studley Campus, one dining hall on the Sexton Campus and one dining hall on the Agricultural Campus. We offer meal plans for students living in residence as well as off-campus students.

Our chefs, with the help of our in-house dietitian, prepare entrees and soups from scratch to promote a healthy lifestyle. With vegan, vegetarian & gluten-free options available at each meal, every student will have a variety of options regardless of individual dietary needs.

Food Services also operates a number of on-campus retail locations.

Find out more: dal.ca/foodEmail: food@dal.ca (Halifax Campus) julie.gillis@compass-canada.com (Agricultural Campus)
Phone: 902-494-2078 (Halifax Campus) 902-897-1952 (Agricultural Campus)

Housing/Residence

The University is pleased to guarantee residence in University-owned properties for all new Dalhousie undergraduate students who complete the residence application process by June 30th. It's important that students planning to attend Dalhousie think well in advance about their accommodation needs.

Students should be aware of several important points of reference in regard to residence accommodation. Upon admission to a program of study, all students will receive university residence information. They will also be asked to pay an admission deposit. It's important to apply to residence (online) and to pay the admission deposit promptly as the dates these are received will determine when the Residence Application is considered. Residence applications will not be considered from individuals who have not gained admission to a program of study, or paid their admission deposit and residence application fee.

Students with disabilities are encouraged to contact the Residence Office at 902-494-1054, or email: residence@dal.ca, for information and assistance. Students with disabilities are also encouraged to contact Advising and Access Services prior to moving into residence.

The traditional style residences at Dalhousie are chiefly for undergraduate students. All students living in traditional style residences are required to purchase one of the meal plan options available.

The information below gives a description of 1. traditional on-campus residences, 2. non-traditional on-campus residences, which includes apartment style housing owned by the university, 3. the services offered by the Off-Campus Housing office, and 4. summer residence. For information on residence fees, see the Fees section of the Calendar.

It is the responsibility of the individual student in all cases to make a separate online application to the university housing of her/his choice.

A non-refundable $50 fee is payable when applying for residence. Please note that you will not be able to submit an application without paying the $50 non-refundable deposit.

Traditional On-Campus Residence

Halifax Campus

Residence	Address	Type of Housing	Approx. # of Spaces	Priority Applicants	Room Type
Gerard Hall	5303 Morris St.	Co-ed	241	Undergraduate students	Single and double rooms

Agricultural Campus

Residence	Address	Type of Housing	Approx. # of Spaces	Priority Applicants	Room Type
Trueman House	30 Horseshoe Cres.	Co-ed	12	Mature and graduate students	Single rooms

Living Off-Campus

Dalhousie's Off-Campus Housing has a website that features a wide variety of housing resources available for students on both the Halifax and Truro campuses.

There is an Off-Campus Housing office for the Halifax campuses located in Risley Hall that offers help to students in finding off-campus accommodations.

The Off-Campus Housing office provides centralized information on available housing in the Halifax metro area including apartments, shared accommodations, rooms, condos and houses.

Based on of the relatively low vacancy rate in Halifax, it is advised that students start looking for off-campus housing well ahead of the academic year.

On the Halifax Campus, Community Assistants are available to provide peer support to students living off campus.

Learn more: dal.ca/ochEmail: och@dal.ca
Phone: 902-494-2429

Summer Residence

Dalhousie offers space for students to stay in residence over the summer months (May-August) on the Halifax and Agricultural Campuses.

Find out more: dal.ca/summerresEmail: stay@dal.ca (Halifax Campus) stayintruro@dal.ca (Agricultural Campus)
Phone: 902-494-8840 (Halifax Campus) 902-893-3103 (Agricultural Campus)

Human Rights & Equity Services

Human Rights & Equity Services (HRES) mission is to be a focal point, a resource and a leader in the development of a respectful, equitable, diverse and inclusive campus community. Our strategic framework outlines areas of focus along with guiding principles, strategic goals and priority initiatives, with four areas of focus: leading institutional change, building connections and capacity, managing cases and ensuring operational effectiveness.

HRES is responsible for administering the following University policies: the Employment Equity Policy; the Statement on Prohibited Discrimination; the Personal Harassment Policy; and the Sexual Harassment Policy. We liaise with the Office of the Vice-Provost, Student Affairs, regarding the Code of Student Conduct and the University's Hazing Policy, with the Student Accessibility Centre, as needed, in relation to the Student Accommodation Policy, and Human Resources regarding the Accommodation Policy for Employees.

Other initiatives in Human Rights & Equity Services include education and training on topics such as diversity, human rights, harassment awareness and prevention, conflict resolution. Workshops can be request online via our website. HRES also provides the University's multifaith calendar of religious holidays and cultural dates for faculty, staff and students.

Indigenous Student Support

Dalhousie's Indigenous Student Centres help create a sense of cultural belonging to support your success while at Dalhousie. Our Indigenous Student Advisors provide support and advocacy for all of Dalhousie's Indigenous students. We welcome you to make use of our cultural, educational and career resources to enhance your university experience.

The Indigenous Student Centre provides:

- one-on-one advising and advocacy
- academic support through tutoring, study skills and writing skill development
- quiet study space and a computer lab
- access to cultural activities
- information on scholarships and bursaries
- a space to smudge

On the Halifax campus, visit our Centre (1321 Edward Street) to connect with your peers, or speak with your advisor. You can also contact us by phone at (902) 494-8863. Visit dal.ca/indigenous for more information.

On the Truro Campus, visit the Manager, Indigenous Students in the Dairy Building to take advantage of academic advising, learn about services on campus and find out how to connect with your peers. For more information, contact the Manager, Indigenous Students, at (902) 956-9270.

International Exchange and Study Support

Dalhousie University is committed to providing international mobility opportunities for all students. International exchange, study abroad programs, field courses and other international learning experiences are offered and supported through providing access to several funding programs, offering pre-departure information, and providing ongoing student and staff support. An advisor is available to meet on topics related to international learning.

Find out more: www.dal.ca/studyabroad

International Student Support

Dalhousie University is committed to welcoming, supporting and serving the needs of new and continuing international and exchange students. Advisors are available to meet with you on a variety of topics including immigration, finances, exchange opportunities and personal issues. Referrals are made to other resources and services on campus when necessary.

Orientation activities are organized to assist international and exchange students in adjusting to their new culture and in achieving their educational and personal goals. A variety of social, cultural and information programs are held throughout the year. During the fall, winter and spring/summer terms, international student peer supporters are also available to meet with international and exchange students.

LGBTQ2SIA+ Collaborative

The education advisor in Human Rights and Equity Services works with a number of campus groups who offer LGBTQ2SIA+ support, resources, and training, including: Dal Allies, Dalhousie Student Union, DalOUT, OUTLaw, South House Sexual and Gender Resource Centre, and more.

Contact these groups directly, visit the website at dal.ca/hres or make an appointment with the education advisor by emailing hres@dal.ca.

Libraries

The Dalhousie University Libraries accommodate the needs of the undergraduate teaching programs, graduate and faculty research projects, and professional schools. The Dalhousie Libraries are: the Killam Memorial Library – Humanities, Social Sciences, Management, Computer Science, and Science; the Sir James Dunn Law Library, the Kellogg Health Sciences Library; the MacRae Library – Agriculture, and the Sexton Design and Technology Library – Engineering, and Architecture and Planning, as well as the University Archives and Geographical Information Sciences Centre (both located in the Killam Memorial Library).

In addition, the libraries have two new spaces: the Wallace McCain Learning Commons and the Kellogg Library Learning Commons in the Collaborative Health Education Building. These learning commons provide study spaces for both silent study and vibrant collaborative engagement, access to computers, information resources, and research assistance.

Staff in all five libraries provide reference and research services. Access to materials outside of the Dalhousie Libraries is available through the Document Delivery Service. The libraries manage DalSpace, an institutional repository where many of Dalhousie's researchers' publications can be found. The libraries manage an installation of DataVerse for sharing research data and provide assistance with research data management planning and implementation. The libraries also use Open Journal Systems (OJS) software and provide digital publishing services to the university community.

All of the libraries have public access computers and WiFi. Most of the libraries have bookable study rooms for groups as well as individual carrels for private study.

The website dal.ca/libraries provides access to collections, databases, subject guides and other services. The Dalhousie Libraries also has a Copyright Office that provides guidance to students, faculty, and staff on copyright issues. There are staff in the Killam and Sexton Libraries and Wallace McCain and Kellogg Library Learning Commons that provide computer and software support. 3D printing is available at the Killam and Sexton Libraries.

The Dalhousie Libraries are a member of Novanet, a network of all Nova Scotian university and college libraries, sharing a single automated online catalogue of the holdings of the member libraries. Users borrow from Novanet libraries upon presentation of their university ID card.

Multifaith

Dalhousie Multifaith Services is a non-threatening space where Dalhousie and King's students, staff and faculty can address the basic questions of meaning and purpose in their lives — no matter what their faith, philosophy or doubt may be.

What we do:

- offer confidential guidance on personal and spiritual issues
- lead groups in discussion and prayer
- facilitate interfaith, ecumenical, and multifaith dialogue on the campus
- conduct services of worship and memorial services
- offer prayers at public services
- provide religious rites, marriage preparation, and perform marriages
- participate in Orientation and other events at the University
- plan workshops, lectures and social activities
- help locate worship communities for different faith traditions

For more information about the services and supports we offer, or to speak with a chaplain, drop by Multifaith Services on the fourth floor of the Student Union Building at 6136 University Avenue.

Website: www.dal.ca/multifaith

Halifax Campuses: mulitfaith@dal.ca or (902) 494-2287

Ombudsperson

The ombudsperson is a mediator who ensures everyone at Dalhousie is treated fairly and respectfully. They provide accessible, independent, impartial, and confidential support to help you get a fair and equitable resolution of any university-related issue (academic or non-academic).

Some examples of when you could reach out to the ombudsperson are:

- You want to discuss a sensitive issue in confidence, including:
  - Student and supervisor/instructor/professor relationships
  - Abuse of power, bullying, or unfair treatment
  - Fear of coming forward or of acting to stop unacceptable behaviour
- You are unsure about which rules, policies or procedures apply to your situation
- You feel that a particular rule or policy has been applied unfairly
- You feel that your learning has been affected by the conduct and behaviour of another person
- You require someone to help facilitate communication between you and a university administrator

Find out more at www.dal.ca/ombudsperson or if you have questions, please email: ombuds@dal.ca

Personal Counselling

As a student you'll find that most of the time you can deal with the everyday issues that pop up while attending university. But life can sometimes challenge you in unexpected ways.

On the Halifax Campuses, supports and services offered through the Student Health & Wellness Centre help students resolve problems and learn new skills in a confidential, supportive environment. Counselling is provided by professionally trained counsellors and psychologists and is available for individuals and on a group basis. Students can access counselling services through a walk-in counselling appointment available on a first-come, first-served basis every hour the Student Health & Wellness Centre is open.

If you are struggling with your classes or assignments and suspect you may have a learning disability, our staff can pre-screen for learning disabilities, attention-deficit hyperactivity disorder (ADHD) and/or Asperger's disorder, and can suggest various learning strategies that you may find helpful.

Career Counselling is a confidential and collaborative process where you work with a career counsellor who assists you in your educational and career decision-making. Dalhousie's Career Counsellors can be accessed on the Halifax Campuses through the Bissett Student Success Centre, located on the fourth floor of the Student Union Building. Students can make an appointment by calling (902) 494-3537.

On the Agricultural Campus, students can meet with nurses at Health Services in the Dairy Building who work with students to take care of their physical and mental health and can also refer students to community psychologists. Through the campus physician, students may also receive a referral to a psychiatrist.

Students can also receive online support for feelings of depression, anxiety or stress through the use of the WellTrack app, an online self-help program. It includes modules that you work through at your own pace, either independently or with a WellTrack coach, via email or phone.

Find out more: www.dal.ca/livewell
Make an appointment:
Halifax Campuses: (902) 494-2171
Agricultural Campus: (902) 893-6300

Registrar’s Office

The Registrar’s Office is responsible for high school liaison, admissions, awards and financial aid, registration, maintenance of student records, scheduling and coordinating formal examinations, and convocation. Of greater significance to students, however, is the role played by members of the staff who provide information, advice, and assistance. They offer advice on admissions, academic regulations and appeals, financial aid and budgeting and the selection of programs. In addition, they are prepared to help students who are not quite sure what sort of assistance they are looking for, referring them as appropriate to departments for advice about specific major and honours programs or to Student Affairs or to specific service areas such as Counselling Services.

Students can access the services of the Registrar’s Office at three locations.

Main office (Studley Campus):
Room 130, Henry Hicks Academic Administration Building
6299 South Street
Halifax, NS

Enrolment Services Centre (Sexton Campus):
Building B, 1360 Barrington Street
Halifax, NS

Enrolment Services Centre (Agricultural Campus):
Room 100, Cox Institute, 21 Cox Road
Truro, NS

Enquiries may be directed to:
The Registrar
Dalhousie University
PO Box 15000
Halifax, NS Canada B3H 4R2
Telephone: (902) 494-2450
Fax: (902) 494-1630
Email: admissions@dal.ca

Safety

Dal Security operates in a uniform capacity 24/7, 365 days of the year as the on-campus emergency first responders across all four Dal campuses (including three in Halifax and one in Truro). We pride ourselves in offering approachable and accessible services to all members of the Dal community. We have a robust social media presence where you can find updates on events, safety tips, and information on campus closures.

Follow us at @DalSecurity on Twitter and dal_security on Instagram. Through collaboration with our on-campus partners, services are quickly and conveniently accessible by downloading our free DalSAFE app. Come visit us in person at one of our three offices; our main office is located in the parkade of the Marion McCain Arts and Social Sciences building on the Studley campus in Halifax, a secondary office is located in the Dairy building on the Truro campus, and a third satellite office is located at the Sexton campus in Halifax.

Dalhousie Security can also be reached at (902) 494-6400 (Halifax Campuses) and (902) 893-4190 (Truro Campus) in any emergency.

South House

A DSU service and Halifax's only full-time gender justice centre. A volunteer-driven, student-funded, gender-inclusive safe space for all members of the Dalhousie community. South House is a trans- and queer-positive, wheelchair-accessible space that offers a resource centre, library, and free meeting space for woman-positive and anti-oppression organizing and gathering. Visit us online at www.southhousehalifax.ca or drop by the Centre on the basement floor of 1443 Seymour Street.

Student Advocacy

The Dalhousie Student Advocacy Service helps ensure that students receive fair and reasonable decisions on issues dealing with academic appeal and discipline matters. Our volunteer advocates advise students about their case, help them draft and edit any written submissions, prepare them for hearings and formal appeals, and provide support through the process and articulates matters of importance during the oral hearing. This year-round service is confidential and operated entirely by students. Contact us at the Student Union Building (Room 310), by phone at (902) 494-2205 or visit us online at www.dsu.ca.

Student Affairs

The Vice-Provost, Student Affairs (VPSA) is Dalhousie University's chief officer of student affairs. The Division of Student Affairs is responsible for strategy, policy development, program development and implementation, and management of all matters relating to the provision of a transformative student experience.

The Division includes an integrated team of specialists who works collaboratively to support the institution's academic mission and the holistic success of a diversity of students, through their journey from prospective student, through applicant and enrolled students, to learner and scholar, and, ultimately, graduate and engaged citizen.

The units within the Division support four pillars: Student Registrarial and Enrolment Support; Student Health & Wellness; Student Learning and Academic Support; and Student Life and Leadership Development.

Our units include:

- Agricultural Campus Student Success Centre;
- Bissett Student Success Centre: Academic Advising and Career Services;
- Black Student Advising Centre;
- Co-Curricular Experiential Learning;
- Multifaith Services;
- Indigenous Student Centre;
- International Centre;
- Registrar's Office;
- Residence and Student Life;
- Student Accessibility Centre;
- Student Affairs Communications and Marketing;
- Student Conduct Office;
- Student Health and Wellness;
- Studying for Success;and
- Writing Centre

Student Clubs and Organizations

With so many clubs and organizations on campus, not only will you find plenty of people who share **common interests,** but you'll have an opportunity to **try something completely new.** The mobile app offered through the Dalhousie Student Union offers a searchable listing of hundreds of student clubs and societies. Browse the listings and find societies that suit your interests.

Also, be sure to watch for the **Society Fair in September.** The fair is a chance for all societies to showcase their activities and objectives to other Dal students. Drop in, visit society booths and discover clubs, societies and organizations that may be of interest to you. Watch for details on the DSU website. And, if you don't find a society of interest, **start your own!**

Find out more: www.dal.ca/studentlife
Email: dsumemberservices@dal.ca or studentlife@dal.ca
Phone: (902) 494-1106 (Halifax Campuses) or drop by Room 32 of the Cox Institute (Agricultural Campus)

Student Conduct

Dalhousie's Office of Student Conduct works with students, community and campus partners to help respond to violations of the Code of Student Conduct and Residence Code of Conduct. Referrals come from students, faculty, staff, Campus Security and the Halifax Regional Police. Following the principles of respect, accountability and community, we work with groups to help restore relationships and find satisfactory resolutions. Visit us online to find out more about the resources available through the Student Conduct office.

Student Health & Wellness

Dalhousie Student Health & Wellness is committed to providing quality **healthcare** and services to promote and enhance students' good **health and well-being**. Student Health and Wellness services are easily accessible and geared toward the unique health needs and concerns of students.

The Halifax campuses' Student Health & Wellness Centre is located on the second floor of 1246 LeMarchant Street. The Centre's interprofessional team includes:

- counsellors
- doctors
- health promotion experts
- nurses
- psychiatrists
- psychologists
- social workers

Students can visit the Student Health & Wellness Centre for a walk-in medical or counselling appointment, or can call to book a medical appointment.

The Agricultural Campus' Health Services clinic is located in the Dairy Building, next to Cumming Hall. Registered nurses at the clinic provide confidential assessments, health education, on-the-spot testing and treatment for conditions such as urinary tract infections, strep throat, sexually transmitted infections, as well as cold and flu assessments, first aid, stress management guidance, and select immunizations and immunization updates. Nurses also provide referrals to appropriate community resources.

A campus physician is also available by appointment. Physician appointments can be booked by contacting Health Services.

All students must have medical and hospital coverage. All Nova Scotia students are covered by the Nova Scotia Medical Services Insurance. All other Canadian students must maintain coverage from their home provinces.

International students have the same access to services, supports, workshops, events and online health and wellness resources as Canadian students, as well as additional services available to you, detailed here. All non-Canadian students must be covered by medical and hospital insurance. Details of the Dalhousie Student Union International Health Plan can be found here.

Studying for Success

At Dalhousie, we have dedicated staff available to assist students in becoming more efficient and effective learners.

On the Halifax campuses, the Studying for Success program offers workshops to small groups of students to develop or enhance personal learning strategies and, when applicable, workshops are customized to focus on particular disciplines or fields of study ensuring that the workshop content is relevant to the needs of participating students.

On the Agricultural Campus, the Student Success Coordinator helps students reach their potential through a variety of programs and events. Students benefit from attending formal training in study skills and can make an appointment to meet with the Coordinator for one-on-one coaching or attend Study Skills sessions offered regularly throughout the year.

Topics regularly covered include time management, getting the most from lectures, critical reading, problem solving, preparing for and writing exams. Study Skills coaches provide one-on-one support either by appointment or on a drop-in basis and will refer students to other academic resources when appropriate.

If you are looking for assistance in understanding specific course content and assignments, or preparing for tests and exams, our tutors are able to help. We can match you to an appropriate tutor in your field of study.

Find out more: www.dal.ca/learnwell

Halifax Campuses: sfs@dal.ca or (902) 494-3077
Agricultural Campus: ssdalac@dal.ca or (902) 893-6672

University Bookstore

Dalhousie's Bookstores are owned and operated by the university. Our locations are found in the Student Union Building on the Studley Campus, in the Main Administration Building on the Sexton Campus and the Cox Institute on the Agricultural Campus. The stores service the needs of students, faculty, staff and the larger community surrounding Dalhousie.

The Bookstore offers course materials in several formats including new, used, binder-ready and digital. We also carry custom publications and offer an online rental program where books rented are shipped to you from our third party partner. Used book buybacks are held at the Bookstore and you can learn more about the Book Buyback program on our website dal.ca/bookstore.

In addition to course materials the bookstores offer stationery supplies, clothing, giftware, graduation rings and frames. Our clothing can be customized for societies, sports teams and any other groups looking for a unique Dalhousie item. The Bookstore is the go-to hub for your Tiger and Ram-inspired gear!

The Bookstore provides a number of supports to residence students, like a huge supply of Dorm Goods for residence rooms, mini fridges and free delivery of textbooks to student's buildings before they arrive.

When you pay for items at the Bookstore with your DalCard, 5% of the purchase price is put back on your account to use toward future purchases.

University Secretariat

The University Secretariat provides professional and administrative support and advice to the Board of Governors and University Senate so as to facilitate their effective governance of the University.

The Secretariat manages, coordinates and informs the effective operation of the Board and Senate by:

- Supporting the operations of the University's governance bodies and their respective standing and ad hoc committees;
- Proposing and developing objectives and plans to establish and achieve priorities;
- Advising on governance issues and developing and implementing policies, procedures and processes that reflect governance best practices;
- Developing, implementing, managing and coordinating the University academic integrity, student discipline and academic appeals policies and processes, and maintaining official records relative to these processes;
- Serving as a repository for University policies and information and data on matters relating to University governance; and
- Facilitating communication and collaboration with key stakeholders.

Visit the website at dal.ca/secretariat

UPass

The UPass is a transit pass that allows full-time Halifax-based Dalhousie students to ride the conventional buses and ferries in Halifax from September 1 to April 30. A separate Summer UPass is available for Halifax-based Dalhousie students enrolled full-time in the spring/summer semester. With the payment of an additional fee, the UPass may also be used on the MetroLink and MetroX buses.

The UPass is a sticker placed directly onto the DalCard. UPasses can be picked up from the DalCard Office, located at 6230 Coburg Road, and from the Student Accounts Office in the Henry Hicks Building. Students on the Sexton Campus may obtain their UPass from the Sexton Student Service Centre, B Building, 1360 Barrington Street. Students must be registered full-time before picking up their UPass.

Find out more: dal.ca/upassEmail: upass@dal.ca
Phone: 902-494-2334

Writing Skills

Students in all disciplines at Dalhousie are required to write clearly to inform, persuade, or instruct an audience in term papers, lab reports, essay exams, critical reviews and other academic assignments. Students can benefit from a one-on-one discussion of their work with supportive instructors and peer tutors at the Writing Centre. In addition to the one-on-one tutoring, the Writing Centre hosts seminars held throughout the year on topics such as essay writing, science writing, mechanics of writing, English as another language, and admission applications as some examples.

In Halifax, you'll find the Writing Centre in the Killam Library's Learning Commons. Writing tutors are also available in satellite locations: Sexton Campus, Wallace McCain Learning Commons, Black Student Advising Centre, and the Indigenous Student Centre.

Students on the Agricultural Campus can visit the Writing Centre on the main floor of the MacRae Library.

Introduction
The following section of the calendar outlines the University Regulations on academic fees for both full-time and part-time students enrolled in programs of study during the fall, winter and summer terms. A section on University residence and housing fees is also included. Students wishing to register for the summer term should consult the summer school timetable online at www.dal.ca for information on registration dates and fees.

All fees are subject to change with approval of the Board of Governors of Dalhousie University. The 2019/2020 Academic Fee Schedule will be available in June 2019 at www.moneymatters.dal.ca.

NOTE: Student tuition fees and other fees published herein are applicable only to regular students admitted to a program through the normal application process. Other students who are admitted to Dalhousie under a special program or policy will be charged student tuition and other fees in accordance with such special program or policy. For further information regarding these fees, please contact Student Accounts or the Dean's office of the applicable faculty.

Students should make special note of the academic dates contained in the front section of the calendar as well as fee dates. Students should also be aware that additional fees and/or interest will be charged when deadlines for payment of fees as contained herein are not met.

All the regulations in this section may not apply to Graduate Students. Please refer to the Faculty of Graduate Studies section of the Graduate Calendar.

21	$50 reinstatement fee assessed to accounts with balances of $100 or more
24	Last day for partial refund for winter term

NOTE: Please consult the online summer school timetable for the summer school registration schedule.
Website www.moneymatters.dal.ca

University Regulations

The following general regulations are applicable to all payments made to the University in respect of fees. Please refer to our website for additional information on payment options: www.moneymatters.dal.ca.

- Fees must be paid in Canadian funds by online bank payment, interac, negotiable cheque or money order.
- Money transferred to a student's account are not to exceed the annual charges associated with tuition and ancillary fees. Funding for off-campus and personal expenses is to be sent directly to the student. Overpayment on a student's account may result in funds being withheld and applied toward future term fees for up to one academic year.
- If payment by cheque is returned by the bank as non-negotiable, there will be an additional fee of $20 and the account will be considered unpaid. Furthermore, if the bank returns a cheque that was to cover payment of tuition, the student's registration may be cancelled and, if permitted to re-register, a late fee will apply.
- Accounts in arrears must be paid by certified cheque, money order or interac prior to registration in a future term.

Admission Deposits
A non-refundable deposit of $200 is payable on acceptance to all new undergraduate and graduate programs. Undergraduate students admitted by April 20 are required to pay the deposit by May 15. Undergraduate students accepted after April 20 must pay the deposit within three weeks of receiving an offer of admission. Graduate students must pay the deposit within four weeks of receiving an offer of admission.

Undergraduate Medicine and Law students are required to pay a $500 non-refundable, admission deposit.

International Dentistry, Qualifying Dentistry and Internetworking students are required to pay a $2,500 non-refundable admission deposit.

Admission deposits are later credited towards tuition fees for the applicable term.

Registration
A student is considered registered after selection of course(s).

Selection of course(s) is deemed to be an agreement by the student for the payment of all assessed fees.

Non attendance does not constitute withdrawal. Students must ensure that they cancel registration in all courses if they choose to withdraw.

Identification Cards (DalCard)
All full and part-time students should obtain identification cards following registration in the current year. ID cards are valid until August 31. If a card is lost, a fee of $15 is charged for a replacement.

Audit Courses
All students auditing a course pay one-half of the regular tuition fee plus full auxiliary fees, if applicable. In such cases, the student is required to complete the usual registration process.

A student who is registered to audit a course, who during the session wishes to change their registration to credit, must receive approval from the Registrar. This must be done on or before the last day for withdrawal without academic penalty. The same deadline applies for a change from credit to audit. Graduate students please see Section 6.6.4 for audit information.

Late Registration
Students are expected to register on or before the specified registration dates. Students wishing to register after these dates must receive the approval of the Registrar. A late registration fee of $50 will apply if registration and payment of fees has not been completed by specified dates. This fee is payable at time of payment and will be in addition to regular fees.

Course Changes and Withdrawals
Please consult Student Accounts for all financial charges and the Registrar's Office for academic regulations.

Students withdrawing from all courses must submit written notification to the Registrar's Office. Non attendance does not constitute withdrawal, you must ensure courses are dropped. Refunds due to class withdrawals will be effective the date a course(s) is dropped online at dalonline.dal.ca or written notification is received at the Registrar's Office. Please contact Student Accounts to have your refund processed.

In the Faculty of Health, students who wish to withdraw from the University must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students in these faculties should continue to attend classes until their withdrawal has been approved.

Academic Fees
Note: These rates are for 2018/2019 (for information only)

Fee Schedule

Upon approval of the 2019/2020 academic fees, a complete schedule showing the payment dates will be available in June 2019 at www.moneymatters.dal.ca. Students are advised that fees are subject to change by approval of the Board of Governors, and it is likely that tuition and fees will increase during each year of study.

NOTE: Students registered in more than one program are required to pay separate academic fees for each program. Additional course specific auxiliary fees may apply, as well as fees for online courses or programs related to distance delivery.

Note: Per course fees are based on a three credit hour course. Complete fee schedules are available online www.moneymatters.dal.ca . The 2018/2019 fee schedule currently online is expected to be updated in June 2019 with the approved academic fees for 2019/2020.* International students are required to pay an International Deifferential Fee in addition to tuition.

Exchange Students

Outbound exchange students whose fees are paid to Dalhousie University will be assessed tuition and fees for 15 credit hours for the faculty of their degree.

International Students

Differential Fee

Registered students, who are not Canadian Citizens or permanent residents are required to pay an additional "Differential Fee" to a maximum of $4,755 per term, subject to increase in 2019/2020. There is a proportional charge for part-time international students. International Dentistry, Qualifying Dentistry and Internet working students are exempt. Graduate Students please see Section 5.7 of the Graduate Studies Calendar to determine the number of years a student is required to pay the differential fee.

If a student receives permanent resident status, the differential fee will not be assessed for the current term and beyond. In order to process a retroactive reimbursement of differential fees in a current term, acceptable proof of residency must be submitted to the Registrar's Office prior to the last business day of December, April, and August for each term.

Health Insurance

International students will be charged for an International Student Health Insurance Plan when they register. If a student already has comparable health coverage, they can apply to opt out of the International Student Plan at the DSU Health Plan Office before September 18, 2019. Costs for the health plan change annually. More details on the international student health plan costs and opt-out process can be found at www.dsu.ca. Full-time students will also be assessed the extended DSU Health and Dental plans, see 11.F.2.

Health Insurance - International Students (2018/2019 rates, for information only)

- Single - $694 per year
- Family - $1,698 per year

Student Fees

In addition to tuition and course related fees, the following mandatory incidental fees may apply. These fees are non-refundable beyond the due date for each term. In cases of late cancellations or retro-active withdrawal, the mandatory incidental fees remain payable. Rates provided as information only, subject to change for 2019/2020.

Student Union Fee

Every student registered at Dalhousie is a member of the Student Union and required to pay a Student Union fee as part of their registration procedure. These fees have been approved by students in referenda and, along with other revenue of the Union, are allocated each year by the Student Council budget.

For information only, 2018/2019 full-time student union fees are $77.28 per term.

Health and Dental Insurance

Every fall term, full time students are assessed the DSU Health and Dental Plan. This provides extended coverage from September through August. The current rate is $284 per year.

Students with separate health insurance may apply to the DSU for reimbursement. For more information please contact the Student Union Office in Room 344 of the Student Union Building (SUB), phone: (902) 494-2850 or visit their website at www.dsu.ca.

Student Service Fee

Student Service provides and supports various Dalhousie Services including health services, academic support and athletics. For information only, 2018/2019 Student Service fee is $162.55 per term for full-time students.

The following services will be provided without additional charges unless specified:

- Change from Audit to Credit
- Confirmation of Enrolment
- Confirmation of Fee Payment
- Dalplex Membership
- Leave of Absence Fee

- Letter of Permission
- Replacement Tax Receipt
- Transcripts (maximum of five requested at one time

Facilities Renewal Fee

All students are assessed a facilities renewal fee of $92.20 per term; $30.65 per term for part-time students. Full-time, Halifax students are also assessed a recreation renewal fee of $90 per term (to a maximum of $180 per year) which supports athletic facilities. Students in the Faculties of Engineering, Architecture and Planning also pay a Sexton Campus Facilities Renewal Fee of $100 per term which supports the IDEA Building.

2018/2019 rates provided for information only and are subject to increase upon approval of the Board of Governors.

University Bus Pass Fee (UPass)

All eligible, full-time students will receive a Metro-Transit bus pass (UPass). The fee in 2018/2019 is $157.00 and is effective September through April. Please refer to www.upass.dal.ca for further information. Eligibility for the summer UPass program is detemined by summer term registration and as information, the rate for Summer 2019 is $78.50

Laboratory Deposits

A deposit for the use of laboratory facilities in certain departments is required. The deposit is determined and collected by these departments. Students will be charged for careless or willful damage regardless of whether a deposit is required.

Additional Student Fees

Departments may also charge additional fees on a cost recovery basis not included in the fee schedule. Examples include, but are not limited to, print or copy fees, transportation costs and material fees. Students registered in online courses and distance programs will be assessed additional fees for delivery of these courses.

Miscellaneous fees are charged as outlined in the table below.

Miscellaneous Fees 2018/2019

Fee	Amount	Payable at
Late Registration	$50	Student Accounts
Reinstatement Fee	$50	Student Accounts
Returned Cheque	$20	Student Accounts
Admission Deposit	$200	Student Accounts
Undergraduate Medicine Admission Deposit	$500	Student Accounts
Application Fee - Undergraduate	$70	Registrar
Application Fee - Graduate	$115	Registrar
Late Graduation Application	$50	Registrar
Replacement ID	$15	DalCard Office
Replacement Bus Pass	$15	DalCard Office or Student Accounts
Transcript	*$5	Registrar
Fax Fees		
Metro	$5	Registrar
Canadian	$10	Registrar
International	$15	Registrar
Residence Application Fee	$50	Residence

* Where appropriate, contact Registrar's Office for details Note: Fees are subject to change after publication of this calendar.

Statements and Monthly Notices

Students with current activity will be issued electronic statements. Students will be notified through their official Dalhousie email account when a new statement is available. Subsequent monthly payment reminders will be sent to the student's official Dalhousie email address. Refer to www.moneymatters.dal.ca for more information.

Release of Student Financial Information

University policy recognizes the financial account as belonging to the student and therefore, to protect student privacy, account information is considered confidential. For more information on granting permission for financial information to be released to a third party (such as a parent), please contact Student Accounts at (902) 494-3998 or in Truro at (902) 893-6361 www.moneymatters.dal.ca.

Payment

The payment of academic fees will be received at the Student Accounts Office located on the basement level of the Henry Hicks Academic Administration building, the Enrolment Services Centre on Sexton Campus or the Enrolment Services Centre, Truro.

For the convenience of students, Canadian cheques and money orders, payable to Dalhousie University, are accepted by mail. Fees paid by mail must be received by Student Accounts on or before the term due date to avoid late payment and/or delinquency charges.

The following regulations apply to the payment of academic fees. For further information on regulations regarding withdrawal of registration, please refer to II.K:

a. **All**

students must pay the applicable deposit in accordance with Section A.

b. Those holding external scholarships or awards paid by, or through, Dalhousie must provide documentation of the scholarship or award before term fees are due.

c. Those whose fees are paid by a government (or other agency) must have the third party billing form completed and submit to Student Accounts by September 18 or January 21 for the respective term. This form is available online at www.moneymatters.dal.ca

d. Those paying the account balance by Canada Student Loan must negotiate the loan by September 18 or January 21 for the respective term. Interest will be charged after these dates and a late registration fee will apply.

e. Those whose fees are paid by Dalhousie University staff tuition fee waiver must present the appropriate waiver form and pay applicable incidental fees by September 18 or January 21, for the respective term.

f. Those who are Canadian citizens (or permanent residents), 65 years of age (or over) and enrolled in an undergraduate degree program will have their tuition fees waived, but must pay the applicable incidental fees.

g. Scholarships or awards paid by, or through, Dalhousie University will be applied to academic and residence fees.

h. When a Canada Student Loan, provincial loan or co-payable bursary is presented at the Student Accounts Office, any unpaid charges will be deducted.

i. Fees cannot be deducted from salaries paid to students employed at Dalhousie University.

j. Any payments made to a student account is first applied to past due balances.

Canada Student Loans

Students planning to pay by Canada Student Loan should apply to their province in April or May so that funds will be available by the time payment is required. The University will deduct fees/charges from the loan at the time of endorsement. Please contact the appropriate provincial office to determine eligibility as well as course load requirements. A late fee of $50 will apply if the loan is negotiated after September 18, 2019. (January 21, 2020 for students registered for winter term and May 18, 2020 for students registering for the summer term).

Provincial Bursaries and University Scholarships

These cheques are distributed by the Student Accounts Office. Any unpaid fees and/or temporary loans along with charges, if applicable, are deducted and payment will be issued following endorsement for any balance remaining. A valid Dalhousie University ID and Social Insurance Number must be presented in order to receive cheques. Please contact the appropriate provincial office to determine eligibility as well as courseload requirements for provincial bursaries.

For more information on student loans, bursaries or scholarships, inquiries should be directed to the Registrar's Office, Henry Hicks Academic Administration Building, Room 130.

Receipts

The amount of academic fees constituting an income tax credit is determined by Canada Revenue Agency.

A special income tax certificate (T2202A) will be available annually through Web for Student at dalonline.dal.ca no later than February 28 for the prior calendar year.

Refunds

Students withdrawing from all courses must submit written notification to the Registrar's Office. Non attendance does not constitute withdrawal, you must ensure courses are dropped. Refunds due to course withdrawals will be effective the date a course(s) is dropped online at www.dalonline.dal.ca or written notification is received at the Registrar's Office. Please contact Student Accounts to have your refund processed.

In the Faculty of Health, students who wish to withdraw from the University must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students in these faculties should continue to attend class until their withdrawal has been approved.

Refund Conditions

Refunds will be processed as follows:

a.	Based on the withdrawal date, tuition is refunded based on percentages outlined in the refund schedule at www.moneymatters.dal.ca.
b.	No fee adjustment will be made for a student changing their degree or program as follows: Regular (Sept - April) and Fall Terms After September 18, 2019 Winter Term After January 21, 2020 Summer Term After May 18, 2020
c.	No refunds will be made for 30 days when payment has been made by personal cheque or 60 days for a cheque drawn on a bank outside of Canada.
d.	Refunds will be made to the appropriate Student Loan service provider if a student has paid with a student loan and no longer meets eligibility criteria.
e.	A student who is dismissed from the University, for any reason, is not entitled to a refund of fees.
f.	Refunds will be prorated on fees paid by Dalhousie scholarships and/or tuition waiver.
g.	A valid Dalhousie University ID must be presented in order for a student to collect a refund cheque.

Refund Schedule

The most current version of the refund schedule is available at www.moneymatters.dal.ca.

Important Information Regarding Refunds

•	A portion of fees as outlined in the refund schedule will be assessed if withdrawal from a course occurs after September 18 (Fall Term) and January 21 (Winter Term). Withdrawals before these dates will be completely refunded, but no substitutions will be allowed from a financial perspective after these dates
•	Non-attendance does not constitute withdrawal and fees will be payable.
•	Students of the University of King's College should refer to college refund policies at www.ukings.ca
•	For financial charge inquiries, contact Student Accounts at (902) 494-3998 or Student.Accounts@dal.ca.

Delinquent Accounts
Accounts are considered delinquent when the balance of fees has not been paid by September 18 for the fall term or January 21 for the winter term.

Interest, at a rate set by the University, will be charged weekly on delinquent accounts for the number of days overdue.

Effective July 1, 2018 the rate of interest is 6.45% per annum, compounded monthly.

A student whose account is delinquent for more than 30 days will be denied University privileges including access to transcripts. A student will be reinstated upon payment of the fees outstanding, the arrears interest and a $50 reinstatement fee. Students will not be permitted to register in future terms until all outstanding amounts are paid in full. Subsequently, if the bank does not honour the payment, the student may be deregistered.

Graduating students whose accounts are delinquent on April 15 will not receive their degree/diploma parchment. For fall graduation the deadline is September 1. Transcripts are withheld until payment is received in full.

Accounts which become seriously delinquent may be placed in collection or further legal action may be taken against the individual. Students will be responsible for charges incurred as a result of such action.

Residence Fees

Residence rates vary depending on the location and style of accommodations available. For up-to-date residence options and rates, please visit dal.ca/residence. All residence rates include high-speed WiFi and a TV / entertainment streaming package. Rates **do not** include the non-refundable $50 Residence Application Fee.

It is important to note that traditional residences have a mandatory meal plan; however, there are several options available for students. Traditional residences on the Halifax campuses include: Howe Hall, Risley Hall, Shirreff Hall, Gerard Hall, LeMarchant Place and Mini Res. Traditional residences on the Truro campus include: Chapman House, Fraser House, and Trueman House. Non-traditional residence options on the Halifax campuses include: Glengary Apartments and the Grad House. On the Truro campus a section of Trueman House is reserved for non-traditional accommodations. Meal plans are not required in non-traditional residences but are recommended. For up-to-date meal plan options and rates, please visit dal.ca/foodservices.

Important:

- Once offered admission to an academic program of study at Dalhousie, students are eligible to submit a residence application. **Application can be made within 2-3 business days of the $200 admission deposit being paid.**
- Students must be registered full-time at Dalhousie to apply to residence.
- No refund will be made to any resident who is dismissed for misconduct. Discretionary power in exceptional circumstances remains with the Director, Residence Operations, in conjunction with the Director, Residence Life or their designates.
- All residence students, new and returning, who have received notification of their room assignment, must pay a $500 deposit to confirm their acceptance. The deposit is due within the time frame specified by the Residence Office.
- $250 of the $500 deposit is refundable if cancellation is received prior to August 1. No refunds are made after August 1.
- The $500 residence confirmation deposit can be paid by credit card (Mastercard, Visa, Amex) by visiting dal.ca/admissions.html. For more payment options, please visit dal.ca/admissions.html.
- No residence room will be held based on post-dated or "insufficient fund" cheques.
- Deposits or fees cannot be deducted from scholarships, fellowships, or similar awards.
- Residence agreements are for eight-month terms (September – April). Please note, residences close during the December break.

Residence Term
The residence term commences the Saturday prior to Labour Day and ends on the last day of the examination period in in April. Students must vacate the residence 24 hours after their last exam and residences are closed over the December break.

If required, an additional fee is payable by all residents who are registered in a Faculty where the academic session commences before or continues after the session of the College of Arts and Science. Special arrangements are to be made with the Residence Office for accommodation for periods prior to or following the session as defined above.

Payment of Residence Fees
Payment may be made in full at registration or in two instalments. The first instalment must be paid in full by September 18, 2018. Interest is assessed weekly at a rate as set by the University and will be charged on all accounts outstanding after September 18, 2018 and on any second instalment outstanding after January 18, 2019. The student will not be permitted to register for another session until all accounts are paid in full. A student whose account is delinquent for more than 30 days will be denied university privileges including access to transcripts. The student will be reinstated upon payment of the fees outstanding, the arrears interest, and a $50 reinstatement fee. For additional information regarding outstanding or delinquent accounts, please see II. Fees, Section K.

All residence fees can be paid at the Student Accounts Office, the Student Service Centre (Sexton Campus), or online at www.dal.ca/admissions.html.

Students should make an appointment as soon as possible with the Assistant Manager of Student Accounts if they are having financial difficulties.

Residence Communications
All residences include high-speed WiFi and a TV/entertainment package.* The cost is included in residence fees.
**These services are subject to change.*

Financial Aid

Government Student Loans

IMPORTANT: Please note that federal and provincial student loan regulations include stipulations for the Borrower in terms of the minimum course load, expressed as a percentage of the normal course load at the University, which the Borrower must carry in order to benefit from the program. This minimum must be maintained throughout the academic year, e.g. a student who wishes to receive either money or interest-free status under the Canada Student Loan Plan for the entire academic year must carry not fewer than 60 per cent of the normal course load (expressed in credit hours) for each term. Please note, to be eligible for provincial loan funding from Newfoundland, you must be registered in 80% of the normal class load. At Dalhousie, the normal credit hour load for student loan purposes is 30. The Borrower must carry not fewer than 18 credit hours, distributed equally between the terms, e.g. nine. If your particular program does not conform to this scheme, you should apply to Student Aid for funding for only that term in which your course load would fulfill this regulation. Federal and provincial rules can differ on this matter.

If you must drop or add courses, exercise care so as not to jeopardize your governmental student loan(s).

Addresses of Provincial Student Aid Authorities
Canadian students are to apply for government assistance to the appropriate agency in that province or territory in which the applicant is a bona fide resident.

Temporary Loans

The University has established a temporary loan program to assist all registered Dalhousie students with certain types of short-term financial difficulty when no other resource is available. Students must provide proof of their ability to repay the loan within the time period. (Loans are not meant for tuition fee payment.) These loans have a short interest-free period, after which interest will be charged. Refer to the Temporary Loan Application for further details. Applications may be picked up in the Registrar's Office, Room 130, Henry Hicks Academic Administration Building, the Sexton Campus Student Service Centre, the Enrolment Services Centre (Agricultural Campus), or online at www.dal.ca/moneymatters

Awards

Scholarships, Bursaries, Awards, and Prizes
The Registrar's Office is responsible for:

- Undergraduate Scholarships
- Undergraduate Bursaries
- Undergraduate Awards and Prizes
- Convocation Medals

IMPORTANT NOTE: The University regularly reviews the policy governing undergraduate awards. Consequently, portions of the following statement of policy may be modified or altered and may be implemented during the course of the academic year of this Calendar.

Helpful Terms

Admissions Average

This is the average of the subjects which were used for entry to the Dalhousie academic program and is governed by admission requirements for the degree/diploma selected.

Adjusted Average

This number is the sum of the Admissions Average, plus points which are assigned to the level of course difficulty (for AP and IB courses) and the number of university-preparatory subjects beyond the minimum five.

Faculty Groupings

There are eight: agriculture; architecture and planning; arts and social sciences; computer science; engineering; health professions; management; and science.

Types of Awards

- Scholarships: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects).
- Awards: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects) and on the recognition of additional relevant attributes.
- Bursary: An award granted on the basis of financial need.
- Medal: An award based on recognition of an outstanding academic record at Dalhousie for a specific degree program in a particular subject.
- Prize: A monetary award of any value, or a non-monetary award, based on general academic excellence, or proficiency in a specific area of study or competition.
- External Award: An award given to the student of the university by an external agency. The University may share in the selection, administration and/or payment of such an award.

General Policy
Applicable to those awards administered by the Registrar's Office. Selection criteria may be different for those awards administered by individual faculties/schools/departments.

Where Dalhousie Scholarships can be Used
Dalhousie University scholarships can be used only at Dalhousie unless the Will or Trust Deed should otherwise permit. The University of King's College has its own scholarship program. Insofar as scholarships, bursaries, awards, prizes, and governmental student loans are concerned, Dalhousie and King's are separate. In order to receive Dalhousie funds you must be a registered Dalhousie University student.

Changing Degree Programs or Faculties
Changing degree/diploma programs or faculties can have implications for scholarship retention. Scholarship holders considering degree or faculty changes should consult the Awards Office prior to making the change.

Scholarship Payments and Rebates
To receive scholarship funds, a student must be registered at least as a full-time student (minimum nine credit hours for degree students, six credit hours for technical students) at Dalhousie during the term(s) in which they are receiving the funds. Students registered in Graduate Studies, Medicine, Law and Dentistry (with the exception of Dental Hygiene students), are ineligible to receive in-course scholarships or renew an existing scholarship. These faculties have their own awards programs.

- Payments: Dalhousie University scholarships are credited towards students' accounts in two equal installments first and second term. Awards are applied first to tuition and prescribed fees, and secondly for residence fees.
- Rebates: The portion of scholarship money in excess of the above charges will be refunded to the student. Refunds are made by the Student Accounts Office in October and February upon request.

Entrance Awards

Entrance awards are available to students applying to Dalhousie directly from high school. Transfer students are not eligible for entrance awards, with the exception of the First Nations and Indigenous Black Students Scholarships. Entrants coming from Year II of a CEGEP program are considered to be transfer students. Students

entering the third year of engineering (including students entering from Associated Universities) should review the In-Course Awards (Engineering) section of this Calendar for award opportunities.

Dalhousie offers both renewable and non-renewable entrance awards. Non-renewable awards are held for one year. Renewable entrance awards are typically renewable for a maximum of four years. To be considered for entrance awards, applicants must submit a complete Dalhousie application for admission, a scholarship application, and an official transcript, to the Registrar's Office by March 15. Students must be admitted with a minimum 80% average (26 predicted points for IB diploma candidates) for entrance award consideration. Achieving the minimum academic average does not guarantee that an applicant will receive an award.

Applicants will be evaluated for entrance awards based on some or all of the following criteria: academic merit, extracurricular involvement, financial need, initiative to fund their own education, ancestry, and leadership. A DalOnline application is available for accepted applicants in December. A paper-based application is available for applicants yet to be accepted the following February. Visit http://www.dal.ca/scholarships for more information.

Eligible Courses for Scholarship Assessment
The Registrar's Office (Awards) considers all those Dalhousie courses which are taken for credit in a designated degree/diploma program during the academic year (or term in the Co-op program) as eligible courses for scholarship assessment.

Correspondence courses are considered for scholarship purposes.

Unless taken on Letter of Permission, transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Please note that courses taken at other institutions are counted, to a maximum of one course per term, for scholarship assessment if such courses are taken on Letter of Permission towards an eligible degree/diploma at Dalhousie.

Scholarship GPA (SGPA) Calculation
The scholarship GPA (SGPA) will be calculated for students who have completed a minimum of 30 credit hours of work over two terms within the preceding academic year. The SGPA will include all eligible courses attempted during this time period. Please note that the scholarship GPA and the sessional GPA normally differ. The scholarship GPA, expressed to two decimal places, does not show on a student's transcript.

Renewable Scholarships
Unless otherwise advised, an SGPA of 3.70 is required to maintain a renewable scholarship. Students must also complete a full course load (a minimum of 30 credit hours) over two terms within the previous academic year to be eligible for renewal. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. Holders of renewable awards are notified of either the renewal or the non-renewal of their awards annually, via Dalhousie email.

Holders of renewable scholarships are not also entitled to hold Dalhousie in-course scholarships. Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

In-Course Scholarships
All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the faculties of Architecture & Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management and Science, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be eligible for in-course scholarship consideration. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in the work term to be eligible for consideration. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve passing grades in both work terms, and achieve a minimum term GPA of 3.70 to be considered eligible for consideration. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-course scholarship recipients are notified of their award over the summer, via Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

Bursaries
The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

International Exchanges
Students who have permission to study for one or two terms outside of Canada in an approved exchange program, and are considered to be full-time (normally 30 credit hours), can be considered eligible for in-course or renewable scholarship assessment. Students who hold a Dalhousie scholarship and are planning to study abroad are advised to contact the Assistant Registrar (Awards) prior to departure to discuss their funding schedule.

Scholarship Assessment
Students who hold renewable scholarships will be assessed for renewal in either June or September depending on completion of two academic terms. If a student has previously failed to renew their scholarship and subsequently achieves the required 3.70 SGPA in the next academic year, or in any academic year within four of the original offer, the scholarship may be reinstated.

All other undergraduate students are assessed for in-course scholarships in June or September depending on completion of two academic terms.

Reduced Course Load and Retention of Scholarship
Scholarship holders considering taking a reduced course load should consult the Registrar's Office - Awards before dropping courses. Students must complete a minimum of 30 credit hours over two terms within the academic year to qualify for renewal of their scholarships or an in-course scholarship.

Record of Scholarships
Scholarships, awards, and prizes are recorded on academic transcripts. The University retains the right to reassign the source funding of a student's scholarship as circumstances may warrant (but there would be no reduction in the amount).

Graduation and Renewable or In-Course Scholarships
Students holding a renewable scholarship who choose to graduate earlier than originally expected, and later decide to return to upgrade their degree to a four-year degree, must submit a request to access their scholarship for the final year. In addition, if a student graduates and then decides to upgrade their degree, they cannot be assessed for an in-course scholarship until a further 30 credit hours over two terms within the same academic year are completed and a minimum SGPA of 3.70 is achieved.

Taxation
Students registered as full or part-time students are not required to claim financial awards (e.g. scholarships, bursaries) as income on their taxes.

Withdrawing
Award funds are credited to a student's account with the expectation that they will remain registered at Dalhousie at least as a full-time student (minimum nine credit hours for degree students or six credit hours for technical students) within the applicable term. Therefore, if a student reduces their course load or withdraws, these funds are expected to be returned to the University. However, depending on the time of the withdrawal, a student may be entitled to retain a prorated portion of the scholarship. Students in this situation are advised to contact the Assistant Registrar - Awards prior to withdrawing.

Scholarship Appeals
The deadline to appeal a scholarship decision for an entrance/in-course/renewable scholarship or entrance bursary is September 30.

Students may appeal under the following grounds:

- extraordinary or compassionate circumstances;
- unfair scholarship decision under the circumstances; and/or,
- inconsistent scholarship decision compared to other offers/decisions (compared to other Dalhousie scholarships)

Students must submit their appeal, in written form, to the Assistant Registrar, Awards, in the Registrar's Office, by the deadline noted above. The letter should clearly outline the grounds for appeal and the remedy being sought. Students should include documentation, if applicable, to support the basis of their appeal. The decision of the Appeals Committee is final.

Convocation Awards
The Governor General's Silver Medal, Governor General's Bronze Medal, University Silver Medal, Avery Prize, and University Medals are administered by the Registrar's Office (Awards) and are awarded at convocation. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for the second degree used when calculating their cumulative average. Students graduating in the fall convocation are eligible for consideration for the aforementioned medals and prizes in the following spring convocation. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible.

In the College of Pharmacy, the School of Health and Human Performance, the School of Health Sciences, and the School of Nursing, a University medal is awarded annually at the spring convocation to a graduating student who demonstrates the following criteria have been met:

- The candidate has successfully completed the equivalent of three full-time years in their respective baccalaureate program (90 credit hours) at Dalhousie.
- Has met the FHP cumulative GPA requirement or better on courses taken at Dalhousie towards the degree.
- Of those eligible, has the highest GPA.

All credits taken towards the degree at Dalhousie will be used in the calculations. Transfer credits taken prior to entry into the program are not counted towards either the 90 credit hours criterion, or towards the cumulative GPA requirement. Classes taken on Letter of Permission, while registered in the program, are included in the 90 credit hours criterion and calculated as part of the cumulative GPA requirement. As the School of Social Work does not offer a three year (90 credit hour) BSW degree, it is not eligible for the University Medal.

Entrance Awards

Robert J Chadwick Scholarship
This renewable scholarship will support a first year student entering the Bachelor of Commerce or Bachelor of Management program at the Rowe School of Business who demonstrates academic merit, community involvement and athletic interest.
Eligibility: The eligible student will be entering first year of a Bachelor of Commerce or Bachelor of Management program. They will demonstrate academic merit, community involvement, and an interest in athletics.
Application Type: General Entrance Award Application
Application Deadline: March 15 - check dal.ca/scholarships

Clarence and Marjorie Anderson Scholarship
Established by Clarence and Marjorie Anderson to support students entering any undergraduate degree program at Dalhousie University.
Application Type: Automatic Consideration – No Application Required

Julius D. Solomon Scholarship
This scholarship provides support for one of more students entering first year of study in the Faculty of Engineering.
Eligibility: For students entering their first year of Engineering. Preference will be given to students with demonstrated leadership abilities in extra-curricular and/or community activities.
Application Type: General Entrance Award Application
Application Deadline: March 15 - check dal.ca/scholarships

The Harold Sawler Scholarship
Born in 1917, Harold Sawler was raised and educated in the north end of Dartmouth. Harold went on to graduate from Dalhousie with a Masters of Arts and Harvard University with a Masters of Education. Harold returned to the Dartmouth schools' system where he would eventually serve as principal of Bicentennial Junior High School from 1951 to 1982. Harold Sawler was dedicated to providing a quality education for his students; this scholarship aspires to further this legacy.
Eligibility: First preference for graduates of Dartmouth High School or Prince Andrew High School. If there are no applicants from either of these schools, the scholarship may go to a student entering from another Dartmouth high school. Recipient must have high academic achievement and engagement with their community. Recipient must be a Canadian citizen.
Application Type: General Entrance Award Application
Application Deadline: Mar 15th

54th Avenue Capital Corporation Bursary
A $2,500 bursary to provide financial assistance to a student with demonstrated financial need and good academic standing entering university directly from high school.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $2,500

Albion Mines Scholarship
Awarded to a student based on academic achievement, community involvement and financial need.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be permanent residents of Pictou County, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,000

Aldous Bachelor of Commerce Bursary
The Aldous BCOM Bursary is intended to provide financial support to a new Commerce student, and may be renewable annually.
Eligibility: Awarded to a Canadian student entering the Bachelor of Commerce program directly from high school with a minimum 80% average and demonstrated financial need.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,000

Suddy and Barbara Bill Ashfield Bursary
This endowment provides renewable bursaries annually to students entering Dalhousie with permanent disabilities and demonstrated financial need. The number and value of bursaries may vary from year to year. To be considered, students must submit medical documentation regarding the nature of their disability, and a complete General Entrance Award Application.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $10,000

Atlantic Scholars Award
Atlantic Scholars Awards will provide tuition and residence costs (at shared-room rate, for as long as the recipient chooses to live in residence) for the length of the recipient’s first diploma (up to two years) or degree (up to four years). The scholarship does not cover meals, books, and student fees. Only those applicants who have achieved a minimum average of 85% on the courses required for admission shall be considered. Selection criteria include academic performance, geographic distribution, and extracurricular activity.
Eligibility: Available to students entering any program at the Faculty of Agriculture directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $40,000

Marjorie Ball Scholarship
Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.
Eligibility: Available to entering and current undergraduate students.
Application Type: Automatic Consideration – No Application Required

The Annie L. Beer Prize
Under the Will of the late Mrs. Thomas (Annie L.) Beer of Charlottetown a bequest was established at Dalhousie University. The net income from the fund provides for a prize which is to be awarded to the youngest student from Prince Edward Island who enters this University in each year.
Eligibility: Available to an entering undergraduate student from Prince Edward Island.
Application Type: Automatic Consideration – No Application Required

The Francis Hugh Bell Entrance Scholarship in Science
This scholarship was established by a bequest from the estate of Barbara Bell who attended Dalhousie in 1923 as a music student. This scholarship is awarded annually to honour her father, the late Mr. Francis Hugh Bell who was one of Dalhousie's earliest graduates.
Eligibility: Available to students entering any program in the Faculty of Science at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $2,500

Beta Sigma Phi Scholarship
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.
Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.
Application Type: See dal.ca/scholarships for more information
Application Deadline: July 31

The Bissett Scholarship
A scholarship valued at $24,000 ($6,000 per year) was established by Mr. David Bissett with the intention of encouraging scholastic achievement by providing an incentive to capable high school students. A nomination for a Bissett Scholarship will not interfere with consideration of the nominee for other University scholarships. A student may not, however, hold a Bissett Scholarship and another Dalhousie scholarship at the same time. Students must be nominated by their school to be considered for this scholarship, and should contact the Guidance Office for more information.
Eligibility: Available to students entering any program at Dalhousie University directly from Cole Harbour District High School. Applicants must be attending university as full-time students.
Application Type: See dal.ca/scholarships for more information
Value: $24,000

Black and Gold Awards
Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.0 in three full year courses or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Jeff Bredin Memorial Scholarship in Men's Volleyball
This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Robert Bruce Scholarships
The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Dr. John Bubar Scholarship
After graduating in 1950, John Bubar returned to former NSAC in 1967 to become the first department head of Plant Science Department. By the time John relinquished the chair more than a decade later, it had grown to a professional group of dozen accomplished scientists and teachers. John Bubar loved to teach and share his love of plants and agriculture in general. He was affectionately known by many students as "Johnny Plant." In turn he knew every students name and, by the time he retired in 1987, he had taught three generations of students at the former NSAC. John is a friend of the Agricultural Campus, and a strong proponent of practical learning. He has left an indelible mark on NSAC and the students who have passed through his doors.
Eligibility: Available to students entering the Bachelor of Science (Agriculture) program at Dalhousie University. Applicants must be permanent residents of New Brunswick. Selection criteria will include academic performance and financial need. Recipients cannot have received other significant awards.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $4,000

George Burris Scholarship
The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $4,000

Jeff D and Martha Edwards Scholarship
Hugh Maccagno established this scholarship in 2007 in memory of Jeff and Martha Edwards. As a young child living in the village of Lac La Biche in northeast Alberta, Hugh Maccagno clearly recalls his father speaking to Mr. Edwards and afterwards commenting *"What a fine gentleman he is."* Mr. Edwards, a black man dressed in a suit, tie, and hat, was in Lac La Biche coaching his baseball team from Amber Valley, Alberta. His father's words continue to inspire Hugh as they were voiced at a time when black people were subjected to so much discrimination in the US and Canada. Jeff Edwards was 21 when he and many other blacks left Oklahoma for Canada in 1910 seeking an escape from segregation and prejudice in the American South. He and his wife Martha homesteaded as pioneers at Amber Valley, raised 10 children, and contributed enormously to the community. Mr. Edwards embraced his new citizenship with pride, and when he died in 1973 at the age of 90, was remembered as a proud Canadian citizen who epitomized the spirit of black pioneers who settled the Canadian West. It is with these sentiments that Hugh Maccagno established this scholarship, which serves to provide post-secondary education to many from the large and long-established Black community of Nova Scotia.

Eligibility: Available to Black students entering any program at Dalhousie University directly from high school, with preference given to Canadian students of Black African descent, followed by native Black Bermudian students.
Application Type: General Entrance Award Application
Application Deadline: March 15

This bursary is available to an entering Dalhousie student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. To be considered, students must submit medical documentation regarding the nature of their disability.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.

Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $4,000

Reverend Trevor Phillips Memorial Scholarship
Revd. Trevor A. Phillips was born in Jamaica on March 5, 1941. He received his early education at Kingston College and Union Theological Seminary in Kingston. He was an Ordained Minister at Mount Zion United Church in Jamaica before migrating to Canada. From 1969-72 he continued his pastoral work in Prince Edward Island. Revd. Phillips moved to Nova Scotia and worked at St. Paul's United Church in Halifax from 1973-1981, and then Sambro-Parkhill-Jollymore Pastoral Charge from 1981 until his passing in 2008. He obtained degrees at the University of Prince Edward Island (BSc), St. Mary's University (MEd) and Dalhousie University (BEd 1975 & MA Education 1980) Science, Education, Educational Psychology, Counselling, Educational Administration and Supervision. During his career he was a teacher and guidance counsellor at several schools within the Halifax Regional School Board and a member of their Crisis Intervention Team. He was also a presenter at several national and provincial conferences delivering workshops on multi-culturalism, human rights, curriculum reform and discipline strategies. Revd. Phillips was a man of excellence with great passion for life. He was an avid sportsman who enjoyed badminton (at Dalplex with the "Silver Tigers" Table Tennis), cricket and jogging. His compassion and dedication to Christian Ministry, counselling within the community and caring for people in need was extensive and extraordinary. His amazing laughter and sense of humour brought joy to many lives. He was a legend in his time. On Eagles' Wings is an autobiographical account of his life and faith. The Revd. Trevor Phillips Memorial Scholarship was established as a "living" memorial so that his name and his excellence will be remembered in a significant way.
Eligibility: Awarded to students beginning their studies in any program directly from high school who are either Nova Scotia residents of Caribbean descent, or applying from the Caribbean.
Application Type: General Entrance Award Application
Application Deadline: March 15

The Hugh J. Potter Scholarship
An endowment has been established to provide a scholarship to a student who has demonstrated a high level of academic achievement. The scholarship honours the memory of Joseph Hugh Potter, a native of Digby County, who showed himself to be an exceptional initiator and developer of financial and commercial activity throughout this province in the fields of insurance, securities, shipbuilding, transportation and manufacturing.
Eligibility: Available to students entering the Bachelor of Commerce program at Dalhousie University directly from high school, with preference given to permanent residents of Digby County, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $5,000

Gordon S. Rankin Memorial Scholarship
Gordon Rankin, born in Halifax in 1933, graduated from Dalhousie in 1957 with a Bachelor of Commerce degree. He played both varsity football and basketball, holding the position of Captain for a period of time on both teams. As a continuing tribute to Gord, this scholarship was formed to assist athletes in financing their studies while attending Dalhousie University.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

The Harold A. Renouf Scholarship
An endowment has been established to provide an annual scholarship.
Eligibility: Available to students entering the Bachelor of Commerce program directly from high school.
Application Type: Automatic Consideration – No Application Required

Residence Scholarships
Awarded to outstanding applicants applying to a program on the Halifax campus, based on academic merit, leadership and extracurricular involvement.
Eligibility: Available to students entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $6,000

Residence Scholarships (Agriculture)
Awarded to outstanding applicants applying to a program on the Truro campus, based on academic merit, leadership and extracurricular involvement.
Eligibility: Available to students entering any program at the Faculty of Agriculture directly from high school.

The Walker Wood Foundation established this bursary in support of a student with demonstrated financial need.
Eligibility: Available to students entering the Bachelor of Science program in the Faculty of Science at Dalhousie University directly from high school, with preference given to students from high schools within Atlantic Canada.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $16,000

F. W. Walsh Memorial Scholarship
Frederick Waldemar (Waldo) Walsh (1897-1984) was born in Moncton, New Brunswick, and spent his boyhood in Coverdale, New Brunswick, on the family farm. He attended the Nova Scotia Agricultural College (now Dalhousie University, Faculty of Agriculture) (Class of ’17) and O.A.C. (Class of ’22) and worked as Superintendent of Agriculture for the C.N.R. until 1934 when he became senior agriculturalist with the Nova Scotia Department of Agriculture, until his retirement as Deputy Minister in 1962. After his passing, his three sons Robert, Jack, and Fred set aside money, the interest of which would provide a memorial scholarship for a deserving young man or women entering the degree course at the Faculty of Agriculture.
Eligibility: Available to students entering first year of any undergraduate degree program at the Faculty of Agriculture. Selection is based primarily on academic performance. Financial need and participation in school and community affairs will also be considered.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $500

Weinkauf Family Scholarship in Dental Hygiene
To provide an entrance scholarship in the School of Dental Hygiene.
Eligibility: First preference will be given to a student from Western Canada. If there are no suitable candidates, all first-year students will be considered. Financial need may also be considered in the selection of the recipient.
Application Type: Contact the Faculty for more information

F. Hume Wells Scholarship
This scholarship of $1,000 is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Judith Wells and Karen Woolhouse in memory of F. Hume Wells, a businessman in Halifax, who was interested in music and thought university education was important.
Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.
Application Type: Contact the Department, School, or College for more information

The Women’s Division of the Dalhousie Alumni Association Scholarships
This fund provides two entrance scholarships; one is named the Margaret Florence Newcombe Scholarship, which commemorates the 100th anniversary of the graduation of the first woman graduate of Dalhousie University in 1885. The second scholarship is named the Ruth Skaling Murray Scholarship, in memory of a dedicated alumna of the Dalhousie Women’s Division.
Eligibility: Available to entering undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Don Wright Scholarship of Excellence
This annual scholarship funded by the Lillian and Don Wright Foundation, supports outstanding students who are entering the Fountain School of Performing Arts in a Music degree program. While preference shall be given to awarding the scholarship to one student per year, if no one student merits the awarding of the scholarship, the awarding committee has the authority to award two scholarships to students who have applied and been accepted to study Music within the School. Where there is more than one eligible candidate, first preference shall be given to the candidate deemed to have the most merit as judged by a majority of the Fountain School of Performing Arts scholarships committee.
Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.
Application Type: Contact the Department, School, or College for more information

Sir William Young Scholarship
This fund was left by Sir William Young for the purpose of endowing scholarships.

Application Type: Automatic Consideration – No Application Required

Christine Zinck Scholarships
Four scholarships awarded annually in each of the four streams of Theatre: Acting, Costume Studies, Scenography and Technical Theatre and Stage Design and Theatre Studies.
Application Type: Automatic Consideration – No Application Required

In-Course Awards

How to use this Section
The term 'awards' in this section is a general term encompassing scholarships, bursaries, awards, prizes, medals, fellowships, and studentships. To see a list of awards that you may be eligible for, select your Faculty or College from the list on the right. You may also have the option to select a department within a faculty. Students who have yet to choose a major or belong to a Faculty of College that does not have Departments should select their Faculty or College, and then 'All Faculty Awards'.

The awards listed under the Department and 'All Awards' pages include those administered centrally (by the Registrar's Office, International Centre, and other units) as well as those administered within faculties and departments.

General Information
Dalhousie In-Course Scholarships
All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the Faculties of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, and Science, and the Dental Hygiene program, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-course scholarships. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in their work term to be eligible. Co-op students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve a minimum term GPA of 3.70, and achieve passing grades in both work terms, to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-Course Scholarship assessment takes place over the summer months. Scholarship recipients will be notified by Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception Dental Hygiene Students), or Law are ineligible to receive incourse scholarships or renew an existing scholarship.

Dalhousie Undergraduate Bursary Program
The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

Faculty of Agriculture In-Course Awards Program
The Faculty of Agriculture has its own in-course award program (including bursaries), typically due in the fall term. Most Faculty of Agriculture awards require a single application. More information is available at dal.ca/scholarships.

Golden Key International Honour Society
Dalhousie University has a participating chapter in the Golden Key International Society. The Golden Key Society is an academic honours society that recognizes the academic achievements of students. The society provides scholarships and leadership opportunities and career assistance to its student members. Students are invited to become members based upon criteria established by the society. For information please refer to the society's website: goldenkey.org.

College of Continuing Education
Introduction
This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

All CCE Awards
Morris Saffron Prize
A bequest under the will of the late Morris Saffron established an endowment to provide an annual prize to a student in the Transition Year Program who is judged to have made the greatest academic achievement during the year.
Application Type: Automatic Consideration – No Application Required

Jonathan Skeete Memorial Prize
Friends, faculty and former students of the Transition Year Program have established an endowment from which to fund an annual prize. The award honours the memory of Jonathan Skeete who, following completion of the TYP, graduated with a BComm degree and then served several years with the RCMP. An annual prize is available to a Black student who is enrolled in the Transition Year Program.
Eligibility: Available to current Black students in the Transition Year Program at the College of Continuing Education.
Application Type: Contact the Department, School, or College for more information

College of Sustainability
Introduction
This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

Note to ESS Students
Students in any Environment, Sustainability and Society (ESS) Major program are eligible for awards from the list linked below. This list includes all awards that are exclusive to ESS students as well as all university-wide awards. More information about College of Sustainability awards that require an application can be found on the College of Sustainability website.

ESS double major students are also eligible for awards from their other major subject. Please refer to the appropriate department list, grouped by Faculty, on the right side menu.

Bachelor of Management students in the ESS Major are also eligible for awards from the Faculty of Management.

All College of Sustainability Awards

Application Deadline to Apply: October 15

Advancement Bursary for Black Canadian or Aboriginal Students
This bursary was created through the generosity of members of the staff of the Office of Advancement. The bursary is intended to alleviate financial difficulties for Black Canadian and Aboriginal students.
Eligibility: Available to an undergraduate Black/African Canadian student or Aboriginal student. The student will have demonstrated financial need.
Application Type: Automatic Consideration – No Application Required
Application Deadline to Apply: November 15

Aramark Leadership Award
This award provides scholarships for returning undergraduate students at Dalhousie registered in the Faculty of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Diploma of Dental Hygiene who show leadership in the community. Eligible students must have been full-time Dalhousie students during the previous academic year, be currently registered as a full-time undergraduate student, be in good academic standing, and demonstrate involvement and dedication to the Dalhousie community through leadership, citizenship and/or sportsmanship. Applications are available through DalOnline - Student Awards and Financial Aid section.
Eligibility: Available to current Dalhousie undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Aramark Leadership Award Application
Value: $4,000

Helen Archibald Memorial Bursary
To provide one or more bursaries for undergraduate students from Cape Breton, Nova Scotia, with preference given to students from Richmond County.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Eva and David Ashkins Memorial Bursary
The donors established this fund for the purpose of assisting pupils who have matriculated from selected high schools to enter Dalhousie. These high schools are (first) North Queen's Rural High School or Bridgewater High School, and (secondly) other high schools in the province of Nova Scotia. The recipient may be considered in subsequent years for further assistance.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Helen Mary and Earl Atkins Memorial Bursary
A trust from the estate of Helen Mary and Earl Atkins to provide bursaries for those who might other wise be unable to attend university.
Eligibility: Available to first and second year undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of rural Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

The Avie Bennett Prize
This prize is one of six established by Mr. Avie Bennett, former Chairman and President of McClelland and Stewart to mark the company's 90th anniversary and the 40th anniversary of the New Canadian Library, of which the founding general editor was Dalhousie Professor Emeritus Dr. Malcolm M. Ross. It is awarded each year for the best essay on Canadian literature submitted from an undergraduate course at Dalhousie during the current academic year. Essays may have been written for courses in any department, but they should focus explicitly on a Canadian literary topic and not on history or culture more generally, and they must be written in English. Essays should be nominated by instructors; clean copies should be submitted by the specified date.
Eligibility: Available to any undergraduate student.
Application Type: Automatic Consideration – No Application Required

Harry and Kaye Bernstein Bursary
A bursary to an undergraduate student born and living in Halifax from a low income family, who shows financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Beta Sigma Phi Scholarship to Dalhousie University
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.
Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.
Application Type: See dal.ca/scholarships for more information
Application Deadline to Apply: July 31

Black and Gold Awards
Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.00 in three full year courses (18 credit hours) or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

The Jotham Blanchard Scholarship
The New Glasgow Literary and Historical Society in 1912 established this scholarship in memory of Jotham Blanchard. The scholarship will be awarded to a student of meritorious standing who is in the second year of an undergraduate program.
Eligibility: Available to a second year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

George Boyd Bursary
The income from the George Boyd Trust will provide a bursary to a student who demonstrates financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing, with preference given to applicants from the Sydney area, Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Jeff Bredin Memorial Scholarship in Men's Volleyball
This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.
Eligibility: Available to student athletes in any program (excluding the Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Ernest Brehaut Memorial Bursaries
This bursary is available to students if they maintain creditable academic standing and show genuine need.
Eligibility: These bursaries were established by the gift of Mrs. Ernest Brehaut of Colorado Springs, USA, in memory of her husband, a distinguished graduate of Dalhousie, Harvard and Columbia. Preference is to be given to relatives of the late Dr. Brehaut.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Lt. (E) Harry J. Brewer, MBE, CD, RCN (Ret.), Memorial Bursary
A memorial bursary fund has been established to provide financial assistance to a full-time student who is enrolled in a degree or diploma program.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Isabel Brown Scholarship
The scholarship was endowed in 1982 by the Brown family under the auspices of the Women's Division of the Dalhousie Alumni Association. The interest provides an annual scholarship ordinarily to a student who is entering the final undergraduate year.
Eligibility: Available to a final year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Robert Bruce Scholarships
The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Minnie F. Burbidge Scholarships
In her Will the late Minnie F. Burbidge bequeathed the residue of her Estate to Dalhousie University. In 1945 the sum of $16,000 was endowed to provide undergraduate, usually in-course, scholarships.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

George Burris Scholarship
The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Students must submit application a minimum of one month before departure.
Eligibility: Available to upper-year Dalhousie students participating in a study abroad or exchange program in England.
Application Type: Contact the International Centre for more information
Value: $5,000

Deborah Buszard Prize
This prize is awarded annually in March to an Environment, Sustainability and Society student who has contributed significantly to academic life in the College of Sustainability. Faculty members nominate students to the Awards Committee.
Application Type: Automatic Consideration – No Application Required

Deborah Buszard Bursary
The Deborah Buszard bursary supports third- or fourth-year ESS students who wish to participate in an international internship or experiential learning opportunity with the College of Sustainability but are unable to do so due to financial circumstances. Application information is available on the College of Sustainability website.
Eligibility: Available to current students at the College of Sustainability at Dalhousie in good academic standing.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: March 15 and October 31

George H. Campbell Memorial Scholarship
In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Howard C. Clarke International Study Award
An endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges.
Eligibility: Available to an undergraduate Dalhousie student participating in a study abroad or exchange program.
Application Type: Contact the International Centre for more information

The Rebecca Cohn Bursary Fund
A gift of $4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dorothy Macdonald Crummey Memorial Bursary
This bursary was established by the family of the late Dorothy Macdonald Crummey (1912-2005) who was born in Little Harbour, Pictou County. She attended Halifax Ladies College (an affiliate of Dalhousie University) and graduated with a diploma in Household Science in 1932. Like many educated women of her generation, Dorothy did not work outside the home after marriage to Dr. Clarence Crummey (MD 1932). Nevertheless, she actively supported university students remembering her own efforts to fund her education during "The Great Depression". Bursaries will be available to students enrolled in any undergraduate degree program from Nova Scotia with a preference for students from Pictou County. Apply through the general online bursary program.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and preferably graduated from a high school in Pictou County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie Leadership Bursaries
A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information.
Application Type: Contact the Department, School, or College for more information

Dalhousie Memorial Bursary Fund
From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at courses, who can show a need for additional support.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie Student Union Student Accessibility Award
This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Applicants must apply by writing, taping or filming a personal statement on why they could benefit from this award. Interested students should contact the Vice-President, Internal, Dalhousie Student Union for additional details and application deadline.
Eligibility: Available to current students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: See dal.ca/scholarships for more information

Dalhousie Student Union Student Wise Health Plan Bursary
To provide financial aid to an undergraduate student or students who are covered by the DSU health care plan.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie University Undergraduate Bursaries
Students who are registered in six credit hours per term will be considered for bursaries.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15 (fall), February 15 (winter), June 15 (spring and summer)

Alfred George Darville Memorial Bursary
This fund provides one bursary to a qualifying Dalhousie student.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from Halifax West High School, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Frank R. Davis Memorial Scholarships
These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good.
Eligibility: Available to entering students from Bridgewater Jr./Sr. High School.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.

Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Dharma Master Chuk Mor Memorial Scholarship
T.Y. Lung established this scholarship in memory of Buddhist monk Chuk Mor (1913-2002) who was an educator and artist well known in the fields of Chinese poetry, Chinese painting and Chinese calligraphy. This in-course scholarship is available to a full-time undergraduate student who has attained a high standard of academic achievement and who has completed a minimum of one year in any undergraduate degree program.
Eligibility: Available to a current full-time undergraduate student.
Application Type: Automatic Consideration – No Application Required

Charles Robert Raefe Douthwaite Memorial Bursary
To honour the memory of Charles Robert Raefe Douthwaite, an endowment was established to provide bursaries for students graduating from Nova Scotia high schools.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from a high school in Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The John Dunlop Memorial Bursary
An endowment to provide a bursary to an academically sound student from a rural area.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of a rural area.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Shawn Dupuis Memorial Prize
This prize was established in memory of Shawn Dupuis of Dartmouth, Nova Scotia who was a member of the varsity swim team. This prize will be awarded at the first AUS meet of the season held at Dalhousie to a Dartmouth Crusader Swimmer entering his/her first year of study at Dalhousie University. Preference will be given to students who are enrolled in a class from the Bachelor of Commerce program or the Spanish and Latin American Studies Department, Faculty of Arts and Social Sciences.
Eligibility: Available to a former member of the Dartmouth Crusaders Swim Team entering an undergraduate program at Dalhousie.
Application Type: Contact the Department of Athletics for more information
Value: $300

Marjorie F. Ellis Scholarships
The late Marjorie F. Ellis bequeathed one-half of the remainder of her estate to Dalhousie University for scholarships to worthy students.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Academic Improvement Prize
This prize is awarded annually in March to an ESS student in her/his fourth year of study who has shown the most academic improvement in her/his course work throughout the degree.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society First-year Prize
This prize is awarded annually in March to an ESS student in their second year of study who had the highest GPA in their first year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Second-year Prize
This prize is awarded annually in March to an ESS student in their third year of study who had the highest GPA in their second year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Student Travel Award
A fund has been established to support ESS students for travel with grants. Application information is available on the College of Sustainability website. Students submit a cover letter and budget to the College of Sustainability Awards Committee. The cover letter should explain how the proposed travel will contribute to research experiences or to the application or expansion of the undergraduate academic experience. The budget should include all expected sources of income (including other successful and unsuccessful grant applications) and a list of expected experiences.
Eligibility: Available to current students at the College of Sustainability at Dalhousie.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: March 15 and October 31
Value: $300-$500

Environment, Sustainability and Society SUST-star Prize
This prize is awarded annually to the ESS student graduating with the highest average in all SUST classes.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Thesis Prize
This prize is awarded annually to the student that is judged to have submitted and defended the best Honours thesis.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Rookie-of-the-year Prize
This prize is awarded annually in March to an ESS student in their first year of study who has contributed significantly to life in the College of Sustainability. Faculty members nominate students to the Awards Committee.
Application Type: Automatic Consideration – No Application Required

European Union Centre of Excellence (EUCE) Prize
Prize awarded by EUCE for the best essay on Europe and the European Union.
Eligibility: Available to any Dalhousie student.
Application Type: Contact the Department, School, or College for more information
Value: $100

Adrian Facca Leadership Fund
The Adrian Facca Leadership Fund has been established in Memory of Adrian Facca. Adrian graduated from Dalhousie University with Bachelor's degrees in both Arts (1980) and Commerce (1982). He proudly wore number 19 for the Dalhousie Tigers hockey team for five seasons, starting in 1977. He exemplified leadership both on and off the ice and was an important contributor to his team and to Dalhousie.
Eligibility: Awarded to students on the Tigers men's hockey and women's volleyball teams.
Application Type: Contact the Department of Athletics for more information

Ross Faulkner Scholarships
The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The SLT Bruce Galloway Memorial Prize
Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship's Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Vince Ginley Scholarships
A fund has been established to provide one or more annual scholarships for third and fourth year students enrolled in the Environment, Sustainability and Society Major/Honours degree, based on academic achievement in the previous year.
Application Type: Automatic Consideration – No Application Required

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

The Graham Family Athletic Awards
John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes. Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship, and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

MacCallum S. Grant Charitable Foundation Bursary
The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary. Students from the former City of Halifax, Dartmouth and the town of Bedford are not eligible to receive a bursary.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Enid Hager Clarke Textbook Fund
A bequest from the Estate has set up an endowment from which to award bursaries to assist students from certain geographic areas of New Brunswick. Students who are domiciled in King's and Saint John counties are eligible under the terms of the bequest.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The University received an endowment under the Will of the late Annette S. Hill to set up a fund, the income to be used to assist needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Eileen Holden Scholarship
To provide financial support for an undergraduate student.
Eligibility: Awarded to an undergraduate student who has graduated from a high school in/near Lunenburg County, NS. Preference is given to students who graduated from Bridgewater Jr/Sr High School or Park View Education Centre.
Application Type: Automatic Consideration – No Application Required

Mr. & Mrs. H. D. Howitt Scholarship
This scholarship was created to promote education and advancement of youth, to encourage achievement at the university level in both academic endeavors and in contributions to community life. The funds provide one or more annual scholarships to students enrolled full time in undergraduate degree programs. Awarded based upon academic excellence.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The E. John Jordan Scholarships
Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-course scholarships.
Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Nimmi and Teji Kanwal Bursary
Mr. Tejinder (Teji) and Mrs. Nirmal (Nimmi) Kanwal have cared and impacted numerous lives over the years. Although now retired, both were successful and beloved teachers for over 30 years. They grew up in India where their parents were strong believers in education and supported their schooling. Teji came to Canada in 1962 and Nimmi joined him in 1967. Travelling around the world twice, their love of adventure and travel continued throughout their lives. Both received Masters degrees from Dalhousie. They are supports of equal rights for all, which includes their support for equal opportunities for teachers in Nova Scotia. As Teji puts it "If you can't do something for someone, you are a no one."
Eligibility: Awarded to an undergraduate Dalhousie student who is in good academic standing and demonstrates financial need, with preference to a female student.
Application Type: General Entrance Award Application
Application Deadline to Apply: October 15

The Khaki University Scholarships
From the Khaki University of Canada and the Young Men's Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of $6,500 to endow scholarships.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Killam American Scholarship Fund
This endowment, established in memory of Isaac Walton Killam, provides entrance and in-course scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.
Eligibility: Available to entering and current undergraduate students who are US citizens (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Kostman Family Bursary
An endowment has been established in memory of Harry Kostman to provide one or more bursaries for undergraduate students of First Nations or African-Canadian descent who are graduates of TYP entering full-time studies. Harry Kostman had an enduring passion for education, and generously provided for his children and grandchildren while they attended university. Through this bursary, they strive to continue his legacy of support.
Eligibility: Available to full-time Black or First Nations undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and have completed the Transition Year Program at Dalhousie, with preference given to single parents.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Ann Lavers Howe Hall Bursary
The Ann Lavers How Hall Bursary was founded, by alumni and friends of Howe Hall, to provide financial assistance to a Dalhousie student who is a current Howe Hall resident. It is named in honour of Ann Lavers, staff member of Howe Hall from 1967-1994, who befriended many residents over her term of employment, in a variety of positions, at Howe Hall. The recipient must have made a positive contribution to the residence community at Howe Hall. Application information is posted within the residence each January.
Eligibility: Available to a Dalhousie student who is a current resident of Howe Hall, who is in good academic standing, and has demonstrated financial need.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Annie E. Longard Memorial Bursary
An endowment has been established to provide an annual bursary in memory of an accomplished alumna and long-time participant in the Women's Division of the Dalhousie Alumni Association.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

The W. Andrew MacKay Alumni Scholarship
The Dalhousie Alumni Association established an annual scholarship in honour of Dr. W. A. MacKay, a former president of the University. The scholarships are available to students who have demonstrated high academic standing (GPA of at least 3.30) and who have shown an excellence in qualities of leadership, citizenship and sportsmanship. Candidates are considered by nomination by their Department or School in the fall of each year.
Eligibility: Available to current undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: See dal.ca/scholarships for more information

MacKean Athletic Scholarship
The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Springhill, Cumberland County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dr. Carolyn Savoy Award of Excellence
In March of 2009, Dr. Carolyn Savoy announced her retirement from coaching, after a 32-year career of outstanding service to Dalhousie University and its women's basketball program. Carolyn continues to work as an Associate Professor in the School of Health and Human Performance at Dalhousie. Dr. Savoy came to Dalhousie in 1977 as head coach of the women's basketball team, following seven years in the same capacity at St. FX. In over three decades of coaching, Coach Savoy posted very impressive results, including an 858-292 CIS win-loss record for a 74.5 winning percentage. A four-time AUS Coach of the Year, she led the Tigers to the national final in 1980, the semifinals in 1982, to a fourth place CIS finish in 2007 and placed sixth at nationals in 1986, 1996 and 2001. Coach Savoy's teams won nine regular season AUS titles and five AUS championships. Academically, her teams had a 100% graduation record for those playing three to five years in the program. As a Level 4 basketball master course conductor, Carolyn has coached at the national and international level as an assistant with the Canadian national team program and also served as head coach of the 2001 Nova Scotia Canada Games team. She completed her BPE degree in 1969 at the University of New Brunswick. She enjoyed an outstanding athletic career at UNB, where she was a star volleyball, basketball (she played on a team that compiled a 93-game winning streak) and field hockey player. She began her coaching career at St. FX (1969-77), where she transformed both the basketball and field hockey teams into winning programs. Carolyn has been honoured with a number of prestigious awards including the 2002 Women of Excellence award in the health, sport and fitness category. In 2005 she received the Frank Baldwin award for her contribution to the development of basketball in Nova Scotia. She was also inducted to the Saint John Sport Hall of Fame as a builder in 2003.
Eligibility: Available to athletes in the women's basketball program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Leslie Shaw Bursary

Atlantic Council of Crop Life Canada Awards
CropLife Canada is the trade association representing the manufacturers, developers and distributors of plant science technologies, including pest control products and plant biotechnology, for use in agriculture, urban and public health settings. They strive to ensure that the benefits of plant science innovations can be enjoyed by both farmers and consumers. CropLife Canada promotes sustainable agricultural practices and are committed to protecting human health and the environment.
Eligibility: Available to current students in the Diploma of Technology programs in the Faculty of Agriculture. Recipients will be from agricultural backgrounds and plan to pursue employment in the agricultural sector. Preference is given to students whose backgrounds, course and project work, summer employment, and career

plans reflect an interest in the crop protection industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Atlantic Farm Mechanization Show Scholarship
The Atlantic Farm Mechanization Show is an event that is held bi-annually that mainly focuses on the newest, innovative ideas in the agricultural industry. Farming has changed dramatically over the last few decades. New farming ventures are becoming increasingly popular, from large tract farms that are operated by multi-nationals, to small individual bed plots. According to The Atlantic Farm Mechanization Show, "innovation has always been the most powerful tool in a farmer's tool box and will continue to be so into the future."
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) in Integrated Environmental Management program at the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Atlantic Fertilizer Council Award
Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $500

Atlantic Land Improvement Contractors Association Award
The Atlantic Land Improvement Contractors Association Bursary was created by ALICA for engineering students with a keen interest in soil, water and land improvement. ALICA acknowledges that the cost of tuition is becoming increasingly high which makes it difficult for many students to attend University. The Board of Directors voted to begin a scholarship fund in 1990 and the scholarship has been active and helping students with their post-secondary education ever since.
Eligibility: Available to students in the Diploma of Engineering program in the Faculty of Agriculture with a demonstrated ability and interest in soil, water, and land improvement.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Doug Bailey Memorial Bursary
Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manger of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

A. B. Banks Memorial Scholarship
This scholarship is given by friends and family in memory of A.B. Banks, a former Director of Livestock Services Branch, Nova Scotia Department of Agriculture and Marketing. Mr. Banks was highly dedicated to the agricultural industry throughout his 35 year career in Nova Scotia and elsewhere in Atlantic Canada. He was born and raised in the Annapolis Valley and graduated from the former Nova Scotia Agricultural College and the Ontario Agricultural College. His career included service with the Canada Department of Agriculture, the Newfoundland Department of Agriculture and Forestry and the Nova Scotia Department of Agriculture and Marketing. As one of the first agricultural representative in Nova Scotia, he served the counties of Colchester, Halifax, and Cumberland. He was a strong advocate of improved farm management skills and believed this to be an important key to improving agricultural production.
Eligibility: Awarded to the second year BSc(Agr) Animal Science student with the highest average from the first year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

David W. Brown Memorial Scholarship
The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.
Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Edward Brown Memorial Undergraduate Bursary
The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.
Eligibility: Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Merle Cail Memorial Scholarship
The Merle Cail Memorial Scholarship Fund was created by Merle's wife, Faye Cail in memory of Merle's dedication to organic agriculture. Born in Rexton, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstien Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.
Eligibility: Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.
Application Type: Faculty of Agriculture In-Course Award Application

Donald E. Clark Memorial Scholarship
Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark's sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.
Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include academic performance, interest, and aptitude in the engineering field.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check moneymatters.dal.ca for application deadline
Value: $500

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Colonel Charles Coll Memorial Scholarship
The Colonel Charles Coll Memorial was established in memory of Col. Charles Coll Sr. He was the inventor, owner and president of Muskol Enterprises Limited. He manufactured and sold Muskol insect repellent first from his basement in his Truro, Nova Scotia home and later from his manufacturing plant in Hilden, just outside of Truro. In 1957 Charles concocted a perfume to apply to clothing while deer hunting and later registered a company. The deer lure was used by regular deer hunters, bow hunters, wildlife photographers and naturalists. Charles named the ingredient "Muskol" which derives from musk, an ingredient in the lure and the phonetic last name Coll. Federal and Provincial Departments of Fisheries, Resources, Mines, as well as many sportsmen and outdoors people still continue to use the Muskol Insect Repellent.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) Animal Science program. Selection criteria include academic performance, involvement and interest in poultry, and achievement and contribution to 4-H.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria

include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Cooke Aquaculture Scholarship
Cooke Aquaculture Inc. created this award to support students studying Aquaculture at Dalhousie University. Cooke Aquaculture is a vertically integrated corporation headquartered in Black's Harbour, NB, with aquaculture operations in Atlantic Canada, the United States, Chile, Spain, and Scotland.
Eligibility: Students in 2nd, 3rd, or 4th year of the Bachelor of Science (Aquaculture) program who demonstrate high academic achievement and leadership in a volunteer, community, sports, or work activity.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Value: $2000
Year of Study: 2, 3, 4

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Renée Covill Scholarships
The Renée Covill Scholarship was established by Dennis Covill and Renée Covill in their estate. Dennis and Renee Covill, immigrated to Canada from England in 1955. Building on his experience working on the development of Colossus, the world's first electronic computer, Dennis went on to establish Nautel Limited in Hacketts Cove, N.S. Under his leadership and expertise, Nautel created the world's first high-powered solid state radio beacon – a technology now used around the world. Nautel, a partner in UNB's wireless research program, designs and manufactures high power solid state radio transmitters for AM and FM radio stations, navigation radio beacons and other applications.
Eligibility: Available to current students from Atlantic Canada studying in the Bachelor of Science (Agriculture) Plant Science or the Bachelor of Technology (Environmental Landscape Horticulture) at the Faculty of Agriculture. Preference will be given to students who have course and project work that reflect a commitment to environmental issues and career interests in growing plants (including farming). Selection criteria are academic performance, financial need, and career plans.
Application Type: Faculty of Agriculture In-Course Award Application

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Created in memory of Dr. Donald Young, fund establishes an annual award for an undergraduate degree student studying Plant Science.
Eligibility: Upper year plant science
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships
Year of Study: 2, 3, 4

CA Douglas Bursary
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

Eastern Veterinary Technicians Association Bursary
The Eastern AHT Association represents AHTs and similar persons especially those working in the field of veterinary practice in the four Atlantic Provinces. Formed in 1989 it now numbers approximately 55 members including over 20 students enrolled in the AHT program at the Agricultural Campus. The EHTA Bursary is awarded annually to an AHT student entering the third year of the program based upon all-around performance, but with special reference to clinical ability.
Eligibility: Awarded to a student who best demonstrates proficiency in veterinary clinical skills during their first year and externship at the Atlantic Veterinary College as part of the Veterinary Technology program. Students must be in good academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Paul C Eaton Memorial Scholarship
Paul C. Eaton was an alumnus, Class of '48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.
Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $2,500

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Farm Credit Canada Scholarship
The Farm Credit Corporation is a crown corporation wholly owned by the Government of Canada. The Corporation's mission is to "provide the Canadian farmer with a reliable source of long term credit and personalized counselling services." Farm Credit Corporation strongly believes in the farm community and the education of youth. The Farm Credit Corporation Bursary is their way of demonstrating their commitment to the betterment of the young people in the community.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Applicants must be Canadian citizens who are Agricultural Economics or Agricultural Business majors. Selection criteria include academic performance, interest and competence in farm management and in the subjects associated with the economics of the farm business, interest and involvement in college and home community as demonstrated by participation in organizations and affairs, farm experience, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Farm Focus Scholarship
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture.

Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Robert and Sheila Frame Scholarship for Maple Research
This award was established by Robert and Sheila Frame to recognize and support student involvement in maple research. Robert Frame is the past President and current Vice-President of the Maple Producers Association of Nova Scotia (MPANS), and co-chair of the organization's research committee.
Eligibility: Awarded to a student enrolled in the BSc(Agr) program in any year of study who has demonstrated involvement in maple research, with preference for the following areas: research on natural and environmental influences on maple syrup production, research that contributes to best management practices in maple syrup production including business practices, and research on the origin and history of maple syrup production in Nova Scotia.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $500

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.
Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.
Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.

Bonnie R. Haviland Memorial Bursary
The Bonnie R. Haviland Memorial Bursary was created by Barb Whiston in memory of her mother's aunt Bonnie, in order to honor her memory. This bursary will provide a legacy to Bonnie Haviland and provide support and encouragement to the selected student.
Eligibility: Awarded to a student entering the second year of the Veterinary Technology program whose performance in the first year has demonstrated a caring attitude and a commitment to others. Applicants will have demonstrated financial need. Recipients must not have received other bursaries of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer's husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer's heart and having a scholarship created in her name, is something very special to her. Due to the couple's success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Eileen Holden Scholarship
To provide financial support for an undergraduate student.
Eligibility: Awarded to an undergraduate student who has graduated from a high school in/near Lunenburg County, NS. Preference is given to students who graduated from Bridgewater Jr/Sr High School or Park View Education Centre.
Application Type: Automatic Consideration – No Application Required

Dr. Bill Jenkins Memorial Scholarship
Bills career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premieres' Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.
Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ketchum Manufacturing Company Limited Prize
Zebulon Ketchum, an Ottawa, Canada based inventor and former professional lacrosse player turned his love of tinkering into a successful business. He owned a bicycle shop in downtown Ottawa and eventually grew and expanded that business into other products including becoming the first provider of the new "horseless carriage" in the nation's capital. However, it was his inventor's nature that led him to the genesis of the Ketchum business which was metal identification tags to be used in the livestock industry. The company has become the world's leading supplier of tags used to identify and trace the origins of wild caught and farmed seafood and they continue to be a metal stamping company as well and currently produce numerous metal products for various industries around the world. The business started on a rural farm outside of Ottawa and when it moved it found itself in the middle of the city. What started as a niche business serving the local agricultural community spread regionally, then nationally, and now competes in almost every market of the world.
Eligibility: The Ketchum Manufacturing Company Limited Prize is awarded to a graduate of the Animal Science option.
Application Type: Automatic Consideration – No Application Required

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Landscape Nova Scotia Award
Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.
Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Langille Brothers Scholarship
Alan Langille graduated from the Nova Scotia Agricultural College in 1958 and went on to have a career as a plant physiologist and professor at the University of Maine. Alan makes this scholarship possible in memory of his two older brothers, both also NSAC Alumni. Bruce Langille (grad 1946) went on to work as a chemist for the Plant Products Lab in Ottawa. Jim Langille (grad 1947) went on to a career as an Agronomist for Nappan Experimental Farm.
Eligibility: Awarded to a third year BSc(Agr) student majoring in Plant Sciences. Preference will be given to students who have completed their first three years of study at the Faculty of Agriculture. Awarded based on academic excellence and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougal was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarshipsfor application deadline
Value: $250

Danny MacEwen Memorial Scholarship
Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn't always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved with the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.
Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Angus and Tena MacLellan Memorial Scholarship
The Angus and Tena MacLellan Memorial Scholarship was established by both Tena and Angus' estate. Angus and Tena were avid farmers in Cloverville, Antigonish County.
Eligibility: Available to students entering third or fourth year of an undergraduate degree program in the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Edith Main Memorial Bursary
The NSVMA has created the Edith Main Memorial Bursary in her memory. Incorporated under the Veterinary Medical Act of the Province of Nova Scotia, the Nova Scotia Veterinary Medical Association (NSVMA) holds the responsibility to regulate the practice of veterinary medicine and to govern its members in accordance with this Act, regulations and the by-laws in order that the public interest may be served and protected.
Eligibility: Awarded to a Nova Scotia student in the second year or higher of a diploma or degree at the Faculty of Agriculture who intends to pursue a career in veterinary medicine.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joseph E. Mapplebeck Memorial Bursaries
In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.
Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need. One of the two awards will be made available annually to a student in the Plant Science Technician program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.
Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $100

Clint McLean Memorial Scholarship
The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.
Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

Value: $2,000

Karen Meek Memorial Scholarship
Karen was born March 28, 1962 and grew up on the family farm in Canning, Nova Scotia. She attended local schools and graduated from Cornwallis District High School in 1980. Karen was an avid participant in school sports, 4H, horseback riding, ringette, her motorbike, and living life to its fullest. Following in her father's footsteps (Eric Meek – class of 1954) she attended and graduated from former NSAC in 1982 with a Diploma in Ag Business, Karen participated in many campus activities but the Woodsmen Team was always her favorite. She developed many close friendships in her years in Truro. The Karen Meek Memorial Scholarship was established so that Karen's memory could live on.
Eligibility: Available to current students in the Bachelor of Science (Agriculture) Environmental Sciences program. Selection criteria include academic performance, financial need and contribution to campus life. This scholarship is not available to students receiving other awards over $1,000.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

John Miller Memorial Award
Since 1983 John Miller assisted the hog industry by coordinating and providing programs that greatly improved the industry as secretary/manager of Pork Nova Scotia. John spent countless hours educating producers and others of the cost efficient and productive way to raise and market hogs. He often spoke at the Faculty of Agriculture to students in the hog production course on the strengths of the industry. To show appreciation of this dedication, the producers and friends of Pork, NS provide an award in memory of John.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Awarded to a student whose course and project work and career plans reflect an interest in the hog industry or whose application shows interest, understanding, and appreciation for Nova Scotia's hog industry.

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity.

Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.
Application Type: Faculty of Agriculture In-Course Award Application

Nova Scotia Mink Breeders Association Award
Dr. Bruce Hunter passed away on October 19th, 2011 at the age of 61. He was a leading veterinarian in the fields of avian and furbearer disease, and an integral part of the Canadian mink industry, serving as director of research for the Canada Mink Breeders Association. He was a longtime champion of integrating animal, human and environmental health at OVC and around the world. He played a key role in setting up a Canadian Community Practice in EcoHealth (CoPEH) and a graduate-level course in ecosystem approaches to health involving U of Gm the University of British Columbia and Université du Québec à Montréal. Recently, he was co-leader of a poultry project in Ghana for Veterinarians Without Borders/Vétérinaires Sans Frontières-Canada. This year, he received the Aeroplan Volunteer of the Year Award from VWB/VSF in recognition of his work and commitment. The Nova Scotia Mink Breeders Association established this scholarship in memory of Dr. Bruce Hunter, a retired veterinarian from Ontario Veterinary College and recognized expert on naturally occurring diseases in mink. This scholarship will recognize students who have an interest in mink.
Eligibility: Available to current students in any Animal Science-related undergraduate program in the Faculty of Agriculture, with preference given to a student whose course/project work demonstrates an interest in the mink industry.

Donald Palfrey Award
The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Value: $1,200

Passionate Plants Person Award
In 1976, with two passionate plants men – the late Don Craig and the late Captain Richard Steele – as founding members, they began as RSCAR, the Rhododendron Society of Canada Atlantic Region. They were one of three regions, the other two being Niagara and Toronto. When Niagara and Toronto decided to join the American Rhododendron Society in the 1980s and RSC ceased being its own organization, the three regions – Atlantic, Niagara, and Toronto – became the 3 chapters in District 12 of the ARS. In 2003, they formed the Atlantic Rhododendron & Horticulture Society, to reflect the diversity of plant interests among local gardeners and plants people, while maintaining a central interest in rhododendrons and other ericaceous plants. They are a non-profit society registered in Nova Scotia.
Eligibility: Available to students entering second year of the Environmental Horticulture diploma program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Preference is given to students whose passion for plants is infectious and will most impact the way we regard and understand plants in both public and private environments. The student should also demonstrate leadership abilities and financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Howard W. Roper Memorial Award
The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey's until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey's. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country

and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.

Jack Sibley Agriculture Bursary
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

G. G. Smeltzer Memorial Award
Gerald "Gerry" Gordon Smeltzer was a graduate of the former Nova Scotia Agricultural College and McGill University, his work in the livestock industry, apiculture, livestock crops, 4-H, and his community rapidly earned Gerry Smeltzer the admiration of all who came to be associated with him. As an Extension worker with the Nova Scotia Department of Agriculture and Marketing, he promoted improved livestock management techniques and was considered a driving force in the 4-H program. While an agrologist with Agriculture Canada, his work on new varieties of corn for silage and grasses, legumes, soybeans, fababeans, field peas, and small grains, laid the foundation for the livestock industry of Eastern Canada. In 1966, Mr. Smeltzer was named the Annapolis Valley Man of the Year in appreciation of his efforts. In 1987, he was awarded the Fred Rathje Memorial Award by the Canadian Beekeepers' Association.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program at. Applicants must be permanent residents of one of the Atlantic provinces and be Plant Science - Agronomy majors. Selection criteria include a genuine interest in the area of field crops reflected through course and project work and summer employment, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill's dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Syngenta Canada Inc. Awards
Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection

industry. Selection criteria include academic performance, and potato farm experience or background.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic '86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

Florence (Pineo) Ward Memorial Award
The Florence (Pineo) Ward Memorial Award was established by James Pineo in memory of his late sister, Florence. James wanted to leave a legacy behind for his sister, and help support the academic efforts of agricultural students, such as his niece Lisa (Orlando) Gowan, a BSc(Agr) Agricultural Chemistry graduate.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture. Preference will be given to students from Boutilier's Point, Halifax County, and Advocate, Cumberland County. Awarded to students in financial need. Preference will be given to students with sound academic background who have come to the Faculty of Agriculture for technical training to enhance their employability but financial constraints are limiting their ability to continue their studies.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Raymond Webber Memorial Scholarship
Ray was born and raised in Halifax, Nova Scotia. Upon completion of High School, Ray took a business course and worked in an office for the next five years. This soon became boring so Ray entered the "Nova Scotia Agricultural College" (now known as the Faculty of Agriculture) in Truro in 1928. After completing his studies at Truro, he attended MacDonald University in Montreal where in 1931 he received a Bachelor of Science Degree in Agriculture. After graduation, Ray went to work for Canada Agriculture in the Plant Protection Branch in Halifax in an administrative capacity. Due to Ray's sincere dedication and commitment to Landscape Atlantic, a memorial scholarship has been established in his name to ensure his legacy lives on long into the future.
Eligibility: Available to students entering second year of the Diploma in Technology (Managed Landscapes) program at the Faculty of Agriculture. Selection criteria include academic performance and practical skills.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture's Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Wild Blueberry Producers Association of Nova Scotia Scholarship
The Blueberry Producers Association of Nova Scotia is a grower organization with approximately 1000 members from around the province. The Association promotes the production and consumption of wild blueberries. It constantly strives to keep growers informed of the newest technology available for both growing and harvesting. As well, it helps provide the producers with an adequate return to management, labour and capital.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program with Plant Science majors. Preference given to someone with interest and experience in small fruit. Selection will be based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams' family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Doug Bailey Memorial Bursary
Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manger of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Vera Caldwell Memorial Bursary
Vera Caldwell was born on June 3rd, 1924 in Hants County. She was a very devoted and involved member of the Newport United Church, serving as a Steward, Sunday School Teacher, and as a Youth Group Leader. Vera taught school for more than 25 years, first beginning in a one-room schoolhouse and ending her career at Brooklyn District Elementary School in 1989. As shown by her achievements, Vera was dedicated to the educational system and being a life-long learner. She was passionate about international education and actively supported education for children from developing nations. Due to her sincere involvement and passion in the educational system, a bursary has been created in her memory.
Eligibility: Awarded based on financial need to full-time technical or undergraduate international students at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Canadian Agricultural Economics Association Prize
The Canadian Agricultural Economics Association presents a book prize to a graduating student from the Agricultural Economics or Agricultural Business option of the BSc (Agr) program. This prize is selected on the basis of overall performance.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Canard Conservation Undergraduate Scholarship
Dr. Charles Albert Eaves was born February 21st, 1908 in Liverpool England. Charles immigrated to Canada in March 1926 and in 1932 received his B.Sc. from McGill. In 1933 he attended Cambridge University on an I.O.D.E overseas scholarship before returning to McGill to receive his MSc. degree in 1937. On October 25, 2000, he received an Honorary Doctorate from Dalhousie University and the former Nova Scotia Agricultural College, now Dalhousie Faculty of Agriculture. The Canard Conservation Scholarships were established by Dr. & Mrs. Eaves to provide a graduate and undergraduate scholarship each year for students of Kings County focusing on environmental studies related to agricultural practices with particular reference to dyke land preservation and the general conservation of soil and water reserves.
Eligibility: Awarded to a student who is a permanent resident of Kings County, Nova Scotia, in the first or second year of the Bachelor of Science (Agriculture) program who is planning course and/or project work related to the environment. Selection criteria include academic performance, demonstrated interest in the environment, and career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

James Card Memorial Bursaries
James Card was born in Windsor, Nova Scotia on October 12, 1924. He was a life-long farmer in Centre Burlington and was a former West Hants Municipal Councillor and was also a 4-H Club leader. As a part of James estate, three awards have been sponsored in his memory.
Eligibility: Awarded to students in financial need, with preference to international students, who are studying at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: 3 @ $1,000

Chartwells Scholarships
Chartwells is a catering/food service company that specializes in providing services to higher education students. They are committed to providing programs and solutions to students to fit their unique needs and requests. Chartwells understands that a well-balanced diet is integral to an individual's state of mind and long-term happiness. Providing students with a high-quality food service isn't the only commitment Chartwells has made, they also offer multiple scholarships for both graduate and undergraduate programs.
Eligibility: Available to current students with high academic performance in any undergraduate program in the Faculty of Agriculture at Dalhousie who have not received other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Gerard Chiasson Memorial Award
Gerard Chiasson was born in 1931 in Margaree Forks, Inverness County, Nova Scotia. Gerard was very involved in outdoors activities, he was a farmer, fisherman and lumberman. He was also very involved in his community, he was a past president of the N.S. Woodlot Owners Association and The N.S. Federation of Agriculture, Inverness County Federation of Agriculture, Margaree Credit Union, Margaree Gasperaux Fisherman Association, and Eastern Dairy Foods Co-op. He was former chief of the Margaree Volunteer Fire Department, former chairman of the Margaree River and Community Protection Community, former member of the board of N.S. Volunteer Planning and was also the president of the N.S. Landowners and Forest Fibre Productions Association. As a result of Gerard Chiasson's sincere commitment and his lifetime of contributions to the Nova Scotia Federation of Agriculture and community organizations, a scholarship has been created in his memory.
Eligibility: Available to upper-year students in any undergraduate program in the Faculty of Agriculture who are residents of Cape Breton (with preference given to those from Inverness County). Selection criteria include financial need, involvement in community activities, and leadership.
Application Type: Faculty of Agriculture In-Course Award Application

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.
Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.
Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club's activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

CA Douglas Bursary
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Farm Credit Canada Scholarship
The Farm Credit Corporation is a crown corporation wholly owned by the Government of Canada. The Corporation's mission is to "provide the Canadian farmer with a reliable source of long term credit and personalized counselling services." Farm Credit Corporation strongly believes in the farm community and the education of youth. The Farm Credit Corporation Bursary is their way of demonstrating their commitment to the betterment of the young people in the community.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Applicants must be Canadian citizens who are Agricultural Economics or Agricultural Business majors. Selection criteria include academic performance, interest and competence in farm management and in the subjects associated with the economics of the farm business, interest and involvement in college and home community as demonstrated by participation in organizations and affairs, farm experience, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Farm Focus Scholarship
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.
Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.
Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Chuck Harrison Memorial Scholarship
The Chuck Harrison Memorial Scholarship was created in memory of Chuck Harrison who attended the Agricultural Campus and graduated in 1970.
Eligibility: Available to students entering their final year of the Diploma in Business Management program. Selection criteria include leadership, involvement in athletic and other activities, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer's husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer's heart and having a scholarship created in her name, is something very special to her. Due to the couple's success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Bill Jenkins Memorial Scholarship
Bills career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premieres' Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.
Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Landscape Nova Scotia Award
Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.
Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougal was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarshipsfor application deadline
Value: $250

Danny MacEwen Memorial Scholarship
Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn't always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved with the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.
Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Angus and Tena MacLellan Memorial Scholarship
The Angus and Tena MacLellan Memorial Scholarship was established by both Tena and Angus' estate. Angus and Tena were avid farmers in Cloverville, Antigonish County.
Eligibility: Available to students entering third or fourth year of an undergraduate degree program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Edith Main Memorial Bursary
The NSVMA has created the Edith Main Memorial Bursary in her memory. Incorporated under the Veterinary Medical Act of the Province of Nova Scotia, the Nova Scotia Veterinary Medical Association (NSVMA) holds the responsibility to regulate the practice of veterinary medicine and to govern its members in accordance with this Act, regulations and the by-laws in order that the public interest may be served and protected.
Eligibility: Awarded to a Nova Scotia student in the second year or higher of a diploma or degree at the Faculty of Agriculture who intends to pursue a career in veterinary medicine.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joseph E. Mapplebeck Memorial Bursaries
In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.
Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need. One of the two awards will be made available annually to a student in the Plant Science Technician program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.
Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application

The H.A.L. McLaughlin Memorial Scholarship was established in memory of H.A.L. McLaughlin who taught horticultural at the Agricultural Campus from 1953 to 1971.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $100

Clint McLean Memorial Scholarship
The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.
Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Application Type: Automatic Consideration – No Application Required

Donald Palfrey Award
The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.
Application Type: Faculty of Agriculture In-Course Award Application

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

J. Arnold Roberts Memorial Scholarship
The J. Arnold Roberts Memorial Scholarship was created by Elsie Roberts in memory of her husband, Arnold Roberts. Establishing a scholarship in memory of a loved one is a wonderful way to ensure their legacy and memory lives on, and this is what Elsie wished for her late husband.
Eligibility: Available to current students in any year of an undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces. Awarded to an outstanding student who is not receiving a scholarship of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Howard W. Roper Memorial Award

The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey's until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey's. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $500

Ted Rose Memorial Scholarship

The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $500

Rotary Club of Truro International Student Bursary

The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.

Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.

Value: $1,000

Rick Russell Memorial Scholarship

Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsman for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his unselfish devotion to the college community by the AC Student population by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.

Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Jack Sibley Agriculture Bursary

This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.

Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill's dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Syngenta Canada Inc. Awards
Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic '86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.
Application Type: Faculty of Agriculture In-Course Award Application

Florence (Pineo) Ward Memorial Award
The Florence (Pineo) Ward Memorial Award was established by James Pineo in memory of his late sister, Florence. James wanted to leave a legacy behind for his sister, and help support the academic efforts of agricultural students, such as his niece Lisa (Orlando) Gowan, a BSc(Agr) Agricultural Chemistry graduate.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture. Preference will be given to students from Boutilier's Point, Halifax County, and Advocate, Cumberland County. Awarded to students in financial need. Preference will be given to students with sound academic background who have come to the Faculty of Agriculture for technical training to enhance their employability but financial constraints are limiting their ability to continue their studies.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture's Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams' family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadlines
Value: $500

Engineering

Dr. Stewart R. Keddy Memorial Scholarship
Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.
Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need. Preference will be given to a student who attended high school in the Annapolis Valley.
Application Type: Faculty of Agriculture In-Course Award Application

CMM & PHP Natural Resource Bursary
The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.
Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Friends of Alex Taylor Memorial Award
To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.
Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Valacta Dairy Scholarship
Valacta, the dairy production centre of expertise for Quebec and Atlantic Canada, offers the Valacta Dairy Scholarship which recognizes and supports students with a demonstrated interest in the dairy industry.
Eligibility: Available to one student enrolled in an undergraduate or diploma program at the Faculty of Agriculture that demonstrates a genuine interest in the dairy industry by program, course, or project work.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

PY Hamilton Scholarship
Peter Y. Hamilton, Class of 1944 and Professor Emeritus, attended the former Nova Scotia Agricultural College, and later returned as Registrar in 1973. This scholarship has been established in his memory to reward scholarly excellence.
Eligibility: Available to Canadian citizens enrolled in any program in the Faculty of Agriculture on a full-time basis in their second year of study or later who have achieved an average of 80% in the previous year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Faculty of Agriculture Alumni Family Scholarships
In celebration of the fact that many students at the Faculty of Agriculture are family members of AC Alumni, the Alumni Association decided to establish a Family Bursary for the first time in 2008. There are several bursaries available for family members of Alumni attending the Faculty of Agriculture.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

The Faculty of Agriculture has established a fund which will provide bursaries to assist students in need of financial assistance. Students in need of financial assistance can apply for a bursary on an ongoing basis throughout the academic year.
Eligibility: Available to current students at the Faculty of Agriculture who have demonstrated financial need and have satisfactory academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Animal Nutrition Association of Canada (Atlantic Division) Scholarship
The Animal Nutrition Association of Canada (Atlantic) Scholarship was established in 1989 for a student who successfully completes their second year of B.Sc. (Agr.) program. The Animal Nutrition Association of Canada (ANAC) is the national trade association of the livestock and poultry feed industry. The 170 members include feed and ingredient manufacturers and distributors, as well as suppliers of a wide range of goods and services to the feed industry. Taken together, ANAC's membership represents 90 percent of commercial feed manufactured in Canada.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program who have demonstrated leadership in student and community affairs, strong academic performance, and who are not receiving other scholarships of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ralph H. Armstrong Memorial Award
Established in memory of Ralph Armstrong of North Kingston, Kings Co., Nova Scotia. Ralph was well known for his breeding of dual-purpose Shorthorns and marketing of livestock. His prize Shorthorns had been exhibited under the Brookmont Farms name for more than 30 years at Exhibitions throughout Nova Scotia, the Royal Winter Fair in Toronto, and in the 1980 World Shorthorn congress in Calgary. Mr. Armstrong was an honoured member, Secretary and Past President of the Nova Scotia Shorthorn Association, Vice President of the Annapolis County Exhibition, Past Director of the Atlantic Winter Fair and Past Director of the Maritime Shorthorn Association.
Eligibility: Available to former or current 4-H club members from Kings or Annapolis Counties in Nova Scotia who have completed their first year of study in any undergraduate program at the Faculty of Agriculture. Selection is based on financial need and involvement in school, athletic and/or community organizations.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $400

Atlantic Farm Mechanization Show Scholarship
The Atlantic Farm Mechanization Show is an event that is held bi-annually that mainly focuses on the newest, innovative ideas in the agricultural industry. Farming has changed dramatically over the last few decades. New farming ventures are becoming increasingly popular, from large tract farms that are operated by multi-nationals, to small individual bed plots. According to The Atlantic Farm Mechanization Show, "innovation has always been the most powerful tool in a farmer's tool box and will continue to be so into the future."
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) in Integrated Environmental Management program at the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Atlantic Fertilizer Council Award
Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $500

Atlantic Land Improvement Contractors Association Award
The Atlantic Land Improvement Contractors Association Bursary was created by ALICA for engineering students with a keen interest in soil, water and land improvement. ALICA acknowledges that the cost of tuition is becoming increasingly high which makes it difficult for many students to attend University. The Board of Directors voted to begin a scholarship fund in 1990 and the scholarship has been active and helping students with their post-secondary education ever since.
Eligibility: Available to students in the Diploma of Engineering program in the Faculty of Agriculture with a demonstrated ability and interest in soil, water, and land improvement.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

Atlantic Poultry Incorporated Scholarship
The Atlantic Poultry Incorporated Scholarship was created in 2012. API (formerly ACA Co-operative Limited) has had many changes over the years. Most recently becoming incorporated in March 2012 and then in 2013 growing the company with the purchase of Clarks Chick Hatchery in New Brunswick and Island Chick Hatchery in Newfoundland.
Eligibility: Awarded to a student enrolled in the BSc(Agr) degree, with preference to a student pursuing an Animal Science major. The recipient will have graduated from a high school in Atlantic Canada, and demonstrate strong academic performance and a career interest in poultry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Atlantic Poultry Conference Award
The Atlantic Poultry Conference is the key meeting place for producers and service providers to gather and discuss and share their news, the Conference is held once per year. Speakers who attend the Conference address a number of topics that cover: ventilation, energy, health, reducing feed costs, transportation, eggs, chickens and turkeys.
Eligibility: Awarded to a student whose course and project work reflect an interest in poultry. Preference will be given to final year students in the BSc(Agr) program who have either completed or have plans to complete a poultry-related research project in RESM 4002 and RESM 4003. This scholarship is awarded in odd years.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

Paul Babineau Memorial Scholarship
The Paul Babineau Memorial Scholarship was established by the Atlantic Farm Mechanization Show in memory of Paul, a former Director of the Atlantic Farm Mechanization Show. Paul was the owner and operator of Babineau Equipment Ltd, he was a 4-Wheeler enthusiast, and a director with the Atlantic Farm Mechanization Show.
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) Integrated Environmental Managament programs in the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dr. Roger S. Bacon Scholarship in Agriculture
Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture.
Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

David W. Brown Memorial Scholarship
The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.
Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Edward Brown Memorial Undergraduate Bursary
The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.
Eligibility: Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Merle Cail Memorial Scholarship
The Merle Cail Memorial Scholarship Fund was created by Merle's wife, Faye Cail in memory of Merle's dedication to organic agriculture. Born in Rexton, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstien Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.
Eligibility: Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Vera Caldwell Memorial Bursary
Vera Caldwell was born on June 3rd, 1924 in Hants County. She was a very devoted and involved member of the Newport United Church, serving as a Steward, Sunday School Teacher, and as a Youth Group Leader. Vera taught school for more than 25 years, first beginning in a one-room schoolhouse and ending her career at Brooklyn District Elementary School in 1989. As shown by her achievements, Vera was dedicated to the educational system and being a life-long learner. She was passionate about international education and actively supported education for children from developing nations. Due to her sincere involvement and passion in the educational system, a bursary has been created in her memory.
Eligibility: Awarded based on financial need to full-time technical or undergraduate international students at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Canard Conservation Undergraduate Scholarship
Dr. Charles Albert Eaves was born February 21st, 1908 in Liverpool England. Charles immigrated to Canada in March 1926 and in 1932 received his B.Sc. from McGill. In 1933 he attended Cambridge University on an I.O.D.E overseas scholarship before returning to McGill to receive his MSc. degree in 1937. On October 25, 2000, he received an Honorary Doctorate from Dalhousie University and the former Nova Scotia Agricultural College, now Dalhousie Faculty of Agriculture. The Canard Conservation Scholarships were established by Dr. & Mrs. Eaves to provide a graduate and undergraduate scholarship each year for students of Kings County focusing on environmental studies related to agricultural practices with particular reference to dyke land preservation and the general conservation of soil and water reserves.
Eligibility: Awarded to a student who is a permanent resident of Kings County, Nova Scotia, in the first or second year of the Bachelor of Science (Agriculture) program who is planning course and/or project work related to the environment. Selection criteria include academic performance, demonstrated interest in the environment, and career plans.
Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Gerard Chiasson Memorial Award
Gerard Chiasson was born in 1931 in Margaree Forks, Inverness County, Nova Scotia. Gerard was very involved in outdoors activities, he was a farmer, fisherman and lumberman. He was also very involved in his community, he was a past president of the N.S. Woodlot Owners Association and The N.S. Federation of Agriculture, Inverness County Federation of Agriculture, Margaree Credit Union, Margaree Gasperaux Fisherman Association, and Eastern Dairy Foods Co-op. He was former chief of the Margaree Volunteer Fire Department, former chairman of the Margaree River and Community Protection Community, former member of the board of N.S. Volunteer Planning and was also the president of the N.S. Landowners and Forest Fibre Productions Association. As a result of Gerard Chiasson's sincere commitment and his lifetime of contributions to the Nova Scotia Federation of Agriculture and community organizations, a scholarship has been created in his memory.
Eligibility: Available to upper-year students in any undergraduate program in the Faculty of Agriculture who are residents of Cape Breton (with preference given to those from Inverness County). Selection criteria include financial need, involvement in community activities, and leadership.

Chisholm Family Bursary
The Chisholm Family Bursary was established in memory of Mr. John Archie Chisholm, for students who share his interest in organic farming.
Eligibility: Must be enrolled in any diploma or undergraduate degree program at the Faculty of Agriculture. Preference is given to applicants who have completed or are currently enrolled in at least one organic agriculture course at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Donald E. Clark Memorial Scholarship
Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark's sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.
Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include academic performance, interest, and aptitude in the engineering field.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check moneymatters.dal.ca for application deadline
Value: $500

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club's activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

CA Douglas Bursary
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

Paul C Eaton Memorial Scholarship
Paul C. Eaton was an alumnus, Class of '48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.
Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $2,500

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Farm Focus Scholarship
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.
Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.
Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.

Value: $1,250

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Langille Brothers Scholarship
Alan Langille graduated from the Nova Scotia Agricultural College in 1958 and went on to have a career as a plant physiologist and professor at the University of Maine. Alan makes this scholarship possible in memory of his two older brothers, both also NSAC Alumni. Bruce Langille (grad 1946) went on to work as a chemist for the Plant Products Lab in Ottawa. Jim Langille (grad 1947) went on to a career as an Agronomist for Nappan Experimental Farm.
Eligibility: Awarded to a third year BSc(Agr) student majoring in Plant Sciences. Preference will be given to students who have completed their first three years of study at the Faculty of Agriculture. Awarded based on academic excellence and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougal was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarshipsfor application deadline
Value: $250

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Edith Main Memorial Bursary
The NSVMA has created the Edith Main Memorial Bursary in her memory. Incorporated under the Veterinary Medical Act of the Province of Nova Scotia, the Nova Scotia Veterinary Medical Association (NSVMA) holds the responsibility to regulate the practice of veterinary medicine and to govern its members in accordance with this Act, regulations and the by-laws in order that the public interest may be served and protected.
Eligibility: Awarded to a Nova Scotia student in the second year or higher of a diploma or degree at the Faculty of Agriculture who intends to pursue a career in veterinary medicine.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.
Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Clint McLean Memorial Scholarship
The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.
Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

T. Beverly Milligan Gale Memorial Scholarship
The T. Beverley Milligan Gale Memorial Bursary was established in 2010 by Bev's husband, Bob, in recognition of her spirit and love of the gardens at the Faculty of Agriculture.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to mature students. Selection criteria include career plans, academic performance and financial need, with preference to a student interested in landscape design and care.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

Nova Scotia Animal Breeders Co-operative Limited Awards
The Nova Scotia Animal Breeders (NSAB) Co-op Limited specializes in an array of different cow options for their consumers. They offer products and supplies for cow farmers, and a multitude of service options. Some of the services offered are: artificial insemination, computer assisted herd mating, young sire program (Holstein), direct sales-owner breeders, and A.I. Sires.
Eligibility: Available to current students in the 2nd year of the BSc (Agriculture) with a major or minor in Animal Science or the 2nd year of a diploma with specialty in Dairy Farming or Agriculture. Recipients must have attended high school in Nova Scotia and demonstrate an interest in the dairy or beef industry through their farm backgrounds, course, and/or project work.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,250

Nova Scotia Federation of Agriculture Scholarship
Since 1895, the Nova Scotia Federation of Agriculture has represented the interests of Nova Scotia's agricultural community. Today its members account for well over 90% of all agricultural production in Nova Scotia. With an organizational structure that includes representation from 13 county and regional federations and 27 recognized agricultural commodity groups, the Federation brings together over 2,400 individual farm businesses representing all aspects of primary agriculture in the province.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia with farm or 4-H backgrounds. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: 2 @ $500

Nova Scotia Federation of Agriculture 100th Anniversary Scholarship
In recognition of the 100th Anniversary of the Nova Scotia Federation of Agriculture in 1995.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture who are permanent residents of Nova Scotia with a farm background, financial need, and good academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Nova Scotia Institute of Agrologists Scholarships
Founded in 1953, the Nova Scotia Institute of Agrologists is the provincial organization authorized under the Agrologists Act to govern the professional conduct of its members, in support of the public interest. Persons who hold themselves out to be a professional agrologist must be registered with NSIA under the Act.
Eligibility: One will be awarded to a student entering their third year of the BSc(Agr) program and the second, recognizing the current anniversary of NSIA, to a student entering their second, third or fourth year of the BSc(Agr) program. Students must be from Nova Scotia and will be selected based on academic performance, participation in school and community activities, degree of interest in agrology, career plans in the Agri-food industry, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Value: 2 @ $1,000

Donald Palfrey Award
The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Robert Parent Memorial Scholarship
The Robert Parent Memorial Scholarship was created in memory of Robert Parent who attended the Agricultural Campus and graduated in 1921. His wife, Laura E. Daisy Parent, left in their estate, wishes to establish a scholarship in his memory.
Eligibility: Available to an outstanding current student in any undergraduate program in the Faculty of Agriculture who has not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

Porter Brothers Dairy Award
This fund is created to honour the memories of Arthur & Donald Porter of Fort Belcher to provide financial assistance to students pursuing an education in the field of dairy science and production.
Eligibility: Must be registered in an undergraduate or technical program at the Faculty of Agriculture, entering their second, third, or fourth year of study, studying in any discipline that could have a positive impact on the dairy industry, and have demonstrated financial need. Preference is given to students from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team (“The Bearcats”) by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary’s University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson’s (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

J. Arnold Roberts Memorial Scholarship
The J. Arnold Roberts Memorial Scholarship was created by Elsie Roberts in memory of her husband, Arnold Roberts. Establishing a scholarship in memory of a loved one is a wonderful way to ensure their legacy and memory lives on, and this is what Elsie wished for her late husband.
Eligibility: Available to current students in any year of an undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces. Awarded to an outstanding student who is not receiving a scholarship of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Rick Russell Memorial Scholarship
Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsman for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his unselfish devotion to the college community by the AC Student population by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.
Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Jack Sibley Agriculture Bursary
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

Syngenta Canada Inc. Awards
Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic '86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.
Application Type: Faculty of Agriculture In-Course Award Application

Eligibility: Must be first year student registered at the Faculty of Agriculture and be from Truro, Nova Scotia.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams' family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.

Value: $2,000

Doug Bailey Memorial Bursary
Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manger of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.
Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.
Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Farm Focus Scholarship
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.
Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.
Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.
Application Type: Automatic Consideration – No Application Required

Governor General's Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

Kevin Grant Memorial Scholarships
In memory of Kevin Grant, Class of 1975 (Animal Science Technician diploma).
Eligibility: Available to students entering their final year in any two-year diploma program at the Faculty of Agriculture, with preference given to students enrolled on a full-time basis. Selection criteria include academic performance, leadership and contribution to campus life, career plans, and financial need.

Green Diamond Equipment/John Deere Atlantic Agriculture Award
Green Diamond Equipment Ltd. became one of the largest privately held John Deere dealer organizations in Eastern Canada on November 1, 2008, with the consolidation of Planters Equipment Limited (NS) and PEI Farm Equipment (PEI).
Eligibility: Available to a technical or undergraduate student at the second year level or above who is a Canadian citizen from Atlantic Canada studying in the Faculty of Agriculture. The recipient will have a farming or agricultural background, demonstrate financial need, and have a life goal of working in agriculture in Atlantic Canada. A career in agriculture includes all areas from traditional farming, to engineering, to horticulture, to landscaping, and whether working in agri-business or with government.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,250

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer's husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer's heart and having a scholarship created in her name, is something very special to her. Due to the couple's success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Landscape Nova Scotia Award
Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.
Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougal was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarshipsfor application deadline
Value: $250

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Angus and Tena MacLellan Memorial Scholarship
The Angus and Tena MacLellan Memorial Scholarship was established by both Tena and Angus' estate. Angus and Tena were avid farmers in Cloverville, Antigonish County.
Eligibility: Available to students entering third or fourth year of an undergraduate degree program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Edith Main Memorial Bursary
The NSVMA has created the Edith Main Memorial Bursary in her memory. Incorporated under the Veterinary Medical Act of the Province of Nova Scotia, the Nova Scotia Veterinary Medical Association (NSVMA) holds the responsibility to regulate the practice of veterinary medicine and to govern its members in accordance with this Act, regulations and the by-laws in order that the public interest may be served and protected.
Eligibility: Awarded to a Nova Scotia student in the second year or higher of a diploma or degree at the Faculty of Agriculture who intends to pursue a career in veterinary medicine.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joseph E. Mapplebeck Memorial Bursaries
In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.
Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need. One of the two awards will be made available annually to a student in the Plant Science Technician program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.
Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Karen Meek Memorial Scholarship
Karen was born March 28, 1962 and grew up on the family farm in Canning, Nova Scotia. She attended local schools and graduated from Cornwallis District High School in 1980. Karen was an avid participant in school sports, 4H, horseback riding, ringette, her motorbike, and living life to its fullest. Following in her father's footsteps (Eric Meek – class of 1954) she attended and graduated from former NSAC in 1982 with a Diploma in Ag Business, Karen participated in many campus activities but the Woodsmen Team was always her favorite. She developed many close friendships in her years in Truro. The Karen Meek Memorial Scholarship was established so that Karen's memory could live on.
Eligibility: Available to current students in the Bachelor of Science (Agriculture) Environmental Sciences program. Selection criteria include academic performance, financial need and contribution to campus life. This scholarship is not available to students receiving other awards over $1,000.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

John Miller Memorial Award
Since 1983 John Miller assisted the hog industry by coordinating and providing programs that greatly improved the industry as secretary/manager of Pork Nova Scotia. John spent countless hours educating producers and others of the cost efficient and productive way to raise and market hogs. He often spoke at the Faculty of Agriculture to students in the hog production course on the strengths of the industry. To show appreciation of this dedication, the producers and friends of Pork, NS provide an award in memory of John.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Awarded to a student whose course and project work and career plans reflect an interest in the hog industry or whose application shows interest, understanding, and appreciation for Nova Scotia's hog industry.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Nova Scotia 4-H Council Award
4-H is a youth development organization which promotes leadership, encourages the care and responsibility of resources, and builds positive life skills to secure a sustainable future for Nova Scotia. The 4-H Council has been active for over 100 years in Canada. It is comprised of 2,400 members, 900 leaders and 100 clubs in Nova Scotia. More than 80 countries worldwide have 4-H clubs. The purpose of the 4-H program is to prepare young girls and boys for their future as adult citizens. 4-H stands for head, heart, hands, and health and the motto is to "learn to do by doing."
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include academic performance, financial need and participation in 4--H club activities.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

Nova Scotia Animal Breeders Co-operative Limited Awards
The Nova Scotia Animal Breeders (NSAB) Co-op Limited specializes in an array of different cow options for their consumers. They offer products and supplies for cow farmers, and a multitude of service options. Some of the services offered are: artificial insemination, computer assisted herd mating, young sire program (Holstein), direct sales-owner breeders, and A.I. Sires.
Eligibility: Available to current students in the 2nd year of the BSc (Agriculture) with a major or minor in Animal Science or the 2nd year of a diploma with specialty in Dairy Farming or Agriculture. Recipients must have attended high school in Nova Scotia and demonstrate an interest in the dairy or beef industry through their farm backgrounds, course, and/or project work.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,250

Nova Scotia Federation of Agriculture Scholarship
Since 1895, the Nova Scotia Federation of Agriculture has represented the interests of Nova Scotia's agricultural community. Today its members account for well over 90% of all agricultural production in Nova Scotia. With an organizational structure that includes representation from 13 county and regional federations and 27 recognized agricultural commodity groups, the Federation brings together over 2,400 individual farm businesses representing all aspects of primary agriculture in the province.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia with farm or 4-H backgrounds. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: 2 @ $500

Nova Scotia Federation of Agriculture 100th Anniversary Scholarship
In recognition of the 100th Anniversary of the Nova Scotia Federation of Agriculture in 1995.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture who are permanent residents of Nova Scotia with a farm background, financial need, and good academic performance.
Application Type: Faculty of Agriculture In-Course Award Application

Eligibility: Presented to the top all-round student graduating from the Veterinary Technology program who has particularly excelled in the area of parasitology.
Application Type: Automatic Consideration – No Application Required

Donald Palfrey Award
The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Robert Parent Memorial Scholarship
The Robert Parent Memorial Scholarship was created in memory of Robert Parent who attended the Agricultural Campus and graduated in 1921. His wife, Laura E. Daisy Parent, left in their estate, wishes to establish a scholarship in his memory.
Eligibility: Available to an outstanding current student in any undergraduate program in the Faculty of Agriculture who has not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

Passionate Plants Person Award
In 1976, with two passionate plants men – the late Don Craig and the late Captain Richard Steele – as founding members, they began as RSCAR, the Rhododendron Society of Canada Atlantic Region. They were one of three regions, the other two being Niagara and Toronto. When Niagara and Toronto decided to join the American Rhododendron Society in the 1980s and RSC ceased being its own organization, the three regions – Atlantic, Niagara, and Toronto – became the 3 chapters in District 12 of the ARS. In 2003, they formed the Atlantic Rhododendron & Horticulture Society, to reflect the diversity of plant interests among local gardeners and plants people, while maintaining a central interest in rhododendrons and other ericaceous plants. They are a non-profit society registered in Nova Scotia.
Eligibility: Available to students entering second year of the Environmental Horticulture diploma program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Preference is given to students whose passion for plants is infectious and will most impact the way we regard and understand plants in both public and private environments. The student should also demonstrate leadership abilities and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750 and 1-yr membership with ARHS

Pork Nova Scotia Scholarship
Pork Nova Scotia is the marketing agent for hogs in Nova Scotia. Their mandate is to create the most favorable environment possible for the production and marketing of pork in Nova Scotia to assist in maximizing returns for Nova Scotia producers. PNS has an active and organized structure that has become the recognized voice of the Pork Industry in Nova Scotia. It is organized into 3 geographical zones, representing pork producers who account for 100% of Nova Scotia's pork production.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Awarded to a student with an interest and/or background in swine production. Selection criteria include demonstrated interest in the swine industry (through course or project work), academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $350

Porter Brothers Dairy Award
This fund is created to honour the memories of Arthur & Donald Porter of Fort Belcher to provide financial assistance to students pursuing an education in the field of dairy science and production.
Eligibility: Must be registered in an undergraduate or technical program at the Faculty of Agriculture, entering their second, third, or fourth year of study, studying in any discipline that could have a positive impact on the dairy industry, and have demonstrated financial need. Preference is given to students from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application

Prince Edward Island Institute of Agrologists Scholarship
The P.E.I.I.A is made up of agricultural professionals who are at the leading edge of the agri-food industry. Institute members are researchers, educators, extension specialists, primary producers and administrators of agricultural programs and policies.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Prince Edward Island. Selection criteria include academic performance, school and community involvement, financial need, and a career goal of becoming an agrologist.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

J. Arnold Roberts Memorial Scholarship
The J. Arnold Roberts Memorial Scholarship was created by Elsie Roberts in memory of her husband, Arnold Roberts. Establishing a scholarship in memory of a loved one is a wonderful way to ensure their legacy and memory lives on, and this is what Elsie wished for her late husband.
Eligibility: Available to current students in any year of an undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces. Awarded to an outstanding student who is not receiving a scholarship of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Rick Russell Memorial Scholarship
Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsman for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his unselfish devotion to the college community by the AC Student population by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.
Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Jack Sibley Agriculture Bursary
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill's dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Syngenta Canada Inc. Awards
Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic '86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

Value: $1,000

Raymond Webber Memorial Scholarship
Ray was born and raised in Halifax, Nova Scotia. Upon completion of High School, Ray took a business course and worked in an office for the next five years. This soon became boring so Ray entered the "Nova Scotia Agricultural College" (now known as the Faculty of Agriculture) in Truro in 1928. After completing his studies at Truro, he attended MacDonald University in Montreal where in 1931 he received a Bachelor of Science Degree in Agriculture. After graduation, Ray went to work for Canada Agriculture in the Plant Protection Branch in Halifax in an administrative capacity. Due to Ray's sincere dedication and commitment to Landscape Atlantic, a memorial scholarship has been established in his name to ensure his legacy lives on long into the future.
Eligibility: Available to students entering second year of the Diploma in Technology (Managed Landscapes) program at the Faculty of Agriculture. Selection criteria include academic performance and practical skills.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture's Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams' family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General’s Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

Dr. Roger S. Bacon Scholarship in Agriculture
Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture.
Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Doug Bailey Memorial Bursary
Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manger of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

A. B. Banks Memorial Scholarship
This scholarship is given by friends and family in memory of A.B. Banks, a former Director of Livestock Services Branch, Nova Scotia Department of Agriculture and Marketing. Mr. Banks was highly dedicated to the agricultural industry throughout his 35 year career in Nova Scotia and elsewhere in Atlantic Canada. He was born and raised in the Annapolis Valley and graduated from the former Nova Scotia Agricultural College and the Ontario Agricultural College. His career included service with the Canada Department of Agriculture, the Newfoundland Department of Agriculture and Forestry and the Nova Scotia Department of Agriculture and Marketing. As one of the first agricultural representative in Nova Scotia, he served the counties of Colchester, Halifax, and Cumberland. He was a strong advocate of improved farm management skills and believed this to be an important key to improving agricultural production.
Eligibility: Awarded to the second year BSc(Agr) Animal Science student with the highest average from the first year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

David W. Brown Memorial Scholarship
The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.
Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Colonel Charles Coll Memorial Scholarship
The Colonel Charles Coll Memorial was established in memory of Col. Charles Coll Sr. He was the inventor, owner and president of Muskol Enterprises Limited. He manufactured and sold Muskol insect repellent first from his basement in his Truro, Nova Scotia home and later from his manufacturing plant in Hilden, just outside of Truro. In 1957 Charles concocted a perfume to apply to clothing while deer hunting and later registered a company. The deer lure was used by regular deer hunters, bow hunters, wildlife photographers and naturalists. Charles named the ingredient "Muskol" which derives from musk, an ingredient in the lure and the phonetic last name Coll. Federal and Provincial Departments of Fisheries, Resources, Mines, as well as many sportsmen and outdoors people still continue to use the Muskol Insect Repellent.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) Animal Science program. Selection criteria include academic performance, involvement and interest in poultry, and achievement and contribution to 4-H.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Cooke Aquaculture Scholarship
Cooke Aquaculture Inc. created this award to support students studying Aquaculture at Dalhousie University. Cooke Aquaculture is a vertically integrated corporation headquartered in Black's Harbour, NB, with aquaculture operations in Atlantic Canada, the United States, Chile, Spain, and Scotland.
Eligibility: Students in 2nd, 3rd, or 4th year of the Bachelor of Science (Aquaculture) program who demonstrate high academic achievement and leadership in a volunteer, community, sports, or work activity.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $2000
Year of Study: 2, 3, 4

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Renée Covill Scholarships
The Renée Covill Scholarship was established by Dennis Covill and Renée Covill in their estate. Dennis and Renee Covill, immigrated to Canada from England in 1955. Building on his experience working on the development of Colossus, the world's first electronic computer, Dennis went on to establish Nautel Limited in Hacketts Cove, N.S. Under his leadership and expertise, Nautel created the world's first high-powered solid state radio beacon – a technology now used around the world. Nautel, a partner in UNB's wireless research program, designs and manufactures high power solid state radio transmitters for AM and FM radio stations, navigation radio beacons and other applications.
Eligibility: Available to current students from Atlantic Canada studying in the Bachelor of Science (Agriculture) Plant Science or the Bachelor of Technology (Environmental Landscape Horticulture) at the Faculty of Agriculture. Preference will be given to students who have course and project work that reflect a commitment to environmental issues and career interests in growing plants (including farming). Selection criteria are academic performance, financial need, and career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $3,000

Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.
Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dorothy Creelman Cox Memorial Scholarship
The Dorothy Creelman Cox Scholarship was created by Dorothy's husband, Kenneth Cox in memory of his wife. Dorothy Cox passed away on December 24th, 1992. She was a retired teacher and a secretary of University Club of Montreal. She was also an active member of the St. Andrews United Church and was mainly involved in choir and Sunday school.
Eligibility: Available to female students entering second year of the Bachelor of Science (Agriculture) Plant Science program. Selection criteria include academic performance and contribution to the university community.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.
Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club's activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Dr. Donald Young Plant Science Award
Created in memory of Dr. Donald Young, fund establishes an annual award for an undergraduate degree student studying Plant Science.
Eligibility: Upper year plant science
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships
Year of Study: 2, 3, 4

CA Douglas Bursary
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

Eastern Veterinary Technicians Association Bursary
The Eastern AHT Association represents AHTs and similar persons especially those working in the field of veterinary practice in the four Atlantic Provinces. Formed in 1989 it now numbers approximately 55 members including over 20 students enrolled in the AHT program at the Agricultural Campus. The EHTA Bursary is awarded annually to an AHT student entering the third year of the program based upon all-around performance, but with special reference to clinical ability.
Eligibility: Awarded to a student who best demonstrates proficiency in veterinary clinical skills during their first year and externship at the Atlantic Veterinary College as part of the Veterinary Technology program. Students must be in good academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Paul C Eaton Memorial Scholarship
Paul C. Eaton was an alumnus, Class of '48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.
Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $2,500

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton's lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club's mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa's Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Farm Focus Scholarship
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.
Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.
Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.
Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General’s Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.
Application Type: Automatic Consideration – No Application Required

Governor General's Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

Kevin Grant Memorial Scholarships
In memory of Kevin Grant, Class of 1975 (Animal Science Technician diploma).
Eligibility: Available to students entering their final year in any two-year diploma program at the Faculty of Agriculture, with preference given to students enrolled on a full-time basis. Selection criteria include academic performance, leadership and contribution to campus life, career plans, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Green Diamond Equipment/John Deere Atlantic Agriculture Award
Green Diamond Equipment Ltd. became one of the largest privately held John Deere dealer organizations in Eastern Canada on November 1, 2008, with the consolidation of Planters Equipment Limited (NS) and PEI Farm Equipment (PEI).
Eligibility: Available to a technical or undergraduate student at the second year level or above who is a Canadian citizen from Atlantic Canada studying in the Faculty of Agriculture. The recipient will have a farming or agricultural background, demonstrate financial need, and have a life goal of working in agriculture in Atlantic Canada. A career in agriculture includes all areas from traditional farming, to engineering, to horticulture, to landscaping, and whether working in agri-business or with government.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,250

Bonnie R. Haviland Memorial Bursary
The Bonnie R. Haviland Memorial Bursary was created by Barb Whiston in memory of her mother's aunt Bonnie, in order to honor her memory. This bursary will provide a legacy to Bonnie Haviland and provide support and encouragement to the selected student.
Eligibility: Awarded to a student entering the second year of the Veterinary Technology program whose performance in the first year has demonstrated a caring attitude and a commitment to others. Applicants will have demonstrated financial need. Recipients must not have received other bursaries of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer's husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer's heart and having a scholarship created in her name, is something very special to her. Due to the couple's success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada's first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins' dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy's Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ketchum Manufacturing Company Limited Prize
Zebulon Ketchum, an Ottawa, Canada based inventor and former professional lacrosse player turned his love of tinkering into a successful business. He owned a bicycle shop in downtown Ottawa and eventually grew and expanded that business into other products including becoming the first provider of the new "horseless carriage" in the nation's capital. However, it was his inventor's nature that led him to the genesis of the Ketchum business which was metal identification tags to be used in the livestock industry. The company has become the world's leading supplier of tags used to identify and trace the origins of wild caught and farmed seafood and they continue to be a metal stamping company as well and currently produce numerous metal products for various industries around the world. The business started on a rural farm outside of Ottawa and when it moved it found itself in the middle of the city. What started as a niche business serving the local agricultural community spread regionally, then nationally, and now competes in almost every market of the world.
Eligibility: The Ketchum Manufacturing Company Limited Prize is awarded to a graduate of the Animal Science option.
Application Type: Automatic Consideration – No Application Required

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard's wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to "repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here" (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Landscape Nova Scotia Award
Landscape Nova Scotia's mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than 20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.
Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougal was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarshipsfor application deadline
Value: $250

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Angus and Tena MacLellan Memorial Scholarship
The Angus and Tena MacLellan Memorial Scholarship was established by both Tena and Angus' estate. Angus and Tena were avid farmers in Cloverville, Antigonish County.
Eligibility: Available to students entering third or fourth year of an undergraduate degree program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers' Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Edith Main Memorial Bursary
The NSVMA has created the Edith Main Memorial Bursary in her memory. Incorporated under the Veterinary Medical Act of the Province of Nova Scotia, the Nova Scotia Veterinary Medical Association (NSVMA) holds the responsibility to regulate the practice of veterinary medicine and to govern its members in accordance with this Act, regulations and the by-laws in order that the public interest may be served and protected.
Eligibility: Awarded to a Nova Scotia student in the second year or higher of a diploma or degree at the Faculty of Agriculture who intends to pursue a career in veterinary medicine.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Joseph E. Mapplebeck Memorial Bursaries
In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.
Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need. One of the two awards will be made available annually to a student in the Plant Science Technician program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill's friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.
Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald's sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

H. A. L. McLaughlin Memorial Scholarship

Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $100

Clint McLean Memorial Scholarship
The Clint McLean Memorial Scholarship was established by Clint's loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.
Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General's Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Value: 2 @ $1,000

Nova Scotia Mink Breeders Association Award
Dr. Bruce Hunter passed away on October 19th, 2011 at the age of 61. He was a leading veterinarian in the fields of avian and furbearer disease, and an integral part of the Canadian mink industry, serving as director of research for the Canada Mink Breeders Association. He was a longtime champion of integrating animal, human and environmental health at OVC and around the world. He played a key role in setting up a Canadian Community Practice in EcoHealth (CoPEH) and a graduate-level course in ecosystem approaches to health involving U of Gm the University of British Columbia and Université du Québec à Montréal. Recently, he was co-leader of a poultry project in Ghana for Veterinarians Without Borders/Vétérinaires Sans Frontières-Canada. This year, he received the Aeroplan Volunteer of the Year Award from VWB/VSF in recognition of his work and commitment. The Nova Scotia Mink Breeders Association established this scholarship in memory of Dr. Bruce Hunter, a retired veterinarian from Ontario Veterinary College and recognized expert on naturally occurring diseases in mink. This scholarship will recognize students who have an interest in mink.
Eligibility: Available to current students in any Animal Science-related undergraduate program in the Faculty of Agriculture, with preference given to a student whose course/project work demonstrates an interest in the mink industry.

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team ("The Bearcats") by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary's University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson's (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer's organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the "Robert G. Rix Family Farm Bursary" in 1985. Although not having a farm background himself, he shared his beliefs that everyone's roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the "Dr. Robert G. Rix Scholarship" to allow support to a student where the need was greatest. After Robert's passing, one of the faculty provided funds to continue the bursary in Robert's name. Since then, Robert's family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Howard W. Roper Memorial Award
The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey's until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey's. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband's memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.

Jack Sibley Agriculture Bursary
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia's Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

G. G. Smeltzer Memorial Award
Gerald "Gerry" Gordon Smeltzer was a graduate of the former Nova Scotia Agricultural College and McGill University, his work in the livestock industry, apiculture, livestock crops, 4-H, and his community rapidly earned Gerry Smeltzer the admiration of all who came to be associated with him. As an Extension worker with the Nova Scotia Department of Agriculture and Marketing, he promoted improved livestock management techniques and was considered a driving force in the 4-H program. While an agrologist with Agriculture Canada, his work on new varieties of corn for silage and grasses, legumes, soybeans, fababeans, field peas, and small grains, laid the foundation for the livestock industry of Eastern Canada. In 1966, Mr. Smeltzer was named the Annapolis Valley Man of the Year in appreciation of his efforts. In 1987, he was awarded the Fred Rathje Memorial Award by the Canadian Beekeepers' Association.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program at. Applicants must be permanent residents of one of the Atlantic provinces and be Plant Science - Agronomy majors. Selection criteria include a genuine interest in the area of field crops reflected through course and project work and summer employment, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960's, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill's dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Syngenta Canada Inc. Awards
Syngenta is one of the world's leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta's mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic '86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce's contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce's death, he coordinated Atlantic '86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

University Medal in Animal Science
Awarded to the graduating Animal Science student with the highest standing.

University Silver Medal
This medal is awarded to the student who is judged to be the leading First Class Honours student among graduates of baccalaureate programs. The recipient cannot have received the Governor General's Silver Medal.
Application Type: Automatic Consideration – No Application Required

Marinus Van de Sande Scholarship
The Marinus Van de Sande Scholarship was created by the Nova Scotia Co-operative Council to honour their colleague Mariunus Van de Sande, who served on their board for more than 25 years.
Eligibility: Must be enrolled as a full-time student at the Faculty of Agriculture, in any program directly related to agriculture (this excludes students enrolled in Pre-Vetrinary, Bioveterinary Science, and Landscape Architecture programs). Student must have attended high school in Nova Scotia and demonstrate financial need. Preference is given to a student participating in local government or leadership activities.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Peter Van der Borch Memorial Bursary
Peter Van der Borch DVM established this bursary for an exceptional first year student from Truro, Nova Scotia.
Eligibility: Must be first year student registered at the Faculty of Agriculture and be from Truro, Nova Scotia.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Florence (Pineo) Ward Memorial Award
The Florence (Pineo) Ward Memorial Award was established by James Pineo in memory of his late sister, Florence. James wanted to leave a legacy behind for his sister, and help support the academic efforts of agricultural students, such as his niece Lisa (Orlando) Gowan, a BSc(Agr) Agricultural Chemistry graduate.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture. Preference will be given to students from Boutilier's Point, Halifax County, and Advocate, Cumberland County. Awarded to students in financial need. Preference will be given to students with sound academic background who have come to the Faculty of Agriculture for technical training to enhance their employability but financial constraints are limiting their ability to continue their studies.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture's Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Wild Blueberry Producers Association of Nova Scotia Scholarship
The Blueberry Producers Association of Nova Scotia is a grower organization with approximately 1000 members from around the province. The Association promotes the production and consumption of wild blueberries. It constantly strives to keep growers informed of the newest technology available for both growing and harvesting. As well, it helps provide the producers with an adequate return to management, labour and capital.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program with Plant Science majors. Preference given to someone with interest and experience in small fruit. Selection will be based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams' family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadlines
Value: $500

Faculty of Architecture and Planning

Introduction
This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

All Faculty of Architecture and Planning Awards

The Joyce Family Foundation Student Success Award
This bursary was created through the generosity of members of The Joyce Family Foundation. It is intended to provide financial support for students entering Dalhousie University with demonstrated financial need.
Eligibility: Available to undergraduate students at the Halifax Campus with preference to first year students who have graduated from a high school in Nova Scotia within the previous five years. The student will have demonstrated financial need and maintain good academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Nova Scotia Association of Architects - Dumaresq Family Bursary
Two bursaries are awarded in honour and recognition of the contributions made by four generations of architects within the Dumaresq family to the NSAA and the architectural community.

Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: First day of the winter term
Value: Two at $1000

Margaret Inglis Hagerman Undergraduate Bursary (Nursing)
The Margaret Inglis Hagerman Undergraduate Bursary is intended to provide financial assistance to students who are residents of Nova Scotia with demonstrated financial need.
Eligibility: Available to Nova Scotia residents enrolled in full-time studies at the Dalhousie School of Nursing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Advancement Bursary for Black Canadian or Aboriginal Students
This bursary was created through the generosity of members of the staff of the Office of Advancement. The bursary is intended to alleviate financial difficulties for Black Canadian and Aboriginal students.
Eligibility: Available to an undergraduate Black/African Canadian student or Aboriginal student. The student will have demonstrated financial need.
Application Type: Automatic Consideration – No Application Required
Application Deadline to Apply: November 15

Aliant Ambassador Scholarship
A one-year scholarship open to students registered in year four or five of an Architecture, Planning, Computer Science, or Engineering program. Selection is carried out by the Scholarship and Awards Committee of the Faculty of Engineering.
Eligibility: Available to students entering fourth or fifth year of the Bachelor of Community Design, Bachelor of Environmental Design Studies, Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs at Dalhousie University.
Application Type: Faculty of Engineering: Undergraduate In-Course Scholarship Application
Application Deadline to Apply: September 30

Aramark Leadership Award
This award provides scholarships for returning undergraduate students at Dalhousie registered in the Faculty of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Diploma of Dental Hygiene who show leadership in the community. Eligible students must have been full-time Dalhousie students during the previous academic year, be currently registered as a full-time undergraduate student, be in good academic standing, and demonstrate involvement and dedication to the Dalhousie community through leadership, citizenship and/or sportsmanship. Applications are available through DalOnline - Student Awards and Financial Aid section.
Eligibility: Available to current Dalhousie undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Aramark Leadership Award Application
Value: $4,000

Helen Archibald Memorial Bursary
To provide one or more bursaries for undergraduate students from Cape Breton, Nova Scotia, with preference given to students from Richmond County.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Margaret Archibald Memorial (Entrance) Bursary
The Family, Friends and Associates of Margaret Archibald established this award. Mrs. Margaret Archibald was a Dalhousie employee from December 1962 to May 1979. During this period of time, she worked for three Presidents. After her official retirement as Administrative Secretary to the President, Mrs. Archibald continued with the University working in the Public Relations Office until 1983. Margaret Archibald was a very loyal and dedicated employee with a keen interest in the Dalhousie community. The eligible candidate must be a woman who has fulfilled or expects to fulfill the minimum entrance requirements into third year of an undergraduate program in Architecture, Computer Science, or Engineering.
Eligibility: Available to students entering third year of the Bachelor of Community Design, Bachelor of Environmental Design Studies, Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs at Dalhousie University. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: Faculty of Engineering: Year 3 Entrance Scholarship Application
Application Deadline to Apply: April 30
Value: $500

Architecture and Planning Bursaries
Proceeds from the former TUNS Board of Governors Fund are used at the Dean's discretion. They provide up to five $1,000 bursaries to assist full-time students entering the winter term of the Bachelor of Environmental Design Studies or Master of Architecture program in the School of Architecture or the Bachelor of Community Design or Master of Planning program in the School of Planning.
Eligibility: Applicants must be making satisfactory academic progress and must demonstrate financial need by submitting a bursary application. Selections are made by the Scholarship Committees of the School of Architecture and the School of Planning.
Application Type: Contact the Department, School, or College for more information
Value: $1,000

The Eva and David Ashkins Memorial Bursary
The donors established this fund for the purpose of assisting pupils who have matriculated from selected high schools to enter Dalhousie. These high schools are (first) North Queen's Rural High School or Bridgewater High School, and (secondly) other high schools in the province of Nova Scotia. The recipient may be considered in subsequent years for further assistance.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Helen Mary and Earl Atkins Memorial Bursary
A trust from the estate of Helen Mary and Earl Atkins to provide bursaries for those who might other wise be unable to attend university.
Eligibility: Available to first and second year undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of rural Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

Bachelor of Environmental Design Studies Year 4 Portfolio Prize
A prize is awarded to the student who has produced the best design portfolio at the end of Year 4 in the BEDS program.
Application Type: Automatic Consideration – No Application Required

Bachelor of Environmental Design Studies Year 3 Portfolio Prize
A prize is awarded to the student who has produced the best design portfolio at the end of Year 3 in the BEDS program.
Application Type: Automatic Consideration – No Application Required

Marjorie Ball Scholarship
Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.
Eligibility: Available to entering and current undergraduate students.
Application Type: Automatic Consideration – No Application Required

The Avie Bennett Prize
This prize is one of six established by Mr. Avie Bennett, former Chairman and President of McClelland and Stewart to mark the company's 90th anniversary and the 40th anniversary of the New Canadian Library, of which the founding general editor was Dalhousie Professor Emeritus Dr. Malcolm M. Ross. It is awarded each year for the best essay on Canadian literature submitted from an undergraduate course at Dalhousie during the current academic year. Essays may have been written for courses in any department, but they should focus explicitly on a Canadian literary topic and not on history or culture more generally, and they must be written in English. Essays should be nominated by instructors; clean copies should be submitted by the specified date.
Eligibility: Available to any undergraduate student.
Application Type: Automatic Consideration – No Application Required

Harry and Kaye Bernstein Bursary
A bursary to an undergraduate student born and living in Halifax from a low income family, who shows financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Beta Sigma Phi Scholarship to Dalhousie University
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.
Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.
Application Type: See dal.ca/scholarships for more information
Application Deadline to Apply: July 31

Black and Gold Awards
Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.00 in three full year courses (18 credit hours) or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

The Jotham Blanchard Scholarship
The New Glasgow Literary and Historical Society in 1912 established this scholarship in memory of Jotham Blanchard. The scholarship will be awarded to a student of meritorious standing who is in the second year of an undergraduate program.
Eligibility: Available to a second year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

George Boyd Bursary
The income from the George Boyd Trust will provide a bursary to a student who demonstrates financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing, with preference given to applicants from the Sydney area, Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Jeff Bredin Memorial Scholarship in Men's Volleyball
This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.
Eligibility: Available to student athletes in any program (excluding the Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Ernest Brehaut Memorial Bursaries
This bursary is available to students if they maintain creditable academic standing and show genuine need.
Eligibility: These bursaries were established by the gift of Mrs. Ernest Brehaut of Colorado Springs, USA, in memory of her husband, a distinguished graduate of Dalhousie, Harvard and Columbia. Preference is to be given to relatives of the late Dr. Brehaut.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Lt. (E) Harry J. Brewer, MBE, CD, RCN (Ret.), Memorial Bursary
A memorial bursary fund has been established to provide financial assistance to a full-time student who is enrolled in a degree or diploma program.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Isabel Brown Scholarship
The scholarship was endowed in 1982 by the Brown family under the auspices of the Women's Division of the Dalhousie Alumni Association. The interest provides an annual scholarship ordinarily to a student who is entering the final undergraduate year.
Eligibility: Available to a final year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Robert Bruce Scholarships
The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Minnie F. Burbidge Scholarships
In her Will the late Minnie F. Burbidge bequeathed the residue of her Estate to Dalhousie University. In 1945 the sum of $16,000 was endowed to provide undergraduate, usually in-course, scholarships.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

George Burris Scholarship
The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Students must submit application a minimum of one month before departure.
Eligibility: Available to upper-year Dalhousie students participating in a study abroad or exchange program in England.
Application Type: Contact the International Centre for more information
Value: $5,000

George H. Campbell Memorial Scholarship
In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Howard C. Clarke International Study Award
An endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges.
Eligibility: Available to an undergraduate Dalhousie student participating in a study abroad or exchange program.
Application Type: Contact the International Centre for more information

The Rebecca Cohn Bursary Fund
A gift of $4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Community Design Service Prize
The prize is awarded to a graduating Community Design student who has made a significant contribution to community design beyond the School.
Application Type: Automatic Consideration – No Application Required

Community Design Achievement Award (second year)
This prize is awarded to the student with the highest cumulative average in the second year of the Community Design program.
Application Type: Automatic Consideration – No Application Required

Community Design Thesis Prize
This prize is given in recognition of excellent work in completing the thesis project for the Bachelor of Community Design.
Application Type: Automatic Consideration – No Application Required

Community Design Achievement Award (third year)
This prize is awarded to the student with the highest cumulative average in the third year of the Community Design program.
Application Type: Automatic Consideration – No Application Required

Dorothy Macdonald Crummey Memorial Bursary
This bursary was established by the family of the late Dorothy Macdonald Crummey (1912-2005) who was born in Little Harbour, Pictou County. She attended Halifax Ladies College (an affiliate of Dalhousie University) and graduated with a diploma in Household Science in 1932. Like many educated women of her generation, Dorothy did not work outside the home after marriage to Dr. Clarence Crummey (MD 1932). Nevertheless, she actively supported university students remembering her own efforts to fund her education during "The Great Depression". Bursaries will be available to students enrolled in any undergraduate degree program from Nova Scotia with a preference for students from Pictou County. Apply through the general online bursary program.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and preferably graduated from a high school in Pictou County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie Leadership Bursaries
A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information.
Application Type: Contact the Department, School, or College for more information

Dalhousie Memorial Bursary Fund
From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at courses, who can show a need for additional support.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie Student Union Student Accessibility Fund Award
The Dalhousie Student Union established this fund to support students with a disability.
Eligibility: Students must be in good academic standing and registered with the Advising and Access Services Centre or with their provincial government as having a disability. Students cannot also be in receipt of a Johnson Foundation Bursary.
Application Type: Contact awards@dal.ca for more information
Application Deadline to Apply: See dsu.ca/bursaries for application and deadline information

Dalhousie Student Union Student Accessibility Award
This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Applicants must apply by writing, taping or filming a personal statement on why they could benefit from this award. Interested students should contact the Vice-President, Internal, Dalhousie Student Union for additional details and application deadline.
Eligibility: Available to current students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: See dal.ca/scholarships for more information

Dalhousie Student Union Student Wise Health Plan Bursary
To provide financial aid to an undergraduate student or students who are covered by the DSU health care plan.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie University Undergraduate Bursaries
Students who are registered in six credit hours per term will be considered for bursaries.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15 (fall), February 15 (winter), June 15 (spring and summer)

Alfred George Darville Memorial Bursary
This fund provides one bursary to a qualifying Dalhousie student.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from Halifax West High School, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Frank R. Davis Memorial Scholarships
These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good.
Eligibility: Available to entering students from Bridgewater Jr./Sr. High School.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Design and Construction Institute of Engineering and Architecture Scholarship
The Design and Construction Institute (DCI) is a volunteer organization consisting of over 75 industry leaders whose common goal is to promote, foster and advocate for the design and construction industry in Nova Scotia. This fund was established to recognize and support engineering students who are enrolled in an undergraduate program and architecture students who are enrolled in a graduate programs.
Eligibility: Awarded annually to students who show an aptitude for, or are interested in, the design and construction industries in Nova Scotia. Recipients will be selected based on academic achievement and recommendations from professors. Engineering applicants will be in the third or fourth year and will submit a letter to DCI demonstrating their commitment to pursuing a career in the design and/or construction industry. The Architecture recipient will be in the first year of the Master of Architecture program and is not required to submit an application.
Application Type: Faculty of Engineering: Undergraduate In-Course Scholarship Application
Application Deadline to Apply: September 30 (Engineering); no application required for Architecture
Value: $500 to Engineering, $500 to Architecture

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The SLT Bruce Galloway Memorial Prize
Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship's Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Dr. Ruth M. Goldbloom Bursary
This fund was established in 1995 to honour Dr. Goldbloom CM, on the occasion of her installation as Chancellor of the Technical University of Nova Scotia.This bursary is awarded annually to a female student entering her third year of study in the Faculty of Architecture and Planning, Faculty of Computer Science or the Faculty of Engineering.
Eligibility: Available to female students entering third year of the Bachelor of Community Design, Bachelor of Environmental Design Studies, Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs at Dalhousie University. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: April 30

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

The Graham Family Athletic Awards
John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes. Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship, and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

MacCallum S. Grant Charitable Foundation Bursary
The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary. Students from the former City of Halifax, Dartmouth and the town of Bedford are not eligible to receive a bursary.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. To provide financial support for an undergraduate student.
Eligibility: Awarded to an undergraduate student who has graduated from a high school in/near Lunenburg County, NS. Preference is given to students who graduated from Bridgewater Jr/Sr High School or Park View Education Centre.
Application Type: Automatic Consideration – No Application Required

Mr. & Mrs. H. D. Howitt Scholarship
This scholarship was created to promote education and advancement of youth, to encourage achievement at the university level in both academic endeavors and in contributions to community life. The funds provide one or more annual scholarships to students enrolled full time in undergraduate degree programs. Awarded based upon academic excellence.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Kent C. Hurley Architecture Fund
Funds from the estate of Kent C. Hurley, a former professor at the School of Architecture, will be used periodically to support the School's academic mission. This may involve scholarships, outreach, teaching, and research.
Eligibility: Funds will be allocated by the School of Architecture. This may include scholarships for incoming or current undergraduate and graduate architecture students.
Application Type: Automatic Consideration – No Application Required

Barry and Margo Johns Family Bursary
This bursary, donated by Barry Johns (BArch 1972), provides financial assistance to a student entering the B5 term of the Bachelor of Environmental Design Studies program.
Eligibility: Available to B5 students in the BEDS program. Applicants must be making satisfactory academic progress and must demonstrate financial need by submitting a bursary application. The recipient is selected by the School of Architecture Scholarship Committee.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: First Monday of the winter term
Value: $1,000

Michael G. Johnston Memorial (Entrance) Bursary
This annual bursary has been established in the memory of Michael G. Johnston by the Board of Governors of the University. Michael G. Johnston was a valued member of the Dalhousie Board of Governors who expressed sincere interest in all who came into contact with him. Candidates must have fulfilled or expect to fulfill the minimal entrance requirements for an undergraduate program in Architecture and Planning, or for entrance into the third year of Computer Science and Engineering. The bursary is awarded on the basis of community involvement, scholastic ability, and financial need.
Eligibility: Available to students entering first year of the Bachelor of Community Design or Bachelor of Environmental Design Studies programs, and students entering third year of the Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs at Dalhousie University. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: Contact the Department, School, or College for more information
Value: $500

The E. John Jordan Scholarships
Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-course scholarships.
Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Nimmi and Teji Kanwal Bursary
Mr. Tejinder (Teji) and Mrs. Nirmal (Nimmi) Kanwal have cared and impacted numerous lives over the years. Although now retired, both were successful and beloved teachers for over 30 years. They grew up in India where their parents were strong believers in education and supported their schooling. Teji came to Canada in 1962 and Nimmi joined him in 1967. Travelling around the world twice, their love of adventure and travel continued throughout their lives. Both received Masters degrees from Dalhousie. They are supports of equal rights for all, which includes their support for equal opportunities for teachers in Nova Scotia. As Teji puts it "If you can't do something for someone, you are a no one."
Eligibility: Awarded to an undergraduate Dalhousie student who is in good academic standing and demonstrates financial need, with preference to a female student.
Application Type: General Entrance Award Application
Application Deadline to Apply: October 15

The Khaki University Scholarships
From the Khaki University of Canada and the Young Men's Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of $6,500 to endow scholarships.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

This endowment, established in memory of Isaac Walton Killam, provides entrance and in-course scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.
Eligibility: Available to entering and current undergraduate students who are US citizens (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Harry Kitz Fund
Interest from the fund, established in memory of the late Harry Kitz, is used to support one or more students in the Faculty of Architecture and Planning to undertake supervised planning, design, or construction activities on public property in the Halifax Regional Municipality. Proposals are evaluated on their imagination, practicality, and potential value to the community.
Eligibility: Available to undergraduate students in the Faculty of Architecture and Planning at Dalhousie University. See award description for specific eligibility requirements.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: May 31
Value: $1,000

Kostman Family Bursary
An endowment has been established in memory of Harry Kostman to provide one or more bursaries for undergraduate students of First Nations or African-Canadian descent who are graduates of TYP entering full-time studies. Harry Kostman had an enduring passion for education, and generously provided for his children and grandchildren while they attended university. Through this bursary, they strive to continue his legacy of support.
Eligibility: Available to full-time Black or First Nations undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and have completed the Transition Year Program at Dalhousie, with preference given to single parents.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Ann Lavers Howe Hall Bursary
The Ann Lavers How Hall Bursary was founded, by alumni and friends of Howe Hall, to provide financial assistance to a Dalhousie student who is a current Howe Hall resident. It is named in honour of Ann Lavers, staff member of Howe Hall from 1967-1994, who befriended many residents over her term of employment, in a variety of positions, at Howe Hall. The recipient must have made a positive contribution to the residence community at Howe Hall. Application information is posted within the residence each January.
Eligibility: Available to a Dalhousie student who is a current resident of Howe Hall, who is in good academic standing, and has demonstrated financial need.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Annie E. Longard Memorial Bursary
An endowment has been established to provide an annual bursary in memory of an accomplished alumna and long-time participant in the Women's Division of the Dalhousie Alumni Association.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

The W. Andrew MacKay Alumni Scholarship
The Dalhousie Alumni Association established an annual scholarship in honour of Dr. W. A. MacKay, a former president of the University. The scholarships are available to students who have demonstrated high academic standing (GPA of at least 3.30) and who have shown an excellence in qualities of leadership, citizenship and sportsmanship. Candidates are considered by nomination by their Department or School in the fall of each year.
Eligibility: Available to current undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: See dal.ca/scholarships for more information

MacKean Athletic Scholarship
The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Mackenzie Trust Scholarships
According to the Estate of Thomas George Mackenzie a Trust Fund was established for Archibald F. Mackenzie, and later bequeathed to Dalhousie University to provide in-course scholarships.
Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Rev. Kenneth Mackenzie Bursary
Mrs. Harriet Mackenzie Morrison of Stornoway, Scotland, daughter of the Rev. Kenneth Mackenzie of Pictou County, bequeathed $1,000 to the university in 1887 to be used as a bursary fund.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

MacRae Athletic Scholarship
The Dr. Donald M. MacRae Basketball Scholarships were established by the late Dr. Donald M. MacRae to recognize the important roles played by the captains of the Dalhousie men and women's Basketball teams. These awards recognize three generations of the MacRae family who played for the Tigers including Dr. MacRae.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

The Neil and Jessie Matheson Bursaries
Established under the will of Miss Margaret J. Matheson, Truro, the income from this fund provides several bursaries.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing, with preference given to students from the rural districts of Pictou County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Lloyd and Anne (McLane) Mattinson Bursary
This fund provides a bursary for a student with demonstrated financial need.
Eligibility: Candidates must be entering university directly from high school and have graduated from a high school in one of the following counties in Nova Scotia (in order of preference): Colchester County, Guysborough County, Cumberland County, Pictou County.
Application Type: General Entrance Award Application
Value: $1,000

Mazankowski Foundation Entrance Scholarship
This foundation has established a scholarship for a student who fulfills or is expected to fulfill the minimum entrance requirements for admission to the BEDS program in Architecture and Planning, or year three of the Bachelor of Computer Science or Engineering. The Scholarship is awarded on the basis of the applicant's academic record at the Associated University or Dalhousie University. The Committee may also weigh financial and other consideration in reaching a decision.
Eligibility: Available to students entering first year of the Bachelor of Environmental Design Studies program and students entering third year of the Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: April 30
Value: $1,100

Senator Donald Oliver Bursary for Black Atlantic Canadians
Hugh J. Maccagno and Senator Donald Oliver (LLB 1964) established this bursary in 2004 to assist Black Atlantic Canadians in pursuing post--secondary educational opportunities at Dalhousie University.
Eligibility: Available to full-time Black undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Salvatore Paradise Scholarship
Two scholarships are awarded: one to a full-time Year 4 Bachelor of Environmental Design Studies student; and one to a full-time Year 6 Master of Architecture student. They are based on the students' practicality of design, collaboration, improvement during the architecture program, and financial need.
Eligibility: Available to full-time students in the BEDS and MArch programs. Preference is given to students who are permanent residents of Atlantic Canada and who show potential for managing a private practice in architecture. Applicants must submit a School of Architecture bursary application.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: first day of the winter term
Value: $4,700

The Frederick Thomas Parker Award for Part-Time Studies
This award will provide an appropriate and flexible means of encouraging students intending to undertake degree or diploma studies at Dalhousie on a part-time basis. The selection committee will take into account both academic performance and financial need, depending upon circumstances. Applications are available at the College of Continuing Education.
Eligibility: Available to part-time undergraduate students.
Application Type: Contact the Department, School, or College for more information

President's Associates (Entrance) Scholarship
The President's Associates Entrance Scholarship has been made possible by members of the Associate's Program (1994-96). The members represent business, industry, friends, faculty, and university administrators. This award is made annually to a student in undergraduate Architecture and Planning, Computer Science or Engineering on the basis of the academic record. Candidates must have fulfilled or expect to fulfill the entrance requirements for an undergraduate degree program in Architecture or for entrance into third year of Engineering or Computer Science.
Eligibility: Available to students entering first year of the Bachelor of Environmental Design Studies program and students entering third year of the Bachelor of Computer Science, Bachelor of Informatics, or Bachelor of Engineering programs. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: April 30
Value: $1,000

The Warren Publicover Class 1925 Memorial Bursary
The Warren Publicover Class 1925 Memorial Fund was established in memory of Warren Publicover. The annual income from this fund is to be awarded in the form of a bursary for an individual who has successfully completed one year of university work at Dalhousie and is continuing as a full time student at this University. The bursary is to be awarded on the basis of satisfactory academic performance and demonstrated financial need, and is subject to renewal provided that the original requirements are maintained. It is a condition of the gift that applicants for this bursary need not have availed themselves of governmental funding as is usually required by the University.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Gordon S. Rankin Memorial Scholarship
Gordon Rankin, born in Halifax in 1933, graduated from Dalhousie in 1957 with a Bachelor of Commerce degree. He played both varsity football and basketball, holding the position of Captain for a period of time on both teams. As a continuing tribute to Gord, this scholarship was formed to assist athletes in financing their studies while attending Dalhousie University.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

The George B. Robertson Phi Delta Theta Fraternity Scholarship
An endowment has been established to provide a scholarship to a student at Dalhousie University. The selection of the awardee is based on several factors including a minimum Grade Point Average of 3.00, demonstrated activity in the Halifax Chapter, and financial need.
Eligibility: Available to students in third year or higher in any program (excluding the Faculty of Agriculture). Applicants must be attending university as full-time students.
Application Type: See dal.ca/scholarships for more information

The Lois J. Robertson Scholarships
The University received a generous bequest from the Estate of the late Lois Robertson.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Mr. and Mrs. Morris Saffron Bursary
Established to provide financial assistance to students who are residents of the town of Springhill, Cumberland County.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Springhill, Cumberland County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dr. Carolyn Savoy Award of Excellence
In March of 2009, Dr. Carolyn Savoy announced her retirement from coaching, after a 32-year career of outstanding service to Dalhousie University and its women's basketball program. Carolyn continues to work as an Associate Professor in the School of Health and Human Performance at Dalhousie. Dr. Savoy came to Dalhousie in 1977 as head coach of the women's basketball team, following seven years in the same capacity at St. FX. In over three decades of coaching, Coach Savoy posted very impressive results, including an 858-292 CIS win-loss record for a 74.5 winning percentage. A four-time AUS Coach of the Year, she led the Tigers to the national final in 1980, the semifinals in 1982, to a fourth place CIS finish in 2007 and placed sixth at nationals in 1986, 1996 and 2001. Coach Savoy's teams won nine regular season AUS titles and five AUS championships. Academically, her teams had a 100% graduation record for those playing three to five years in the program. As a Level 4 basketball master course conductor, Carolyn has coached at the national and international level as an assistant with the Canadian national team program and also served as head coach of the 2001 Nova Scotia Canada Games team. She completed her BPE degree in 1969 at the University of New Brunswick. She enjoyed an outstanding athletic career at UNB, where she was a star volleyball, basketball (she played on a team that compiled a 93-game winning streak) and field hockey player. She began her coaching career at St. FX (1969-77), where she transformed both the basketball and field hockey teams into winning programs. Carolyn has been honoured with a number of prestigious awards including the 2002 Women of Excellence award in the health, sport and fitness category. In 2005 she received the Frank Baldwin award for her contribution to the development of basketball in Nova Scotia. She was also inducted to the Saint John Sport Hall of Fame as a builder in 2003.
Eligibility: Available to athletes in the women's basketball program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

The Shaw Group Masonry Design Award
This award is presented for the B5 Design project or MArch Thesis project that best features the design potential of clay brick masonry in architecture.

Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Nova Scotia. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Betty Spencer Scholarship
Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Rt. Honourable Robert L. Stanfield Bursary

A bequest under the Will of the late Joseph Duncan Stewart has made possible the funding of undergraduate scholarships.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Student's Medical Response Trust Fund
The fund was established with a generous donation from Professor and Mrs. Surain S. Sarwal, a member of Dalhousie Faculty along with students, staff, faculty, and friends of Dalhousie. The concept of the fund was developed in response to a medical emergency. Prior to the establishment of this fund, students, staff, faculty, and friends of Dalhousie joined together to provide special funding to assist a student. A committee will decide upon the distribution of funds. Distribution of funding will be subject to the judgment of the committee taking into account the individual circumstances and needs. Applications are made to the Dean of the student's respective Faculty.
Eligibility: Available to any student registered in the Faculty of Architecture & Planning, Computer Science, or Engineering.
Application Type: Contact the Faculty for more information

Study Work International Fund (SWIF)
SWIF has been established by Dalhousie University, as part of the Student Assistance Program, to provide financial assistance to Dalhousie and King's students who wish to undertake international placements as part of their educational experience. Students must submit application a minimum of one month prior to departure.
Eligibility: Available to Dalhousie and King's students taking part in an international placement.
Application Type: Contact the International Centre for more information
