Aspects of daily life are often assumed to be “outside” of History, either unchanging or altered simply by natural forces of progress. This course will challenge such assumptions and look at the historically contingent practices surrounding such things as death, manners, sport, festivity, medicine, and education as experienced in early modern England. The course will address how and why such daily practices change, and the effects of such changes on the larger society.
PREREQUISITES: One previous history course
FORMATS: Seminar

HIST 3113 Britain in the Age of the First World War
CREDIT HOURS: 3
This course examines in depth major themes in British history from 1906 to the early 1920s, including the origins of the First World War, the experience and impact of war, wartime politics and strategy, the decline of the Liberal party and the rise of Labour, and post-war reconstruction.
PREREQUISITES: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3314.03; 3116.03; 2030X/Y.06; 2081X/Y.06; 2082.03.
FORMATS: Lecture | Discussion

HIST 3114 Britain in the Age of the Second World War
CREDIT HOURS: 3
This course examines in depth major themes in British history from the early 1930s to the early post-war years, including the Great Depression, Appeasement and the outbreak of the Second World War, the experience and impact of war, wartime politics and strategy, the welfare state, the post-war Labour government and the transition to peace.
PREREQUISITES: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3113.03; 3116.03; 2030X/Y.06; 2081X/Y.06; 2082.03.
FORMATS: Lecture | Discussion

HIST 3210 Canadian Cultural Landscapes
CREDIT HOURS: 3
This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.
CROSSLISTED: CANA 3020.03, GEOG 3210.03
FORMATS: Lecture | Discussion

HIST 3220 Youth Culture in Canada, 1950s to 1970s
CREDIT HOURS: 3
The 1950s and 1960s were decades of often startling social change throughout North America in general and Canada in particular. This course will attempt to understand these changes and their impact on our society. The primary focus of the investigation is the popular youth culture of the time, the culture of “sex, drugs and rock n' roll.” The course will look at economic and social factors underlying youth culture, at some of the major thinkers who influenced it (such as Marshall McLuhan and Herbert Marcuse), and the responses of authority to youth culture. RECOMMENDED: HIST 2222.03
PREREQUISITES: One previous history course
FORMATS: Lecture | Tutorial

HIST 3222 Topics in Canadian Social History, Nineteenth and Twentieth Centuries
CREDIT HOURS: 3
This seminar will explore major themes in Canadian social development. The topics discussed will vary from year to year but will emphasize such themes as: changing values in Canadian society; the nature of popular cultures; the relationship of order and disorder; the family; gender relations; and social classes. **Approved with Canadian Studies.**
PREREQUISITES: A course in Canadian History
CROSSLISTED: HIST 5222.03
FORMATS: Lecture | Seminar | Discussion

HIST 3226 Law and Justice in Canadian Society, to 1890
CREDIT HOURS: 3
Discussion begins with an exploration of concepts of law and justice among Native Peoples prior to and during the occupation of the continent by the French and British. The course pursues crime and the criminal law as they relate to broader changes within the society and economy of New France, British North America, and Canada. We analyze shifting patterns and perceptions of crime and punishment; the social, economic, political, and ideological significance of the criminal law; the influence of Britain, France and the United States on legal developments. **Approved with Canadian Studies.** RECOMMENDED: One previous history course
EXCLUSIONS: HIST 3225.03
FORMATS: Lecture | Discussion

HIST 3227 Criminal Law, Crime and Punishment in Canadian Society, 1890 to the present
CREDIT HOURS: 3
Continuing the approach and themes of HIST 3226.03, this course studies crime, punishment, and the criminal law as they reflect social, economic, political, and ideological developments. As appropriate, these are placed within their international context, and in particular linked to the American system of law and justice. We pay attention to the impact of technological change on crime, detection of crime, enforcement mechanisms, and alternative means and methods of punishment. **Approved with Canadian Studies.** RECOMMENDED: One previous history course
EXCLUSIONS: HIST 3225.03
FORMATS: Lecture | Discussion

HIST 3260 History of the Canadian West
CREDIT HOURS: 3
This course takes a thematic approach within a chronological framework, exploring social, economic and political topics in the development of Western Canada. Among the themes considered are Native economies, political dissent, labour radicalism, ethnic relations, and federal-provincial relations. **Approved with Canadian Studies.**
PREREQUISITES: A course in Canadian history
EXCLUSIONS: HIST 2250.03
FORMATS: Lecture | Seminar | Discussion

HIST 3273 Nova Scotia: Pre-Confederation
CREDIT HOURS: 3
An exploration of character and circumstances in the history of provincial society, from the era of European “invasion” to the debate over entry into British American union. **Approved with Canadian Studies.**
PREREQUISITES: One Canadian History course or instructor's consent
EXCLUSIONS: HIST 3270X/Y.06
FORMATS: Seminar

HIST 3274 Nova Scotia: Post-Confederation
CREDIT HOURS: 3
This course focuses on First Nations, Immigration, and Race in the history of Nova Scotia from the 1860s to the present. Topics include a survey of the resource economy in the province, particularly the history of coal; the impact of the Indian Act, Centralization, the reserve system, and residential schools on both Mi'kmaq and non-indigenous communities in the province; Africville and the Black Nova Scotian community; Nova Scotia's relationship with the rest of Canada; and both immigration and emigration in the twentieth century.
PREREQUISITES: One Canadian History course or instructor's consent
EXCLUSIONS: HIST 3270X/Y.06
FORMATS: Lecture | Seminar | Discussion

HIST 3292 Wealth & Power in N. America
CREDIT HOURS: 3
Business enterprises have played a major role in shaping the social and political as well as economic development of the United States and Canada over the past two hundred years—perhaps more so than in most other modern nations. This class explores the growth and significance of business in the history of these two countries. Among the topics covered are: entrepreneurship, technical innovation and economic growth; the rise of big business and management organization; the convoluted and controversial linkages of business and government; and the emergence of multinational enterprises and their impact on Canadian-American relations.
PREREQUISITES: One class in Canadian or U.S. history, or an appropriate class in a related discipline
EXCLUSIONS: HIST 3293.06
FORMATS: Lecture | Discussion

HIST 3293 The Political Economy of the Car: Fordism and Post-Fordism in International Perspective
CREDIT HOURS: 6
This course examines the emergence and transformation of the global economic system known as Fordism, beginning with Henry Ford's revolutionary marriage of mass production with mass consumption in 1914. Topics to be explored include: technological change in the workplace; the relationship between industrial unionism and radical political movements; the gender, racial and religious politics of Fordism; and the growth of mass culture in the era of mechanical reproduction.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: At least one previous History credit; second-year standing or better

EXCLUSIONS: HIST 3292.03
FORMATS: Seminar

HIST 3300 Topics in the History of the Americas, 1450-1870
CREDIT HOURS: 3
This course examines aspects of the historical development of the Americas from the beginnings of European imperialism in the fifteenth century to the emergence of nation states in the nineteenth century. It explores topics such as relationships between Aboriginal and European peoples; religion and socio-economic development; popular culture and gender; imperialism and the slave trade; the development of slavery; the rise of revolutionary ideologies; the American and Haitian Revolution; and the impact of civil wars.
FORMATS: Lecture | Discussion

HIST 3303 De-Colonizing Modernism: Critiquing the Legacy of Modern Art
CREDIT HOURS: 3
What is Modernism? Modern Art? Our answers to these questions reflect our attitudes towards art and the role of the artist in society. This course gives students a foundation in the western visual culture of the 20th century. It will equip them to research and write about art and critique the omissions and biases of art history. Through this process they will better understand how the Western art production of the past 150 years affects the visual culture they experience daily.
CROSSLISTED: GWST 3303
FORMATS: Lecture

HIST 3350 Family and Community in North America, 1600-1900
CREDIT HOURS: 3
The family in North American society, from when the family was a model for social relations to the time when it was idealized as a private refuge. Among the topics considered are the role of the family in rural and urban communities, the demographic transition from high fertility and mortality, the reduction of the family's economic and educational autonomy, the role of ideology in shaping sex roles and child rearing, and the relations of family and community according to ethnic group, class and economic setting. RECOMMENDED: A course in the sociology or social anthropology of the family
CROSSLISTED: GWST 3300.03
FORMATS: Lecture | Discussion

HIST 3358 Slavery, Gender, and Power: Women in Nineteenth Century America
CREDIT HOURS: 3
This course studies the tangled histories of slavery and gender in nineteenth century America. Principal topics include the lives of female slaves, the cult of domesticity, the rise of early feminism, the role of women in the destruction of slavery, and the tension between gender and race.
CROSSLISTED: GWST 3358.03
FORMATS: Seminar

HIST 3360 Enslavement and Emancipation: African-Americans in the US South to 1900
CREDIT HOURS: 3
This course examines slavery as a system of racial subordination and economic exploitation. Attention is given to the social, familial, and cultural life of the slaves, the role of slavery in shaping southern nationalism and national racial beliefs, and to reconstruction after the Civil War. RECOMMENDED: HIST 2332.03
PREREQUISITES: One 2000-level United States history course
FORMATS: Seminar

HIST 3361 The American Civil War and Reconstruction
CREDIT HOURS: 3
The Civil War, occasioned by the formation of the Southern Confederacy and the Union government's refusal to recognize the existence of a separate southern nation, was a pivotal moment in the history of the United States. This course will examine the causes of the war, the forces behind slave emancipation, the military fortunes of the two combatants, and the efforts undertaken by the victorious society to alter the polity of the defeated South. RECOMMENDED: HIST 2332.03
FORMATS: Seminar

HIST 3369 America in the 1960s
CREDIT HOURS: 3
The “long sixties” – a period from the mid-fifties through the early seventies – was an extraordinary time in American history when a number of different groups attempted to transform American society. In many ways they were successful, and we are still living with the legacy of the sixties today. This course is designed to introduce students to the numerous issues, conflicts, and problems that confronted Americans in the 1960s. The course will focus on the various movements of social reform that characterized this period. We will also discuss the rise of the “new left” and the “new right” and what these ideological movements meant for American political culture. The overall goal of the course is to encourage students to think about how individuals adjust their values to fit a particular political and cultural climate. Why do some people conform to political and social values, while others do not? Students will come at these questions from a variety of perspectives. Art, film, fiction, and music will be used throughout the course.
FORMATS: Lecture | Discussion

HIST 3370 North American Landscapes
CREDIT HOURS: 3
This course is an introduction to the history of landscapes in North America from the fifteenth century to the present day. Each week we will explore how nature has been understood, used, and transformed in a variety of different places across the continent, and how the history of these landscapes tie into the larger histories of Canada and the United States.
CROSSLISTED: HIST 5370.03
FORMATS: Lecture | Seminar

HIST 3380 Slavery and Freedom in the Americas
CREDIT HOURS: 3
This course will take a broad perspective on slavery by examining some of the defining features of forced labor throughout the Americas over the course of four centuries (with occasional examples from elsewhere in the world). To complicate the overly simplistic slave-free dichotomy and develop a more nuanced understanding

of the denial of freedom, we will investigate not only chattel slavery but other systems of free and unfree labor that existed in the Americas, such as the encomienda, convict labor, debt bondage, serfdom, pauper apprenticeship, poorhouse and prison work, indentured servitude and wage labor. We will consider definitions and justifications of slavery (including racist ideology) that have been used by past and present theorists. To better understand the extent to which the working environment shaped the lives of the enslaved, we will compare the living and working conditions of laborers in a range of historical settings. We will conclude with a survey of the rise of free labor ideology, the impact of emancipation in the Americas and a glance at forced and free labor systems in the new millennium.
FORMATS: Seminar

HIST 3394 Slavery, War and Piracy in the Early Caribbean
CREDIT HOURS: 3
The Caribbean was a world of rapid riches, constant brutality and death and it was the central interest of European powers as they expanded to the Americas. This course will explore the politics, economies, societies, and cultures on the islands within the Caribbean Sea and the mainland territories bordering on it during the early modern era. It will conclude by examining how this world was changed by the dismantling of the slave system and the age of revolutions. The course will demonstrate exactly why this region became the most important, economically, within the Americas and why European powers were so intent on defending it.
FORMATS: Lecture | Seminar

HIST 3402 Baroque to Bustles, Dress from 1700 to1870
CREDIT HOURS: 3
See course description for THEA 3402.03 in the Theatre Section of this Calendar.
CROSSLISTED: THEA 3402.03

HIST 3403 Bustles to Boardroom, 1870-the 21st century
CREDIT HOURS: 3
Bustles to Boardroom, Dress from 1870 to the 21st century
CROSSLISTED: THEA 3403.03

HIST 3430 The Making of Colonial Africa, c 1850 - 1930
CREDIT HOURS: 3
European colonial rulers and business interests laid out the framework of the sub-Saharan African colonial order from about 1850 to the 1920s, seeking ways to exploit African labour and natural resources. But imperial plans were limited and sometimes frustrated by African interests, and by historical dynamics within Africa, such as the rise of new merchants and Islamic revolution. This course assesses how the realities of Africa intersected with European imperial ambitions to profoundly change African society during this early colonial period.
CROSSLISTED: HIST 5430.03
FORMATS: Lecture | Discussion

HIST 3431 Struggles in The City: Labour, Migration and Urban Life in Colonial Africa
CREDIT HOURS: 3
There were many important urban centres in pre-colonial Africa; however, colonialism and industrialization changed both the pace and nature of urbanization. Old cities grew and new cities and mining settlements were established. Africans came to labour in these colonial cities for a host of reasons - some were forced off their homesteads when settlers and colonial governments appropriated vast tracts of land, others needed to enter the cash economy to pay colonial taxes; women and men sought new opportunities and adventure. This movement to the cities transformed the lives of millions of Africans. This course will focus on the lives of these urban dwellers, the development of urban cultures, the gendered character of urbanization, the creation of new social, political, economic and criminal networks, conflict and cooperation amongst urbanites, and the nature of colonial oppression and control in the cities.
CROSSLISTED: HIST 5431.03
FORMATS: Lecture | Discussion

HIST 3435 The Rise and Fall of African Slavery
CREDIT HOURS: 3
Many African societies, like pre-industrial societies elsewhere, used slaves as well as other forms of labour for a variety of purposes. The rise of external slave trades after 1700 — notably across the Atlantic and Sahara — transformed many African societies into specialized slave exporters. As external slave trades declined in the 19th century, many African economies used extensive internal slave labour to produce exports, a pattern colonial governments were slow to change in the 20th century. This course examines these changes in African slavery, and how they affected such issues as gender relations and class structure.
FORMATS: Lecture | Discussion

HIST 3451 Southern Africa to 1860
CREDIT HOURS: 3
Examines the history of Southern Africa before the coming of the mineral revolution. The course focuses on South Africa, but with a regional perspective. Themes include the nature of Khoi and San societies, the expansion of Bantu-speakers, Dutch settlement and administration of the Cape area, the rise of the Zulu, Shaka's empire and the mfecane, the British takeover from the Dutch, the impact of the humanitarian movement and the Great Trek, African states and kingdoms in the nineteenth century, and the formation of the Boer Republics.
FORMATS: Lecture | Discussion

HIST 3452 Apartheid and After: Racial Rule in South Africa
CREDIT HOURS: 3
The course examines not only the changes in race relations and politics, but also the effects of mining and other industries on rural and urban societies after the discoveries of diamonds and gold. Themes will include a regional perspective on British policies and the “imperial factor”, the growth of Afrikaner and African nationalism, the Boer War and unification, the development of apartheid and South Africa's relations with the wider world. RECOMMENDED: HIST 3451.03
CROSSLISTED: HIST 5452.03
FORMATS: Lecture | Discussion

HIST 3470 Wars and Revolutions in Nineteenth-Century Africa
CREDIT HOURS: 3
Africa in the nineteenth century was profoundly reshaped by a complex set of events. Muhammed Ali undertook to modernize Egypt. New Islamic states founded in the

west developed plantation economies of unrivaled size. On the Atlantic coast, merchant princes made their fortunes supplying tropical goods for Europe's Industrial Revolution. In Central Africa the search for slaves and ivory both wreaked havoc and stimulated new states. In the south, the rise of Zulu power generated waves of conquest and consolidation. This course assesses the extent to which Africa was reshaped in the revolutionary century before colonial partition.
FORMATS: Lecture | Discussion

HIST 3471 Wars and Revolutions in Twentieth-Century Africa
CREDIT HOURS: 3
Africa as portrayed in the Western media is a continent plagued by bloody conflicts. All too often these conflicts have not been carefully explained, rather they have been written off as "tribal" squabbles or incomprehensible episodes of barbarism. This course will examine several types of conflicts throughout the twentieth-century and will seek answers to such questions as: What initiated these conflicts? What were the combatants fighting for? How did these conflicts influence wider social, economic and political developments? In what ways did colonial policies and the colonial legacy influence African conflicts? What role has the international community played in African conflicts? What roles have African elites or local communities played in these conflicts? Grappling with these questions will allow us to move beyond simplistic explanations to acquire a better understanding of the wars and revolutions that have so marked twentieth-century Africa.
CROSSLISTED: HIST 5471.03
FORMATS: Lecture | Discussion

HIST 3500 Topics in Global History
CREDIT HOURS: 3
This is a special course dedicated to those topics that comprise multi-regional, global themes in the early modern and modern eras. Topics will vary, but possible course themes include: History of Slavery from a Global Perspective, Rise of Early Modern world-systems, and Colonialism and Ideology in Asia and Africa.
PREREQUISITES: Instructor permission
FORMATS: Lecture

HIST 3502 Thucydides and the Greek World at War
CREDIT HOURS: 3
See course description for CLAS 3502.03 in the Classics section of this calendar.
CROSSLISTED: CLAS 3502.03
FORMATS: Seminar

HIST 3509 Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200
CREDIT HOURS: 3
The focus of this course will be the different manifestations of Islamic civilization as it reached its zenith under a series of caliphates and sultanates across Spain, North Africa, the Levant, Iran, Central Asia, and South Asia between 750 and 1400. Emphasis will be placed on the role of heterodoxy and the emergence of numerous Islamic communities and movements (shi`ites, Sufis) as the `Abbasid empire (750-1258) struggled to maintain political and doctrinal unity. There will also be a discussion of the Turkic migrations and the corresponding rise in Turkic Islamic sultanates such as the Saljuqs and the Ghaznavids in the East, and how such developments were mirrored by the establishment of a number of Crusader states in the Holy Land. Lastly, we will examine the invasions by the Mongol khans and their devastating effect on the central Islamic world. This course will also discuss the incorporation of Hellenistic culture during the Abbasid period and the rise of Mutazilite (‘rationalist’) thought, notably in physical sciences, political studies, and philosophy, and how such syncretism was also reflected in terms of mysticism, art, architecture, and literature in the East as Islamic culture interacted with Zoroastrian, Buddhist and Hindu culture in Iran, Central Asia, and India.
CROSSLISTED: CLAS 3601.03
FORMATS: Lecture | Discussion

HIST 3510 Sultans and Shahs: Politics and Religion in the Islamic Gunpowder Age (1500 - 1800)
CREDIT HOURS: 3
Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni Abbasid caliphate. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendents, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia. By 1500, innovations in military technology and the paper-making industry allowed for the emergence of centralized and bureaucratically-sophisticated 'gunpowder' empires in western and south Asia. This course will discuss the three most significant of these: the Ottoman Turks (based in Istanbul), the Safavid Persians (based in Isfahan), and the Mughal Indians (based in Delhi). Areas of focus will include: issues of political legitimacy, use of military 'slave' corps, orthodox and popular religious movements, tensions between nomadic and sedentary segments of society, innovations in cultural expression (poetry, art, architecture), scientific and philosophical development, and the penetration and impact of the Portuguese, English, Dutch, and French 'world economies' into Asia and the Indian Ocean. This course will also examine different debates regarding the 'decline of the East', and introduce the theoretical implications of how the Islamic world is approached by contemporary scholarship.
CROSSLISTED: COMR 3510.03, HIST 5503.03, RELS 3510.03
FORMATS: Lecture | Discussion

HIST 3511 Ancient and Medieval History of the Persianate World
CREDIT HOURS: 3
This course is dedicated to studying those periods from antiquity to the medieval age where parts of Asia were influenced and defined by the Persian language and culture (i.e. Iran, the Caucasus, the Steppe, Mesopotamia, Central Asia, Anatolia, South Asia). This course will begin with examining the Aryan invasions of the 2nd Millenium B.C.E., and the eventual establishment of the Median and Achaemenid empires in the 7th – 6th centuries B.C.E. The Persian Wars between the Persians and the Greeks, culminating with Alexander the Great’s invasion and the establishment of a Perso-Hellenistic state in the 4th century B.C.E. will be studied along with various issues associated with ancient Iran and Central Asia (Zoroastrianism, Manicheanism, Nestorian Christianity, Buddhism) during the Achaemenid, Seleucid, Parthian, and Sasanian periods. This course will also examine the impact of the Arab Muslim invasions on Iran and Central Asia in the 7th, 8th, and 9th centuries, and the contribution of Persian civilization to the growth and success of Islam during the Abbasid period (750-1258). Strong emphasis will be placed on examining various aspects of Persianate culture, namely poetry, literature, art, architecture, philosophy, and mysticism in the medieval period.
CROSSLISTED: CLAS 3602.03
FORMATS: Lecture | Discussion

HIST 3512 Modern History of Iran
CREDIT HOURS: 3
This course will examine Iran from the 19th to the 21st centuries. It will begin with an examination of the Qajar dynasty and its responses to the imperial ambitions of Russia and England in the late 19th and early 20th centuries. In terms of Iranian domestic politics, we will look at the Constitutional Revolution of 1906, the rise and establishment of the Pahlavi regime, and the course of Iranian politics in an era of burgeoning nationalism as seen in the Mosaddegh period and the subsequent CIA-orchestrated coup d'etat in 1953. Particular focus will be placed on Reza Shah's monarchy, and the implications of the Revolution in 1979, not only in Iran, but throughout Afghanistan, Pakistan, and the Gulf Region. This course will continue with the impact of the Islamic Republic of Iran in terms of the Iranian culture, religion and politics.
EXCLUSIONS: First-year students.
FORMATS: Lecture | Discussion

HIST 3513 From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa
CREDIT HOURS: 3
This course aims at introducing students to a number of themes and issues related to the history of Islam in nineteenth and twentieth century Africa.
EXCLUSIONS: HIST 3551.03 in 2006-07
FORMATS: Lecture | Discussion

HIST 3515 Food for Thought: History and the Culinary Cultures of the Islamic World
CREDIT HOURS: 3
The symbol and meaning of food transcend pleasure and necessity. This course explores aspects of Islamic history through the lens of the culinary cultures in Muslim societies. It treats food as an essential factor in creating and shaping identities, social space and political discourses.
FORMATS: Lecture | Discussion

HIST 3520 Empire, War, and Resistance in Sri Lanka
CREDIT HOURS: 3
The official birth of the British Raj in South Asia is conventionally dated to 1857, following a rebellion of Indian soldiers working for the British East India Company. But the antecedents of the British Raj arguably have its roots in the island of Ceylon, more than half a century earlier. In this class, we will challenge the thesis that the Raj begins in India by studying the dynamics of empire, war, and resistance on the small island state of Ceylon (now Sri Lanka) in the Indian Ocean. No prior knowledge of the region is required, this course is meant to introduce students to the global history, politics, and conflicts that contoured the development of modern/colonial Ceylon, known today as “Sri Lanka.” We focus on the imperial conflicts that defined the period of British colonial rule (1802 – 1948), but towards the end of the class, emphasize how these historical events continue to impact post-colonial Sri Lanka in terms of ethnonationalist strife and Asian geopolitics. In so doing, part of the conceptual work of this course is to draw into contention the stability with which we think of the term “post” colonial in terms of states within the former British empire.
FORMATS: Lecture

HIST 3551 Topics in Modern History
CREDIT HOURS: 3
This course will explore major themes in the history of the 19th and 20th centuries. Topics discussed will vary from year to year, but the course will involve an in-depth examination of a selected subject in modern history, and may include an historiographical, comparative, or interdisciplinary dimension.
FORMATS: Lecture | Tutorial | Seminar

HIST 3750 Social History of Seafaring: Maritime Culture in the Age of Sail
CREDIT HOURS: 3
An examination of our maritime heritage. Within the context of these overlapping periods - the age of discovery, the age of sail, and the age of steam - the focus is on the development of merchant and naval fleets; the roles of the state, capital, and labour; and the features of seafaring culture. Special emphasis is given to the shipping industries and maritime traditions of this region. **Approved with Canadian Studies.**
PREREQUISITES: One course in history or permission of the instructor
FORMATS: Lecture | Discussion

HIST 3990 In Search of the Philosopher's Stone: The History of European Alchemy
CREDIT HOURS: 3
See course description for EMSP 3321.03 in the Early Modern Studies section of this calendar.
CROSSLISTED: HSTC 3121.03, EMSP 3321.03, RELS 3121.03
FORMATS: Lecture | Seminar

HIST 4001 Directed Readings
CREDIT HOURS: 3
This is a course of individual instruction. Students may only register for this course with the written permission of a Faculty member and the Undergraduate Coordinator.

HIST 4045 The French Revolution
CREDIT HOURS: 3
The seminar examines the French Revolution, its origins and its interpretations, as well as the legacy of the French Revolution for modern political culture. Each time the seminar is offered it may focus on a specific theme related to the French Revolution.
PREREQUISITES: One European history course
CROSSLISTED: HIST 3045.03
FORMATS: Seminar

HIST 4090 Soviet History Seminar
CREDIT HOURS: 3
This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.

CROSSLISTED: RUSN 4090.03
FORMATS: Lecture

HIST 4105 The English Civil War: Society, Religion, and Politics, 1603 - 1660
CREDIT HOURS: 3
An advanced course on one of the most tumultuous and eventful periods in British history, that leading up to and including civil war and revolution 1642 to 1660. Select primary sources will be used in addition to secondary works. Topics to be studied include the social structure of early Stuart England; the Church and its critics; foreign policy; radical politics; the military course of the war; religious sectarianism; and the impact of the war and its aftermath on the populace.
PREREQUISITES: Any course in medieval or early modern British history
CROSSLISTED: HIST 5105.03
FORMATS: Seminar

HIST 4106 Topics in Early Modern English History
CREDIT HOURS: 3
Topics to be studied will vary from year to year, and may include the religious reformations, print culture, political protest, and state formation. The course will offer students the opportunity to examine in depth key features of English history in the sixteenth and early seventeenth centuries.
PREREQUISITES: HIST 2106.03 or permission of the instructor
CROSSLISTED: HIST 5106.03
FORMATS: Seminar

HIST 4110 Rome and the East
CREDIT HOURS: 6
See course description for CLAS 4535.06 in the Classics section of this calendar.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

HIST 4117 Winston Churchill
CREDIT HOURS: 3
This course is not designed to examine every aspect of Winston Churchill's life; rather, it focuses on major events in British and world history in which Churchill was a leading actor. Subjects for discussion may include: social reform and the welfare state; the return to the gold standard; Ireland; India, empire and decolonization; appeasement; grand strategy in the two world wars; the Anglo-American "Special Relationship"; and the Cold War. This course will also examine the historiography of these subjects and the impact of Churchill's own extensive writings in shaping the historical records. RECOMMENDED: HIST 3050.03
FORMATS: Seminar

HIST 4162 Advanced Seminar in Baroque Culture
CREDIT HOURS: 6
Taught at the State Castle, Cesky Krumlov in the Czech Republic, this course offers upper-level students in History, Theatre and related disciplines the opportunity to study European Baroque culture while surrounded by its material traces. Topics covered include: seventeenth-and eighteenth-century theatre and opera; historical costume; Baroque court life; and/or the history of Central Europe.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: THEA 4735.06
EXCLUSIONS: THEA 4733.03, HIST 4160.03
FORMATS: Lecture | Tutorial

HIST 4175 Bella Figura: Display behaviours in Baroque Italy
CREDIT HOURS: 3
This course, which requires some background in Early Modern Europe is a broad overview of behaviour surrounding appearance and display in Baroque Italy, roughly from the late sixteenth to the mid-eighteenth century. The intellectual framework of the course is situated in behaviour as a human universal, with roots in animal display. After dealing briefly with display as a human universal, the readings examine the phenomenon in the context of the state, of religion, in architecture and interior decoration, and as stable behaviour in civil society art, dress and protocol. Reading in French not obligatory but encouraged and rewarded. All the readings will be posted to the course page on Brightspace.
PREREQUISITES: an Early Modern European Course
FORMATS: Seminar
LAB HOURS PER WEEK: 0

HIST 4222 Topics in Canadian Social History, Nineteenth and Twentieth Centuries
CREDIT HOURS: 3
This seminar is an opportunity to explore in depth a specific theme or issue in Canadian history. The exact topic will vary from year to year, but will focus on some aspect of social, political or cultural history. The subject may be regional or national in scope. Past examples include cowboys in the North American west, native-newcomer relations, and the social history of health. Weekly discussions and a research paper emphasize historiographical debates as well as its significance to the story of Canada. Approved with Canadian Studies.
PREREQUISITES: A Canadian History course at the 3000 level or permission of the instructor
CROSSLISTED: HIST 5222.03
FORMATS: Seminar

HIST 4250 Popular Culture in the Atlantic World, 1650-1850
CREDIT HOURS: 3
This course examines the history of popular culture in the Atlantic world. It focuses on using primary sources, such as diaries and journals, to explore the culture and customs in pre-industrial communities. We will discuss topics such as family relationships, popular ideologies, religious practices, economic culture, the role of gender, and attitudes towards sex. In addition to participating in weekly seminar discussions, students will present drafts of their research papers in class, and a revised version of the paper will be submitted at the end of term.
PREREQUISITES: A History course at the 3000 level or permisson of the instructor

CROSSLISTED: HIST 5250.03
EXCLUSIONS: HIST 4222 (Fall 2004 and Fall 2005)
FORMATS: Seminar

HIST 4303 The Birth of Pop: How Visual Culture Makes Meaning
CREDIT HOURS: 3
Contemporary western society is saturated with visual images of all kinds: from oil painting to pornography. Visual culture is not only becoming more diverse but also increasingly globalized. For these reasons alone, the study of popular visual culture is an important pursuit. But popular images, like all visual images, also carry meaning and generate effects. The first part of this course explores the origins of mass popular culture in 19th Century Britain. Through case studies, suggesting that Western ideas about mental health, gender, romance, weddings and marriage emerged and were transmitted though Victorian visual culture, students learn to see connections between the popular culture of the past and contemporary visuality. Students will also critique the development of cultural studies as a discipline and form their own theoretical positions. In the second part, students will conduct their own self-directed primary research into a visual popular culture topic of their choosing. In the final weeks of the course, students will be asked to reflect on the course as a whole, consolidate what they have learned, and articulate the connections (or disruptions) they see between historical and contemporary theory and practice. This course is ideally suited to students who want to incorporate visual or popular culture sources in their Honours or MA thesis.
PREREQUISITES: HIST 2900.03 or HIST 3303.03 or GWST 2900.03 or GWST 3303.03 or permission of the instructor
CROSSLISTED: GWST 4303.03
FORMATS: Seminar

HIST 4355 Becoming the State
CREDIT HOURS: 3
The state is undeniably the central "agent" of the modern global system, yet explanations for the emergence of the state as the hegemonic mode of organizing human society tend to privilege Eurocentric histories, obfuscating the different ways of organizing space that have existed around our shared planet. Consequently, the inter-state system itself that constitutes the 'terrain' of modern global studies remains only partially historicized. In this seminar, we study the emergence of the modern territorial state with attention to the tensions that emerge when distinct modes of organizing space encounter one another in the modern, colonial era. We begin surveying methods and approaches for studying the state, then move into geographic case studies and critical problems emerging from the rise of the state as a creature of the modern, colonial encounter.
FORMATS: Seminar

HIST 4360 Slavery and American Political Culture
CREDIT HOURS: 3
This course studies the relationship between slavery and American political culture from the Revolution until the Civil War. Major themes will include the expansion of American slavery, the political ideology of slaveholders, racism in American life, and the antislavery arguments of abolitionists and runaway slaves.
FORMATS: Seminar

HIST 4370 The American Revolution
CREDIT HOURS: 3
This course examines the American Revolution and the larger revolutionary era in the Atlantic World. It situates this critically important event in American history within the broader context of the Atlantic World. We will explore the origins of the Revolution and discuss its immediate impact on the British Empire and the colonies which became the new United States. We will examine the military conflict that led to American independence as well as the major ideological and social shifts that were part of the Revolution. We will try to determine the motivations of the various colonies in joining the Revolution and we will ask why some colonies in the British Empire chose not to revolt. We will conclude with the creation of the Constitution. We will explore the meaning of the revolution and American independence for various groups of people in the colonies, including colonial elites, women, Native Americans and African-Americans. We will also examine the Loyalists and the Loyalist diaspora. Throughout the course we will try to determine how revolutionary or radical this event was.
FORMATS: Seminar

HIST 4400 Topics in African History
CREDIT HOURS: 3
This course will undertake a careful, in depth examination of a select theme in African history. The theme will vary from year to year, but the aim will be to probe the deep complexities of Africa's past that recent scholarship is bringing to light. Themes may be regional or continental, and could include such topics as witchcraft, resistance, urban history, religious change, migration, or nationalism. The core of the work will be a significant research paper and seminar presentations. Classes will also involve the reading, presentation, and discussion of selected readings.
PREREQUISITES: At least one 3000-level African history course or permission of the instructor
CROSSLISTED: HIST 5400.03
FORMATS: Seminar

HIST 4401 State Violence, Communal Conflict and Criminality in Modern South Africa
CREDIT HOURS: 3
South Africa is plagued by one of the world's highest rates of violent crime and social conflict. Despite the unprecendented level of public concern with violence, little attention is paid to the historical origins of this phenomenon. This course explores the changing patterns of crime and violence since the 1890s.
CROSSLISTED: HIST 5401.03
FORMATS: Seminar

HIST 4404 Crime and Punishment in Modern Africa
CREDIT HOURS: 3
This course will explore the extent to which state legitimacy and power can illuminate the trajectories of crime, policing and punishment from early colonial era in Africa to the present day.
FORMATS: Seminar

HIST 4475 African Intellectuals and the Modern Experience
CREDIT HOURS: 3
African thinkers have long pondered the challenges of the modern era, and have established lines of thought with which African intellectuals now address Africa's profound problems. But this engagement with the modern world has moved through different phases, just as the social location of the African intelligentsia has changed over time. This course will explore this intellectual history by setting specific writers in context, and then examining their original writings to ponder such questions as: What were the roots of "African Christianity"? How did African intellectuals respond to "scientific" racism? What was the appeal of Pan-Africanism? What was Negritude? How socialist was African socialism? How do postmodern insights about the invention of identity affect the idea of being "African"?
CROSSLISTED: HIST 5475.03
EXCLUSIONS: HIST 3475.03
FORMATS: Seminar

HIST 4500 Topics in Modern History
CREDIT HOURS: 3
This seminar is intended specifically for students in the 20-credit Major and Honours degree programs in History. The specific content of the seminar varies from year to year, but generally involves examination of a subject in history in some depth, and may include an historiographical, comparative, or interdisciplinary dimension.
PREREQUISITES: Permission of the instructor
CROSSLISTED: HIST 5500.03
FORMATS: Seminar

HIST 4510 Topics in Islamic and Middle East History
CREDIT HOURS: 3
This is a special course dedicated to a topic dealing with the Islamic world/Middle East from the medieval era to the present. Topics will vary, but possible course themes include: political thought in Islam, slavery in Islamic civilization, Nationalism and Ethnicity in the Middle East, and Women in the Islamic world.
FORMATS: Seminar

HIST 4545 Scripture and Statecraft: History of Islamic Political Thought
CREDIT HOURS: 3
This course is dedicated to understanding how Arab-centric tribal relations and networks initially defined Islamic politics in 7th-century Arabia, and how these definitions were later influenced by external 'imperial' and 'kingly' traditions (from Byzantines, Iranians, Indians). Muslim concepts of authority, however, were and still are defined by prophetic genealogies and charisma, and parts of this course will examine the shi`ite doctrine of imamate and the growth of millenarian thought. This course will also focus on the changes in political philosophy as a result of the violent arrival of the Mongols, and how traditional sunni notions of authority and state were displaced by the rise of Shi`ism and Sufism. Discussions will also focus on Muhammad ibn `Abd al-Wahhab and Jamal al-Din al- Afghani and the extent to which Islamic political thought retooled and reappraised in the wake of European hegemonic imperialism. The remainder of the course will examine the rise of Islamism, its radicalization following World War Two, and the implications of Islamism and its opponents against the backdrop of the Islamic Revolution in Iran and other religio-political movements in the Middle East, Africa, and South Asia.
PREREQUISITES: Any 3000-level course in Middle East history or permission of the instructor
CROSSLISTED: HIST 5545.03
FORMATS: Seminar

HIST 4550 Orientalism and Occidentalism
CREDIT HOURS: 3
This seminar is intended for senior undergraduate and graduate students interested in discussing how scholarship has historically approached non-Western and non-Christian areas of the globe. Dating back to Herodotus, Plato, and Isocrates, the description of "the Other" has been a consistent theme in European literary and academic traditions. Whether or not it was the apologetic theological rivalry between Islam and Christianity in the Middle Ages, or the Humanist mania for non-European languages and ethnography, Occidental scholarship has historically been attracted to understanding and depicting the non-Occident. This course will examine the different European intellectual traditions of early modern Europe and how they laid the foundation for subsequent 19th and early 20th century characterizations of the Islamic world. Concurrently, however, there is evidence that a discourse of "Occidentalism" emerged among Muslim scholars and literati, and the ensuing dialectic between West and East framed the introduction of a number of political and religious ideologies to the Middle East, Iran, Central Asia, and India. There will be readings and discussions of a number of different scholars and theorists - Foucault, Chakrabarty, Said - who have commented on these discourses. Equal attention will be given to those Muslim scholars - Shayaghan, Soroush, al-Ahmad - who have written and commented on these dynamics between Western and Islamic civilization.
PREREQUISITES: Any 2000 or 3000-level course in Middle East history or permission of the instructor
FORMATS: Seminar

HIST 4555 A Dream Palace or a Bitter Reality: Arab Intellectuals and Their Ideologies in the Modern Period
CREDIT HOURS: 3
From Ottoman reforms to European colonialism, from the creation of the state of Israel to the invasion of Iraq, Arab intellectuals have been constantly evaluating the weight of the past, the burdens of the present and the prospects of the future. This course examines the ideas and ideologies of Arab intellectuals of Muslim, Christian and Jewish background and those who reside in the Arab world as well as those who have made their careers in the West.
PREREQUISITES: Any 2000 or 3000 level course in Middle East history or permission of the instructor.
FORMATS: Seminar

HIST 4600 Topics in Late Nineteenth- and Twentieth-Century American and British History
CREDIT HOURS: 3
This course will, depending upon the staffing in any particular year, examine a selection of themes in late 19th and 20th century British and American history, including, for instance, labour/labour history, political history (including state formation), cultural history, and history of race and national identity. Depending upon staffing, this course may concentrate upon the history of one country or may offer a comparative aspect. It will be intended for graduate or senior undergraduate students with some background in either British, American or Canadian history. Evaluation will be through research papers and, possibly, a final exam.
PREREQUISITES: 3000-level course in modern British, American or Canadian history
CROSSLISTED: HIST 5600.03
FORMATS: Seminar

HIST 4613 Women's Suffrage from the French Revolution to World War I
CREDIT HOURS: 3
The question of women's participation in representative government first emerged during the French Revolution but by 1914, only two European countries had granted women the right to vote. This seminar explores the suffrage movement in the nineteenth century and the obstacles in the process of women's enfranchisement.
PREREQUISITES: Some background in Modern European History
CROSSLISTED: GWST 4315.03
FORMATS: Seminar

HIST 4614 Topics in the History of Sexuality
CREDIT HOURS: 3
This seminar is intended for senior undergraduates. The specific content of the course varies from year to year, with a general focus on comparative, historiographic, and theoretical issues relating to the history of sexuality. Topics may include: the rise and fall of schools of sexology as embodied by Ellis, Freud, and Kinsey; sexual violence and harassment; the commodification of sexuality; the history of the body; sexuality and colonialism; gay and lesbian subcultures; and the intersection of class, race, and gender in sexual experiences, discourses, and communities.
PREREQUISITES: HIST 2614.03 or GWST 2300.03 or HIST 2615.03 or GWST 2301.03 or HIST 3358.03 or GWST 3358.03 or GWST 2500.03 or GWST 2800.03 or HIST 3013.03 or GWST 3013 or permission of the instructor
CROSSLISTED: GWST 4330.03
FORMATS: Seminar

HIST 4639 Britain, Appeasement, and the Origins of the Second World War
CREDIT HOURS: 3
This course examines Britain's response to the rise of expansionist regimes in Germany, Italy, and Japan during the 1930s. Topics of discussion will include: the historical "roots" of appeasement; Neville Chamberlain and the Munich Conference; the Foreign Office; the Treasury; the armed services and British rearmament; the press and public opinion.
PREREQUISITES: One previous British history course
FORMATS: Seminar

HIST 4980 Reading and Writing 'Postmodern' 'History'
CREDIT HOURS: 3
According to a number of post-modern theorists we have now reached the “end of history.” History, they argue, as it is now taught at Dalhousie University, and many other universities around the world, is a dead or dying field of study of study. Taking this assumption as a starting point this course is designed to explore what alternative accounts of the “before now” could look like. The course itself consists of three parts. The first part will concentrate on some of the key ideas behind “postmodern” theory. In the second part we will examine various historical studies written by both modern and postmodern historians in order understand the differences between the two interpretive approaches. In the third part of the course you will have the opportunity to write and present your own papers on the before now. You will do so by participating in an act of intellectual disobedience whereby you will reject many of the current rules of writing history in order to create your own "uncompromising, emancipatory message.
PREREQUISITES: Third year history course
FORMATS: Seminar

HIST 4986 The Varieties of History
CREDIT HOURS: 6
This course, reserved for fourth-year Honours students in History, is a seminar that examines questions concerning the nature and value of historical enquiry that have occupied thinkers since ancient times. Through a series of wide-ranging readings it explores the meaning of history in the context of European and non-European societies and the paradigms by which, through the ages, scholars have approached the study of the past.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Concurrent enrolment in HIST 4990X/Y, or instructor’s permission
FORMATS: Seminar

HIST 4988 The Historiography of American Foreign Relations Post-1945
CREDIT HOURS: 3
This course is designed to introduce students to the history of American foreign policy from the Origins of the Cold War to the demise of the Soviet Union. Rather than concentrating solely on the events as they unfolded, however, this course will focus on questions of interpretation and methodology. Toward this end, the seminars are designed to introduce students to both the historiography of the event under question and to some of the "theories" historians have used to interpret American foreign policy. The goal of the course is to provide students with the necessary tools to think critically about various forces at work in the development and execution of contemporary United States policy.
PREREQUISITES: A third-year 20th Century American History course.
FORMATS: Seminar

HIST 4990 Honours Essay in History
CREDIT HOURS: 6
All History Honours students and those in combined Honours programs in which History is their principal subject must write a substantial essay on a topic to be chosen in consultation with the undergraduate coordinator and an individual faculty supervisor.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Admission to History Honours Programme

History of Science and Technology Program
Science and technology shape who we are, our environments, our conditions of work and play, and what we consider to be trustworthy knowledge. The History of Science and Technology (HOST) program explores the historical, cultural, social, religious, and philosophical contexts of this engagement to elucidate the nature of scientific knowledge and to understand the role of science and technology in the development of past and present societies.

HOST is an interdisciplinary program that cuts across the sciences and the humanities. Our courses explore topics as diverse as the ancient origins of technology, medieval natural philosophy, alchemy and magic, the Scientific Revolution, science in movies and literature, and how modern science is, every day, influencing and transforming our political, social, religious, cultural, and economic institutions.

HOST courses are open to any student registered either at Dalhousie University or the University of King's College. We also welcome visiting students (attending on a Letter of Permission) from other universities.

Degree Options

Students registered in the BA or BSc degree at either King's or Dalhousie have two options for pursuing a degree in the HOST program: (a) the Combined Honours degree or (b) the Minor.

Staff

Director
McOuat, G., BA, MA, PhD (Toronto)

Teaching Staff at the University of King's College
Bennett, M., BA (Vind), MA (Western), PhD (McMaster)

Burke, M., BA (Vind), MA (Concordia), PhD (Ottawa)

Frappier, M., BScA, MA (Laval), PhD (Western)
Fraser, K., BA (Vind), MA (Dalhousie), MPhil, PhD (Cantab)
McOuat, G., BA, MA, PhD (Toronto)
Morris, K., BA (Vind), PhD (McGill)
Snobelen, S., BA (Hon), MA (Victoria), MPhil, PhD (Cantab)
Stewart, I., BSc (Trent), MA (Toronto), PhD (Cantab)
Vusich, J., BA (Toronto), MA, PhD (Johns Hopkins)

Teaching Staff at Dalhousie
Brown, R., BA, BSc (Victoria), MA/MSc, PhD (Dalhousie)
Gass, G., BSc (Dalhousie), PhD (Toronto)

Combined Honours

Pursuing an honours degree requires a higher quality of work than is required by the other undergraduate programs (such as a 120 credit hours Major). Students who intend to apply to graduate school or professional programmes (e.g. medicine or law) are especially encouraged to take a Honours degree as scholarships and program committees tend to look more favourably on students with Honours-level degrees. Choosing a Combined Honours degree enables you to pursue your studies in two disciplines, while demonstrating your seriousness and abilities as a student.

The HOST Combined Honours degree is available to students pursuing a BA, a BSc, or a Bachelor of Journalism. The Combined Honours BA or BSc degree in HOST is offered jointly by Dalhousie University and the University of King's College.

The Dalhousie departmental offerings within the History of Science and Technology Program may include the other honours subject, a number of possible electives, and certain cross-listed courses. The other honours subject must be selected from the following list of Dalhousie departments and programs: Canadian Studies, Cinema and Media Studies, Classics, Creative Writing, English, Environment, Sustainability and Society, Environmental Science, French, Gender and Women's Studies, German, History, International Development Studies, Law, Justice and Society, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Sociology, Social Anthropology, Spanish and Latin American Studies, Theatre, Biochemistry, Biology, Chemistry, Computing Science, Earth Sciences, Economics, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Oceanography, Physics, Psychology, and Statistics.

Students are encouraged to apply to the program and seek advice on course selection as early as possible, even before registering for the second year. All students must meet the degree requirements for the Faculty of Arts and Social Sciences or Faculty of Science program as detailed in the Degree Requirements section of this calendar.

For each individual student, the entire degree program, including elective courses and honours requirements, is subject to supervision and approval by the two concerned programs.

All History of Science and Technology students are encouraged to acquire (through appropriate courses) competence in languages which are relevant to their degree, interests and future plans.

The joint Dalhousie/King's History of Science and Technology Combined Honours Program is based on the general requirement that the full credits needed to graduate include:

1. In the case of a Combined Honours BSc degree, a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in the two honours subjects, but not more than 54 and no fewer than 30 credit hours being in either of them. Students may elect to complete only 24 credit hours in HSTC, but require prior program's approval to do so. **The larger number of honours credit hours must be in the science subject.**
   In the case of a Combined Honours BA degree, a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in the two honours subjects, with no more than 48 and no fewer than 30 credit hours in either.
2. Six (6) to twenty-four (24) elective credit hours, depending on the number selected in the honours subject.
3. 12 credit hours of "core" courses in history of science: HSTC 2001.03: Ancient and Medieval Science, HSTC 3001.03: Scientific Revolution, HSTC 4001.03: Modern Science, HSTC 4600: Historiography Seminar (or their equivalent). (With special permission from the Program Director HSTC 3030 may be substituted for one of these four core courses).
4. An honours qualifying examination (see Degree Requirement: BA, BSc Combined Honours (4 Year). BSc students must acquire this additional grade in their science subject. BA students may choose to acquire this additional grade in either honours subject with the approval of both units. In the History of Science and Technology Program, the honours thesis (HSTC 4650.03) fulfills the requirement of the honours qualifying examination.

Students will be eligible to take an "Independent Reading" course only when they reach their third or fourth year. There will be six options for this course, but only six credit hours may be taken in a year, and no more than 12 credit hours of this type may be taken during the course of study. The permission of a member of the teaching staff and the Director of the Program is necessary in order to take one of these courses, and their availability is strictly limited.

Minor in History of Science and Technology
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Sciences) program.

The Minor in HOST indicates a willingness and ability to approach issues at the crossroad between the sciences and the humanities from an interdisciplinary perspective.

The requirements for the Minor in HOST are a minimum of 18 to a maximum of 27 credit hours taken at the 2000 level or above, including at least one of the following six credit hour options:

- HSTC 2001.03: Ancient and Medieval Science
- HSTC 2200.06/SCIE 2000.06/HIST 2074.06: Introduction to the History of Science
- HSTC 3001.03: The Scientific Revolution
- HSTC 4001.03: Science and Nature in the Modern Period

Contact History of Science and Technology for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website

NOTE: For History of Science and Technology, courses at the 2000 level are open to all students, even those in their first year of study.

Course Descriptions

HSTC 1200 Introduction to the History of Science
CREDIT HOURS: 6
This course is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this course clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call the modern world. In uncovering the sources and character of each of these transformations in the theory and practice of science, the course will challenge conventional views about the nature and place of science. This course may be taken as an arts or science credit.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Students who are registered as combined honours with

History of Science and Technology are not permitted to take this course to fulfill their HOST degree requirements. This course may be taken either as an Arts or a Science credit.
CROSSLISTED: HIST 2074X/Y.06, HSTC 2200X/Y.06, SCIE 2000X/Y.06
EXCLUSIONS: HSTC 2201.03, BIOL 3502,03, HIST 3072.03, HIST 3074X/Y.06, SCIE 4000.03
FORMATS: Lecture | Tutorial

HSTC 1800 Technology and Engineering: from the Stone Age to the Industrial Age
CREDIT HOURS: 3
Through case studies from the history of major engineering disciplines, this course examines the reciprocal influences of technology and engineering practice and social, political, and economic institutions from ancient times to the first industrial revolution.
EXCLUSIONS: HSTC 2809.03
FORMATS: Lecture | Tutorial

HSTC 1801 Technology and Engineering: from the Industrial Age to the Cybernetic Age
CREDIT HOURS: 3
Through case studies this course examines the influence of the development of technology on our social, political, and economic institutions in the past 200 years and how this has shaped the roles and responsibilities of modern engineers.
FORMATS: Lecture | Tutorial

HSTC 2001 Beginnings of Wisdom: Science in the Pre-modern World
CREDIT HOURS: 3
This course introduces key developments in pre-modern science. Fundamental concepts in the physical sciences, astronomy and cosmology are treated through the study of primary sources from antiquity (Near Eastern and Greco-Roman) and the medieval Islamic, Jewish and Christian cultures. We will be attentive to the wider cultural contexts in which science was pursued and to intersections between science and other ways of knowing (e.g., myth, magic, religion).
CROSSLISTED: CLAS 2001.03
EXCLUSIONS: HSTC 2000X/Y.06
FORMATS: Lecture | Seminar

HSTC 2002 Medieval Natural Philosophy: From the Roman Empire to the Age of Dante
CREDIT HOURS: 3
This course introduces key developments in medieval understandings of nature (better called "natural philosophy" than "science") through a direct engagement with primary sources. We consider how the texts and authorities of antiquity (Plato and Aristotle, most notably) were assimilated, adapted, and transformed during the Roman Empire, in Islam, and in later medieval Christian Europe. Questions such as the role of ‘nature’ in defining human happiness, the good life, and the character of political power will figure prominently. We will attend to the limits of ‘natural’ reason in relation to established disciplines like theology, as well as more contested areas of knowledge such as magic, astrology and alchemy. The approach taken will be that of intellectual history, in the sense that we will focus on fundamental concepts articulated by the authors and on careful textual exegesis, while always attentive to the wider historical and cultural contexts. Especially given that this course's authors, texts, and contexts are quite distant in time from our contemporary world, there will also be occasions for us to reflect on the challenges facing the modern inquirer into pre-modern conceptions of nature and scientific knowledge.
PREREQUISITES: HSTC 2001.03 is recommended, but not required.
CROSSLISTED: CLAS 2002.03
EXCLUSIONS: HSTC2000X/Y.06
FORMATS: Lecture | Seminar

HSTC 2011 The Lecture Series
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to HSTC 3011/HSTC 4011.
CROSSLISTED: HSTC 3011.03, HSTC 4011.03
FORMATS: Lecture | Seminar

HSTC 2102 Origins of Modern Medicine
CREDIT HOURS: 3
This course looks at defining moments that led to modern health and medicine, beginning with the ancient world leading up to the development of ‘modern’ institutionalized medicine at the birth of the 20th Century. Focus will be on changing ideas about the causes of disease and the possibilities of medicine, but also on the broader conceptions of health, life and death and their social/cultural place.
FORMATS: Lecture | Seminar | Discussion

HSTC 2105 The Life, Science and Philosophy of Albert Einstein
CREDIT HOURS: 3
In 1999 *Time Magazine* named Albert Einstein "Person of the Century" for the impact his scientific work had not only on physics, but also on culture in general. In this course, we will explore how Einstein's proof of the existence of atoms, his belief in light particles (the photons), and his application of the famous principle of relativity revolutionized both modern physics and philosophy. We will also pay attention to the main events of Einstein's life (his divorce, the rise of Nazism in Germany, etc.), Einstein's pacifism and Zionism, his attitude toward religion and his personal relationships with other scientists (Poincaré, Bohr, etc.) to understand the personal, social and cultural contexts in which these revolutionary theories were developed. NO prior knowledge of physics, mathematics, or philosophy is expected. This course is for everyone with interest in science, but is not a science course (mathematics will be kept at a minimum).
FORMATS: Lecture | Discussion

HSTC 2120 Magic, Science and the Occult: from Antiquity to Postmodernity
CREDIT HOURS: 3
The 'scientific revolution' is ordinarily construed as the triumph of reason over superstition, of science over sorcery. This course argues that the rhetoric of 'enlightenment' conceals a deep continuity between Modern science and the occult traditions of the Middle Ages and the Renaissance. The prototype of the experimental scientist is the Faustian magus. We investigate the role of Hermeticism, magic and the occult in the scientific revolution and the persistence of these

esoteric currents in later movements, from German *Naturphilosophie* to Jungian psychology.

FORMATS: Lecture | Tutorial

HSTC 2200 Introduction to the History of Science
CREDIT HOURS: 6
This course is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this course clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call the modern world. In uncovering the sources and character of each of these transformations in the theory and practice of science, the course will challenge conventional views about the nature and place of science. This course may be taken as an arts or science credit.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Students who are registered as combined honours with History of Science and Technology are not permitted to take this course to fulfill their HOST degree requirements. This course may be taken either as an Arts or a Science credit.

HSTC 2202 The Beginnings of Western Medicine: the Birth of the Body
CREDIT HOURS: 3
This course will look at how the body was viewed in ancient scientific theory and practice. Western medicine as a rationalized scientific practice finds its origins in the ancient Greek philosophical and medical texts attributed to "Hippocrates". Through a close reading of selected ancient medical texts, this course will explore ideas of how the human body is constituted, how it relates to the Cosmos as a whole, what the role of the physician was seen to be, and how illness and healing were seen as changes in the balance of the components of the body.
CROSSLISTED: CLAS 2202.03
FORMATS: Lecture | Seminar

HSTC 2204 The Darwinian Revolution
CREDIT HOURS: 3
Arguably, the Darwinian Revolution marks the greatest revolution in our conception of nature and our place within it, deeply challenging received views on chance, teleology, history, the soul and nature. This course opens up the historical and philosophical background to the Darwinian revolution, the main episodes of that revolution and the consequences for contemporary moral, scientific and social theory. Emphasis will be placed on reading contemporary primary texts.
FORMATS: Lecture | Seminar

HSTC 2205 Totalitarianism and Science
CREDIT HOURS: 3
The question of who has authority over funding, direction and priorities of modern science is a central political concern. This course considers the case of totalitarian states (USSR and Nazi Germany) and consists of two parts. Part I analyses the essential features of totalitarian regimes. Part II concentrates on the fortune of particular sciences (medicine, biology, physics) under them.
CROSSLISTED: HIST 2985.03, CTMP 2205.03
FORMATS: Lecture | Tutorial

HSTC 2206 Bio-Politics: Human Nature in Contemporary Thought
CREDIT HOURS: 3
To what extent do biology and culture determine what it is to be human? Drawing on theorists ranging from Foucault to Steven Pinker, this course will examine the recent political, moral and existential issues raised by attempts to answer that question. Topics will include socio-biology, evolutionary psychology, the construction of human kinds and the problem of free will.
CROSSLISTED: CTMP 2203.03
FORMATS: Lecture

HSTC 2209 Environmentalism: origins, ideals, and critique
CREDIT HOURS: 3
In this course, we examine the ideals of environmentalism from its origins in the late 18th century to the present. Topics include the romantic critique of industrialization, forest management and sustainability, wilderness preservation, animal rights, radical environmentalism, and environmental justice.
CROSSLISTED: CTMP 2206.03
FORMATS: Lecture | Seminar

HSTC 2210 Engineering the Planet: the Anthropocene Era, from Prehistory to Today's Global Crisis
CREDIT HOURS: 3
This course explores the notion of the Anthropocene, the idea that the Earth has been significantly and permanently altered by human activity. Through the lens of environmental history, the course examines the material, social, political, and conceptual technologies used to relate and manipulate environments over the last 12 000 years.
EXCLUSIONS: HSTC 3210.03
FORMATS: Lecture | Seminar

HSTC 2310 Women and Gender in Early Modern Science
CREDIT HOURS: 3
This course will explore the roles of women, and questions about women's nature, in the development of Early Modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. Although women were, for the most part, excluded from universities and scientific academies, some women were able to do scientific work through their

participation in salons and craft guilds. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. We will pay special attention to the biological sciences and their treatments of sex differences, conception, and generation. We will consider how these biological theories were influenced by, and at the same time used to uphold, various political and social structures. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.
CROSSLISTED: EMSP 2310.03, GWST 2310.03
FORMATS: Lecture | Seminar

HSTC 2340 The Origins of Science Fiction in Early Modern Europe
CREDIT HOURS: 3
In 1500, literate Europeans lived in a bounded, geocentric universe. By 1800, the sun had replaced the earth at the centre of a limited planetary system situated in infinite space. These changes prompted early modern philosophers, scientists and writers to consider the possibility that the universe might contain a plurality of worlds. This course will explore the ways in which the "plurality" theme was developed in some of the earliest works of science fiction. We will consider this theme as it appears in stories of intergalactic voyages, utopian societies, and encounters with extraterrestrial beings, paying special attention to the ways in which early modern writers used these tales to speculate on philosophical, political, and scientific issues.
CROSSLISTED: EMSP 2340.03
EXCLUSIONS: EMSP 2330.03
FORMATS: Seminar

HSTC 2350 The Body in Early Modern Europe
CREDIT HOURS: 3
This course will explore how the emergence of the modern self intersected with changing conceptions of the body. We will explore such topics as the rise of Renaissance anatomy; Early Modern perceptions of gender, race, and sexual difference; new explanations of madness and melancholy; monstrous and demonic bodies; representations of the diseased body; and the emergence of the modern ideal of the disciplined body.
CROSSLISTED: EMSP 2350.03
FORMATS: Lecture | Tutorial

HSTC 2400 Science and the Media
CREDIT HOURS: 3
From the first Babylonian astronomical records on cuneiform to the public understanding of science on television, the various media have long been crucial to the success and spread of science. This course provides a history of science in the media from the ancient and medieval use of geometrical diagrams, astronomical figures and anatomical illustration through early modern printed texts, popular broadsheets and color botanical plates all the way to the ubiquity of science in literature, cinema and on the Internet. This expanding presence of science in the media is examined against the backdrop of three revolutions: literary and artistic (ancient and medieval worlds), mechanical (early modern period) and electronic (contemporary age). Specific themes considered include the increasing accuracy of scientific illustration, the rise of scientific journals, public scientific demonstrations, science in poetry and prose fiction, science and art, radio and television documentaries, the advertising and marketing of science, scientific apocalypses and techno-utopias, bioethics, Soviet era technological iconography, environmentalism and science-religion relations in the journalistic press, science fiction from H.G. Wells' *War of the Worlds* to *Star Wars* and *Jurassic Park*, and science in computing and cyberspace.
CROSSLISTED: JOUR 2400.03
FORMATS: Lecture | Seminar

HSTC 2500 Science Fiction in Film
CREDIT HOURS: 3
This course studies portrayals of science and technology in science fiction film. Themes examined include the "mad" scientist; science as malevolent versus science as salvation; the survival of humanness in a technological world and the contrary trend of dehumanisation in the face of advancing technology; scientific utopias and dystopias; science fiction as self-fulfilling prophecy; voyages into space and inner space; time travel; computers and artificial intelligence; nuclear holocaust and environmental apocalypses; alien life; genetic engineering; imagined technocracies; and science fiction as a vehicle for social and political; commentary. Films screened will include classics of science fiction such as *Metropolis* (1927), *The Time Machine* (1960), *Solaris* (1972), *Bladerunner* (1982) and *The Matrix* (1999). These feature films will be supplemented with footage from civil defence films, government celebrations of science and technology along with science documentaries. Films will be accompanied in class by discussion and criticism and students will also read scholarly treatments of cinematic science fiction. Evaluation will be based on participation, written work and a final examination.
FORMATS: Discussion

HSTC 2809 Making History: A Global History of Technology through reproductions from Prehistory to the First Industrial Revolution
CREDIT HOURS: 3
This course explores the reciprocal influences of technology and social, political, cultural and economic institutions from the Stone Age to the First Industrial Revolution (ca. 1800) using case studies from the history of technology and historical reproductions.
EXCLUSIONS: HSTC 1800.03
FORMATS: Lecture | Seminar

HSTC 2810 History of Chinese Science and Technology
CREDIT HOURS: 3
This course introduces central features of the history of science and technology at the heart of Chinese and East Asian history. Focus will be on and the long-term global trajectories of environmental and technological change that transformed the production of goods, the conduct of governance, and the relationships between humans and their environments.
CROSSLISTED: CHIN 2040.03

HSTC 3001 The Scientific Revolution
CREDIT HOURS: 3
This course examines the history and historiography of the Scientific Revolution (1500–1800). Beginning with the late Medieval developments that prepared the ground for the Scientific Revolution, this course examines the revolutions in astronomy, medicine, physics, natural history and the earth sciences through the innovative work of such natural philosophers as Copernicus, Vesalius, Kepler, Galileo, Descartes and Boyle up to the achievement of Isaac Newton's Principia mathematica (1687) and Opticks (1704). The course then evaluates the immediate spread and legacies of Newtonianism and considers more broadly developments in astronomy, physics, chemistry, geology and the emerging life sciences along with their impact on culture and society in the Enlightenment.
EXCLUSIONS: HSTC 3000X/Y.06
FORMATS: Lecture | Seminar

HSTC 3002 Science in the Enlightenment
CREDIT HOURS: 3
This course examines the history and historiography of science in the long eighteenth century Enlightenment along with Romantic views of nature that extend into the early nineteenth century. Beginning with the Newtonian achievement in mathematics, physics and optics, this course evaluates the immediate spread and legacies of Newtonianism and then considers more broadly developments in astronomy, physics, chemistry, geology and the emerging life sciences along with their impact on culture and society.

See HSTC 2011.
CROSSLISTED: HSTC 2011.03, HSTC 4011.03
FORMATS: Lecture

HSTC 3030 Science and Culture
CREDIT HOURS: 6
In the twentieth century, "Science" and "Culture" are often presented as a dichotomy. In this course we shall be examining that dichotomy, attempting to explode it by showing that science itself has a "culture" and that science is very much embedded in culture. We shall investigate disputes within sociology and philosophies of scientific method, debates around the public role of science, and the recent criticism of science and its place in society by the powerful critiques of feminism and post-modernism. A strong emphasis will be placed on case studies and seminar presentation.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: CTMP3000X/Y.06
FORMATS: Lecture | Tutorial

HSTC 3101 Human Experiments
CREDIT HOURS: 3
This course explores the history, method, and meaning of experimenting on humans through a series of case studies that question how these experiments mediate between experimenters, their subjects, and the state and how these relationships have influenced our ideas of scientific objectivity, autonomy and consent, race, gender, and class divides.
CROSSLISTED: CTMP 3204.03
EXCLUSIONS: HSTC 3615.03 and CTMP 3411.03 for the 2017/18 academic year only.
FORMATS: Lecture | Seminar | Discussion

HSTC 3120 Distilling Nature's Secrets: The Ancient Alchemists
CREDIT HOURS: 3
This course explores the scientific and esoteric currents which contributed to the rise of alchemy in the late Ancient World. This 'sacred science' of transmutation was a cultural synthesis of Greek natural philosophy, late pagan mysticism, and Near Eastern metallurgic technologies. The physical processes enacted in the alchemical laboratory -where metals were decomposed, purified and transformed - were experienced inwardly by the alchemist himself as a spiritual drama of death and resurrection, analogous to the rites of initiation in the mystery cults. Alchemy was thus a form of ritual technology, aimed simultaneously at the purification of self and cosmos. The texts studied in the course range from technical manuals preserved on papyrus, to the highly esoteric and visionary works of the Hermetic philosopher Zosimos (circa 300CE). The relation between these technical and occult dimensions will be of central concern.
CROSSLISTED: CLAS 3120.03
FORMATS: Lecture | Seminar

HSTC 3121 In Search of the Philosopher's Stone: The History of European Alchemy
CREDIT HOURS: 3
This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other.

FORMATS: Lecture | Seminar

HSTC 3130 The Origins of Chemistry: From Alchemy to Chemical Bonds
CREDIT HOURS: 3
This course explores the scientific and social development of modern chemistry from the work of alchemists to the chemical revolution of Lavoisier and Dalton from,

the beginnings of organic chemistry and biochemistry, to the development of the periodic table, and from our early notions of atom to those of chemical bonds. Note: There is no science pre-requisite for the course.
FORMATS: Lecture | Seminar

HSTC 3150 Nature and History
CREDIT HOURS: 3
In the nineteenth and twentieth centuries, the study of the natural world and historical thought have been closely linked. Participants in the seminar will read texts which helped to define ideas of history in the era after the Enlightenment and consider how these ideas influenced, and were influenced by, developments in scientific thought. The seminar will consider how nature and history are related in idealism, historical materialism and the thinking of the evolutionists, and how this connection is rejected by Nietzsche, Freud and Foucault.
CROSSLISTED: CTMP 3250.03
FORMATS: Seminar

HSTC 3200 Science and Religion: Historical Perspectives
CREDIT HOURS: 3
Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's *Timaeus*, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.
CROSSLISTED: EMSP 3330.03, HIST 3075.03, RELS 3200.03
FORMATS: Lecture | Seminar

HSTC 3201 Science and Religion: Contemporary Perspectives
CREDIT HOURS: 3
Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century "Scriptural geology" and the religious impact of Darwin's Origin of Species (1859), this course moves on to such contemporary topics as the religious interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction, extra-terrestrial life (including the SETI Project) and the quest for technoimmortality. Case studies of "conflict" emanating from Darwinism, the Scopes Trial, the on-going Creation-Evolution debates and the New Atheism are contrasted with examples of harmony and interdependence between science and religion in the careers of modern scientists, along with phenomena like the new Intelligent Design (ID) movement. The religious scope of the course is intentionally wide-ranging, and examinations of science-religion interaction within Native American, African and New Age spirituality are added to treatments of traditional eastern and western religion.
CROSSLISTED: CTMP 3201.03, RELS 3201.03, HIST 3076.03
FORMATS: Lecture | Seminar

HSTC 3202 Ecology and Religion
CREDIT HOURS: 3
This course examines the relationship between spirituality and the human encounter with the environment in history and today. Beginning with an examination of some of the ancient, Medieval and early modern religious foundations of ecology and the environmental movement, the course moves on to focus on contemporary green theology, the practice of religious environmentalism and the interaction between religious traditions and the environmental sciences and technologies. It engages with primary sources from and scholarship about Western (Abrahamic), Eastern (Dharmic) and indigenous religions, along with twenty-first-century green theology, religious environmentalism, ecofeminist perspectives and Dark Green Religion. Grounded in the history of science and technology, this course takes an interdisciplinary approach to its themes, incorporating historical, literary, theological, political, sociological and philosophical perspectives.
CROSSLISTED: RELS 3211.03
FORMATS: Seminar | Discussion

HSTC 3205 Knowledge is Power: Francis Bacon and the Birth of Modernity
CREDIT HOURS: 3
Francis Bacon (1561-1626) helped shape our modern assumptions that natural knowledge (science) will lead to both human flourishing and political power. By reading some of his works in their late Renaissance context we will reflect on the birth of those assumptions, thus gaining a new perspective on their modern form.
CROSSLISTED: EMSP 3340.03
FORMATS: Lecture | Seminar

HSTC 3212 The Biosphere: Global Perspectives in Science and Philosophy
CREDIT HOURS: 3
Intended for both science and humanities students interested in ecology, this course will focus on the historical, philosophical and methodological aspects of central concept of "biosphere" in order to provide a picture of the history and actual state of affairs in the study of global ecology. We will address both purely scientific and philosophical topics such as the holism vs. reductionism debate; the compatibility of the global approaches with the most influential version of contemporary Darwinism (STE); pre-Socratic precedents for the notion of biosphere; modelling nature in the modern global ecology and many others.
FORMATS: Lecture | Tutorial

HSTC 3250 Going Wild: Exploring the Animal Nature of Humans
CREDIT HOURS: 3
The major concentration of this course is the question of how and to what extent evolutionary sciences can explain the brilliance and insanity of the "moral animals" including the current course of the Western civilization. We will discuss the evolutionary foundations of romantic (!) love, suicide, sports, diets, and sexual self-identification.

EXCLUSIONS: HSTC 3615.03
FORMATS: Seminar

HSTC 3270 LEONARDO DA VINCI: BETWEEN ART AND SCIENCE
CREDIT HOURS: 3
Leonardo da Vinci (1452-1519) moved easily between the artistic, literary, and scientific circles of Renaissance Italy. Scholars, however, often treat his art and science as competing interests. In this course, students consider the relationship between art and science, imagination and knowledge, by exploring all aspects of Leonardo's career.
CROSSLISTED: EMSP 3270.03
EXCLUSIONS: EMSP3620.03 and HSTC3611.03 for the 2017/18 academic year only.
FORMATS: Lecture | Discussion

HSTC 3301 Macromolecules—The Rise of Molecular Biology
CREDIT HOURS: 3
Molecular biology is arguably as important as quantum theory. At the beginning of the 20th century molecular biology barely existed; by the end of the century it was part of everyday life. How did this happen? We will examine how we think about biological molecules, and why—and the implications for social policy going forward.
FORMATS: Lecture | Seminar | Discussion

HSTC 3310 Hidden Worlds: Microscopy in Early Modern Europe
CREDIT HOURS: 3
Microscopes were introduced into Europe at the beginning of the seventeenth century. In the words of Robert Hooke, the microscope opened up a "new visible World" to the understanding -- a strange new landscape populated by vast numbers of new creatures. This course will explore the influence the microscope, and the micro world that it opened up, in the development of early modern science. In the first part of the course, we will take a close look at early microscope technology and its evolution in the seventeenth, eighteenth, and early nineteenth centuries. The second part of the course will explore the role of the microscope in the evolution of early modern science. We will, for example, consider the role of microscopy in the emergence of the new mechanical philosophy and the new experimental science. We will also discuss the histories of some scientific theories (for example, of contagion and generation) that made particular use of observations made with microscopes. Finally, the microscope's revelation of "new worlds" raised conceptual difficulties that puzzled scientists and philosophers alike. In the final part of the course we will consider the challenges that new kinds of experience raised for early modern philosophy, as well as the possible influence of philosophical debates on the acceptance of the new technology.
CROSSLISTED: EMSP 3310.03
FORMATS: Lecture | Seminar

HSTC 3320 Oracles, Omens and Astrology in the Ancient World
CREDIT HOURS: 3
In all of the cultures of antiquity there were specialists who claimed knowledge of future events based on the reading of ominous "signs" in various media, earthly and heavenly. This course examines the history of divination and astrology in Mesopotamia, Egypt, Greece and Rome from a multidisciplinary perspective.
CROSSLISTED: CLAS 3320.03

HSTC 3331 History of the Marine Sciences
CREDIT HOURS: 3
This course, traces the history of marine sciences from the antiquity to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped the human understanding of the oceans.
CROSSLISTED: HIST 3073.03, BIOL 4664.03, MARI 4664.03, OCEA 4331.03/5331.03, SCIE 4001.03
FORMATS: Lecture

HSTC 3411 Feminism and Science
CREDIT HOURS: 3
Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.
CROSSLISTED: GWST 3215.03, CTMP 3215.03
FORMATS: Seminar

HSTC 3412 Hypatia's Daughters: Women in Science
CREDIT HOURS: 3
From Hypatia to Hildegard von Bingen, from Mary Somerville to Marie Curie, this course surveys the scientific contributions made throughout history by some of the most important women scientists and natural philosophers while examining how their respective social contexts shaped their philosophical and scientific practices.
CALENDAR NOTES: This course complements, but is distinct from EMSP 2310: Women and Gender in Early Modern Science, which focuses on the work of early modern women scientists, and from GWST 3215: *Feminism and Science*, which focuses on questions from feminist epistemology which will only be indirectly discussed in this course.
CROSSLISTED: GWST 3412.03
FORMATS: Lecture | Tutorial

HSTC 3415 Brewing Civilization: The History, Culture and Science of Beer
CREDIT HOURS: 3
Beer and the process of brewing stand at the origins and centre of the key developments of the "West", its cultural institutions and scientific developments. This lecture/seminar class will take a interdisciplinary approach to the study of the relation between brewing history, science and culture by focusing on primary texts along

with in-class reconstructions of particular experiments and activities associated with the history of brewing.
EXCLUSIONS: HSTC 3611.03 for the 2007/08 and 2013/14 academic years
FORMATS: Lecture

HSTC 3430 Experiments in the Mind: Thought Experiments in Physics
CREDIT HOURS: 3
Einstein's elevator, Schrodinger's cat, Maxwell's demon; the history of physics is full of these instructive fictions that are thought experiments. This course examines the historical contexts of many thought experiments in order to understand the different roles they have played in the conceptual development of physics from Antiquity to the present.
FORMATS: Lecture | Seminar | Discussion

HSTC 3501 The Nature of Time I
CREDIT HOURS: 3
This course will consider views of time beginning with Mesopotamian notions of narrative, Egyptian conceptions, and the encounter between linear and circular time in Judaic thought. The vision of Greece will be brought out through epic narration, in Pre-Socratic thought, in Greek historical texts. The course will treat some central texts, in Plato on the concept of time in the soul, in Aristotle, where time becomes the measure of motion, in the willed totality in Stoic and Epicurean thought, in Plotinus, where time is grounded in a pretemporal duration. The course will then take up the relation of this duration and time to revelation, creation and conversion in Medieval Christian, Islamic and Jewish thought.
FORMATS: Seminar

HSTC 3502 The Nature of Time II
CREDIT HOURS: 3
From the Renaissance notion of fortune to the possibility of time travel, this seminar examines the impacts our changing notions of time have had on philosophy, cultures, societies, religions, and science and technologies over the past 500 years.
FORMATS: Seminar

HSTC 3610 Studies in Ancient and Medieval Science
CREDIT HOURS: 3
Topics vary each year. Some of the topics are "Causation", "History of dissection", "Mesopotamian science", "Sciences and cultures in antiquity", "The mangle of praxis", "Ptolemy", "Ancient Method", "Embryology", "Posterior analytics", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.
CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.
CROSSLISTED: RELS 3610.03 (for the 2010/2011 academic year only)
FORMATS: Lecture | Discussion

HSTC 3611 Studies in Early Modern Science (1500-1800)
CREDIT HOURS: 3
Topics vary each year. Some of the topics are: "Science and Society", "Popularization of Science", "Science and Religion", "Technology and Scientific instruments", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.
CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.
FORMATS: Lecture | Discussion

HSTC 3615 Studies in Science and Nature in the Modern Period
CREDIT HOURS: 3
Topics vary each year. Some of the topics are: "The Century of the Gene", "Cybernetics", "Nazi Science", "The Political Economy of Science", etc. For descriptions of the current year's Studies topics, please contact the History of Science and Technology Program.
CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.
FORMATS: Lecture | Discussion

HSTC 4001 Science and Nature in the Modern Period
CREDIT HOURS: 3
This course examines the development of science in its social, philosophical, political, and cultural contexts from the end of the 18th century to the present. Topics will include the development of our contemporary notion of evidence, the debates over the “scientific method”, the “historicisation of nature,” the rise of “big” science, the acceptance of probabilistic accounts of the world, and the construction of human nature in modern biology. Emphasis will be on the physical and biological sciences.
EXCLUSIONS: HSTC 4000X/Y.06
FORMATS: Seminar

HSTC 4002 Science and Nature in the 20th and 21st Century
CREDIT HOURS: 3
From relativity to the human genome project, from the A-bomb to CRISPR, science has shaped our socio-political institutions, our environment, and our understanding of human nature. This course explores the conceptual debates that surrounded some of the major scientific developments of the last century and their long-lasting, global consequences.
PREREQUISITES: HSTC 4001.03 is recommended, but not required.
EXCLUSIONS: HSTC 4000X/Y.06

HSTC 4102 Topics in Ancient Natural Philosophy
CREDIT HOURS: 3
Through the close reading of one selected ancient work, this course seeks to explore fundamental problems in ancient natural philosophy, such as: How did the ancients see the validity of their approaches to the natural world? What sorts of phenomena were seen as "natural" in antiquity? What are the limitations to textual evidence for ancient science? How did theories about the natural world inform how the ancients saw their place in the Cosmos? How did ancient social values affect views of nature?
FORMATS: Seminar

HSTC 4120 Artefacts: The Material Culture of Science and Technology
CREDIT HOURS: 3
The history of science and technology is not just about ideas, it is also about things. Through the creation of their own exhibit, students will learn how to 'read' artefacts, discuss the current material culture literature, study artefact conservation, and explore the challenges faced by today's science museums.
FORMATS: Seminar

HSTC 4200 Philosophies of Technology: From Techne to Technology
CREDIT HOURS: 3
This half-year course will explore the history, structure and associated problems of our coming to be technological, beginning with an elaboration of the concept of "techne" in the ancients and its modification in the technical arts and instrumental reasoning of the Enlightenment and of 19th-century industrial ideology. Post-Enlightenment critiques polarized around the place of the machine and alienation in Karl Marx and the "question concerning technology" in Martin Heidegger will then be examined, leading up to an examination of the present state of technological discourse. In each case, we shall mark the importance of contextualising the debate by exploring the actual historical evolution of technology. Lectures will be devoted to presenting a social and historical background to the development of modern technologies whilst seminars will focus on the reading of primary texts in the field.
CROSSLISTED: CTMP 4200.03
FORMATS: Seminar

HSTC 4201 Contemporary Technologies: Living with Machines
CREDIT HOURS: 3
This half-year seminar will explore in detail the implications of powerful contemporary debates concerning the meaning and place of technology. What do we mean by technology? Can there be a philosophy of technology? What are the political and cultural ramifications of going technological? Topics will include: technological determinism in history, feminist critiques, technology and development, the meaning of expertise, technology, art and the "lifeworld", "social construction" versus "actor-network" theory, Donna Haraway's concept of cyborg culture and the "modern technological sublime". The course will be conducted in seminar format with particular emphasis placed on the elucidation of historical and contemporary case-studies. Whenever possible, guest lecturers from the "real world" of technology will be invited to participate in the class.
CROSSLISTED: CTMP 4201.03
FORMATS: Seminar

HSTC 4300 Nature and Romanticism
CREDIT HOURS: 3
Kant's "Copernican Revolution" in philosophy, ironically, marked a resurrection of a full-blown "idealist" philosophy of nature. This course will investigate the attempts of Kant's followers to construct a natural philosophy and its engagement with the rival mechanical world picture. It explores the implications of this endeavour for the growth of romanticism, vitalism and our modern picture of "nature". It begins with an examination of the ambiguous heritage presented by Kant's writings on nature and proceeds through the attempts to develop a complete program of idealist *Naturphilosophie* and its spread throughout European thought by the medium of romanticist art and natural philosophy.
CROSSLISTED: HIST 5004.03, EMSP 4300.03
FORMATS: Lecture | Tutorial

HSTC 4301 The History of Neuroscience.
CREDIT HOURS: 3
This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour, from the ancient world to the present. It will be of interest to honours students in History of Science and Technology, as well as honours and graduate students in Psychology and Neuroscience.
EXCLUSIONS: NESC 4587.03
FORMATS: Seminar

HSTC 4400 Newton and Newtonianism
CREDIT HOURS: 3
This seminar involves a close study of the work of Isaac Newton, along with that of his supporters and detractors. Beginning with an overview of pre-Newtonian science, topics range from Newton's rejection of Cartesianism through his contributions to mathematics, physics, astronomy and optics, along with his inductive scientific method, laws of motion and calculus priority dispute with Leibniz. Also considered are lesser-known aspects of his career, such as his secretive pursuit of alchemy, his heretical theology, his attempts to unravel the Apocalypse, his role in British statecraft and his autocratic rule of the Royal Society. A taxonomy of the forms of Newtonianism that emerged after Newton's death also allows an exploration of iconographical and apologetic uses of Newton, and his differing legacies in the Britain and France. This seminar concentrates on primary readings, including Newton's *Principia* (1687), *Opticks* (1704), alchemical treatises and unpublished theological papers, as well as the Leibniz-Clarke correspondence (1717), anti-Newtoniana and eighteenth-century popularizations of Newtonianism such as Voltaire's *Philosophical letters* (1733) and Maclaurin's *Account of Newton's discoveries* (1748). Attention is paid to the social, cultural and political aspects of Newtonianism and no prior knowledge of science is required.
CROSSLISTED: EMSP 4310.03
FORMATS: Seminar

HSTC 4500 Honours Seminar in the History of Science and Technology
CREDIT HOURS: 6
This honours seminar is specifically intended for students in the Combined Honours Degree in History of Science and Technology and will meet the requirements of the 21st credit.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

HSTC 4510 Independent Readings in History of Science and Technology
CREDIT HOURS: 3
Students are assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.
PREREQUISITES: Honours registration in History of Science and Technology Honours program, permission of instructor and Director of program. Students must complete 60 credit hours before registering in this course.

HSTC 4511 Independent Readings in History of Science and Technology
CREDIT HOURS: 3
Students are assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.
PREREQUISITES: Honours registration in the History of Science and Technology Honours program, permission of the instructor and the Director of the program. Students must complete 60 credit hours before registering in this course.

HSTC 4515 Independent Readings in History of Science and Technology
CREDIT HOURS: 6
Students are assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.
PREREQUISITES: Honours registration in the History of Science and Technology Honours program, permission of the instructor and the Director of the program. Students must complete 60 credit hours before registering in this course.

HSTC 4550 Honours Thesis in the History of Science and Technology
CREDIT HOURS: 6
In this course the student is assigned to a member of staff for regular meetings to discuss readings and present research for the purpose of completing an honours thesis in the History of Science and Technology. Successful completion of HSTC 4550X/Y.06 gives students both their 20th and 21st credit.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Honours registration in the History of Science and Technology, permission of the instructor and the Director of the program.

HSTC 4600 Disputes: Methodologies in the History of Science and Technology
CREDIT HOURS: 3
This course will introduce selected methodological topics within the secondary scholarship in the field of history of science, including a consideration of select topics within the philosophy of science as these bear on the practice of the history of science.
RESTRICTIONS: Students must be registered in honours History of Science and Technology. Permission of the instructor and the Director of the program is required.
FORMATS: Seminar | Discussion

HSTC 4650 Honours Thesis in the History of Science and Technology
CREDIT HOURS: 3
In this course the student is assigned to a member of staff for regular meetings to discuss readings and present research for the purpose of completing an honours thesis in the History of Science and Technology.
PREREQUISITES: Honours registration in the History of Science and Technology, permission of the instructor and the Director of the program.

Indigenous Studies

Introduction
Students can enhance their familiarity with Indigenous knowledge and knowledge of Indigenous issues with either a Minor or a Certificate option, or with elective courses. Students completing the Certificate or Minor will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues; learn about the history of the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada's Calls to Action; become familiar with (and be given the opportunity to deepen through an elective option) Indigenous models of research; and will have the opportunity to attain basic competencies around the protocols of working with Indigenous groups or in Indigenous communities.

Minor requirements

Certificate requirements

Staff

Coordinator
Lewis, D., BA (McMaster), MREM (Dalhousie)

Assistant Professor
Robinson, M., BA (St. Mary's), MA, PhD (Toronto)

Minor in Indigenous Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students are required to complete six credit hours of core courses:

- INDG 2050.03/CANA 2050.03/HIST 2205.03: Historical Issues in Indigenous Studies
- INDG 2052.03/CANA 2052.03/SOSA 2052.03: Contemporary Issues in Indigenous Studies

Select 12 credit hours from the following list:

Faculty of Arts and Social Sciences

- INDG 3002.03/CANA 3002.03: Topics in Indigenous Studies
- INDG 3400.03/CANA 3400.03: Contemporary Indigenous Art
- INDG 3401.03/CANA 3401.03: Indigenous Representation in Film
- INDG 3050.03/CANA 3050.03: Indigenous Research Methodology and Knowledge Practices
- HIST 2207.03/CANA 2207.03: Indigenous Peoples and Empires – Canada's Origins to 1763
- HIST 3210.03: Canadian Cultural Landscapes
- MUSC 2022 X/Y.06: The Art and Science of Drumming
- PHIL 4700.03: Philosophy of Race
- POLI 2215.03: Canadian Aboriginal Politics: An Institutional Perspective
- SOSA 2111.03/CANA 2111.03: Is There an Atlantic Canada?
- SOSA 3002.03: Native Peoples of Canada
- INDG 3052.03/SOSA 3052.03/CANA 3052.03: Indigenous Social, Health, and Environmental Issues
- SOSA 3185.03/CANA 3185.03: Issues in the Study of Indigenous Peoples of North America
- INDG 4000.03: Seminar in Indigenous Studies

Faculty of Health

- IPHE 2201.03: Introduction to Aboriginal Peoples' Health and Healing
- HPRO 3360.03: Multicultural Health Promotion Research and Strategy
- NURS 4330.03: Community-based Participatory Research with Indigenous Populations

Faculty of Management

- MGMT 2805: Indigenous Governance

Other Faculty of Arts and Social Sciences Courses To Be Included at the Discretion of the Coordinator and Instructor *

- PHIL 2450.03: Democracy, Difference and Citizenship
- SOSA 3190.03: Social Movements
- SOSA 3183.03: Special Topics
- SOSA 3206.03: Ethnicity, Nationalism, and Race
- SOSA 4012.03: Issues in Sociology and Social Anthropology
- SOSA 4005.03: Issues in Social Justice and Inequality
- SOSA 4006.03: Issues in Critical Health Studies

[*These courses are offered regularly, but depending on the instructor in any given year, may or may not have sufficient amounts of content relevant to Indigenous Studies to be counted toward the minor.]

Courses at NSCAD, MSVU and SMU that can be taken on a letter of permission and counted toward the minor, at the discretion of the coordinator.

NSCAD

- AHIS 2505.03: Survey of Indigenous Art
- AHIS 3460.03: Contemporary Indigenous Art
- AHIS 3463.03: Exhibiting Indigenous Art
- AHIS 4119.03: Indigenous Self/Representation

MSVU

- HIST 3304.03: Gender and Aboriginal Peoples in Canada

SMU

- HIST/SOCI 4570: Indigenous Politics and Settler Colonialism
- SMU ACS 2345: First Nations of the Atlantic Region
- ACST 2849: Introduction to the Mi'kmaq Language

Contact Sociology and Social Anthropology for more information.

Certificate in Indigenous Studies
This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

The Certificate in Indigenous Studies is a 9 credit hour certificate with two core 3 credit hour courses and a choice of one of three 3 credit hour courses.

Requirements:

- CANA 2050/HIST 2205: Historical Issues in Indigenous Studies
- CANA 2052/SOSA 2052: Contemporary Issues in Indigenous Studies
- Plus one of the following three courses:
    - CANA 3050: Indigenous Research Methodology & Knowledge Practices
    - CANA 3052/SOSA 3052: Indigenous Social, Health, and Environmental Issues
    - IPHE 2201: Introduction to Aboriginal Peoples' Health and Healing

Students will be able to count credit earned in these courses toward their undergraduate major, minor, or distribution requirements, unless otherwise specified in their program's regulations.

Learning Outcomes:

- Students will become familiar with Indigenous perspectives on historical and contemporary political, social, and economic issues.
- Students will learn about the history of the Indian Residential School system and the implications of the Truth and Reconciliation Commission of Canada's Calls to Action.
- Students will become familiar with (and be given the opportunity to deepen through an elective option) Indigenous models of research.
- Students will attain basic competencies around the protocols of working with Indigenous groups or in Indigenous communities.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

INDG 2050 Historical Issues in Indigenous Studies
CREDIT HOURS: 3
This course is an interdisciplinary introduction to the history of encounters and relationships between indigenous peoples and European settlers in Canada. Topics may

include treatise, colonial policy, residential schools, child welfare, resettlement, and the Indian Act. This course provides the necessary background to understand contemporary Indigenous issues.
CROSSLISTED: HIST 2205.03; CANA 2050.03

INDG 2052 Contemporary Issues in Indigenous Studies
CREDIT HOURS: 3
This course offers an interdisciplinary introduction to contemporary challenges faced by Indigenous peoples in Canada. Topics may include language and culture, land rights, economics, governance and treaty relationships, child welfare and education, health, social services, environmental issues, violence, criminal justice and self-determination, political mobilization and resistance, and decolonization.
PREREQUISITES: Recommended: CANA 2050.03 or HIST 2205.03
CROSSLISTED: SOSA 2052.03
FORMATS: Lecture | Discussion

INDG 2900 Conversational Mi'kmaq for Non-speakers: Level I
CREDIT HOURS: 3
Conversational Mi'kmaq for Non-speakers: Level I is designed for students who have no previous knowledge of the Mi'kmaw language. At the end of this course, students should have acquired conversational Mi'kmaw language skills related to everyday expressions and introductions. The focus of this course is on basic comprehension of simple Mi'kmaw phrases and some beginning speaking skills.
CALENDAR NOTES: This course is offered by Cape Breton University and taught via video-conferencing facilities.
FORMATS: Lecture

INDG 3002 Topics in Indigenous Studies
CREDIT HOURS: 3
This course will explore significant themes in Indigenous Studies in Canada. As the particular topics to be discussed will vary from year to year, students are advised to consult with the home department for information.
PREREQUISITES: CANA 2050 or CANA 2052
CROSSLISTED: CANA 3002.03
FORMATS: Lecture | Seminar | Discussion

INDG 3050 Indigenous Research Methodology & Knowledge Practices
CREDIT HOURS: 3
This course examines the methods and practices used for research with Indigenous groups or communities, and explores their ethical and political aspects. Topics will cover the history of research relationships with Indigenous groups or communities, community-based research approaches, research ethics, the political, cultural, and practical aspects of conducting research with groups or communities, research protocols, research agreements, data collection and analysis, and the OCAP (ownership, control, access, and possession) principle.
PREREQUISITES: CANA 2050.03/HIST 2205.03 or CANA 2052.03/SOSA 2052.03 or permission of instructor
CROSSLISTED: CANA 3050.03
FORMATS: Lecture | Discussion

INDG 3052 Indigenous Social Health and Environmental Issues
CREDIT HOURS: 3
This course offers an interdisciplinary overview of contemporary social, health, and environmental issues impacting Canada's Indigenous Peoples. Topics will include an exploration of the human rights of Indigenous Peoples in Canada, social statistics, food security in northern communities, health and well-being in Indigenous communities, connection to place, impact of environmental degradation and land dispossession, Indigenous knowledge and the environment, politics and political activism, and the role of media.
PREREQUISITES: A previous course in Indigenous Studies is recommended, eg. INDG 2050.03, CANA 2050.03, HIST 2205.03, INDG 2052.03, CANA 2052.03 or SOSA 2052.03
CROSSLISTED: SOSA 3052.03; CANA 3052.03
FORMATS: Lecture

INDG 3400 Contemporary Indigenous Art
CREDIT HOURS: 3
This course examines a range of contemporary artistic expression by Indigenous people of Canada and the United States. Works examined will include painting, sculpture, hip hop, textile, and video. Focus will be on how Indigenous artists respond to contemporary issues of identity, politics, and culture.
CROSSLISTED: CANA 3400
EXCLUSIONS: CANA 3001.03
FORMATS: Lecture

INDG 3401 Indigenous Representation in Film
CREDIT HOURS: 3
This course offers an overview of issues shaping the portrayal of Indigenous peoples in film. Focus will be on developing a critical understanding of Indigenous representation in political and cultural context. Films examined will span the silent to contemporary film era, and will include Indigenous cinema. Some of the videos included in this syllabus will contain sexual, violent, racist, sexist, and otherwise disturbing content.
CROSSLISTED: CANA 3401
EXCLUSIONS: CANA 3002.03, FILM 3401.03
FORMATS: Lecture

INDG 4000 Seminar in Indigenous Studies
CREDIT HOURS: 3
This course will explore in depth a single issue, topic or theme in Indigenous Studies that crosses disciplinary borders. Topics will vary from year to year; please consult

the online timetable listing or the Coordinator of the Indigenous Studies minor for details.
FORMATS: Seminar

International Development Studies

Email: IDS@dal.ca

Introduction
International Development Studies is an interdisciplinary program involving the study of poverty, inequality, social change and justice in a global context. The IDS program is structured around two broad axes: development theory/practice, and the global/local. Areas of teaching expertise among the core faculty in IDS include development theory, gender, activism, culture, human security, rural development, migration, health, Indigenous peoples, participatory development and global citizenship. Additional areas of expertise are drawn from over 40 cross-appointed and adjunct faculty members who teach IDS approved courses and/or supervise our honours thesis and graduate students.

The department's areas of expertise include many of the key regions of the developing world, particularly Africa, Asia, Latin America and the Caribbean. We take a broad view of development - including development issues within Canada as well as the global South.

We offer a diverse set of opportunities for students to participate in experiential learning in both Canadian and international contexts. Experiential learning enables students to focus on skills development in a range of areas: language development, research, writing, managerial, etc. Through our experiential learning opportunities, students can volunteer or intern in Halifax, East Africa, Cuba, and many other locations. Students are encouraged to draw upon international development experiences from overseas linkage programs through Dalhousie and local Halifax community organizations.

The IDS program offers a study abroad option in Cuba (Winter) with FLACSO (Facultad Latino Americana de Ciencias Sociales Program Cuba) in the University of Havana as well as an intensive spring program in Cuba.

As an interdisciplinary program, IDS recommends students consider combined degree programs. Students are therefore encouraged to enter the combined honours, double major or minor programs, which provide opportunities that further integrate their IDS studies with those of an approved arts or science field, e.g. IDS and History, IDS and Biology. Double majors and combined honours degrees provide additional opportunities for students to pursue graduate studies in more than one area.

Students with backgrounds in sciences are also welcome in this program as topics in international development cut across all disciplines from anthropology to animal science.

The interdisciplinary nature of the program requires that students take a number of credits outside the IDS department as IDS approved courses in other departments. The first year of study at Dalhousie is dedicated to completing first year requirements. IDS students are encouraged to take a broad range of disciplines in their first year to prepare them for the interdisciplinary format of the program. First year students are encouraged to participate in numerous student-led organizations related to International Development. Other events and activities are advertised on the IDS website and information can be obtained from the IDS office.

Students are encouraged to acquire competence in a relevant language in addition to English (e.g. Arabic, French, Spanish) and Economics. Research design and basic statistics courses (e.g. POLI 3492/POLI 3493 or SOSA 3402/SOSA 3403) are also be useful skills to acquire throughout the IDS degree.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements for College of Arts and Science.

The IDS Department offers the following undergraduate degree options:

IDS as the second subject of study

1. Minor in IDS (18 IDS credit hours required)
2. Double Major with IDS as the second subject (30 IDS credit hours required)
3. Combined Honours with IDS as the second subject (30 IDS credit hours required)

IDS as the primary subject of study

1. BA (90 credit hours) Minor in IDS (18 IDS credit hours required)
2. BA (120 credit hours) Double Major in IDS as the primary subject (30 IDS credit hours required)
3. BA (120 credit hours) Major in IDS (36 IDS credit hours required)
    1. BA (120 credit hours) Combined Honours in IDS + a second subject: Thesis stream (42 IDS credit hours required)
    2. BA (120 credit hours) Combined Honours in IDS + a second subject: Coursework stream (42 IDS credit hours required)
    3. BA (120 credit hours) Concentrated Honours in IDS: Thesis stream - (54 IDS credit hours required)
    4. BA (120 credit hours) Concentrated Honours in IDS: Coursework stream - (54 IDS credit hours required)

First Year Recommended Courses
To enter any of the IDS undergraduate degree programs, students should have completed 30 credit hours and are strongly recommended to fulfill the first year requirements outlined in the Degree Requirement section of this calendar. Students who intend to pursue degrees in IDS are encouraged to take first year courses that will both fulfill their first year requirements and contribute to their broad understanding of international development issues. Students are highly encouraged to take INTD 1102.03/CANA 1102.03 (Halifax and the World) INTD 1103.03/CANA 1103.03, which can be used to satisfy either the first year social science or humanities requirement. Students who are considering a double major or combined honours program in IDS and another discipline are also encouraged to take any pre-requisite courses for upper level courses in the other discipline. The following courses provide background to key issues or basic skills related to International Development Studies, but are not pre-requisites for upper level IDS courses:

Social Science Requirement: INTD 1102/CANA 1102, INTD 1103/CANA 1103, ECON 1101/ECON 1102; GWST 1010/GWST 1015; HIST 1501/HIST 1502, HIST 1701/HIST 1702; POLI 1010, POLI 1015, POLI 1050, POLI 1055, POLI 1103, POLI 1100; SOSA 1002, SOSA 1003, SOSA 1050, SOSA 1100, SOSA 1200; King's FYP.

Humanities Requirement: INTD 1102/CANA 1102, INTD 1103/CANA 1103, HIST 1501/HIST 1502, HIST 1701/HIST 1702; GWST 1010/GWST 1015; RELS 1001/RELS 1002; PHIL 1000; ENGL 1000, ENGL 1040, ENGL 1041; RUSN 1020/RUSN 1070; King's FYP.

Physical Science Requirement: SUST 1000, SUST 1001; ECON 1101/ECON 1102; ENVS 1000; ERTH 1060; PSYO 1021, PSYO 1022.

Language Requirement: French, Spanish, Arabic, Chinese, Italian, Russian.

Writing Requirement: HIST 1005; POLI 1103; SOSA 1050; SUST 1000; PHIL 1010; ENGL 1010, ENGL 1020, ENGL 1040, ENGL 1045, ENGL 1050, ENGL 1100; King's FYP.

IDS Honours Program
The IDS Honours program is designed for students with a demonstrated aptitude for advanced study in the field.

- Admission to the IDS Honours program is based on academic performance and, in the case of the thesis stream, a thesis proposal. Applicants normally should have achieved an overall Grade Point Average (GPA) of at least 3.30 (B+) or better and a minimum B+/A- in all IDS and IDS-approved courses to be considered for admission. In the case of a combined degree, these same requirements must be met in the second major subject
- The deadline for Departmental Honours Applications is January 31 of a student's third year of study. Consult the IDS Department website dal.ca/ids for information on how to apply to the honours program.

BA (120 credit hour) Double Major in IDS and a second subject

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours of INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021.03, INTD 4012.03.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above, at least six of which need to be taken from departments other than IDS (see list of IDS approved courses).
- 12 credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 36 and a maximum of 48 credit hours in IDS are required. A minimum of 60 and a maximum of 84 credit hours at the 2000 level or above are required in the two major fields, with at least 18 credit hours at the 3000 level or above.

Double Major - IDS as the second subject

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03:Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level: that is, any INTD course at the 3000 or 4000 level, excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above (See list of IDS approved courses).
- Six credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 30 and a maximum of 42 credit hours in IDS are required.

BA (120 credit hour) Major in International Development Studies

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021,INTD 4012.
- 12 credit hours of IDS and/or IDS-approved courses at the 2000-level or above, at least of which must be taken from departments other than IDS. (See list of IDS approved courses).
- 12 credit hours of IDS and/or IDS-approved courses at the 3000 level or above.

In total, a minimum of 36 and a maximum of 54 credit hours in IDS are required.

BA (120 credit hour) Combined Honours in IDS and a second subject

Thesis Stream

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- INTD 4021.03 Fall Honours Thesis Course A, INTD 4012.03 Winter Honours Thesis Course B
- At least three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012
- 18 credit hours of INTD and/or IDS courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- Six credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 42 and a maximum of 48 credit hours in IDS are required, with at least 18 credit hours at the 3000 level or above.

Coursework Stream

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03:Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD courses at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012.
- Six credit hours of 4000-level INTD seminar courses.
- 18 credit hours of INTD and/or IDS courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- Six credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of 42 and a maximum of 48 credit hours in IDS are required, with at least 18 credit hours at the 3000 level or above.

Combined Honours with IDS as the second subject

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012.
- 12 credit hours of INTD and/or IDS approved courses at the 2000 level or above. At least six credit hours of IDS approved courses must be taken from departments other than IDS (see list of IDS approved courses).
- 6 credit hours of INTD and/or IDS approved courses at the 3000 level or above.

In total, 30 credit hours in IDS are required.

BA with Concentrated Honours in International Development Studies

Thesis Stream

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development II
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent

- INTD 4021.03: Fall Honours Thesis Course A, INTD 4012.03 Winter Honours Thesis Course B
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012.
- 18 credit hours of INTD and/or IDS-approved courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- 18 credit hours of INTD and/or IDS approved courses at the 3000 level or above. (See list of IDS-approved courses).

In total, a minimum of 54 and a maximum of 66 IDS credit hours are required.

Coursework Stream

Advanced Courses Required:

- INTD 2001.03 Introduction to Development I, INTD 2002.03: Introduction to Development
- INTD 3002.03: Development Practice or INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent
- Three credit hours INTD with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4021, INTD 4012.
- Six credit hours 4000 level INTD seminar courses.
- 18 credit hours of INTD and/or IDS-approved courses at the 2000 level or above. Students must take at least six credit hours of IDS approved courses from departments other than IDS.
- 18 credit hours of INTD and/or IDS approved courses at the 3000 level or above. (See list of IDS-approved courses in Section IV).

In total, a minimum of 54 and a maximum of 66 IDS credit hours are required.

BA (90 credit hour) Minor in IDS

See the Minor in International Development Studies section of this Calendar

Conversions

Students who have completed a 90 credit hour degree can upgrade to a 120 credit hour major or double major degree. Students who have completed a Major in IDS can upgrade to an honours degree (pending acceptance to the IDS honours program). The requirements for conversions are as follows:

BA Major Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 90 credit hour minor to a 120 credit hour Major degree may enter this program. Students must complete the full set of 120 credit hour Major requirements, usually by taking 30 additional credit hours.

BA Honours Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 90 credit hour minor or a 120 credit hour major or double major degree to a 120 credit hour Honours degree may enter this program if they meet the conditions for admission to the Honours program. Students must complete the full set of Honours requirements. Students interested in this program should consult the Undergraduate Advisor.

IDS Approved Courses from Other Departments

NOTE: Some courses are not offered every year so please consult the current timetable, in addition to the calendar, when registering.

Arabic

ARBC 2100.03: A Cultural Introduction to the Arab World.

Arts & Social Sciences

ASSC 3150.03: Intercultural Communication

Canadian Studies

- CANA 2050.03: Historical Issues in Indigenous Studies
- CANA 2052.03: Contemporary Issues in Indigenous Studies
- CANA 3050.03: Indigneous Research Methodology & Knowledge Process
- CANA 3052.03: Indigenous Research Methodology & Knowlege Practices
- CANA 3400.03: Contemporary Indigenous Art
- CANA 3401.03: Indigenous Representation in Film

Contemporary Studies

- CTMP 2115.03: Conception of Race in Philosophy, Literature and Art
- CTMP 2322.03: The Experience of Others in Philosophy, History and Literature
- CTMP 3103.03: Critiques of Modernity

- CTMP 3130.03: The Thought of Michel Foucault
- CTMP 3311.03: Culture, Politics and the Post Colonial Condition
- CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought.

Biology

The importance of an understanding of biology for informed contribution to sustainable development cannot be over-emphasized.

- BIOL 3065.03: Conservation Biology
- BIOL 3226.03: Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4160.03: Political Ecology

Economics

A grasp of economic frameworks whereby societies allocate resources (human resources and capital) is a prerequisite for understanding development plans and national prospects, development projects and foreign aid, and the constraints and possibilities for sustainable development.

- ECON 2213.03: Emerging Giants: The Economic rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 2334.03: Globalization and Economic Development: Current Debates
- ECON 2336.03: Regional Development
- ECON 2850.06: The Science and Economics of climate Change
- ECON 3310.03: Economic Growth in Historical Perspective
- ECON 3317.03: Poverty & Inequality
- ECON 3330.03: International Trade
- ECON 3331.03: International Finance
- ECON 3332.03: Resource Economics
- ECON 3333.03: Theories of Economic Development
- ECON 3335.03: Environmental Economics
- ECON 3349.03: History of Economic Thought
- ECON 4317.03: Poverty and Inequality
- ECON 4360.03: Ethics, Justice and Economics

English, French and Spanish

Language skills are obviously important for effective communication for those wishing to pursue international development studies; but through the study of languages and literature, important insights about culture and development experience are also to be gleaned. The IDS program encourages students minimally to study one additional (relevant) language to English.

English

- ENGL 2005.03: World Literature
- ENGL 2090.03: Literature, Multiculturalism, and Identity
- ENGL 3086.03: Post-Colonial Literatures
- ENGL 3087.03/CHIN 3080.03: Literature of the Asian Diaspora: Language and Identity in Asian North American Literature.

French

- FREN 3125.03: Le Monde francophone/The French-Speaking World
- FREN 3150.03: Aspects de la francophonie/Aspects of the Francophone World
- FREN 3175.03: Topical Issues in Francophone/Thémes de la francophonie

Please note: Some courses in the French Department's Dijon Study Abroad Program are likely to be eligible for IDS credit. Consult the undergraduate advisor to determine eligibility.

Spanish

- SPAN 2069.03: Central America to 1979 From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America since 1979: The Search for Stability

- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuban Revolution 1961 - the Present
- SPAN 2130.03: Latin American Dictators: From Fact to Fiction
- SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century
- SPAN 3408.03: The Cuban Development Model

Students are able to receive either INTD or SPAN credits.

- SPAN 3301.03/SPAN 3302.03/SPAN 3303.03/SPAN 3304.03/SPAN 3306.06: The Cuba Program at FLACSO (Facultad Latino Americána de Ciencias Sociales Programma Cuba), The University of Havana

Students are able to receive either INTD or SPAN credits.

- SPAN 3310.06: Cuban Culture & Society
- SPAN 3408.03: The Cuban Development Model

Environmental Studies

Most environmental scientists have primary expertise in a particular discipline and work cooperatively with specialists from other disciplines to solve environmental problems. Dalhousie now offers a minor in both environmental studies and science. However, current programs that also provide courses emphasizing environmental subjects include Earth Science (geology and hydrogeology), marine biology and POLI 3585.03.

- ENVS 3220.03: International Environmental law for Scientistss
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory.
- ENVS 4001.03: Environmental Impact Assessment
- ERTH 2410.03: Environmental & Resource Management
- ERTH 3410.03: Enhanced Environmental Geology
- GEOG 2070.03: Area Studies on Mexico and Central America
- GEOG 2201.03: Intro to Development Studies
- GEOG 2202.03: Intro to Development Studies II
- GEOG 2206.03: Africa: An Introduction
- GEOG 2800.03: Climate Change
- GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies
- PHIL 2480.03: Environmental Ethics
- PHIL 2485.03: Technology and the Environment
- POLI 3585.03: Politics of the Environment

Gender and Women's Studies

It is important to recognize the implications of gender issues and to be sensitive to how these are viewed in different cultural circumstances. Hence, students are strongly encouraged to participate in at least one of the following GWST courses.

- GWST 2800X/Y.06: Comparative Perspectives on Gender
- GWST 3006.03: Comparative Perspectives on Gender and Work
- GWST 3168.03: Issues in Latin American Society
- GWST 3426.03: Sex and the State
- GWST 3503.03: Human Rights Foundations
- GWST 3600.03: Sexualization of Western Political Thought
- GWST 4116.03: Contemporary Issues in Gender and Development
- GWST 4211.03: Gender and Development Theory, Concepts, and Methods

History

Just as people need to know who they are and how they arrived there, groups, races, courses, states and nations need a sense of their own past as part of their culture and to guide their future development choices.

- HIST 2006.03: The Atlantic World, 1450-1650: European Colonization of the Americas
- HIST 2007.03: The Atlantic World, 1650-1800: European Empires in the Americas
- HIST 2021.03: Soviet Russia
- HIST 2205.03: Historical Issues in Indigenous Studies
- HIST 2381.03: Latin America

- HIST 2382.03: Central America to 1979
- HIST 2383.03: Area Studies on Mexico and Central America
- HIST 2384.03: Cuba from Colonial Times to 1961
- HIST 2385.03: Cuban Revolution, 1961 - Present
- HIST 2386.03: Colonial Latin America
- HIST 2387.03: Latin America since Independence
- HIST 2388.03: Latin American Dictators in the Novel
- HIST 2392.03: Introduction to Caribbean History (1540 to present)
- HIST 2425.03: Africa Before 1900
- HIST 2426.03: Africa Since 1900
- HIST 2502.03: The Ottoman Empire and Its Legacy in the Middle East, 1750-1923.
- HIST 2503.03: Medieval Islamic Civilization
- HIST 2504.03: Modern History of Turkey, Iran, Israel, and Arab-Speaking Lands
- HIST 2505.03: Turbans and Berets: A Modern History of Iraq
- HIST 2510.03: Modern History of South Asia
- HIST 2711.03: Struggles that Shaped the Modern World: 1600 - 1900
- HIST 2712.03: Freedom Fighters or Terrorists?
- HIST 3091.03: Russian Society
- HIST 3092.03: Russian Topics
- HIST 3390.03: Latin America: Revolution and Repression.
- HIST 3393.03: Indigenous Movements in Latin America
- HIST 3430.03: The Making of Colonial Africa, c. 1850-1930
- HIST 3431.03: Struggles in the City: Labour, Migration and Urban Live in Colonial Africa.
- HIST 3435.03: The Rise and Fall of African Slavery
- HIST 3451.03: Southern Africa to 1860
- HIST 3452.03: Southern Africa since 1860
- HIST 3470.03: Wars and Revolutions in Nineteenth Century Africa
- HIST 3471.03: Wars and Revolution in Twentieth Century Africa
- HIST 3500.03: Topics in Global History
- HIST 3509.03: Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200
- HIST 3510.03: Sultans and Shahs: Politics and Religion in the Islamic Gunpowder Age (1500-1800)
- HIST 3511.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3513.03: From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa.
- HIST 3515.03: Food for Thought: History and the Culinary Cultures of the Islamic World
- HIST 4300.03: Topics in Latin American History
- HIST 4400.03: Topics in African History
- HIST 4401.03: State Violence Communal Conflict and Criminology in Modern South Africa
- HIST 4404.03: Crime and Punishment in Modern Africa
- HIST 4475.03: African Intellectuals and the Modern Experience
- HIST 4510.03: Topics in Islamic and Middle East History.
- HIST 4545.03: Scripture and Strategy: History of Islamic Political Thought
- HIST 4550.03: Orientalism and Occidentalism
- HIST 4555.03: A dream Palace or a Bitter Reality Arab Intellectuals and their ideologies in the Modern Period
- HIST 4614.03: Sex, Conquest, and Power, Sex and Gender in Latin America - 1492 to the Present

Indigenous Studies

- INDG 2050.03: Historical Issues in Indigenous Studies
- INDG 2052.03: Contemporary Issues in Indigenous Studies
- INDG 3050.03: Indigenous Research Methodology & Knowledge Process
- INDG 3052.03: Indigenous Research Methodology & Knowledge Practices
- INDG 3400.03: Contemporary Indigenous Art
- INDG 3401.03: Indigenous Representation in Film

Philosophy

Issues in International Development are fundamentally concerned with principles of ethics and justice. Philosophy provides students with the necessary foundation to think about these principles and apply them to international issues in an informed way.

- PHIL 2081.03: Ethics in the World of Business
- PHIL 2160.03: Philosophical Issues of Feminism
- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2480.03: Environmental Ethics
- PHIL 2485.03: Technology and the Environment
- PHIL 3470.03: Human Rights: Philosophical Issues
- PHIL 3476.03: Liberalism and Global Justice
- PHIL 4700.03: Philosophy of Race

Political Science

Political Science is critical for individuals who want to know more about the values, laws, institutions and policy mechanisms that govern their lives in society, and, as well, the differences between their systems of government and those in other countries.

- POLI 2215.03: Canadian Aboriginal Politics: An Institutional Perspective
- POLI 2301.03: Comparative Politics I: Developed Democracies Under Pressure
- POLI 2302.03: Comparative Politics II: Developing World
- POLI 2350.03: Governance and Globalization
- POLI 2520.03: World Politics
- POLI 2530.03: Foreign Policy in Theory and Practice
- POLI 3311.03: Sport and Politics
- POLI 3315.03: African Politics
- POLI 3350.03: Governance and Globalization
- POLI 3360.03: Politics in Latin America
- POLI 3365.03: Politics of The Middle East
- POLI 3385.03: Politics of the Environment
- POLI 3426.03: Sex and the State
- POLI 3427.03: Sexualization and Western Political Thought
- POLI 3505.03: Human Rights Foundations
- POLI 3520.03: Building Democracy and Peace
- POLI 3525.03: Comparative Foreign Policy Simulation
- POLI 3531.03: The UN in World Politics
- POLI 3532.03: Model UN
- POLI 3535.03: The New International Division of Labour
- POLI 3540.03: Foreign Policies in the Third World
- POLI 3544.03: Political Economy of Southern Africa
- POLI 3560.03: Human Development/Security at the Start of the 21st Century
- POLI 3567.03: International Organizations
- POLI 3568.03: Canada and the World
- POLI 3581.03: Diplomacy and Negotiation
- POLI 3585.03: Politics of the Environment
- POLI 3587.03: International Political Economy
- POLI 3596.03: Explaining Global Conflict and Violence
- POLI 4302.03: Comparative Development Administration
- POLI 4303.03: Human Rights Political Issues
- POLI 4340.03: Aproaches to Development
- POLI 4355.03: Comparative Perspectives on the Development State
- POLI 4380.03: Politics of Climate Change
- POLI 4403.03: Human Rights: Philosophical Issues
- POLI 4569.03: Canadian Foreign Policy
- POLI 4481.03: Theories of Violence, Persecution, Genocide
- POLI 4587.03: International Political Economy
- POLI 4636.03: Nationalism and Statecraft

Religious Studies

Understanding religion and its influences on human behaviour involves grasping both the meaning of faith in the lives of participants and the critical analysis of outside observers. It has important implications for international cultures and development questions.

- RELS 2001.03: Judaism
- RELS 2003.03: Islam

Russian

Russia and the Soviet Union have been important players on the world stage for many centuries. The history and current situation of this region has had profound importance for the development of both Europe and Asia, as well as the developing regions. The study of this region is increasingly important to development theory, practice and planning.

- RUSN 2023.03: Soviet Russia
- RUSN 2046.03: East European Cinema: War, Love, Revolutions
- RUSN 2081.03: Contemporary Russian Culture - The Seven Deadly Sins

Sociology and Social Anthropology

Sociology provides a context within which students learn to think critically about their social environment. Social Anthropology aims at generalizations by comparing structures and processes in major institutions within societies (kinship, political, economic and religious) as well as between societies.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Groupings

A. Core Courses

INTD 2001.03: Introduction to Development I
INTD 2002.03: Introduction to Development II
INTD 3002.03: Development Practice
INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent

B. Additional IDS Courses

INTD 1102.03: Halifax and the World, Part I
INTD 1103.03: Halifax and the World, Part II
INTD 2045.03: Indian Society: Change and Continuity
INTD 2106.03: Africa: An Introduction
INTD 3000.03: Seminar in Development Studies
INTD 3001.03: Contemporary Debates in Development
INTD 3010.03: Seminar in Development Studies
INTD 3012.03: Sustainability, Development, Economy
INTD 3101.03/INTD 3102.03/INTD 3202X/Y.06: Special Topics in International Development Studies
INTD 3104.03: Seminar in Development Studies
INTD 3106.03: Seminar in Development Studies

INTD 3107X/Y.06: Experiential Learning: Canada
INTD 3109.03: Experiential Learning: Abroad
INTD 3110.03: Migration and Development
INTD 3111.03: Popular Culture and Development
INTD 3114.03: Environment and Development
INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
INTD 3116.03: Contemporary Issues in Gender and Development
INTD 3125.03: The French-Speaking World
INTD 3150.03: Aspects de la francophonie/Aspects of the Francophone World
INTD 3401.03: Seminar in Development Studies
INTD 3406.03: Seminar in Development Studies
INTD 3408.03: The Cuban Development Model

C. The Cuba Semester Program - Offered in the Winter Semester only in Cuba

Students are able to receive either INTD or SPAN credits.

INTD 3301.03: Spanish Language and Grammar: The Cuban Dialect (cross-listing any advanced Spanish language course. Please contact the Department of Spanish & Latin American Studies for more information)
INTD 3302.03: Social Development in Cuba
INTD 3303.03: The Political Economy of Cuba
INTD 3304.03: Sustainable Development in Cuba
INTD 3306.06: Field Research Practicum
INTD 3310.06: Cuban Culture and Society
INTD 4001.03/INTD 4002.03/INTD 4003.06: Special Topics in International Development Studies
INTD 4004.03: Topics in Cuban Development
INTD 4006.03: Global Poverty and Human Rights:From Development to Global Citizenship
INTD 4011.03: Advanced Seminar in Development Theory
INTD 4013.03: Environmental Conflict and Security
INTD 4022.03: Advanced Seminar in Development Theory
INTD 4100.06: Special Topics in IDS
INTD 4211.03: Gender and Development: Theory, Concepts and Methods

Course Descriptions

INTD 1102 Halifax and the World: Part I
CREDIT HOURS: 3
This course offers an introduction to both International Development Studies and Canadian Studies by exploring the connections between important global issues and your daily life as a student in Halifax. As you walk across the Dalhousie campus and go about daily life in Halifax, your actions connect you to people around the globe and to the history of the city and world as well as to the many works of literature, art and music that depict these connections. Here are just a few examples of connections that we will explore in Halifax and the World: Part I (INTD / CANA 1102.03 – Fall semester): Walking across the Dalhousie campus you are traversing what remains unceded Mi'kmaq territory raising hard questions about relations between Settler and First Nations Peoples. While walking downtown on a Friday night you might tread in the footsteps of the central characters in Hugh MacLennan's novel Barometer Rising and other major works of Canadian fiction. As you walk through the city you'll see monuments and statues that commemorate the city's early colonial leaders – which raise questions about how we chose to remember history of the city and its connections to the world.The course will critically examine the connections between daily life in Halifax and broader issues of colonialism, race and class relations, historical memory, ethics and justice through a combination of lectures, guest speakers, discussion groups, field trips, experiential learning in the city of Halifax. Assignments include written reflections on specific sites in Halifax which students are expected to visit and explore, a public engagement project, and a series of quizzes (there is no final exam).
CROSSLISTED: CANA 1102.03
EXCLUSIONS: INTD 1100, INTD 1101

INTD 1103 Halifax and the World: Part II
CREDIT HOURS: 3
This course builds on INTD/CANA 1102.03 (Halifax and the World: Part I) with a continued focus on the connections between important global issues and your daily life as a student in Halifax. In the winter semester, the course will focus on connections between life in Halifax and global development issues in other parts of the world. In particular, the course will highlight the 'commodity chains' that connect our daily consumption decisions to other people around the world who are involved in the life cycle of those commodities – from their production through to their disposal. The course will also specifically address the ethical questions and challenges that emerge from these connections and the practical ways in which we might respond to those questions. As in the first semester, the course will involve a combination of lectures, guest speakers, discussion groups, and experiential learning in the city of Halifax. The assignments will include written reflections on specific sites in Halifax which students are expected to visit and explore, a public engagement project, and a series of quizzes (there is no final exam).
CROSSLISTED: CANA 1103.03
EXCLUSIONS: INTD 1100. INTD 1101

INTD 2001 Introduction to Development I
CREDIT HOURS: 3
Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.
PREREQUISITES: Completion of five full credits at the 1000 level or instructor's permission
CROSSLISTED: GEOG 2201.03
FORMATS: Lecture | Tutorial

INTD 2002 Introduction to Development II
CREDIT HOURS: 3
This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.
PREREQUISITES: Completion of five credits at the 1000 level or instructor's permission
CROSSLISTED: GEOG 2202.03
FORMATS: Lecture | Tutorial

INTD 2045 Indian Society: Change and Continuity
CREDIT HOURS: 3
The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature.
CROSSLISTED: SOSA 2045.03
EXCLUSIONS: INTD 3045.03
FORMATS: Lecture

INTD 2106 Africa: An Introduction
CREDIT HOURS: 3
This course will focus on contemporary Africa. Sterotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.
CROSSLISTED: GEOG 2206.03
FORMATS: Lecture | Tutorial

INTD 3000 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3001 Contemporary Debates in Development Theory
CREDIT HOURS: 3
This seminar course examines key contemporary theoretical debates in International Development Studies and their relevance to the real world of development practice.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3002 Development Practice
CREDIT HOURS: 3
This course is designed for third year undergraduate students who are interested in a career in international development. The course will introduce students to the internal dynamics of development organizations (both governmental and non-governmental), development planning, methodologies of development practice in the field, ethical issues related to development work, fundraising, project proposal writing and project evaluation. The major assignment will involve the preparation of a development project proposal. Because this is a course in development practice, it will involve both seminar discussions and practical 'hands-on' activities. Different sections of the course may include different thematic emphasis – e.g. rural development, gender and development and community development.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Lecture | Seminar

INTD 3003 Development and Activism: Methods of Organization, Manifestation and Dissent
CREDIT HOURS: 3
There are three parts to this course. In Manifestation we explore theories of activism to understand how motivated individuals managed to change their societies. In Organization we wrestle with the legalities of forming a civil-society organization. In Dissent we take our skills to the streets by organizing lawful protests.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Lecture | Tutorial

INTD 3010 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3011 Seminar in Development Studies
CREDIT HOURS: 3
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or permission from the instructor

INTD 3012 Sustainability, Development, Economy
CREDIT HOURS: 3
This course offers an introduction to principles of sustainability and equitable distribution of benefits oriented towards issues of economy. The course adopts an interdisciplinary framework of inquiry to explore challenges of appropriate scale (relative to biocapacity), efficient allocation, and inter and intra-generational equity. In addition, the course will consider how these issues apply to managing real world issues in environmental management, and will explore tools to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to the intersection of sustainability, economic issues and social justice for undergraduate students who have little or no prior exposure to economics, but who have completed one or more courses in international development, ESS, environmental science, or related programs.
PREREQUISITES: INTD 2001 and INTD 2002 or permission of instructor
FORMATS: Online Delivery

INTD 3101 Special Topics in International Development Studies
CREDIT HOURS: 3
A course on a particular aspect of international development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.
CALENDAR NOTES: Students taking INTD 3202X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITES: INTD 2001.03 and 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3102 Special Topics in IDS
CREDIT HOURS: 3
See INTD 3101.

INTD 3104 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3106 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 andINTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3107 Experiential Learning: Experiences of Canadian Development: Volunteerism and Citizenship in Times of Austerity
CREDIT HOURS: 6
Experiential learning is an opportunity for students to reflect on the global/local and theory/practice dynamics of the world around them. Other programs and departments use terms such as internship, volunteer or co-op placements. IDS has adopted the term experiential learning because it reflects the interplay between academic and practical skills development that this program offers. Experiential learning courses are available for both local/Canadian and international placements. The Canadian component of experiential learning focuses on the themes of community development and public engagement. The international component addresses questions of global citizenship. The Canadian component of experiential learning combines classroom learning with volunteer work experience in a community organization in Halifax or other parts of Canada. Students are required to volunteer for a minimum of 60 hours in each term, or approximately 3 hours/week. In addition to this work, students are required to complete a set of readings (to be developed in collaboration with the course instructor) and three academic assignments (a mid-term report, a reflective paper and an academic paper).
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: INTD 2001.03 and INTD 2002 .03 or instructor's permission
FORMATS: Seminar | Discussion

INTD 3109 Experiences of International Development: Volunteerism and Global Citizenship
CREDIT HOURS: 3
The experiential learning abroad course is open to International Development Studies students who wish to obtain academic credit for an overseas placement, volunteer experience or internship. Students who have already secured a place in an overseas experiential learning program can register for this half credit. Special permission to register for this course is required and an application for this course must be completed prior to registration. Students are required to complete course readings and to write several reports reflecting on the relevant literature and the practical work experience. One half credit is completed over the course of a full academic year.
PREREQUISITES: This course is open to non-IDS students with the permission of the instructor.
FORMATS: Seminar

INTD 3110 Migration and Development
CREDIT HOURS: 3
The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission.
FORMATS: Lecture | Seminar

INTD 3111 Popular Culture and Development
CREDIT HOURS: 3
Development does not occur in a vacuum; it is informed by a particular cultural understanding and carried out by a specific mode of politics. Similarly, culture too,

unlike the common belief, is not an autonomous realm, but consistently shapes and is shaped by other societal dimensions. This course will seek to understand the connections between culture and development by specifically exploring the dynamics of popular culture and its linkages with capitalist forms of development mainly in the South.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3114 Environment and Development
CREDIT HOURS: 3
This seminar investigates the intersections between environmental science and development studies. Our primary focus will be to understand how the non-human environment impacts and constrains development interventions, both in the past and the present. The course is organized into three distinct sections. The first focuses on informal lectures mixed in with discussion and interactive forums, including debates and small group exercises. The second component of the course revolves around student presentations, while the final component consists of a simulated negotiation.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Lecture | Seminar

INTD 3115 Global Health: Challenges of Global Health Equity in the 21st Century
CREDIT HOURS: 3
By examining global inequities that lead to health injustices, this course explores why health care is abundant for some and nonexistent for others. It identifies why some are born to live well, and other are doomed to die quick. It asks, "what are we going to do about it?
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Lecture

INTD 3116 Contemporary Issues in Gender and Development
CREDIT HOURS: 3
The course critically examines how development processes affect gender relations. Many development projects and policies have had a negative impact on women. The course provides a theoretical and conceptual grounding in gender in development, explores the gendered impact of policies and processes and examines issues such as governance, HIV/AIDS, and conflict.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
CROSSLISTED: GWST 4116.03
FORMATS: Seminar

INTD 3125 The French-Speaking World
CREDIT HOURS: 3
Introduction to the French-speaking world from a political, cultural, social and economic perspective. Study of the organization known as la Francophonie, with an emphasis on its evolution and mandate, as well as on the bilateral and multilateral cooperation between its member countries. The course is designed for students who are not specializing in French. The course format will consist of lectures and in-class discussion of print and audio-visual materials. Student assessment will be based on oral presentations, assignments, exams and written papers. The language of the course will be English.
CROSSLISTED: FREN 3125.03

INTD 3150 Aspects de la francophonie/Aspects of the Francophone World
CREDIT HOURS: 3
Taught in French. Introduction to the study of the francophone world: political, economic, linguistic, literary and cultural aspects. From year to year the course might emphasize different regions: Western Countries, Sub-Saharan Africa, Pacific Islands, West Indies, Northern Africa.
PREREQUISITES: 2000-level course or consent of instructor
CROSSLISTED: FREN 3150.03
FORMATS: Lecture

INTD 3202 Special Topics In IDS
CREDIT HOURS: 6
See INTD 3101.

INTD 3301 Spanish Language and Grammar: The Cuban Dialect
CREDIT HOURS: 3
NOTE: INTD 3301 - 3306 are offered as part of the Cuba Semester program. Only students enrolled in this program may take these courses. Spanish Language and Grammar: The Cuban Dialect (prerequisite for the remaining courses).
PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish.
CROSSLISTED: SPAN 3301

INTD 3302 Social Development in Cuba
CREDIT HOURS: 3
This course examines the situation of women, the family and children in Cuba, and the educational system in theory and in practice.
PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish
CROSSLISTED: SPAN 3302

INTD 3303 The Political Economy of Cuba
CREDIT HOURS: 3
Analysis and debate of the forms of politics practiced in the Cuban revolution, as well as State institutions, during the various stages of the revolutionary process. Study of the evolution of the Cuban economy and all its principle strategies, including the economic crisis and Cuba's reinsertion in the international economic arena.
PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish
CROSSLISTED: SPAN 3303

INTD 3304 Sustainable Development in Cuba
CREDIT HOURS: 3
The course examines Cuba's experience with sustainable development, including recently introduced agricultural cooperatives and communal environmental education.
PREREQUISITES: SPAN 1020.06 and SPAN 2020.06 or equivalent. Student must be functional in Spanish
CROSSLISTED: SPAN 3304

INTD 3306 Field Research Practicum
CREDIT HOURS: 6
This course involves four weeks of field research under the supervision of a Cuban professor, culminating in the production of a major research paper. Research will be undertaken in one of the following three areas: *the environment and sustainable development; *women, family and childhood in the community; *community work and social participation.
PREREQUISITES: Students must be, at least, functional in Spanish (SPAN 1020.06 and SPAN 2020.06 or equivalent).
CROSSLISTED: SPAN 3306.06
RESTRICTIONS: Open to students enrolled in 3rd or 4th year of the IDS or Spanish program or comparable programs at other universities

INTD 3310 Cuban Culture and Society
CREDIT HOURS: 6
Through seminars, lectures and other activities, students will be introduced to Cuban society and culture. This course consists of briefing and debriefing sessions in Halifax with two weeks spent in Cuba. In Cuba, there will be daily lectures in English at the University of Havana and field visits to sites in and around Havana with opportunities to meet and interact with the local population. Participants will be required to keep a journal, and prepare and present a research paper on an approved topic related to Cuban development. This course counts as a credit in IDS, or Spanish towards the IDS established discipline requirement.
PREREQUISITES: INTD 2001.03 and 2002.03 or instructor's permission
CROSSLISTED: SPAN 3310.06

INTD 3401 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3406 Seminar in Development Studies
CREDIT HOURS: 3
This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: INTD 2001.03 andINTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 3408 The Cuban Development Model
CREDIT HOURS: 3
This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar--as it had been from the beginning of the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services--mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to thisperiod.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or permission from the instructor.
CROSSLISTED: SPAN 3408.03
FORMATS: Lecture | Discussion

INTD 4001 Special Topics in International Development Studies
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to INTD 4002.
PREREQUISITES: INTD 2001.03 or INTD 2002.03 or permission from the instructor

INTD 4002 Special Topics
CREDIT HOURS: 3
PREREQUISITES: INTD 2001 and INTD 2002 or permission from the instructor

INTD 4003 Development in Practice
CREDIT HOURS: 6
This course is intended for fourth year undergraduate students and for graduate students who have some practical development work or volunteer experience (in the North or South) and who are interested in careers in international development. The course critically examines the internal dynamics of development organizations, the possibilities and constraints involved in donor funding, different community development strategies used in the field, project proposal writing and evaluation. Because this is a course in development practice, it will involve both seminar discussions and practical 'hands-on' activities.
FORMATS: Seminar

INTD 4006 Global Poverty and Human Rights: From Development to Global Citizenship
CREDIT HOURS: 3
This course explores contemporary debates from an interdisciplinary cadre of scholars in order to understand why our political and financial systems acquiesce to world poverty. The course will run as a seminar course that will require students to contribute as active participants by generating critical debate out of the assigned readings.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 4011 Advanced Seminar in Development Theory
CREDIT HOURS: 3
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4012 Honours Thesis Seminar B
CREDIT HOURS: 3
The honours thesis course is open to only those students who have been accepted into the thesis stream of the IDS honours program. This course will support students through the writing of their honours theses, from proposals to completion. Issues of research design, method, and ethics will be addressed, and work in progress will be presented.
CALENDAR NOTES: The honours thesis course is open to only those students who have been accepted into the thesis stream of the IDS honours program. This course will support students through the writing of their honours theses, from proposals to completion. Issues of research design, method, and ethics will be addressed, and work in progress will be presented.
PREREQUISITES: Admission to IDS Honors Program (Thesis Stream)
FORMATS: Seminar

INTD 4013 Environmental Conflict and Security
CREDIT HOURS: 3
This seminar seeks to unravel the origins of conflict in the Global South. It emphasizes the ecological dimension of conflict, by investigation the intersections between natural resources and political upheaval. We will trace the origins of a diverse set of conflicts evaluating the role the non-human environment plays in triggering upheaval, as well as possible steps to alleviate ongoing conflicts and prevent new ones.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
FORMATS: Seminar

INTD 4022 Advanced Seminar in Development Theory
CREDIT HOURS: 3
PREREQUISITES: INTD 2001 and INTD 2002 or permission from the instructor

INTD 4100 Special Topics in IDS
CREDIT HOURS: 6
PREREQUISITES: INTD 2001 and INTD 2002 or permission from the instructor

INTD 4211 Gender and Development: Theory, Concepts and Methods
CREDIT HOURS: 3
The primary aim of this course is to provide a broad foundation to some of the theoretical perspectives which have informed current thinking in gender and development. The course introduces students to key concepts in the analysis.
PREREQUISITES: INTD 2001.03 and INTD 2002.03 or instructor's permission
CROSSLISTED: GWST 4211.03
FORMATS: Seminar

INTD 4322 Children and War
CREDIT HOURS: 3
The aim of this course is to explore the many dynamics of conflict that affect children globally. The course will take both a thematic and case study approach. Currently, conflicts that occur are most often intra-state conflicts. The victims of such conflicts are disproportionately women and children. At the same time, the demographics of many of the most war-torn societies has led to increasing numbers of children being involved in the conflict. This course will aim to explore various aspects related to children and war. On the one hand, the course will discuss the effects of war on children. However, it will also discuss the involvement of children in the participation of war. In addition, what are the responsibilities of the International Community to protect and support children of war? What can we learn from the children that have survived in terms of their agency and resilience? What preventative measures can be taken to better ensure children do not fall victims to armed conflict? The course will also explore aspects of culture and its effects on solutions to the dynamics of children and war. In addition, students will learn about various types of child exploitation that make children vulnerable across the peace and wartime spectrum.
PREREQUISITES: Classes in IDS and/or professor's permission.
FORMATS: Lecture | Seminar

Note
Courses in Italian studies are administered by the French Department. The Minor in Italian is open to all students and can be combined with any major. New admissions to the Italian second major and honours programs have been suspended. The Minor remains open.

Introduction
Learning to read and speak Italian offers access to an important world culture. While modern Italy began to emerge in its present-day form in the 19th century, the civilizations that preceded it have exerted a strong influence on contemporary culture. Whether in religion, art, music, or science, Italy's past offers many keys to the present. Through its tradition of global exploration and entrepreneurial endeavors, Italy has played a significant role in world history. Today, it is one of the world's wealthiest democratic nations, and a leader in a variety of fields, including film, design, cuisine, and intellectual life. Courses in Italian literature and culture, building on courses in Italian language, will open up to the student this wide and fascinating array of topics.

Degree Programs

1. Minor in Italian Studies, open to all students.
2. *Major currently suspended.*

In addition to the departmental requirements listed below, currently declared students must satisfy the requirements outlined in the Degree Requirements section.

Minor in Italian Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A minimum of 18 to a maximum of 27 credit hours in Italian Studies above the 1000 level, including:

- ITAL 2010.06: Intermediate Italian
- At least one of:
    - ITAL 3010.06: Advanced Italian
    - ITAL 3200.03: Modern Italian Literature
    - ITAL 3300.03: 20th Century Italian Literature
    - ITAL 3500.03: Topics in Italian Culture
    - ITAL 3600.03: Italian National Cinema
    - ITAL 3700.03: Topics in Italian Drama and Spectacle
    - ITAL 4010.03: Advanced Composition
    - ITAL 4020.03: General Translation
    - ITAL 4040.03: Dante's Inferno

Contact Italian Studies for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ITAL 1010 Italian for Beginners
CREDIT HOURS: 6
Introduction to the basic structures of Italian, combined with practical vocabulary for oral and written communication. This course aims to develop all language skills

(listening, speaking, reading, writing), by integrating grammar study, oral and written exercises, and situational contexts. The course also includes an introduction to Italian culture. This course fulfills the BA language requirement.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
FORMATS: Lecture

ITAL 2010 Intermediate Italian
CREDIT HOURS: 6
This course is open to students with a sound knowledge of the basics of the Italian language (verb tenses, sentence structure, high frequency vocabulary) and is designed to build on that knowledge. The objective of the course is fourfold: 1) to develop awareness of finer points of usage in writing Italian; 2) to provide practice in listening comprehension of material ranging from texts read aloud to spontaneous dialogue; 3) to provide the practice required for the consolidation and development of speaking skills; 4) to provide the practice required for the consolidation and development of reading skills.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: ITAL 1010X/Y.06 or permission of instructor
FORMATS: Lecture | Discussion

ITAL 2061 Civilization of Baroque Italy
CREDIT HOURS: 3
This is a scaled-down version of 2060X/Y.06, and studies Italy at the time of its greatest influence on Western civilization. The course examines Italy's politics, its vibrant urban and rural societies, the place of Catholicism in its cultural and intellectual life, and the innovative early modern economy, all before the great crisis of the 1620s. Open to first-year students.
CROSSLISTED: HIST 2061.03
EXCLUSIONS: HIST 2060.06, HIST 2066.03/HIST 2067.03
FORMATS: Lecture | Tutorial

ITAL 2200 Modern Italian Culture
CREDIT HOURS: 3
This course will focus on the transformation of modern Italian culture from the early twentieth century to the present, with discussion of major historical and social events of the period. Topics may include fascism, futurism, neo-realism, the rise of media culture, Italian cinema, and Italy's political role in the European Union.
FORMATS: Lecture

ITAL 2201 Survey of Italian Literature I: from the Origins to 1600
CREDIT HOURS: 3
This course will provide a survey of Italian Literature from the Middle-Ages to 1600. Literature covered may include works of writers such as Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Catherine of Siena, Niccolò Machiavelli, Benvenuto Cellini and Veronica Franco. This course will be given in English; readings for Italian Minor students will be in both English and Italian.
EXCLUSIONS: ITAL 2210
FORMATS: Lecture

ITAL 2202 Survey of Italian Literature II: 1600 to Present
CREDIT HOURS: 3
This course will provide a survey of Italian Literature from 1600 to present. Literature covered may include works by Ugo Foscolo, Giacomo Leopardi, Sibilla Aleramo, the Futurists, Luigi Pirandello, Italo Svevo, Italo Calvino, Natalia Ginzburg, and Dacia Maraini. This course will be given in English; readings for Italian Minor students will be in both English and Italian.
EXCLUSIONS: ITAL 2210
FORMATS: Lecture

ITAL 2210 Introduction to Italian Literature
CREDIT HOURS: 3
This course will focus on selected topics in Italian literature and criticism. The course will be given in English.
FORMATS: Lecture

ITAL 2600 Survey of Italian Cinema
CREDIT HOURS: 3
Class to be held in English; with part of the course work in Italian for Italian minors. Survey of the Italian Cinema from the origins onwards: Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.
CROSSLISTED: FILM 2314.03
FORMATS: Lecture

ITAL 3000 Advanced Italian, Part 1
CREDIT HOURS: 3
This course will focus on spoken and written Italian. Cultural aspects of Italy's past and contemporary history will be the subjects of oral discussion and written composition. Topics such as fine arts, theatre, cinema, music, culinary history, and fashion will be the basis for language practice. The goal of the course is to provide students with conversational and writing skills. Attention will be given to finer points of grammar, particularly Italian morphology and syntax. Students will engage in small group work and individual reporting. The material for the course will be drawn from both specialized workbooks and news/articles from authentic Italian newspapers and websites. Some class time will be devoted to impromptu discussions allowing students to test their thinking and communication skills.
PREREQUISITES: ITAL 2000.03 and 2001.03, or ITAL 2010X/Y.06, or instructor's permission
FORMATS: Lecture
LAB HOURS PER WEEK: 0

ITAL 3001 Advanced Italian, Part 2
CREDIT HOURS: 3
This course follows ITAL 3000.03 and will focus on spoken and written Italian. Cultural aspects of Italy's past and contemporary history will be the subjects of oral

discussion and written composition. Topics such as fine arts, theatre, cinema, music, culinary history, and fashion will be the basis for language practice. The goal of the course is to provide students with conversational and writing skills. Attention will be given to finer points of grammar, particularly Italian morphology and syntax. Students will engage in small group work and individual reporting. The material for the course will be drawn from both specialized workbooks and news/articles from authentic Italian newspapers and websites. Some class time will be devoted to impromptu discussions allowing students to test their thinking and communication skills.
PREREQUISITES: ITAL 3000.03, or instructor's permission
FORMATS: Lecture

FORMATS: Lecture | Discussion

ITAL 3062 Civilization of Baroque Italy/The Origins of Modern Italy I
CREDIT HOURS: 3
A descriptive introductory survey of Italy from the late Renaissance to the French Revolution. Lectures and tutorials will feature a broad array of original sources in translation and numerous images. Taught in English.
CALENDAR NOTES: This course is the first part of the former full-year course ITAL 3060X/Y.06. This course description reflects the entirety of the pair (ITAL 3062.03 and ITAL 3063.03).
CROSSLISTED: HIST 3060X/Y.06, HIST 3062.03
EXCLUSIONS: HIST 2060.06, ITAL 2101.06, ITAL 3060X/Y.06, HIST 2066.03/HIST 2067.03
FORMATS: Lecture

ITAL 3063 Civilization of Baroque Italy/The Origins of Modern Italy II
CREDIT HOURS: 3
A descriptive introductory survey of Italy from the late Renaissance to the French Revolution. Lectures and tutorials will feature a broad array of original sources in translation and numerous images. Taught in English.
CALENDAR NOTES: This course is the second part of the former full-year course ITAL 3060X/Y.06. This course description reflects the entirety of the pair (ITAL 3062.03 and ITAL 3063.03).
PREREQUISITES: ITAL 3062.03
CROSSLISTED: HIST 3060X/Y.06, HIST 3063.03
EXCLUSIONS: HIST 2060.06, ITAL 2101.06, ITAL 3060X/Y.06, HIST 2066.03/HIST 2067.03
FORMATS: Lecture

ITAL 3300 Twentieth Century Italian Literature
CREDIT HOURS: 3
This course examines Italian literature in the twentieth century, with references to contemporary Italy's social history and culture. Students will acquire first-hand knowledge of the work of key writers of the Novecento, such as for example Sibilla Aleramo, Luigi Pirandello, Italo Svevo, Natalia Ginzburg, Primo Levi, Elsa Morante, Italo Calvino, Dacia Maraini, or others. The course goals are multi-folded: while strengthening their communicative skills in Italian, students will forge their own tools for critical and argumentative thinking, and use them to engage in a productive reading of the literary texts under consideration. All coursework will be done in Italian.
PREREQUISITES: ITAL 2010XY or permission of instructor
FORMATS: Lecture | Seminar

ITAL 3500 Topics in Italian Culture
CREDIT HOURS: 3
This course will discuss and critically assess selected topics of Italian culture. The subjects will vary from year to year, and may range from Italy's fine arts tradition to the history of its commedia dell'arte, from its political and literary movements to its world-renowned filmmaking practice, from the changing role of women in Italian society to its religious evolution, from its history of migration and exploration to its "Made in Italy" international appeal and marketing. Topics may be added and perspectives changed as the contemporary Italian and European context evolve. The course will be conducted in a seminar setting where students may report on the specific issue and subject researched. Students will take part in reading and critical evaluation of peer work and individually propose an oral presentation on a selected theme that elicits their interest.
PREREQUISITES: ITAL 2010X/Y.06 or permission of instructor
FORMATS: Lecture | Discussion

ITAL 3600 Italian National Cinema
CREDIT HOURS: 3
The main focus of the course: the Italian cineastes, who received international recognition since the 1960s. It aims to investigate Italian film production within the social and cultural climate of contemporary Italy.
CROSSLISTED: FILM 3320.03
FORMATS: Lecture | Seminar

ITAL 3700 Topics in Italian Drama and Spectacle
CREDIT HOURS: 3
This course focuses on Italian drama and performance. It covers a variety of topics including: Italian Medieval and Renaissance theatre, the Commedia dell'arte,

Pirandello's productions and contemporary Italian spectacle. The course will examine these topics while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works form a theoretical perspective. The class is held in English.
CROSSLISTED: THEA 3914.03
FORMATS: Lecture | Seminar

ITAL 4010 Advanced Composition
CREDIT HOURS: 3
This course addresses issues of syntax and grammar, register and style, and advanced vocabulary for both creative and academic writing. It will have both a theoretical and a practical component and will be writing intensive. Students will exercise advanced reading skills, advanced grammar skills (using sophisticated Italian syntax and morphology), and advanced composition skills (from structuring a creative piece of work to essay composition and completion). Compositions will address Italian literary and cinematic works. Students will work both in groups and individually. The course will be given in a workshop format, and student participation is essential to its success. It is recommended that students read Italian as much as possible (texts from mass media, popular fiction as well as academic material). Work in class and at home will include summaries, synopses, bullet-point schemes, writing and re-writing, peer reviewing, and related research.
PREREQUISITES: ITAL 3010X/Y.06 or permission of instructor
FORMATS: Lecture | Discussion

ITAL 4040 Dante's Inferno
CREDIT HOURS: 3
From Dante's spiritual crisis to his descent into the pit of Hell. A journey of self-discovery, the Comedy is a summa of the medieval culture. This course offers a general knowledge of its first section, Inferno, and provides an introduction to medieval culture and history. Each class will involve reading from the text, commentary and discussion of the readings assigned. The course is taught in English. Italian Minor students will be required to read the texts in Italian.
PREREQUISITES: Any 2000-level humanities course or instructor's permission
CROSSLISTED: CLAS 4460
FORMATS: Lecture

ITAL 4060 Topics in the Civilization of Baroque Italy
CREDIT HOURS: 3
This course emphasizes the methods and sources historians employ to study Italian history, circa 1570-1740. Topics to be explored include Baroque Italian princely courts, Roman Catholicism, social interaction, social status and display, deviance and punishment, books and learned culture, standards of living, historical ecology and geography. There will be substantial use of translated and transcribed archival sources. A reading knowledge of French is recommended.
CROSSLISTED: HIST 4060.03
FORMATS: Tutorial | Seminar

ITAL 4998 Independent Study
CREDIT HOURS: 3
Individually directed research and writing under the supervision of a member of department.
FORMATS: Seminar

ITAL 4999 Independent Study
CREDIT HOURS: 3
Individually directed research and writing under the supervision of a member of department.

Law, Justice and Society

Location: P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: 902-494-2843

Website: dal.ca/ljso

Email: ljso@dal.ca

The Law, Justice and Society program brings together the theory and practise of education, working across disciplines to engage thoughtfully and critically with pertinent social and political issues. LJSO offers a multi- and interdisciplinary learning experience for students who are interested in the study of law and justice - be they approached as subjects of historical, philosophical, political, or socio-anthropological enquiry or as an avenue towards career objectives such as work in criminal justice, public policy, legal research, or human rights advocacy. Through theory, research methods, and knowledge from a range of disciplines students will strive to understand the contested nature and uses of law in its various relationships to justice. The opportunity to engage in experiential learning will grow a student's confidence both inside and outside the classroom, along with recognition that learning does not cease once class is over, but is a lifelong process that is both rooted in and directed toward the communities and issues they will learn about in the program.

The LJSO program offers courses on a wide range of topics, from a variety of disciplines including: introduction to law and legal thinking, political ideas and philosophies, human rights, the history of law & justice and crime & punishment, youth crime, the social, moral and legal regulation of sex and gender, and ethics.

The admissions requirements for the Law, Justice and Society Program are listed under the relevant Calendar entry for the Faculty of Arts and Social Sciences. There are no additional requirements for LJSO beyond those of the Faculty.

Students thinking of majoring or doing an Honours degree in Law, Justice and Society are encouraged to speak with the Program Coordinator about developing a program of studies that suits their needs and interests.

BA (120 credit hour) Major in Law, Justice and Society

A minimum of 30, maximum of 54 credit hours in the major subject beyond the 1000 level (21 credit hours covered by the LJSO core courses), including 18 credit hours beyond the 2000 level.

First year students are encouraged to select from existing introductory courses across the arts and social sciences, with recommendations for 3-6 credit hours of introductory offerings in each of political science, sociology and social anthropology, philosophy, and history, making sure that 6 credit hours are taken in a course that satisfies the Writing Requirement (WR). Examples of recommended credits include:

- PHIL 1000xy.06 or PHIL 1010xy.06 (WR)
- POLI 1050.03 and POLI 1055.03 or POLI 1060.03 and POLI 1065.03 or POLI 1103xy.06 (WR)
- SOSA 1002.03 and SOSA 1003.03 or POLI 1500/SOSA 1500.06
- HIST 1020.03 and HIST 1021.03; HIST 1022.03 and HIST 1023.03 (WR); HIST 1510.06 (WR); or HIST 1910.03 and HIST 1911.03
- + an elective that satisfies the language or science requirements

King’s Foundation Year Program and the DalCAP combination of courses also provide suitable entry points.

Second year there are 9 required credit hours:

- LAWS 2510.03 Introduction to Law I
- LAWS 2520.03 Introduction to Law II
- PHIL 2020.03 Legal Thinking
- + 21 credit hours in electives and/or other degree requirements

Third year there are 12 required credit hours:

- POLI 3505.03 Human Rights: Foundations
- SOSA 3285.03 Sociology of Law
- HIST 3226.03 Law & Justice in Canadian Society to 1890, OR HIST 3227.03 Criminal Law, Crime and Punishment, 1890 to the Present
- LJSO 3000.03 The Processes of Justice
- + 18 credit hours in electives and/or other degree requirements

Fourth year there are no required credit hours:

- + 30 credit hours in electives and/or other degree requirements

Other requirements:

- 9 credit hours must be from list A of approved electives, including 6 beyond the 2000 level
- up to 24 additional credits may be taken, drawn fromeither list A or list B of approved electives

BA (120 credit hour) Double Major in Law, Justice & Society and a second subject

A minimum of 60, maximum of 84 credit hours in the major subject beyond the 1000 level are to be in the two allied subjects, with no more than 48 credit hours and no fewer than 30 credit hours in either (21 credit hours covered by LJSO core classes), including 18 credit hours beyond the 2000 level in each of the two major subjects.

First year students are encouraged to select from existing introductory courses across the arts and social sciences, with recommendations for 3-6 credit hours of introductory offerings in each of political science, sociology and social anthropology, philosophy, and history, making sure that 6 credit hours are taken in a course that satisfies the Writing Requirement (WR). Examples of recommended classes include:

- PHIL 1000xy.06 or PHIL 1010xy.06 (WR)
- POLI 1050.03 and POLI 1055.03 or POLI 1060.03 and POLI 1065.03 or POLI 1103xy.06 (WR)
- SOSA 1002.03 and SOSA 1003.03 or POLI 1500/SOSA 1500.06
- HIST 1020.03 and HIST 1021.03; HIST 1022.03 and HIST 1023.03 (WR); HIST 1510.06 (WR); or HIST 1910.03 and HIST 1911.03
- + an elective that satisfies the language or science requirements

King's Foundation Year Program and the DalCAP combination of courses also provide suitable entry points.

Second year there are 9 required credit hours:

- LAWS 2510.03 Introduction to Law I
- LAWS 2520.03 Introduction to Law II
- PHIL 2020.03 Legal Thinking
- + 21 credit hours in electives and/or other degree requirements

Third year there are 12 required credit hours:

- POLI 3505.03 Human Rights: Foundations
- SOSA 3285.03 Sociology of Law
- HIST 3226.03 Law & Justice in Canadian Society to 1890, OR HIST 3227.03 Criminal Law, Crime and Punishment, 1890 to the Present
- LJSO 3000.03 The Processes of Justice
- + 18 credit hours in electives and/or other degree requirements

Fourth year there are no required credit hours:

- + 30 credit hours in electives and/or other degree requirements

Other requirements:

- 9 credit hours must be from the list A of approved electives, including 6 beyond the 2000 level
- up to 18 additional credits may be taken, drawn from either list A or list B of approved electives

Minor in Law, Justice and Society
This minor is available to students registered in a 120 credit hour Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science and Bachelor of Science (Medical Science) program.

The requirements are as for the appropriate degree program with completion of the following courses:

- LAWS 2510.03: Introduction to Law I
- LAWS 2520.03: Introduction to Law II

Plus 18 credit hours from the approved list below, including at least three credit hours from your choice of three different disciplines (e.g. history, philosophy, political science, sociology and social anthropology, contemporary studies, or international development studies).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

LJSO 3000 The Processes of Justice
CREDIT HOURS: 3
This course provides an overview of the rules and procedures of Canadian Civil and Criminal Justice systems, as well as those of Alternative Dispute Resolution and Restorative approaches to justice. It will clarify the roles of the parties, lawyers, courts, and intervenors in these different judicial systems, and give students the opportunity to apply the rules to hypothetical problems and/or various case scenarios. This course will also provide students with the tools to critically evaluate these processes in terms of access to justice, efficiency, fairness, and legitimate outcomes. An examination of Alternative Dispute Resolution and Restorative approaches to justice will provide the opportunity to evaluate the limits of conventional retributive and adversarial approaches, and to consider their potential for reforming our understanding of justice.
PREREQUISITES: LAWS 2510.03/LAWS 2520.03
FORMATS: Lecture

LJSO 4000 Honours Seminar in Law, Justice and Society
CREDIT HOURS: 3
The Honours seminar provides students with the opportunity to embark on a concerted independent study of their choice of topic within the interdisciplinary field of Law, Justice and Society. Students are asked to identify a supervisor/professor to oversee the development of a substantial research paper or thesis as an independent capstone project. The paper and reading list will be arranged with the professor, and approved by the Coordinator. Regular meetings will be held for LJSO Honours students, to provide an opportunity for the Honours students to engage in discussions about their research papers and projects, but the main working relationship will be between the student and the chosen supervisor.
PREREQUISITES: LAWS 2510.03, LAWS 2520.03, LJSO 3000.03
RESTRICTIONS: Restricted to LJSO Honours students

Music - Fountain School of Performing Arts

Fax: (902) 494-2801

Website: www.dal.ca/performingarts

Email: fspa@dal.ca

Introduction
Dalhousie provides ways to study many kinds of music, within the vibrant context of our multi-disciplinary Fountain School of Performing Arts. Our offerings range from large survey classes open to students from across the campus, to performing ensembles entered by audition, to one-on-one applied music study for those with demonstrated talent and appropriate prior training. Through our programs, students can develop expertise as listeners, performers, and creators, in styles ranging from classical to popular.

The Bachelor of Music offers focused music studies to prepare graduates for careers or further study in many areas, including performance, composition, theory, musicology, and more. Through experiential learning, training in music teaches poise, discipline, creativity, collaboration, empathy, and the ability to think on one's feet. These transferable skills are excellent preparation for many career paths in and beyond the performing arts.

In addition to the BMus, we offer the Honours BA in Music, the BA or BSc Combined Honours and Double Majors with Music, the Minor in Music, the Minor in Musicology, and many elective classes.

Elective Courses for Non-Majors
• PERF 1000.03: Introduction to Performance Studies
• PERF 1001.03: Writing About Music
• MUSC 2007.06: The Guitar: History and Techniques (summer term)
• MUSC 2008.06: Modern Guitar (summer term)
• MUSC 2016.03: Topics in Music and Cinema
• MUSC 2018.03: The Road to Rock 'n' Roll
• MUSC 2019.03: The Rock 'n' Roll Era and Beyond
• MUSC 2020.03: The History of Jazz
• MUSC 2024.03: The Guitar: History and Techniques I
• MUSC 2025.03: The Guitar: History and Techniques II
• MUSC 2028.03: The Art and Science of Drumming I
• MUSC 2029.03: The Art and Science of Drumming II
• MUSC 3060.03: Introduction to Music and Sound Technology
• MUSC 3061.03: Electroacoustic Music
• MUSC 3360.03: African American Vernacular Music
• MUSC 3314.03: History of Opera
• MUSC 4353.03: Music since 1945
• MUSC 4354.03: Popular Music Analysis
• MUSC 4355.03: Narrative Strategies in 19th-Century Music (cross-listed with GWST 4355.03)
• MUSC 4356.03: Opera Studies
• MUSC 4358/MUSC 4359: Studies in Medieval Music
• MUSC 4360.06: Advanced Seminar in Baroque Culture (summer term, study abroad)
• MUSC 4361.03/MUSC 4365.03: Topics in Musicology I
• MUSC 4362.03: Topics in Canadian Music
• MUSC 4363.03/MUSC 4367.03: Topics in Musicology II
• MUSC 4380.03/MUSC 4381.03: Selected Composer Studies

Other courses in Music may be taken by special permission. Applied study (individual studio instruction) may be taken subject to an audition and available space.

Admission Procedures for all Music Programs
All Music major programs require that candidates (including transfer students) apply to both the university and the Fountain School of Performing Arts and audition for Applied Study. See the website at dal.ca/fspa for the full application process. Re-audition and testing may be required if enrolment is deferred, if a program is interrupted for a year or more, or if an applied study course is not successfully completed in one academic year.

Students who demonstrate outstanding potential at their audition, but who require further preparation for university level music study, will be required to participate in the Fountain School of Performing Arts' musicianship skills spring/summer program available via distance learning. Details will be communicated following the audition.

Ensemble Participation
Music Majors:

All students in music major programs enroled in an applied study course (instrument or voice) must participate in ensembles.

As of the 2018-19 academic year, the Fountain School is phasing in Ensemble courses for credit.

- MUSC 2751.015 Ensemble Ia
- MUSC 2752.015 Ensemble Ib
- MUSC 2753.015 Ensemble IIa
- MUSC 2754.015 Ensemble IIb
- MUSC 3751.015 Ensemble IIIa
- MUSC 3752.015 Ensemble IIIb
- MUSC 4751.015 Ensemble IVa
- MUSC 4752.015 Ensemble IVb
- MUSC 4753.015 Ensemble (Advanced) a
- MUSC 4754.015 Ensemble (Advanced) b

Returning students who began a music major program prior to 2018-19 have the option of enroling in an ensemble for credit OR in the appropriate level of non-credit ensemble beyond second year: MUSC 0322.00 Ensemble III, MUSC 0422.00 Ensemble IV, MUSC 0522.00 Ensemble (Advanced). See the Fountain School Handbook for more details about ensemble participation.

Music minors and Elective students:

Students in music minor programs who enrol in applied study (instrument or voice) and students who take applied study as an elective are encouraged to participate in ensembles. Students may register for an ensemble credit class, depending on course load.

The Fountain School of Performing Arts will monitor the number and types of ensembles for each student. Note that most ensembles require auditions.

Students must attend regularly and punctually the rehearsals and performances of their required ensembles. Students should note that ensemble participation typically requires regularly occurring rehearsals and scheduled performances.

Membership in the various ensembles is open to the university and the community by audition. Please contact the director of each ensemble (listed below) or the Fountain School for further details.

Dalhousie University Chorus (C. Murray)
Dalhousie Symphony Orchestra (P. Allen)
Dalhousie Wind Ensemble (J. Caines)
Dalhousie Chamber Orchestra (TBA)
Dalhousie Jazz Ensemble (C. Mitchell)
Dalhousie Percussion Ensemble (D. Gray)
Dalhousie Opera (TBA)
Small Ensembles (staff coaches)
Collaborative Piano (staff coaches)
Voice Chamber Ensemble (M. Swanston)

Applied Study
Individual studio instruction in voice or instrument is required for most music degree programs. These courses may be taken as electives subject to an audition and available space. Please note that all applied study courses require an audition. Please contact the Fountain School of Performing Arts for audition dates or visit website dal.ca/fspa. Auxiliary fees apply. Students must achieve a minimum grade of C in first year applied study in order to advance to second year applied study. Idioms offered are:

- Voice
- Guitar
- Piano
- Organ
- Violin
- Viola
- Cello
- Double Bass
- Flute
- Oboe
- Clarinet
- Bassoon
- Saxophone
- French Horn
- Trumpet
- Trombone
- Tuba
- Percussion
- Harp

Bachelor of Music (BMus)

The BMus is a four year program with 96 out of 120 credit hours in Music. Upon successful completion of the second year, students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) may continue with studies in the BMus general degree or may apply for one of four concentrations: Composition, Musicology, Performance, or Popular Musics. Additional requirements for acceptance to the areas of concentration are listed below, including applicable standards. Please also see Section 6: Standards for overall BMus grade and other requirements.

Students wishing to pursue one of the four concentrations must apply by March 1 of the second year of study.

BMus Standards
Students may not enrol in the Bachelor of Music Graduation Requirement courses (MUSC 4199/MUSC 4299/MUSC 4399/MUSC 4599) until the fourth year of the Program.

Students must achieve an average minimum overall GPA of 2.7 (B-) in MUSC courses beyond the 1000 level in order to graduate with a BMus degree. Students must achieve a minimum grade of C in 1000 level applied study in order to advance to 2000 level Applied Study. Grades in MUSC courses beyond the 1000 level must be "C" or better in order to count toward the BMus degree.

See also the sections below for specific standards regarding concentrations.

Common Curriculum

First Year

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to MUSC 1122X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music
- 3 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble 1b

Second Year

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to MUSC 2122X/Y.06)
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- MUSC 2270X/Y.03: Aural Skills II
- MUSC 2271X/Y.03: Keyboard Skills II
- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 3 credit hours, Arts and Social Sciences or Science electives
- MUSC 2753.015: Ensemble IIa
- MUSC 2754.015: Ensemble IIb

* Voice students intending to pursue a Concentration in Performance must take MUSC 2175.03: Lyric Diction for Singers either in the second or third year of study, depending on the cycle of courses. If they take MUSC 2175.03 in the second year, MUSC 2355.03: History of Western Music 1750 to the Present Day is deferred to year three or four, not omitted.

* Students intending to pursue a Concentration in Composition may take MUSC 2210.03: Introduction to Composition in the Fall semester of their second year. Students taking this option will: defer their three credit hours Arts and Social Sciences or Sciences elective to another year. MUSC 2210 will be counted as a Music elective.

BMus General Degree
Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) may proceed to a BMus general degree program in their third year. This program choice allows for the greatest flexibility within the BMus program offerings. It will prepare students well for advanced degrees in Music, as well as for a wide range of careers in music.

Students must submit a proposal for their intended graduation project (MUSC 4599.03 or 4000-level musicology seminar) by March 1 of the third year of study, according to the Fountain School of Performing Arts guidelines. Students must achieve a minimum grade of 2.7 (B-) in this credit.

Third Year

- MUSC 3000-level Applied Study (MUSC 3101X/Y.06 to MUSC 3122X/Y.06)
- MUSC 3283.03: Modal Counterpoint OR MUSC 3284.03: Tonal Counterpoint
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- 3 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3360.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4380/MUSC 4381.03
- 6 credit hours of Music electives
- 6 credit hours of Arts and Social Sciences or Science electives
- MUSC 3751.015: Ensemble IIIa
- MUSC 3752.015: Ensemble IIIb

Fourth Year

- MUSC 4000-level Applied Study (MUSC 4101X/Y.06 to MUSC 4122X/Y.06)
- MUSC 3282.03: Orchestration
- MUSC 4599.03: Graduation Project or 4000-level Musicology seminar (see 4. Concentration in Musicology for the list of seminars)
- 9 credit hours of Music electives
- 6 credit hours of Arts and Social Sciences or Science electives
- MUSC 4751.015: Ensemble IVa
- MUSC 4752.015: Ensemble IVb

NOTE: Those students who are interested in pursuing a career in classroom teaching of music must complete an undergraduate degree in Music and then complete a Bachelor of Education (BEd) degree at another institution. Students are advised to consult provincial regulations for teacher certification and entrance requirements for their institution of choice, and to meet with the Undergraduate Advisor, in order to ensure optimal course selection within the BMus General degree program.

Concentration in Composition
Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses), along with a minimum overall average GPA of 3.3 (B+) in their Music Theory and Composition courses (MUSC 1201, MUSC 1222, MUSC 2221 and MUSC 2210) may submit a portfolio of original music by March 1 of the second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as composers. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in Composition I (MUSC 3210.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 (B-) in both MUSC 4210.03 and in MUSC 4299.03.

Third Year

- MUSC 3210X/Y.06: Composition I
- MUSC 3221.03: Form and Analysis: the Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03 Tonal Counterpoint
- MUSC 3282.03: Orchestration
- MUSC 4280.03: Contemporary Techniques
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives (including MUSC 2210.03, normally taken in year 2)

Fourth Year

- MUSC 4210X/Y.06: Composition II
- MUSC 4353.03: Music Since 1945 or MUSC 4362.03: Topics in Canadian Music
- MUSC 3660.03: Introduction to Music and Sound Technology
- MUSC 3661.03: Electroacoustic Music
- MUSC 4299X/Y.03: Area Graduation Requirement (Composition)
- 6 credit hours of Arts and Social Sciences or Science electives
- 6 credit hours of Music electives

Concentration in Musicology
Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) must submit two writing samples by March 1 of the second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as musicologists. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 2.7 (B-) in the graduation requirement MUSC 4399.03.

Third Year

- MUSC 3000-level Applied Study (MUSC 3101X/Y.06 to MUSC 3122X/Y.06)
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or 3284.03: Tonal Counterpoint
- MUSC 4353.03: Music since 1945
- 6 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3360.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4360.06, MUSC 4361/4365.03, MUSC 4362.03, MUSC 4363/4367.03, MUSC 4380/4381.03
- 6 credit hours of Arts & Social Sciences or Science electives
- MUSC 3751.015: Ensemble IIIa
- MUSC 3752.015: Ensemble IIIb

Fourth Year

- MUSC 4000-level Applied Study (MUSC 4101X/Y.06 to MUSC 4122X/Y.06)
- MUSC 4399X/Y.03: Graduation Requirement (Thesis)
- 6 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3360.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4360.06, MUSC 4361/4365.03, MUSC 4362.03, MUSC 4363/4367.03, MUSC 4380/4381.03
- 6 credit hours of music electives (students are strongly encouraged to take MUSC 3282.03 Orchestration)
- One of: HIST 1004.06 Introduction to European History or HIST 1862.06 North American Experience
- MUSC 4751.015: Ensemble IVa
- MUSC 4752.015: Ensemble IVb

Concentration in Performance
Acceptance to the Performance Concentration requires a written application, audition, and permission of the Fountain School of Performing Arts. Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000 level MUSC courses), along with a minimum grade of 3.3 (B+) in their 1000 and 2000 level Applied Study, may audition at the end of second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as performers. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in third year Performance Concentration Applied Study (MUSC 3701.06 to MUSC 3722.06) and in the Third Year performance recital (MUSC 3199.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 [B-] in their fourth year Performance Concentration Applied Study (MUSC 4701.06 to MUSC 4722.06) and in their Fourth Year performance recital (MUSC 4199.03).

Third Year

- MUSC-3000 level Performance Concentration Applied Study (MUSC 3701X/Y.06 to MUSC 3722X/Y.06)
- MUSC 3199X/Y.03: Half-Recital (Year III Performance)
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03: Tonal Counterpoint
- MUSC 3751.015 Ensemble IIIa
- MUSC 3752.015 Ensemble IIIb
- 3 credit hours in music history beyond the 2000-level chosen from: MUSC 3066.03, MUSC 3314.03, MUSC 3360.03, MUSC 3370.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/MUSC 4359.03, MUSC 4361/MUSC 4365.03, MUSC 4362.03, MUSC 4363/MUSC 4367.03, MUSC 4380/MUSC 4381.03

Fourth Year

- MUSC 4000-level Performance Concentration Applied Study (MUSC 4701X/Y.06 to MUSC 4722X/Y.06)
- MUSC 4199X/Y.03: Area Graduation Requirement (Performance: Recital)

- MUSC 4751.015: Ensemble IVa
- MUSC 4752.015: Ensemble IVb

Although not required, students in Performance are encouraged to take MUSC 3282.03, Orchestration, as one of their Music electives.

Also in the third and fourth years, according to idiom:

Voice (27 credit hours):

- MUSC 2175.03 Lyric Diction for Singers, taken in year two or three, depending on cycle with Pedagogy/Literature
- MUSC 3176.03: Principles of Vocal Pedagogy
- MUSC 3177.03: Vocal Literature
- MUSC 3314.03: History of Opera
- 3 credit hours in Music elective, any choice
- 12 credit hours Arts and Social Sciences or Science electives (at least one Arts and Social Sciences or Science elective taken over the four year program must be an Introductory Language course: either Italian, German or French)

Piano (27 credit hours):

- 15 credit hours of Music electives, any choice; however, if offered, students should take:
  - MUSC 3353.03: Chamber Music Literature
- 12 credit hours Arts and Social Sciences or Science electives

Strings (27 credit hours):

- 15 credit hours Music electives, any choice; however, if offered, students should take:
  - MUSC 3160.03: Conducting
  - MUSC 3353.03: Chamber Music Literature
- 12 credit hours Arts and Social Sciences or Science electives

Guitar (27 credit hours):

- MUSC 3308.06: Modern Guitar
- MUSC 4170.03: Improvisation Techniques and Practices
- 6 credit hours Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Saxophone (27 credit hours):

- MUSC 2020.03: The History of Jazz
- MUSC 4170X/Y.03: Improvisation Techniques and Practices
- 9 credit hours Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Wind and brass instruments, percussion (27 credit hours):

- 15 credit hours of Music electives, any choice
- 12 credit hours Arts and Social Sciences or Science electives

Concentration in Popular Musics
Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) may proceed to a BMus concentration in Popular Musics. This concentration is designed for students interested in the performance, creation, and/or study of popular music styles such as pop, jazz, soul, rock, and more.

Please contact the Fountain School's Associate Director (Music) for more information.

BA with Combined Honours in Music and Theatre

The Fountain School of Performing Arts offers a highly specialized four-year BA with a Combined Honours in Music and Theatre which blends the principal courses of the Bachelor of Music in Voice with Theatre courses in Acting and Movement. A maximum of five students will be selected for entrance into the program each year. The graduate of this program will advance toward a professional career in the performing arts equipped with a foundation in music and theatre.

Students must successfully complete the audition/entrance tests for the first year of the Music Program. Students must also audition for, and be accepted into, the Acting Program. Students may audition for the Acting program directly from high school OR after successful completion of THEA 1800.

To qualify for graduation a student must participate by having a significant role in at least one Fountain School (play or opera) staged musical production.

In addition to the School requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

NOTE: Students having to withdraw from this Program through failure to achieve the required standards in Theatre courses must re-audition if desiring a degree program in Music. Students having to withdraw from this Program through failure to achieve the required standards in Music courses must re-apply if desiring a degree program in Theatre.

First year

- MUSC 1101X/Y.06: Voice I
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- THEA 1800X/Y.06: Introduction to Acting and Performance
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble 1b

Second year

- MUSC 2101X/Y.06: Voice II
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- MUSC 1271X/Y.03: Keyboard Skills I
- THEA 2800X/Y.06: Acting II
- THEA 2820X/Y.06: Dance & Movement II
- MUSC 2753.015: Ensemble IIa
- MUSC 2754.015: Ensemble IIb

Third year

- MUSC 3101X/Y.06: Voice III
- THEA 2012.03: Early Modern Theatre
- THEA 3800X/Y.06: Acting III
- THEA 3820X/Y.06: Dance & Movement III
- MUSC 3314.03: History of Opera
- Arts and Social Sciences elective (6 credit hours) (see Degree Requirements)

OPTIONAL DEGREE OVERLOAD: MUSC 3751.015: Ensemble IIIa and MUSC 3752.015: Ensemble IIIb

Fourth year

- MUSC 4101X/Y.06: Voice IV
- THEA 4800X/Y.06: Acting IV
- THEA 4840X/Y.06: Advanced Performance Techniques
- Arts and Social Sciences elective (12 credit hours) (see Degree Requirements)

OPTIONAL DEGREE OVERLOAD: MUSC 4751.015: Ensemble IVa and MUSC 4752.015: Ensemble IVb

Honours Music and Theatre students will be awarded the 21st credit for their satisfactory participation in a Fountain School stage production.

NOTE: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM/THEA 2911.03 (Stars and Stardom on Stage and Screen) and FILM/THEA 3314.03 (Shakespeare and his Contemporaries on Film).

BA (120 credit hour) Honours in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements section of this calendar.

Students must successfully complete an audition/entrance tests.

School Requirements

First year (30 credit hours):

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to MUSC 1122X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music
- 6 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble Ib

Second year (30 credit hours):

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to MUSC 2122X/Y.06)
- MUSC 1271X/Y.03: Keyboard Skills I
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- 12 credit hours, Arts and Social Sciences or Science electives (see Degree Requirements for the College of Arts and Science)
- MUSC 2753.015: Ensemble IIa
- MUSC 2754.015: Ensemble IIb

Additional School Requirements

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- MUSC 4399.03: Graduation Requirement (Thesis)
- 27 to 39 credit hours of Music electives, at least 18 of which must be above the 2000-level

BA or BSc (Combined Honours Program)

Students may enroll in either of these combined honours programs with the joint approval of the Fountain School of Performing Arts and the department of the allied subject (in compliance with the Combined Honours requirements detailed in the Degree Requirements of this calendar). Students must successfully complete an audition/entrance tests.

School Requirements

1000 level

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to MUSC 1122X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I or MUSC 1271X/Y.03 Keyboard Skills I
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble 1b
- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music

Additional School Requirements:

- MUSC 1271X/Y.03 Keyboard Skills I or MUSC 1270X/Y.03 Aural Skills I
- 27 to 45 credit hours in Music above the 1000-level, at least 18 of which must be at the 3000 or 4000 level. Among these, 3 credit hours of additional courses in Musicology must be completed (chosen from MUSC 2354.03, MUSC 2355.03, MUSC 4353.03).

NOTE: Students considering Honours programs must meet with an academic advisor in the Fountain School of Performing Arts as soon as possible in their program, and no later than their second year of studies. For Combined Honours programs, students must consult with Advisors in BOTH departments for application procedures and deadlines. Students may apply for most honours programs before registering for the second year. Application forms are available from departments, at the Registrar's Office, or at http://www.dal.ca/registrar.

BA (120 credit hour) Major in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements section of this calendar.

Students must successfully complete an audition/entrance tests.

School Requirements

First year (30 credit hours):

- MUSC 1000 level Applied Study (MUSC 1101X/Y.06 to MUSC 1122X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music
- 6 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble Ib

Second year (30 credit hours):

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to MUSC 2118X/Y.06)
- MUSC 1271X/Y.03: Keyboard Skills I
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- 12 credit hours, Arts and Social Sciences or Science electives
- MUSC 2753.015: Ensemble IIa
- MUSC 2754.015: Ensemble IIb

Additional School Requirements:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 18 to 30 credit hours of Music electives beyond the 1000-level, at least 18 of which must be above the 2000-level

BA or BSc (120 credit hour) Double Major

In addition to the Fountain School of Performing Arts requirements below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements section of this calendar. Students must successfully complete an audition/entrance tests. The major subject with the most advanced credit hours appears first on the record.

School Requirements

1. Music as First Subject:

First year (30 credit hours):

- MUSC 1000 level Applied Study (MUSC 1101X/Y.06 to MUSC 1122X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II

- MUSC 1270X/Y.03: Aural Skills I
- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music
- 6 credit hours, Arts and Social Sciences or Science elective
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble Ib

Second year (30 credit hours):

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to MUSC 2122X/Y.06)
- MUSC 1271X/Y.03: Keyboard Skills I
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- 12 credit hours, Arts and Social Sciences or Science electives
- MUSC 2753.015: Ensemble IIa
- MUSC 2754.015: Ensemble IIb

Additional School Requirements:

- MUSC 2354.03: History of Western Music to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 12 to 24 hours of Music electives beyond the 1000-level, at least 18 of which must be above the 2000-level

2. Music as Second Subject:

Students must complete one year of applied study (subject to audition) and 24 Music credit hours above the 1000-level, including MUSC 2751.015: Ensemble Ia and MUSC 2752.015: Ensemble Ib, as well as 18 credit hours beyond the 2000-level. The following courses may NOT be used to count toward this degree: MUSC 2007.06, MUSC 2022.06, MUSC 2024.03, MUSC 2025.03, MUSC 2028.03, MUSC 2029.03, MUSC 2130.06, MUSC 3130.06.

Minor in Music

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Music is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Music beyond the 1000 level. The following courses may not be used to count toward this degree:

- MUSC 2007.06, MUSC 2024.03, MUSC 2025.03: The Guitar: History and Techniques
- MUSC 2022.06, MUSC 2028.03, MUSC 2029.03: The Art and Science of Drumming
- MUSC 2130.06: Jazz Dance

Contact Music - Fountain School of Performing Arts for more information.

Minor in Musicology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students must complete a minimum of 18 to a maximum of 27 credit hours in Musicology courses as follows:

- MUSC 2354.03: History of Western Music up to 1750
- MUSC 2355.03: History of Western Music 1750 to the Present Day
- 12 credit hours chosen from the following, 6 of which must be beyond the 2000-level, including at least 3 at the 4000 level.
    - MUSC 2016.03: Topics in Music and Cinema
    - MUSC 2018.03: The Road to Rock 'n' Roll
    - MUSC 2019.03: The Rock 'n' Roll Era and Beyond
    - MUSC 2020.03: The History of Jazz
    - MUSC 3066.03: Women, Gender and Music
    - MUSC 3314.03: History of Opera
    - MUSC 3360.03: African American Vernacular Music

- MUSC 3370.03: Performance Practice
- MUSC 4353.03: Music since 1945
- MUSC 4354.03: Popular Music Analysis
- MUSC 4355.03: Narrative Strategies
- MUSC 4356.03: Opera Studies
- MUSC 4358.03/MUSC 4359.03: Studies in Medieval Music
- MUSC 4360.06: Advanced Seminar in Baroque Culture
- MUSC 4361.03/MUSC 4365.03: Topics in Musicology I
- MUSC 4362.03: Topics in Canadian Music
- MUSC 4363.03/MUSC 4367.03: Topics in Musicology II
- MUSC 4380.03/MUSC 4381.03: Selected Composer Studies

Contact Music - Fountain School of Performing Arts for more information.

Cooperative Degree Programs with the University of King's College
The following degree programs are offered in cooperation with the University of King's College:

Bachelor of Music with King's Foundation Year Program (FYP)
Bachelor of Journalism with Music History Option
Bachelor of Arts combined honours in Contemporary Studies

Students may also pursue a BA (120 credit hour) and an honours BA through the University of King's College.

The Bachelor of Music with King's Foundation Year (FYP) is described below. Please consult the University of King's College (Office of the Registrar) for further information including curriculum and registration details for other cooperative programs.

Bachelor of Music with King's Foundation Year Program (FYP)

The King's BMus program basically follows the Dalhousie BMus program requirements, with a few exceptions:

1. The order of courses will have to be modified in order to complete the program in four years.

2. Students in the King's BMus program are NOT required to take:

- PERF 1000.03: Introduction to Performance Studies
- PERF 1001.03: Writing About Music
- MUSC 2751.015: Ensemble Ia
- MUSC 2752.015: Ensemble Ib

3. In the first year of the program, King's BMus students take the Foundation Year Program (24 credit hours) and 1000-level Applied Study (6 credit hours). As well, they may opt to take MUSC 2751.015 and MUSC 2752.015 as music elective courses, but will require permission from the King's Registrar to carry an overload.

For further information and consulting on program planning, please contact the Associate Director (Music) at the Fountain School of Performing Arts.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PERF 1000 Introduction to Performance Studies
CREDIT HOURS: 3
What is performance, and who counts as a performer? Why is performance one of the most ancient and durable aspects of human community and interaction? Why do we adore certain performers and despise others? How are performers and their choices shaped by their societies, and vice versa? This course will explore these questions by looking at some of the vital roles fulfilled by theatrical, musical, and cinematic performers in global societies, both ancient and modern. Via readings of articles and plays as well as in-class screenings of film and video performances, it will consider the performer's role in shaping, embodying, and questioning societies' conceptions of beauty, morality, religious faith, gender, race, ethnicity, social class, and more.
CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.
EXCLUSIONS: THEA 1000X/Y.06
FORMATS: Lecture | Tutorial

PERF 1001 Writing About Music
CREDIT HOURS: 3
This course is an introduction to the academic study of music. It is designed to help students develop effective research and writing skills and to familiarize them with the sources, methods, repertories, and debates that have shaped music history and scholarship. Students will develop critical listening and analytical skills, will be challenged to consider music from a variety of perspectives, will become familiar with a number of standard works from various repertories, and will engage in the issues and debates surrounding various musical cultures.
CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.
PREREQUISITES: PERF 1000.03
EXCLUSIONS: MUSC 1352.03
FORMATS: Lecture | Tutorial

MUSC 0122 Ensemble I
CREDIT HOURS: 0
A non-credit co-requisite for students in First Year (1000-level) Applied Study (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

MUSC 0222 Ensemble II
CREDIT HOURS: 0
The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

MUSC 0322 Ensemble III
CREDIT HOURS: 0
The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

MUSC 0422 Ensemble IV
CREDIT HOURS: 0
The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

MUSC 0522 Ensemble (Advanced)
CREDIT HOURS: 0
The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.

MUSC 1081 Voice Clinic for the Theatre
CREDIT HOURS: 3
A course in the principles of singing as applied to classical actor training. Exercises and repertoire appropriate to this training will be prepared by the students for class performance. No prior instruction in music or singing is presumed.
EXCLUSIONS: This class is offered exclusively to students in the third year of the Acting Program
FORMATS: Tutorial

MUSC 1101 Voice 1
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the website at http://dal.ca/fspa
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1102 Guitar I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1103 Piano I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1104 Organ I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1105 Violin I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Foutain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1106 Viola I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 1107 Cello I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1108 Double Bass I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1109 Flute I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1110 Oboe I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1111 Clarinet I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1112 Bassoon I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1113 Saxophone I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1114 French Horn I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1115 Trumpet I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1116 Trombone I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa.
Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1117 Tuba I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa. Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1118 Percussion I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa. Auxiliary fees apply.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1122 Harp I
CREDIT HOURS: 6
Please note that all instrument and voice courses require an audition. Please contact the Fountain School for audition dates or visit the web site at http://dal.ca/fspa. Auxiliary fees apply.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms; partial credit cannot be given for a single term.
FORMATS: Studio

MUSC 1201 Music Theory I
CREDIT HOURS: 3
This course starts with a review of important music theory basics like intervals and scales. It then focuses on 4-part tonal harmony, as a preparation to Music Theory II (MUSC 1222, winter term) which is a more in-depth study of tonal harmony. Special attention will be given to voice leading and harmonic analysis.
COREQUISITES: MUSC 1270X/Y.03, 1271X/Y.03
PREREQUISITES: Permission of the instructor, based on placement testing.
FORMATS: Lecture

MUSC 1222 Music Theory II
CREDIT HOURS: 3
As a continuation to Music Theory I, MUSC 1201, this course is a study of tonal harmony. Topics include modulation to closely related keys, tonicization, use of non-chord tones, and an introduction to chromatic progressions, especially using the augmented sixth and Neapolitan sixth chords. Skills in part-writing and harmonic analysis will be developed.
COREQUISITES: MUSC 1270X/Y.03, MUSC 1271X/Y.03
PREREQUISITES: MUSC 1201.03 or permission of the instructor
EXCLUSIONS: MUSC 1202.03
FORMATS: Lecture

MUSC 1270 Aural Skills I
CREDIT HOURS: 3
A course designed to correlate with MUSC 1201.03 and MUSC 1222.03. Melodic, harmonic, rhythmic, textural and stylistic factors are visualized, performed and dictated systematically. Lab work in ear-training and sight-singing is done three times per week. Each student is a member of a small working section. SIGNATURE REQUIRED
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: MUSC 1201.03, MUSC 1222.03, and MUSC 1271X/Y.03
PREREQUISITES: Permission of the instructor based on placement testing.
FORMATS: Lab
LAB HOURS PER WEEK: 3

MUSC 1271 Keyboard Skills I
CREDIT HOURS: 3
The development of basic skills in sight reading, score reading and harmonized accompaniment at the keyboard, for Music degree program students. SIGNATURE REQUIRED
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: MUSC 1201.03, MUSC 1222.03, and MUSC 1270X/Y.03
PREREQUISITES: Permission of instructor based on placement testing.
FORMATS: Lab
LAB HOURS PER WEEK: 2

MUSC 2007 The Guitar: History and Techniques
CREDIT HOURS: 6
This course will introduce students to the various styles of guitar playing from classical to jazz to folk. The history of the instrument (including lute and other related plucked instruments) and an examination of the key styles and performers will be covered. Practical instruction will be provided in this course, so a guitar will be necessary. Practical instruction will attempt to accommodate the various skill levels of the students enrolled.SPECIAL NOTE: This course is for non-music majors and cannot be counted toward a music degree.
FORMATS: Lecture | Lab

MUSC 2008 Modern Guitar
CREDIT HOURS: 6
A course for students with a serious interest in preparing for studio guitar playing. The course includes jazz, folk, rock and accompanying idioms. Students will receive instruction and participate in ensemble playing in improvisation, score reading, chording, and arranging.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively. Music majors must register in MUSC 3308X/Y.06

PREREQUISITES: MUSC 2007.06 or permission of instructor
EXCLUSIONS: MUSC 3308.03
FORMATS: Lecture | Lab

MUSC 2010 Topics in Music and Cinema
CREDIT HOURS: 3
This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.
CROSSLISTED: FILM 2010
EXCLUSIONS: MUSC 2015X/Y.06
FORMATS: Lecture | Lab

MUSC 2016 Topics in Music and Cinema
CREDIT HOURS: 3
This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.
EXCLUSIONS: MUSC 2015X/Y.06
FORMATS: Lecture | Lab

MUSC 2018 The Road to Rock 'n' Roll: Popular Music until 1960
CREDIT HOURS: 3
This course focuses on the origins and development of popular music in the twentieth century, tracing a history of rock'n'roll from its roots in minstrelsy and music hall styles of the nineteenth century until the end of rock'n'roll era in the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.
FORMATS: Lecture | Discussion

MUSC 2019 The Rock'n'Roll Era and Beyond
CREDIT HOURS: 3
This course focuses on the many different kinds of popular music that have proliferated since the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.
FORMATS: Lecture | Discussion

MUSC 2020 The History of Jazz
CREDIT HOURS: 3
This course is a survey of the origins and development of jazz, concentrating on the historical and social contexts of music and musicians. We will discuss many of the kinds of music that have been called jazz, and we will analyze their roles in twentieth century culture. Knowledge of musical notation and terminology is not required.
EXCLUSIONS: MUSC 2013X/Y.06, MUSC 3313X/Y.06
FORMATS: Lecture | Discussion

MUSC 2022 The Art and Science of Drumming
CREDIT HOURS: 6
This course will introduce students to the art and science of music using hand drums. The history of the instrument as well as cultural context and rhythmic structure will be discussed for various styles of drumming. A significant portion of the class will be practical, where students will be taught the rudiments of reading music and playing hand drums. This means that it will be necessary for each student to bring an approved hand drum to each class.
CALENDAR NOTES: This course is for non-music majors only and cannot be counted as a credit in a Music degree program.
FORMATS: Lecture | Lab

MUSC 2023 Middle Eastern Music
CREDIT HOURS: 3
This class introduces students to the musical system of the Middle East as well as its various roles and applications throughout different countries. Music theory, performance practices, music making as a social activity, and the role music has in religion are a few of the topics examined. Students will also formalize their own opinions on trends in Middle Eastern music and discuss them in the classroom with the instructor. Topics in essential knowledge of performance will be examined.
FORMATS: Lecture

MUSC 2024 Guitar: History and Techniques 1
CREDIT HOURS: 3
This course will introduce students to the various styles of guitar playing from classical to jazz to folk. This term covers the history of the instrument (including lute and other related plucked instruments) and an examination of guitar building techniques and guitar maintenance. Practical guitar instruction will include basic chord playing, music reading (first three strings) and melody playing. The basic rudiments of music theory will also be covered.
CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.
EXCLUSIONS: MUSC 2007.06
FORMATS: Lecture | Lab

MUSC 2025 Guitar: History and Techiques 2
CREDIT HOURS: 3
A continuation of MUSC 2024, this class includes an examination of various music styles and performers related to the guitar. Practical guitar instruction will include advanced chord playing, music reading (all six strings) and melody playing. Theory will include theoretical understanding of various music scales and chord theory.
CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.

PREREQUISITES: MUSC 2024.03
EXCLUSIONS: MUSC 2007.06
FORMATS: Lecture | Lab

MUSC 2026 Modern Guitar I
CREDIT HOURS: 3
This course introduces students to intermediate guitar skills. This class builds on the curriculum of Guitar: History and Techniques and introduces more complex theory leading to an understanding and building of skills in improvisation and song writing. Students will work mostly on understanding and applying major scale theory to chord and melody playing in the fall term.
CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.
EXCLUSIONS: MUSC 2008.06
FORMATS: Lecture | Lab

MUSC 2027 Modern Guitar 2
CREDIT HOURS: 3
A continuation of MUSC 2026, this class includes more advanced guitar techniques as well as understanding and use of minor, pentatonic and modal scales. Advanced chord playing and understanding of chord progressions will be introduced. As well, basic soloing, chord substitution, and bass line patterns will be taught.
CALENDAR NOTES: This course is for non-music majors and cannot be counted toward a music degree.
PREREQUISITES: MUSC 2026.03
EXCLUSIONS: MUSC 2008.06
FORMATS: Lecture | Lab

MUSC 2028 The Art and Science of Drumming 1
CREDIT HOURS: 3
This course aims to give an introduction to hand drumming of various styles, as well as Western Music theory and the concept of so-called “World Music”. Students will learn how to play Basic African (djembe) and Afro-Cuban (conga) techniques and rhythms. Topics in World Music will include the music of Africa, Latin America, and North America, and music theory topics will cover note values and rhythmic dictation.
CALENDAR NOTES: This course is for non-music majors only and cannot be counted for credit in a Music degree program.
EXCLUSIONS: MUSC 2022.06
FORMATS: Lecture | Lab

MUSC 2029 The Art and Science of Drumming 2
CREDIT HOURS: 3
This course is a continuation of the Art and Science of Drumming 1, providing an introduction to hand drumming of various styles as well as Western Music theory and the concept of so-called “World Music”. Students will learn basic Middle-Eastern (dumbek) techniques and rhythms. Topics in World Music will include the music the Middle East, India, Brazil, and Japan, and music theory topics will cover more advanced note values and rhythmic dictation.
CALENDAR NOTES: This course is for non-music majors only and cannot be counted for credit in a Music degree program.
PREREQUISITES: MUSC 2028.03
EXCLUSIONS: MUSC 2022.06
FORMATS: Lecture | Lab

MUSC 2101 Voice II
CREDIT HOURS: 6
By audition only - Auxialry fees apply. Contact Fountain School of Performing Arts. http://dal.ca/fspa
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 3177 Vocal Literature
CREDIT HOURS: 3
An introductory survey of Classical song literature from the Renaissance to the modern day covering the historical context, style and vocal performance practice through listening, assigned readings and score study.
PREREQUISITES: Permission of the instructor
FORMATS: Lecture

MUSC 3199 Half - Recital
CREDIT HOURS: 3
Required for all third-year Bachelor of Music students in the Performance concentration. May also be available to exceptional students in the fourth year of other 120 credit hour Music degree programs, by audition. Students must have completed all 2000-level theory courses as per Calendar guidelines. Students not in BMus Performance concentration must have a co-requisite of a minimum 4000-level applied study course. Please note that additional fees will apply for students not in BMus Performance concentration. This performance is a solo recital only. Recital repertoire should consist of 30 to 45 minutes of music. See the Fountain School of Performing Arts for further details including audition procedures and deadlines. Exclusions: students in 90 credit hour degree programs are not eligible.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Audition and permission of department

MUSC 3200 Beats and Notes: Russian Music from Baroque to Rock
CREDIT HOURS: 3
Designed for the interested listener who wants to learn about the target culture through its melodic legacy, the course will consider the history of Russian music from its origin to the present day. This course is for non-music majors. Knowledge of musical notation and terminology is not a prerequisite. Knowledge of Russian language is not required, but those with the basic command will be given an option of completing special assignments.
CROSSLISTED: RUSN 3200.03
FORMATS: Lecture | Discussion | Other (explain in comments)

MUSC 3210 Composition I
CREDIT HOURS: 6
Open only to students accepted into the BMus Concentration in Composition. Techniques and approaches of today's music studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical

composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.SIGNATURE REQUIRED
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

MUSC 3221 Form and Analysis: the Second Viennese School to the Present Day
CREDIT HOURS: 3
Analysis of selected 20th- and 21st-century compositions.SIGNATURE REQUIRED
PREREQUISITES: MUSC 2222.03, MUSC 2352.03 or MUSC 2355.03, or permission of the Department
EXCLUSIONS: MUSC 4281.03
FORMATS: Lecture

MUSC 3263 Theory of Popular Musics
CREDIT HOURS: 3
This course will focus on jazz and contemporary music theory and harmony practices. Topics will include extended harmony and melodic development that will be used to develop skills in advanced performance, as well as arranging and compositional techniques.
CALENDAR NOTES: This course is required for students in the Bachelor of Music Concentration in Popular Musics.
PREREQUISITES: MUSC 1201.03 or permission of the instructor
FORMATS: Lecture

MUSC 3282 Orchestration
CREDIT HOURS: 3
A survey of the development of the orchestra and the orchestral instruments with an introduction to acoustics. Technique in the deployment of instrumental combinations is emphasized through practical exercises in scoring for small chamber ensembles and a medium-sized orchestra common in the 20th century.
SIGNATURE REQUIRED
PREREQUISITES: MUSC 2222.03
FORMATS: Lecture

MUSC 3283 Modal Counterpoint
CREDIT HOURS: 3
Polyphonic techniques of the Renaissance period studied through written exercises in species and free counterpoint, as well as through analysis of works by Lasso, Palestrina, Victoria and others.SIGNATURE REQUIRED
PREREQUISITES: MUSC 2222.03
EXCLUSIONS: MUSC 3280.03
FORMATS: Lecture

MUSC 3284 Tonal Counterpoint
CREDIT HOURS: 3
A study of tonal counterpoint in the baroque style. A particular emphasis will be made on the instrumental music of its most representative master, J.S. Bach, through analysis of works and writing of stylistic exercises.SIGNATURE REQUIRED
PREREQUISITES: MUSC 2222.03
EXCLUSIONS: MUSC 3280.03
FORMATS: Lecture

MUSC 3308 Modern Guitar (Advanced Fretboard and Harmony)
CREDIT HOURS: 6
For music majors only, this course aims to give the committed guitarist a thorough grounding in fretboard harmony, progressing from the simplest structures to the most complex, and to provide resources and practical exercises for applying this content within various musical idioms.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: MUSC 1102, MUSC 2102
EXCLUSIONS: MUSC 2008
FORMATS: Lecture | Lab

MUSC 3314 History of Opera
CREDIT HOURS: 3
Consideration of the history of Opera from its origin to the present day. Concepts to be examined include: "high" and "low" styles; national styles; gender and race; and function in contemporary Western society.
PREREQUISITES: MUSC 1353.03 or MUSC 2354.03, and MUSC 2352.03 or MUSC 2355.03, or permission of the instructor
EXCLUSIONS: MUSC 2011.06 and MUSC 3311.06
FORMATS: Lecture

MUSC 3353 Chamber Music Literature
CREDIT HOURS: 3
A study in depth of chamber music from the Eighteenth century to contemporary schools.
PREREQUISITES: MUSC 2352.03 or MUSC 2355.03 or permission of the instructor
FORMATS: Lecture

MUSC 3355 The Piano and its Literature
CREDIT HOURS: 3
A study in depth of the evolution of the piano and its repertoire from the Eighteenth century to the contemporary.
PREREQUISITES: MUSC 2352.03 or MUSC 2355.03 or permission of the instructor
FORMATS: Lecture

MUSC 3360 African American Vernacular Music
CREDIT HOURS: 3
A course focusing on vernacular musics developed within or derived from African American cultures from the beginning of the Atlantic slave trade to the present. The course will investigate selected moments in African American history, the musical practices and repertories that accompanied them, and the relationship between music and the African American condition in North America. Topics covered include Spirituals, Blackface Minstrelsy, Blues, Jazz, Gospel, Rhythm and Blues, Rock and Roll, Soul, Reggae, Funk, and Hip Hop. No previous musical background is necessary as basic musical concepts will be taught in class.
FORMATS: Lecture

MUSC 3370 Performance Practice
CREDIT HOURS: 3
This course offers students an opportunity to explore principles of historical performance practice in music prior to 1800 through experiential learning based on historical documents. Topics such as instruments, ornamentation, dance-forms, tempo and articulation will be covered through weekly readings and practicums. Students will have access to the Fountain School's Historical Instrument Collection and will be required to complete both academic and performance assignments. The course may focus on a particular period and/or national tradition, and students may be required to participate in a large-scale historical production.
PREREQUISITES: MUSC 2354.03 and MUSC 2355.03
FORMATS: Lecture | Experiential Learning

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms; partial credit cannot be given for a single term.
FORMATS: Studio

MUSC 4150 Advanced Applied Study
CREDIT HOURS: 6
By special permission of the Fountain School of Performing Arts, a student may enroll in an advanced year of applied study, subject to enrolment quotas and budget. Individual studio instruction. Auxiliary fees apply. Co-requisite ensemble participation is required.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: MUSC 0522X/Y.00: Ensemble (Advanced)
PREREQUISITES: MUSC 4000-level applied study and permission of the instructor, subject to budget and current studio capacity

MUSC 4170 Improvisation Techniques and Practices
CREDIT HOURS: 3
A studio course in the techniques and performance skills of improvisation as related to the jazz idiom, and other contemporary and non-Western music; students will perform as soloists and in small ensembles.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: 3000-level applied study course, and the approval of the instructor
FORMATS: Studio

MUSC 4190 Symphony Apprenticeship
CREDIT HOURS: 6
A student in the Bachelor of Music Performance Concentration who has demonstrated exceptional aptitude and ability in his/her orchestral instrument, appropriate to the standards for employment by Symphony Nova Scotia, will serve apprenticeship in the Symphony, supervised by his/her Applied Study Instructor. Preference will normally be given to a fourth-year student. Normally the majority or all of the 34-38 services will be played during the First Term. Qualification for this credit will be subject to the needs of the Symphony, nomination by the Fountain School of Performing Arts, and a successful audition for the Symphony Artistic Director and relevant Symphony Section Principals. The student will be hired by the Symphony at the current per-service rate, and must be a Member in Good Standing of the Atlantic Federation of Musicians. The student will be graded by his/her supervising Instructor on personal observation and on receipt of a signed evaluation from the Artistic Director of the Symphony. Normally there shall be only one such apprenticeship per season, and it is not renewable.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Nomination by the Fountain School of Performing Arts; audition with Symphony Artistic Director and relevant Symphony Section Principals
RESTRICTIONS: Normally limited to a student in the fourth year of the BMus Program Performance Concentration

MUSC 4192 Short Apprenticeship
CREDIT HOURS: 3
Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 - 60 hours of work on an approved project with a sponsoring organization. Positions may be paid as appropriate, but this is not guaranteed.
PREREQUISITES: Permission of the Fountain School
RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Music or the Bachelor of Music program. Applications for apprenticeships will be evaluated in consultation with faculty by the Associate Director (Music) and the Director of the Fountain School of Performing Arts, who will have final decision about which apprenticeships can be sponsored by the School.
EXCLUSIONS: There are no exclusions, but students who have completed MUSC 4193.06 will not be prioritized if they apply for MUSC 4192.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

MUSC 4193 Long Apprenticeship
CREDIT HOURS: 6
Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 – 120 hours of work on an approved project with a sponsoring organization. Positions may be paid as appropriate, but this is not guaranteed.
RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Music or the Bachelor of Music program. Applications for apprenticeships will be evaluated in consultation with faculty by the Associate Director (Music) and the Director of

the Fountain School of Performing Arts, who will have final decision about which apprenticeships can be sponsored by the School.
EXCLUSIONS: There are no exclusions, but students who have completed MUSC 4193.06 will not be prioritized if they apply for MUSC 4192.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

MUSC 4199 Area Graduation Requirement (Performance: Recital)
CREDIT HOURS: 3
Required of and restricted to all students in the Performance concentration of the Bachelor of Music program. The recital repertoire should consist of 55 to 75 minutes of music.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the department

MUSC 4210 Composition II
CREDIT HOURS: 6
Open only to students accepted into the BMus Concentration in Composition. Techniques and approaches of today's music studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.SIGNATURE REQUIRED
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: MUSC 3210X/Y.06 and permission of the instructor

MUSC 4280 Contemporary Techniques
CREDIT HOURS: 3
Some of today's main compositional techniques will be studied in this course. These may include advanced modal and 12-tone writing, interval and texture-oriented procedures, as well as aleatoric strategies. Special attention will be given to problems of notation and instrumentation raised by the afore-mentioned approaches.SIGNATURE REQUIRED
PREREQUISITES: MUSC 2222.03, 3283.03 or 3284.03
FORMATS: Lecture

MUSC 4299 Area Graduation Requirement (Composition Recital)
CREDIT HOURS: 3
A jury-based assessment of the final requirements for the BMus, Composition Program.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the composition instructor

MUSC 4353 Music Since 1945
CREDIT HOURS: 3
This course examines themes in Music since 1945. Topics to be considered include compositional techniques, music and cultural theory, and avant garde and mainstream musics.
PREREQUISITES: MUSC 2352.03 and MUSC 2353.03, or MUSC 2355.03 or permission of instructor
CROSSLISTED: MUSC 5353
FORMATS: Seminar

MUSC 4354 Popular Music Analysis
CREDIT HOURS: 3
In this course for music majors, we examine various methods and techniques for studying popular music. We consider the central debates of this relatively new field of scholarly inquiry, and we assess the contributions of popular music scholarship to the larger fields of music study.
PREREQUISITES: MUSC 2352.03 and MUSC 2353.03, or MUSC 2355.03 or permission of instructor
CROSSLISTED: MUSC 5354
FORMATS: Seminar

MUSC 4355 Narrative Strategies in Nineteenth-Century Music: Gender, Identity, and Social Politics
CREDIT HOURS: 3
An interdisciplinary survey of nineteenth-century instrumental music, focusing on the narrative potential of nineteenth-century musical conventions and their relationship to other aspects of nineteenth-century Western culture. Representative musical works will be studied within the context of broader social and cultural issues, including gender, race, class, sexuality, nationality, ethnicity, and identity.
PREREQUISITES: Permission of the instructor
CROSSLISTED: GWST 4355.03, MUSC 5355.03
FORMATS: Seminar

MUSC 4356 Opera Studies
CREDIT HOURS: 3
An examination of current critical issues in opera studies. Specific topics may vary from year to year; examples include 'Opera and Politics' and 'Operas of Mozart on Stage and Screen', 'Women in Opera,' 'Opera on Film.'
PREREQUISITES: MUSC 2352.03 or MUSC 2355.03: Open to non-majors by permission of instructor

PREREQUISITES: MUSC 2353.03 or MUSC 2355.03 or permission of the instructor
FORMATS: Seminar

MUSC 4360 Advanced Seminar in Baroque Culture
CREDIT HOURS: 6
This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on opera history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Fountain School of Performing Arts and/or the Department of History.
CROSSLISTED: HIST 4162.06, THEA 4735.06
RESTRICTIONS: 3rd and 4th year students only.
FORMATS: Lecture | Lab

CREDIT HOURS: 6
By audition. Auxiliary fees apply. Contact Fountain School of Performing Arts.

MUSC 4722 Harp IV (Performance)
CREDIT HOURS: 6
By audition only. Auxiliary fees apply. Contact Fountain School of Performing Arts. http://dal.ca/fspa
COREQUISITES: Ensemble co-requisite: MUSC 4751 Ensemble IVa and MUSC 4752 Ensemble IVb OR MUSC 0422X/Y.00 Ensemble IV.
FORMATS: Studio

MUSC 4751 Ensemble IVa
CREDIT HOURS: 1.5
Open to all students by audition, this course is also a co-requisite for students in 4th Year (4000-level) Applied Study (voice or instrument) in music degree programs. The ensembles are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regular weekly rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.
FORMATS: Experiential Learning
LAB HOURS PER WEEK: 3

MUSC 4752 Ensemble IVb
CREDIT HOURS: 1.5
Open to all students by audition, this course is also a co-requisite for students in 4th Year (4000-level) Applied Study (voice or instrument) in music degree programs. The ensembles are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regular weekly rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.
FORMATS: Experiential Learning
LAB HOURS PER WEEK: 3

MUSC 4753 Ensemble (Advanced) a
CREDIT HOURS: 1.5
Open to all students by audition, this course is also a co-requisite for students in Advanced Applied Study (voice or instrument) in music degree programs. The ensembles are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regular weekly rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.
FORMATS: Experiential Learning
LAB HOURS PER WEEK: 3

MUSC 4754 Ensemble (Advanced) b
CREDIT HOURS: 1.5
Open to all students by audition, this course is also a co-requisite for students in Advanced Applied Study (voice or instrument) in music degree programs. The ensembles are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regular weekly rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to Ensemble Participation for further details and a list of ensembles.
FORMATS: Experiential Learning
LAB HOURS PER WEEK: 3

Philosophy

Location: Marion McCain Arts and Social Sciences Building
6135 University Avenue
Room 1142
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3810

Fax: (902) 494-3518

Website: www.philosophy.dal.ca

Email: dalphil@dal.ca

Beginning in Philosophy
There are many different ways of beginning in philosophy. The Dalhousie Philosophy Department offers three sorts of courses for beginners: (1) general survey introductions, which will give you a taste of a variety of questions and answers; (2) introductions to special areas; (3) logic, which is the study of the theory and techniques of good reasoning. Students wishing to major in philosophy are encouraged to begin with Introduction to Philosophy (either PHIL 1000.06 or PHIL 1010.06) in which a wide range of philosophical issues are discussed. Any student may begin philosophy with a course that has no prerequisites, including 1000 level courses and many of the courses at the 2000 level. Some 2000 level courses have prerequisites. The King's College Foundation Year satisfies the requirement of a previous philosophy course. Courses at the 3000 level and beyond usually have further requirements. See the course descriptions.

Degree Programs

All students planning to take a degree in philosophy are encouraged to talk to an undergraduate advisor; those planning to do an honours degree must consult with the honours advisor. Students who intend to specialize in philosophy are encouraged to take an honours degree, which is advantageous for graduate study in philosophy.

In addition to the departmental requirements listed below, students must satisfy the general degree requirements outlined in the Degree Requirements section.

Note: In the statement of program requirements and prerequisites, "credit" means one full credit (six credit hours).

Not all courses are offered every year. Please consult the current timetable to determine if these courses are offered.

Detailed descriptions are available from the department website at philosophy.dal.ca and from the departmental office.

Staff

Dean
Harvey, F., BA, MA, PhD (McGill)

Chair of Department
MacIntosh, D.

Undergraduate Advisor
Borgerson, K.

Honours Advisor
Jeffers, C.

Professors Emeriti
Campbell, R. M., BA (Harvard), PhD (Cornell)
Schotch, P. K., PhD (Waterloo), Munro Professor of Metaphysics (ret)
Sherwin, S. B., BA (York), PhD (Stanford), FRSC (Univ Research Chair)

Professors
Hymers, M., BSc, MA (Dalhousie), PhD (Alberta), Munro Professor of Metaphysics
MacIntosh, D., BA (Queen's), MA (Waterloo), PhD (Toronto)

Associate Professors
Abramson, D., BA (Toronto), MSc, PhD (Indiana)
Borgerson, K., BA (Saskatchewan), MA, PhD (Toronto)
Jeffers, C., BA (York), PhD (Northwestern)

Meynell, L., BA Hons (York), MA (Calgary), PhD (Western)
Scherkoske, G., BA (Clark), MA (Simon Fraser), PhD (Cambridge)

Assistant Professors
Fenton, A., BA Hons (Acadia), MA (Dalhousie), PhD (Calgary)
Hildebrand, T., BA (Pacific Lutheran), PhD (Colorado at Boulder)
Kapusta, S.,MA (Western), PhD (Imperial College, UK), PhD (Frankfurt Am Main, Germany), PhD (Western)

Adjunct Professors
Baressi, J., BS, (Brown), MA (Southern California), MS, PhD (Wisconsin)
Brett, N. C., BA (N.H.), MA, PhD (Waterloo)
Burns, S. A. M., BA (Acadia), MA (Alberta), PhD (London)
Campbell, R. M., BA (Harvard), PhD (Cornell)
Gannett, L., BSc, MA, PhD (UWO)
Kernohan, A., SB (MIT), MSc (Toronto), MA (Dalhousie), PhD (Toronto)
Maitzen, S. A., BA (NW), MA, PhD (Cornell)
McOuat, G., BA, MA, PhD (Toronto)
Schellenberg, J., BA, MA (Calgary), DPhil (Oxford)
Schotch, P. K., PhD (Waterloo)
Sherwin, S. B., BA (York), PhD (Stanford)
Vinci, T., BA (Toronto), MA, PhD (Pittsburgh)
Watkins, M., PhD (Ohio State)
Wein, S., PhD (Waterloo)

Cross Appointment
Baylis, F., BA (McGill), MA, PhD (Western), FRSC, cross-appointed with the Faculty of Medicine
Diamond, E., BA (Vind), MA (Dalhousie), PhD (Northwestern), cross-appointed with the Department of Classics
McOuat, G., BA, MA, PhD (Toronto)

BA with Honours in Philosophy

See general degree requirements for the BA Honours under Degree Requirements.

Students interested in Honours Programs are encouraged to apply by the middle of their third year. Please contact honours advisor. For more information, and to download the honours application form, available online at https://www.dal.ca/campus_life/academic-support/advising/declaring-your-major/how-and-when-to-declare.html

Departmental Requirements

At least 60 credit hours in Philosophy of which at least 54 and no more than 66 are beyond the 1000 level

Select at least six credit hours from the following- Philosophy (Logic):

- PHIL 2130.03: Logic Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning
- PHIL 3140.03: Logic: Logical Theory 1

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 24 credit hours at or above the 3000 level, including three credit hours in:

- PHIL 3051.03: Epistemology
  And

- PHIL 3105.03: Ethics

At least six credit hours at the 4000 level.

Honours Thesis

BA with Combined Honours

See general degree requirements for the BA Combined Honours under Degree requirements.

Departmental Requirements
At least 30 and no more than 48 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level. Since the requirements for the combined honours degree vary (depending on the program with which philosophy is combined), students must see an honours advisor. An honours thesis (or qualifying exam) in one of the two combined subjects is required.

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours chosen from:

- PHIL 3051.03: Epistemology
  or
- PHIL 3105.03: Ethics

Honours Thesis (Philosophy as the primary honours subject)

BA (120 credit hour) Major in Philosophy

See general degree requirements for the BA Major (120 credit hour) under Degree Requirements.

Departmental Requirements
At least 36 and no more than 54 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Ethics: Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy

- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours in:

- PHIL 3051.03: Epistemology
  or
- PHIL 3105.03: Ethics

BA (120 credit hour) Double Major

See general degree requirements for the BA (120 credit hour) Double Major under Degree requirements.

Departmental Requirements
At least 30 and no more than 48 credit hours in Philosophy beyond the 1000 level, including 18 credit hours beyond the 2000 level

Select at least three credit hours from the following - Philosophy (Logic):

- PHIL 2130.03: Logic: Deduction
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select at least six credit hours from the following - Philosophy (History):

- PHIL 2165.03: Philosophy and the Black Experience
- PHIL 2350.03: History of Philosophy: Ancient
- PHIL 2610.03: History of Philosophy: The Rationalists
- PHIL 2620.03: History of Philosophy: The Empiricists
- PHIL 3110.03: History of Ethics: Plato to Epicurus
- PHIL 3115.03: History of Kant's Moral Theory
- PHIL 3630.03: History of Philosophy: Kant
- PHIL 3635.03: History of Philosophy: 19th Century Philosophy
- PHIL 3640.03: History of Philosophy: 20th Century Philosophy
- PHIL 3660.03: Post-Modern Philosophy

At least 18 credit hours at or above the 3000 level including three credit hours chosen from:

- PHIL 3051.03: Epistemology
  or
- PHIL 3105.03: Ethics

BA (90 credit hour) with a Minor in Philosophy

Requirements
A minimum of 18 to a maximum of 27 credit hours in Philosophy beyond the 1000 level, including at least 3 credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Minor in Applied Ethics
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction

- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding of Scientific Reasoning

Select:

- PHIL 3105.03: Ethics

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2081.03: Ethics in the World of Business
- PHIL 2680.03: Ethics in Science
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2480.03: Environmental Ethics
- PHIL 2490.03: Social, Ethical and Professional Issues in Computer Science
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 4801.03: Topics in Ethics and Health Care
- PHIL 4125.03: Topics in Ethics

Contact Philosophy for more information.

Minor in Bioethics
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select:

- PHIL 3105.03: Ethics

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Select at least nine credit hours from the following:

- PHIL 2805.03: Ethics & Health Care: Patient Care
- PHIL 2810.03: Ethics & Health Care: Social Policy
- PHIL 2720.03: The Good Life: Well-being, Meaning and Happiness
- PHIL 3800.03: Philosophy of Medicine
- PHIL 4801.03: Topics in Ethics and Health Care

Contact Philosophy for more information.

Minor in Philosophy
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts (excluding Philosophy), Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Philosophy is also available.

Requirements

A minimum of 18 to a maximum of 27 credit hours in Philosophy beyond the 1000 level, including at least 3 credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03: Logic: Deduction
- PHIL 2085.03: Reasoning Skills
- PHIL 2090.03: How to Win an Argument
- PHIL 2660.03: Logic: Understanding Scientific Reasoning

Contact Philosophy for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
NOTE: Many courses are listed as being exclusionary to one another. This means that students may not take both courses so designated.

NOTE: Courses at the 4000 level are intended for advanced undergraduates with a strong background in philosophy. It is assumed that normally a student will have already taken relevant courses at the 3000-level. Courses with titles beginning "Topics in..." have no description, since the selection of topics and instructor is determined after the time of calendar preparation. These are seminar courses. Interested students should consult the department for up-to-date information.

Course Descriptions

PHIL 1000 Introduction to Philosophy
CREDIT HOURS: 6
An introduction to a variety of philosophical problems, such as the relation of mind to body, freedom of the will, the foundation of morality, the existence of God, the nature of personal identity, and the possibility of knowledge based on reason and experience. Sections differ somewhat in approach and requirements. Consult the department to find out which ones especially suit you. This course does not satisfy the Faculty Writing Requirement.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
EXCLUSIONS: PHIL 1010X/Y.06
FORMATS: Lecture | Discussion

PHIL 1010 Introduction to Philosophy
CREDIT HOURS: 6
An introduction to a variety of philosophical problems, such as the relation of mind to body, freedom of the will, the foundation of morality, the existence of God, the nature of personal identity, and the possibility of knowledge based on reason and experience. Sections differ somewhat in approach and requirements. Consult the department to find out which ones especially suit you. This course does satisfy the Faculty Writing Requirement.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
EXCLUSIONS: PHIL 1000.06
FORMATS: Lecture | Discussion

PHIL 1050 Ethics in Science
CREDIT HOURS: 3
An introduction to ethical questions that arise in the practice of science. The course will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice. One section of this course is offered as part of the Dalhousie Integrated Science Program, that relate to the specific scientific topics studied within that program where it serves as one-half of the writing requirement for first year students and is available to DISP students only.
EXCLUSIONS: PHIL 2680.03
FORMATS: Lecture | Discussion

PHIL 1500 Introduction to Philosophy, Part 1: Ethics, Social and Political Philosophy - Non-Writing Version
CREDIT HOURS: 3
In this class we ask what it is to think logically and critically, whether the existence of God can be proven, whether his existence is relevant to our ethical duties or whether they have some other basis than in divine command (e.g., in contracts for mutual advantage), whether claims about which duties we have can be objectively correct, and whether it is rational to fulfill those duties. We consider sample moral questions, such as whether abortion is permissible, and what duties we have to those less well off, or to animals. Turning to social and political philosophy, we ask what the best political system is, and how goods should be justly distributed. We may ask what racism is, how feminism requires a re-thinking of issues of social justice, whether life has meaning, whether death is to be feared, and whether the value of art works is merely subjective. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak and clearly and logically. Historical and contemporary readings are studied.
CALENDAR NOTES: This course cannot contribute to satisfying the Faculty Writing Requirement. It is recommended that students seeking a full introduction to philosophy also take: Introduction to Philosophy, Part 2, Non-Writing Class Version, however, students may get credit for Part 1 without having to take Part 2. If students do wish to take both parts, they may be taken in any order.

EXCLUSIONS: PHIL 1000X/Y.06, PHIL 1010X/Y.06
FORMATS: Discussion

PHIL 1501 Introduction to Philosophy, Part 2: Epistemology, Metaphysics - Non-Writing Class Version
CREDIT HOURS: 3
In this class we review what it is to think logically and critically, then move on to epistemology, which asks what knowledge is and whether it is possible to have knowledge about ourselves, the minds of others, the past, and the future. Might we just be dreaming the physical world, or can we know it exists? What roles do sense perception and scientific method play in knowledge acquisition? How is this complicated by biases caused by, e.g., racism and sexism? We then study such metaphysical issues as whether the existence of the universe proves that God exists, whether a person's mind is just her brain, whether one can survive bodily death, what it is to be the same person at different times given that everything about a person can be different at a later time, and whether we are really free and morally accountable for the choices we make if, as science says, everything we do is caused by the laws of physics. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak and clearly and logically. Historical and contemporary readings are studied. This course cannot contribute to satisfying the Faculty Writing Requirement. It is recommended that students seeking a full introduction to philosophy also take Introduction to Philosophy, Part 1, Non-Writing Class Version; however, students may get credit for Part 2 without having to take Part 1. If students do wish to take both parts, they may be taken in any order
EXCLUSIONS: PHIL 1010 x/y, PHIL 1000 x/y

PHIL 1810 Introduction to Philosophy, Part 1: Ethics, Social and Political Philosophy - Writing Class Version
CREDIT HOURS: 3
In this class we ask what it is to think logically and critically, whether the existence of God can be proven, whether his existence is relevant to our ethical duties or whether they have some other basis than in divine command (e.g., in contracts for mutual advantage), whether claims about which duties we have can be objectively correct, and whether it is rational to fulfill those duties. We consider sample moral questions, such as whether abortion is permissible, and what duties we have to those less well off, or to animals. Turning to social and political philosophy, we ask what the best political system is, and how goods should be justly distributed. We may ask what racism is, how feminism requires a re-thinking of issues of social justice, whether life has meaning, whether death is to be feared, and whether the value of art works is merely subjective. We learn that the answers to philosophy's profound questions aren't just matters of opinion but must pass rigorous standards of justification; and that philosophy engages with our lives. Students will learn how to evaluate the assumptions of their own cultures about these things, to engage in constructive dialogue, and to write and speak and clearly and logically. Historical and contemporary readings are studied. This course satisfies one half of the Faculty Writing Requirement, but only if the other half is satisfied by taking: Introduction to Philosophy, Part 2, Writing Class Version. The parts may be taken in any order.
EXCLUSIONS: PHIL 1010X/Y.06 and PHIL 1000X/Y.06

PHIL 1820 Introduction to Philosophy, Part 2: Epistemology, Metaphysics - Writing Class Version
CREDIT HOURS: 3
In this class we review what it is to think logically and critically, then move on to epistemology, which asks what knowledge is and whether it is possible to have knowledge about ourselves, the minds of others, the past, and the future. Might we just be dreaming the physical world, or can we know it exists? What roles do sense perception and scientific method play in knowledge acquisition? How is this complicated by biases caused by, e.g., racism and sexism? We then study such metaphysical issues as whether the existence of the universe proves that God exists, whether a person's mind is just her brain, whether one can survive bodily death, what it is to be the same person at different times given that everything about a person can be different at a later time, and whether we are really free and morally accountable for the choices we make if, as science says, everything we do is caused by the laws of physics. This course satisfies one half of the Faculty Writing Requirement, but only if the other half is satisfied by taking: Introduction to Philosophy, Part 1, Writing Class Version. The parts may be taken in any order
CALENDAR NOTES: This course satisfies one half of the Faculty Writing Requirement, but only if the other half is satisfied by taking: Introduction to Philosophy, Part 1, Writing Class Version. The parts may be taken in any order
EXCLUSIONS: PHIL 1010X/Y.06 and PHIL 1000X/Y.06

PHIL 2020 Legal Thinking
CREDIT HOURS: 3
This course examines the role of practical reason in resolving legal controversies. It will address various questions on which there is a current legal debate and challenge students to develop their own informed opinions on these matters. Questions may include: Should the state prevent people from ending their lives to escape the pain of terminal disease? Shall we leave people free to makeup their own minds regarding abortion? Should the law be used to control pornography? Is affirmative action demanded by (or inconsistent with) equality under the law? Legislation enacted in these and other controversial areas will dramatically affect how we live. It thus demands our critical attention.
FORMATS: Lecture | Discussion

PHIL 2081 Ethics in the World of Business
CREDIT HOURS: 3
Business practices are sometimes in accord with moral principles, sometimes at odds with them. By considering cases that illustrate business practices and dilemmas this course studies the application of ethical principles to the world of business in national and international contexts.
EXCLUSIONS: COMM 2310.03
FORMATS: Lecture | Discussion

PHIL 2085 Reasoning Skills
CREDIT HOURS: 3
Thinking clearly and effectively is something that people can learn to do. Understanding some basic concepts as well as mastering certain practical techniques can help in this. In this course you will learn about classifying concepts and how to define them; about the nature of arguments and the way to bring their structure to the surface by diagramming techniques; about some of the classic fallacies people commit in their reasoning; about some of the basic concepts and procedures of logic. This course does not satisfy the logic requirement for the major or honours in Philosophy.
EXCLUSIONS: PHIL 2090.03
FORMATS: Lecture | Discussion

PHIL 2090 How to Win an Argument
CREDIT HOURS: 3
This course is devoted to developing the practical skills involved in evaluating reasoning and producing convincing arguments. Note: this course does not count towards satisfying the logic requirement for the major or honours program.
EXCLUSIONS: PHIL 2085.03
FORMATS: Lecture | Discussion

PHIL 2130 Logic: Deduction
CREDIT HOURS: 3
A systematic introduction to the operations of formal deductive logic, with considerable attention devoted to the relation between artificial and natural language and to the philosophical problems that arise from the study of reasoning. No previous study of logic is presupposed.
FORMATS: Lecture | Discussion

PHIL 2160 Philosophical Issues of Feminism
CREDIT HOURS: 3
An exploration and examination of some of the concepts, issues, and arguments underlying feminist claims and perspectives. Such topics as pornography, rape, mothering, the nature of gender, and feminism's responses to racism will be considered.
CROSSLISTED: GWST 2500.03
FORMATS: Lecture | Discussion

PHIL 2165 Philosophy and the Black Experience
CREDIT HOURS: 3
This is an introduction to Africana philosophy, that is, philosophy by and about people of African descent. It will begin with a brief look at philosophical thought in precolonial Africa and then turn to consider philosophical thought produced in the wake of slavery and colonization.
PREREQUISITES: Successful completion of a 1st year writing requirement course
FORMATS: Lecture | Discussion

PHIL 2170 Philosophy of Sex and Love
CREDIT HOURS: 3
This course offers an examination of key concepts and questions related to love and sexual desire. Topics will include the nature of desire, of romantic love, and of sexual orientation. We will take up questions in sexual ethics and politics, and look at selected concepts such as trust and betrayal, sexual objectification, and perversion.
FORMATS: Lecture | Discussion

PHIL 2205 Philosophy of Religion
CREDIT HOURS: 3
Philosophical exploration of the nature and function of religious faith, belief, and practice. Topics typically include: relations between religion and morals; the existence of divinity/divinities; problems of evil; the nature and significance of religious experiences
CROSSLISTED: RELS 2205.03
FORMATS: Lecture | Discussion

PHIL 2210 Crisis and Consent: Foundations of Political Thought: 1651-1778
CREDIT HOURS: 3
See course description for POLI 2410.03, in the Political Science section of this Calendar.
PREREQUISITES: An introductory course in Philosophy or Political Science
CROSSLISTED: POLI 2410.03
EXCLUSIONS: POLI 2400X/Y.06
FORMATS: Lecture | Tutorial

PHIL 2220 Revolution and Rationality: Foundations of Political Thought: 1789-1900
CREDIT HOURS: 3
See course description for POLI 2420.03, in the Political Science section of this Calendar.
PREREQUISITES: An introductory course in Philosophy or Political Science
CROSSLISTED: POLI 2420.03
EXCLUSIONS: POLI 2270X/Y.06, POLI 2400X/Y.06
FORMATS: Lecture | Tutorial

PHIL 2260 Philosophy of Art
CREDIT HOURS: 3
The objective of this course is to provide students with an overview of a number of different theories concerning the nature of art. It will address questions such as: What is art? What is the place of art in human life? Can judgements of artistic value be rational and objective? What is the relation of the appreciation of artworks to pleasure, emotion, and knowledge?
FORMATS: Lecture | Discussion

PHIL 2350 History of Philosophy: Ancient
CREDIT HOURS: 3
The beginnings of Western philosophy are studied in the writings of the pre-Socratics, Plato, and Aristotle.
FORMATS: Lecture | Discussion

PHIL 2361 Ancient Philosophy: from Thales to Plato
CREDIT HOURS: 3
See course descriptions for CLAS 2361.03 in the Classics section of this calendar.

PHIL 2362 Ancient Philosophy: from Aristotle to Plotinus
CREDIT HOURS: 3
See course description for CLAS 2362.03 in the Classics section of this calendar.

PHIL 2365 Plato and the Case of Socrates: Philosophy on Trial
CREDIT HOURS: 3
See class description for CLAS 2365 in the Classics section of the calendar.
CROSSLISTED: RELS 2365, CLAS 2365
FORMATS: Lecture

PHIL 2381 Medieval Philosophy from Augustine to Anslem
CREDIT HOURS: 3
See class description for CLAS 3381.03 in the Classics section of the calendar.
CROSSLISTED: CLAS 3381.03
EXCLUSIONS: CLAS 3380X/Y.06; PHIL 2380X/Y.06
FORMATS: Lecture

PHIL 2382 Medieval Philosophy from Arabic and Jewish thinkers to Aquinas
CREDIT HOURS: 3
See class description for CLAS 3382.03 in the Classics section of the calendar.
PREREQUISITES: CLAS 3381 or PHIL 2381 or permission of the instructor
CROSSLISTED: CLAS 3382.03
EXCLUSIONS: CLAS 3380X/Y.06, PHIL 2380X/Y.06

PHIL 2450 Democracy, Difference and Citizenship: A Survey of Political Philosophy
CREDIT HOURS: 3
This is a survey course in political philosophy. This course will give participants a foundation for thinking critically about what these key political concepts mean and why people have long thought these ideals behind these concepts are important. This course aims to show students an analytic and normative survey of the topics; it is not intended either as a historical survey or as an intervention in political science (though it would certainly complement such things)
PREREQUISITES: Successful completion of a 1st year writing requirement course
CROSSLISTED: POLI 2450.03
FORMATS: Lecture | Discussion

PHIL 2475 Justice in Global Perspective
CREDIT HOURS: 3
In this course, we will explore answers to the central question in philosophical ethics “How should we live our lives and interact with others?” in the context of the international community or “Global Village” in which we now live. The course will involve close concentration on analyses of liberal and non-liberal theorists from around the world on the subjects of: moral rights, the nature of justice, social welfare, human diversity and equality, and the nature of social responsibility. Specific topics may include: the impact of globalization on understanding of moral rights (human rights, labour rights, language rights, etc.), developing world responses to western conceptualizations of rights, new conceptions of justice and social transformation including conceptions of restorative justice, conceptualizations or race and ethnicity and sources of personal and communal identity, the nature and importance of autonomy, the importance of different cultural constructions of gender and the problem of sexual violence in a global perspective, and frameworks for understanding shared agency and shared responsibility for poverty and environmental degradation.
FORMATS: Lecture | Discussion

PHIL 2480 Environmental Ethics
CREDIT HOURS: 3
This course examines humanity’s relation to nature from a philosophical perspective. Of particular importance will be the moral or ethical obligations humanity may have towards the natural environment. Attention will be given to the historical sources of the attitudes and values that have given rise to current ecological problems in the environment, as well as to the question of how to remediate our relationship to nature. We will read from environmental holists, biocentrics, ecofeminists, deep ecologists, and others, and discuss issues concerning animal rights, environmental justice, and activism.
FORMATS: Lecture | Discussion

PHIL 2485 Technology and the Environment
CREDIT HOURS: 3
What is technology and what role does it play in current environmental problems? Can technologies help us find solutions to environmental crises, or are those problems themselves a direct result of seeing the world from a technological point of view? In this course, we will assess the environmental impact of particular technologies (e.g., fossil fuel technologies, pharmaceutical and information technologies) and discuss sustainable alternatives and appropriate technologies in developing as well as developed nations.
CROSSLISTED: INTD 2485.03
FORMATS: Lecture | Discussion

PHIL 2490 Social, Ethical and Professional Issues in Computer Science
CREDIT HOURS: 3
Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).
PREREQUISITES: No previous knowledge of computing or of philosophy is assumed. Some familiarity with computers is an advantage.
CROSSLISTED: CSCI 3101.03

EXCLUSIONS: COMP 3090.03
FORMATS: Lecture | Discussion

PHIL 2560 Minds and Machines: Introduction to Cognitive Science
CREDIT HOURS: 3
Could we build a robot (or program a computer) that has a mind? What is the relationship between the mind, brain, body and the world? How can technology assist cognition? In what ways are human cognitive systems similar to and different from animal cognitive systems? The course takes a philosophical approach, introducing assumptions and issues arising in research at the intersections of artificial intelligence, robotics, neuroscience, psychology, linguistics, animal cognition, evolutionary biology, and philosophy. This is a useful complement to a major in any Cognitive Science discipline, as well as a fascinating investigation of cognition for anyone who has wondered about what the human mind is and how it works.
EXCLUSIONS: PHIL 3460
FORMATS: Lecture | Discussion

PHIL 2610 History of Philosophy: The Rationalists
CREDIT HOURS: 3
Modern philosophers (those working in the European tradition between, roughly 1600 and 1800 CE) can be divided into two schools: Rationalists, who believed that all knowledge ultimately rests on reason alone; and Empiricists, who believed that all knowledge ultimately rests on our sense experience. This course investigates the central ideas of Rationalist philosophers - especially, Descartes, Leibniz and Spinoza. It will provide students with an overview of the central ideas and controversies in this school, such as the proper method of philosophy; the distinction between reason and innate ideas, sense-perception and imagination; the significance of basic ontological categories (substance, mode, cause, force, action); the place of religious belief in philosophy.
PREREQUISITES: One previous credit in philosophy or permission of the instructor
FORMATS: Lecture | Discussion

PHIL 2620 History of Philosophy: The Empiricists
CREDIT HOURS: 3
Modern philosophers (those working in the European tradition between, roughly 1600 and 1800 CE) can be divided into two schools: Empiricists, who believed that all knowledge ultimately rests on our sense experience; and Rationalists, who believed that all knowledge ultimately rests on reason alone. This course investigates the central ideas of Empiricist philosophers - especially, Locke, Berkeley and Hume - with an introduction to Kant. It will provide students with an overview of the central ideas and controversies in this school, such as the nature of ideas, personal identity, human agency, the nature of body, causation and induction.
PREREQUISITES: One previous credit in philosophy or permission of the instructor
FORMATS: Lecture | Discussion

PHIL 2650 Modern German Philosophy
CREDIT HOURS: 6
See class description for GERM 2650.06 in the German section of the calendar.
CROSSLISTED: GERM 2650.06
FORMATS: Lecture | Tutorial

PHIL 2651 Modern German Philosophy I
CREDIT HOURS: 3
See class description for GERM 2651.03 in the German section of the calendar.
CROSSLISTED: GERM 2651.03
EXCLUSIONS: GERM/PHIL 2650X/Y.06
FORMATS: Lecture | Seminar

PHIL 2652 Modern German Philosophy II
CREDIT HOURS: 3
See class description for GERM 2652.03 in the German section of the calendar.
COREQUISITES: GERM 2652.03
CROSSLISTED: GERM 2652.03
EXCLUSIONS: GERM/PHIL 2650X/Y.06
FORMATS: Lecture | Seminar

PHIL 2660 Logic: Understanding of Scientific Reasoning
CREDIT HOURS: 3
The course is a general philosophical introduction to methods of evaluating hypotheses, experimental tests, and reasoning in science with applications to everyday reasoning as well. The course is divided into discussion of three kinds of evaluation: theoretical hypotheses, statistical and causal hypotheses, and decisions. No background in science or philosophy is presupposed for this course.
FORMATS: Lecture | Discussion

PHIL 2680 Ethics in Science
CREDIT HOURS: 3
An introduction to ethical questions that arise in the practice of science. The class will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice.
EXCLUSIONS: PHIL 1050.03

PHIL 2710 Existentialism
CREDIT HOURS: 3
The existentialists focus on what is individual and unique about human lives. They emphasize the sense in which we choose projects and lives and even deaths for ourselves and find self-deception in our ways of avoiding choices. Some existentialists argue that whatever meaning our lives have must be invented. Some contend that life is absurd. This course is an introduction to the themes of existentialism through the study of the philosophy and fiction of Dostoevsky, Ortega y Gasset, Sartre,

Camus, and Simone de Beauvoir.
FORMATS: Lecture | Discussion

PHIL 2720 The Good Life: Well-Being, Meaning & Happiness
CREDIT HOURS: 3
This course is a survey of various ethical views in the history of Western Philosophy, concentrating on the issues facing people who are concerned with what human beings should aim for and do if they are to lead lives that are fulfilling.
FORMATS: Lecture | Discussion

PHIL 2805 Ethics & Health Care: Patient Care
CREDIT HOURS: 3
Should physicians be allowed to lie to patients? When, if ever, should health professionals be permitted to override decisions made by patients? Should medical decisions made by children be respected? Should health professionals tell patients about "near misses"? Should people have living wills? Should physicians be permitted to assist patients in committing suicide? In this class we will explore questions related to the health professional-patient relationship through a combination of lecture and discussions.
FORMATS: Lecture | Discussion

PHIL 2810 Ethics & Health Care: Social Policy
CREDIT HOURS: 3
Do all people have a right to health care? How should we make allocation decisions about scarce health care resources? Should Canadians be allowed to buy organs? Should health care professionals be allowed to refuse to provide a referral for abortion? What are the ethical implications of prenatal genetic testing? Should health care workers be required to receive an annual influenza vaccination? What types of research on humans should be prohibited? In this class we will explore questions of this nature through a combination of lecture and discussion.
FORMATS: Lecture | Discussion

PHIL 3051 Epistemology
CREDIT HOURS: 3
A study of fundamental issues in the contemporary theory of knowledge. The course examines skepticism and investigates the nature of knowledge, belief, meaning, evidence, and truth. Questions are raised about perception and memory and their relation to knowledge.
PREREQUISITES: Two of PHIL 2610.03, PHIL 2620.03, 2130.03 or permission of the instructor
CROSSLISTED: PHIL 5051.03
FORMATS: Lecture | Discussion

PHIL 3105 Ethics
CREDIT HOURS: 3
A systematic study of the foundation of morality, including readings from Kant's, "Foundation of the Metaphysics of Morals" and Hume's, "A Treatise of Human Nature."
PREREQUISITES: Two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5105.03
FORMATS: Lecture | Discussion

PHIL 3106 Animal Ethics
CREDIT HOURS: 3
How should we treat the other animals with whom we share this planet? This question frames the issues we explore in this course. Answering it will require examining some points of contact between our understanding of the minds of other animals and challenges or insights offered by central approaches in ethics. Topics will typically include how other animals should be treated in our homes, on our farms, in our zoos or aquaria, in our laboratories, and - among free-living (wild) populations - in their home territories.
RESTRICTIONS: Third year or above
FORMATS: Lecture

PHIL 3110 History of Ethics: Plato to Epicurus
CREDIT HOURS: 3
In this course we will carefully read a number of seminal works in the history of Western Moral Philosophy covering Plato, Aristotle, Stoicism and Epicureanism.
PREREQUISITES: Two previous credits in philosophy
CROSSLISTED: PHIL 5110.03
FORMATS: Seminar | Discussion

PHIL 3115 History of Ethics: Kant's Moral Theory
CREDIT HOURS: 3
In this course we will look closely at one of the most seminal thinkers in the history of Western Moral Philosophy. The course will explore Kant's own writing, some of his most important predecessors, and contemporary commentators. The course will aim to develop a plausible understanding of Kantian ethics - including both its normative and meta-ethical commitments. A primary concern will be the relevance of Kant's views for contemporary moral reflection.
PREREQUISITES: Two previous credits in philosophy
CROSSLISTED: PHIL 5111.03
FORMATS: Seminar | Discussion

PHIL 3140 Logic: Logical Theory I
CREDIT HOURS: 3
An introduction to non-classical logics from a formal perspective.
PREREQUISITES: PHIL 2130.03
CROSSLISTED: PHIL 5140.03
FORMATS: Lecture | Discussion

PHIL 3170 Contemporary Feminist Theories
CREDIT HOURS: 3
Contemporary feminism is not a single theory but comprises multiple theoretical perspectives, reflecting both a diversity in women's experience of subordination and a diversity of interests and approaches. This course aims to present some of the richness and variety in feminist theory while offering students the opportunity for sustained critical engagement with influential feminist thinkers.
PREREQUISITES: One previous credit in philosophy or in Gender and Women's Studies or permission of the instructor.
CROSSLISTED: GWST 3500.03, PHIL 5170
FORMATS: Lecture | Discussion

PHIL 3211 Philosophy of Law
CREDIT HOURS: 3
Is coercion central to law? How are law and morality related? What justification can be given for punishment? What is the appropriate scope of individual liberty? These and other issues relating to the analysis and evaluation of law will be considered. The course will examine the competing claims of the Positivist, Realist, and Natural Law accounts of law before turning to some normative issues concerning the justification of legal practice.
PREREQUISITES: Two previous credits in philosophy, permission of the instructor
CROSSLISTED: PHIL 5211.03
FORMATS: Lecture | Discussion

PHIL 3300 Philosophy of Language
CREDIT HOURS: 3
How is it possible for this string of marks to ask you a question? What is it for a word to have a meaning? Is the meaning of a an idea that you associate with it? Is it the objects in the world that it picks out? Is it an abstract "object" of some kind? What is the relationship between language and the world? Between words and sentences? Between what I mean and what I say? Between saying and acting? Between what I say and what you understand? Between meaning and linguistic use? Between meaning and behaviour? Between meaning and truth? Between the literal the metaphorical? Is there any meaning at all? This introduction to some major themes in the Philosophy of Language will explore answers to such questions as these, focusing on the work of such figures as Locke, Frege, Russell, Wittgenstein, Carnap, Quine, Chomsky, Austin, Langton, Saul, Searle, Hesse and Davidson.
PREREQUISITES: Two previous credits in philosophy including one half credit in logic class, half- or full-year
CROSSLISTED: PHIL 5300.03
FORMATS: Lecture | Discussion

PHIL 3361 Ethics, Justice, and Economics
CREDIT HOURS: 3
See course description for ECON 3360.03 in the Economics section of this calendar.
PREREQUISITES: ECON 2200.03, ECON 2201.03
CROSSLISTED: ECON 3360.03
FORMATS: Lecture

PHIL 3420 Philosophy of Biology
CREDIT HOURS: 3
This course provides an up-to-date systematic examination of central issues in the philosophy of biology. Topics typically include: How far can the Darwinian paradigm be taken to explain adaptive complexity? Is the new emphasis on developmental theory likely to revolutionize evolutionary theory? What are the most fundamental units of selection? Can the concept of biological function be understood without attributing purpose to nature? Why is the concept of species so elusive? Is there a human nature? Is genuine altruism possible given the forces of selection? Is there progress in evolution? How should clashes between faith and reason over the nature of our evolution be resolved?
PREREQUISITES: One previous credit in philosophy or biology
CROSSLISTED: BIOL 3580.03, PHIL 5420.03
FORMATS: Lecture | Discussion

PHIL 3434 The Ancient Origins of Political Thought: From Homer to Aristotle
CREDIT HOURS: 3
See course description for POLI 3434.03 in the Political Science section of this calendar.
CROSSLISTED: POLI 3434.03, CLAS 3434.03
FORMATS: Lecture | Tutorial

PHIL 3445 Philosophy of Mind: The Mind-Body Problem
CREDIT HOURS: 3
This course will critically examine philosophical and scientific articles, and possibly short works of fiction, which explore various theories, problems and arguments regarding the status of minds in the physical world and the relationships between mind, body and world. We will explore and discuss controversies regarding the thesis that the mind is (nothing but?) the brain, and issues such as the theoretical foundations of artificial intelligence, the problem of subjectivity and consciousness, “naturalized” intentionality (how thoughts—if they are physical things or processes— can have the property of being about other things), and animal cognition.
PREREQUISITES: Two previous credits in philosophy
CROSSLISTED: PHIL 5445.03
EXCLUSIONS: PHIL 3440.03
FORMATS: Lecture | Discussion

PHIL 3450 Philosophy of Emotions
CREDIT HOURS: 3
We will concentrate on the resurgence of philosophical interest in the emotions over the last twenty years. Although it is obvious that much human action is emotionally driven, traditionally many philosophers have expressed skepticism about the value of emotions to rational and ethical conduct. Recently, philosophers such as Martha Nussbaum, Amelie Rorty and Ronald De Sousa have argued powerfully that rationality requires emotions. Other philosophers have argued that we need a renewed assessment of the epistemic importance of emotion in revealing power and value. Topics will include emotional rationality; emotion and value; first person authority;

cognitive, social constructivist and psycho-evolutionary approaches; emotion and feminist epistemology; emotion, power and racial construction.
PREREQUISITES: At least one previous credit in philosophy including one half credit above the 1000 level.
CROSSLISTED: PHIL 5450
FORMATS: Lecture | Discussion

PHIL 3475 Democratic Theory
CREDIT HOURS: 3
See course description for POLI 3475.03 in the Political Science section of this calendar.

PHIL 3476 Liberalism and Global Justice
CREDIT HOURS: 3
This is a course in normative political theory. We will critically examine some recent normative political theory, and then examine the prospects and perils of attempts by recent liberal theory to articulate a principled vision of global justice. We will consider Rawls' original bounded theory of justice and examine some challenges it faces from both cosmopolitan theories of justice and proponents of nationalism. Next we'll consider rival political conceptions of liberal international justice, and Rawls' response in the form of his recent "The Law of Peoples." Concluding, we will examine specific issues of applied political justice (namely, human rights and immigration) as well as issues of economic and social justice and poverty.
PREREQUISITES: 1 credit in Philosophy or Political Science or permission of the instructor
CROSSLISTED: POLI 3476.03, INTD 'Approved List,' PHIL 5476.03
FORMATS: Lecture | Discussion

PHIL 3520 Philosophy of Social Science
CREDIT HOURS: 3
Can people from different cultures understand each other? What is to be a member of a culture? Are societies best thought of as collections of individuals, or are individuals constituted by societies? In what sense are the social sciences "sciences"? Are societies describable by explanatory laws? What counts as an explanation of human behaviour: This course explores these and related questions through a reading of classic and contemporary philosophers and social theorists.
PREREQUISITES: two full credits in philosophy
CROSSLISTED: POLI 3496.03, PHIL 5520.03

PHIL 3530 Freedom, Action, and Responsibility
CREDIT HOURS: 3
An investigation of the nature of action seeking criteria for individuating, describing, and explaining actions. Topics may include the roles of volitions, intentions, motives, and reasons in actions; responsibility for actions and the concept of free actions.
PREREQUISITES: Two previous credits in philosophy
CROSSLISTED: PHIL 5530.03
FORMATS: Lecture | Discussion

PHIL 3630 History of Philosophy: Kant
CREDIT HOURS: 3
This course will examine the Epistemology and Metaphysics of Immanuel Kant.
PREREQUISITES: PHIL 2610.03 or PHIL 2620.03 or permission of the instructor
CROSSLISTED: PHIL 5630.03
FORMATS: Lecture | Discussion

PHIL 3635 History of Philosophy: 19th-Century Philosophy
CREDIT HOURS: 3
This course will study major figures in 19th-century philosophy between Kant and Russell: Fichte, Hegel, Schopenhauer, Marx, Kierkegaard, Mill, Nietzsche, James and Bradley. Attention will also be paid to some important figures in related arts and sciences (e.g., Beethoven, Wagner, Ibsen, Feuerbach, Darwin, Freud, Wollstonecraft, Frege). We shall trace the main lines of development in epistemology and metaphysics as well as in ethics and political philosophy.
PREREQUISITES: PHIL 2610.03 or 2620.03
CROSSLISTED: PHIL 5635.03
FORMATS: Lecture | Discussion

PHIL 3640 History of Philosophy: Twentieth-Century Philosophy
CREDIT HOURS: 3
The Twentieth Century has been a period of revolutionary change in Anglophone philosophy. This course surveys the most influential figures, including Moore, Austin, Ayer, Wittgenstein, and Quine.
PREREQUISITES: One previous credit in the history of philosophy or permission of the instructor
CROSSLISTED: PHIL 5640.03
FORMATS: Lecture | Discussion

PHIL 3660 Post-Modern Philosophy
CREDIT HOURS: 3
Modern Philosophy is a philosophical perspective in which individuals and their conscious thoughts are paramount. Post-modern philosophy rejects this perspective, replacing it with one in which language and society are paramount. We shall study this perspective in the writings of post-Wittgenstein philosophers like Rorty in the English-speaking world as well as those like Derrida, Irigaray, and Habermas on the Continent. (This course is designed to complement 3640.03 but can be taken independently).
PREREQUISITES: Two previous credits in philosophy (including, ideally, PHIL 2610 or PHIL 2620)
CROSSLISTED: PHIL 5660.03
FORMATS: Lecture | Discussion

PHIL 3670 Philosophy of Science
CREDIT HOURS: 3
This course offers an advanced survey of issues in the philosophy of science. Topics typically include: the demarcation between science and pseudo-science; scientific method and explanation; metaphysical assumptions of science and the role of values in scientific method and practice. Particular attention will be paid to key episodes in 20th Century philosophy of science. No scientific background is presupposed.
PREREQUISITES: At least two previous credits in philosophy, including one logic course, such as PHIL 2130.03, PHIL 2660.03 or, permission of instructor
CROSSLISTED: PHIL 5670.03
FORMATS: Lecture | Discussion

PHIL 3800 Philosophy of Medicine
CREDIT HOURS: 3
Is medicine a science? How should we define health and disease? Do definitions of disease help us to understand cognitive disabilities or disorders? Is a risk for a disease, for instance high cholesterol, itself a disease or is this a misuse of the concept? Should health care professionals provide care whenever a patient claims to be suffering or only when the patient has a recognized disease or disorder? What are the implications of classifying too much of normal human experience as disordered? Are screening tests, for instance mammography, typically a good idea because it is better to be safe than sorry? Should health care providers aim to practice evidence-based medicine? Should complementary and alternative medicine be held to the same epistemic standards as mainstream medicine? In this class, we consider these questions, among others. This course aims to explore perspectives on the most important philosophical issues in the emerging field of philosophy of medicine, with particular attention to medical epistemology and metaphysics.
PREREQUISITES: Two previous credits in Philosophy (including ideally Philosophy 2805 and Philosophy 2810).
CROSSLISTED: PHIL 5805
FORMATS: Lecture

PHIL 3851 Metaphysics
CREDIT HOURS: 3
A study of topics such as the nature of substance and change, body and mind, cause and effect, and the concept of existence.
PREREQUISITES: Two previous credits in philosophy including PHIL 1000.06 or PHIL 1010.06 or PHIL 2610.03 or PHIL 2620.03
CROSSLISTED: PHIL 5851.03
FORMATS: Lecture | Discussion

PHIL 4055 Topics in Epistemology
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in epistemology and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5055.03
FORMATS: Seminar

PHIL 4070 Topics in Philosophy of Psychology
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the philosophy of psychology and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5070.03
FORMATS: Seminar

PHIL 4115 Topics in Ethics I
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in ethical theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5115.03
FORMATS: Seminar

PHIL 4120 Theory of Rational Decision
CREDIT HOURS: 3
A study of foundational problems in contemporary theory of rational decision and its philosophical applications, drawing on work by philosophers, psychologists, economists and mathematicians.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5120.03
FORMATS: Seminar

PHIL 4125 Topics in Ethics II
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in ethics and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
CROSSLISTED: PHIL 5125.03
FORMATS: Seminar

PHIL 4150 Contemporary Metaethics
CREDIT HOURS: 3
This seminar course surveys contemporary work in metaethics - the branch of moral philosophy concerned with the metaphysical, epistemological, semantic and psychological commitments of the moral discourse and practice.

PREREQUISITES: 2 courses in Philosophy
CROSSLISTED: PHIL 5150.03
FORMATS: Seminar

PHIL 4165 Logic: Logical Theory II
CREDIT HOURS: 3
Devoted primarily to the study of formal semantics and its relation to symbolic language.
PREREQUISITES: PHIL 2130.03, PHIL 2140.03, PHIL 3140.03 or permission of the instructor
EXCLUSIONS: PHIL 5165.03
FORMATS: Lecture | Discussion

PHIL 4190 Topics in the History of Philosophy I: Wittgenstein
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the History of Philosophy and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5190.03
FORMATS: Seminar

PHIL 4191 Topics in the History of Philosophy II
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Descartes or Spinoza) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5191.03
FORMATS: Seminar

PHIL 4192 Topics in the History of Philosophy III
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Locke or Hume) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5192.03
FORMATS: Seminar

PHIL 4200 Topics in Normative Theory
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in Normative Theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5200.03
FORMATS: Seminar

PHIL 4220 Contemporary Philosophical Issues
CREDIT HOURS: 3
Intensive study of a few topics which are currently being debated and may fall outside of or cut across standard classification of areas of interest. Examples are: evolution and value, philosophical accounts of "race" and culture, artificial intelligence, probability, theories of causation, supervenience.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5220.03
FORMATS: Seminar

PHIL 4361 Ethics, Justice and Economics
CREDIT HOURS: 3
Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism Nozickian libertarianism, Sen's capabilities approach and equality of opportunity.
CROSSLISTED: Econ 4360.03
EXCLUSIONS: PHIL 3361.03, ECON 3360.03
FORMATS: Lecture

PHIL 4470 Contemporary Liberalism and Democracy
CREDIT HOURS: 3
Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed.
PREREQUISITES: Two full credits in philosophy or political science or permission of the instructor
CROSSLISTED: POLI 4479.03/5479.03, ECON 4446.03/5446.03, PHIL 5470.03
FORMATS: Seminar

PHIL 4500 Topics in Feminist Philosophy
CREDIT HOURS: 3
In this course, we shall explore some of the current research in a focused area of feminist philosophy. Previous topics have included feminist ethics, feminist epistemology, post modern feminism, the feminist sexuality debates and ecofeminism.
PREREQUISITES: Strong background in philosophy or feminist theory (normally including at least one previous course in feminist philosophy or instructor's consent)
CROSSLISTED: GWST 4500.03/5500.03, PHIL 5500.03
FORMATS: Seminar

PHIL 4510 Topics in the Philosophy of Language
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the Philosophy of Language and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5510.03
FORMATS: Seminar

PHIL 4680 Topics in the Philosophy of Science
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the Philosophy of Science and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5680.03
FORMATS: Seminar

PHIL 4700 Philosophy of Race
CREDIT HOURS: 3
This course explores the metaphysics and ethics of race. Topics covered include: what "race" means; how old the concept is; whether races exist; what kinds of thing races are; whether it is valuable to acknowledge one's racial identity; and what counts as racism.
PREREQUISITES: At least two previous credits in Philosophy or permission of instructor
CROSSLISTED: PHIL 5700.03
FORMATS: Seminar

PHIL 4801 Topics in Ethics and Health Care
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in Ethics and Health Care and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: PHIL 2800.06 or 2805.03 AND 2810.03 or permission of the instructor
CROSSLISTED: PHIL 5801.03, BIOT 5801.03
FORMATS: Seminar

PHIL 4855 Topics in Metaphysics
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in Metaphysics and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
CROSSLISTED: PHIL 5855.03
FORMATS: Seminar

PHIL 4940 Directed Reading
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to PHIL 4960/PHIL 4970/PHIL 4980/PHIL 4990.
CALENDAR NOTES: Students taking PHIL 4970X/Y.06 OR 4990X/Y.06 must register in both X and Y in consecutive terms; credit will only be given if both are completed consecutively.
PREREQUISITES: At least two previous credits in philosophy or permission of the instructor
RESTRICTIONS: Students may only register for this class with the written permission of the faculty member

PHIL 4960 Directed Readings
CREDIT HOURS: 3
See PHIL 4940.

PHIL 4970 Directed Reading
CREDIT HOURS: 6
See PHIL 4940.

PHIL 4980 Directed Readings
CREDIT HOURS: 3
See PHIL 4940.

PHIL 4990 Directed Reading
CREDIT HOURS: 6
See PHIL 4940.

What is Political Science?
Politics has been described as "Who gets what, when, how, and why" in a society. It is the process by which collective decisions and actions are advocated, debated, contested, and implemented in communities – local, regional, national, and international.

The study of politics, or Political Science, is almost as old as the practice of politics. In ancient civilizations like Greece, political philosophers concerned themselves with the characteristics of a good society, including conceptions of justice and order. These issues still concern political scientists, but their focus now covers a wider range of issues, including institutions of government, non-state actors like social movements or political parties, political identities and cleavages, and international relations (including war, peace, trade, aid or humanitarianism).

Political Science is important because it fosters informed citizens in an age of political complexity and uncertainty. It has been described, only partly in jest, as "defence against the dark arts" of politics. The study of political science enables students to better understand the exercise of political power and authority, and the values, laws, institutions, and policy processes by which decisions are made and implemented. It also focuses on the similarities and differences between patterns and processes in different political communities, within and beyond our own country. It helps prepare students for a wide range of careers, such as teaching, law, public policy, advocacy, journalism, or business.

The department offers courses on a wide range of topics, including: political ideas and philosophies, political institutions and processes in different parts of the world (e.g., Canada, the US, Africa, Europe, or Latin America), the roles of interest groups and political parties, international politics (including conflict and cooperation, peacebuilding and human rights, and diplomacy and development), and how to *do* political research (research methods). Course topics also include globalization, environmental politics, aboriginal politics, and the politics of health care, among others.

The admissions requirements for Political Science are listed under the Faculty of Arts and Social Sciences. There are no additional requirements for Political Science beyond those of the Faculty.

Students thinking of majoring or doing an Honours degree in Political Science are encouraged to speak with the department's Undergraduate Advisor or Honours Coordinator about developing a program of studies that suits their needs and interests.

For General Interest
Students who have not yet decided on a major, or are looking for an elective in Political Science, should take one of the Introductory courses or consider taking advantage of the DalCAP option.

PLEASE NOTE: Students who complete the King's Foundation Year program with a grade of "B-" or higher will not be required to complete an Introductory course in Political Science.

Students should take no more than the equivalent of six credit hours in 1000 level Political Science courses.

Degree Programs
Students concentrating in Political Science may take a 90 credit hour minor program, 120 credit hour major, or 120 credit hour honours program. The degree requirements are listed in the University and Faculty regulations, and in departmental regulations outlined below.

A student's program may consist of a general selection of courses from the Department's offerings or may emphasize one of the sub-fields of Political Science, as set out below.

Students are encouraged to develop distinctive programs tailored to their own particular interests and circumstances. They should, however, seek advice early in their program to ensure that they are consistent with University regulations.

In addition to the departmental requirements, students must satisfy the requirements outlined in the Degree Requirements section.

In addition to introductory courses, Political Science courses are divided into four subfields:

- Canadian Government and Politics
- Comparative Government and Politics
- Political Theory and Methodology
- International Politics and Foreign Policy

Full course descriptions

Introductory

- POLI 1050.03: Ideas, Politics, People
- POLI 1055.03: Government and Democracy
- POLI 1060.03: Political Worlds: Themes and Concepts
- POLI 1065.03: Political Worlds: The Global Domain
- POLI 1100 X/Y.06: Political Worlds: An Introduction to Government and Politics
- POLI 1103 X/Y.06: Intro to Government and Politics
- POLI 1500.06: Globalizations

Canadian Government and Politics

- POLI 2210.03: Unity and Diversity: The Federal Dynamics of Canadian Politics
- POLI 2215.03: Canadian Aboriginal Politics: An Institutional Perspective
- POLI 2220.03: Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government
- POLI 2230.03: Municipal Law and City Politics in Canada
- POLI 3206.03: Constitutional Law and Politics in Canada
- POLI 3208.03: Canadian Provincial Politics
- POLI 3220.03: Intergovernmental Relations
- POLI 3224.03: Canadian Political Parties
- POLI 3228.03: Pressure Politics in Canada
- POLI 3232.03: Local Government in Canada
- POLI 3233.03: Canadian & Global Economy
- POLI 3235.03 The Politics of Regionalism
- POLI 3250.03: Canadian Public Administration
- POLI 3405.03: Canadian Political Thought
- POLI 4207.03: Canadian Politics: Themes and Theories
- POLI 4228.03: Pressure Politics in Canada: Opportunities and Obstacles
- POLI 4240.03: Policy Formulation in Canada
- POLI 4242.03: Politics of Reason, Passion, and Biology
- POLI 4260.03: The Politics of Health Care

Comparative Government and Politics

- POLI 2300X/Y.06: Comparative Politics
- POLI 2301.03: Comparative Politics I: Developed Democracies under Pressure
- POLI 2302.03: Comparative Politics II: The Developing World
- POLI 2350.03: Governance and Globalization
- POLI 3304.03: Comparative Federalism
- POLI 3311.03: Sport and Politics
- POLI 3315.03: African Politics
- POLI 3320.03: European Politics
- POLI 3321.03: Politics of the European Union
- POLI 3360.03: Politics in Latin America
- POLI 3365.03: Politics of the Middle East
- POLI 3378.03: U.S. Constitution, Government, and Politics
- POLI 3385.03: Politics of the Environment
- POLI 3390.03: Politics of Consumption
- POLI 4302.03: Governance and Administration in Developing Countries: Issues and Controversies
- POLI 4303.03: Human Rights: Political Issues
- POLI 4322.03: The EU as a Global Actor
- POLI 4340.03: Approaches to Development
- POLI 4355.03: Comparative Perspectives on the Development State
- POLI 4380.03: Politics of Climate Change
- POLI 4390.03: Practicum in Public Policy: NGOs and Government Services

Political Theory and Methodology

- POLI 2410.03: Crisis and Consent: Foundations of Political Thought: 1651-1778
- POLI 2420.03: Revolution and Rationality: Foundations of Political Thought, 1789-1900
- POLI 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy
- POLI 3401.03: Contemporary Political Thought
- POLI 3405.03: Canadian Political Thought
- POLI 3426.03: Sex and the State
- POLI 3427.03: The Sexualization of Western Political Thought
- POLI 3431.03: Politics Through Film and Literature
- POLI 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle
- POLI 3440.03: The Politics of Fear
- POLI 3450.03: Storm and Stress: Romanticism and the Backlash Against Enlightenment Political Thought
- POLI 3475.03: Democratic Theory
- POLI 3476.03: Liberalism & Global Justice
- POLI 3492.03: Political Inquiry I
- POLI 3493.03: Political Inquiry II
- POLI 4403.03: Human Rights: Philosophical Issues
- POLI 4479.03: Liberalism
- POLI 4481.03: Theories of Violence, Persecution, Genocide

International Politics and Foreign Policy

- POLI 2520.03: World Politics
- POLI 2530.03: Foreign Policy in Theory and Practice
- POLI 2540.03: Canadian American Relations
- POLI 3505.03: Human Rights: Foundations
- POLI 3520.03: Building Peace and Democracy
- POLI 3525.03: Comparative Foreign Policy Simulation
- POLI 3531.03: The United Nations in World Politics
- POLI 3532.03: Model UN
- POLI 3535.03: Wealth, Power and Poverty in the Global South
- POLI 3540.03: Foreign Policy in the Third World
- POLI 3544.03: Political Economy of Southern Africa
- POLI 3546.03: Social Media and Politics
- POLI 3560.03: Issues in Global Security and Development
- POLI 3565.03: Contemporary Security Studies
- POLI 3567.03: International Organization
- POLI 3568.03: Canada and the World
- POLI 3569.03: Canadian Foreign Policy
- POLI 3574.03: American Foreign Policy
- POLI 3576.03: Defence Policy in Canada
- POLI 3581.03: Diplomacy and Negotiation
- POLI 3587.03: International Political Economy
- POLI 3589.03: Politics of the Sea I
- POLI 3596.03: Exploring Global Conflict and Violence
- POLI 4340.03: Approaches to Development
- POLI 4505.03: Human Rights Legal Issues
- POLI 4512.03: The Politics of North America
- POLI 4523.03: International Relations Theory 1: Order, Conflict and Change
- POLI 4524.03: International Relations Theory 2: Cooperation, Institutions and Development
- POLI 4561.03: Security Development Nexus: Theory, Policy and Complex Operations
- POLI 4569.03: Canadian Foreign Policy
- POLI 4581.03: International Diplomacy: Institutions and Practices
- POLI 4587.03: International Political Economy
- POLI 4590.03: Politics of the Sea II

- POLI 4636.03: Nationalism and Statecraft

Reading Courses (with permission of individual instructor)

- POLI 3601X/Y.06: Readings in Political Science
- POLI 3602.03: Readings in Political Science
- POLI 3603.03: Readings in Political Science
- POLI 4810.03: Special Topics in Political Science
- POLI 4820.03: Special Topics in Political Science

Special Topics (offered occasionally)

- POLI 2810.03: Special Topics in Political Science
- POLI 2820.03: Special Topics in Political Science
- POLI 3810.03: Special Topics in Political Science
- POLI 3820.03: Special Topics in Political Science
- POLI 4810.03: Special Topics in Political Science
- POLI 4820.03: Special Topics in Political Science

BA (120 credit hour) Major in Political Science

The Major program offers the opportunity for students to design a more focused study within a specific subfield of Political Science. The Major program requires 120 credit hours: students must have a minimum of 36 and a maximum of 54 credit hours in Political Science above the 1000 level; 18 of these credit hours must be beyond the 2000 level.

Departmental Requirements

1000 level

- 6 credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B-or higher)

A writing course or King's Foundation Year Program.

2000 level

- Students must complete 6 credit hours in two different core course areas, for a total of 12 credit hours. The core course areas are as follows:
  - Canadian government and politics: POLI 2210.03 and POLI 2220.03
  - Comparative government and politics: POLI 2300X/Y.06, POLI 2301.03 and POLI 2302.03
  - Political theory and methodology: POLI 2410.03 and POLI 2420.03
  - International politics and foreign policy: POLI 2520.03 and POLI 2530.03

3000 level

- 18 credit hours at or above the 3000 level in Political Science. Note: three credit hours must be either POLI 3492.03 (or an equivalent quantitative methods course approved by the Department) or POLI 3493.03

4000 level

- 3 credit hours at the 4000 level.

3 additional credit hours in Political Science above the 1000 level

BA (120 credit hour) Double Major in Political Science

Departmental Requirements

1000 level

- 6 credit hours at the 1000 level in Political Science or the Foundation Year Program (with a final grade of B- or higher)

A writing course or King's Foundation Year Program

2000 level

- Students must complete 6 credit hours in two different core course areas, for a total of 12 credit hours. The core course areas are as follows:
  - Canadian government and politics: POLI 2210.03 and POLI 2220.03
  - Comparative government and politics: POLI 2300X/Y.06, POLI 2301.03 and POLI 2302.03
  - Political theory and methodology: POLI 2410.03 and POLI 2420.03
  - International politics and foreign policy: POLI 2520.03 and POLI 2530.03

3000 level

- 18 credit hours at or above the 3000 level in Political Science. Note: three credit hours must be either POLI 3492.03 (or an equivalent quantitative methods course approved by the Department) or POLI 3493.03.

4000 level

- 3 credit hours at the 4000 level

3 additional credit hours in Political Science above 1000 level.

Honours Program

An Honours program is an alternative version of the undergraduate degree, which involves more intensive—and extensive—coursework within the discipline of Political Science, and requires students to maintain higher grades in relevant courses. It is thus generally seen as a more demanding and prestigious program of study. The Department offers a thesis-based Honours program, which involves independent research chosen by the student, in consultation with their supervisor. Thesis-based honours degrees are designed to teach students how to plan and execute a focused research project, working closely with the supervisor of their choice. Honours

students in the Department are given special instruction, both individually and collectively, on methodologies, research design, data collection, ethical issues, and cutting-edge debates in the discipline. They work closely with other Honours students in sharing ideas and experiences as they pursue their respective research projects. The Honours degree is generally chosen by students planning to pursue graduate studies or a professional degree, but they can be a good choice for any student with good preparation, a strong work ethic, and a desire to produce original research. In terms of career development, Honours degrees are useful as they signal that an individual is capable of performing to high standards, can work independently, can think rigorously and creatively, and can express complicated ideas clearly and coherently.

In most cases, students apply to the Honours program at the end of their third year, and, if accepted, are formally enrolled in the program at the start of their fourth year. It is, however, never too early to be thinking about the Honours program, and early attention to program requirements can help ensure successful applications and timely completion. Students considering an Honours degree in Political Science are encouraged to meet with the Honours Coordinator and the Undergraduate Advisor, who will be happy to assist in selecting classes and addressing any administrative questions that may arise.

The deadline each year to apply for the Honours program is August 31st.

Program Requirements
The requirements listed below are just for admission to, and completion of, the Honours program in Political Science. Honours students must also complete the relevant requirements for the College of Arts and Social Sciences ("General Degree Requirements").

As part of a 120 credit hour degree, the Honours program consists of not less than 54 credit hours, and not more than 60 credit hours, in Political Science above 1000 level. The program requires students to take some specific courses, and to choose some other courses from a list of designated courses, to ensure that they acquire the necessary preparation in "core" areas of Political Science. Exceptions to the requirements stipulated below can only be obtained through written petition to the Undergraduate Committee, which reserves the authority to determine admission into the Honours program in these cases.

Required Courses and Grades
To gain admittance into the Honours program, students must have:

1. B grade average in their last 60 credit hours of coursework;

2. B+ grade average in a group of 24 credit hours in Political Science, which must include:

    - The two core courses for the Political Theory subfield: POLI 2410.03 and POLI 2420.03;
    - One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
        - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
        - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
        - International Relations: POLI 2520.03 and POLI 2530.03.
    - The two research methods courses: POLI 3492.03 and POLI 3493.03;
    - 6 additional credit hours at the 3000- or 4000-level in Political Science.

Students in the Honours program **must complete <u>all</u> of the following courses by the end of their program**:

- **1000 level:** 6 credit hours at the 1000 level in Political Science or the Kings Foundation Year Program (with a final grade of B- or higher) including a writing course
- **2000 level:** POLI 2410.03 and POLI 2420.03, plus at least 6 additional credit hours from the 2000-level core courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses;
- **4000 level:** POLI 4600.06.
- An additional 18 credit hours in Political Science above the 1000 level.

Honours essay and Honours Seminar
In addition to the courses above, students in the Political Science Honours program will complete an Honours thesis, under the supervision of a faculty member in the department. The Honours thesis is normally undertaken in the fourth year of the program (after admission to the Honours program), and is completed <u>during</u> the academic year.

The Honours thesis is an opportunity for the student to undertake a more sustained scholarly project, featuring theoretical analysis and/or systematic, empirical research. It normally takes the form of a formal essay of approximately 40 double-spaced pages.

Students undertake the Honours thesis with guidance and support from a designated faculty mentor (the Honours thesis supervisor). Students admitted to the Honours program should consult with the Honours Coordinator—usually early in the fall semester—to identify a suitable faculty mentor and make arrangements for supervision. Each student should expect to meet with his or her supervisor regularly in the second half of the Fall and through the Winter term, to report on progress and receive advice on the project. When the Honours thesis is completed (usually in March of the Honours year), the student will sit down with the members of his or her committee—the supervisor, another faculty member (the examiner) and, in most cases, the Honours Coordinator—to answer questions about the Honours project and its results (the oral "defence").

The Honours thesis is associated with a formal course, led by the Honours Coordinator: the Honours Seminar (POLI 4600.06), which counts for 6 credit-hours toward the degree. Participation in the Honours Seminar counts toward the "21st grade," required by the University.

Combined Honours
An Honours program is an alternative version of the undergraduate degree, which involves more intensive—and extensive—coursework within a discipline, and requires students to maintain higher grades in relevant courses. It is thus generally seen as a more demanding and prestigious program of studies.

The Combined Honours is a modified version of the Honours program, which allows students to specialize in more than one discipline. Interested students should also review the procedures and requirements for the regular ("Concentrated") Honours program, listed separately.

In most cases, students apply to the Combined Honours program at the end of their third year, and, if accepted, are formally enrolled in the program at the start of their fourth year. It is, however, never too early to be thinking about Honours, and early attention to program requirements can help ensure successful applications and timely completion. Students considering an Honours degree in Political Science are encouraged to meet with the Honours Coordinator and the Undergraduate Advisor, who will be happy to assist in selecting classes and addressing any administrative questions that may arise.

The requirements listed below are just for admission to, and completion of, the Combined Honours program in Political Science. Combined Honours students must also complete the relevant requirements for the College of Arts and Social Sciences ("General Degree Requirements").

The procedures and requirements for Combined Honours depend on which department the student chooses as his or her primary discipline. Those that choose Political Science as the primary discipline for their Combined Honours will apply through the Political Science department, be advised by the Political Science Honours Coordinator, and participate in the Political Science Honours Seminar. Those that choose another department as their primary discipline, will apply through and follow the guidelines for that other department; but they must still satisfy some basic requirements set down by the Political Science department (see below).

For both versions of Combined Honours, the deadline each year to apply is August 31st.

Combined Honours with Political Science as primary discipline
The Department offers a thesis-based Honours program, which involves independent research chosen by students, in consultation with their supervisor. Thesis-based honours degrees are designed to teach students how to design and execute focused research projects, working closely with the supervisor of their choice. Honours students in the Department are given special instruction, both individually and collectively, on methodologies, research design, data collection, ethical issues, and cutting-edge debates in the discipline. They work closely with other Honours students in sharing ideas and experiences as they pursue their respective research projects. The Honours degree is generally chosen by students planning to pursue graduate studies or a professional degree, but they can be a good choice for any student with good preparation, a strong work ethic, and a desire to produce original research. In terms of career development, Honours degrees are useful as they signal that an individual is capable of performing to high standards, can work independently, can think rigorously and creatively, and can express complicated ideas clearly and coherently.

Program Requirements
The requirements listed below are just for admission to, and completion of, the Combined Honours program, with Political Science as primary discipline. Combined Honours students must also complete the relevant requirements for the College of Arts and Social Sciences ("General Degree Requirements") and for the BA (120 credit hour) Major in Political Science.

The program requires students to take some specific courses, and to choose some other courses from a list of designated courses, to ensure that they acquire the necessary preparation in core areas of Political Science. Exceptions to the requirements stipulated below can only be obtained through written petition to the Undergraduate Committee, which reserves the authority to determine admission into the Honours program in these cases.

To obtain the Combined Honours, the student must also satisfy the specific program requirements required by the other (secondary discipline) department. This are listed separately, in the calendar entry for the other department.

Required Courses and Grades
To gain admittance into the Combined Honours program (with Political Science as the primary discipline), students must have:

1. B grade average in their last 60 credit hours of coursework;
2. B+ grade average in a group of 12 credit hours in Political Science, which must include

- The two core courses for the Political Theory subfield: POLI 2410.03 and POLI 2420.03;
- One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
    - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
    - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
    - International Relations: POLI 2520.03 and POLI 2530.03.

Students in the Combined Honours program (with Political Science as the primary discipline) **must complete <u>all</u> of the following courses by the end of their program**:

- **1000 level**: 6 credit hours in Political Science (or the Foundation Year Program, with a final grade of B- or higher).
- **2000 level:** POLI 2410.03 and POLI 2420.03, plus at least 6 additional credit hours from the 2000-level "core" courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses;
- **4000 level:** POLI 4600.06 (including Honours thesis, described above).

Students considering a Combined Honours degree should seek advice, as early as possible, from the Honours Coordinator.

Combined Honours with another department as primary discipline

Students taking a Combined Honours degree with another department as the primary discipline will mainly be governed by the procedures and rules set by that department, and should seek advice from the relevant program coordinator.

However, in order to obtain a Combined Honours degree with Political Science as the secondary discipline, students must still fulfill specific minimum requirements set by Political Science.

To gain admittance into the Combined Honours program, with another department as the primary discipline, students must have:

1. B+ grade average in a group of 12 credit hours in Political Science, which must include:

- One of the following pairs of 2000-level core courses, representing one of the other subfields of Political Science:
  - Canadian Politics: POLI 2210.03 and POLI 2220.03; or
  - Comparative Politics: POLI 2301.03 and POLI 2302.03; or
  - Political Theory: POLI 2410.03 and POLI 2420.03; or
  - International Relations: POLI 2520.03 and POLI 2530.03.

Students in the Combined Honours program, with another department as the primary discipline, **must complete all of the following courses by the end of their program**:

- **1000 level**: 6 credit hours in Political Science (or the Foundation Year Program, with a final grade of B- or higher).
- **2000 level:** at least 6 credit hours from the 2000-level core courses listed above (i.e., POLI 2210.03 and POLI 2220.03, or POLI 2301.03 and POLI 2302.03, or POLI 2410.03 and POLI 2420.03, or POLI 2520.03 and POLI 2530.03);
- **3000 level:** POLI 3492.03 and POLI 3493.03, plus at least 12 additional credit hours of 3000-level or 4000-level Political Science courses.
- An additional 6 credit hours in Political Science above the 1000 level.

Students considering a Combined Honours degree should seek advice, as early as possible, from the Honours Coordinator.

BA (90 credit hour) Minor in Political Science

See the Minor in Political Science section of this Calendar

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

POLI 1050 Ideas, Politics, and People
CREDIT HOURS: 3
This course is an introduction to major political concepts, ideas, and disputes. It provides a foundation for all further courses in political science. By reference to current political issues, we explore the ideologies of nationalism, liberalism, socialism, conservatism, fascism, feminism, and other political ideas. A unit on political economy elucidates what these ideologies mean in practice. Another unit on political culture examines how these ideologies work out differently in individual nation-states. POLI 1055.03 follows sequentially.
EXCLUSIONS: POLI 1100X/Y.06, POLI 1103X/Y.06, POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1060,03
FORMATS: Lecture

POLI 1055 Governments and Democracy
CREDIT HOURS: 3
What do governments do? And how is democratic government distinct and valuable? In this course, we study how the institutions of government - legislatures, constitutions, federalism, judiciary, electoral system - operate. A unit on political violence and democratization includes material on development and modernization theory. All this material leads to a final question: Is global governance the next stage in the development of democracy? This course follows sequentially from POLI 1050.03
EXCLUSIONS: POLI 1100X/Y.06, POLI 1103X/Y.06, POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03
FORMATS: Lecture

POLI 1060 Political Worlds: Themes and Concepts
CREDIT HOURS: 3
In this introductory course, you will be exposed to the diverse worlds of political life. You will be introduced to a range of key issues and approaches that animate both research and contemporary politics in various parts of the world. Topics addressed will include: fundamental concepts in political science; political philosophies and the bedrocks of various ideologies; the nature and limits of democracy; the Canadian regime and American regimes (how their ‘governments' and institutions work in comparison); forms of political participation; culture and socialization; and the relationship between politics and the media.
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1050.03, POLI 1100X/Y.06, POLI 1103X/Y.06, POLI 1500.06/SOSA 1500.06
FORMATS: Lecture | Discussion

POLI 1065 Political Worlds: the Global Domain
CREDIT HOURS: 3
This course, which builds on Political Science 1060, introduces you to key approaches, actors, and issues in the study of global politics. After discussing the role of theory and history in understanding contemporary global politics, it considers the role of national governments, international and regional organizations (like the United Nations, the European Union, or the African Union), Non-governmental organizations (like the Red Cross or Greenpeace), and Multinational Corporations. It then looks at the Politics of Global Security and Human Rights, and the Politics of Global welfare (including trade, poverty alleviation, and environmental stress). The objective is to increase your global political ‘literacy', to better understand contemporary global challenges and to prepare you for further study of international relations and comparative politics.
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1103X/Y.06, POLI 1500.06/SOSA 1500.06
FORMATS: Lecture | Discussion

POLI 1100 Political Worlds: An Introduction to Government and Politics
CREDIT HOURS: 6
In this team-taught introductory course, you will be exposed to the diverse worlds of political life through the research and teaching interests of a diverse range of professors in the Political Science department. They will introduce you to a range of key issues and approaches that animate both their own research and contemporary politics in various parts of the world. Topics addressed will include: the nature and limits of democracy; the relationship between economic wealth and political power; the quest for human rights; the nature of diplomacy and international organization; the challenge of defining and promoting international security; the challenges of global inequality and development; forms of political participation; the politics of environmental sustainability; and the relationship between politics and sports.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1103X/Y.06, POLI 1050.03, POLI 1055.03, POLI 1060.03, POLI 1065.03, POLI1500.06/SOSA 1500.06
FORMATS: Lecture

POLI 1103 Introduction to Government and Politics
CREDIT HOURS: 6
This course is a general introduction to the study of politics in a variety of contexts. It covers concepts and problems similar to those in our other 1000 level courses, but it also serves as the Department's designated writing course, and has a different mix of readings and assignments.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1050.03, POLI 1055.03, POLI 1060.03, POLI 1065.03
FORMATS: Lecture

POLI 1500 Globalizations
CREDIT HOURS: 6
Globalization refers to the multiple ways nations, communities, and people are connected and disconnected across traditional boundaries. The course covers key concepts from political science, sociology and social anthropology with a view to examining how interactions of large scale global processes, politics, and policies resonate in communities, social institutions and people's everyday lives. We will focus upon the changing dynamics of global capitalism as these are manifest in the political, economic, and sociological conditions across and within regions, nations, and communities.
CROSSLISTED: SOSA 1500.06
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1050.03, POLI 1055.03, POLI

FORMATS: Lecture | Tutorial

POLI 2210 Unity and Diversity: The Federal Dynamics of Canadian Politics
CREDIT HOURS: 3
This course is an introduction to the social, economic, and participatory dynamics that drive Canadian politics. It covers political culture, regionalism, political economy, interest groups, social movements, and elections. Federalism is central to all these topics, as we study the role of Quebec nationalism in the federation's evolution, the relationship between the Charter of Rights and Freedoms and federalism, the place of emerging "orders of government" (including Aboriginal governments), and debates concerning the causes and consequences of centralization and decentralization in the Canadian federation.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2200X/Y.06
FORMATS: Lecture | Discussion

POLI 2215 Canadian Aboriginal Politics: An Institutional Perspective
CREDIT HOURS: 3
The course addresses some basic, but key issues in Aboriginal politics in Canada from an institutional perspective. The goal is to provide students with broad knowledge of the institutional, historical, and current issues surrounding the Aboriginal/Canadian state/Crown relationship and some future trends, as well as gain familiarity with the most important court cases and their impact. By the end of the course, it is expected that students will be able to recognize who the Aboriginal peoples of Canada are, the historical Crown/Aboriginal relationship and its evolution, and a considerable understanding of the current status of Aboriginal politics in Canada.
FORMATS: Lecture

POLI 2220 Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government
CREDIT HOURS: 3
Canadian government is dominated by prime ministers and premiers. Why this concentration of power at both the federal and provincial levels of government? Are Members of Parliament who are not in the Cabinet really "nobodies" as one recent PM characterized them? Are Cabinets themselves becoming no more than "focus groups"? Do unelected partisan aides and public service advisors have more influence than the vast majority of elected representatives? Are political parties irrelevant as vehicles for citizen engagement? Are interest groups or social movements any more relevant? Do elections matter? Are the media merely the political instruments of the business elites? These are among the issues that are examined in this course in an attempt to understand the most critical factors that shape the structuring of power in contemporary Canadian government.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2200X/Y.06
FORMATS: Lecture | Discussion

POLI 2230 Municipal Law and City Politics in Canada
CREDIT HOURS: 3
Most Canadians live in cities, yet local government is the weakest unit in our federal system. What accounts for this? After all, local government has often been described as the foundation of democracy. In Canada, local governments have many unique characteristics, from their constitutional status to the council system and a tradition of non-partisan government. We will explore the character of local government and the issues related to local governance, including regional and metropolitan restructuring and citizen participation, municipal finance, provincial-local relations, and the role of the federal government.
PREREQUISITES: 1000-level course in Political Science or King's FYP recommended.
EXCLUSIONS: POLI 3216.03 and POLI 3232.03
FORMATS: Lecture | Discussion

POLI 2300 Comparative Politics
CREDIT HOURS: 6
This course introduces students to the methodology and scope of comparative politics, including analysis of political institutions and behaviour. General overviews and selected case studies are provided for liberal democracies, post-communist, newly industrializing and least developed countries. Topics include theories of the state, political culture and socialization, electoral and party systems, interest groups, ethnic and regional cleavages, gender politics, policy outcomes and system performance, political participation and leadership and contemporary challenges and changes. Group presentations are used for student exploration of these themes.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: 1000 level political science course or Kings FYP recommended
EXCLUSIONS: POLI 2301.03 and POLI 2302.03
FORMATS: Lecture | Discussion

POLI 2301 Comparative Politics I: Developed Democracies under Pressure
CREDIT HOURS: 3
The course surveys the methods and scope of Comparative Politics. It does so through an examination of what have been the two major prototypes of democratic systems in the contemporary world: liberal democracies (industrial, capitalist nations) featuring examples of presidential systems (USA) and parliamentary models (UK and Japan); and illiberal democracies as found in some post-communist (Russia) and emerging industrialized states (Mexico). After a general overview of the nature of these classifications, countries from each will be studied in depth. Concepts and theories which are useful for comparing political life in various countries will be discussed. In each case, contemporary trends which put democratic practices under pressure or threaten their continuity altogether will be introduced. It is paired with POLI 2302 on Developing States to provide the core undergraduate requirement in Comparative Politics
PREREQUISITES: 1000-level Political Science course or King's FYP recommended.
EXCLUSIONS: POLI 2300X/Y
FORMATS: Lecture | Discussion

POLI 2302 Comparative Politics II: the Developing World
CREDIT HOURS: 3
This course proceeds on the assumption that it is fascinating to study diverse political systems and processes in their own right; but further, that through comparison and generalization, we can gain a better understanding of the characteristics of politics everywhere, including our own country. The course surveys the methods and scope

of Comparative Politics. It does so through an examination of what have been the three major classifications of political systems in the post-World War II world, with particular focus on "Third World" countries (an increasingly problematic term encompassing "Newly Industrializing Countries" and "Less Developed Countries"). After a general overview of the nature of these classifications, countries from each will be studied in depth. Concepts and theories which are useful for comparing political life in various countries will be discussed.
PREREQUISITES: 1000-level Political Science course or King's FYP recommended
EXCLUSIONS: POLI 2300
FORMATS: Lecture | Discussion

POLI 2350 Governance and Globalization
CREDIT HOURS: 3
This seminar course provides students with an opportunity for critical evaluation of the reshapings of political processes and institutions that are occurring as the result of globalization. The course will explore the concept of governance in the context of changing dynamics related to the trans-nationalisation of production and increased capital mobility as well as the rise in numbers and influence of NGOs and new social movements. Hence, “new” forms of governance emerging out of decentralization and/or disinvestment of state authority and supra-national arrangements that are broadly captured within the concept of “global governance” will be explored along with traditional concepts of governance that centre on the actors, structures and environments of governmental policy-making. A range of issues will be examined – governance of economies, environment, communications, human rights, health, conflict and complex emergencies – within the context of debates involving the “internationalization” of the state; the role of identities – e.g. nationalist, ethnic, gender, cosmopolitan; the growing relevance of regions and the nature of and prospects for democracy and citizenship.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 3350.03
FORMATS: Seminar

POLI 2410 Crisis and Consent: Foundations of Political Thought: 1651-1778
CREDIT HOURS: 3
This course covers some of the most important early modern theorists (Hobbes, Locke, Hume, Smith, Rousseau, and Montesquieu). It looks at the development of natural rights, democracy, capitalism, and citizenship.
PREREQUISITES: 1000-level course in Political Science or Philosophy or Kings FYP recommended
CROSSLISTED: PHIL 2210.03
EXCLUSIONS: POLI 2400X/Y.06
FORMATS: Lecture | Tutorial

POLI 2420 Revolution and Rationality: Foundations of Political Thought, 1789-1900
CREDIT HOURS: 3
This course focuses upon late-eighteenth and nineteenth-century thought (Burke, Paine, Tocqueville, Mill, Hegel, Marx, Nietzsche), and investigates human rights, democracy, utilitarianism, individualism, socialism, and the roots of postmodern thought. POLI 2410 is not a formal prerequisite for POLI 2420, although students will find POLI 2410 a very useful introduction to POLI 2420.
PREREQUISITES: 1000-level course in Philosophy or Political Science or Kings FYP recommended
CROSSLISTED: PHIL 2220.03
EXCLUSIONS: POLI 2400X/Y.06
FORMATS: Lecture | Tutorial

POLI 2450 Democracy, Difference and Citizenship: A Survey of Political Philosophy
CREDIT HOURS: 3
This is a survey course in Political Philosophy. This course will give participants a foundation for thinking critically about what these key political concepts mean and why people have long thought these ideals behind these concepts are important. This course aims to show students an analytic and normative survey of the topics; it is not intended either as a historical survey or as an intervention in political science (though it would certainly complement such things)
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: 1000-level course in Political Science or Philosophy or Kings FYP recommended
CROSSLISTED: PHIL 2450.03
FORMATS: Lecture

POLI 2520 World Politics
CREDIT HOURS: 3
Why do states fight wars? Commit genocide? Sign treaties? Acquire and sell ballistic missile and nuclear technologies? Join economic and military alliances? Enforce and/or dismantle sanctions against states like Iraq, Iran or North Korea? Why can’t we enforce international law as effectively as we enforce domestic law? Can we identify (and enforce) an objective set of universal moral values to guide relations between states and peoples? Is the U.N. a useful institution or is it destined to fail? Should NATO have intervened in conflicts in Bosnia, Kosovo, Rwanda or Afghanistan? What were the factors that led to the US-UK invasion of Iraq in 2003, and what does this tell us about US foreign policy and the origins of major conflict? These are some of the questions the course is designed to answer.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2500X/Y.06
FORMATS: Lecture | Discussion

POLI 2530 Foreign Policy in Theory and Practice
CREDIT HOURS: 3
Foreign Policy is concerned with the way that individual states decide on their priorities and strategies in relation to the rest of the world. This course begins with a brief review of International Relations theories and their application to foreign policy. The main part of the course explores theories about what drives foreign policy decision-making: political systems, bureaucracy, culture, psychology, and leadership. The last part of the course looks at the instruments of foreign policy, with particular attention to the military, trade and investment, and foreign aid. All parts of the course feature a mix of abstract theory and specific, real-world examples.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2500X/Y.06
FORMATS: Lecture | Discussion

POLI 2540 Canadian-American Relations
CREDIT HOURS: 3
Canada's relationship with the United States affects almost every aspect of our political, economic, social and cultural life. The U.S. outranks Canada on all the dimensions of power and influence by factors of 10 or 12 to one, and in some fields (e.g., military capacity) by considerably more. Well over 40% of Canada's economic production goes into exports, and of that well over 80% goes to the United States. Canadians cannot go to the movies, watch television, listen to popular music, consume fast food, or do errands at the local shopping centre without exposing themselves to what a prominent American political scientist has described as his country's 'soft power'. This course will consider how Canadians are affected by these and other influences from south of the border, how they have debated them among themselves, and what public policies have been established in response to the concerns they have generated.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2510X/Y.06, 2512X/Y.06
FORMATS: Lecture | Discussion

POLI 2810 Special Topics in Political Science
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to POLI 2820.
PREREQUISITES: Permission of the instructor.
FORMATS: Lecture | Seminar

POLI 2820 Special Topics in Political Science
CREDIT HOURS: 3
See POLI 2810.

POLI 3206 Constitutional Law and Politics in Canada
CREDIT HOURS: 3
These are political issues that possess an important constitutional dimension. They include judicial review and the role of the Supreme Court of Canada, constitutional amendment, the representation formula, the Charter of Rights and Freedoms, language rights and the Crown.
PREREQUISITES: POLI 2210.03 or 2220.03 recommended
FORMATS: Seminar

POLI 3208 Canadian Provincial Politics
CREDIT HOURS: 3
An analysis of the dynamics and structures of provincial governments. Topics may include: Political parties, voting behaviour, legislatures, electoral systems, bureaucracies and the formulation of economic, energy, environmental, and other policies. Attention is also paid to interprovincial and intergovernmental relations.
PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended
FORMATS: Seminar

POLI 3220 Intergovernmental Relations
CREDIT HOURS: 3
This course will examine the territorial division of political and administrative power and the nature of relations between governments which result from such a division of power, including federal-provincial-municipal or "tri-level" relations. Specific topics will include the role of the courts in constitutional interpretations, the instruments of "fiscal federalism" (including equalization payments, conditional grants, tax sharing arrangements and shared cost programs), administrative relationships and the concept of "executive federalism". These themes will be pursued further by each student through the preparation of a research paper. This paper will deal with a policy area selected by the student (transportation, education, health, etc.) and will provide an opportunity for a more intensive examination of the impact of intergovernmental relations, on public policy and vice versa. For additional information about course requirements, please consult the instructor.
PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended
FORMATS: Lecture | Discussion

POLI 3224 Canadian Political Parties
CREDIT HOURS: 3
The Canadian party system, viewed as an integral part of the entire political system, presents a number of interesting questions for exploration, such as lower voter turnout, electoral reform, the role of party leaders, and the manner in which parties contribute to Canadian democracy. The particular themes emphasized will vary from year to year. Approved with Canadian Studies.
PREREQUISITES: POLI 2210.03 and POLI 2220.03 recommended
FORMATS: Lecture | Discussion

POLI 3228 Pressure Politics in Canada
CREDIT HOURS: 3
The goal of this seminar is to explore the opportunities for and obstacles to advocacy politics in Canada. We analyze the strategies that pressure groups use to engage the most important loci of power in the Canadian political system; parliament, the public service and the courts.
PREREQUISITES: 1000 level course in Political Science or Kings FYP recommended.
EXCLUSIONS: POLI 4228.03, POLI 5228.03
FORMATS: Lecture | Discussion

POLI 3232 Municipal Law, Urban Governance and Public Policy in Canada
CREDIT HOURS: 3
Most Canadians live in cities, yet local government is the weakest unit in our federal system. What accounts for this? After all, local government has often been described as the foundation of democracy. In Canada, local governments have many unique characteristics, from their constitutional status to the council system and a tradition of non-partisan government. We will explore the character of local government and the issues related to local governance, including regional and metropolitan restructuring and citizen participation, municipal finance, provincial-local relations, and the role of the federal government.
PREREQUISITES: 1000-level course in Political Science or Kings FYP recommended
EXCLUSIONS: POLI 2230 and POLI 3231
FORMATS: Lecture | Discussion

POLI 3233 Canada in the Global Economy
CREDIT HOURS: 3
This seminar course, for senior undergraduates, will explore the relationship between politics and economic life in Canada. The course addresses the placement of Canada in continental and global economies at a time of profound transnational integration and accelerated technological change. It surveys major themes and perspectives in Canadian political economy tradition and evaluates past and current practices in Canada's economic governance. It will introduce students to staples, liberal and neo-classical, socialist, and feminist analyses of the nature of Canada's economic development, and the role of the state in economic life. The importance of commercial, industrial and resource sectors will be examined. The transition to the service sector and information economy will be addressed. The impact of Canada's imperial, global and continental relationships will also be considered, including the negotiation and impact of economic and trade agreements. Other themes include the role of women, industrial relations and trade unions, first nations and immigrant communities, and the future evolution of the political economy and economic policy. Students will debate controversial themes on each topic. Student essays will explore a range of contemporary issues including debt, federal-provincial fiscal relations, the economic consequences of Quebec separation, women in the economy, development prospects for first nations, regional inequality and development programs, immigrants and economic revival, and policies on trade, industrial development, investment, intellectual property, human resources, technological change, poverty and inequality, and the impact of economic forces on national unity.
PREREQUISITES: Open to undergraduates who have completed courses in Canadian politics or economic history, or by permission of the instructor.
FORMATS: Seminar

POLI 3235 The Politics of Regionalism
CREDIT HOURS: 3
The course surveys the interaction between politics and economics in Canada with emphasis on the question of regional development. It will canvass competing explanations for differences in economic development among Canada's regions with special emphasis on Maritime economic problems, highlighting both the political sources of regional disparities and continuing efforts to rectify them. Distinctive Western, Quebec and Ontario concerns will also be covered. Seminars for senior undergraduates will feature student presentations and research projects. Approved with Canadian Studies.
PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended
FORMATS: Seminar

POLI 3250 Canadian Public Admin.
CREDIT HOURS: 3
This course examines the organization and management of the executive-bureaucratic structures of government for the formation and management of public policy and public services. It considers the design and operation of the cabinet system and ministerial portfolios; relations between ministers and the career public service, policy and budgetary processes; and the structural designs of departments, agencies, crown corporations and regulatory commissions. A major focus will be the effects of the new public management on public administration, as governments in Canada, as elsewhere, seek to cope with budgetary restraints, increased demands for quality services and public participation, and greater effectiveness in securing results.
FORMATS: Seminar

POLI 3260 The Politics of Health Care
CREDIT HOURS: 3
Because of its nature as both a public institution and a political icon, the Canadian health care system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This class will provide a survey of the political and theoretical debates within the area of health care in Canada, including investigations of federalism, funding, and governance.
PREREQUISITES: Introductory Political Science class recommended
EXCLUSIONS: POLI 4620, POLI 5260
FORMATS: Seminar

POLI 3304 Comparative Federalism
CREDIT HOURS: 3
A seminar course which examines the theory and practice of federalism within a comparative framework. The actual federations discussed depend in part on student interest but usually include both established federal nations and those moving in that direction.
PREREQUISITES: POLI 2210.03 or POLI 2220.03 recommended
CROSSLISTED: PUAD 6755.03
FORMATS: Seminar

POLI 3311 Sport and Politics
CREDIT HOURS: 3
This course examines the role of sport in domestic, transnational and international politics. It addresses the gap in much of mainstream political science concerning the pervasive influence of popular cultural trends and practices on political life. Some topics include: the role of sport in political socialization and the creation of national identity; the politics of the Olympic Games; sport and globalization; and sport and the politics of gender and wealth accumulation.
PREREQUISITES: POLI 2300.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Seminar

POLI 3315 African Politics
CREDIT HOURS: 3
The diversity of states, politics, economy and society in post-colonial sub-Saharan Africa is examined in this seminar. Topics include theoretical approaches, economic frameworks, governmental regimes, structural adjustments, civil society, intra-regional political economies, and selected aspects of policy such as economic reform, political liberalization, women and development, drought and ecology, AIDS and health.
PREREQUISITES: Previous coursework at the 2000-level, in Political Science or other Arts and Sciences courses, is recommended.
FORMATS: Seminar

POLI 3320 European Politics
CREDIT HOURS: 3
This course looks at the political systems of selected countries in Europe, including Germany, Britain, Spain, Ireland and Switzerland. Topics include political parties and elections, federalism, ethnicity and regional nationalisms, immigration politics, and changing state-economy relations.

PREREQUISITES: POLI 2300XY or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended
EXCLUSIONS: POLI 3325X/Y.06
FORMATS: Seminar

POLI 3321 Politics of the European Union
CREDIT HOURS: 3
Europe is a complex polity. Almost all countries are members of the European Union (EU), which has common government institutions and policy-making processes. The course examines these important developments in the context of theories of integration. Among topics discussed are the common currency, agricultural politics, the common foreign and security policy, social policy issues, and the significance of institutions such as the European Parliament. The role of the EU in the global economy, and expansion into central and Eastern Europe, are also discussed.
PREREQUISITES: POLI 2300XY or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended
EXCLUSIONS: POLI 3325X/Y.06
FORMATS: Seminar

POLI 3360 Politics in Latin America
CREDIT HOURS: 3
This seminar for advanced undergraduates examines one of the world's most dynamic, diverse and rapidly changing regions. It surveys Latin America's search for democracy from colonial to contemporary times. Students examine differing perspectives on the nature of democracy and explore Latin American political history and development, including the indigenous foundations, the colonial impositions, and more recent foreign intervention. The course examines political structures and values, the authoritarian presidency, military politicization, party competition and electoral politics. The course also examines state-society relations, the immense inequality, the changing role of women, the remobilization of indigenous peoples, the impact of liberalization, and reactions to liberalization from civil society. The course concludes by examining prospects for consolidation of democracy and liberalization in the contemporary era of globalization, the significance of the revitalization of the political left, and the implications for scholarly interpretations.
PREREQUISITES: POLI 2300.03 or POLI 2350.03 or POLI 2520.03 or INTD 2001.03 or INTD 2002.03 or SPAN 2109.03 or SPAN 2110.03 or POLI 2301.03 or POLI 2302.03 or SOSA 3168.03 or HIST 2384.03 or HIST 2385.03 or HIST 2386.03 or HIST 2387.03 or HIST 3390.03 recommended
FORMATS: Seminar

POLI 3365 Politics of the Middle East
CREDIT HOURS: 3
This course offers an advanced introduction to the politics of the Middle East. Issues covered include state structures, the legacy of colonialism, political economy, religion, society and social movements, human rights, and terrorism. These issues will be explored thematically and through several country case studies.
FORMATS: Lecture | Discussion

POLI 3378 American Politics: Polarization And Crisis
CREDIT HOURS: 3
The purpose of this seminar course, for senior undergraduates, is to provide a thorough and critical understanding of the American national political process and its current crises and contradictions. It will examine the colonial displacement of first peoples and founding of a colonial "settler" society, the slave-based economy, and the revolutionary route to independence. It examines the framing of the constitution and the novel institutions of separation of powers and federalism. It will consider the contemporary evolution of the presidential-congressional relationship which experiences periods of cooperation, contestation and gridlock, and the important Supreme Court role of judicial review. It will then examine the unique electoral system and political parties and the role of lobbyists and money in politics. Student will examine persistent divisions of class, race, ethnicity and gender which remain hotly contested in contemporary political discourses and practices. These themes will be set in the context of political economy in the world's wealthiest, but increasingly unequal, society. Contemporary controversies in governance will be highlighted including the divisive culture of "values" politics. Classes will build around student-lead presentations and debates.
PREREQUISITES: POLI 2210.03 or POLI 2220.03 or POLI 2300X/Y.06, or POLI 2301.03 or POLI 2302.03 recommended
FORMATS: Seminar

POLI 3385 Politics of the Environment
CREDIT HOURS: 3
This course examines competing perspectives on the political, social, and economic forces driving environmental degradation, as well as differing visions of the types of political change required for ecological sustainability. Topics include: competing perspectives on ideas of limits to growth and sustainable development; the links between poverty, North-South inequality, and environmental degradation; population growth; the promise and limits of technological solutions; consumerism and ecological degradation; market-based environmentalism; ecological modernization; and ecological critiques of capitalism.
PREREQUISITES: Previous course in Political Science recommended
EXCLUSIONS: POLI 3585.03
FORMATS: Lecture | Discussion

POLI 3390 Politics of Consumption
CREDIT HOURS: 3
The course examines the political and economic importance of consumption and critical perspectives on the ecological, social, and wellbeing impacts of consumer society. Topics include: the emergence of consumer society, consumption during the Depression and war years, the central role of expanded consumption in the post-war "golden age" of capitalism, the struggles of marginalized groups to participate in consumer society, growing inequalities of consumption in the neoliberal era, consumption in communist and post-communist societies, and political and ethical consumerism. The environmental impacts of consumer society are a prominent theme in the course, along with competing perspectives on how to achieve "sustainable consumption."
PREREQUISITES: Previous course in Political Science recommended.
FORMATS: Lecture | Seminar

POLI 3401 Contemporary Political Thought
CREDIT HOURS: 3
This course provides an overview of general themes and current debates within contemporary western social and political thought. The course will profile the work of selected authors (such as Michel Foucault, Noam Chomsky, Judith Butler, Carole Pateman, and Charles Mills) on topics such as power, justice, community, citizenship, property, entitlement, identity, and difference. We will also discuss the impact of theoretical developments, such as post-colonialism, feminism, postmodernism, and

critical race studies on social, political, and legal reform.
PREREQUISITES: POLI 2410.03 or POLI 2420.03 or PHIL 2210.03 or PHIL 2220.03 recommended
FORMATS: Lecture | Seminar

POLI 3405 Canadian Political Thought
CREDIT HOURS: 3
This course addresses philosophical issues that play a major role in contemporary Canadian politics. These include minority rights and multiculturalism; nationalism, federalism, and self-determination; and citizenship and the politics of identity. Approved with Canadian Studies.
PREREQUISITES: POLI 2210.03/POLI 2220.03 or POLI 2410.03 or POLI 2420.03 recommended
EXCLUSIONS: POLI 3205.03
FORMATS: Seminar

POLI 3426 Sex and the State
CREDIT HOURS: 3
This course will consider the role of the state and other institutions in the social, moral and legal production and regulation of sex and gender, particularly in Western countries. It will begin with a brief historical overview of the role of religious prescriptions in the social and legal regulation of sex, and in the refinement of laws and policies that have been implicated in sex-and gender-based discrimination. We will also address a range of contemporary topics such as the decriminalization of homosexuality; hate crimes against sexual minorities; the politics of relationship recognition; state response to HIV/AIDS; gender-related refugee claims; and developments in the regulation of reproductive techonolgies.
PREREQUISITES: Previous coursework in Political Science recommended
CROSSLISTED: GWST 3426.03
FORMATS: Seminar

POLI 3427 The Sexualization of Western Political Thought
CREDIT HOURS: 3
Representations of women and constructs of femininity are a significant part of mainstream Western political thought. Drawing on contemporary critical analyses, this course examines the roles of such representations in the work of leading philosophers, with attention to understanding the relation between ideas of sexual difference and their general systems of thought. We will also discuss the work of contemporary feminist political theorists on a range of social and legal issues, through a review of recent developments in theories of knowledge, embodiment, equality, and rights.
PREREQUISITES: Previous course work in Political Science recommended.
CROSSLISTED: GWST 3600.03
FORMATS: Lecture | Seminar

POLI 3431 Politics Through Film and Literature
CREDIT HOURS: 3
Film and literature often capture the depth and texture of politics in a way that the social scientific method cannot. This course uses contemporary novels and films to analyze the Enlightenment, Orientalism, the frontier, and the political economy of community.
PREREQUISITES: POLI 2410.03 or POLI 2420.03 recommended.
FORMATS: Seminar

POLI 3434 The Ancient Origins of Political Thought: From Homer to Aristotle
CREDIT HOURS: 3
This course will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.
CROSSLISTED: CLAS 3434.03, PHIL 3434.03
FORMATS: Lecture | Tutorial

POLI 3440 The Politics of Fear
CREDIT HOURS: 3
This course will consider the instrumentality of fear and terror in public policy, and its role in fostering public opinion and managing social groups and populations. Drawing on interdisciplinary and theoretical analyses of sex and race discrimination, it will consider various ways in which sexual and racial politics are implicated in the production and proliferation of "terror" in contemporary western societies, in practices perpetrated or sanctioned by both state and non-state actors. It will look at the recent discourses of terrorism and its representation in the media: philosophical considerations of anti-immigrant fear-mongering: and political analyses of the economy of "security" industries. It will also address the role of both state and corporate interest in disaster relief, epidemics, and other social crises.
PREREQUISITES: Previous coursweork in Political Science recommended
FORMATS: Lecture | Seminar

POLI 3449 Confronting Fascism
CREDIT HOURS: 3
This course focuses on German writers, artists, filmmakers, and intellectuals whose work impacted and was impacted by the rise of fascism in the 20th century.
CROSSLISTED: GERM 3450.03
FORMATS: Lecture | Tutorial

POLI 3450 Storm and Stress: Romanticism and the Backlash Against Enlightenment Political Thought
CREDIT HOURS: 3
Romanticism is generally seen as a cultural movement, with its expression in literature, music, painting, and philosophy. Yet its effect upon politics have been profound. Nonetheless, there has been little extensive political analysis of the Romantic movement and its effects. This course examines the development of Romanticism, especially in its opposition to rationalism, positivism, and classicism, from the late eighteenth century to the present. It examines the thesis that the early 21st century is experiencing a significant period of neo-romanticism, with its own set of reactions against rationalism and realism. What is the political manifestation of this neoromanticism, and what are the implications for contemporary politics?

PREREQUISITES: POLI 2410.03, POLI 2420.03 recommended
FORMATS: Lecture | Seminar

POLI 3475 Democratic Theory
CREDIT HOURS: 3
Democracy is an essential component of legitimacy for all western states: few would be inclined to assert their "undemocratic" nature. But what are the essential characteristics of democracy; and to what extent must modern democratic theory remain grounded in nineteenth-century western liberal thought? While this course has a predominantly theoretical orientation, it will include an examination of the relations between democratic theory and economic production/redistribution; as well as an investigation into how democratic theory can be developed in non-Western political contexts.
PREREQUISITES: Previous courses in Political or Moral Philosophy recommended
CROSSLISTED: PHIL 3475
FORMATS: Seminar

POLI 3492 Political Inquiry I
CREDIT HOURS: 3
This course is an introduction to empirical research methods in political science and the social sciences more generally. It covers a range of issues that are relevant to both qualitative and quantitative empirical research, but the emphasis is on quantitative strategies (i.e., statistical analysis). Key issues include specification of hypotheses, measurement of variables, case selection, choosing and evaluating research designs, and drawing sound inferences from research findings. The "quantitative" component of the course de-emphasizes statistical theory and math, and focuses instead on the generation and interpretation of statistical results, using statistical software. The course is built around a series of small homework assignments, lab sessions, a formal "data analysis paper," and a midterm and final exam.
PREREQUISITES: 30 credit hours required, 60 credit hours recommended; previous coursework in Political Science recommended
FORMATS: Lecture | Lab

POLI 3493 Political Inquiry II
CREDIT HOURS: 3
This course introduces the theory and practice of qualitative research methods to study political phenomena. Themes addressed in the course include the theoretical and conceptual implications of choosing a particular methodology; the philosophical assumptions behind social science research; the various qualitative research methods available to political scientists, including interviewing, participant observation, case studies, comparative analysis, and the use of documentary/primary sources; the evaluation of academic texts in political science, focusing on the logic of their argument, their methodologies, and the relationship between the evidence presented and their argument; and the ethical issues involved in conducting qualitative research.
PREREQUISITES: 30 credit hours required, 60 credit hours recommended; previous coursework in Political Science recommended
EXCLUSIONS: POLI 2494X/Y.06
FORMATS: Lecture | Discussion

POLI 3496 Philosophy of Social Science
CREDIT HOURS: 3
Can people from different cultures understand each other? What is to be a member of a culture? Are societies best thought of as collections of individuals, or are individuals constituted by societies? In what sense are the social sciences "sciences"? Are societies describable by explanatory laws? What counts as an explanation of human behaviour: This course explores these and related questions through a reading of classic and contemporary philosophers and social theorists.

POLI 3505 Human Rights: Foundations
CREDIT HOURS: 3
This course examines the formation of international human rights institutions, mechanisms, practices, and related jurisprudence. It provides an overview of the development of international humanitarian law and policy; the treaty system and monitoring bodies; and international criminal court and criminal tribunals. Through analyses of reporting systems under a selection of treaties, we will address how both states and non-government organizations have engaged human rights treaty committees on different conventions and areas of law (e.g., civil and political rights; the rights women, children, migrants, torture victims, etc.), and we will consider their applications within domestic law and policy. We will also look at the formation of international criminal law institutions, and, through a sample of case studies, we will consider their approaches to state and individual responsibility and accountability for persecution, genocide and crimes against humanity.
PREREQUISITES: Previous coursework in Political Science recommended
EXCLUSIONS: POLI 3303.03
FORMATS: Lecture | Seminar

POLI 3520 Building Democracy and Peace
CREDIT HOURS: 3
Many people have long argued that there is an intimate relationship between democracy and peace. Thus, they claim, democracies are much more inclined to peace - both internal and external than other political systems. It is clear that democracy allows the representation of a large number of interest in a society, and this can lead to peaceful resolution of or accommodation of - disputes.There have been many studies about established democracies in this regard, but less research into societies in transition--i.e., countries which are democratizing. Since countries in transition present the vast majority of countries in the world, it would seem timely to study this phenomenon. Democratization involves a multitude of steps and must therefore incorporate a great variety of actors, particularly in post-conflict societies. The role of three (overlapping) elements in post-conflict societies in the process of democratizing appear to be the key. These elements are civil society, the institutional environment and refugees. This third or fourth year level course will examine these key actors/elements and processes.
FORMATS: Lecture

POLI 3525 Comparative Foreign Policy Simulation
CREDIT HOURS: 3
This course is designed for advanced (i.e., 3rd/4th year) undergraduate and graduate students in Political Science. Once students become familiar with basic concepts, theories and decision-making frameworks developed within the sub-field of comparative foreign policy (part 1), they will be expected to apply what they have learned through participation in an interactive computer simulation involving other university teams throughout North and South America and Eastern and Western Europe. As they attempt to implement policy initiatives and work in teams to resolve international disputes, students will confront foreign policy issues in a context that provides an authenticity of experience. The objective is to enable students to create and test organizational skills, understand the interdependence of international issues, appreciate cultural differences and approaches to world problems, and use computers for multination communications.

PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Seminar

POLI 3531 The United Nations in World Politics
CREDIT HOURS: 3
The evolution of the United Nations from its early concentration on problems of collective security, through the period of preventive diplomacy and anti-colonialism, to its present role as a forum for the aspirations and demands of the Less Developed Countries is reviewed. The more distant future, and the continuing relevance of the United Nations in world politics, and how its role and objectives should be determined, are considered.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Seminar

POLI 3532 Model UN
CREDIT HOURS: 3
The primary goal of this course is to help students understand the operation of the UN system through preparation for Model UN meetings. The course is designed for students who are participating in Model UN meetings and aims to help students prepare effectively for those meetings. Through their preparatory research for the meetings, students will learn the politics of UN voting practices of various countries and the relationships between domestic politics, international politics and UN voting records. This course will also enable students to understand the internal dynamics of the UN General Assembly and committee systems, how UN meetings operate, and the professional skills involved in drafting and negotiating the text of resolutions. The course will also provide students with the opportunity to learn about the political issues that influence the positions at the UN of various countries (assigned by the Model UN Assembly to individual students), and about committee issues under debate at the UN (assigned by the Model UN Assembly to individual students).
PREREQUISITES: POLI 2520.03 or POLI 2530 recommended

POLI 3535 Wealth, Power and Poverty in the Global South
CREDIT HOURS: 3
This seminar provides an overview of the global political economy in the current post-Bretton Woods, post-Cold War period. It considers various issues pertaining to wealth, power and poverty, from several theoretical and political perspectives, from global frameworks to feminism. Issues addressed include the rise of the BRICs, the Fourth World, international development organizations, transnational civil society, democracy and popular participation, and alternative futures.
PREREQUISITES: POLI 2520 or POLI 2530 recommended
FORMATS: Seminar

POLI 3540 Foreign Policy in the Third World
CREDIT HOURS: 3
This seminar offers a comparative perspective on the political economy of foreign policy in Africa, Asia, the Middle East, and South America at the end of the twentieth century. Its focus is how such state and non-state actors in the South relate to the New International Divisions of Labour and Power given the demise of both Bretton Woods and Cold War global regimes. In addition to selective case studies of both large and small states - from Brazil, India, Indonesia, and Nigeria to Botswana, Jamaica, Kuwait, and Singapore - it treats formal and informal external relations, from regional intergovernmental institutions to non-governmental coalitions. It also examines new forms of regional conflict and cooperation, including guerrilla struggles and civil societies. It emphasizes the incidence and impact of structural adjustment programs and conditionalities along with the emergence of "new" issues such as debt, democracy, ecology, gender, refugees, and technology. A range of alternative approaches is identified and evaluated appropriate to the contemporary period of revisionism.
PREREQUISITES: POLI 2520 or POLI 2530 recommended
FORMATS: Seminar

POLI 3544 Political Economy of Southern Africa
CREDIT HOURS: 3
An introduction to the comparative politics, economic structures and international relations of Southern Africa, which provides a study of regional political economy with both empirical and theoretical significance. As well as country comparisons, the course will look at the region as a political unit, exploring the opportunities for and constraints against formal regional cooperation on economy or security as well as informal processes that constitute the basis of "new" regionalism forces.
PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 recommended
FORMATS: Seminar

POLI 3546 Social Media and Politics
CREDIT HOURS: 3
This course will examine the origins, features and dynamics that characterize the relationship between politics and social media, paying particular attention to the following topics: political communication theories and social media; digital democracy; political campaigns and social media, revolutions and social media; international organization and social media; the ethics of social media in politics.
FORMATS: Lecture | Seminar | Experiential Learning

POLI 3560 Issues in Global Security and Development
CREDIT HOURS: 3
Security and development are indissolubly linked: development is compromised when security remains problematic, while a secure environment requires some form of sustainable development. Two of the principle manifestations of this 'security-development nexus' have been intrastate wars and collapsed states. In 2011 for example, none of the states emerging from civil war had reached any of the Millennium Development Goals set by the United Nations. Moreover, the security-development relationship conditions our capacity to develop effective policies on how and whether to intervene in 'fragile' or 'collapsed' states where the security environment is highly problematic, and our capacity to contribute to the economic and human development of these countries. This course aims, first, to give students a broad understanding of the various dimensions of the security-development nexus; and second, to address significant practical implications of this nexus. An important portion of the course will examine specific case studies, and feature keynote practitioners who are grappling with these concepts in everyday situations in the field.
PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended
CROSSLISTED: POLI 5560.03
FORMATS: Seminar

POLI 3565 Contemporary Security Studies
CREDIT HOURS: 3
The course examines developments in the theory and practice of international security since the end of the Cold War. The first part reviews the concept of security and the main theoretical approaches that inform the contemporary security debate. The second part analyzes some of the key contemporary issues in world politics and their relation with international security. Topics include: Military Security, Terrorism, Human Security, Environmental Security, Migration, Health and Security.
PREREQUISITES: POLI 2300X/Y.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Lecture | Seminar

POLI 3567 International Organization
CREDIT HOURS: 3
This course will investigate the process of international organization through analysis of the role of international organizations, institutions and regimes. For the purposes of the course, international organizations as well as less formal institutional arrangements. The course will focus on the contemporary debate between rationalist and constructivist theoretical approaches to analyzing international organization. These perspectives will be employed to study the role of international organizations in areas such as international security and international political economy. Topics to be covered include democracy and international organizations, culture and international organizations, bargaining in international organizations, political and economic integration, NGOs and global civil society, and the future of global governance.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Lecture | Seminar

POLI 3568 Canada and the World
CREDIT HOURS: 3
This course examines post-World War II Canadian Foreign Policy in two parts: (1) an analysis of 'landmark' policy issues; and (2) an investigation of the general factors that help to "explain" the form and content of Canadian Foreign Policy, with particular reference to the institutions and processes through which policy decisions are made. Issues discussed are likely to include: the "invention" of peacekeeping; the Mulroney government's involvement in the campaign to end apartheid in South Africa; the negotiation of the North American free trade; the politics of immigration and diasporas; and the place of the Arctic in Canada and international relations.
PREREQUISITES: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or HIST 2212 or HIST 2235 or HIST 2661 recommended
CROSSLISTED: CANA 3568.03
FORMATS: Seminar

POLI 3569 Canadian Foreign Policy
CREDIT HOURS: 3
This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the study of Canadian foreign policy; the external context; the domestic; and key themes and issues in Canadian foreign policy
FORMATS: Seminar

POLI 3574 American Foreign Policy
CREDIT HOURS: 3
This course is a general introduction to American foreign policy, with special attention to the theoretical and policy debates of the post-Cold War period. The course begins with relatively brief introductions to the history of US foreign policy and the institutions of foreign policy-making, but most of the readings and lectures are concerned with broad theoretical debates about what does, and/or what should, drive US foreign policy decisions. In later weeks, some of these theoretical lenses are applied to some specific (recent) foreign policy decisions, including the signing and "unsigning" of the Kyoto Accord, the extension of Permanent Normal Trade Relations status to China, and/or the war in Iraq.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Lecture

POLI 3576 Defence Policy in Canada
CREDIT HOURS: 3
This seminar examines the substance, processes, recurring themes, and major international and domestic determinants of post-World War II Canadian defence policies. It explores several major policy “milestones” (e.g. Canadian Forces' role in the Persian Gulf conflict), and various persistent themes (the “Commitment-capability gap”; efforts to “democratize” defence policy reviews) and current issues (e.g. the implications of recent human rights challenges to traditional military professionalism; Canada's role in the Afghanistan conflict) of Canadian defence. Approved with Canadian Studies.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 or POLI 2210.03 or POLI 2220.03 recommended
EXCLUSIONS: POLI 3571.06
FORMATS: Lecture

POLI 3581 Diplomacy and Negotiation
CREDIT HOURS: 3
This course looks at the way states decide which diplomatic strategies to pursue, and why these succeed or fail. Among the themes considered are the evolution of diplomacy as an international institution, national power and bargaining leverage, and the effects of domestic politics, psychology, and culture on international negotiation. Specific historical cases which may be reviewed in any given year include: the Peloponnesian War, the Munich Crisis, the Cuban Missile Crisis, the negotiation of the Canada-US Free Trade Agreement and NAFTA, and the Kyoto Protocol. Students participate in a negotiation-simulation exercise and write a paper on a particular historical case.
PREREQUISITES: POLI 2520 or POLI 2530 recommended
FORMATS: Seminar

POLI 3587 Internationl Political Economy
CREDIT HOURS: 3
This course is composed of two overlapping constituent themes. The first theme is that of competing explanations of international political economic behaviour - behaviour affected by that diffuse political authority characteristic of the international system, the second, that of examining the basic issues in international political

economy - the fundamental questions as to why international trade, international finance, unequal economic development, international organization, and the multinational enterprise. The first theme functions to create the over-all framework of analysis by which competing approaches to international political economy can be evaluated. The second theme will integrate these approaches with issue areas within the fields of international trade, international finance, and what might be termed "international production" (within which fields issues such as economic development, the multinational enterprise, and the global "division of labour" constitute the major foci). The course sessions will roughly be constituted by 50 percent lecture and 50 percent organized student contributions for seminar discussion and debate.
PREREQUISITES: POLI 2520 recommended
FORMATS: Seminar

POLI 3589 Politics of the Sea I
CREDIT HOURS: 3
The major issues involved in the Law of the Sea, the differing interests of different countries, the developing legal framework, and the political process of the on-going negotiations are covered.
CROSSLISTED: POLI 5589
FORMATS: Seminar

POLI 3596 Exploring Conflict and Violence
CREDIT HOURS: 3
As the Cold War ended, many people believed that we would see an unprecedented era of peace. And yet large-scale violence associated with war and conflict continues to have undeniable relevance for all of humanity. Given the (apparent) increase of ethnic and religious conflicts and spread of advanced weapons technology world wide, providing answers to pressing questions about the onset and escalation of war is becoming more and more imperative. How do we define war and conflict? Are there rules about conduct in war? What are the causes of conflict? Is warfare becoming more common or is it decreasing? What international institutions exist to prevent or intervene in conflict? How has technology changed warfare? Unfortunately, notwithstanding many years of inquiry into the nature and origins of war, many questions remain to be answered. This seminar is designed to provide students with a comprehensive and critical review of the onset, escalation and de-escalation of violent conflict.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 recommended
FORMATS: Seminar

POLI 3601 Readings in Political Science
CREDIT HOURS: 6
A full-year reading course, taught only by special arrangement between individual students and individual instructors.SIGNATURE REQUIRED.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

POLI 3602 Readings in Political Science
CREDIT HOURS: 3
A one-term reading course, taught only by special arrangement between individual students and individual instructors.SIGNATURE REQUIRED.

POLI 4207 Canadian Politics: Themes and Theories
CREDIT HOURS: 3
This senior seminar will take an in-depth and critical look at the major issues and institutions in Canadian politics and government. Topics include: the concentration of power; parliamentary governance: constitutional politics; party and electoral systems; and, the role of the mass media and pressure groups.
PREREQUISITES: Permission of the instructor.
CROSSLISTED: POLI 5207.03
EXCLUSIONS: POLI 4204.03
FORMATS: Seminar

POLI 4228 Pressure Politics in Canada: Opportunities and Obstacles
CREDIT HOURS: 3
The goal of this seminar is to explore the opportunities for and obstacles to advocacy politics in Canada. We analyze the strategies that pressure groups use to engage the most important loci of power in the Canadian political system; parliament, the public service and the courts.
CROSSLISTED: POLI 5228.03, PUAD 6505.03
EXCLUSIONS: POLI 3228.03

POLI 4232 Urban Governance in Canada
CREDIT HOURS: 3
The objective of this course is to provide students with the empirical, analytical, theoretical, and methodological tools to understand and explain the politics and policy activities of Canada's urban and suburban municipalities within their socioeconomic, institutional, and Constitutional contexts. A major concern is to evaluate how

effectively and equitably city governments in Canada have responded to contemporary urban challenges. The course adopts a critical perspective on urban governance and engages with contemporary debates concerning municipal governance reform and the evolving nature of urban governance within Canadian federalism.
PREREQUISITES: POLI 3220.03 or POLI 3232.03 or permission of instructor
EXCLUSIONS: POLI 3231, POLI 5231
FORMATS: Seminar

POLI 4234 Canadian Urban Politics in Comparative Perspective
CREDIT HOURS: 3
This course examines the politics and governance of Canadian cities from a comparative perspective. More specifically, the course uses comparative method in three ways: it asks what one can learn from comparing Canadian cities with each other (subnational comparisons), what cross-national comparisons of Canadian cities can teach as well as compares Canadian cities implicitly with other cities by applying theories of urban politics and development that have been developed elsewhere to Canadian cities. The objective of this course is to provide advanced political science students with the theoretical, empirical and methodological tools to understand and explain the political development of Canadian cities.
PREREQUISITES: POLI 3220.03 or POLI 3232.03 or permission of instructor
CROSSLISTED: POLI 5234 03
FORMATS: Seminar

POLI 4240 Policy Formulation in Canada
CREDIT HOURS: 3
This course provides a general introduction to the field of policy management, for graduate and honours undergraduate students. Using British ‘best practice’ ideas of professional policy making and Canadian statements of generic policy competencies, it seeks to improve the policy capacity of participants. It does this first by increasing their knowledge of public policy structures, processes, and outputs, and secondly, by giving them knowledge that they can use in policy advocacy both inside and outside government. The first section of the course examines policy definitions and professional policy making approaches in the 21st century. The second section considers the role of the state in the 21st century, and the policy competencies that analysts must have if that role is to be carried out effectively. Section three explores vertical, horizontal and external policy relationships, both as determinants of policy and as practical matters of management. Section four explores, and helps participants to gain proficiency in, the most recent processes of strategic policy design and implementation. This blend of theory and practice will increase the policy knowledge of all participants, and equip those who are in professional programs, including the various public services, to contribute more effectively to policy processes in the future.SIGNATURE REQUIRED.
PREREQUISITES: Honours students only. Permission of instructor
CROSSLISTED: POLI 5240.03, PUAD 5120.03
FORMATS: Seminar

POLI 4242 Political Behaviour: Reason, Passion, Biology
CREDIT HOURS: 3
Political behavior is the study of the private roots of public action. To understand how and why people act politically, we delve into psychology, family life, sexuality, and genetics. In addition to these individual characteristics, the economy, geography, and class drive the political behaviour of individuals and organized groups. Topics include: public opinion, political polarization, culture wars, elections, modernization theory, populism, democratization, and the resource curse. The final unit considers big data and commercial applications of social science research in political practice. Although this material is comparative, we principally want to investigate how it applies to Canada.
CROSSLISTED: POLI 5242.03
FORMATS: Seminar

POLI 4260 The Politics of Health Care
CREDIT HOURS: 3
Because of its nature as both a public institution and a political icon, the Canadian healthcare system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This course will provide a survey of the political and theoretical debates within the area of healthcare in Canada, including investigations of federalism, funding, and governance.
PREREQUISITES: 60 credit hours of previous coursework
CROSSLISTED: POLI 5260.03
EXCLUSIONS: POLI 3260.03
FORMATS: Seminar

POLI 4302 Governance and Administration in Developing Countries: Issues and Controversies
CREDIT HOURS: 3
This course examines analytical, normative and political issues of public administration in developing countries. It considers the scope of development administration as a sub-field of public administration; public sector organization and management including public services, public enterprises, decentralization and rural development, financial systems, human resource management, aspects of state economic management (with the use of case studies) and institutional aspects of aid administration (with IMF and World Bank cases).
PREREQUISITES: POLI 2300.06 or POLI 2301.03 or POLI 2302.03 or permission of the instructor.
CROSSLISTED: POLI 5302.03, PUAD 6780.03
EXCLUSIONS: POLI 3302.03
FORMATS: Seminar

POLI 4303 Human Rights: Political Issues
CREDIT HOURS: 3
This course will introduce students to the evolving place of human rights in politics, both comparative and international. We begin by examining the historic emergence of human rights as an issue in world politics, principally since the Second World War, and their conceptual foundations. We then focus on a number of specific topics and controversies concerning human rights in world politics, including: the sources of and struggle to end human rights-abusive regimes; the multilateral politics of human rights; human rights in national foreign policies; the rights of indigenous peoples; genocide, humanitarian intervention; and the responsibility to protect; and the relationship between globalization and human rights, and the 'Global War on Terrorism' and human rights. Finally we look at the role of human rights in domestic politics, focusing on the issues of women's rights and sexual orientation.

PREREQUISITES: POLI 2300X/Y.06, POLI 2301.03 or POLI 2302.03 , POLI 2520.03 or POLI 2530.03 or POLI 3505.03 or permission of the instructor.
CROSSLISTED: POLI 5303.03
EXCLUSIONS: POLI 3303.03
FORMATS: Seminar

POLI 4322 The EU as a Global Actor
CREDIT HOURS: 3
The aim is to enable the student to analyze and understand the international roles played by the EU in both economic and political areas. Why has the EU been better able to speak with one voice in economic areas than political areas? To what extent can the member states control the foreign policies of the EU? The introductory part will include an overview of the EU governance systems in the area of external economic relations (first pillar) and the Common Foreign and Security Policy (the second pillar) and analyses of the main achievements in both areas. Specific topics to be selected for analyses during the second part will include the EU and the WTO, the EU and the US, the EU and the East Asia, and the EU and developing countries. Finally, in the third part of the course students study recent efforts to develop a European Security and Defence Policy.
PREREQUISITES: POLI 2520.03 or POLI 2530.03 or permission of instructor
CROSSLISTED: POLI 5322.03
EXCLUSIONS: POLI 3322.03
FORMATS: Seminar

POLI 4340 Approaches to Development
CREDIT HOURS: 3
A survey of theories of and policies about dependence, underdevelopment and peripheral social formations. Particular emphasis on modernization, materialist, and alternative modes of analysis, and on orthodox and radical strategies of development. Topics include social contradictions (e.g. class, race and ethnicity), debt, structural adjustment, human development, human security, gender, technology, civil society, informal sectors, democratization and ecology.
PREREQUISITES: By permission of the instructor.
EXCLUSIONS: POLI 3340.03
FORMATS: Seminar

POLI 4355 Comparative Perspectives on the Development State
CREDIT HOURS: 3
This course examines development in a broad regional comparative context to determine whether endogenous or exogenous conditions account for the success with which the North/Southeast Asian economies have been transformed vis-a-vis Latin America and Africa. The course compares the "development state" model across the developing world, by briefly focusing on three distinct cases - South Africa, Malaysia and Brazil - as "upwardly mobile" late industrialisers.
PREREQUISITES: POLI 2300.06 or POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or OLI 2530.03 or permission of the instructor.
CROSSLISTED: POLI 5355.03
EXCLUSIONS: POLI 3355.03
FORMATS: Seminar

POLI 4380 Politics of Climate Change
CREDIT HOURS: 3
This course examines the interactions between politics and a changing climate. Core questions include: What lies behind political disagreements over how to respond to climate change? What does climate change mean for various political, social, and economic projects? Topics include: the role of science and economics in climate politics; the new “climate capitalism”; non-capitalist alternatives that question growth and consumerism while emphasizing “climate justice”; Canada’s particular difficulties in addressing climate change; climate politics at the personal level; international climate negotiations; and the politics of geo-engineering.
PREREQUISITES: POLI 3385 or permission of the instructor.
CROSSLISTED: POLI 5380.03
EXCLUSIONS: POLI 3380 Politics of Climate Change
FORMATS: Lecture | Seminar

POLI 4390 Practicum in Public Policy: NGOs and Government Services
CREDIT HOURS: 3
This course is designed to provide students who have fourth-year standing in Political Science the opportunity to gain practical experience by working at a government or non-government, research, or advocacy organization that is instrumental in shaping public policy or advancing human rights; to learn about the services, projects, and campaigns undertaken by specific organizations; to apply and share the knowledge that they have gained from their academic studies in political theory, public policy, international relations, and/or human rights advocacy; and to become familiar with the day-to-day challenges of employment in government and non-government organizations and public services.
PREREQUISITES: Open to 4th year Political Science students and Gender and Women's Studies students, and permission of the instructor
CROSSLISTED: GWST 4390

POLI 4403 Human Rights: Philosophical Issues
CREDIT HOURS: 3
An examination of the historical and conceptual development of human rights, this course looks specifically at normative and political issues involved in the emergence of human rights from the 13th century to present. It covers the shift from natural law to natural right, the emergence of states, rights to sovereign governance, and the development of specific classes of rights (including freedom of conscience, property rights, women's rights, cultural rights, animal rights, and socioeconomic rights).
PREREQUISITES: POLI 2410.03 or POLI 2420.03 or POLI 3505.03, or permission of the instructor.
CROSSLISTED: PHIL 3470.03, POLI 5403.03
EXCLUSIONS: POLI 3403.03
FORMATS: Seminar

POLI 4427 Queer Theory
CREDIT HOURS: 3
This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts—of the interdisciplinary field that is now

known as ‘Queer Theory.' It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism. Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homomophobia, transphobia, sexism, and racism and their impact on social policy.
CROSSLISTED: GWST 4427.03
FORMATS: Seminar

POLI 4440 The Politics of Affect: Theories of Emotion and Political Life
CREDIT HOURS: 3
This course draws on recent developments in the burgeoning of field of affect studies to address the relation of both conscious and non-conscious emotive experience to public and political life. Drawing on the insights and scholarship from different disciplines, we will examine the social, political and cultural theories of affect, emotion, and aesthetics to explore their role in political decision-making and public responses. Topics will include the affective logic of public threat, the cultural politics of emotion such as fear and shame; sensorial responses to moralistic rhetoric; visceral responses to social groups and/or cultural practices. We will also look at how sensibility, feeling, and affect have operated in social and political movements, including a consideration of emotions such as fear, disgust, and distain, and compassion in social conflict, and in the formative approaches to retribution and reconciliation.
PREREQUISITES: 1000-level course in Political Science and 60 credit hours, or permission of instructor
CROSSLISTED: POLI 5440.03
FORMATS: Seminar

POLI 4466 The Social and Political Construction of Health and Medicine
CREDIT HOURS: 3
Despite the rise of “evidence-based medicine,” the way in which health and illness are understood and addressed remains strongly influenced by social and political variables. This class examines the way in which the “scientific” evidence underlying medicine is constructed and applied; the manner in which certain categories of illness (depression, anxiety, schizophrenia, addiction, low libido, and obesity) are mediated by social and political dynamics; and the role of specific social and political agents in shaping how health and illness are conceived and addressed. In contradistinction to POLI 4260, which focuses on systems and institutions, this class looks at the way in which ideas and epistemology shape conceptions of health, the design of health policy, and the practice of medicine.
COREQUISITES: 60 credit-hours completed, or instructor's permission
EXCLUSIONS: POLI 5466.03
FORMATS: Seminar

POLI 4479 Liberalism
CREDIT HOURS: 3
Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed.
PREREQUISITES: Normally, courses in philosophy or political science or economics: consult instructor.
CROSSLISTED: PHIL 4470.03/5470.03, ECON 4446.03/5446.03, POLI 5479.03
FORMATS: Seminar

POLI 4481 Theories of Violence, Persecution, Genocide
CREDIT HOURS: 3
This course will provide an overview of contemporary theoretical approaches to systemic violence, particularly against racial, ethnic, and sexuality minorities. Through a selection of historical and contemporary case studies, it will assess different accounts and explanatory frameworks for understanding the instigation and exacerbation of persecution and genocide. Attending to the role of the state and state policies in the history of violence, it will examine the discourses and practices that have both fuelled and justified the colonization of native peoples, enslavement of racial groups, the holocaust, and ethnic cleansing in the 20th century genocides. We will also consider the recent attempts of the international community to prevent, deter, and curb genocidal outbreaks, and the theoretical assumptions about human behaviour that underpin them.
PREREQUISITES: 2000-level course in Political Science or permission of the instructor
CROSSLISTED: POLI 5481.03
FORMATS: Seminar

POLI 4505 Human Rights: Legal Issues
CREDIT HOURS: 3
This course focuses on the legal issues and debates that are implicated in the development and enforcement of domestic and international human rights. It will address the changing legal status of international human rights treaties and conventions, with attention to the work of international treaty bodies, courts, tribunals, and the implications of their decisions and recommendations in domestic contexts. It will look at the impact of the development of international criminal courts and tribunals – with attention to the debates concerning state sovereignty and accountability, and what enables or restricts intervention in human rights crises. A central theme of the course will be theories and approaches to justice, and their relation to the force of law and the challenges of legal systems and obligations.
PREREQUISITES: Previous third year course work in Political Science or Law, Justice & Society
FORMATS: Seminar

POLI 4512 The Politics of North America
CREDIT HOURS: 3
North America has become increasingly integrated over the last thirty years--economically, demographically, and even politically. This course will review the history of regional integration in North America, and consider a number of contemporary policy controversies. It bridges sub-disciplinary boundaries by looking at both domestic policy-making (Comparative Politics) and at bargaining between the three countries (International Relations).
PREREQUISITES: 2000 or 3000-level course in International Relations or permission of instructor
FORMATS: Seminar

POLI 4521 Theories of International Relations I: Security Studies
CREDIT HOURS: 3
4521 and 4522 are independent courses that are conceptually closely related. This relationship is partially based on the more general division within IR between "Security Studies" and International Political Economy (IPE). POLI 4521 sets things up by reviewing the broadest theoretical debates within the field, with an emphasis on questions of power and order, and looks at theoretical work which focuses on political/military issues like deterrence, balancing, and the meaning of "national security." POLI 4522 begins with theoretical debates over cooperation and institutions, and is empirically anchored in various aspects of IPE, including trade, finance, and development.
PREREQUISITES: Permission of the instructor.
CROSSLISTED: POLI 5421.03
EXCLUSIONS: POLI 4520.06
FORMATS: Seminar

CROSSLISTED: POLI 5524
FORMATS: Seminar

POLI 4532 Indigenous Global Politics
CREDIT HOURS: 3
This course introduces students to topics of Indigenous governance, power, and self-determination in a global perspective. It examines how Indigenous peoples participate in contemporary global politics, challenging conventional approaches to the scholarship and practice of international relations. We explore the contradictions of the state as it relates to Indigenous peoples and alternatives to the current international system as expressed by Indigenous scholars, recognizing that these "alternatives" are not alternative to the peoples and cultures where these ways of knowing and being originate. We will ground our discussions in the context of colonialism past and present, highlighting Indigenous peoples' resistance to colonialism and state violence, as well as relationships between decolonization and self-determination.
EXCLUSIONS: POLI 5532.03
FORMATS: Seminar

POLI 4561 Security-Development Nexus: Theory, Policy and Complex Operations
CREDIT HOURS: 3
Security and development are indissolubly linked: development is compromised when security remains problematic, while a secure environment requires some form of sustainable development. Two of the principle manifestations of this 'security-development nexus' have been intrastate wars and collapsed states. In 2011 for example, none of the states emerging from civil war had reached any of the Millennium Development Goals set by the United Nations. Moreover, the security-development relationship conditions our capacity to develop effective policies on how and whether to intervene in 'fragile' or 'collapsed' states where the security environment is highly problematic, and our capacity to contribute to the economic and human development of these countries. This course aims, first, to give students a broad understanding of the various dimensions of the security-development nexus; and second, to address significant practical implications of this nexus. An important portion of the course will examine specific case studies, and feature an interagency simulation to provide students with a sense of what it is like to grapple these concepts beyond the classroom.
PREREQUISITES: POLI 2301.03 or POLI 2302.03 or POLI 2520.03 or POLI 2530.03 INTD 2001.03 or INTD 2002.03 or by permission of instructor

FORMATS: Seminar

POLI 4569 Canadian Foreign Policy
CREDIT HOURS: 3
This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the

study of Canadian foreign policy; the external context; the domestic; and key themes and issues in Canadian foreign policy.
PREREQUISITES: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or POLI 3568 or POLI 3569 or POLI 3570 OR Permission of instructor

Note
Courses in Religious Studies are administered by the Classics Department.

Introduction
Religion is a phenomenon virtually universal in human society and history. Understanding religion involves grasping simultaneously both the meaning of faith in the lives of participants, and the critical analysis of outside observers. Both the student wishing enhanced understanding of religion as an historical, and social and human fact, and the student who wishes to wrestle with problems arising in academic reflection concerning the relation between the personal and the objective, can find material to engage them in the programs and courses described below.

Degree Programs
In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section.

Staff

Dean
Harvey, F., BA, MA, PhD (McGill)

Chair
Fournier, M. (902 494-2518)

Undergraduate Advisor
Austin, C., BA, MA (Concordia), PhD (McMaster) (902 494 6922)

Professors Emeriti
Ravindra, R., BSc, MTech (IIT), MA (Dalhousie), MSc, PhD (Toronto), Adjunct Professor of Physics
Hankey, W. J., BA (Vind), MA (Toronto), DPhil (Oxon)

Associate Professors
Austin, C., BA, MA (Concordia), PhD (McMaster)
Treiger, A., BA, MA (Jerusalem), MPhil, PhD (Yale)

BA (120 credit hour) Major in Religious Studies

Departmental Requirements
Students must complete a minimum of 36 credit hours or a maximum of 54 credit hours in Religious Studies beyond the 1000 level including 18 credit hours beyond the 2000 level. They must include:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BA (120 credit hour) Double Major in Religious Studies

Students must complete the Faculty requirements for a double major. These include 60 to 84 credit hours in the Major subjects at the 2000 level or higher, with no more than 48 credit hours and no fewer than 30 credit hours in each subject, including at least 18 credit hours beyond the 2000 level in each of the two major subjects. Religious Studies requires:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BSc (120 credit hour) Double Major, Second Subject in Religious Studies
Students must complete the Faculty requirements for a double major. Religious Studies can only be the second subject, with no fewer than 30 credit hours and no more than 54 credit hours above the 1000 level. 18 credit hours must be at the 3000 level or higher. Religious Studies requires:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes.

BA (120 credit hour) Combined Honours in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. At least 30 credit hours and no more than 48 credit hours must be in Religious Studies above the 1000 level. At least 66 credit hours and no more than 84 credit hours are to be in both subjects beyond the 1000 level.

The Religious Studies requirements are:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes, of which minimum 12 credit hours should be from the following list: RELS 3000.03; RELS 3009.03; RELS 3012.03; RELS 3100.03; RELS 3101.03; RELS 3111.03; RELS 3112.03; RELS 3113.03; RELS 3114.03; RELS 3282.03; RELS 4010.03; RELS 4018.03; RELS 4401.03;
4. Outside Religious Studies 6 credit hours will be required from the following list: both ARBC 1021.03 (Arabic I) and ARBC 1022.03 (Arabic II); CHIN 1030.06 (Mandarin); both RELS/CLAS 1600.03 (Sanskrit I) and RELS/CLAS 2600.03 (Sanskrit II); both CLAS 1801.03 (Intro Latin I) and CLAS 1802.03 (Intro Latin II); CLAS 1900.06 (Classical Hebrew); CLAS 2500.06 (Ancient Greek). Students may substitute a more advanced course in these languages for this requirement.
5. If the first subject is Religious Studies, completion of the Honours component (RELS 0400.00): either (a) the Religious Studies Honours Examination, or (b) the Religious Studies Honours Thesis, subject to approval by faculty.

BSc (120 credit hour) Combined Honours, Second Subject in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. Religious Studies can be the second subject only. At least 30 credit hours and no more than 42 credit hours, must be in Religious Studies above the 1000 level. At least 66 credit hours, to a maximum of 84 credit hours are to be in both subjects.

The Religious Studies requirements are:

1. 6 credit hours of 1000-level RELS classes or King's Foundation Year Programme;
2. 12 credit hours of 2000-level RELS classes;
3. 18 credit hours of 3000-level or 4000-level RELS classes, of which minimum 12 credit hours should be from the following list: RELS 3000.03; RELS 3009.03; RELS 3012.03; RELS 3100.03; RELS 3101.03; RELS 3111.03; RELS 3112.03; RELS 3113.03; RELS 3114.03; RELS 3282.03; RELS 4010.03; RELS 4018.03; RELS 4401.03;
4. Outside Religious Studies 6 credit hours will be required from the following list: both ARBC 1021.03 (Arabic I) and ARBC 1022.03 (Arabic II); CHIN 1030.06 (Mandarin); both RELS/CLAS 1600.03 (Sanskrit I) and RELS/CLAS 2600.03 (Sanskrit II); both CLAS 1801.03 (Intro Latin I) and CLAS 1802.03 (Intro Latin II); CLAS 1900.06 (Classical Hebrew); CLAS 2500.06 (Ancient Greek). Students may substitute a more advanced course in these languages for this requirement.

BA (90 credit hour) Minor in Religious Studies

See Minor in Religious section.

Minor in Abrahamic Religions

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students declaring a Minor in the Abrahamic Religions will complete a minimum of 18 credit hours at the 2000 level or above to a maximum of 27 credit hours, chosen from the lists below. Judaism courses

- RELS 2001.03: Judaism
- RELS 2220.03: Ancient Israel
- RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides or RELS 4011.03: Jewish Philosophy: Maimonides
- RELS 4019.03: Philo Judaeus

Christianity courses

- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3282.03: Christian Beginnings: Catholicism
- RELS 3381.03: Medieval Philosophy from Anselm to Augustine
- RELS 3411.03: St. Augustine's Confessions I
- RELS 3412.03: St. Augustine's Confessions II
- RELS 3431.03: St. Augustine's On the Trinity Part I
- RELS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 4018:03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4070.03: The Confessions in Latin
- CLAS 4401.03: Philosophy of the Greek Church Fathers
- CLAS 4402.03: Philosophy of the Latin Church Fathers

Islam courses

- RELS 2003.03: Islam
- RELS 2052.03: Cultural Introduction to the Arab World
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali or
- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 3012.03: Mystics of the Middle East
- RELS 2503.03: Classical and Medieval History of Islamic Civilization
- RELS 3510.03: Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age.
- CLAS 3602.03: Classical and Medieval History of the Persianate World

Bridging courses

- RELS 2203.03: Philosophy and God
- RELS 3000.03: Topics in Religious Studies
- RELS 3019.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 3910.06: Neoplatonism: Plato and Neoplatonism
- RELS 4450.06: Medieval Interpreters of Aristotle
- CLAS 4500.06: Seminar on Neoplatonism

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Contact **Religious Studies** for more information.

Minor in Middle East Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Students minoring in Middle East Studies select a minimum of 18 to a maximum of 27 credit hours from the list below. Student are required to take one of the following:

- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of Modern Middle East
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2021.03: Intermediate Arabic I
- ARBC 2022.03 Intermediate Arabic II

- ARBC 2100.03//RELS 2052.03: A Cultural Introduction to the Arab World
- RELS 2053.03/GWST 2053.03: Women and Islam
- CLAS 2103.03: Ancient Mythology I
- CLAS 2104.03: Ancient Mythology II
- CLAS 2216.03/HIST 2089.03: Alexander the Great
- CLAS 2220.03/HIST 2520.03/RELS 2220.03: Ancient Israel
- CLAS 2281.03/RELS 2281.03: The Orthodox and Oriental Churches
- CLAS 2900X/Y.06: Intermediate Hebrew
- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of the Modern Middle East
- HIST 2505.03: Modern History of Iraq
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

Third Year

- ARBC 3030.03: Advanced Arabic
- ARBC 3031.03: Advanced Arabic II (Readings)
- ARBC 3040.03: Arabic Philosophical Texts (al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts (Maimonides)
- ARBC 3100.03: Arabic Pre-Islamic Poetry
- CLAS 3016.03/HIST 3016.03/RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03/HIST 3017.03/RELS 3019.03: Meetings between Hellenism, Judaism, Christianity and Islam
- CLAS 3021.03: Ancient Art and Architecture
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3501.03: Herodotus
- CLAS 3502.03/HIST 3502.03: Thucydides and the Greek World at War
- HIST 3509.03/CLAS 3601.03: Arab Caliphs, Turkish Commanders, Persian Viziers, 750-1200
- HIST 3510.03/RELS 3510.03: Sultans and Shahs, 1500-1800
- HIST 3511.03/CLAS 3602.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3513.03: From Cairo to Capetown
- HIST 3515.03: Food for Thought
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East

Fourth Year

- RELS 4010.03/CLAS 4010.03: Islamic Philosophy: al-Ghazali
- CLAS 4011.03/RELS 4011.03: Jewish Philosophy: Maimonides
- CLAS 4018.03/RELS 4018.03: Christian Theology in Islamic Lands: John of Damascus
- CLAS 4019.03/RELS 4019.03: Philo Judaeus
- CLAS 4525X/Y.06/HIST 4525X/Y.06: The World of Herodotus
- HIST 4510.03: Topics in Middle Eastern and Islamic History
- HIST 4545.03: Scripture and Statecraft: History of Islamic Political Thought
- HIST 4550.03: Orientalism and Occidentalism
- HIST 4555.03: Arab Intellectuals and their Ideologies in the Modern Period

Contact **Religious Studies** for more information.

Minor in Religious Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Religious Studies is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Minimum of 18 credit hours in RELS beyond the 1000 level. At least 6 of these credit hours must be chosen from:

- RELS 2001.03: Judaism
- RELS 2003.03: Islam
- RELS 2011.03: Hinduism

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes
First year students are not admitted to courses beyond the 1000 level without the consent of the instructor. Courses at the 2000 level do not have prerequisites; in general, they are available only to students in their second year or above. Prerequisites for courses at the 3000 and 4000 levels are listed with each individual course below; in general, they are available only to students in their third year or above in the University.

Course Descriptions

RELS 0400 Religious Studies Honours Examination
CREDIT HOURS: 0
Details available from the department.
PREREQUISITES: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies.

RELS 0401 Honours Examination I
CREDIT HOURS: 0
The Religious Studies exam consists of one exam in Western and one in Eastern Religions.
CALENDAR NOTES: This course is the first part of the former course RELS 0400.00. RELS 0401 and RELS 0402 must both be completed in fulfill the RELS honors examination.
EXCLUSIONS: RELS 0400.00

RELS 0402 Honours Examination II
CREDIT HOURS: 0
The Religious Studies Honours Exam consists of one exam in Western and one in Eastern Religions.
CALENDAR NOTES: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies. This course is the second part of the former RELS 0400.00 This course description reflects the entirety of the pair (RELS 0401 and RELS 0402).
EXCLUSIONS: RELS 0400.00

RELS 1001 Religions of the East
CREDIT HOURS: 3
This course serves as an introduction to the history, beliefs, and practices of Hinduism, Jainism, Sikhism, Buddhism, Daoism, Shinto, and Confucianism.

EXCLUSIONS: RELS 1000.06
FORMATS: Lecture

RELS 1002 Judaism, Christianity, and Islam: The Abrahamic Religions
CREDIT HOURS: 3
This course serves as a comparative and thematic introduction to the history, beliefs, and practices of Judaism, Christianity, and Islam.
EXCLUSIONS: RELS 1000.06
FORMATS: Lecture

RELS 1201 Gods, Heroes, and Monsters: Ancient Mythology I
CREDIT HOURS: 3
An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.
CALENDAR NOTES: This course is the first part of the former full-year course RELS 1200X/Y.06. This course description reflects the entirety of the pair (RELS 1201.03 and RELS 1202.03).
CROSSLISTED: CLAS 1100X/Y.06, CLAS 1103.03
EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104.03, RELS 1200X/Y.06
FORMATS: Lecture

RELS 1202 Gods, Heroes, and Monsters: Ancient Mythology II
CREDIT HOURS: 3
An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.
CALENDAR NOTES: This course is the second part of the former full-year course RELS 1200X/Y.06. This course description reflects the entirety of the pair (RELS 1201.03 and RELS 1202.03).
PREREQUISITES: RELS 1201.03
CROSSLISTED: CLAS 1100X/Y.06, CLAS 1104.03
EXCLUSIONS: CLAS 2100X/Y.06, CLAS 2103.03, CLAS 2104.03, RELS 1200X/Y.06
FORMATS: Lecture

RELS 1600 Introductory Sanskrit I
CREDIT HOURS: 3
This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation.
CROSSLISTED: CLAS 1600.03

RELS 2001 Judaism
CREDIT HOURS: 3
An introduction to Jewish beliefs, practices, history, and writings from the Hellenistic period to the present. Topics to be covered include: the Torah, the Talmud, the development of the Rabbinic tradition, Jewish philosophy and mysticism.
FORMATS: Lecture | Seminar

RELS 2002 Christianity
CREDIT HOURS: 3
An introduction to Christian history and writings from the New Testament to the present. The course will examine core Christian beliefs (the Trinity and the Incarnation) and practices (Baptism, Eucharist, prayer, liturgical workship, iconography) as they have evolved in the different varieties of Christianity - Orthodox, Catholic, and Protestant - in the past and today.
FORMATS: Lecture

RELS 2003 Islam
CREDIT HOURS: 3
An introduction to Muslim beliefs, practices, history and writings from the 7th century to the present. Topics to be covered include: the life and mission of Muhammad, the Qur'an, the Islamic legal, philosophical, and mystical tradition, the development of the Hadith, and the rise of political Islam in the twentieth century.
FORMATS: Lecture | Seminar

RELS 2011 Hinduism
CREDIT HOURS: 3
A basic introduction to Hinduism, including Vedic religion, classical Brahmanical religion, the caste system, bhakti (devotional) traditions and the rise of epic literature, philosophical traditions and the Upanishads, the theistic traditions of the gods Vishnu and Shiva, and of the goddess Devi.
FORMATS: Lecture | Seminar

RELS 2012 Chinese and Japanese Religions
CREDIT HOURS: 3
An introduction to the cultural, religious, and philosophical traditions of China and Japan. Topics to be covered include: Classical Confucianism, Neo-Confucianism,

Philosophical and Religious Daoism, Shinto, Chinese and Japanese Buddhism. The course will also examine the interaction, competition, and overlap between these traditions.
CROSSLISTED: CHIN 2060.03
FORMATS: Lecture | Seminar

RELS 2013 Buddhism
CREDIT HOURS: 3
This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as practiced subsequently in China, Japan, and Tibet.
CROSSLISTED: CHIN 2070.03
FORMATS: Lecture | Seminar

RELS 2025 Conceptions of Nature in the Pre-Modern World
CREDIT HOURS: 3
What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers, to this question through the study of literature, philosophy, art and architecture of the Pre-Modern West.
CROSSLISTED: CLAS 2025.03
FORMATS: Lecture

RELS 2026 Paganism
CREDIT HOURS: 3
"Pagan" originated as a derogatory Christian designation for ignorant conservative rustics who kept to the pre-Christian religions. We shall look at those religions in their origins, nature, and development in antiquity, their continuations in the Middle Ages and modernity, and their persistence and revival in the contemporary world.
CROSSLISTED: CLAS 2026.03
FORMATS: Lecture | Discussion

RELS 2027 Magic, Religion and Philosophy
CREDIT HOURS: 3
Reading the Greek Magical Papyri, as well as curse tablets and binding spells for ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.
CROSSLISTED: CLAS 2027.03

RELS 2052 A Cultural Introduction to the Arab World
CREDIT HOURS: 3
This course provides students with the basic tools for approaching the Arab world from a cultural perspective. The main topics are: 1) the guide marks of Arabic history; 2) a civilization "of the Word": the Arabic language, the Koran, the Tradition of the Prophet Mohammed, and the sciences related to the Islamic Law (shari'a); 3) the Arabic legacy in sciences, philosophy, literature, architecture, calligraphy, decoration, etc; 4) multi-cultural Al-Andalus and the ideal of 'convivencia'; 5) present nostalgia for the past; 6) tradition, modernity and effects of 'Globalization' in the contemporary Arabic "high culture" and "pop culture": in literature, music, arts, cinema, life style, education system, media, etc. Some lectures will be accompanied by audio-visual presentations including documentary films. The course does not require background in Arabic.
CROSSLISTED: ARBC 2100.03, HIST 2500.03
FORMATS: Lecture | Discussion

RELS 2120 Magic, Science and the Occult: from Antiquity to Postmodernity
CREDIT HOURS: 3
The 'scientific revolution' is ordinarily construed as the triumph of reason over superstition, of science over sorcery. This course argues that the rhetoric of 'enlightenment' conceals a deep continuity between Modern science and the occult traditions of the Middle Ages and the Renaissance. The prototype of the experimental scientist is the Faustian magus. We investigate the role of Hermeticism, magic and the occult in the scientific revolution and the persistence of these esoteric currents in later movements, from German *Naturphilosophie* to Jungian psychology.
CROSSLISTED: HIST 2990.03, EMSP 2360.03, HSTC 2120.03
FORMATS: Lecture | Tutorial

RELS 2203 Philosophy and God
CREDIT HOURS: 3
Does God exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan, Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.
CROSSLISTED: CLAS 2024
FORMATS: Lecture | Discussion

RELS 2205 Philosophy of Religion
CREDIT HOURS: 3
The philosophical exploration of the nature and function of religious faith, belief, and practice. Topics typically include: relations between religion and morals; the existence of divinity/divinities; problems of evil; the nature and significance of religious experiences
CROSSLISTED: PHIL 2205.03
EXCLUSIONS: PHIL 2200X/Y.06

RELS 2209 The Roman World from Constantine to Theodosius (312-395)
CREDIT HOURS: 3
This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.
CROSSLISTED: HIST 2017.03, CLAS 2209.03
EXCLUSIONS: CLAS 2210X/Y.06, HIST 2004X/Y.06
FORMATS: Seminar

RELS 2220 Ancient Israel in Her Near Eastern Context
CREDIT HOURS: 3
Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.
CROSSLISTED: CLAS 2220.03/HIST 2520.03
FORMATS: Lecture | Seminar

RELS 2281 Christian Beginnings: The Orthodox and Oriental Churches
CREDIT HOURS: 3
This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).
CROSSLISTED: CLAS 2281.03

RELS 2362 Ancient Philosophy: From Aristotle to Plotinus
CREDIT HOURS: 3
This course covers the period in Ancient Philosophy from Aristotle to Plotinus: selected texts of Aristotle, Stoicism, Epicureanism, Pyrrhonean and Academic Scepticism, Middle Platonism, Neoplatonism.
CROSSLISTED: PHIL 2362.03, CLAS 2362.03
FORMATS: Lecture

RELS 2365 Plato and the Case of Socrates: Philosophy on Trial
CREDIT HOURS: 3
Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.
CROSSLISTED: CLAS 2365, PHIL 2365
FORMATS: Lecture

RELS 2420 Witchcraft in Early Modern Europe
CREDIT HOURS: 3
The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. Questions that will be addressed include: How did the Renaissance interest in magic influence the Early Modern understanding of witchcraft? What impact did concerns about popular religion have on the witch trials? What constituted evidence that someone was a witch? What did Early Modern scientists think about witchcraft? The course will pay special attention to Early Modern notions of gender and sexuality and their influence on the witch hunts and witch trials.
CROSSLISTED: GWST 2320.03, EMSP 2320.03
FORMATS: Lecture | Tutorial

RELS 2503 Medieval Islamic Civilization
CREDIT HOURS: 3
This course will introduce students to the Perso-Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and Abbasid Dynasties, as well as the Ottomans, Safavids, and Mughals. The central theme of this course will be an examination of the Islamic surrounding traditions and cultures in the Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.
CROSSLISTED: HIST 2503.03
EXCLUSIONS: first year students and HIST 2501.03
FORMATS: Lecture

RELS 2509 Hindu, Muslim, Sikh: Identity, Culture and State in Precolonial South Asia
CREDIT HOURS: 3
This course introduces students to the fundamental units of the religious and political history of South Asia from the pre-Islamic period to approximately 1750 CE, guided by the following questions: who are the peoples that have made up the religious, cultural and political communities of South Asia? What, if anything, defines religious and political identity in the ancient and early modern world? What role has religion played in the formation and administration of political regimes in South Asia? And how have the identities of those whom we today call "Muslim," "Hindu" and "Sikh" changed and evolved in the centuries preceding the British Imperial period?
CROSSLISTED: HIST 2509.03
FORMATS: Lecture | Tutorial

RELS 2510 Hindu, Muslim, Sikh: Locating the Trauma of Modern South Asia
CREDIT HOURS: 3
This course will examine the region of South Asia from the mid-19th century - the height of the British Raj - to the present. Areas of concentration will include resistance to British rule, rise of the Congress Party, the 1947 Partition, and subsequent decolonization. The respective histories of modern India, Pakistan, and Bangladesh will be examined against the backdrop of nationalism, communalism, and regional conflict.
CROSSLISTED: HIST 2510.03
FORMATS: Lecture

RELS 2600 Introductory Sanskrit II
CREDIT HOURS: 3
This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.
PREREQUISITES: RELS 1600.03 or CLAS 1600.03
CROSSLISTED: CLAS 2600.03

RELS 3000 Topics in Religious Studies
CREDIT HOURS: 3
This course treats a range of theoretical and methodological issues in the study of religion and serves to introduce students to key problems in scholarship on both Western and Eastern traditions. A variety of themes will be explored such as the relationship between philosophy and religion, the functions of doctrine and ritual, the nature of holiness and the nature of scripture. Beyond a basic understanding of these and other themes, however, the course will engage students with the various - often conflicting - ways in which these themes have been treated in Religious Studies scholarship.
RESTRICTIONS: Students must be in their third year of study, or beyond
FORMATS: Seminar

RELS 3008 The Medieval Church
CREDIT HOURS: 3
This course does not attempt to provide a chronological survey of the development of the Western church, but is an advanced seminar dealing with topics which have no strict chronological limits. Subjects of study include monasticism, heresy, education and the universities, town and cathedral, lay-clerical conflict, and “popular” concepts of religion. Each year one or more topics are examined in detail, with the help of original documents in translation, and using recent periodical literature and/or monographs. Students prepare and present one or two well-researched papers, and class discussions are used to explore related materials and readings in greater depth. Some prior knowledge of medieval European history is essential. RECOMMENDED: HIST 1001.03
PREREQUISITES: HIST 2001.03 or HIST 2002.03 or HIST 2120.03
CROSSLISTED: HIST 3002.03
EXCLUSIONS: Former HIST 3021.03 and 3022.03 students
FORMATS: Lecture | Discussion

RELS 3009 Christianity in the Lands of Islam
CREDIT HOURS: 3
After the Islamic conquest of the Middle East in the seventh century, approximately half of the world’s Christians found themselves under Islamic rule. The course tells the story of these Christians, their religious practices, their literatures, written in Greek, Arabic, Syriac, and Coptic, and their complex relations with the Muslims from the seventh century until today.
PREREQUISITES: RELS 1002.03 or RELS 2003.03 or permission of the instructor.
FORMATS: Lecture

RELS 3012 Mystics of the Middle East
CREDIT HOURS: 3
The course is designed as an introduction to mystical dimensions of Islamic thought and practice in their historical development and in relation to Jewish and Christian mysticism in the Middle East. Topics to be covered include: Middle Eastern Christian mysticism, the beginnings of the Sufi tradition in relation to other varieties of Middle Eastern mysticism, orthodoxy and heresy in early Sufism, stations and states on the Sufi path, Sufism and philosophy in interaction, Sufi orders, Sufi poetry as

vehicle of mystical experience.
PREREQUISITES: RELS 1002.03 or RELS 2003.03 or permission of the instructor.

RELS 3018 Meetings Between Hellenism and the East to Philo the Jew
CREDIT HOURS: 3
We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in PowerPoint.
CROSSLISTED: CLAS 3016.03, HIST 3016.03
FORMATS: Lecture | Discussion

RELS 3019 Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance
CREDIT HOURS: 3
We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.
CROSSLISTED: CLAS 3017.03, HIST 3017.03
FORMATS: Lecture | Discussion

RELS 3100 Readings in Western Religions
CREDIT HOURS: 3
This course will focus on a single body of literature from the Jewish, Christian, or Islamic religious traditions such as the Gospels, Midrashic collections, or Tafsir. The course will examine the interpretation of the literature in its original context, in traditional commentaries, and in the modern academy.
PREREQUISITES: A 2000 level course or permission of instructor
EXCLUSIONS: RELS 3002.03
FORMATS: Lecture | Seminar

RELS 3101 The Self and the World in Indian Story
CREDIT HOURS: 3
Through a close reading of narrative and other forms of story literature, this course explores the twin themes, fundamental to all South Asian religions, of renouncing and embracing the world. Reading materials will draw from Hindu, Indian Buddhist, Jain and Sikh narrative literature, and will reflect a range of religious attitudes towards engaged worldly life within the family and society, and the pursuit of personal liberation through asceticism, renunciation and monasticism.
PREREQUISITES: A 2000 level RELS course or permission of the instructor
EXCLUSIONS: RELS 3002.03

RELS 3111 Vishnu and Krishna the Dark Lord: Popular Hindu Religion
CREDIT HOURS: 3
This course focuses on the god Vishnu and his various manifestations, particularly Krishna, the "Dark Lord." Through an examination of traditional Sanskrit sources and popular regional traditions across India, the course treats the theological, mythic and cultic expressions of one of Hinduism's most beloved figures.
PREREQUISITES: RELS 2011; or RELS2509/HIST 2509; or RELS 2510/ HIST 2510; or permission of instructor.
FORMATS: Lecture | Tutorial

RELS 3112 Buddhism in India and Tibet
CREDIT HOURS: 3
This course engages the student with the Mahayana and Vajrayana traditions of Buddhism as lived and practiced initially in India and subsequently in the Tibetan cultural region. Emphasis will be placed on the philosophical schools called Madhyamaka and Yogacara, and particularly on the tantric ritual and meditation practices of Tibetan Buddhism.
PREREQUISITES: RELS 2013.03 or CHIN 2070.03, or permission of instructor
FORMATS: Lecture | Tutorial

RELS 3113 The Mahabharata: India's Great Epic of Strife and Salvation
CREDIT HOURS: 3
Barring perhaps the Ramayana, the Mahabharata or "Great [Epic] of India" is the most widely known and retold narrative in all South Asian tradition, and is one of the most important literary works of human civilization. The Sanskrit Mahabharata is enormous, complex, endlessly fascinating, and has remained for 2000 years the principal venue for the Hindu tradition's reflection on the dark and elusive dimensions of war, violence, civil and divine law, human destiny and freedom. This course will lead students into the colourful world of India's great Sanskrit epic, provide them with the tools for mastering the narrative itself and the scholarly issues arising from its study, and provide them a taste of the Sanskrit language in which the poem is written.
PREREQUISITES: A 2000-level RELS course or permission of the instructor.
FORMATS: Lecture | Tutorial

RELS 3114 Special Topics in Eastern Religions
CREDIT HOURS: 3
This course treats a variety of special themes in Asian religious traditions. Topics may include ritual, scripture and its interpretation, gender and social expressions of faith, religion and modernity, and the relationship between political and religious authority in India, Southeast Asia, Tibet, China, Korea and Japan.
PREREQUISITES: A 2000-level RELS course or permission of the instructor.
FORMATS: Lecture | Seminar

RELS 3121 In Search of the Philosopher's Stone: The History of European Alchemy
CREDIT HOURS: 3
This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and iconographic dimensions of alchemy as interdependent. The entire development of

European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other.This course is independent of HSTC 3120.03. All students interested in the intersections of science, magic and mysticism are welcome.
CROSSLISTED: HIST 3990.03, EMSP 3321.03, HSTC 3121.03
FORMATS: Lecture | Seminar

RELS 3200 Science and Religion: Historical Perspectives
CREDIT HOURS: 3
Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's Timaeus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.
CROSSLISTED: HSTC 3200.03, EMSP 3330.03, HIST 3075.03
FORMATS: Lecture | Discussion

RELS 3201 Science and Religion: Contemporary Perspectives
CREDIT HOURS: 3
Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's Timaeus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. RELS 3250 Atheism in Early Modern Europe
CREDIT HOURS: 3
Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the Early Modern world.
CROSSLISTED: EMSP 3250.03
FORMATS: Lecture | Tutorial

RELS 3282 Christian Beginnings: Catholicism
CREDIT HOURS: 3
This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.
CROSSLISTED: CLAS 3282.03
EXCLUSIONS: CLAS 3280X/Y.06
FORMATS: Lecture | Discussion

RELS 3283 Gods in the Flesh: Iamblichus and Anselm
CREDIT HOURS: 3
This course presents two opposed arguments for the union of divinity with the sensuous and human ("incarnation") and looks at one instance of how they meet: Iamblichus, *On the Mysteries*, Anselm, *Why the God-man*, Bonaventure, *The Journey of the Mind into God*. We shall look at how these arguments bridge the pagan / Christian, philosophy/ theology/ religion, Orthodox / Catholic, and Greek / Latin divides.
CROSSLISTED: CLAS 3283.03

FORMATS: Seminar

RELS 3381 Medieval Philosophy from Augustine to Anselm
CREDIT HOURS: 3
A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the

philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.
CROSSLISTED: CLAS 3381, PHIL 2381
FORMATS: Lecture

RELS 3382 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
CREDIT HOURS: 3
A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure's *The Mind's Journey into God* will be read in its entirety.
CROSSLISTED: CLAS 3382, PHIL 2382

RELS 3413 Augustine's Confessions
CREDIT HOURS: 3
A study of the 13 books of Augustine's Confessions.
CROSSLISTED: CLAS 3413.03

RELS 3431 St. Augustines On the Trinity Part I
CREDIT HOURS: 3
A study of Books 1-7 of Augustine's De Trinitate, in which he establishes what is the orthodox teaching about God through scripture and a consideration of the categories of substance, relation and act.
CROSSLISTED: CLAS 3431.03

RELS 3432 St. Augustine's On the Trinity Part 2
CREDIT HOURS: 3
A study of Books 8-15 of Augustine's *De Trinitate*, in which he attempts to understand what has been shown in the first 7 books (the orthodox teaching about God through Scripture and a consideration of the categories of substance, relation and act) through the distinction of *scientia* and *sapientia*.
CROSSLISTED: CLAS 3432.03
FORMATS: Seminar

RELS 3510 Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age (1500-1800)
CREDIT HOURS: 3
Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni `Abbasid caliphate. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendents, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia. By 1500, innovations in military technology and the paper-making industry allowed for the emergence of centralized and bureaucratically-sophisticated 'gunpowder' empires in western and south Asia. This course will discuss the three most significant of these: the Ottoman Turks (based in Istanbul), the Safavid Persians (based in Isfahan), and the Mughal Indians (based in Delhi). Areas of focus will include: issues of political legitimacy, use of military 'slave' corps, orthodox and popular religious movements, tensions between nomadic and sedentary segments of society, innovations in cultural expression (poetry, art, architecture), scientific and philosophical development, and the penetration and impact of the Portuguese, English, Dutch, and French 'world economies' into Asia and the Indian Ocean. This course will also examine different debates regarding the 'decline of the East', and introduce the theoretical implications of how the Islamic world is approached by contemporary scholarship.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: HIST 2501.03 or 2502.03 or 2503.03
CROSSLISTED: HIST 3510.03
FORMATS: Lecture | Discussion

RELS 3600 Sanskrit Texts I: Narrative and Epic Selections
CREDIT HOURS: 3
This course provides a transition from first-year Sanskrit grammar to the reading of simple Sanskrit texts in their original form. In the first weeks, the materials selected for reading will be examined slowly and thoroughly as a means of introducing key aspects of grammar not covered in in the first year (notably the infinitive, simple future, additional forms of compounds, present participial adjective, optative, gerundive, absolute constructions, causative and reduplicating perfect). Students thus will be equipped with the tools for independent reading of simple narrative and epic sources such as the Pañcatantra, Hitopadesa, Kathasaritsagara, Mahabharata, Hariva?sa, and Ramaya?a.
PREREQUISITES: Both RELS 1600.03 and RELS 2600.03, or both CLAS 1600.03 and CLAS 2600.03
CROSSLISTED: CLAS 3600.03
FORMATS: Other (explain in comments)

RELS 3610 Studies in Ancient and Medieval Science
CREDIT HOURS: 3
Topics vary each year. Some of the topics are "Causation", "History of dissection", "Mesopotamian science", "Sciences and cultures in antiquity", "The mangle of praxis", "Ptolemy", "Ancient Method", "Embryology", "Posterior analytics", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Programs.
CALENDAR NOTES: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.
CROSSLISTED: HSTC 3610.03
FORMATS: Lecture | Discussion

RELS 3661 The Epicureans
CREDIT HOURS: 3
A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman philosophy after Aristotle, focusing on Epicureanism. The course covers the logic, physics, and ethics of Epicurus' school, as well as its religious dimension.
PREREQUISITES: CLAS 2361.03 and 2362.03 or permission of instructor
CROSSLISTED: CLAS 3661.03
FORMATS: Seminar

RELS 3662 Hellenistic Philosophy: From Scepticism to Neoplatonism
CREDIT HOURS: 3
A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman Philosophy, focusing on Pyrrhonian and Academic Scepticism, as well as Middle Platonism. The course covers the logic, physics, and ethics of these philosophical schools, as well as their religious dimension.
PREREQUISITES: CLAS 2361.03 and 2362.03 or permission of instructor
CROSSLISTED: CLAS 3662.03
EXCLUSIONS: RELS 4602.03, CLAS 4602.03

RELS 3850 The End of the World: The Apocalypse in German Thought
CREDIT HOURS: 3
The war, death and destruction that define European history in the 20th century can only begin to explain the obsession with the apocalypse in contemporary German thought. In this seminar we will study the secular appropriation of apocalyptic imagery from the Judeo-Christian tradition. The seminar will be conducted in English. All readings will be in English.
CROSSLISTED: GERM 3850.03
RESTRICTIONS: Restricted to students in second year or above
FORMATS: Lecture | Discussion

RELS 3910 Neoplatonism: Plato and Neoplatonism
CREDIT HOURS: 6
The philosophy of Plotinus and later thinkers considered as the resume of Greek Philosophy; in particular the role of Plato and other older philosophers in the formation of Neoplatonism is a principal interest.
CROSSLISTED: CLAS 3910.06

RELS 4010 Islamic Philosophy: al-Ghazali
CREDIT HOURS: 3
Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology – exoteric theology for the masses and esoteric theology for the select few – and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).
PREREQUISITES: At least one of RELS 1002, RELS 2003.03, Foundation Year Program, or permission of instructor.
CROSSLISTED: CLAS 4010.03, CLAS 5817.03
FORMATS: Seminar

RELS 4011 Jewish Philosophy: Maimonides
CREDIT HOURS: 3
Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. This course is an introduction to his philosophical and legal writings, with special emphasis on his famous treatise *The Guide of the Perplexed*. Maimonides' stance on such issues as God's incorporeality, creation, and prophecy will be compared to that of other varieties of Judaism.
PREREQUISITES: Students must have completed 5 full credits of university study and RELS 2001.03 or RELS 3382.03/CLAS 3382.03/PHIL 2382.03, or permission of the instructor
CROSSLISTED: CLAS 4011.03
FORMATS: Lecture | Seminar

RELS 4018 Christian Theology in Islamic Lands: John of Damascus
CREDIT HOURS: 3
John of Damascus (d. 749) is one of the greatest Christian theologians of the Patristic age. Though he wrote in Greek, he was probably a Christian Arab (his Arabic name is Mansur ibn Sarjun), who lived under Muslim rule and was employed as a public official in the Umayyad administration in Damascus. The course will focus on his theological works (especially his summa of Christian theology, entitled *On the Orthodox Faith*, and his three treatises in defence of the icons), their Christian sources, and their Islamic context.
PREREQUISITES: At least one of: RELS 1002.03, RELS 2003.03, RELS 2281.03, RELS 3009.03, RELS 3282.03, foundation year program, or permission of the instructor
CROSSLISTED: CLAS 4018.03
FORMATS: Seminar

RELS 4019 Philo Judaeus: Philosophical Religion: Plato and Moses
CREDIT HOURS: 3
Reconciling Jewish Scripture and Plato, Philo culminates Second Temple Jewish thought and founds the Christian treatment of Scripture. He is the most influential Jewish theologian and presents the High Priest as priest of the cosmos so he is crucial both to understand our past and to carry us into the future.
PREREQUISITES: At least one course at the second year or above in CLAS or RELS
CROSSLISTED: CLAS 4019.03
FORMATS: Seminar

RELS 4060 The Consolation of Philosophy
CREDIT HOURS: 3
Boethius's Consolation is a strange example of Menippean satire, which is itself a strange genre. This class will consider the poetry, the prose and, most significantly,

how these elements are combined in order to achieve the goal of the work, which is to offer consolation to the reader.
PREREQUISITES: Three years of undergraduate Latin or the permission of the instructor
CROSSLISTED: CLAS 4060
FORMATS: Seminar

RELS 4401 Philosophy of the Greek Church Fathers
CREDIT HOURS: 3
This seminar involves the detailed study of a text, or group of texts, from one or more of the Greek Church Fathers. The choice of text varies from year to year, in relation to the needs and interests of students.
PREREQUISITES: At least one of RELS 1002.03, RELS 3283.03, , RELS 3009.03, RELS 3282.03, Foundation Year Program, or permission of instructor.
CROSSLISTED: CLAS 4401.03
EXCLUSIONS: CLAS 4400X/Y.06
FORMATS: Seminar

RELS 4402 Philosophy of the Latin Church Fathers
CREDIT HOURS: 3
This seminar involves the detailed study of a text, or group of texts, from one or more of the Latin Church Fathers. The choice of text varies from year to year, in relation to the needs and interests of students.
PREREQUISITES: At least one of RELS 1002.03, , RELS 3009.03, RELS 3282.03, RELS 3283.03, Foundation Year Program, or permission of instructor.
CROSSLISTED: CLAS 4402.03
EXCLUSIONS: CLAS 4400X/Y.06
FORMATS: Seminar

RELS 4450 Medieval Interpreters of Aristotle
CREDIT HOURS: 6
The course considers Latin philosophical texts of the Middle Ages. Given alternately with CLAS 4500X/Y.06.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: CLAS 4450.06
FORMATS: Seminar

RELS 4451 Medieval Interpreters of Aristotle
CREDIT HOURS: 3
This course normally focuses on a single philosophical text by a Latin author of the Middle Ages whose work is engaged with Aristotle and the Greek and Latin commentary traditions.
CROSSLISTED: CLAS 4451
EXCLUSIONS: CLAS 4450X/Y.06; RELS 4450X/Y.06
FORMATS: Seminar

RELS 4500 Seminar on Neoplatonism
CREDIT HOURS: 6
The course considers the origin and nature of Greek Neoplatonism. Given alternatively with CLAS 4450X/Y.06.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: CLAS 4500
FORMATS: Seminar

RELS 4600 Sanskrit Texts II: Myth, Poetry and Drama
CREDIT HOURS: 3
This course continues from RELS/CLAS 3600 the reading of Sanskrit texts in their original form, training students in the styles and conventions of Puranic literature (e.g. Vishnu Purana, Bhagavata Purana, etc.) as well as of kavya or courtly poetry and drama (e.g. excerpts from the Gita Govinda of Jayadeva, poems and plays of Kalidasa, plays of Bhasa, Kiratarjuniya of Bharavi, etc.). Students will work through short selections, emphasizing thorough mastery of smaller and representative samples over quantity or exhaustive coverage of entire works.
PREREQUISITES: RELS 3600.03 or CLAS 3600.03
CROSSLISTED: CLAS 4600.03
FORMATS: Other (explain in comments)

Introduction
The Russian Studies Department offers courses in Russian language, literature, culture and history. Since Russia plays a crucial role in today's world and makes important contributions in a wide variety of scientific, technical, and humanistic fields, knowledge of its linguistic and cultural backgrounds can prove advantageous in many areas of study. Recent radical shifts in the country have significantly widened opportunities for using Russian in business, law, science, and government.

In the language courses emphasis is placed on gaining a thorough grasp of Russian grammar combined with practical competence in speaking, listening, reading, and writing. Sections are small and intensive. Classroom work is supplemented by computerized audio-visual materials. Study of Russian literature begins with a general survey intended for first or second year students, followed by monograph, period, and genre courses. Literature courses are generally offered in both English and Russian in order to give as many students as possible from other disciplines the opportunity to become acquainted with this important part of Russian life.

Courses in Russian culture and civilization are intended to introduce students to art, architecture, music, religion, and other areas of Russian life which are necessary to understand the language and literature. Films, guest speakers, and evenings of Russian poetry are scheduled periodically. The Dalhousie Association of Russian Students organizes a variety of events throughout the year.

Major or honours students may, with the approval of the Russian Studies Department, take up to one semester (15 credit hours) of work at a university in Russia and receive credit at Dalhousie. Qualified students are urged to participate in the Intensive Russian Program, founded by Dalhousie, which enables Canadian students to study for a semester at St. Petersburg State University.

Degree Programs
Courses in the Russian Studies Department are open to students either (1) as electives in any degree program; (2) as constituents of a major or honours degree in Russian; or (3) with courses in another discipline forming part of a combined honours degree or double major; or (4) as a minor.

All Bachelor degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See Degree Requirements section.

BA Honours in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 54 and a maximum of 66 credit hours beyond the 1000 level in Russian Studies, including 18 credit hours beyond the 2000 level.

Departmental requirements

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II
- RUSN 2022.03: Imperial Russia
- RUSN 2023.03: Soviet Russia
- RUSN 2051.03: Survey of Russian Literature I
- RUSN 2052.03: Survey of Russian Literature II

3000 level

- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II

4000 level

- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II
- Honours Thesis (RUSN 4991.03: Special Topics I and RUSN 4992.03: Special Topics II)

Other required courses

- 18-30 additional credit hours at the 2000 level or above

Honours students are encouraged to take advantage of the opportunity to spend two months in St. Petersburg with the Russian Program Abroad following their second or third year of study, which is equivalent to 15 credit hours at the 3000 or 4000 level.

BA Combined Honours in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in two allied subjects. A minimum of 30 and a maximum of 48 credit hours may be completed in each subject, including 18 credit hours beyond the 2000 level in each.

Departmental requirements
Russian Studies as first subject:

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II
- RUSN 2022.03: Imperial Russia ***OR*** RUSN 2023.03: Soviet Russia
- RUSN 2051.03: Survey of Russian Literature I ***OR*** RUSN 2052.03: Survey of Russian Literature II

3000 level

- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II

4000 level

- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II
- Honours Thesis (RUSN 4991.03: Special Topics I and RUSN 4992.03: Special Topics II)

Other required courses

- 0-18 additional credit hours at the 2000 level or above

Russian Studies as second subject:

- A minimum of 30 credit hours with at least 12 of those credit hours being language courses at the 2000 level or above (normally RUSN 2002.03/RUSN 2003.03/RUSN 3002.03/RUSN 3003.03/RUSN 4002.03/RUSN 4003.03)
- At least 18 of the 30 credit hours must be at the 3000 level or above

Honours students are encouraged to take advantage of the opportunity to spend two months in St. Petersburg with the Russian Program Abroad following their second or third year of study, which is equivalent to 15 credit hours at the 3000 or 4000 level.

BA (120 credit hour) Major in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 30 and a maximum of 54 credit hours beyond the 1000 level in Russian Studies, including a minimum of 18 credit hours beyond the 2000 level.

Departmental requirements

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II
- RUSN 2022.03: Imperial Russia
- RUSN 2023.03: Soviet Russia
- RUSN 2051.03: Survey of Russian Literature I
- RUSN 2052.03: Survey of Russian Literature II

3000 level

- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II
- 6 additional credit hours at the 3000 level or above

4000 level

- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II

Other required courses

- 0-18 additional credit hours at the 2000 level or above

Students majoring in Russian Studies are encouraged to take advantage of the opportunity to spend two months in St. Petersburg with the Russian Program Abroad following their second or third year of study, which is equivalent to 15 credit hours at the 3000 or 4000 level.

BA (120 credit hour) Double Major in Russian Studies

Students must meet the Faculty degree requirements which include a minimum of 60 and a maximum of 84 credit hours beyond the 1000 level in two allied subjects. A minimum of 30 and a maximum of 48 credit hours may be completed in each subject, including 18 credit hours beyond the 2000 level in each.

Russian Studies as first major:

2000 level

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II
- RUSN 2022.03: Imperial Russia ***OR*** RUSN 2023.03: Soviet Russia
- RUSN 2051.03: Survey of Russian Literature I ***OR*** RUSN 2052.03: Survey of Russian Literature II

3000 level

- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II
- 6 additional credit hours at the 3000 level or above

4000 level

- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II

Other required courses

- 0-18 additional credit hours at the 2000 level or above

Russian Studies as second major:

- A minimum of 30 credit hours with at least 12 of those credit hours being language courses at the 2000 level or above (normally RUSN 2002.03/RUSN 2003.03/RUSN 3002.03/RUSN 3003.03/RUSN 4002.03/RUSN 4003.03)
- At least 18 of the 30 credit hours must be at the 3000 level or above

Students majoring in Russian Studies are encouraged to take advantage of the opportunity to spend two months in St. Petersburg with the Russian Program Abroad following their second or third year of study, which is equivalent to 15 credit hours at the 3000 or 4000 level.

BA (90 credit hour) Minor in Russian Studies

See Minor in Russian Studies section.

Minor in Russian Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Russian Studies is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Nine credit hours in Russian language, chosen from:

- RUSN 2002.03: Intermediate Russian I
- RUSN 2003.03: Intermediate Russian II
- RUSN 3002.03: Advanced Russian I
- RUSN 3003.03: Advanced Russian II
- RUSN 4002.03: Structure of Contemporary Standard Russian I
- RUSN 4003.03: Structure of Contemporary Standard Russian II

AND

- RUSN 2022.03: Imperial Russia ***OR***RUSN 2023.03: Soviet Russia
- RUSN 2051.03: Survey of Russian Literature I ***OR*** RUSN 2052.03: Survey of Russian Literature II

AND

three more credit hours in Russian film, literature, or history above the 1000 level chosen from:

- RUSN 2036.03: Russian Film I
- RUSN 2037.03: Russian Film II
- RUSN 2046.03: East European Cinema: War, Love, and Revolutions
- RUSN 2061.03: Russian Modernism
- RUSN 2062.03: Literature of Revolution - The 1920s in Russian Literature
- RUSN 2070.03: Russian Literature and Culture since Stalin's Death
- RUSN 2081.03: Contemporary Russian Culture - The Seven Deadly Sins
- RUSN 2151.03: Introduction to Russian Folklore
- RUSN 2191.03: Survey of Russian Theatre
- RUSN 2270.03: The Russian "Heroine"
- RUSN 2500.03: Tolstoy
- RUSN 2750.03: Dostoevsky and Russian Idea

Russian Program Abroad in Saint Petersburg

Introduction
The Russian Program Abroad (the oldest of its kind in Canada), is an inter-disciplinary course of instruction which allows students to undertake an 8 week summer intensive study of the Russian language at St. Petersburg University. This program is offered to students who have successfully (mark of "B") completed one year of Russian or its equivalent.

If students from elsewhere wish to join the program, they may do so after successful completion of application requirements.

Courses at St. Petersburg State University
Students will be placed into one of the following levels based on their application and interview.

1. **Elementary**

- RUSN 2011.03: Grammar I
- RUSN 2012.03: Grammar II
- RUSN 2031.03: Conversation & Phonetics
- RUSN 2032.03: Translation
- RUSN 2035.03: Literature: Reading & Analysis

2. **Intermediate**

- RUSN 3011.03: Intermediate Grammar I
- RUSN 3012.03: Intermediate Grammar II
- RUSN 3031.03: Intermediate Conversation & Phonetics
- RUSN 3032.03: Intermediate Translation
- RUSN 3035.03: Intermediate Literature: Reading & Analysis

3. **Advanced**

- RUSN 4011.03: Advanced Grammar I
- RUSN 4012.03: Advanced Grammar II
- RUSN 4031.03: Advanced Conversation & Phonetics
- RUSN 4032.03: Advanced Translation
- RUSN 4035.03: Advanced Literature: Reading & Analysis

Russian Program in Tallinn, Estonia
This program allows students to undertake intensive study of the Russian language during a summer term at the Tallinn University of Estonia.

Courses
Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

RUSN 1000 Elementary Russian
CREDIT HOURS: 6
For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
EXCLUSIONS: RUSN 1002.03, RUSN 1003.03

RUSN 1002 Elementary Russian I
CREDIT HOURS: 3
For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.
EXCLUSIONS: RUSN 1000X/Y.06

RUSN 1003 Elementary Russian II
CREDIT HOURS: 3
For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. may be offered in a traditional classroom setting or online.
PREREQUISITES: RUSN 1002.03

CREDIT HOURS: 3
As a continuation of RUSN 2002.03, students will continue to build on their oral and reading skills and develop a further knowledge of grammar through the study and discussion of Russian texts.
PREREQUISITES: RUSN 2002.03 or permission of instructor
EXCLUSIONS: RUSN 2001.06

RUSN 2022 Imperial Russia
CREDIT HOURS: 3
Chronologically covers the imperial period of Russian history, from Peter the Great to the Revolution of 1917.
CROSSLISTED: HIST 2022.03
EXCLUSIONS: HIST 2020.06, RUSN 2021.06
FORMATS: Lecture | Discussion

RUSN 2023 Soviet Russia
CREDIT HOURS: 3
Survey of Soviet Russia from 1917 to the present. Topics discussed will include the Revolution of 1917, the Civil War and War Communism, NEP, Collectivization, the Great Purges, WWII, and the Post-Stalin era.
CROSSLISTED: HIST 2021.03
EXCLUSIONS: HIST 2020.06 or RUSN 2021.06
FORMATS: Lecture | Discussion

RUSN 2029 Conversation
CREDIT HOURS: 3
Development of conversation skills and vocabulary building
COREQUISITES: RUSN 2002.03 or 2003.03 or instructor permission

RUSN 2034 Soviet Science and Techno Utopia
CREDIT HOURS: 3
Conducted in English. An overview of the history of Russian naturalscience from the foundation of the Russian Academy of Sciences during the reign of Peter the

Great to modern times.
FORMATS: Lecture | Discussion

RUSN 2036 Russian Film I
CREDIT HOURS: 3
This course surveys Russian film from the Silent Era to "Thaw" (19000-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet cinema, major directors and styles. Full versions of films will be screened each Monday night. later in the week they will be followed by a lecture, discussion, and viewing additional short clips.
CROSSLISTED: THEA 2336.03, FILM 2336.03
FORMATS: Lecture | Discussion

RUSN 2037 Russian Film II
CREDIT HOURS: 3
This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.
CROSSLISTED: THEA 2337.03, FILM 2337.03
FORMATS: Lecture | Discussion

RUSN 2043 How iRead the Eye-Books: Film and Multimedia Adaptations of World Literature
CREDIT HOURS: 3
In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.
CROSSLISTED: THEA 2043.03, FILM 2043.03, ENGL 2043.03
EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06
FORMATS: Lecture

RUSN 2044 How iRead the Eye-Books: Film Adaptations of World Literature II
CREDIT HOURS: 3
In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Supermen sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.
CROSSLISTED: THEA 2044.03, ENGL 2044.03
EXCLUSIONS: RUSN 2045.06, THEA 2347.06, ENGL 2045.06
FORMATS: Lecture | Discussion

RUSN 2046 East European Cinema: War, Love, and Revolutions
CREDIT HOURS: 3
This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.
CROSSLISTED: THEA 2346.03, FILM 2346.03
FORMATS: Lecture | Discussion

RUSN 2051 Survey of Russian Literature I
CREDIT HOURS: 3
Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from its beginnings through Tolstoy.
EXCLUSIONS: RUSN 2050.06
FORMATS: Lecture | Discussion

RUSN 2052 Survey of Russian Literature II
CREDIT HOURS: 3
Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from Chekhov to the present.
EXCLUSIONS: RUSN 2050.06
FORMATS: Lecture | Discussion

RUSN 2061 Russian Modernism
CREDIT HOURS: 3
Conducted in English. A study of trends in literature and the arts at the turn of the century. Known as “The Silver Age”, this is one of the most innovative and dynamic periods in Russian culture.
EXCLUSIONS: RUSN 2340.03
FORMATS: Lecture | Discussion

RUSN 2062 Literature of Revolution - The 1920s in Russian Literature
CREDIT HOURS: 3
Conducted in English. A study of experiment and submission during one of the most exciting, diverse, and frustrating periods in Russian letters. “Socialist realism” was

not yet official doctrine; innovation in literature was tolerated. Writers openly pondered the role of the individual and culture in the new collective society.
EXCLUSIONS: RUSN 3250.03
FORMATS: Lecture | Discussion

RUSN 2070 Russian Literature and Culture since Stalin's Death
CREDIT HOURS: 3
Conducted in English. The literary and cultural history of Russia after Stalin's death in 1953. Among the major issues considered are the significance of Stalin's death, the "Thaw" and de-Stalinization, samizdat and literature since glasnost.
FORMATS: Lecture | Discussion

RUSN 2081 Contemporary Russian Culture - The Seven Deadly Sins
CREDIT HOURS: 3
Conducted in English. The fall of the Soviet Union has allowed a deluge of once 'sinful' excesses, all of which define Russia's accelerated processes of multiculturalism. This course investigates such 'sins' in the following order: pride, covetousness, lust, anger, gluttony, envy and sloth.

RUSN 2151 Witches & Devils: Russian Fairy Tales
CREDIT HOURS: 3
Conducted in English. A broad survey of traditional Russian popular beliefs and practices: proverbs, riddles, and counting rhymes; the rites and rituals of the Russian agricultural year; fairy tales and epic poems (byline); reconstruction of the Slavic pantheon and its evolution.

RUSN 2191 The Enacted Thought: Performance Theories from Russia and Europe
CREDIT HOURS: 3
Conducted in English with a section in Russian for majors. An overview of Russian writing for the theatre, with emphasis on the nineteenth and twentieth centuries.
FORMATS: Lecture | Discussion

RUSN 2270 The Russian "Heroine"
CREDIT HOURS: 3
Conducted in English. The strong spiritual and moral force which Russian women have exerted on their society is richly reflected in literature. The course focuses on the portrayal of several literary heroines and discusses their impact on both the literary imagination and society.
FORMATS: Lecture | Discussion

RUSN 2500 Tolstoy
CREDIT HOURS: 3
Conducted in English. An introduction to the work of this enigmatic spiritual giant of Russian literature. Reading includes War and Peace, Anna Karenina, and Resurrection.
FORMATS: Lecture | Discussion

RUSN 2550 Russian and Eastern European Science Fiction
CREDIT HOURS: 3
This course will provide an introduction to science fiction in the Russian and Eastern European context. Emphasis on the origins from fantastic elements of Russian literature, utopian, socialist, and dystopian impulses, as well as the post-Soviet experience as apocalypse. Authors will include: Gogol, Zamyatin, Capek, Bulgakov, the Strugatskys, Lem, Pelevin.
FORMATS: Lecture | Discussion

RUSN 2750 Dostoevsky and the Russian Idea
CREDIT HOURS: 3
Conducted in English. Dostoevsky's novels are of the highest importance in understanding the fate of Russia and the thoughts of other great Russian authors and thinkers. *Crime and Punishment* and *The Brothers Karamazov* are taken as the basis for discussion. The works of I. Turgenev and Lev Tolstoy are discussed together with the ideas of such great Russian philosophers as V. Solovyev and N. Berdyaev.
FORMATS: Lecture | Discussion

RUSN 2760 Dostoevsky and Western Literature
CREDIT HOURS: 3
Conducted in English. With all his love for Russia, Dostoevsky treasured the West and its literature. It is impossible to understand Dostoevsky and his main novels, including *The Idiot* and *The Devils* without Hamlet by Shakespeare, Don Quixote by Cervantes, Faust by Goethe, some plays by F. Schiller, etc. The course traces the influence of Western ideas on Dostoevsky and his influence on such Western thinkers as Nietzsche and Freud.
FORMATS: Lecture | Discussion

RUSN 3002 Advanced Russian I
CREDIT HOURS: 3
Conducted in Russian. Following a thorough review, this course concentrates on expanding all aspects of the student's knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.
PREREQUISITES: RUSN 2001.06 or RUSN 2003.03 or instructor permission
EXCLUSIONS: RUSN 3000.06
FORMATS: Lecture | Discussion

RUSN 3003 Advanced Russian II
CREDIT HOURS: 3
As a continuation of RUSN 3002.03, students will continue to expand on all aspects of their knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.
PREREQUISITES: RUSN 3002.03 or permission of the instructor

EXCLUSIONS: RUSN 3000.06
FORMATS: Lecture | Discussion

RUSN 3011 Intermediate Grammar I
CREDIT HOURS: 3
Intensive study of the finer points of Russian grammar. Topics include verbs of motion, aspect, impersonal constructions, government and agreement, and other themes. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
EXCLUSIONS: RUSN 3010.06

RUSN 3012 Intermediate Grammar II
CREDIT HOURS: 3
Continuation of RUSN 3011.03. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
EXCLUSIONS: RUSN 3010.06

RUSN 3029 Conversation
CREDIT HOURS: 3
Development of conversational skills and vocabulary building.
COREQUISITES: RUSN 3002.03 or RUSN 3003.03 or instructor permission
EXCLUSIONS: RUSN 3010.06

RUSN 3031 Intermediate Conversation
CREDIT HOURS: 3
Systematic development of conversational ability on everyday themes: transport, city services, theatre, sport, shopping, the library, the educational system, the structure of the government, etc. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3032 Intermediate Translation
CREDIT HOURS: 3
Work on translation of literary, business and journalistic texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3035 Intermediate Literature: Reading and Analysis
CREDIT HOURS: 3
Reading and analysis of literary texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.

RUSN 3060 Special Topics
CREDIT HOURS: 3
The subject of this course -- generally devoted to contemporary Russia and the former Soviet Union -- varies from year to year, depending on shifts in current events in the region or the presence of visiting scholars with particular areas of expertise. Since the topics covered in this course may differ from year to year, students should seek further information from the Department of Russian Studies.
FORMATS: Lecture | Discussion

RUSN 3090 Russian Society Today
CREDIT HOURS: 3
Basic institutions of Russian society are considered in their historical context, with special attention to the role of official culture and literature, the workings of the economy, and social stratification.
CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03
CROSSLISTED: HIST 3090.03
EXCLUSIONS: HIST 5090.03
FORMATS: Seminar

RUSN 3091 Russian Intellectual History
CREDIT HOURS: 3
This course will examine intellectual developments in modern Russia, from Peter the Great to the late 20th century. Among the possible topics we will cover are: Russian thought and the West, the Russian intelligentsia and its relationship with the people and the state, Russian Orientalism, the roles of literature, arts, and media in Russian politics and society, the nature of dissent and revolutionary movements, as well as the functions of historical memory in Russian thought and culture. Throughout the course we will approach Russia as a multinational country that developed in constant and close interaction with the outside world.
PREREQUISITES: Some Russian history required; Recommended are HIST 2021.03 or HIST 2022.03.
CROSSLISTED: HIST 3030.03
FORMATS: Lecture | Discussion

RUSN 3092 Russian Topics
CREDIT HOURS: 3
Topics to be studied and researched will vary from year to year. They may include the sources of Bolshevism/Leninism, the doctrine of peaceful coexistence, the position of national minorities, the role of literature (official and samizdat) and the press, the Cult of Personality, Khrushchev's “Thaw”, Brezhnev, Gorbachev, and Yeltsin.
CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03
CROSSLISTED: HIST 3092.03
FORMATS: Seminar

RUSN 3096 The History of Ideas in Russia: From Official Nationality to Solzhenitsyn's Neo-Slavophilism
CREDIT HOURS: 3
This course examines some of the main currents in Russian intellectual history from the middle of the nineteenth century through the 1990s. Topics include classical Slavophilism and early Westernism, Populism and Nihilism, Anarchism, Marxism, Leninism, Socialist Realism, anti-Stalinism, Glasnost, neo-Westernism (Sakharov), and neo-Slavophilism (Solzhenitsyn).
CALENDAR NOTES: RECOMMENDED: RUSN 2022.03/2023.03 or HIST 2021.03/2022.03
CROSSLISTED: HIST 3096.03
FORMATS: Lecture | Discussion

RUSN 3102 Black Identity in Pushkin (Russian)
CREDIT HOURS: 3
Conducted in Russian. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies, Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- *sine qua non*-- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.
PREREQUISITES: RUSN 2003.03
EXCLUSIONS: RUSN 2100.03
FORMATS: Lecture | Discussion

RUSN 3103 Black Identity in Pushkin (English)
CREDIT HOURS: 3
Conducted in English. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies, Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- s*ine qua non* -- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.
FORMATS: Seminar

RUSN 3121 19th Century Russian Prose and Poetry
CREDIT HOURS: 3
Conducted in Russian. Students read, translate, and critically interpret representative works of the nineteenth century. Original texts are supplied with vocabularies and grammatical notes.
PREREQUISITES: RUSN 2003.03
EXCLUSIONS: RUSN 3120.03
FORMATS: Lecture | Discussion

RUSN 3122 20th Century Russian Prose and Poetry
CREDIT HOURS: 3
Conducted in Russian. Students read, translate, and critically interpret representative works of the twentieth century. Original texts are supplied with vocabularies and grammatical notes.
PREREQUISITES: RUSN 2003.03
EXCLUSIONS: RUSN 3120.03
FORMATS: Lecture | Discussion

RUSN 3200 Beats and Notes: Russian Music from Baroque to Rock
CREDIT HOURS: 3
Designed for the interested listener who wants to learn about the target culture through its melodic legacy, the course will consider the history of Russian music from its origin to the present day. This course is for non-music majors. Knowledge of musical notation and terminology is not a prerequisite. Knowledge of Russian language is not required, but those with the basic command will be given an option of completing special assignments.
CROSSLISTED: MUSC 3200.03
FORMATS: Lecture | Discussion

RUSN 3330 Masterpieces of Russian Short Fiction
CREDIT HOURS: 3
In-depth analysis of selected masterpieces of Russian nineteenth and twentieth century short fiction, including works by Pushkin, Lermontov, Gogol, Tolstoy, Sologub, Chekhov, Bunin, Nabokov, Krzhizhanovsky, Bulgakov, Babel, Zoshchenko, Kharms, Eppel, Dovlatov, Pelevin, and Sorokin.
FORMATS: Lecture | Discussion

RUSN 3520 Chekhov and Turgenev
CREDIT HOURS: 3
Conducted in English. Close analysis and discussion of the major works of Turgenev, sensitive portrayer of socio-political and psychological issues of the second half of the nineteenth century in Russia, and Chekhov, unequaled short-story writer and radical innovator in modern theatre.
FORMATS: Lecture | Discussion

RUSN 3800 Gogol and His Tradition
CREDIT HOURS: 3
Author of “Overcoat,” “Nose,” *Taras Bulba*, *Dead Souls*, Gogol has been proclaimed “a pathological liar and honest anatomist of the soul, jejune jokester and tragic

poet, realist and fantast". An in-depth study of this major writer.
FORMATS: Lecture | Discussion

RUSN 3820 Nabokov
CREDIT HOURS: 3
A close study of selected works by consummate twentieth century prose stylist Vladimir Nabokov -- novelist, poet, critic and translator, author of the notorious Lolita.
CROSSLISTED: ENGL 3820.03
FORMATS: Lecture | Discussion

RUSN 4000 The Structure of Contemporary Standard Russian
CREDIT HOURS: 6
This course is offered in Russian. Required for honours candidates. Systematic study of the structure of Russian: analysis of special problems in phonology, morphology, syntax, and stylistics. Tailored to the individual needs of the student, with emphasis on practical applications of linguistic insights.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: RUSN 3002.03 and 3003.03 or permission of the instructor
FORMATS: Lecture | Discussion

RUSN 4002 Structure of Contemporary Standard Russian I
CREDIT HOURS: 3
This course is offered in Russian. Required for honours candidates. Systematic study of the structure of Russian: analysis of special problems in phonology, morphology, syntax, and stylistics. Tailored to the individual needs of the student, with emphasis on practical applications of linguistic insights.
PREREQUISITES: RUSN 3003.03 or permission of the instructor
EXCLUSIONS: RUSN 4000.06
FORMATS: Lecture | Discussion

RUSN 4003 Structure of Contemporary Standard Russian II
CREDIT HOURS: 3
A continuation of RUSN 4002.03
PREREQUISITES: RUSN 4002.03
EXCLUSIONS: RUSN 4000.06
FORMATS: Lecture | Discussion

RUSN 4011 Advanced Grammar I
CREDIT HOURS: 3
Intensive study of the finer points of Russian grammar. Topics include verbs of motion, aspect, impersonal constructions, government and agreement, and other themes. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
FORMATS: Lecture

RUSN 4012 Advanced Grammar II
CREDIT HOURS: 3
Continuation of RUSN 4011.03. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
FORMATS: Lecture

RUSN 4031 Advanced Conversation & Phonetics
CREDIT HOURS: 3
Systematic development of conversational ability on everyday themes: transport, city services, theatre, sports, shopping the library, the educational system, the structure of the government, etc. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
FORMATS: Lecture

RUSN 4032 Advanced Translation
CREDIT HOURS: 3
Exercises in translation from Russian to English and from English to Russian using various media and excerpts from classical literature. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
FORMATS: Lecture

RUSN 4035 Advanced Literature: Reading & Analysis
CREDIT HOURS: 3
Reading and analysis of literary texts. Language of instruction is Russian. This class is only offered as part of the Russian Program Abroad at St. Petersburg State University.
FORMATS: Lecture

RUSN 4090 Soviet History Seminar
CREDIT HOURS: 3
This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.
CROSSLISTED: HIST 4090.03
FORMATS: Lecture

RUSN 4100 Artistic Petersburg
CREDIT HOURS: 3
St. Petersburg is one of Russia's most vibrant cities, credited as its key link to the West and modernism. It embodies political, social, and artistic history of Russia of the past three hundred years and gave birth to Russia's greatest writers, painters, and musicians. In this course we will be reading works by Dostoevsky, Bely, Blok,

Akhmatova and Nabokov while visiting the homes where they were born and raised; we will be studying particular paintings by visiting museums of fine arts and getting first-hand knowledge about Russia's musical scene by attending the world-class operas and stage adaptations. Whenever possible we will arrange the "behind the scene" meetings with Russian artists to foster authentic dialogue and experience Russian culture as it is possible only in St. Petersburg.
PREREQUISITES: At least 1 year of Russian language studies
FORMATS: Lecture | Discussion

RUSN 4302 Russian Poetry
CREDIT HOURS: 3
Conducted in Russian. A combination of an introduction to the theory of poetry with close analysis of masterpieces of nineteenth and twentieth century Russian poetry chosen to fit the interests of the individual student.
PREREQUISITES: Permission of the instructor
FORMATS: Lecture | Discussion

RUSN 4851 Special Topics
CREDIT HOURS: 3
FORMATS: Lecture

RUSN 4950 Special Topics
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to RUSN 4960/RUSN 4991/RUSN 4992.

Introduction
Social Anthropology and Sociology are related and overlapping disciplines. Although in some universities they are found in separate departments, this Department and many of its courses blur the distinction between them and emphasize the areas of overlap. The Department is committed to a program which stresses the areas of convergence between the two disciplines.

Sociology and Social Anthropology provide an academic training which is rigorous and cosmopolitan. Students develop research skills along with a general intellectual preparation which stands them in good stead for graduate work in the disciplines or for a broad range of professions such as law, medicine, social work or journalism.

Sociology
From its inception in the nineteenth century, sociology has been concerned with understanding the growth and evolution of modern societies. Classical sociologists attempted to identify universal laws of human behaviour which would help them to understand the nature of social change and of social order, the role of the individual vis-a-vis the broader society, and the production and reproduction of social inequalities. While contemporary sociologists have abandoned the search foruniversal laws, the discipline continues to study the social context of human action, and has contributed substantially to knowledge and understanding of our own world.

Social Anthropology
Anthropology is composed of four subfields, social/cultural, archaeological, biological, and linguistic. The strength of our program is the minor upon Social Anthropology, the area most complementary to Sociology. Social Anthropology, with its emphases on global context, continuity and change, questions of human and group identity, and views on human nature, may focus on local cultures or entire civilizations. For example, some Social Anthropologists study historical and contemporary conditions of indigenous groups, tribal or peasant societies, others conduct their research within industrial societies. Our program provides the

opportunity for students to become conversant with the comparative cultural implications of modern societies such as different forms of family and kinship practices, changing gender relations, the organization of work, law and social injustice, medicine and health, religion, and political economy. How do people in different places and times react, resist, and adapt to change?

Degree Programs
The Department's BA degree program is offered as a 90 credit hour minor or a 120 credit hour major in Sociology and Social Anthropology. The BA honours degree is offered through more specialized programs of study in Sociology or in Social Anthropology. Dalhousie graduates wishing to upgrade from a 90 credit hour minor may complete an additional 30 credit hours to be awarded the Major Conversion or the Honours Conversion. An honours degree is normally the required preparation for graduate study.

All Bachelors degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See Degree Requirements for complete details.

NOTE:

1. **No more than six credit hours may be obtained for introductory courses from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, SOSA 1500.06, SOSA 1002.03, SOSA 1003.03.**
2. For purposes of gaining entry to 2000 and 3000 level SOSA courses, King's Foundation Year satisfies the introductory course prerequisite.
3. If they so elect, King's Foundation Year students may also obtain credit for one introductory course from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, or SOSA 1200.06, SOSA 1500.06 or both SOSA 1002.03 and SOSA 1003.03.
4. Students may obtain credit for both SOSA 2001.06 and SOSA 2002.06, and those proposing to apply to the honours program are particularly encouraged to acquire a foundation in both disciplines.

Concentrated Honours BA Program

The Department's honours programs are designed for students with an interest in, and demonstrated aptitude for, advanced study in either Sociology or Social Anthropology. Admission to these programs is based solely on academic performance. More specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the minor (or second major) subject. In addition, a minimum cumulative GPA of 2.70 is required. Potential applicants should consult with one of the Department's Undergraduate Advisors, preferably during their second year of study, and should plan to take the 3000 level courses required for honours during their third year. The Advisor will assist the student to design a program of study with a minor in Social Anthropology or Sociology meeting the general Faculty requirements and the specific requirements for each program as set out below. It is important that students have a strong foundation before undertaking the honours thesis, therefore SOSA 2001 or SOSA 2002, and two of the required 3000 level courses are pre-requisites to the departmental Honours Seminars (SOSA 4000 X/Y or SOSA 4500 X/Y). Students who, after their third year, have not taken the pre-requisite courses may still do honours, but should plan to do so part-time over two years. The honours thesis paper is produced for the course SOSA 4500X/Y.06 (Sociology) or SOSA 4000.06 (Social Anthropology). This fulfills the College of Arts andScience Honours Qualifying Examination requirement. Students with the honours concentration in Sociology may not declare Social Anthropology as their secondary subject; students with the honours concentration Social Anthropology may not declare Sociology as their secondary subject.

Departmental Requirements
Courses required in Concentrated Honours in Social Anthropology:

1000 level

- One 1000 level SOSA class or King's Foundation Year Program

2000 level

- SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology
- At least six additional 2000 level credit hours

3000 level

- SOSA 3400.03: History of Anthropological Theory
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods

4000 level

- SOSA 4000.06: Honours Seminar in Social Anthropology
- SOSA 4003.03: Contemporary Perspectives in Ethnography
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

Courses required in Concentrated Honours in Sociology:

1000 level

- One 1000 level SOSA class or King's Foundation Year Program

2000 level

- SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

- At least six additional 2000 level credit hours

3000 level

- SOSA 3401.03: History of Sociological Thought
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods
- SOSA 3405.03: Contemporary Social Theory

4000 level

- SOSA 4001.03: Quantitative Anaylsis for the Social Sciences I or SOSA 4003.03: Contemporary Perspectives in Ethnography
- SOSA 4500X/Y.06: Honours Seminar in Sociology
- In addition, one of: SOSA 4001.03, SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

NOTE: Students considering graduate work in Sociology are strongly advised to take SOSA 4002.03: Quantitative Analysis for the Social Sciences II, since intermediate statistical competence is often required as a component of graduate social science programs.

Combined Honours in Sociology or Social Anthropology and another field

To be admitted to any of the Combined Honours programs, students must meet the same GPA requirements as for Concentrated Honours. Specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the other honours subject. In addition, a minimum cumulative GPA of 2.70 is required.

The requirements noted below normally apply. In some cases a variation may be allowable when approved by honours advisors in both departments, for example when a similar course is required by both departments.

Courses required in Combined Honours with Sociology as the primary subject:

1000 level

- One 1000 level SOSA course or King’s Foundation Year Program

2000 level

- SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology (recommended) or SOSA 2001.06: Ethnography in a Global Context

3000 level

- SOSA 3401.03: History of Sociological Thought
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods
- SOSA 3405.03: Contemporary Social Theory

4000 level

- SOSA 4001.03: Quantitative Analysis for the Social Sciences
- SOSA 4500.06: Honours Seminar in Sociology
- One of: SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

A total of 66 to 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, at least 36-48 credit hours must be in SOSA courses.

Courses required in Combined Honours with Social Anthropology as the primary subject:

1000 level

- One 1000 level SOSA course or King’s Foundation Year Program

2000 level

- SOSA 2001.06: Ethnography in a Global Context (recommended) or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

3000 level

- SOSA 3400.03: History of Anthropological Theory
- SOSA 3402.03: Figuring Out Society
- SOSA 3403.03: Qualitative and Field Methods

4000 level

- SOSA 4003.03: Contemporary Perspectives in Ethnography
- SOSA 4000X/Y.06: Honours Seminar in Social Anthropology
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

A total of between 66 and 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, 36-48 credit hours must be in SOSA courses.

Courses required in Combined Honours with Sociology or Social Anthropology as the secondary subject:

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

- SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

3000 level

- For Sociology: one of SOSA 3401.03, SOSA 3402.03, SOSA 3403.03, or SOSA 3405.03
- For Social Anthropology: one of SOSA 3400.03, SOSA 3402.03, SOSA 3403.03

A total of between 66 and 84 credit hours beyond the 1000 level in the two honours subjects combined, with a grade of "C" or better. Of this total, at least 30 credit hours must be in SOSA courses, including at least 18 credit hours abouve the 2000 level.

Honours Conversion in Sociology or Social Anthropology
This program permits Dalhousie graduates to undertake an additional 30 credit hours upgrading their qualifications from the 90 credit hour BA to Honours. Students must meet the usual conditions for admission to honours, and complete the full set of Honours requirements in either Sociology or Social Anthropology. Interested students should consult an Undergraduate Advisor. Students with a 120 credit hours major may also upgrade to honours.

BA (120 credit hour) Major in Sociology and Social Anthropology

- One 1000 level course or King’s Foundation Year Program

2000 level

- Either SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology
- At least six additional 2000 level credit hours

3000/4000 level

- Total of 18 SOSA credit hours, including at least three credit hours at the 4000 level

In total a minimum of 36 and a maximum of 54 SOSA credit hours beyond the 1000 level are required.

BA (120 credit hour) Double Major in Sociology and Social Anthropology

Students must obtain at least 60 and no more than 84 credit hours beyond the 1000 level in two allied subjects, with no fewer than 30 and no more than 48 credit hours in either.

Departmental requirements

1000 level

- One 1000 level SOSA course or King's Foundation Year Program

2000 level

- Either SOSA 2001.06: Ethnography in a Global Context or SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology

3000/4000 level

- 18 SOSA credit hours at the 3000 level or above

BA (120 credit hour) Major in Sociology and Social Anthropology Conversion

This program permits Dalhousie graduates to undertake an additional year of study upgrading their qualifications from the 90 credit hour BA to the 120 credit hour BA. Students must meet the full set of Major requirements.

BA (90 credit hour) Minor in Sociology and Social Anthropology
See the Minor in Sociology and Social Anthropology section of this Calendar

Minor in Sociology and Social Anthropology of Critical Health Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2402.03: Food and Culture
- SOSA 2403.03: Health & Society
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2503.03: Health & Society
- SOSA 2933.03: Health and Culture
- SOSA 2966.03: Health, Illness through Culture and Space
- SOSA 3052.03: Indigenous Social Health and Environmental Issues
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3143.03: Health, Illness and the World System
- SOSA 3145.03: Gender and Health
- SOSA 3147.03: Aging Cross-Culturally
- SOSA 3148.03: Drugs, Health and Society
- SOSA 3149.03: Childhood in a Cross-Cultural Perspective
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 3250.03: Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience
- SOSA 3260.03: Deviance and Society: Making Norms, Regulating Difference
- SOSA 3310.03: Science and Health in India
- SOSA 4006.03: Issues in Critical Health Studies

Contact Sociology and Social Anthropology for more information.

Minor in Sociology and Social Anthropology of Social Justice and Inequality
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2005.03: Introduction to African Canadian Studies: Society, History and Culture
- SOSA 2006.03: Global Migration:Transnational Lives
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2052.03: Contemporary Issues in Indigenous Studies
- SOSA 2115.03: African Canadian Society, Culture and Resistance
- SOSA 2181.03: Explaining Crime and Criminal Behavior
- SOSA 2182.03: Exploring Crime and Criminal Behavior
- SOSA 2190.06: Comparative Perspectives on Gender
- SOSA 2191.03: Gender Across Cultures
- SOSA 2192.03: Gender, Sexuality and Society
- SOSA 2261.03: Society, Politics and Culture
- SOSA 2403.03: Food Activism
- SOSA 3002.03: Native Peoples of Canada
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3014.03: Rethinking Culture and Class
- SOSA 3015.03: Popular Memory
- SOSA 3016.03: Colonialism of the Body: Sex & the Practice of Power
- SOSA 3052.03: Indigenous Social Health and Environmental Issues
- SOSA 3100.03: Feminist Perspectives in Sociology and Social Anthropology
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3206.03: Ethnicity, Race and Nationalism
- SOSA 3215.03: Migration and Identity
- SOSA 3225.03: Culture, Rights and Power
- SOSA 3260.03: Devience and Society: Making Norms, Regulating Difference
- SOSA 3275.03: Crime and Public Policy
- SOSA 3281.03: Youth Crime
- SOSA 3283.03: Globalized Security and Justice
- SOSA 3284.03: Living in Cities
- SOSA 3285.03: Sociology of Law
- SOSA 3291.03: Corrections
- SOSA 3295.03: Society and the Police
- SOSA 4005.03: Issues in Social Justice & Inequality

Contact Sociology and Social Anthropology for more information.

Minor in Sociology and Social Anthropology of Economy, Work and Development
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2006.03: Global Migration: Transnational Lives
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2045.03: Indian Society: Change and Continuity
- SOSA 2101.03: Environment and Culture
- SOSA 2111.03: Is there an Atlantic Canada?
- SOSA 2140.03: Going Global: Geography, Economy, and Work in the 21st Century
- SOSA 2141.03: Why Work?
- SOSA 2162.03: Work and Occupations in a Changing World I
- SOSA 2163.03: Work and Occupations in a Changing World II
- SOSA 2270.03: Introduction to Popular Culture
- SOSA 2271.03: Popular Culture in a Global Context

- SOSA 2402.03: Food Through Time and Space
- SOSA 2403.03: Food Activism
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3014.03: Rethinking Culture and Class
- SOSA 3060.03: Social Change and Development
- SOSA 3096.03: Introduction to Demography
- SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- SOSA 3168.03: Issues in Latin American Society
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3200.03: Environmental and Society
- SOSA 3211.03: Continuity and Change in Rural Societies
- SOSA 3214.03: Living in a Globalized World
- SOSA 3215.03: Migration and Identity
- SOSA 3284.03: Living in Cities
- SOSA 3310.03: Science and Health in India
- SOSA 4004.03: Issues in Economy, Work and Development

Contact Sociology and Social Anthropology for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions
Some courses listed may not be offered in a given academic year. Consult the timetable for details. Where prerequisites apply, students requesting exceptions must obtain permission directly from the instructor involved.

Note:

1. Enrolment in 4000 level courses is restricted to Honours and Major students in their fourth year of study.
2. No more than six credit hours may be obtained for introductory courses from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, SOSA 1500.06, SOSA 1002.03, SOSA 1003.03.
3. King's Foundation Year Program satisfies the introductory course prerequisite.

SOSA 1002 People and Culture: Introduction to Social Anthropology
CREDIT HOURS: 3
This course is an introduction to Social Anthropology. Social anthropologists study cultural diversity in western and non-western societies. Often living among the people they study, anthropologists attempt to understand the structures that shape and constrain peoples' lives, and the ways in which people make sense of their changing circumstances. Classic studies focused on rural people in the developing world (hunter-gatherers, pastoralists, peasants). Contemporary studies are just as likely to focus on development, migration, artists, boardroom rituals or street gangs. Theories and methods from anthropology can be applied to a wide range of academic and practical settings including development, politics, economics, health, law, art, and human rights.
EXCLUSIONS: SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06, SOSA 1500.06, POLI 1500.06
FORMATS: Lecture

SOSA 1003 Introduction to Sociology
CREDIT HOURS: 3
This course introduces students to basic sociological concepts, the logic of sociological inquiry, and major theoretical and methodological issues in the field. Substantive topics may include social movements, health, work, gender, religion, racialization, family, and mass media; key sociological concepts covered include social control, socialization, identity, inequity, and social institutions. Emphasis is on the study of contemporary post-industrial societies with special attention given to Canadian society.
EXCLUSIONS: SOSA 1000X/Y.06, SOSA 1050X/Y, SOSA 1100X/Y.06, SOSA 1200X/Y, SOSA 1500.06/POLI 1500.06
FORMATS: Lecture

SOSA 1500 Globalizations
CREDIT HOURS: 6
Globalization refers to the multiple ways nations, communities, and people are connected and disconnected across traditional boundaries. The course covers key concepts from political science, sociology and social anthropology with a view to examining how interactions of large scale global processes, politics, and policies

resonate in communities, social institutions and people's everyday lives. We will focus upon the changing dynamics of global capitalism as these are manifest in the political, economic, and sociological conditions across and within regions, nations, and communities.
CROSSLISTED: POLI 1500.06
EXCLUSIONS: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1050.03, POLI 1055.03, POLI 1060.03, POLI 1065.03, POLI 1103.06, SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06, SOSA 1002.03, SOSA 1003.03
FORMATS: Lecture | Tutorial

SOSA 2001 Ethnography in a Global Context
CREDIT HOURS: 6
Ethnography describes how people conduct their lives in a particular time and place. This course examines the challenge, complexity, strengths, and limitations of ethnographic knowledge and writing in Social Anthropology. Students will learn about a number of different ethnographic settings which may vary from year to year. A selection of ethnographies, films, autobiographical writing, and critical commentaries will be used to reveal how social anthropologists generate ethnographic knowledge about past and present societies, and why research priorities shift. Approved with International Development Studies.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITES: One SOSA course at the 1000 level or FYP
FORMATS: Lecture

SOSA 2002 The Sociological Perspective: Thinking and Doing Sociology
CREDIT HOURS: 6
Sociologists are interested in understanding the social world. They do not rely on preconceived ideas alone to enrich this understanding, but see the need to conduct studies, carry out investigations, make observations, analyze findings, formulate ideas, and construct theories and interpretations about what they find. This course looks at the ways sociologists go about their work. What are some of the dominant ways of thinking current in sociology today? What are the relationships between such ways of thinking and what are seen as questions to investigate? How do sociologists do their research? What are social surveys, interviews, theories, sociological ideas? What is distinctive about a sociological way of looking at a problem?
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITES: One SOSA course at the 1000 level or FYP
FORMATS: Lecture

SOSA 2005 Introduction to African Canadian Studies: Society, History and Culture
CREDIT HOURS: 3
There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include patterns of immigration and settlement, slavery, family, continental African and diasporic connections, identity, arts and culture, education, religion, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.
CROSSLISTED: CANA 2005
EXCLUSIONS: CANA 2115.03; SOSA 2115.03
FORMATS: Lecture

SOSA 2006 Global Migration: Transnational Lives
CREDIT HOURS: 3
Some observers propose that we are living in an “age of migration” because there are now more international migrants than ever before. Millions of people also migrate within their own countries from rural to urban areas in search of employment and other opportunities that cities are perceived to offer. Migration as a social phenomenon is inextricably linked to important global concerns such as wealth disparities both between countries and within countries between social classes, as certain groups of people are displaced or dispossessed from land-based livelihoods. Global migration also involves major gender and ethnic inequalities, human rights issues, and produces differential access to citizenship.
PREREQUISITES: One SOSA course at the 1000 level or FYP
FORMATS: Lecture

SOSA 2041 Describing Social Inequality
CREDIT HOURS: 3
This course examines inequality in practice. The focus will be on applying understandings of inequality to empirically describe cases of injustices in order to look at measures, practices, and policies regarding inequality. The evidence used to describe inequality will be critically examined through theoretical considerations. Possible topics to be covered in readings and assignments include economic, social, cultural, political and health inequalities among other contemporary issues of social justice.
PREREQUISITES: One SOSA course at the 1000 level or FYP
EXCLUSIONS: SOSA 2040X/Y.06
FORMATS: Lecture

SOSA 2042 Explaining Social Inequality
CREDIT HOURS: 3
This course examines various perspectives on inequality. It will examine how various forms of social inequality emerge and persist. The focus will be on the unequal distribution of wealth and sources of social power. Readings and assignments will focus on theories and explanations of inequality as well as historical and contemporary cases, including class, ethnicity, race, nation, region, gender, orientation and other manifestations of inequality.
PREREQUISITES: One SOSA course at the 1000 level or FYP
EXCLUSIONS: SOSA 2040X/Y.06
FORMATS: Lecture

SOSA 2045 Indian Society: Change and Continuity
CREDIT HOURS: 3
The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with

particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature. This course counts as a half-credit in Sociology and Social Anthropology towards the IDS established discipline requirement.
CROSSLISTED: INTD 2045.03
EXCLUSIONS: INTD 3045.03
FORMATS: Lecture

SOSA 2051 Chinese Culture
CREDIT HOURS: 3
This course introduces students to the Chinese cultural heritage. It offers an overview of traditional and modern Chinese culture through the lenses of history, sociology, religion, philosophy, literature, art and film. The class offers students an opportunity not only to familiarize themselves with the historical legacies of China, but also to examine modern issues facing Chinese society in the contexts of international relations, society, economics, gender, ethnicity and politics. Nor previous knowledge of Chinese culture or the Chinese language is required.
CROSSLISTED: CHIN 2050.03
FORMATS: Lecture | Discussion

SOSA 2052 Contemporary Issues in Indigenous Studies
CREDIT HOURS: 3
This course offers an interdisciplinary introduction to contemporary challenges faced by Indigenous peoples in Canada. Topics may include language and culture, land rights, economics, governance and treaty relationships, child welfare and education, health, social services, environmental issues, violence, criminal justice and self-determination, political mobilization and resistance, and decolonization.
CROSSLISTED: CANA 2052.03, INDG 2052.03
FORMATS: Lecture | Discussion

SOSA 2101 Environment and Culture
CREDIT HOURS: 3
Concern about the environment is an increasingly widespread phenomenon as more people and confront their relationship to a changing ecology. Environmental issues like pollution, global warming, or resource depletion, have global as well as personal implications. The efforts of cities to deal with environmental pollution, for example, may lead to conflicts with rural regions, and changes in consumption patterns in one country may have consequences for the environment of other countries. This course will explore key relationships between human culture and the physical environment. Topics to be examined may include: environmental knowledge, food and agriculture, environmental ethics, health, resource management and conservation.
PREREQUISITES: One 1000 level SOSA course or FYP
EXCLUSIONS: SOSA 2100.06
FORMATS: Lecture

SOSA 2111 Is there an Atlantic Canada?
CREDIT HOURS: 3
This course will examine the historical and contemporary social issues related to the Maritimes and Atlantic Provinces. The course will critically question what is meant by "Atlantic Canada" and look at itssocial, demographic, economic, and cultural trends in relation to the rest of the country. Attention will be given to the role of Acadiens, Mi'kmaq, and African Nova Scotians as well as dominant powerholders in the construction of Atlantic Canada.
PREREQUISITES: One SOSA course at the 1000 level or FYP
CROSSLISTED: CANA 2111.03
FORMATS: Lecture

SOSA 2115 African Canadian Society, Culture, and Resistance
CREDIT HOURS: 3
There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada. There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections,identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.
CROSSLISTED: CANA 2115.03
EXCLUSIONS: CANA 2005.03; SOSA 2005.03
FORMATS: Lecture

SOSA 2140 Going Global; Geography, Economy, and Work in the 21st Century
CREDIT HOURS: 3
This course will explore the economic, industrial and organizational transformations which have affected world economies since the 1980s. The spatial reorganization of the international division of labour has led to "world cities", and rural concentration and depopulation, as well as exploitative economic enclaves as endpoints in global commodity chains. The emergence of an increasingly integrated international economic order are associated, in the advanced economies, with a shift from manufacturing, for which automobile production has been the standard example, to a service-dominated economy, ranging from financial services, internet development and movie and music creation, to fast food chains and mass tourism. This industrial transformation has been accompanied by shifts in organizational structures, whether the emphasis has been on increased operational flexibility, or downsizing, one is continuously faced with the impact of new information technologies on the workplace. Does the electronic storage and transmission of information create acceptable efficiencies, or do they represent new methods for controlling and exploiting an increasingly vulnerable workforce, particularly lower-class women and/or immigrants? This course will employ the relevant portions of a standard Canadian sociological text to evaluate main tendencies, while selected anthropological case studies from different places will help understand the specific dynamics of a new, world economy.

PREREQUISITES: One SOSA course at the 1000 level or FYP
FORMATS: Lecture

SOSA 2141 Why Work?
CREDIT HOURS: 3
Work, as the journalist Studs Terkel once wrote, is a source of "daily meaning as well as daily bread." It comes in many forms. There are careers, "callings," or just-for-now jobs, which can be paid or unpaid, permanent or temporary, prestigious or menial, dangerous or boring. For some of us, work is an opportunity to "Do What You Love"; for others, the best part of work is the pay cheque. How we go about making a living is in some ways a personal choice, but it's also a social and political matter. In this course, students will learn how we make sense of work in all its forms. Topics covered may include: internships and precarious work, (de)industrialization, unions, generations and work, gender and work, labour market trends, professions, leisure, and the future of work.
PREREQUISITES: One SOSA course at the 1000 level or FYP
FORMATS: Lecture

SOSA 2162 Work and Occupations in a Changing World I
CREDIT HOURS: 3
This class explores the consequences of several major upheavals in the world of work that are currently underway. These include the relocation of manufacturing from Northern countries to Southern countries, and the expansion of the presence of women in labour forces as workers over much of their adult life cycle. Topics may include: the international division of labour; home based labour; the impact of work on family life and family life on work; work in contemporary film; managerial and union strategies; and the relationship between education and employment. It is a sound basis for further study in the areas of management, labour relations, gender studies or development studies. Approved with International Development Studies.
CALENDAR NOTES: This course is the first part of the former full-year course SOSA 2161/Y.06. This course description reflects the entirety of the pair (SOSA 2162.03 and SOSA 2163.03).
PREREQUISITES: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
EXCLUSIONS: WOST 2400X/Y.06, SOSA 2161X/Y.06
FORMATS: Lecture

SOSA 2163 Work and Occupations in a Changing World II
CREDIT HOURS: 3
This class explores the consequences of several major upheavals in the world of work that are currently underway. These include the relocation of manufacturing from Northern countries to Southern countries, and the expansion of the presence of women in labour forces as workers over much of their adult life cycle. Topics may include: the international division of labour; home based labour; the impact of work on family life and family life on work; work in contemporary film; managerial and union strategies; and the relationship between education and employment. It is a sound basis for further study in the areas of management, labour relations, gender studies or development studies. Approved with International Development Studies.
CALENDAR NOTES: This course is the SECOND part of the former full-year course SOSA 2161X/Y.06. This course description reflects the entirety of the pair (SOSA 2162.03 and SOSA 2163.03).
PREREQUISITES: SOSA 2162.03
EXCLUSIONS: WOST 2400X/Y.06, SOSA 2161X/Y.06
FORMATS: Lecture

SOSA 2181 Explaining Crime and Criminal Behavior
CREDIT HOURS: 3
What is crime, why do rates of crime vary, why do people commit crimes and how do social, cultural, psychological and biological theories and research findings explain crime as social and behavioral phenomena? Criminology is an interdisciplinary attempt to answer these questions through the social scientific study and analysis of crime and criminal behavior. This course introduces students to a broad variety of critical thinking, disciplinary theories, research studies and social policies, in order to help you understand and explain crime and show how these understandings inform the policies and politics designed to manage and prevent crime. This course provides a general but primarily sociological understanding of crime.
PREREQUISITES: One SOSA course at the 1000 level or FYP
EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2182 Exploring Crime and Criminal Behavior
CREDIT HOURS: 3
Though this is a stand-alone course it builds on the exploration of theories of crime addressed in 2181.03 and applies them to various "types" of crime and criminal behavior in Canada and elsewhere. This course pulls together various sources of knowledge to provide description and analysis of various patterns and types of crime and explores how this knowledge is being applied in specific policies and practices aimed at managing and preventing crimes: typically by the criminal justice system. The course content covers Violent crimes such as murder, sexual assault, domestic violence, robbery and gang violence: Property crimes such as burglary and motor vehicle theft; Organized crime, White Collar and Corporate crime and new forms of Global crime such as narco trafficking; human and arms smuggling and money laundering.
CALENDAR NOTES: Approved with Law and Society Minor.
PREREQUISITES: One SOSA course at the 1000 level or FYP
EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2191 Gender Across Cultures
CREDIT HOURS: 3
Applying theoretical perspectives drawn primarily from anthropology, this course considers the social and historical constructions of gender and sexuality in different cultural contexts. The course provides an overview of the anthropological study of gender as a universal yet culturally specific identity and set of relations and expectations. Themes around which the course will be organized will likely include the relationship between gender and the following; identities and markers of social difference, notably sexuality; kinship, reproduction, and the family as cultural institutions; labour, class and the global political economy; and gender politics and power relations. Students taking this course will consider the importance of looking beyond the western experience for understanding questions of gender, sexuality, and power. Approved with International Development Studies.
PREREQUISITES: One 1000 level SOSA course or FYP or a GWST course
CROSSLISTED: GWST 2191.03

EXCLUSIONS: SOSA 2190X/Y.06, GWST 2800X/Y.06
FORMATS: Lecture

SOSA 2192 Gender, Sexuality and Society
CREDIT HOURS: 3
This course introduces students to the sociological study of gender and sexuality. It explores how socio-economic and cultural conditions— particularly in contemporary Canada— shape our understandings and experiences of gender and sexuality and how both intersect with age, ethnicity, class and other markers of identity. Specific topics to be examined may include the interconnected histories of sexuality and gender expectations in western societies, representations of gender and sexuality in the contemporary media, the family as a changing social institution and/or the social organization of intimate relationships, and different forms of gender and sexual activism and the notions of justice that they represent. Students taking this course will gain an in-depth understanding of gender and sexuality as evolving socially constructed concepts that have real and multiple effects.
CALENDAR NOTES: Note: Given it's focus on contemporary Canadian society, this course may not be approved as an IDS class.
PREREQUISITES: One 1000 level SOSA course or FYP or a GWST course
CROSSLISTED: GWST 2192.03
EXCLUSIONS: SOSA 2190X/Y.06, GWST 2800X/Y.06
FORMATS: Lecture

SOSA 2201 The Family in Comparative Perspective I
CREDIT HOURS: 3
This class examines the family as a cultural, political and economic institution. It questions the familiar. What is the family? Is it universal? How have families changed? Why are families so diverse? Why do people marry? Why do they have children? Why is a woman's work never done? Is the family in a state of crisis? Adopting a comparative perspective, and using concepts from anthropology and sociology, the class addresses these questions in a global context, drawing upon data and examples from Canada and around the world.
CALENDAR NOTES: This course is the first part of the former full-year course SOSA 2200X/Y.06. This course description reflects the entirety of the pair (SOSA 2201.03 and SOSA 2202.03).
PREREQUISITES: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
EXCLUSIONS: SOSA 2200X/Y.06
FORMATS: Lecture

SOSA 2202 The Family in Comparative Perspective II
CREDIT HOURS: 3
This class examines the family as a cultural, political and economic institution. It questions the familiar. What is the family? Is it universal? How have families changed? Why are families so diverse? Why do people marry? Why do they have children? Why is a woman's work never done? Is the family in a state of crisis? Adopting a comparative perspective, and using concepts from anthropology and sociology, the class addresses these questions in a global context, drawing upon data and examples from Canada and around the world.
CALENDAR NOTES: This course is the second part of the former full-year course SOSA 2200X/Y.06. This course description reflects the entirety of the pair (SOSA 2201.03 and SOSA 2202.03).
PREREQUISITES: SOSA 2201.03
EXCLUSIONS: SOSA 2200X/Y.06
FORMATS: Lecture

SOSA 2261 Society, Politics, and Culture
CREDIT HOURS: 3
You may not think of yourself as political, but power is a process of everyday life. Although it is often assumed to be located in economic and political institutions, it is also important to consider that “the personal is political” and this too contributes to the negotiation of power. This course will explore how social processes affect and are shaped by material, institutional, and normative pressures. Contemporary examples of the intersection of these social forces will show how sociology and social anthropology can be used to identify otherwise hidden relationships.
PREREQUISITES: One 1000 level SOSA course or FYP
EXCLUSIONS: SOSA 2260.06
FORMATS: Lecture

SOSA 2270 Introduction to Popular Culture
CREDIT HOURS: 3
In this course, we will examine and discuss the various approaches and theories of popular culture in anthropology and sociology. Popular culture has been defined in multiple ways and attached to multiple objects and activities in society. We will consider how human beings take part in popular culture on one hand and how popular culture affects the rest of their lives on the other hand. Related themes include consumption, media, technology, communication, identity, ideology, stratification.
PREREQUISITES: One 1000 level SOSA class or FYP
FORMATS: Lecture

SOSA 2271 Popular Culture in a Global Context
CREDIT HOURS: 3
The course explores many different theories and manifestations of popular culture in a wide range of contexts. Popular culture as it intersects with films, television, Internet, magazines, comics, cartoons, fashion, sports, music, etc., provides a rich platform for consideration of how popular culture influences individuals in their lives while simultaneously being shaped by those same individuals and their cultural contexts. We will also explore how individuals take on different roles in the production and consumption of popular culture.
PREREQUISITES: One 1000 level SOSA course or FYP

SOSA 2292 Goblins, Ghosts, Gods, Gurus I
CREDIT HOURS: 3
Societies and groups within societies differ in terms of what their members believe, how people view the world and their place within it, the sources of knowledge, attitudes toward the supernatural and the sacred, the status and authority of different sources of knowledge and what it all means. What makes religion different from

science? What makes them similar? What is commonsense? What are magic and witchcraft? What are the relations between belief and actions? What is the status of religious authority and power? What are altered states of consciousness? What are religious groups all about? Why do people belong to them, join them, leave them? What is involved in conversion and commitment? This course considers such questions drawing on a wide variety of societies, cultures, and groups, western and non-western.
CALENDAR NOTES: This course is the first part of the former full-year course SOSA 2291X/Y.06. This course description reflects the entirety of the pair (SOSA 2292.03 and SOSA 2293.03).
CROSSLISTED: RELS 2292.03
EXCLUSIONS: SOSA 2291X/Y.06, RELS 2291X/Y.06
FORMATS: Lecture

SOSA 2293 Goblins, Ghosts, Gods, Gurus II
CREDIT HOURS: 3

FORMATS: Lecture

SOSA 2402 Food Through Time and Space
CREDIT HOURS: 3
We will examine the concept of "food" through time and space so as to understand nutritional science/health, belief/ritual systems, oral/textual histories, ancient productive systems, flora and fauna domestication techniques and their ongoing relevance to food entitlements in the contemporary world. Special emphasis will be on non-Europeans societies, communal tenure systems and a glance at the European commons and their productive systems.
PREREQUISITES: One 1000 level SOSA course or FYP
EXCLUSIONS: SOSA 2401X/Y

SOSA 2403 Food Activism
CREDIT HOURS: 3
In this course we will explore food movements and alternative food practices, especially in relation to the modern food system. We will discuss the key characteristics and critiques of the food system and focus on case studies of cultural practices and food activism from around the world which challenge or provide alternatives to the current food system.
EXCLUSIONS: SOSA 2401X/Y.06
FORMATS: Lecture

SOSA 2502 Biomedicine and the Illness Experience
CREDIT HOURS: 3
This course provides an introduction to the sociology of medicine, patienthood, and practitioner-patient relationships. The course is organized into two sections. The first section analyses the theory and practice of medicine, our society's dominant system for addressing health problems. In the second section, we examine illness and the experience of receiving medical care. We will cover such topics as: the biomedical model; medical school; the experience of chronic illness; medical science and technology; models of the doctor-patient relationship; and mental illness.
EXCLUSIONS: SOSA 2501X/Y.06, SOSA 2500.03
FORMATS: Lecture

SOSA 2503 Health and Society
CREDIT HOURS: 3
This course examines the social foundations of health and illness, community responses to health problems, and the structure of health care in Canada and internationally. Topics to be covered include: morality and health, social inequality and the political economy of health and health care, the multinational pharmaceutical industry, environmental health, and the development of and 'crisis' in the Canadian Medicare system.
PREREQUISITES: One 1000 level SOSA course or FYP, or Med Sci Major with permission from instructor
RESTRICTIONS: Med Sci students or Prerequisite
EXCLUSIONS: SOSA 2501.03

SOSA 2504 Sociology of Health and Illness I
CREDIT HOURS: 3
This course provides an introduction to the sociology of health, illness, and healing. We will analyze the theory and practice of medicine, our society's dominant system for addressing health problems; the experience of healthcare and illness from the perspectives of the ill; the social foundations of health and illness; and the structure of healthcare in Canada. Topics include: the historical development of the health professions; the moral regulation of health; social inequality and the political economy of health and healthcare; the patient-practitioner relationship; and the development of and 'crisis' in the Canadian Medicare system. Throughout the course, emphasis will be placed on critical theoretical approaches and concepts used in the field.
CALENDAR NOTES: This course is the first part of the former full-year course SOSA 2501X/Y.06. This course description reflects the entirety of the pair (SOSA 2504.03 and SOSA 2505.03).
EXCLUSIONS: SOSA 2500.03, SOSA 2501X/Y.06
FORMATS: Lecture

SOSA 2505 Sociology of Health and Illness II
CREDIT HOURS: 3
This course provides an introduction to the sociology of health, illness, and healing. We will analyze the theory and practice of medicine, our society's dominant system for addressing health problems; the experience of healthcare and illness from the perspectives of the ill; the social foundations of health and illness; and the structure of healthcare in Canada. Topics include: the historical development of the health professions; the moral regulation of health; social inequality and the political economy of health and healthcare; the patient-practitioner relationship; and the development of and 'crisis' in the Canadian Medicare system. Throughout the course, emphasis will be placed on critical theoretical approaches and concepts used in the field.
CALENDAR NOTES: This course is the second part of the former full-year course SOSA 2501X/Y.06. This course description reflects the entirety of the pair (SOSA 2504.03 and SOSA 2405.03).
PREREQUISITES: SOSA 2504.03
EXCLUSIONS: SOSA 2500.03, SOSA 2501X/Y.06
FORMATS: Lecture

SOSA 2933 Health and Culture
CREDIT HOURS: 3
This course explores health and illness aetiology through culture and time with a focus on ancient and pre-capitalist societies in South Asia, Latin America, Africa, Middle East and Aboriginal gifting economies. Topics may vary from year to year but we will invariably explore global sensibilities of feeling healthy and "well" through an exploration of case studies highlighting ancient science and medicine, health taxonomies, oral history, ethnography, literature, poetry, music, oral genres, pregnancy; birth and rearing of children; senescence and death. The weaknesses and strengths of Canada's increasingly privatized selective healthcare system become clear when compared it with the achievements made in societies that provide/d healthcare as a basic right.
PREREQUISITES: One 1000 level SOSA course or FYP, or SOSA 2503 for MedSci students
EXCLUSIONS: SOSA 2400X/Y.06
FORMATS: Lecture

SOSA 2966 Health and Illness through Culture and Space
CREDIT HOURS: 3
Every culture has its own concepts of health and nutrition, its own treatments and practices. This course explores health aetiologies through contemporary culture and space. Topics may vary from year to year but we invariably will learn about contemporary cultures around the world in relation to sensibilities of what it means to feel healthy and "well" in the content of rapid economic and social change. We will explore religion, culture and efficacy; cultures of colours, smells; tastes and health and wellness (proxemics; kinetics-how wellness, health and illness are embodied through time, space and culture); narratives of health (poetry, music, oral genres); pregnancy; birth and rearing of children; senescence and death; the content of public health systems and the extent to which they incorporate these practices and beliefs. The weaknesses and strengths of our own system become clear when medical anthropologists compare it with the science and health systems of other societies.
PREREQUISITES: One 1000 level SOSA course or FYP, SOSA 2503 or for MedSci students
EXCLUSIONS: SOSA 2400X/Y.06
FORMATS: Lecture

SOSA 3002 Native Peoples of Canada
CREDIT HOURS: 3
This course uses an ecological perspective to describe the cultures and peoples occupying Canada at the time Europeans came to this continent. As time permits, some ethnohistory and the situation of contemporary Native peoples is also discussed. Films will be used to supplement lectures and readings. Approved with Canadian Studies.
PREREQUISITES: One 1000 level SOSA course or FYP
EXCLUSIONS: SOSA 2350.03
FORMATS: Lecture

SOSA 3005 Knowledge, Work and Culture in the Contemporary World
CREDIT HOURS: 3
Since the publication of Daniel Bell's book, The Coming of Postindustrial Society, studies of the economic structure of the advanced societies have addressed the question of the extent to which we are living through a transition to a new, knowledge-driven economy which may be qualitatively distinguished from the system of industrial capitalism which has characterized North America and western Europe for most of this century. Whether one uses terms like "postindustrialism", "postmaterialism" or "postmodernism", debates have centered on the question of fundamental alterations in the economic, cultural and political organization of technologically advanced societies. Are we witnessing the creation of an "information economy", are we observing the emergence of a new "knowledge class", which rules by virtue of its educational skills and credentials, is there a new underclass being excluded from paid employment of any form, and is government being privatized to facilitate new forms of global economic integration? Are new types of social movements arising in response to basic changes in our society? This course will address the above questions, with particular emphasis being devoted to discuss issues in contemporary political economy.
PREREQUISITES: One 1000 level SOSA course or FYP
FORMATS: Lecture

SOSA 3006 Comparative Perspectives on Gender and Work
CREDIT HOURS: 3
This course will use comparative perspectives to explore a range of topics relating to the gendering of work- wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups). Approved with International Development Studies.
PREREQUISITES: One 1000 level SOSA course or FYP
CROSSLISTED: GWST 3006.03
FORMATS: Lecture

SOSA 3008 Canadian Society and Politics
CREDIT HOURS: 3
This course about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not

only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The course explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.
PREREQUISITES: One 1000 level SOSA course or FYP. RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.
CROSSLISTED: CANA 3008.03
FORMATS: Lecture

SOSA 3013 Religion in Contemporary Society
CREDIT HOURS: 3
Religion is alive and well in society today; some religious organizations are in decline but others appear to be flourishing. How can these tendencies be accounted for? Do we live in a secular age or is that just a flip expression? What does religion mean to people in contemporary society? Is there a search going on for spiritual growth, spiritual awareness, spiritual expression? If so, what forms does this search take? What can we learn by thinking about religion sociologically? What are the trends in religion telling us about the character of late twentieth century society?
PREREQUISITES: One 1000 level SOSA course or FYP
CROSSLISTED: RELS 3013.03
FORMATS: Lecture

SOSA 3014 Rethinking Culture and Class
CREDIT HOURS: 3
Critical cultural studies has become a vigorous focus of interdisciplinary scholarship drawing on the fields of history, anthropology, sociology, geography, and literary criticism. Researchers in all of these areas are reconsidering the significance of symbolic aspects of social life and how the collective experiencing of cultural forms is related to changes in capitalism and modernity. For example, what is the significance of popular music in different class, gender, and ethnic contexts? How do commitments to kin and community relate to expressions of culture and class consciousness? Are boundaries between work and leisure mutable in terms of class, gender and ethnic processes? Approved with International Development Studies.
PREREQUISITES: One 1000 level SOSA course or FYP
FORMATS: Lecture

SOSA 3015 Popular Memory
CREDIT HOURS: 3
This course considers history-writing as a social and cultural process operating at personal, group and national levels. It examines theoretical, methodological and political questions raised in work on popular memory. Readings and films address the problems of: official history, public history (museums, national monuments), "history from below," and oral history. Cases will be taken from across the globe. Approved with International Development Studies.
PREREQUISITES: One 1000 level SOSA course or FYP
FORMATS: Lecture

SOSA 3016 Colonialism and the Body: Sex and the Practice of Power
CREDIT HOURS: 3
Theorists such as Frantz Fanon and Anne McClintock have argued that the colonial encounter has been a sexual and sexualized undertaking, undergirded by regimes of power. This course Colonialism and the Body uses sex, sexuality, and gender as the starting point from which to interrogate and examine the meanings attached to the bodies of the colonized and colonizer, and the social, spatial, political locations of these bodies during the heyday of European colonization, and further, in this supposedly postcolonial moment. We will examine diverse forms of colonialism (internal, direct, and indirect) in specific locations around the globe, including Canada, the United States, the Caribbean, and in parts of Africa and Asia. Topics include slavery and the slave trade, European contact with indigenous societies, Africville, Oka, sports, racial science, racialization of the African body, and colonial crime and punishment.
PREREQUISITES: One SOSA 1000 level course or FYP
CROSSLISTED: GWST 3017
EXCLUSIONS: SOSA 3186.03
FORMATS: Lecture

SOSA 3031 Social Problems and Social Policy
CREDIT HOURS: 3
This course focuses on the nature of social problems and social policy in advanced industrial societies. It adopts a social movement perspective, exploring the processes whereby agitation on behalf of undesirable but remedial social conditions leads to changes in social policy. Among the areas treated in depth are crime prevention, the quality of work life, race relations, deviance, and poverty and inequality.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3052 Indigenous Social Health and Environmental Issues
CREDIT HOURS: 3
This course offers an interdisciplinary overview of contemporary social, health, and environmental issues impacting Canada's Indigenous Peoples. Topics will include an exploration of the human rights of Indigenous Peoples in Canada, social statistics, food security in northern communities, health and well-being in Indigenous communities, connection to place, impact of environmental degradation and land dispossession, Indigenous knowledge and the environment, politics and political activism, and the role of media.
PREREQUISITES: One SOSA 1000 level course or FYP, CANA 2052.03 or SOSA 2052.03 or instructor permission
CROSSLISTED: CANA 3052.03, INDG 3052.03
FORMATS: Lecture

SOSA 3060 Social Change and Development
CREDIT HOURS: 3
This course considers theories of social change and development; approaches to the analysis of rural and urban livelihoods at the micro level; and the examination of community, class, patronage and gender relations in both their economic and cultural aspects. The constructive uses of social analysis in the support and design of

development initiatives are also discussed. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3085 Self and Society
CREDIT HOURS: 3
This course explores the relationship between the self and the larger social context. It considers the dynamic interplay of personal experiences, interpersonal relations, group affiliation, and larger socio-cultural conditions. It examines how such interactions and institutions shape our conceptions of who we should be, who we are, or who we might become. In addition the relationship between changes in society and changes in the self are explored. The course may consider these questions cross-culturally.
PREREQUISITES: One SOSA 1000 level course or FYP

SOSA 3091 The Sociology of Culture
CREDIT HOURS: 3
Does culture permeate all aspects of social life or are there specialized social domains which are "cultural"? What is the connection between societies and "cultures" and the "culture" of music or art? This course explores the question of how one can sociologically study culture. The course reviews classical and contemporary theoretical approaches to the social production, distribution and reception of culture. Broad themes include the discussion of cultural consumption, cultural identity, cultural change, and notions of cultural resistance. Specific "cultural objects" of study may include fashion, sport, class, and social problems. The course concludes with analysis of the intersection of the fields of sociology and cultural studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3100 Feminist Perspectives in Sociology and Anthropology
CREDIT HOURS: 3
This course will begin with an overview discussing what is feminism? Thereis no way to come to a definitive answer to this question, therefore thefirst month of classes will focus on readings and discussion of feminismfrom an historical perspective. We will investigate the three historicalwaves of feminism and the diversity of feminism found in the socialsciences. After this brief introduction we will concentrate on gender andsex, clearly dominant themes found in feminist works. We will approachthis by critically exploring socio cultural constructions of sex andgender, which in turn will shed critical light on feminist perspectivesabout the relationship between these two concepts.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3105 Media and Society
CREDIT HOURS: 3
This course provides an introductory overview to the theoretical and practical issues that concern media and society. It examines contemporary theories of mass communications and popular culture and engages the political economy of media, their impact on audiences, and the role they play in the political process.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3116 Issues in Social Research
CREDIT HOURS: 3
This course consists of the intensive examination of a selected area in social research. Since the specific topic which will receive special attention will differ from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3120 Social Conflict
CREDIT HOURS: 3
This course introduces students to the various analytical perspectives sociologists have employed to understand the patterning and consequences of conflict in society. In this regard particular attention is devoted to the functional, coercion, and Marxian theories of conflict. This course is also concerned with conflict in contemporary society, with special reference to patterns of conflict and change in Canada.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3135 The Social Organization of Health Care
CREDIT HOURS: 3
The social organization of medicine and the politics of health are examined. Particular attention is paid to environmental and occupational health issues in light of technological and social change. Epidemiological patterns of morbidity and mortality are assessed. Students are responsible for seminar presentations in areas of interest.
PREREQUISITES: One SOSA 1000 level course or FYP, SOSA 2503 or for MedSci Students
FORMATS: Lecture

SOSA 3143 Health, Illness and the World System
CREDIT HOURS: 3
Placing the political economic bases of health and illness in ethnographic context, this course is concerned with the ways that afflictions of poverty become naturalized as biomedical experiences. Core questions pursed are as follows: 1) how is relative health affected by the world market pressures in diverse global contexts? 2) how do afflictions of poverty become naturalized as biomedical experiences: 3) how do patients and communities activate alternative health infrastructures as they resist their marginalization in neo-liberal political agendas? 4) what kinds of illnesses are characteristic of capitalism and wage labour migration (e.g. HIV/AIDS; SARS)? 5) how have market pressures and profit seeking retarded the progress of scientific inquiry into modern illness? We will elucidate these questions by looking at case studies from Canada, South Africa, Sri Lanka, Spain and Brazil.

PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3145 Gender and Health
CREDIT HOURS: 3
This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and healthcare define and enforce the very categories of 'women' and 'men'?; (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation). It is recommended that students take SOSA 2501 or SOSA 2400 or SOSA 2503 prior to taking this course.
PREREQUISITES: One SOSA 1000 level course or FYP, SOSA 2503 (Med Sci Students)
CROSSLISTED: GWST 3800.03
FORMATS: Lecture

SOSA 3147 Aging Cross Culturally
CREDIT HOURS: 3
In this online course we will explore the array of beliefs and practices of aging and the life course cross culturally. We will explore the enormous diversity in the aging experience around the world as well as the universals of human aging. Case studies will be examined to provide salient evidence of concepts examined in the course. This course will be useful for students in the social and science and humanities as well as health professionals, nursing, gerontologists, to provide adequate knowledge and skills for culturally appropriate geriatric care.This is an online course using Dalhousie's Blackboard Learning System. You are required to have daily access to a computer with high-speed internet access.
CROSSLISTED: HLTH 4900.03
FORMATS: Lecture

SOSA 3148 The Sociology of Addiction: Drugs, Health and Society
CREDIT HOURS: 3
This course explores how the meaning and significance of various drug-taking practices and addictive experiences are shaped by the social, cultural, political and economic contexts in which they take place. It also examines how perceptions of different drugs and addictions have changed over time, and how complex and competing political, cultural and economic forces shape drug law and policy. The general aim of the course is to de-individualize and de-pathologize drug use and addiction, to better understand and address their health consequences.
PREREQUISITES: One SOSA 1000 level course or FYP, SOSA 2503 or for MedSci Students
FORMATS: Lecture

SOSA 3149 Childhood in Cross Cultural Perspective
CREDIT HOURS: 3
This course explores childhood as an important reflection of socialization and thus a nexus of cultural and social values, ideas, and histories. In examining pregnancy, birth, infant development and socialization patterns, we ask: What is universal, what is near universal, and what is indisputably variable? The course tries to maintain a balance among three perspectives: those of the infant; those of the parents; and relevant cultural and historical factors that shape both of these. The course also seeks to maintain a balance between the biological, cultural and social nature of human behavior. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3150 Sociology and Anthropology of the Body
CREDIT HOURS: 3
This course will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal communications, body hygiene and pollution taboos, and cultural aspects of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.
PREREQUISITES: One SOSA 1000 level course or FYP
CROSSLISTED: GWST 3150.03
FORMATS: Lecture

SOSA 3165 Peoples and Cultures of the World: Selected Area Studies
CREDIT HOURS: 3
This course examines a specific geographic and/or culture area. The course begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
CROSSLISTED: GEOG 3165.03
FORMATS: Lecture

SOSA 3168 Issues in Latin American Society
CREDIT HOURS: 3
This course introduces students to case studies on contemporary Latin America. the goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the department for details on the specific theme of the course in a given year. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3175 Sociology of Education
CREDIT HOURS: 3
This course is intended to develop students' knowledge about the relationships between schooling and other aspects of society. We will achieve this, in part, by examining the theoretical perspectives and practical implications of knowledge in and outside of schooling as a basis for the development of autonomous and creative individuals. Topics may include: social stratification, cultural demands and constraints, relations between family, community and educational attainment, and the changing social conditions that have had an impact on educational institutions.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3180 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3181 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3182 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3183 Special Topics
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
CALENDAR NOTES: Students who took SOSA 3250.03 in 2017/2018 should NOT register for SOSA 3183.03 in 2018/2019
PREREQUISITES: One SOSA 1000 level course or FYP
EXCLUSIONS: for 2018/2019 SOSA 3183.03
FORMATS: Lecture

SOSA 3184 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3185 Issues in the Study of Indigenous Peoples of North America
CREDIT HOURS: 3
This seminar is concerned with the historical background of the Native-European situation in North America and with issues arising from this background. Students will research issues which are significant to themselves and important to Native groups. Topics covered may vary from year to year, but will normally include a combination of historical issues such as culture change and contemporary issues such as land claims, self-determination and government policy, and social conditions of Natives. Approved with International Development Studies and Law and Society minor.
PREREQUISITES: One SOSA 1000 level course or FYP or CANA 2052.03 or SOSA 2052.03
CROSSLISTED: CANA 3185.03
FORMATS: Lecture

SOSA 3186 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
CROSSLISTED: Held with GWST 3186.03
FORMATS: Lecture

SOSA 3187 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3188 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3189 Special Topics in Sociology and Social Anthropology
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3190 Social Movements
CREDIT HOURS: 3
The general topic of unstructured group activity encompasses phenomena traditionally classified as collective behaviour incidents, as well as reformist and revolutionary social movements. Although there is considerable overlap, the collective behaviour literature tends to focus on relatively brief and spontaneous activities, such as panics, disasters, and crazes, while work on social movements examines relatively more organized and enduring group activities which still fall outside the realm of normal institutions. This course investigates problems emerging from both areas of concern. Emphasis is given to relevant Canadian materials.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3200 Environment and Society
CREDIT HOURS: 3
Humans are aware as never before of their impacts on the environment, and their dependence on the other things and beings with which they coexist. In this course we explore the ways that Social Scientists are rethinking the relationship between humans and the non-humans, whether they are carbon atoms, computers, amphibians, mushrooms or ecosystems.
PREREQUISITES: One 1000 level SOSA or FYP

SOSA 3206 Ethnicity, Nationalism and Race
CREDIT HOURS: 3
This course looks at the social construction and present relevance of the categories “ethnicity”, “nation”, and “race”. The current prevalence of identity politics and ethnic nationalism suggest the extent to which these categories are both profoundly political and deeply personal. By looking at case studies from Canada and around the world we examine these ideas and their implications. Topics will vary from year to year, but may include Quebec nationalism, multiculturalism, “ethnic” warfare in Rwanda or Bosnia, and race politics. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3211 Continuity and Change in Rural Societies
CREDIT HOURS: 3
The majority of the world's population, even today, lives in rural settings and depends upon primary production as the principal source of livelihood. This does not mean, however, that rural life has remained static and unchanging over the centuries. All rural societies, even those remote from centres of world power, have long been caught up in the world economic system and involved, in particular ways, with capitalist relations of production. This course examines continuity and change in a range of rural contexts across several continents including North America, and encourages students to consider the notion of “development” from alternative perspectives. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3214 Living in a Globalized World
CREDIT HOURS: 3
This course examines various definitions and approaches to globalization as a multidimensional process. Students will discuss topics such as: global culture (identity, migration, hybridity, homogenization, heterogenization), global risks (pollution, health, food, unemployment, poverty), global regulations and norms (international organizations, international regimes, global forums), global technology (computer networks, cyberspace, information age, global media), and global international order (global terrorism, war, security). Students will also explore political movements that demand globalization be made a more equitable process. Finally, while learning more about the complex reality of todayâ€™s world, students will engage in critical reflections and debates about some of the most fundamental concepts in social sciences like society, culture, nation, state, territory, space and democracy.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3215 Migration and Identity
CREDIT HOURS: 3
This course explores the inter-relating of migration and identity under conditions that are now described as globalization. Migrants become immigrants in particular places. Most depart as citizens of one country seeking temporary refuge, employment, or new citizenship at their destination. As they travel, migrants negotiate the multiple (sometimes competing) demands of kin, employers, and policies set by more than one state. Because commitments and obligations they experience straddle the borders they have crossed, migrants lives are transnational. their ideas of “home” and identity are also reworked as they travel and can be conflicted as their circumstances change. Some writers have concluded contemporary migration is both turbulent and chaotic compared with historical examples. This course begins with review of some historical migration examples and critically reviews how these differ from current globalization flows. However, the main focus is on particular instances of migration as described in ethnographic and sociological case studies. Some key concepts to be discusses in the course are diaspora, transnationalism, and ethnoscape. Approved with International Development Studies.

PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3225 Culture, Rights and Power
CREDIT HOURS: 3
The course examines the interrelation of culture, rights and power cross-culturally. It thus considers how the idea and exercise of rights can vary across cultures. It also addresses the ways in which rights and relations of power make themselves felt in people's everyday lives. Finally, it considers the variety of experiences and understandings of these issues across societies and social groups. Examples may be drawn from social and cultural groups within or outside of Canada. Approved with International Development Studies and Law and Society minor.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3228 Belief Systems: Ritual, Myth, and Magic
CREDIT HOURS: 3
Emphasis will be placed upon how belief systems and their symbolic representations give meaning to the universe and one's place in it. Topics may include the nature of ritual, the structure of myth, religion and symbols, religion and healing, magic, sorcery, and witchcraft, and how all these phenomena relate to cultural and social change. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3245 Women and Aging
CREDIT HOURS: 3
As women grow older, the experience of aging is difficult. This course will explore the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics will include: aging as a process; menopause; violence against older women; older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.
PREREQUISITES: One SOSA 1000 level course, or FYP or two classes in Gender and Women's Studies
CROSSLISTED: GWST 3810.03, NURS 4370.03
FORMATS: Lecture

SOSA 3250 Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience
CREDIT HOURS: 3
This course uses the tools of the social sciences to understand the cultural and institutional practices of science and technology. Technology and science both drive and are driven by socioeconomic and cultural change. Little in our lives is unaffected by "technoscience": the toys children play with, the scale of habitus and identity, the substances we eat, ,entertainment sports, the distribution of our friendships and the sources of our information, the illnesses we get and the treatments they receive, how we make love and how we make war.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3260 Deviance and Society: Making Norms, Regulating Difference
CREDIT HOURS: 3
This course examines how social norms are enforced—and what happens when they are broken. So many aspects of our lives are regulated by and measured against socially defined norms and standards, from our weight and sexual behavior, to how we dress and which substances we consume. But social norms get violated, too, and such 'deviance' has long been a preoccupation of sociologists and social anthropologists. What and who counts as deviant and how deviance is managed vary dramatically across historical periods, cultures, and regimes of social control. By applying social theories of deviance and normalization to case studies in health, law/crime, and morality, this course encourages students to think more critically about how and why our society responds to difference. In the first half of the course, we will focus on the concept of norms and on sociological approaches to theorizing deviance from social norms. In the second half of the course, our focus shifts to experiences and techniques of social control--the management of deviants and deviance.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture
LAB HOURS PER WEEK: 0

SOSA 3275 Crime and Public Policy
CREDIT HOURS: 3
This course deals with the dynamics of change in the criminal justice system that reflect three major factors namely social movements (e.g. the victims movement, the women's movement), social forces (e.g. aging, multiculturalism), and internal processes (e.g. professionalism, rationalization). The course focuses on how outside pressures modify, and are channelled by, the criminal justice system. Approved with Law and Society minor.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3281 Youth Crime
CREDIT HOURS: 3
This course deals with criminal offenses committed by young persons. Etiologies drawn from various disciplines are examined and evaluated. A secondary focus concerns the criminal justice system as it applies to young offenders. Approved with Law and Society minor.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3283 Globalized Security and Justice: the Challenge of Global Crime and Terrorism
CREDIT HOURS: 3
Since the terrorist attacks of 9/11, the relationship between global processes and the issues of crime and terrorism have become more explicit. As new or enhanced global economic, political, cultural and environmental processes facilitate profound social and cultural change, new pressures and opportunities for both traditional and new kinds of crime and various forms of political and religious violence are being created. This course examines how globalization influences the various global and

local conditions that create these new kinds crime and terrorism by exploring various theoretical explanations, and more empirically based case studies of different global crimes and terrorism movements. In addition we will explore how global organized crime and terrorism challenges the ability of western societies and states to ensure political order and security and examine how they are reconfiguring both the rhetoric and reality of state governance and justice.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3284 Living in Cities
CREDIT HOURS: 3
2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approaches 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.
PREREQUISITES: One SOSA 1000 level course or FYP or PLAN 2005.03
CROSSLISTED: GEOG 3284.03
FORMATS: Lecture | Seminar

SOSA 3285 Sociology of Law
CREDIT HOURS: 3
This course is a sociological examination of law both as a mechanism of social regulation and as a field of knowledge. It explores classical and contemporary theoretical contributions to Sociology of Law. Some specific issues to be analyzed include law and social control, law and social change, social reality of the law, the profession and practice of law, violence against women, and the influence of race, gender and social status in the outcome of legal decisions.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3291 Corrections
CREDIT HOURS: 3
This course provides a sociological and criminological examination of the evolution of corrections and punishment in North America with a focus on the Canadian landscape. It will include the historical development, organization, and administration of correctional institutions, as well as the rehabilitation/treatment and restorative justice models. Students will also learn some of the contemporary issues regarding Canadian corrections and understand how various social structures impact theses issues.
PREREQUISITES: One 1000 level SOSA course or FYP.

SOSA 3295 Society and the Police
CREDIT HOURS: 3
The police play an increasingly powerful role in the maintenance of social order in contemporary Canadian society. This course introduces students to sociological theory and research on: (a) the role of police in social development and social control; (b) the historical and political development of public policing; (c) the nature and structure of police work; (d) control and accountability and (e) selected issues in policing such as, policing the family, minorities and the police, community based policing and police discretion. Approved with Law and Society minor.
PREREQUISITES: One SOSA 1000 level course or FYP
FORMATS: Lecture

SOSA 3300 Community Research Workshop
CREDIT HOURS: 3
This course offers students the chance to engage in real, applied research under the close supervision of the instructor. It brings community groups, members, or agencies with an identifiable research request into the classroom so that students can collectively address some clearly defined research need. Tasks assigned for credit might include: delineating a researchable problem, selecting an appropriate methodology, designing research instruments (for example, interview or observation guide or surveys), conducting research, drawing conclusions, and presenting research findings. Students might work in teams on different aspects of the research. The course will close with a presentation of research findings back to the community partner.
PREREQUISITES: Any 1000 level SOSA or FYP and SOSA 2001.03 or SOSA 2002.03
FORMATS: Lecture

SOSA 3310 Science and Health in India
CREDIT HOURS: 3
The objective of this course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization. Approved with International Development Studies.
PREREQUISITES: Second-year Faculty of Arts and Social Sciences course
CROSSLISTED: INTD 3045.03
FORMATS: Lecture | Seminar

SOSA 3400 History of Anthropological Theory
CREDIT HOURS: 3
This course considers the foundations and development of social anthropology. Major theoretical schools and the work of prominent anthropologists in those schools are considered, including Cultural Evolution, Historical Particularism, Functionalism, Culture and Personality, Structuralism, Symbolism, Cultural Materialism, and the directions in which contemporary sociocultural anthropology point.
PREREQUISITES: One SOSA 1000 level course or FYP and SOSA 2001X/Y.06 or 2002X/Y.06
FORMATS: Lecture

SOSA 3401 History of Sociological Thought
CREDIT HOURS: 3
Towards the middle of the nineteenth century a novel way of thinking about human existence began to emerge. Primacy was given to the understanding that humans are social beings, their lives and thoughts bounded and patterned by their social environments. This approach formed the basis for a new discipline of analysis eventually

named Sociology. This course considers some of the main ideas of the earlier contributors to the new way of thinking: Comte, Marx, Durkheim, Weber, Simmel, Mead, Mannheim and, more recently, Parsons and Schutz. Modern sociology rests largely on the intellectual legacy of these thinkers. They raise questions and formulate answers to them which remain relevant to the sociological enterprise today.
PREREQUISITES: One SOSA 1000 level course or FYPand SOSA 2001x/Y.06 or 2002X/Y.06
FORMATS: Lecture

SOSA 3402 Figuring Out Society
CREDIT HOURS: 3
This course provides an introduction to issues of research design, including the relationship of theory to the choice of methodology. Students are exposed to basic tools and procedures which will help them to analyze the numerical tables and graphs they may come across in sociological or anthropological journals. Other relevant issues will be included, such as, whether it is possible to achieve scientific objectivity when studying human behaviour. It is assumed students enrolled in this course possess basic computer skills.
PREREQUISITES: One 1000 level SOSA course or FYP and either SOSA 2001.03 or SOSA 2002.03
FORMATS: Lecture | Lab

SOSA 3403 Qualitative and Field Methods
CREDIT HOURS: 3
Research is a craft requiring many skills. This course focuses on skills complementary to those discussed in SOSA 3402.03 (Figuring out Society). Topics may include- theory and the choice of method; applied social science; field work; ethnography; use of interpreters; interviewing; life histories; note taking; analysis of texts; feminist methodologies.
PREREQUISITES: One SOSA 1000 level course or FYP and SOSA 2001X/Y.06 or 2002X/Y.06
FORMATS: Lecture | Lab

SOSA 3405 Contemporary Social Theory
CREDIT HOURS: 3
A variety of approaches constitute theory in contemporary sociology. Among them are those called interactionist, ethnomethodological, structuralist, critical, feminist, rational choice, and post-modernist. This course considers the contributions of these approaches to the enterprise of modern sociology. What are the main premises of particular sociological theories? What are their implications for the study and understanding of the social world? What are the issues that evoke debate between different schools of theory?
PREREQUISITES: One SOSA 1000 level course, or FYP and SOSA 2001X/Y.06 or 2002X/Y.06
FORMATS: Lecture

SOSA 4000 Honours Seminar in Social Anthropology
CREDIT HOURS: 6
This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The course caries two separate grades, one for the course and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Honours registration in Social Anthropology and SOSA 2001 (recommended) or SOSA 2002, and two of SOSA 3400, SOSA 3402 and 3403. or permission of the instructor
FORMATS: Seminar

SOSA 4001 Quantitative Analysis for the Social Sciences I
CREDIT HOURS: 3
This course will introduce quantitative analysis. It will engage issues of research design, the relationship between samples and populations, statistics and inference, as well as basic tests of statistical significance. The course will also introduce tabular, graphical, and bi-variate linear analysis, using computer software. It will encourage secondary data analysis of available datasets, evaluation of surveys, and develop skills through a series of class projects.
PREREQUISITES: SOSA 3402.03 and fourth year Major or Honours standing
CROSSLISTED: SOSA 5001.03
FORMATS: Seminar

SOSA 4002 Quantitative Analysis for the Social Sciences II
CREDIT HOURS: 3
This course will focus on the use of quantitative methods in social science research. It will introduce students to regression techniques and concentrate on the assumptions motivating quantitative analysis. The course will also look at regression diagnostics and critically weigh options available to researchers when "normal" assumptions are broken. The course will be split into lectures and computer labs using statistical software. The labs will apply methods covered in class and explore potential secondary data resources. The course will develop these skills through a series of class projects.
PREREQUISITES: SOSA 3402.03, SOSA 4001.03 and fourth year Major or Honours standing
CROSSLISTED: SOSA 5002.03
FORMATS: Seminar

SOSA 4003 Contemporary Perspectives in Ethnography
CREDIT HOURS: 3
Ethnographies and critical writings which grapple with questions of theory and interpretation in a range of contexts - near and far, familiar and strange, local and global - will be examined in this course. Approved with International Development Studies.
PREREQUISITES: One SOSA 1000 level course or FYP; SOSA 2001X/Y.06 or 2002X/Y.06; and fourth year Honours standing
CROSSLISTED: SOSA 5003.03
FORMATS: Seminar

SOSA 4004 Issues in Economy, Work and Development
CREDIT HOURS: 3
Each year, this "advanced issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural effects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.
PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Honours standing
FORMATS: Seminar

SOSA 4005 Issues in Social Justice and Inequality
CREDIT HOURS: 3
Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed the social and moral problems of social inequalities of various kinds viewed in a context of global changes. Sample topics include but are not restricted to: gender, minority and class inequalities; struggles over rights; social movements; social scenarios surrounding citizenship, migration and immigration; multiculturalism; and border and security studies. Consult Department for specific topic.
PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Honours standing
FORMATS: Seminar

SOSA 4006 Issues in Critical Health Studies
CREDIT HOURS: 3
Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.
PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Honours standing
FORMATS: Seminar

SOSA 4012 Issues in Sociology and Social Anthropology
CREDIT HOURS: 3
Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.
PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Major or Honours standing in Sociology and Social Anthropology
FORMATS: Seminar

SOSA 4013 Issues in Sociology and Social Anthropology
CREDIT HOURS: 3
See SOSA 4012.
PREREQUISITES: One SOSA 1000 level course or FYP and fourth year Major or Honours standing

SOSA 4014 Special Topics
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major or honours standing in SOSA
FORMATS: Lecture | Seminar

SOSA 4015 Special Topics
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major OR honours standing in SOSA
CROSSLISTED: INTD 4022.03 cap:5
FORMATS: Lecture | Seminar

SOSA 4016 Special Topics
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major and honours standing in SOSA
FORMATS: Lecture | Seminar

SOSA 4017 Special Topics
CREDIT HOURS: 3
This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.
PREREQUISITES: One SOSA 1000 level course, or FYP and fourth year major and honours standing in SOSA
FORMATS: Seminar

SOSA 4500 Honours Seminar in Sociology
CREDIT HOURS: 6
This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and

presentations about their chosen topics. The course carries two separate grades, one for the course and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Honours registration in Sociology and SOSA 2002 (recommended) or SOSA 2001 and two of SOSA 3401, SOSA 3402, SOSA 3403 and SOSA 3405. or permission of the instructor
FORMATS: Seminar

SOSA 4510 Readings in Sociology/Social Anthropology
CREDIT HOURS: 3
In a reading course the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.
PREREQUISITES: Instructor's Permission

SOSA 4520 Readings in Sociology/Social Anthropology
CREDIT HOURS: 3
In a reading course the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. papers and research projects are expected.

Spanish and Latin American Studies

Location: Marion McCain Arts and Social Sciences Building

Room 3025
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-1082

Website: spanish.dal.ca

Email: dalspan@dal.ca

Introduction
Spanish is the most widely spoken language in the world after Chinese and English. In 2015 there were nearly 470 million native speakers of Spanish living in 22 countries. If you add 21 million foreign language students world wide, and those with limited knowledge of Spanish, the number rises to 559 million. In fact, 6.7% of the world's population already speaks Spanish and it is expected that this figure will reach 7.5% by 2030. Within four generations it is expected that 10% of the population will understand Spanish. Furthermore, Spanish is the third most commonly used language online, with 7.9% of Internet users communicating in Spanish.

A degree in Spanish and Latin American Studies from Dalhousie University will allow you to engage with this growing global community. Our courses provide a solid foundation for anyone wanting to experience the diversity of the Hispanic world. We offer language course that cater from beginners to the most advanced, as well as classes in translation, Spanish and Latin American civilization, history, culture, politics, literature and film.

You do not need to major in Spanish in order to take advantage of our program. Many students take out classes to complement degrees in other disciplines. Spanish language skills and knowledge of Latin America's social and political history and culture can be tremendous assets to anyone studying international business or development, as well as anyone interested in working with government agencies or non-profit organizations.

Diplomas of Spanish as a Foreign Language (DELEs)
The Diploma of Spanish as a Foreign Language (DELE) is the official accreditation of the degree of fluency of the Spanish language, issued and recognized by the Spanish Ministry of Education, Culture and Sport.

The Instituto Cervantes is in charge of organizing the exams, while the University of Salamanca is in charge of the preparation, correction and final evaluation of all the tests. The exam tests your ability to read, write, speak and understand Spanish. There are six levels of DELEs offered that match the divisions determined by the Common European Framework of Reference for Languages:

Diploma de Español A1

Beginner level: You can understand and use daily expressions frequently used in any part of the Spanish-speaking world, aimed at satisfying immediate needs; asking and giving basic personal information about yourself and daily life, and interacting on a basic level with speakers, whenever they are speaking slowly and clearly and are willing to cooperate.

Diploma de Español A2

Elementary level: You are capable of understanding daily phrases and expressions frequently used related to areas of experience that are particularly relevant to you; basic information about yourself and your family, shopping, places of interest, occupations, etc.

Diploma de Español B1

Pre-intermediate/threshold level: You have sufficient knowledge of the language to allow control in situations which require a basic use of the language.

Diploma de Español B2

Intermediate level: You have the necessary knowledge of the language to allow communication in everyday situations which do not require specialized terms.

Diploma de Español C1

Upper intermediate/proficiency level: You have the ability to cope in common situations of daily life which require a specialized use of the language.

Diploma de Español C2

Mastery/advanced level: You are able to communicate in all situations requiring advanced use of the language and knowledge of cultural background.

The exams are offered in November and May in more than 50 countries around the world. The Department of Spanish and Latin American Studies organizes the examinations at Dalhousie every spring.

For more information about the format of the exam, dates and application deadlines, contact the Spanish Department DELE coordinator.

BA (120 credit hour) Major in Spanish

In addition to the general degree requirements, students need a minimum of 36 credit hours, a maximum of 54 credit hours in Spanish. At least 18 of these credit hours must be at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2200)
- Six additional credit hours of Spanish (including three credit hours at the 3000 level or higher)

BA (120 credit hour) Double Major in Spanish

In addition to the general degree requirements, students need a combination of 60 credit hours, with a minimum of 30 and a maximum of 48 credit hours in Spanish. At least 18 of these credit hours must be at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II

- Three credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2200)
- Six additional credit hours in Spanish at the 3000 level or higher

BA with Honours in Spanish

Potential Honours applicants are encouraged to consult the Department's Undergraduate Advisor during their second year of study. Deadline for application should be three semesters before your graduation.

Students must meet the Faculty degree requirements which include a minimum of 54 and a maximum of 66 credit hours beyond the 1000 level in Spanish, including 18 credit hours at the 3000 level or higher.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2200)
- SPAN 4980.03: Honours Reading Class. Student must complete an Honours Thesis in Spanish
- 21 additional credit hours in Spanish

BA with Combined Honours

Students must meet the Faculty degree requirements which include a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in two allied subjects. A minimum of 30 and a maximum of 48 credit hours may be completed in each subject, including 18 credit hours beyond the 2000 level in each.

If Spanish is your primary major, a minimum of 36 credit hours in Spanish is required (including an honour's thesis).

Requirements (if Spanish is your primary major):

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Six credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2200)
- SPAN 4980.03: Honours Reading Class. Student must complete an Honours Thesis in Spanish.
- Three additional credit hours in Spanish

Requirements (if Spanish is your secondary major):

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study (this does not constitute your literature requirement)
- SPAN 3020.03: Translation
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- Three credit hours in Spanish or Spanish-American Literature (3000 level or higher)
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2100, SPAN 2105, SPAN 2109, SPAN 2110, SPAN 2130, SPAN 2150, SPAN 2200)
- Six additional credit hours of Spanish at the 3000 or 4000 level

BA (90 credit hour) Minor in Spanish

See the Minor in Spanish section of this Calendar

Minor in Spanish
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a minor in Spanish is also available.

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level.

Requirements:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- SPAN 3020.03: Translation
- SPAN 2005.03 (taken in the same academic year as SPAN 2021.03 and SPAN 2022.03) or SPAN 3005.03

Contact Spanish and Latin American Studies for more information.

Minor in Hispanic Cultures
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 18 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2100.03: Evolving Spanish
- SPAN 2200.03: Latin American Culture

And any 12 credit hours from:

- SPAN 2040.03: Spanish for Business
- SPAN 2069.03: Mexico and Central America to 1979: From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America since: From Revolution to Drug Wars
- SPAN 2105.03: Catalan Language and Culture
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961- the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2150.03: Hispanic Identity Through Film
- SPAN 3095.03: Evolution of Spanish

Contact Spanish and Latin American Studies for more information.

Minor in Hispanic Literature
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students must complete a minimum of 21 to a maximum of 27 credit hours above the 1000 level, including:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish
- SPAN 2090.03: Introduction to Hispanic Literary Study
- SPAN 3505.03: Introduction to Spanish Literature
- SPAN 3515.03: Introduction to Latin American Literature
- SPAN 3215.03: Seminario de literatura latinoamericana or SPAN 3510.03: Literatura hispanoamericana contemporanea

- SPAN 3500.03: Literatura espanola contemporanea or SPAN 3525.03: Historia e historias: la literatura como alternativa

Contact Spanish and Latin American Studies for more information.

Minor in Latin American Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

Students seeking a minor in Latin American Studies must complete a minimum of 24 to a maximum of 27 credit hours, including a minimum of 3 credit hours at the 3000 level or above.

Must include:

- SPAN 2021.03: Intermediate Spanish
- SPAN 2022.03: Advanced Intermediate Spanish

List A: six credit hours from the following:

- SPAN 2069.03: Mexico and Central America to 1979. From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America: From Revolution to Drug Wars
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961-the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century
- SPAN 3515.03: Intro to Latin American Literature
- SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3408.03: The Cuban Development Model

List B: 12 credit hours from the following:

- HIST 2381.03: Latin America
- HIST 2386.03: Colonial Latin America
- HIST 2387.03: Latin America Since Independence
- HIST 3390.03: Latin America: Revolution and Repression
- HIST 4300.03: Topics in Latin American History
- INTD 3302.03: Social Development in Cuba
- INTD 3303.03: The Political Economy of Cuba
- INTD 3304.03: Sustainable Development in Cuba
- INTD 3310.06: Cuban Culture and Society
- INTD 3401.03: Seminar in Development Studies
- POLI 3360.03: Politics in Latin America
- SOSA 3168.03/GWST 3168.03: Issues in Latin American Society

Contact Spanish and Latin American Studies for more information.

Programs and Courses Abroad

The Salamanca Program at the Universidad de Salamanca

The Salamanca Program is a special inter-disciplinary program of instruction designed to allow Dalhousie students to undertake both an intensive study of the Spanish language and courses in Spanish culture. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. The program takes place during the fall, winter, spring or summer term, and is offered at the Universidad de Salamanca in Salamanca, Spain. Dalhousie University will grant 18 credit hours to those students who successfully complete their courses in Spain. Enquires and applications should be addressed to the coordinator of the Program. Students will register via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Students must take the equivalent of three full courses.

Compulsory courses:

- Lengua española (nine credit hours)

Students will then select ONE course from each of the following three Options.

Option 1

- Conversación y redacción (three credit hours)
- La mujer en la historia de España (three credit hours)
- Historia de la España contemporánea (three credit hours)

Option 2

- Cultura española (three credit hours)
- Literatura española e hispanoamericana (three credit hours)
- El mundo árabe en el mundo hispánico (three credit hours)
- Destrezas orales y escritas (three credit hours)

Option 3

- Historia del arte español (three credit hours)
- Español de los negocios (three credit hours)
- Cine español e hispanoamericano (three credit hours)

The Cuba Program at FLACSO/Havana

This program is given by FLACSO/Havana and generally takes place in the winter term. All course work is conducted in the Spanish language. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. See course descriptions for INTD 3301.03, INTD 3302.03, INTD 3303.03, INTD 3304.03, and INTD 3306.06 in the International Development Studies Section of this Calendar. Students are able to receive either INTD or SPAN credits. For more information, please contact the Department of International Development Studies.

The Mexico Program at the University of Campeche

This program, designed for students with a minimum of two years' university-level Spanish, is located at the Universidad Autónoma de Campeche, in the southwest of the Yucatán peninsula, in Mexico. Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-. It started in the Fall of 1998, and is administered by the university's Centro de Español y Maya. Students can be located with Mexican families if they desire. They are also encouraged to travel and see the superb Maya architectural sites in the Yucatán region. The city of Campeche, situated on the Caribbean coast, has a population of approximately 190,000. It was founded in 1540. The cities of Halifax and Campeche twinned in 1998, and there have been several educational, political, and commercial exchanges. This program is offered in the fall semester only.

Students will register for courses via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Courses taken at the University of Campeche are:

- Gramática Intensiva (six credit hours)
- Vocabulario Intensivo (six credit hours)
- Historia Mexicana (six credit hours)

The Peru Program at the Pontificia Universidad Católica del Perú

This program takes place during four weeks in July in Lima, at the Pontificia Universidad Católica del Perú (PUCP). Founded in 1917, today it is among the thirty most important universities in Latin America and occupies the first position in Peru. Students will study Spanish and Peruvian culture courses. The program offers four visits to the main cultural attractions in Lima to provide the subject of discussion in the language course. Students will have a PUCP buddy service to help them adapt to the academic and social life at PUCP as well as to the city of Lima and enrich the learning experience of the Spanish language. Students will stay at Peruvian families' homes where they will find every amenity they need and receive breakfast and dinner. All classwork is conducted in Spanish.

Students must have completed SPAN 2021.03: Intermediate Spanish and SPAN 2022.03: Advanced Intermediate Spanish, or equivalent with at least a standing of B-.

Dalhousie University grants up to 9 credit hours to those students who successfully complete their classes in Peru. Students will register via Letter of Permission and grades will be entered on a Pass/Fail basis. Courses will appear on the student's academic record as transfer credits.

Students will register for the following courses for a total of 9 credit hours:

- Gramática español a nivel intermedio o avanzado (three credit hours)
- Conversación en español nivel intermedio o avanzado (three credit hours)
- Indroducción a los Estudios Peruanos, solo nivel avanzado (three credit hours)

SPAN 3310.06: Cuban Culture and Society
See course description for INTD 3310.06 in the International Development Studies section of this calendar.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Courses Offered on Campus
PLEASE NOTE:
If you have taken two or more years of Spanish in High School or have studied it previously in another institution, you need to take the **Spanish Placement Test** (SPT).

The **Spanish Placement Test** is a one and a half hour standardized multiple-choice test that is designed to assess your current level in Spanish and place you in the course better suited to your needs. Students who wish to register for a language course before taking this test may do so, but care should be taken in choosing it. Please read the course descriptions below carefully and try not to underestimate your knowledge.

This test is administered online. Please contact our Academic Advisor (spanish.advising@dal.ca) to register for the test. Scores from this test are normally available within a day, and are considered valid for up to a year from the date it was taken.

Students who are taking or have taken any language course at Dalhousie do NOT need to take this test.

Not all courses are offered every year. Please consult the current timetable.

Course Descriptions

SPAN 1015 Spanish on the Go
CREDIT HOURS: 3
SPAN 1015 is a hands-on, practical approach to learning Spanish. Students will gain a working knowledge of Spanish by engaging in communicative activities, role play, and task-based activities. The objective of this class is to facilitate students' functional ability in Spanish and to enable them to participate in various everyday activities when they are in a Spanish-speaking context.
EXCLUSIONS: Cannot be taken for credit after SPAN 1020, SPAN 1021, SPAN 1022, SPAN 1025, or any other 2000-level course.

SPAN 1021 Beginning Spanish
CREDIT HOURS: 3
In SPAN 1021 students will acquire a general knowledge of Spanish by engaging in communicative and task-based activities that focus on developing speaking, listening, reading and writing skills. This course follows the A1 level of the Common European Framework of Reference for Languages (CEFRL). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness.
RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 1021/1022 within three semesters. Additionally, neither SPAN 1021 nor 1022 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.
EXCLUSIONS: SPAN 1020.06, SPAN 1035.06
FORMATS: Lecture

SPAN 1022 Advanced Beginning Spanish
CREDIT HOURS: 3
This course is the continuation of SPAN 1021, and should be taken sequentially or in cases where students have prior knowledge of the language and have been placed at this level by the Academic Advisor. The course follows the A2 level of the Common European Framework of Reference for Languages (CEFRL). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness through communicative and task-based activities that focus on developing speaking, listening, reading and writing skills.
PREREQUISITES: SPAN 1021 or equivalent
RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 1021/1022 within three semesters. Additionally, neither SPAN 1021 nor 1022 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.
EXCLUSIONS: SPAN 1020.06, SPAN 1025.03, SPAN 1035.06
FORMATS: Lecture

SPAN 1035 Intensive Beginning Spanish
CREDIT HOURS: 6
SPAN 1035 is the equivalent of SPAN 1021 and 1022. In this course the students will acquire a general knowledge of Spanish by engaging in communicative and task based activities that focus on developing speaking, listening, reading and writing skills. This course follows the A1/A2 levels of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness.
EXCLUSIONS: SPAN 1020 and SPAN 1021 and SPAN 1022
FORMATS: Lecture

SPAN 2005 Español Práctico - Nivel Intermedio
CREDIT HOURS: 3
The objective of this course is to continue developing the four language skills in a practical setting. This course is required for the Minor in Spanish Language and

should be taken in the same academic year as SPAN 2021 and/or SPAN 2022. Students planning to take any of our programs abroad or the Diploma of Spanish as a Foreign Language (DELE) (B1 level) will find the course particularly useful.
PREREQUISITES: Span 1022, SPAN 1035, equivalent or instructor's permission
RESTRICTIONS: May not be taken after SPAN 2022 or any Spanish 3000 level language course

SPAN 2021 Intermediate Spanish
CREDIT HOURS: 3
In SPAN 2021 students will acquire an intermediate knowledge of Spanish equivalent to a B1.1 level, by adopting an action-oriented approach and engaging in communicative task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFRL) that defines competencies that students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).
PREREQUISITES: SPAN 1022 or SPAN 1035 or equivalent.
EXCLUSIONS: Students who complete SPAN 2021 may not enrol in 1000-level Spanish language courses.
FORMATS: Lecture

SPAN 2022 Advanced Intermediate Spanish
CREDIT HOURS: 3
This course is the continuation of SPAN 2021, and should be taken sequentially or in cases where students have prior knowledge of the language and have been placed at this level by the Academic Advisor. Students will acquire an advanced intermediate level of knowledge of Spanish equivalent to a B1.2 level, by adopting an action-oriented approach and engaging in communicative task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFRL) that defines competencies that students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).
PREREQUISITES: SPAN 2021 or equivalent knowledge.
RESTRICTIONS: In order to fulfill the Bachelor of Arts Language Requirement, students are required to complete the sequence SPAN 2021/2022 within three semesters. Additionally, neither SPAN 2020 nor 2025 can be combined with courses from another department in order to fulfill the Bachelor of Arts Language Requirement.
EXCLUSIONS: Students who complete SPAN 2022 may not enrol in SPAN 2021.
FORMATS: Lecture

SPAN 2035 Intensive Intermediate Spanish
CREDIT HOURS: 6
SPAN 2035 is the equivalent of SPAN 2021 and SPAN 2022. In this course students will acquire an intermediate knowledge of Spanish equivalent of a B1 level, by adopting an action-oriented approach and engaging in communicative and task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFR) that defines the competencies the students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).
PREREQUISITES: SPAN 1022.03, SPAN 1025.03, SPAN 1035.06 or equivalent knowledge.
EXCLUSIONS: Students who complete SPAN 2035 may not enrol in 1000-level Spanish courses; SPAN 2021; SPAN 2022
FORMATS: Lecture

SPAN 2040 Spanish for Business
CREDIT HOURS: 3
Spanish for business and international trade. Introduction to the Spanish of international business and to the social cultural norms of negotiation in Spanish-speaking countries.
PREREQUISITES: SPAN 2022, SPAN 2035, or equivalent
FORMATS: Lecture | Discussion

SPAN 2069 Mexico and Central America to 1979: From Conquest to Revolution
CREDIT HOURS: 3
Events in Central America are frequently covered in our media, causing people to believe that “the unrest” there is recent. This course seeks to examine the historical roots of the conflict from the colonial period until the 1970s. The aim of the course is to provide students with a background knowledge of this area, so that they can better understand current developments there.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2382.03
FORMATS: Lecture | Discussion

SPAN 2070 Mexico and Central America since: From Revolution to Drug Wars
CREDIT HOURS: 3
Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the course deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, Nicaragua under the Sandinistas, the impact of NAFTA, the "democracy" of Mexico, gang wars and narcotics, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The course is designed to provide an understanding of the contemporary reality of this volatile region.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2383.03, GEOG 2070.03
FORMATS: Lecture | Discussion

SPAN 2090 Introduction to Hispanic Literary Study
CREDIT HOURS: 3
This course will introduce students to literary analysis and critical writing in Spanish. Readings will include works from a variety of periods, genres and regions.
CALENDAR NOTES: Does not fulfill the literature requirement for any Spanish degree program.
PREREQUISITES: SPAN 2022, SPAN 2035, equivalent or instructor's permission
FORMATS: Lecture

SPAN 2100 Evolving Spain: History, Culture, Society
CREDIT HOURS: 3
This course provides an overview of the major historical, sociopolitical and cultural elements, from the Middle Ages to the present, that formed contemporary Spain.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.
CROSSLISTED: HIST 2065.03
FORMATS: Lecture | Discussion

SPAN 2105 Catalan Language and Culture
CREDIT HOURS: 3
Introduction to Catalan, the Romance language spoken by some 8 million people in northeastern Spain (Catalonia & Valencia), southern France, the Balearic Islands and Sardinia. Elementary Catalan language and an introduction to Catalan culture and history.
PREREQUISITES: Two years' study of any Romance language, or permission of instructor
FORMATS: Lecture | Discussion

SPAN 2109 Cuba from Colonial Times to 1961
CREDIT HOURS: 3
While many people are aware of the impact of the Cuban Revolution of 1959, few are aware of the kind of society that existed in Cuba beforehand. This course seeks to examine the historical roots of the country from the colonial period until the 1960's, with particular attention being paid to socio-cultural aspects. The objective is to provide students with a background knowledge of this country and its current reality.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2384.03
FORMATS: Lecture | Discussion

SPAN 2110 Cuba in Revolution, 1961- the Present
CREDIT HOURS: 3
Cuba, the only Communist society in the Western Hemisphere, has undergone a dramatic political and economic transformation. The Revolution has also brought about changes in education, the arts, the role of women, race relations, and athletics. The course focuses on the problems and achievements of the Revolution, the peculiarities of Communism in a Caribbean society, and its effect on literature and the arts. Particular attention is spent on the post-1990 period.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2385.03
FORMATS: Lecture | Discussion

SPAN 2130 Latin American dictators: From Fact to Fiction
CREDIT HOURS: 3
The history of Latin America since Independence has been characterized by the rise to power of countless dictators. Some of the best Latin American novels portray these almost mythical figures who to this day wield absolute power in many countries. The course examines the literature and history of this phenomenon with particular attention to the twentieth century, and attempts to discover its roots in militarism, underdevelopment, and imperialism.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2388.03
FORMATS: Lecture | Discussion

SPAN 2150 Hispanic Identities Through Film
CREDIT HOURS: 3
This course focuses on the concept of Hispanic identity, through the study of contemporary and historical sociocultural and geopolitical issues, as manifested in cinema from around the Spanish-speaking world.
PREREQUISITES: SPAN 2022, SPAN 2035, or equivalent
FORMATS: Lecture | Discussion

SPAN 2200 Latin American Culture: From the Maya to the 21st Century
CREDIT HOURS: 3
The aim of this course is to provide basic understanding of this varied and historic area. This course examines the development of Latin America from pre-Columbian times to the present. It also examines the way in which the reality of Latin America has shaped a continental cultural identity.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.
FORMATS: Lecture | Discussion

SPAN 3000 Language and Culture Through Telecollaboration
CREDIT HOURS: 3
This course will use open-access digital communication platforms to bring together intermediate and advanced Dalhousie Spanish students and their peers at the University of València (Spain). Students will work collaboratively, on a series of activities centred on information sharing, comparison and analysis, collaboration and product creation. The telecollaborative framework will provide opportunities for repeated communication with native speakers, as well as intercultural exchanges between participants. Digital interactions will provide repeated exposure to near-natural communication, foster engagement and autonomous learning, and provide models for the practical application of foreign languages in a format that highlights their value as transferable and marketable skills. Evaluation will focus on oral competences through personal presentations, interviews, and discussions. Written skills will be assessed through the creation of webpages and documents, correction of partners' linguistic errors, journal entries and reports.
PREREQUISITES: SPAN 2020. 06, SPAN 2022.03, SPAN 2035.06 or equivalent
FORMATS: Lecture

SPAN 3005 Español Práctico - Nivel avanzado
CREDIT HOURS: 3
The objective of this course is to continue developing the four language skills in a practical setting. This course could be taken as part of the Minor in Spanish Language as well as a 3000 level elective for other Spanish degrees. It should be taken in the same academic year as Span 3035/3036. This course will be particularly useful to students planning to write the Diploma of Spanish as a Foreign Language (DELE)(B2 level)

PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent
FORMATS: Lecture

SPAN 3020 Translation
CREDIT HOURS: 3
Exercises in translation, from Spanish to English. This course assists students to understand the basic strategies of translation.
PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent
FORMATS: Lecture | Discussion

SPAN 3025 Traducción: Inglés-Español
CREDIT HOURS: 3
The objective of this course is to develop basic translation skills through the practice of translating English texts into Spanish. The approach would be methodological and practical: theoretical issues will be discussed to solve translation problems. After establishing the fundamental concepts, the course will progress to examine a series of important aspects of translation; cultural trans-position, phonic, graphic and prosodic problems, grammatical and lexical issues, language variety in texts, etc. Each aspect outlined will have a practical component in which students are given a concrete translation task to solve. Group and class discussions will follow. The aim of the course is to provide students with a general view of the mechanics of translation to then encourage the creative aspects of the process.
PREREQUISITES: SPAN 3035.03 or equivalent
FORMATS: Lecture | Discussion

SPAN 3035 Advanced Spanish I
CREDIT HOURS: 3
The objective of this course is to reinforce and expand students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.
PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent
EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03
FORMATS: Lecture

SPAN 3036 Advanced Spanish II
CREDIT HOURS: 3
A continuation of SPAN 3035. The objective of this course is to reinforce and further students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.
PREREQUISITES: SPAN 3035.03. or equivalent
EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03
FORMATS: Lecture

SPAN 3190 Conversation & Expression
CREDIT HOURS: 3
This course is conducted in Spanish and engages students in conversation in a variety of formats toward the goal of further developing oral proficiency. We will aim to improve oral expression, conversation, and listening comprehension. Short essays or videos on topics of current interest are prepared outside of class and serve as the basis for general class discussions. Although the course deals mainly with conversation, many of the exercises will be directed toward oral practice of verb structure and tenses learned in the previous courses. Activities include improvisations and focus on small group and pair work as well as individual presentations. Students will strengthen oral skills and build vocabulary through practice in different types of discourse, including narration, description, critical commentary, debate, roll play, listening to music, reading newspapers and watching the news.
PREREQUISITES: SPAN 3035.03
FORMATS: Seminar | Discussion

SPAN 3215 Seminario de literatura latinoamericana
CREDIT HOURS: 3
This course studies the work of Latin American women writers. It seeks to introduce students to critical approaches and recurring themes in Latin American women's literature. Representative works are studied within their historical and cultural context. Readings include novels, short stories, plays and caricatures.
PREREQUISITES: SPAN 2090.03
FORMATS: Lecture | Discussion

SPAN 3310 Cuban Culture and Society
CREDIT HOURS: 6
See course description for INTD 3310.06 in the International Development Studies section of this calendar.

SPAN 3408 The Cuban Development Model
CREDIT HOURS: 3
This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar--as it had been from the beginning if the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services--mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to this period.
PREREQUISITES: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.
CROSSLISTED: INTD 3408.03
FORMATS: Lecture | Discussion

SPAN 3500 Literatura española contemporánea
CREDIT HOURS: 3
This course is a survey of the most important authors of Spanish contemporary literature. Students will study internationally well known writers. Areas of special focus may include the writings of Antonio Muñoz Molina and Eduardo Mendoza, both of whom are considered representative of the Spanish transition period. The aim of this

course is to introduce students to a specific area of Spanish literature focusing on the historic context in which the novels are written.
PREREQUISITES: SPAN 2090.03
FORMATS: Lecture | Discussion

SPAN 3505 Introduction to Spanish Literature
CREDIT HOURS: 3
This course is an introduction to Spanish literature presenting selected works of prose, poetry and theater from Spain. This is a survey of literature from the Middle Ages to the 20th century. Entirely conducted in Spanish, normally taken in the second or third year of study, the everyday work in this class involves group discussion and lectures. The aim of this course is to introduce students to general notions of literary history and to the basic concepts involved in reading literary texts with particular emphasis on the development of both oral and written linguistic expression.
PREREQUISITES: SPAN 2090.03
EXCLUSIONS: SPAN 2500.03
FORMATS: Lecture | Discussion

SPAN 3510 Literatura hispanoamericana contemporánea
CREDIT HOURS: 3
This is a panoramic course that studies Latin American literature from the "boom" to the present. It is divided into five sections, each of which will focus on a literary genre: short stories, essays, journalism, theatre and novels.
PREREQUISITES: SPAN 2090.03
FORMATS: Lecture | Discussion

SPAN 3515 Introducción a la literatura latinoamericana (Intro to Latin American Literature)
CREDIT HOURS: 3
This is a panoramic course that surveys Latin American literature. It is based on a selection of prose and poetry from the most representative periods and authors, spanning from pre-Columbian times to the twentieth century.
PREREQUISITES: SPAN 2090.03
EXCLUSIONS: SPAN 2510.03
FORMATS: Lecture | Discussion

SPAN 3520 Topics in Culture & Identity in the Spanish-Speaking World
CREDIT HOURS: 3
A broad outline of the interaction between culture and identity in the Hispanic world. Focus will be on the end of the 19th and the 20th centuries, and the connection between artists and identity in relation to political, culture and social forces. Selected works of artistic expression (art, literature, music, etc.) become the point of departure for understanding the Spanish-speaking world. Specific topics may vary.
PREREQUISITES: SPAN 2090.03
FORMATS: Lecture | Discussion

SPAN 3525 Historia e historias: la literatura como alternativa
CREDIT HOURS: 3
This course is designed for advanced students who have taken the available courses at the 2000 level or equivalent. During this course students will explore the relationship between science and literature, especially subversive representations of History in fictional texts during the 20th and 21st centuries. Lectures will be organized on a chronological basis and will cover different Spanish-speaking cultural areas. The aim of this course is to introduce students to a specific area of Hispanic literature focusing on the historic facts included in novels and essays.
PREREQUISITES: SPAN 2090.03
FORMATS: Lecture | Discussion

SPAN 3905 Estudios hispánicos avanzados
CREDIT HOURS: 6
This course offers the student an opportunity to study aspects of Hispanic culture not already included in other language offerings or in literature courses more narrowly defined by period, genre, etc. It takes advantage of special research interest of staff or the unique expertise of visiting faculty to provide instruction not regularly available here.
PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent
FORMATS: Lecture

SPAN 3920 Spanish in the Community: Experiential Learning
CREDIT HOURS: 3
Experiential learning combines formal learning with practical experience using the Spanish language; students are required to volunteer/intern for a minimum of 60 hours over the term, or approximately 4-5 hours per week. Students will also compile a portfolio under the supervision of the course instructor, to include relevant readings and assignments (these may include reading responses, reports, presentations, essays).
PREREQUISITES: SPAN 2022, SPAN 2035 or equivalent
FORMATS: Discussion

SPAN 3970 Lecturas dirigidas de literatura Hispanoamericana
CREDIT HOURS: 3
PREREQUISITES: SPAN 2090.03

SPAN 3975 Estudios hispánicos dirigidos
CREDIT HOURS: 3

SPAN 3980 Lecturas para especialistas
CREDIT HOURS: 3

SPAN 4510 Golden Age Poetry & Prose
CREDIT HOURS: 3
This course seeks to introduce students to the most important period in the Spanish literature, the Golden age, throughout the artistic work of Miguel de Cervantes, author of the well known Don Quixote, the first modern novel but also a hybrid piece of art which includes all the literary trends of its time: poetry, short stories and more. This course facilitates a close reading of Don Quixote in the artistic and historical context of renaissance and baroque Spain. The question of why Don Quixote is read today will be addressed throughout the course.
FORMATS: Lecture

SPAN 4980 Honours Reading Class
CREDIT HOURS: 3
PREREQUISITES: Only open to students in graduating year of Spanish Honours program.

SPAN 4985 Independent Advanced Hispanic Studies
CREDIT HOURS: 3
PREREQUISITES: Only open to students in graduating year of Spanish Honours program.

SPAN 4990 Honours Reading
CREDIT HOURS: 3
PREREQUISITES: Only open to students in graduating year of Spanish Honours program.

Theatre - Fountain School of Performing Arts

Location: Dalhousie Arts Centre, Room 514
6101 University Avenue
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3772

Fax: (902) 494-2801

Website: dal.ca/performingarts

Email: fspa@dal.ca

Introduction
Dalhousie enables you to study many aspects of theatre within the vibrant context of our multi-disciplinary Fountain School of Performing Arts. Our offerings range from classes in playwriting, directing, and theatre history, to an acting program entered by audition, to hands-on instruction in costume making, set design, props building, and more. Through our programs, students can develop expertise as designers, directors, performers, and audience members, in styles ranging from classical to contemporary.

The Bachelor of Arts in Theatre offers focused studies to prepare graduates for careers or further study in many areas, including acting, theatre studies, stage design, the fashion industry, and more. Through experiential learning, training in theatre teaches poise, discipline, creativity, collaboration, empathy, and the ability to think on one's feet. These transferable skills are excellent preparation for many career paths in and beyond the performing arts.

We offer BA Honours degrees in Acting, Costume Studies, Stage Design & Technical Theatre, and Theatre Studies. These programs can sometimes be completed as a Combined Honours degree with another subject. We offer a two-year Diploma in Costume Studies. You can also pursue more general theatre degrees, including BA Major and Double Major. You can complete a Minor in Theatre to enhance your degree. You can also take courses in Theatre as electives to complement your studies in other disciplines.

The degree programs involve a curriculum of Theatre courses and a selection of other courses in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Theatre is your primary interest.

Facilities
The Fountain School of Performing Arts is located in the Dalhousie Arts Centre. Theatre facilities include one proscenium theatre, two studios, and supporting workshops. Teaching spaces for costume studies are currently located off-campus. The School office is in Room 514 of the Arts Centre.

Because of the work involved, some theatre courses have a limited enrolment. All students wishing to take any practical course in Theatre should, therefore, first consult with the Fountain School.

PLEASE NOTE: Theatre by its nature requires evening work. Students, especially in Acting, Stage Design and Technical Theatre, and Costume courses, are advised not to undertake other evening commitments.

Degree Programs
In addition to the Fountain School requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

BA Honours in Theatre (Acting)

The main objective of the Acting Program is to satisfy the needs of those students who have decided to pursue a career as performers in the professional theatre. The program is progressive in nature, culminating in a company of student actors who perform in three theatrical productions in the Fountain School season in their fourth year. Third year students in the Acting Program will participate in the third play of the Fountain School season. Auditions are held at the end of the first year for admission into the upper years of study. In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be

recommended by the Acting Faculty in order to advance to the next year's course of study. The program provides these students with professional training and the benefits of a liberal-arts education at a major Canadian university. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- THEA 1800X/Y.06: Introduction to Acting and Performance
- 18 credit hours in other subjects

Year 2
The second year of the Acting Program introduces students to performance approaches that range from the classical to the contemporary. Students will also receive a foundation in devised theatre creation through exploration of central principles such as collaboration, style, and ensemble. Emphasis is placed on discipline, dedication to craft, and how to become an informed and vital contributor to the creative process.

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2800X/Y.06: Acting II
- THEA 2810X/Y.06: Voice and Speech II
- THEA 2820X/Y.06: Dance and Movement II
- six credit hours in other subject

Year 3
The third year of the Acting Program is structured to build on the knowledge acquired in the previous two years. Students learn how to integrate what they have discovered as they gain further understanding of skills, techniques and creative expression. Third-year students perform in one play of the Fountain School season and may be invited to perform in others, depending upon the needs of the plays chosen and the student's readiness for the performance situation as assessed by the Acting Faculty.

- THEA 3800X/Y.06: Acting III
- THEA 3810X/Y.06: Voice and Speech III
- THEA 3820X/Y.06: Dance and Movement III
- MUSC 1081.03: Voice Clinic for the Theatre
- nine credit hours in other subjects

Year 4
In the final year of the Acting Program, students' studies are geared toward performance and entering the world of professional acting. The company of fourth year Acting Program students will be cast in three plays within the Fountain School season. Courses are devoted to preparing the student actor for transition into the profession.

- THEA 4800X/Y.06: Acting IV
- THEA 4840X/Y.06: Advanced Performance Techniques
- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- 12 credit hours in other subjects (one of these can be in THEA)

Honours Acting students will qualify for Honours with the satisfactory completion of a professional portfolio.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Costume Studies)

This program combines the academic study and research skills necessary to the understanding of costume in its broadest context with the creative interpretation of design and the applied skills of the costumer whose goal is to work in the theatre, film, museums, or historical animation. Some courses in Costume Studies are open to general BA students; see individual course listings. Honours students must maintain an average of at least B+ in all of their advanced theatre courses. Special accelerated plans for Honours degrees in Costume Studies may be available on an individual, case-by-case basis for students with existing university credits recognized for transfer credit by Dalhousie University.

Year 1

- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- THEA 1450X/Y.06: Introduction to Costume Studies
- 18 credit hours in other subjects

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
  THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
- THEA 2402.03: Castle to Café - Dress from 1459 to 1700
- THEA 2406X/Y.06: The Aesthetics of Contemporary Dress
- THEA 2412.03: Language of Design
- THEA 2451.03: Costume in Performance I
- six credit hours in other subjects

Year 3

- THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1870
  THEA 3403.03: Bustles to Boardroom - Dress from 1870 to Modern Day
- THEA 3451X/Y.06: Costume in Performance II
- THEA 3454.03: Body-Shaping Through Historical Tailoring II
- THEA 3455.03: Body-Shaping Through Historical Tailoring I
- 12 credit hours in other subjects

Year 4

- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- THEA 4406X/Y.06: The Aesthetics of Historical Dress
- THEA 4450.03: Costume Technology
- THEA 4452.03: The Sculpture of Dress
- 12 credit hours in another subjects

Honours students in Costume Studies will be awarded the Honours Qualifying Project upon successful completion of a project on an aspect of theatrical costume or historical dress.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Technical Theatre)

This degree is designed for students wishing to pursue careers in stage design and technical theatre. This section encompasses all areas of specialization that work together in the production of live performance. Set design, scenic carpentry, scenic painting, lighting, sound, props and stage management are taught through lectures and hands-on labs. Students in the first year of the program are required to work on one Fountain School stage production, and those in second and third years work on four Fountain School stage productions each year. All students must maintain at least a B- average in all Design and Technical Theatre courses to move on to the next year, and Honours students must maintain an average of at least B+ in all their advanced Theatre courses.

Year 1

- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- THEA 1051:03: Introduction to Theatre Organization and Stagecraft Part 1
- THEA 1052.03: Introduction to Theatre Organization and Stagecraft Part 2

- 18 credit hours in other subjects

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2060X/Y.06: Technical Theatre 1
- THEA 2070X/Y.06: Performance Technology 1
- THEA 2412.03: Language of Design
- THEA 2710.03: Stage Design I
- six credit hours in other subject

Year 3

- THEA 3060X/Y.06: Technical Theatre 2
- THEA 3070X/Y.06: Performance Technology 2
- THEA 3710X/Y.06: Stage Design II or PERF 3721.03 and PERF 3722.03
- 12 credit hours in other subjects

Year 4

- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- THEA 3710XY.06: Stage Design II or PERF 3721.03 and PERF 3722.03
- THEA 4060.06: Production Techniques 1
- THEA 4070.06: Advanced Production Specialization
- 6 credit hours in other subjects

The Honours Qualifying Project in Stage Design and Technical Theatre will be awarded upon the satisfactory completion of a professional portfolio.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. Interested students studying Stage Design and Technical Theatre may find occasional, paid employment with Neptune Theatre, the Rebecca Cohn Auditorium, IATSE Local 680 (International Alliance of Theatrical Stage Employees), and various other local and national, professional institutions with which the Fountain School of Performing Arts has a close connection.
3. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA Honours in Theatre (Theatre Studies)

This degree is designed for students who wish to follow a program of theatre studies that keeps the whole of theatre in perspective, is academically oriented, and serves as a strong foundation for graduate degrees in Theatre and Drama, or as a good preparation for a variety of professional and education degrees. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- six additional credit hours in THEA at 1000-level
- three courses in other subjects

Year 2

- THEA 2011.03: Ancient and Medieval Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2901.03: Production Dramaturgy
- THEA 2902.03: Play Analysis for Directing

- 18 credit hours in other subjects

Years 3 and 4

- THEA 3200X/Y.06: The Director in the Theatre
- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- THEA 3600X/Y.06: The Playwright in the Theatre
- THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities
- 21 credit hours in advanced electives in THEA
- six credit hours in advanced course in dramatic literature from another department (ENGL, CLAS, RUSS, SPAN, FREN, GERM, etc.)
- 12 credit hours in other subjects, including THEA

Honours students in Theatre Studies will be awarded the Honours Qualifying Project by fulfilling the function of a dramaturge or assistant director on one of the Fountain School stage productions.

NOTES:

1. Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.
2. For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA or BSc Combined Honours

Dalhousie and University of King's College students can combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Combined Honours degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors.

In principle, a student who wishes to graduate with this degree must complete at least THEA 2011.03, THEA 2012.03, THEA 3501.03, and THEA 3502.03 and must fulfil at least the minimal requirements for a three year BA. They must have, in the two subjects combined, the required distribution of courses for a BA Combined Honours degree. As a result, the degree will consist of a minimum of 30 and a maximum of 48 credit hours in Theatre beyond the 1000-level. As per Dalhousie's regulations for Combined Honours degrees, grades in these courses must be 'C' or better, otherwise the course will not count toward the degree. They must include at least 18 credit hours beyond the 2000-level. See the Degree Requirements section of this calendar for other general university requirements.

Note: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

Music and Theatre

See BA with Combined Honours in Music and Theatre for specific requirements of this specialized degree program.

BA (120 credit hour) Major in Theatre

A student may take a 120 credit hour Major program in Theatre (Acting, Stage Design and Technical Theatre, or Theatre Studies) following consultation with the Associate Director (Theatre).

Students wishing to take a 120 credit hour Major in Theatre (Costume Studies) must take the following courses:

Year 1
• PERF 1000.03: Introduction to Performance Studies
• PERF 1002.03: Writing About Stage and Screen
• THEA 1450X/Y.06: Introduction to Costume Studies
• Plus 18 elective credit hours

Year 2
• THEA 2011.03: Ancient and Medieval Theatre
• THEA 2012.03: Early Modern Theatre
• THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
• THEA 2402.03: Castle to Cafe - Dress from 1450 to 1700
• THEA 2406X/Y.06: The Aesthetics of Contemporary Dress
• THEA 2412.03: Language of Design
• THEA 2451X/Y.03: Costume in Performance I
• Plus 6 elective credit hours

Year 3
• THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1878
• THEA 3403.03: Bustles to Boardroom - Dress from 1870 to Modern Day
• THEA 3451X/Y.06: Costume in Performance II
• THEA 3454.03: Body-Shaping Through Historical Tailoring II
• THEA 3455.03: Body-Shaping Through Historical Tailoring I
• Plus 12 elective credit hours

Year 4
• THEA 3501.03: Modern Theatre 1: Realism and Response
• THEA 3502.03: Modern Theatre 2: High Modernism
• THEA 4450.03: Costume Technology
• THEA 4452.03: The Sculpture of Dress
• Plus 18 elective credit hours

Major in Theatre and another subject

As in the case of a BA with Combined Honours, it is also possible to set up a Double Major in Theatre and another subject. In this case, a student must complete at least THEA 2011.03, THEA 2012.03, THEA 3501.03, and THEA 3502.03 and fulfil at least the minimal requirements for a three year BA. They must have the required distribution of courses in the two majoring subjects as outlined in the Degree Requirements section of this Calendar.

NOTE:

For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 2911.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924 (Special Topics in Theatre and Cinema).

BA or BSc (120 credit hour) Double Major in Theatre
BA (120 credit hour) Double Major Including Theatre
Dalhousie and University of King's College students can combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Double Major degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors.

In principle, a student who wishes to graduate with this degree must complete at least THEA 2011.03, THEA 2012.03, THEA 3501.03, and THEA 3502.03 and must fulfil at least the minimal requirements for a three year BA. They must have, in the two subjects combined, the required distribution of courses for a BA (120 credit hour) Double Major degree. As a result, the degree will consist of a minimum of 30 and a maximum of 48 credit hours in Theatre beyond the 1000-level. These credits must include at least 18 credit hours beyond the 2000-level in THEA. See the Degree Requirements section of this calendar for other general university requirements.

Note: For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

BA (90 credit hour) Minor in Theatre
This degree is designed for students who want to take a number of courses in Theatre, would like to acquire a broad and varied knowledge of its various aspects, or are not interested in specializing. Students are encouraged to take PERF 1000.03: Introduction to Performance Studies and PERF 1002.03: Writing About Stage and Screen, or equivalent credit hours, and six additional credit hours in THEA at the 1000 level, although these do not count toward the minor.

See the Minor in Theatre section of this Calendar.

NOTE:

For historical reasons, many classes with FILM codes are crosslisted as THEA. However, no such class will count toward any Theatre degree, with the exception of FILM 2911.03/THEA 2911.03 (Stars and Stardom on Stage and Screen), FILM 3314.03/THEA 3314.03 (Shakespeare and his Contemporaries on Film), and FILM 4393.03/THEA 4924.03 (Special Topics in Theatre and Cinema).

Costume Studies, Diploma in two years

The Diploma in Costume Studies is an intensive two-year qualification intended primarily for students who have completed a Bachelor's degree at a recognized university. Students who have completed at least two full years of successful study at a recognized university may be considered for the Diploma on a case-by-case basis. After successful completion of this program, students may upgrade their DCS to a BA in Theatre (Costume Studies). Students pursuing the Diploma in Costume Studies are required to combine the courses in the following manner:

Year 1

- PERF 1000.03: Introduction to Performance Studies
- PERF 1002.03: Writing About Stage and Screen
- THEA 1450X/Y.06: Introduction to Costume Studies
- THEA 2401.03: Cave to Castle - Dress from Prehistory to 1450
  THEA 2402.03: Castle to Café - Dress from 1450 to 1700
- THEA 2406X/Y.06: The Aesthetics of Contemporary Dress
- THEA 2412.03: Language of Design
- THEA 2451.03: Costume in Performance I

Year 2

- THEA 3402.03: Baroque to Bustles - Dress from 1700 to 1870
  THEA 3403.03: Bustles to Boardroom - Dress from 1870 to Modern Day
- THEA 3451X/Y.06: Costume in Performance II
- THEA 3454.03: Body Shaping Through Historical Tailoring II
- THEA 3455.03: Body Shaping Through Historical Tailoring I
- THEA 4406X/Y.06: The Aesthetics of Historical Dress
- THEA 4450.03: Costume Technology
- THEA 4452.03: The Sculpture of Dress

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PERF 1000 Introduction to Performance Studies
CREDIT HOURS: 3
What is performance, and who counts as a performer? Why is performance one of the most ancient and durable aspects of human community and interaction? Why do we adore certain performers and despise others? How are performers and their choices shaped by their societies, and vice versa? This course will explore these questions by looking at some of the vital roles fulfilled by theatrical, musical, and cinematic performers in global societies, both ancient and modern. Via readings of articles and plays as well as in-class screenings of film and video performances, it will consider the performer's role in shaping, embodying, and questioning societies' conceptions of beauty, morality, religious faith, gender, race, ethnicity, social class, and more.
CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.
EXCLUSIONS: THEA 1000X/Y.06
FORMATS: Lecture | Tutorial

PERF 1002 Writing About Stage and Screen
CREDIT HOURS: 3
This course introduces the fundamentals of communication in an academic environment, specifically in relation to writing about stage and screen. It challenges you to improve your ability to describe, persuade, analyze and theorize on paper and aloud, with an emphasis on writing. It also examines the variety of sources used in writing about stage and screen. Writing, editing and revising are difficult; no one ever "finishes" learning to write, but you will improve your writing over the course of the year.
CALENDAR NOTES: PERF 1000.03 and PERF 1001.03 or PERF 1000.03 and PERF 1002.03 satisfies the Arts and Science Writing requirement.
PREREQUISITES: PERF 1000.03
EXCLUSIONS: THEA 1000.03, THEA 1300.03
FORMATS: Lecture | Tutorial

THEA 1051 Introduction to Theatre Organization and Stagecraft Part 1
CREDIT HOURS: 3
This course is designed to provide a background in the technical aspects of theatre and live performance by taking students behind the scenes to understand how a play is brought to life. The worlds of scenic design, scenic carpentry, props, sound, lighting, and stage management are explored in a lecture-based setting. An understanding of the common language of theatre and the development of an appreciation for the work that happens behind the scenes is the primary focus of this class.
CALENDAR NOTES: THEA 1051.03 and THEA 1052.03 must be taken within the same academic year.
EXCLUSIONS: THEA 1050
FORMATS: Lecture

THEA 1052 Introduction to Theatre Organization and Stagecraft Part 2
CREDIT HOURS: 3
Building on the work completed in THEA 1051, student will work in the Fountain School theatres and shops for labs in each of the main areas of scenic carpentry, props, sound, lighting, and scenic painting. Students are required to work on one Fountain School stage production which may include some evening and weekend work.
CALENDAR NOTES: THEA 1051.03 and THEA 1052.03 must be taken within the same academic year.
PREREQUISITES: THEA 1051
EXCLUSIONS: THEA 1050
FORMATS: Lecture | Lab

THEA 1450 Introduction to Costume Studies
CREDIT HOURS: 6
This course serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Program. This course includes a theatre component. This course is a prerequisite for all other Costume Studies courses.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
FORMATS: Lecture | Lab

THEA 1800 Introduction to Acting and Performance
CREDIT HOURS: 6
This course is designed to provide the beginning acting student with an understanding of what it is to act, and to introduce some basic performance techniques. The approach will be practical, focusing on three major aspects of the craft: Space, Character, and Action. Each unit will be comprised of exercises and scene study, with scripts drawn from classical and contemporary plays. Exercises and explorations in class, requiring full-bodied participation and commitment, are centred on group work and ensemble play, which will strengthen communication and teamwork, as well as develop improvisational skills. Students will challenge themselves physically, vocally and imaginatively, while working with others to create an ensemble and a trusting, dynamic environment.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms.THEA 1800X/Y.06 is the pre-requisite for an audition for

the Acting Program.
RESTRICTIONS: Students cannot register THEA 1800 and THEA 2000 at the same time.
FORMATS: Lecture | Lab

THEA 2011 Ancient and Medieval Theatre
CREDIT HOURS: 3
This course gives students an opportunity to study the dramatic literature, staging practices, and theoretical foundations of the early history of theatre. Specific topics covered include ancient Greek, Roman, and medieval European performance, as well as classical Asian theatres. Although there is no formal prerequisite for the course, students should normally be in their second year of study. A background in theatre, history, and/or dramatic literature will be an advantage.
FORMATS: Lecture | Seminar

THEA 2012 Early Modern Theatre
CREDIT HOURS: 3
This course is in a sense the sequel to THEA 2011.03, though that course is not a prerequisite. It aims to study the development of dramatic literature, staging practices, and criticism from the Renaissance, Neoclassical, and Romantic eras of theatre. There is no formal prerequisite, but students should normally be in at least the second year of study. A background in history, theatre and/or dramatic literature will be an advantage.
FORMATS: Lecture | Seminar

THEA 2020 Jazz Dance (Spring Session Only)
CREDIT HOURS: 6
This course is a practical exploration into the Luigi Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and vocabulary.
CROSSLISTED: MUSC 2130.06
FORMATS: Lecture | Lab

THEA 2060 Technical Theatre 1
CREDIT HOURS: 6
This course builds on the fundamental knowledge acquired in THEA 1051 and THEA 1052 and is a supplement to THEA 2070 Performance Technology 1. Students begin to explore the variety of elements that make up the world of technical theatre. Labs in each of the main areas of scenic carpentry, props, lighting, sound, scenic painting, and stage management provide the hands-on learning environment required to build skill level in each of these areas.
CALENDAR NOTES: It is highly recommended that students take THEA 2412 concurrently with this class. Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 2070X/Y.06
PREREQUISITES: THEA 1052.03
FORMATS: Lecture | Lab

THEA 2070 Performance Technology 1
CREDIT HOURS: 6
This course is the practical application of the work completed in THEA 2060 and is the production component of the Technical Theatre program. Students choose four areas of concentration (scenic carpentry, props, lighting, sound, scenic painting, stage management) and form the crew for all Fountain School stage productions over the course of the year. Emphasis will be placed on collaboration, craftsmanship, and professionalism. This course will require work outside of class time, on evenings and weekends.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: THEA 2060X/Y.06
PREREQUISITES: THEA 1052.03
FORMATS: Lab
LAB HOURS PER WEEK: 6

THEA 2214 Shakespeare
CREDIT HOURS: 6
An introduction to Shakespeare’s career as a playwright, through discussion and interpretation of a dozen or more of his plays.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03 or ENGL 1040.03; or THEA 1000X/Y.06, or PERF 1000.03 and PERF 1002.03; or the King's Foundation Year Program
CROSSLISTED: ENGL 2214.06
FORMATS: Lecture | Discussion

THEA 2215 Young Shakespeare
CREDIT HOURS: 3
This course explores some of the works of William Shakespeare written or performed before 1600. Plays to be studied may include Richard III, Henry IV Parts I and II, Henry V, Titus Andronicus, The Taming of the Shrew, A Midsummer Night's Dream, Love's Labour's Lost, The Merchant of Venice, Romeo and Juliet, Much Ado about Nothing and Hamlet; poetry may include Venus and Adonis, The Rape of Lucrece and some of the sonnets. We will attend to how Shakespeare learned his craft through experimentation and cross-fertilization in the larger context of the rhetorical and theatrical culture of sixteenth-century London.
PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.
CROSSLISTED: ENGL 2215.03
EXCLUSIONS: ENGL 2214/ THEA 2214
FORMATS: Lecture

THEA 2216 Shakespeare at the Globe
CREDIT HOURS: 3
During the years after the Globe Theatre was built on the banks of the Thames, Shakespeare's company performed some of his best-known theatrical works. Plays to be

studied may include Twelfth Night, As You Like It, Troilus and Cressida, Measure for Measure, Othello, King Lear, Antony and Cleopatra, Macbeth, Coriolanus, The Winter's Tale, Cymbeline, and The Tempest. Focusing on Shakespeare's career after 1600, this course explores Shakespeare's mature works in their historical and cultural contexts.
PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.
CROSSLISTED: ENGL 2217.03
EXCLUSIONS: ENGL 2214.06/THEA 2214.06
FORMATS: Lecture

THEA 2229 Tragedy
CREDIT HOURS: 3
This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as: how has tragedy changed over time, and what is tragicomedy.
PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.
CROSSLISTED: ENGL 2229.03
EXCLUSIONS: ENGL 2226.06
FORMATS: Lecture | Discussion

THEA 2401 Cave to Castle - Dress from Prehistory to 1450
CREDIT HOURS: 3
An introduction to the study of human social behaviour and its relationship to the development of body coverings, this lecture-based survey class begins with the earliest Mediterranean cultures, Ancient Egypt, Greece and Rome, and continues through to the late middle ages in Western Europe. We will look at the evolution of clothing and the intersections of environment, culture and politics that shaped human body adornment and dress practices from the beginning of recorded history through the Crusades and beyond. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This course is open to students in any undergraduate program, and it is also part of the Costume Studies Program.
PREREQUISITES: Students in programs other than Costume Studies must have completed a writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, or PERF 1000.03 and PERF 1002.03, THEA 1450X/Y.06. For Diploma in Costume Studies: See Costume Studies course combinations.
CROSSLISTED: HIST 2401.03
EXCLUSIONS: THEA 2400.06
FORMATS: Lecture | Discussion

THEA 2402 Castle to Café - Dress from 1450 to 1700
CREDIT HOURS: 3
Continuing on from THEA 2401.03, this course is an introduction to the study of human social behaviour and its relationship to the development of body coverings. This lecture-based survey class begins with the transition from the European middle ages to the northern renaissance, and continues through to the end of the seventeenth century. We will examine the evolution of clothing and the intersections of environment, culture and politics that bring us from the rise of corsetry to the arrival of the three-piece suit. The primary focus is on Western Europe, but students will have opportunity to explore other regions of the world in lecture and in the term paper. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This course is open to students in any undergraduate program, and it is also part of the Costume Studies Program.
COREQUISITES: For BA Theatre (Costume Studies): THEA 3451.03, THEA 3454.03, THEA 3455.03 For Diploma in Costume Studies: see Costume Studies course combinations in calendar.
PREREQUISITES: PREREQUISITES: Students in programs other than Costume Studies must have completed a writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06 or PERF 1000.03 and PERF 1002.03, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03. For Diploma in Costume Studies: see Costume Studies course combinations in calendar.
CROSSLISTED: HIST 2402.03
EXCLUSIONS: THEA 2400.06, THEA 4400.06
FORMATS: Lecture | Discussion

THEA 2406 The Aesthetics of Contemporary Dress
CREDIT HOURS: 6
By examining the aesthetics of contemporary dress, this course will enable the student to understand established systems used to create clothing, utilizing body image as principle means. Through the study and application of systematic principles, the student will gain a better understanding of people’s need to define body image in terms of ornamental self-expression and social identification. This course is part of the Costume Studies Program.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 2412.03 and THEA 2451.03
PREREQUISITES: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, or PERF 1000.03 and PERF 1002.03, THEA 1450X/Y.06. For Diploma in Costume Studies: See Costume Studies course combinations http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html
RESTRICTIONS: Costume Studies degree or diploma students only
FORMATS: Lecture | Lab

THEA 2412 Language of Design
CREDIT HOURS: 3
This course explores components of costume and set design, offering a discourse on design language, colour theory, structure and decoration as they relate to design for the theatre. Through lecture and practical application, the student will learn basic techniques and conventions of design, how to interpret scripts, and develop basic abilities in visual composition, water media and drafting. This course may be taken by general BA students and is also a part of the Costume Studies and Technical Theatre Programs.
COREQUISITES: THEA 2406.06 Costume Studies students only
PREREQUISITES: General BA Writing Requirement, BA Theatre (Costume Studies) THEA 1000.06 or PERF 1000.03 and PERF 1002.03, and THEA 1450.06x/y; for BA (Technical Theatre) THEA 1000.06 or PERF 1000.03 and PERF 1002,03, and THEA 1050.06x/y
EXCLUSIONS: THEA 2411.03
FORMATS: Lecture

THEA 2451 Costume in Performance I
CREDIT HOURS: 3
In this year the student will apply the knowledge from THEA 1450X/Y to research, illustrate and create modern and historical costume designs for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation. This course is part of the Costume Studies Program.
COREQUISITES: THEA 2411 and 2406; For Diploma in Costume Studies Students: THEA 1450.06, THEA 2400.06, THEA 2406.06, THEA2411.03, TEXL 2000 (NSCAD), TEXL 2100 (NSCAD)
PREREQUISITES: For BA in THEA (Costume Studies) Students: THEA 1000.06, or PERF 1000.03 and PERF 1002.03, THEA 1450.06
RESTRICTIONS: Limited to BA in Theatre (Costume Studies) and Diploma in Costume Studies students
FORMATS: Lecture

THEA 2710 Stage Design 1
CREDIT HOURS: 3
This course extends the expertise in set design developed in THEA 2412.03 to further examine the foundations of design and drawing and text analysis and research as it relates to theatrical sets. Through applied projects students will explore three-dimensional space development, sight lines and model building. Assignments will emphasize practical skills and will culminate in a full design process.
PREREQUISITES: For BA Theatre (Stage Design and Technical Theatre): THEA 1000.06 or PERF 1000.03 and PERF 1002.03, THEA 1051.03 and 1052.03, and THEA 2412.03
FORMATS: Lecture

THEA 2800 Acting II
CREDIT HOURS: 6
The second year of the Acting Program introduces students to performance approaches that range from the classical to the contemporary. Students will receive a strong foundation in classical theatre methods through detailed exploration of heightened texts such as those of William Shakespeare. Using these texts, students will uncover performance clues embedded in the playwrights' writing in order to inspire characterization, action, and dramatic context. Students will also receive a foundation in devised theatre creation through exploration of central principles such as collaboration, style, and ensemble. Throughout the course, emphasis is placed on discipline, dedication to craft, and how to become an informed and vital contributor to the creative process.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 2820X/Y.06, THEA 2810X/Y.06
PREREQUISITES: THEA 1800X/Y.06 and audition
FORMATS: Lecture | Lab

THEA 2810 Voice and Speech II
CREDIT HOURS: 6
This course focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 2800X/Y.06, THEA 2820X/Y.06
PREREQUISITES: THEA 1800X/Y.06 and audition
FORMATS: Lecture | Lab

THEA 2820 Dance and Movement II
CREDIT HOURS: 6
The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of jazz dance. This is manifest through a practical exploration of the Luigi jazz dance technique, incorporating the use of space, rhythm, and correct body alignment. Students are expected to develop a working vocabulary of dance terminology.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 2800X/Y.06, THEA 2810X/Y.06
PREREQUISITES: THEA 1800X/Y.06 and audition
FORMATS: Lecture | Lab

THEA 2901 Production Dramaturgy
CREDIT HOURS: 3
This course introduces students to the dramaturgical work of dramaturges and directors in the theatre. Students will learn skills including the presenting of research, the preparation of playtexts, the adapting of playtexts for new theatrical contexts, and the creation of theatrical seasons and programs.
PREREQUISITES: THEA 1000.06, or PERF 1000.03 and PERF 1002.03 or permission of the instructor
EXCLUSIONS: THEA 2900.06
FORMATS: Lecture | Discussion

THEA 2902 Play Analysis for Directing
CREDIT HOURS: 3
This course introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.
PREREQUISITES: THEA 1000.06, or PERF 1000.03 and PERF 1002.03 or permission of the instructor
EXCLUSIONS: THEA 2900.06
FORMATS: Lecture | Seminar

THEA 2911 Stars and Stardom on Stage and Screen
CREDIT HOURS: 3
What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.
CROSSLISTED: FILM 2911.03
FORMATS: Lecture | Discussion

THEA 3015 Renaissance Drama
CREDIT HOURS: 3
This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary and John Ford.
PREREQUISITES: Completion of 6.0 credit hours at the 1000 level in ENGL, CRWR, KING or PERF.
CROSSLISTED: ENGL 3015.03
FORMATS: Lecture | Discussion

THEA 3060 Technical Theatre 2
CREDIT HOURS: 6
This course builds on the work completed in THEA 2060 and is a supplement to THEA 3070 Performance Technology 2. Students explore, in greater depth, the variety of elements that make up the world of technical theatre. Labs in each of the main areas of scenic carpentry, props, lighting, sound, scenic painting, and stage management provide the hands-on learning environment required to build skill level in each of these areas.
CALENDAR NOTES: It is highly recommended that students have completed THEA 2412.03 before taking this class. Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 3070X/Y.06
PREREQUISITES: THEA 2060X/Y.06
FORMATS: Lecture | Lab

THEA 3070 Performance Technology 2
CREDIT HOURS: 6
This is an advanced course in production technology and the practical application of the work completed in THEA 3060.03. Students work intensively in two main areas of concentration (scenic carpentry, props, lighting, sound, scenic painting, stage management) and form the crew for two Fountain School stage productions over the course of the year. Emphasis will be placed on effective leadership, collaboration, craftsmanship, and professionalism. This course will require work outside of class time, on evenings and weekends.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
COREQUISITES: THEA 3060X/Y.06
PREREQUISITES: THEA 2070X/Y.06
FORMATS: Lab
LAB HOURS PER WEEK: 6

THEA 3200 The Director in the Theatre
CREDIT HOURS: 6
This course explores in theoretical and practical terms the various functions of the director in creating a theatrical event. Topics include the historical role of the director, conceptualizing scripts, working with a dramaturge, relationships with actors, and the script development process. Laboratory exploration of practical problems related to the above topics will form an integral part of the course.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
PREREQUISITES: THEA 2901.03, THEA 2902.03, and permission of instructor
FORMATS: Lecture | Lab

THEA 3314 Shakespeare and his Contemporaries on Film
CREDIT HOURS: 3
This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.
PREREQUISITES: Experience in Shakespeare at any level OR experience in Film Studies at any level.
CROSSLISTED: ENGL 3314.03, FILM 3314.03
EXCLUSIONS: THEA 2313.03, ENGL 2313.03
FORMATS: Lecture | Seminar

THEA 3402 Baroque to Bustles - Dress from 1700 to 1870
CREDIT HOURS: 3
This is a mixed lecture and seminar-style survey course which will trace the development of dress through the eighteenth and nineteenth centuries, showing its evolution from the period when the fashion aesthetic was determined by the Courts, to the rise of Victorian dress reform movements and the era of mass-media advertising. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This class is open to students in all undergraduate programs, and is also part of the Costume Studies program.
COREQUISITES: For BA in Theatre (Costume Studies): THEA 3451.03, THEA 3454.03, THEA 3455.03 For Diploma in Costume Studies, see Costume Studies course combinations in calendar.
PREREQUISITES: Students in programs other than Costume Studies must have completed a writing requirement. FORMATS: Lecture | Seminar

THEA 3403 Bustles to Boardroom - Dress from 1870 to Modern Day
CREDIT HOURS: 3
Continuing on from THEA 3402.03, this is a mixed lecture and seminar-style survey course which will trace the development of dress through the late nineteenth, twentieth and early twenty-first centuries. The lectures follow the evolution of human fashion from corsets and crinolines to the rise of modern subcultures and style tribes. Due to the vast breadth of the subject matter this class will focus most in-depth on the Western world, but students are encouraged to explore costume from other regions as individual research topics. Our emphasis will be on using primary sources to gain a solid understanding of the social and cultural importance of forms of historical dress alongside the visual and practical components. This class is open to students in any undergraduate degree program, and it is part of the Costume Studies program.
COREQUISITES: For BA in Theatre (Costume Studies): THEA 3451.03, THEA 3454.03, THEA 3455.03 For Diploma in Costume Studies: see Costume Studies course combinations in calendar. EXCLUSIONS:

THEA 3451 Costume in Performance II
CREDIT HOURS: 6
In this course students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. Fountain School productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This course is part of the Costume Studies Program.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: THEA 3401, THEA 3454, THEA 3455
PREREQUISITES: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03. For Diploma in Costume Studies: See Costume Studies course combinations

THEA 3454 Body-Shaping Through Historical Tailoring II
CREDIT HOURS: 3
This course introduces the student to the process of tailoring as it originated in the Renaissance, and its development down to the twentieth century. Emphasis is placed on the purpose of underpaddings, understructures and the techniques of fixing them in place. This course is part of the Costume Studies Program.
COREQUISITES: THEA 3401, THEA 3451, THEA 3455
PREREQUISITES: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, or PERF 1000.03 and PERF 1002.03, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, 2451X/Y.03For Diploma in Costume Studies: See Costume Studies class combinations.
RESTRICTIONS: Costume Studies degree or diploma students only.

THEA 3455 Body-Shaping Through Historical Tailoring I
CREDIT HOURS: 3
The "Systems" of Pattern Drafting from the early nineteenth century to the twentieth century. Utilizing traditional tailoring techniques, the process of creating professional tailored garments is studied in detail. This course is part of the Costume Studies Program.
COREQUISITES: THEA 3401, THEA 3451, THEA 3454
PREREQUISITES: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03.For Diploma in Costume Studies: See Costume Studies course combinations.
RESTRICTIONS: Costume Studies degree or diploma students only.
FORMATS: Lecture | Lab

THEA 3501 The Modern Theatre 1: Realism and Responses
CREDIT HOURS: 3
From the 1870s until the coming of the First World War, the theatre underwent a series of radical transformations. This course explores the key theatrical movements of this period, including realism, naturalism, symbolism, and expressionism, and compares the theories behind them to the plays, stagecraft, and performance techniques they produced.
PREREQUISITES: THEA 2011.03 and THEA 2012.03 or permission of the instructor
CROSSLISTED: ENGL 3501.03
EXCLUSIONS: THEA 3500 X/Y.06
FORMATS: Lecture | Seminar | Discussion

THEA 3502 The Modern Theatre 2: High Modernism
CREDIT HOURS: 3
From the close of WW1 to the 1960s, theatrical modernists sought new artistic forms for a rapidly changing world. This course introduces students to major forms of theatrical modernism from Dada and Theatre of Cruelty through Epic Theatre and Biomechanics to Absurdism, and considers their legacy for the contemporary stage.
PREREQUISITES: THEA 3501.03 or Permission of the Instructor
CROSSLISTED: ENGL 3502.03
EXCLUSIONS: THEA 3500 X/Y.06
FORMATS: Lecture | Seminar

THEA 3600 The Playwright in the Theatre
CREDIT HOURS: 6
This course studies the play as a vehicle for performance rather than as a literary work. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: THEA 2901.03 and THEA 2902.03, or permission of the instructor
FORMATS: Lecture | Lab

THEA 3731 Greek Drama: Tragedy I
CREDIT HOURS: 3
A study of the Greek tragedians Aeschylus, Sophocles, and Euripides, in English translation.
CROSSLISTED: CLAS 3731
EXCLUSIONS: CLAS 3730, CLAS 3515

THEA 3761 Modern German Drama I
CREDIT HOURS: 3
An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.v. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as back-up.
CALENDAR NOTES: This course is the first part of the former full-year course THEA 3751X/Y.06. This course description reflects the entirety of the pair (THEA 3761.03 and THEA 3762.03).
CROSSLISTED: GERM 3751.03
EXCLUSIONS: THEA 3751.06XY, GERM 3750.06XY
FORMATS: Seminar

THEA 3762 Modern German Drama II
CREDIT HOURS: 3
An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.v. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as back-up.
CALENDAR NOTES: This course is the second part of the former full-year course THEA 3751X/Y.06. This course description reflects the entirety of the pair (THEA 3761.03 and THEA 3762.03).
CROSSLISTED: GERM 3752.03
EXCLUSIONS: THEA 3751XY.06, GERM 3750XY.06
FORMATS: Seminar

THEA 3800 Acting III
CREDIT HOURS: 6
This course aims to strengthen the actor's instrument and creative response, while further developing acting technique through practical experience in Mask, Mime and Period Study. "Actioning" is expanded upon to include Script Analysis, with materials being drawn from classical and contemporary texts, ensuring that the 'inner' work of characterization feeds the 'outer' work, and vice versa.
CALENDAR NOTES: Students taking these courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03
PREREQUISITES: THEA 2800X/Y.06, THEA 2820.X/Y.06, THEA 2810X/Y.06 and permission of the Acting Faculty.
FORMATS: Lecture | Lab

THEA 3810 Voice and Speech III
CREDIT HOURS: 6
This course is a continuation of 2810X/Y.06. Emphasis is on freeing the voice by combining newly developed skills that constitute "good use": releasing the mind and body; aligning the spine, and accessing primary breathing muscles. Attention is paid to vocal support, clarity of the sound, flexibility and range, and the power behind the sound. A voice warm up is designed and instructed by each student. Ways of accessing oral, nasal and pharyngeal cavities are explored. Phonetics, speech and accents/dialects are introduced. Much of the work involves application to a variety of texts.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: THEA 3800X/Y.06, THEA 3820X/Y.06, MUSC 1081.03
PREREQUISITES: THEA 2800X/Y.06, THEA 2810X/Y.06, THEA 2820X/Y.06, and permission of the Acting Faculty
FORMATS: Lecture | Lab

THEA 3820 Dance and Movement III
CREDIT HOURS: 6
The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of Jazz Dance. This is manifest through the continued practical exploration of the Luigi Jazz Dance Technique. Emphasized are the performer's building blocks: a strong body alignment, a healthy stretching regimen, and an expanding skill repertoire. Explorations commence into dance choreography and performance.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: THEA 3800X/Y.06, THEA 3810X/Y.06, MUSC 1081.03
PREREQUISITES: THEA 2800X/Y.06, THEA 2810X/Y.06, and THEA 2820X/Y.06, and permission of the Acting Faculty
FORMATS: Lecture | Lab

THEA 3911 Gender in Theatre: A Cross-Cultural Survey
CREDIT HOURS: 3
This course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in

which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of "gender" itself. The main objective of the course will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.
CROSSLISTED: GWST 3911.03
FORMATS: Lecture | Discussion

THEA 3912 Gender Theory and Contemporary Performance
CREDIT HOURS: 3
This course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Judith Halberstam, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in gender roles are created, maintained, questioned and changed in contemporary culture(s).
CROSSLISTED: GWST 3912.03
FORMATS: Lecture | Discussion

THEA 3913 English Drama 1660-1800
CREDIT HOURS: 3
A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.
PREREQUISITES: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, or THEA 1000X/Y.06 or PERF 1000.03 and PERF 1002.03; or the King's Foundation Year Program
CROSSLISTED: ENGL 3020.03
EXCLUSIONS: ENGL 3225.06
FORMATS: Lecture | Discussion

THEA 3914 Topics in Italian Drama and Spectacle
CREDIT HOURS: 3
This course focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The course is held in English but Italian majors will be required to read the texts in the original.
CROSSLISTED: ITAL 3700.03
FORMATS: Lecture

THEA 4060 Production Techniques 1
CREDIT HOURS: 6
This course provides the student with the opportunity to specialize in one or two areas of concentration (scenic carpentry, props, lighting, sound, scenic painting). Working with mentors, the student works on advanced projects designed to raise the level of expertise in the chosen concentration. In this primarily self-directed study, students should expect to dedicate a minimum of 10 hours/week outside of class time.
COREQUISITES: THEA 4070
PREREQUISITES: THEA 3060.06
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

THEA 4070 Advanced Production Specialization
CREDIT HOURS: 6
This fourth year technical production class will provide students the opportunity to expand their knowledge and experience with advanced work on one of the five Fountain School stage productions or with a placement in a professional theatre company. External mentors and Fountain School instructors will guide the students in their areas of concentration. The instruction in this class will vary from year to year based on the Fountain School stage season. This course will require work outside of class time, on evenings and weekends.
COREQUISITES: THEA 4060.06
PREREQUISITES: THEA 3070.06
FORMATS: Lab | Seminar
LAB HOURS PER WEEK: 6

THEA 4101 Short Apprenticeship
CREDIT HOURS: 3
Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 – 60 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed.
PREREQUISITES: Permission of the Fountain School
RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.
EXCLUSIONS: There are no exclusions, but students who have completed THEA 4102.06 will not be prioritized if they apply for THEA 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

THEA 4102 Long Apprenticeship
CREDIT HOURS: 6
Students gain practical, workplace experience with an organization appropriate to their course of study. The Long Apprenticeship will represent approximately 100 –

120 hours of work on an approved project with a sponsoring organization. Positions may be paid when appropriate, but this is not guaranteed.
PREREQUISITES: Permission of the Fountain School
RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or Cinema and Media Studies. Applications for apprenticeships will be evaluated by the Associate Director (Theatre) in consultation with FSPA faculty members, who will have final decision about which apprenticeships can be sponsored by the School.
EXCLUSIONS: There are no exclusions, but students who have completed THEA 4102.06 will not be prioritized if they apply for THEA 4101.03 and vice versa. Approval will not be granted for two apprenticeship credits with the same or similar course content.

THEA 4406 The Aesthetics of Historical Dress
CREDIT HOURS: 6
This course examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses as historical source material with a view to re-creating character and dress of the eighteenth and/or nineteenth centuries. This course stresses research and academic skills, along with applied skills. Primary research forms a significant component of this course. This course is part of the Costume Studies Program.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
PREREQUISITES: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06 and PERF 1000.03 and PERF 1002.03, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03, THEA 3401X/Y.06, THEA 3451X/Y.06, THEA 3454.03, THEA 3455.03 For Diploma in Costume Studies, see Costume Studies course combinations in calendar http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html
RESTRICTIONS: Costume Studies degree or diploma students only.
EXCLUSIONS: THEA 3405X/Y.06
FORMATS: Lecture | Lab | Discussion

THEA 4450 Costume Technology
CREDIT HOURS: 3
This course extends the expertise in costume creation developed in THEA 3451.06 to examine techniques of fine finish as students prepare their costume 'masterpiece' for the final Fountain School production. This course is part of the Costume Studies Program.
COREQUISITES: THEA 4452
For Diploma in Costume Studies, see Costume Studies course combinations in calendar http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html
RESTRICTIONS: Costume Studies degree or diploma students only.
FORMATS: Lecture | Lab

THEA 4452 The Sculpture of Dress
CREDIT HOURS: 3
Through the study of draping techniques, this course examines sculptural forms in a human context to facilitate modern and historical costume design. The student works directly on the human body or mannequin to gain proficiency in modelling textiles to shape costume. This course is part of the Costume Studies Program.
COREQUISITES: THEA 4450
For Diploma in Costume Studies, see Costume Studies course combinations in calendar http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html
RESTRICTIONS: Costume Studies degree or diploma students only.
FORMATS: Lecture | Lab

THEA 4500 Canadian Theatre to 1968: Performing the Nation
CREDIT HOURS: 3
Early Canadian theatre offers a fascinating example of a colonial nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.
PREREQUISITES: Permission of the instructor
CROSSLISTED: ENGL 4500.03, CANA 4500.03
FORMATS: Seminar | Discussion

THEA 4501 Canadian Theatre Since 1968: Interrogating Identities
CREDIT HOURS: 3
This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?
PREREQUISITES: Permission of the instructor
CROSSLISTED: ENGL 4501.03, CANA 4501.03
FORMATS: Seminar | Discussion

THEA 4700 Special Topics I
CREDIT HOURS: 6
In this full year seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary

subject in order to investigate it in great detail. The topic is assigned by the Fountain School at the end of the preceding year and is then posted by the Department and in the University's timetable.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.
FORMATS: Seminar

THEA 4735 Advanced Seminar in Baroque Culture
CREDIT HOURS: 6
This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on theatre history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.
PREREQUISITES: Permission of the Fountain School of Performing Arts and/or History Department.
CROSSLISTED: HIST 4162.06, MUSC 4360.06
RESTRICTIONS: 3rd and 4th year students only.
FORMATS: Lecture | Lab

THEA 4800 Acting IV
CREDIT HOURS: 6
The culminating course of the Acting Program focuses on the rehearsal and performance of three Fountain School theatre productions and a Class Project. This course provides students with the opportunity to earn their Honours credit by preparing professional portfolios and audition pieces under the tutelage of the Acting Program faculty. The class project is directed by an Acting Program faculty member and all written requirements for both the Fountain School theatre season and the class project assessed by the Acting Program faculty. In its twofold function, this course is a bridge to the Acting profession.
CALENDAR NOTES: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: THEA 4840X/Y.06
PREREQUISITES: THEA 3800X/Y.06, 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty
FORMATS: Lecture | Lab

THEA 4840 Advanced Performance Techniques
CREDIT HOURS: 6
This fourth-year Acting course is intended to provide production-related and movement instruction that will assist students with developing skills and techniques which can be applied in the Fountain School theatre season as well as in the professional theatre world. Production related instruction may vary from year to year, depending on the specific needs of each Fountain School theatre season.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: THEA 4800X/Y.06
PREREQUISITES: THEA 3800X/Y.06, THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty
FORMATS: Lecture | Lab

THEA 4900 Theory and Criticism of Drama and Theatre
CREDIT HOURS: 6
This is a writing intensive course that tackles the problems of evaluating theatre. It investigates critical strategies of the past and judges today's theatre criticism. Students will practice the craft of criticism and debate the role of theatre theory for contemporary audiences.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
FORMATS: Lecture | Seminar

THEA 4921 Special Topics II
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject, and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and is then posted at the School and in the Faculty's timetable.
FORMATS: Seminar

THEA 4922 Topics in Theatre History
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the field of theatre history and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.
PREREQUISITES: Permission of the instructor
FORMATS: Lecture | Seminar | Discussion

THEA 4923 Topics in Dramatic Literature
CREDIT HOURS: 3
In this seminar course, students focus on a particular topic in the field of dramatic literature and investigate it in a great detail. The topic is assigned by the Fountain School at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.
PREREQUISITES: Permission of the instructor
FORMATS: Lecture | Seminar | Discussion

THEA 4924 Special Topics in Theatre and Cinema
CREDIT HOURS: 3
In this seminar class, students focus on a particular topic relevant to the fields of both theatre and cinema and investigate it in great detail. The topic is assigned by the School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Academic Timetable.
CROSSLISTED: FILM 4393
FORMATS: Lecture | Seminar

THEA 4931 Contemporary Theatre
CREDIT HOURS: 3
This course will deal with the most recent developments in theatre, especially with those post-1970s trends that exercise a broad international influence. Each year, our investigation will begin with a brief look at postmodern theatre and cover topics such as performance art, physical theatre, and postdramatic theatre. The main focus of the course, however, will be dictated by what is currently happening on major stages across the world and may significantly change from one year to another. In the interest of a comprehensive and inclusive approach to the subject, both commercial and experimental theatres will be studied, and we will also examine some relevant works of criticism and theory. Since much of the material required for this course is not yet removed enough from our time to be accessible in scholarly literature, students should be prepared for alternative methods of research.

Introduction
Computer Science is a fundamental multi-disciplinary, high-technology discipline. Computer Science forms an integral and indispensable part of higher education. The Faculty of Computer Science provides high-quality education to our students in all areas of Computer Science and Informatics and conducts excellent research in specific areas of Computer Science, emphasizing major research programs with the support and participation of Industry and Government. Our modern award-winning Computer Science building and state-of-the-art equipment permit Computer Science to conduct primary research in Algorithms, Bioinformatics, Data Mining, Health Informatics, Human Computer Interaction, Information Retrieval, Network Centered Computing, Privacy and Security and Visualization.

The Faculty of Computer Science was formed on April 1, 1997, following the amalgamation of the Technical University of Nova Scotia (TUNS) and Dalhousie University. Its members came from the School of Computer Science at TUNS and the Computing Science Division of the Department of Mathematics, Statistics, and Computing Science at Dalhousie.

Significant growth has occurred in our formative early years. Our graduate and undergraduate programs include imaginative multi-disciplinary programs such as Electronic Commerce, Health Informatics, and Bioinformatics. The most up-to-date information on ongoing programs, ongoing curriculum revision, and general information about the Faculty can be found on our website: http://www.cs.dal.ca.

Academic Regulations

In addition to the regulations below, please see the Academic Regulations section.

Workload

A normal course load is five courses during each study term.

Course Selection

The content of every course that students take to meet degree requirements must represent new material: students may not take courses whose content is largely repetitive of, or more elementary than, a course taken earlier on the same topic, without permission of the Faculty.

Of the 120 credit hours required to complete any CS undergraduate degree, at least 60 must be taken from Dalhousie University.

Computer courses in other departments

Computer courses offered by other departments (e.g., COMM 1502.03, MGMT 1601.03) cannot be taken for credit in the Faculty's degree programs without explicit permission of the Faculty of Computer Science.

Grades

1. Course instructors will describe methods of student evaluation during the first week of each course.
2. Supplementary examinations are not given in Computer Science courses.
3. A grade of at least C is required for a course to satisfy a prerequisite condition for a CSCI/INFX course.
4. A grade of at least C is required in all Computer Science CSCI/INFX core courses to graduate with any Computer Science degree.

Dismissal

A student who meets the conditions for dismissal as outlined in Section 20, Academic Dismissal, of the Academic Regulations will be dismissed from the program. A student who fails more than one co-op work term will be dismissed from the co-op program.

An application for readmission to the program may be considered two terms after dismissal. A student who has been dismissed and who has been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once. A readmitted student is considered to be on probation.

Minors

Computer Science students doing a minor may not use a 2000+ level course to satisfy both a major requirement and a minor requirement. For each course that is explicitly required by both the major and the minor, the choice of an additional course in the minor subject and at the same level or higher must be used to fulfill the duplicate requirement.

Staff

Dean
Rau-Chaplin, A., BCompSc (York), MCompSc, PhD (Carleton)

Associate Deans
Beiko, R., BSc (Dalhousie), PhD (Ottawa)
Blouin, C., BSc (Laval), PhD (Dalhousie)

Undergraduate Administrator
Bolivar, A.
Telephone: (902) 494-2740

Computer Science

Degree Programs
Academic Regulations
For all variations of undergraduate degrees offered by the Faculty of Computer Science:

- of the minimum 57 to maximum 60 credit hours required for all CSCI credit hours required at all levels, at least half must be chosen from Dalhousie CSCI course offerings, and
- of all CSCI credit hours required at the 3000 and 4000 level, at least half must be chosen from Dalhousie CSCI course offerings.

Staff

Professor Emeritus
Shepherd, M., MSc, PhD (Western)
Slonim, J., BSc, MSc (Western), PhD (Kansas)

Professors
Abidi, S., BEng (N.E.D. Univ of Eng & Technology), MS (Miami), PhD (Surrey)
Arnold, D., Diplom Computer Science (Dortmund), MSc (SFU), Dr. rer. nat. (Dortmund)
Beiko, R., BSc (Dalhousie), PhD (Ottawa)
Blouin, C., BSc (Laval), PhD (Dalhousie)
Bodorik, P., BSc (Calgary), MEng, PhD (Carleton)
Brooks, S., BSc (Brock), MSc (UBC), PhD (Cambridge)
Heywood, M., PhD (Essex)
Janssen, J., MSc (Eindhoven), PhD (Lehigh), cross appointment with Department of Mathematics and Statistics
Keselj, V., BSc (Belgrade), MMath, PhD (Waterloo)
Klein, R., BA (SUNY at Stony Brook, MA, PhD (Oregon), cross appointment with Department of Psychology and Neuroscience
Matwin, S., MSc, PhD (Warsaw), DSc (Pol. Acad of Sci)
Milios, E., Dipl.Eng. (National Tech. Univ.), SM&EE, PhD (MIT)
Rau-Chaplin, A., BCompSc (York), MCompSc, PhD (Carleton)
Sampalli, S., BEng (Bangalore), PhD (Ind. Inst. of Sc.)
Selinger, P.,PhD (Pennsylvania), cross appointment with Department of Mathematics and Statistics
Torgo, L., PhD (Porto)
Trappenberg, T., MSc, PhD (Aachen)
Wach, G., BA (Western Ontario), MSc (South Carolina), PhD (Oxford), cross appointment with Department of Earth Sciences
Watters, C. R., BSc, MSc, MLS (Western Ontario), PhD (TUNS)
Zeh, N., Diplom-Informatiker (Friedrich-Scholler), PhD (Carleton)
Zincir-Heywood, A. N., BSc, MSc, PhD (Ege Univ)

Associate Professors
Blustein, W. J., BSc, MSc, PhD (Western)
McAllister, M., BMath (Waterloo), MS, PhD (UBC)
Oore, S., BSc (Dalhousie), MSc, PhD (Toronto)
Paulovich, F., BSc, MSc (Sao Carlos) PhD (Sao Paulo)
Smit, M., BCS, MCS (Dalhousie), PhD (Alberta), cross appointment with School of Information Management
Reilly, D., BA (Waterloo), BA (McGill), BEd (Queen's), PhD (Dalhousie)
Ye, Q., BEng, MEng (Harbin), PhD (Alberta)

Assistant Professor
Haque, I., BSc (Jahangirnagar), MSc (Concordia), PhD (Alberta)
He, M., BEng (Nanjing), MMath, PhD (Waterloo)
Orji, R., BSc (Nnamadi Azikiwe Univ), MSc (METU), PhD (Saskatchewan)

University Teaching Fellow
Brodsky, A., BMath (Waterloo), MSc, PhD (UBC)

Senior Instructor
Kalyaniwalla, N., BSc (Bombay), MS, PhD (Rensselaer)

Instructor
Abbas, F., BCS (Karachi), MS (Maharishi), MCS (Dalhousie)
Aziz, K., BSc (Lahore), MSC (Singapore), PhD (Vienna Univ of Tech)
Fleming, J., BComm, BA (St. Mary's), MA (Dalhousie)
Hawkey, K., BSc, PhD (Dalhousie)
MacKay, B., BA (Mt. A), PhD (Dalhousie)
Marchand, Y., BCS (Belfort), MCS (Paris), PhD (Compiegne)
Meredith, T., BTech (Ryerson), MMath, PhD (Waterloo)
Mosquera, G., BIT (Clayton), MEC (Dalhousie)
Sampangi, R., BE (Visveswaraya Tech), MTech (Mysore), PhD (Dalhousie)
Siegel, A., BSc (Eckerd), MSc, PhD (Dalhousie)

Bachelor of Applied Computer Science

Faculty Requirements
1000 Level

- CSCI 1110: Introduction to Computer Science
- CSCI 1120: Introduction to Computer Systems
- CSCI 1170: Introduction to Web Design and Development
- CSCI 1800: Society and Technology before Automation
- CSCI 1801: Society and Technology in the Automation Age

2000 Level

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Database Systems
- CSCI 2201: Introduction to Information Security
- CSCI 2170: Introduction to Server Side Scripting
- CSCI 2690: Introduction to Software Projects
- CSCI 2691: Introductory Project

3000 Level

- CSCI 3101: Social, Ethical, and Professional Issues in Computer Science
- CSCI 3130: Introduction to Software Engineering
- CSCI 3160: Designing User Interfaces
- CSCI 3171: Network Computing
- CSCI 3172: Web-Centric Computing
- CSCI 3691: Intermediate Project

4000 Level

- CSCI 4163: Human Computer Interaction
- CSCI 4691: Advanced Project
- Three credit hours of an advanced database course at or above the 3000 level, chosen from an approved list:
    - CSCI 4140: Advanced Database Systems
    - CSCI 4141: Information Retrieval
    - CSCI 4144: Introduction to Data Mining and Data Warehousing
    - CSCI 4145: Cloud Computing
    - CSCI 4146: The Process of Data Science

Other Required Courses:

- MGMT 1301: Multidisciplinary Management I
- MGMT 1302: Multidisciplinary Management II
- MGMT 2303: People, Work, and Organizations: Micro Organizational Behaviour
- six credit hours of Management, Commerce, or Computer Science courses at or above the 3000 level, approved by the Faculty of Computer Science

- 15 credit hours of electives at or above the 1000 level
- 24 credit hours of electives at or above the 2000 level

Other Degree Requirements:

- A maximum of 90 credit hours of Computer Science courses may be taken for the BACS.

Please consult with an advisor in the Faculty of Computer Science when choosing from approved lists. Additional courses may be available but not presently listed above.

Minors for the Bachelor of Applied Computer Science
Students in the Bachelor of Applied Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Available minors are listed in the College of Arts and Sciences section.

The minor requirements are in addition to the normal Bachelor of Applied Computer Science requirements. All 2000+ Computer Science and Management courses used to satisfy BACS requirements may not be counted towards a minor. Students wishing to pursue a minor should consult the relevant department and a Faculty of Computer Science academic advisor.

Co-operative Education Programs
All programs in Computer Science have a Co-operative Education option. This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 at the end of their first year.

Faculty Requirements
Students must complete the following courses before beginning their first work-term:

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Databases

Students must complete three successful work-terms as part of the Applied Computer Science Co-op program. Each work term involves two courses, representing the experiential and academic co-op components:

	Experiential	**Academic**
Work Term 1	CSCI 8781.00 Co-op Work Term 1	CSCI 8791.01: Co-op 1
Work Term 2	CSCI 8782.00 Co-op Work Term 2	CSCI 8792.01: Co-op 2
Work Term 3	CSCI 8783.00 Co-op Work Term 3	CSCI 8793.01: Co-op 3

Entry Points to Bachelor of Computer Science
There are multiple entry points into the Bachelor of Applied Computer Science program.

First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science but may take their courses while residing in other Faculties and transfer to Applied Computer Science prior to graduation.

Students in the Bachelor of Computer Science program who transfer to the Applied Computer Science program within the first two years should be able to complete their requirements without requiring additional time.

Students from institutions that have articulation agreements with the University will be granted advanced standing if they meet the requirements set forth in the agreements.

Students who wish to transfer to the Bachelor of Applied Computer Science program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the Academic Regulations section for the Faculty of Computer Science.

Bachelor of Computer Science

The following regulations apply to students starting the program in September 2010 or after.

Faculty Requirements

1000 Level

- CSCI 1110.03: Introduction to Computer Science
- CSCI 1120.03: Introduction to Computer Systems
- CSCI 1170.03: Introduction to Web Design and Development
- CSCI 1800.03: Society and Technology before Automation
- CSCI 1801.03: Society and Technology in the Automation Age

2000 Level

- CSCI 2100.03: Communication Skills: Oral and Written
- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2112.03: Discrete Structures I
- CSCI 2122.03: Systems Programming
- CSCI 2134.03: Software Development
- CSCI 2141.03: Introduction to Database Systems

3000 Level

- CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 3120.03: Operating Systems
- CSCI 3130.03: Introduction to Software Engineering
- CSCI 3136.03: Principles of Programming Languages
- CSCI 3171.03: Network Computing

Other Required Courses:

- MATH 1000.03: Differential and Integral Calculus I
- three credit hours of Math from the following list:
    - MATH 2040.03: Matrix Theory and Linear Algebra II
    - MATH 2051.03: Problems in Geometry
    - MATH 2080.03: Statistical Methods for Data Analysis and Inference
    - CSCI 2113.03 or MATH 2113.03: Discrete Structures II
    - MATH 2135.03: Linear Algebra
    - MATH 2300.03: Mathematical Modeling
    - MATH 3300.03: Optimization
    - MATH 3330.03: Applied Graph Theory
    - MATH 3400.03: Classical Game Theory
    - Math course selected with permission of the Faculty
- MATH 1030.03: Matrix Theory and Linear Algebra I
- STAT 2060.03: Introduction to Probability and Statistics I
- six credit hours of a science course from the following list
    - CSCI 1107.03: Social Computing
    - CSCI 1108.03: Experimental Robotics
    - BIOL 1010.03: Principles of Biology I
    - BIOL 1011.03: Principles of Biology II
    - CHEM 1011.03: Concepts in Chemistry I
    - CHEM 1012.03: Concepts in Chemistry II
    - ENGI 1103.03: Engineering Design I
    - ERTH 1080.03: Geology I
    - PHYC 1190.03: Introduction to Physics
    - PHYC 1290.03: Introduction to Physics
    - PHYC 1310.03: Physics In & Around You I
    - PHYC 1320.03: Physics In & Around You II
    - PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person
    - PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
- three credit hours in humanities or social science at or above the 1000 level

- six credit hours in business, science, or engineering at or above the 1000 level
- three credit hours in business, science or engineering at or above the 2000 level
- six credit hours of electives of computer science at or above the 3000 level
- nine credit hours of electives of computer science at or above the 4000 level
- six free credit hours of electives at or above the 1000 level
- 18 free credit hours of electives at or above the 2000 level

Bachelor of Computer Science Honours

The purpose of the Honours program is to provide a more challenging degree program that prepares students for graduate school.

To enter the Honours program a student must consult with the Honours Student Advisor and obtain the approval of the Faculty of Computer Science.

Each computer science course at or above the 3000 level must be passed with a grade of at least 2.7 (B-). The cumulative GPA across all courses must be at least 3.0 (B).

The Honours program may be combined with co-op education.

Faculty Requirements
In addition to the normal requirements of the Bachelor of Computer Science degree, course selection must include six courses chosen as follows:

- 15 credit hours of computer science at or above the 4000 level chosen in consultation with the thesis supervisor to ensure that the student has the appropriate background
- CSCI 8873.03 (e.g. successfully complete and present an Honours Thesis)

Students who meet these requirements and who obtain a GPA of 3.7 (A-) or higher in all computer science courses will receive the degree Bachelor of Computer Science with First Class Honours.

Minors for the Bachelor of Computer Science
Students in the Bachelor of Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Available minors are listed in the College of Arts and Sciences section.

The minor requirements are in addition to the normal Bachelor of Computer Science requirements. All 2000+ Computer Science and Math courses used to satisfy Bachelor of Computer Science requirements may not be counted towards a minor. Students wishing to pursue a minor should consult the relevant department and a Faculty of Computer Science academic advisor.

Co-operative Education Programs
All programs in Computer Science have a Co-operative Education option. This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 at the end of their first year.

Faculty Requirements
Students must complete the following courses before beginning their first work-term:

- CSCI 2100: Communication Skills: Written and Oral
- CSCI 2110: Data Structures and Algorithms
- CSCI 2134: Software Development
- CSCI 2141: Introduction to Databases

Students must complete three successful work-terms as part of the Computer Science Co-op program. Each work term involves two courses, representing the experiential and academic co-op components:

	Experiential	Academic
Work Term 1	CSCI 8781.00 Co-op Work Term 1	CSCI 8791.01: Co-op 1
Work Term 2	CSCI 8782.00 Co-op Work Term 2	CSCI 8782.01: Co-op 2
Work Term 3	CSCI 8783.00 Co-op Work Term 3	CSCI 8783.01: Co-op 3

Entry Points to Bachelor of Computer Science
There are multiple entry points into the Bachelor of Computer Science program.

First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science but may take their courses within the BSc first year and transfer to Computer Science at the beginning of their second year.

Students who wish to transfer to the Bachelor of Computer Science program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the Academic Regulations section for the Faculty of Computer Science.

Accreditation and the Profession
Of particular importance to the Faculty is the accreditation of the undergraduate program by the Computer Science Accreditation Council (CSAC), which is responsible for accreditation of computer science programs in Canada. Accreditation provides our graduates with an accelerated path towards achieving the professional designation of Information Systems Professional of Canada (I.S.P.).

The Bachelor of Computer Science, Bachelor of Computer Science with Co-op, Bachelor of Computer Science with Honours, and Bachelor of Computer science with Honours and Co-op are accredited by CSAC.

The co-operative program offers work terms to our students, thus providing an additional link between the Faculty and the Profession.

Bachelor of Science and Bachelor of Arts with Computer Science

Bachelor of Science and Bachelor of Arts degrees with a Major in Computer Science

The Faculty of Computer Science offers Bachelor of Science and Bachelor of Arts degrees with a Major in Computer Science. The programs of study are similar to the Bachelor of Computer Science, but with more flexibility in selection of elective courses. These programs may be of benefit for students who want to use one of them as a basis to enter other professional programs such as Education, Medicine, or Law. However, unlike the Bachelor of Computer Science degree, it does not meet CSAC accreditation requirements.

Faculty Requirements

1000 Level

- CSCI 1110.03: Introduction to Computer Science
- CSCI 1120.03: Introduction to Computer Systems
- CSCI 1170.03: Introduction to Web Design and Development
- CSCI 1800.03: Society and Technology before Automation
- CSCI 1801.03: Society and Technology in the Automation Age

2000 Level

- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2112.03: Discrete Structures I
- CSCI 2122.03: Systems Programming
- CSCI 2134.03: Software Development
- CSCI 2141.03: Introduction to Database Systems

3000 Level

- CSCI 3110.03: Design and Analysis of Algorithms I or CSCI 3111.03: Numerical Linear Algebra
- CSCI 3120.03: Operating Systems
- CSCI 3130.03: Introduction to Software Engineering
- CSCI 3171.03: Network Computing

Other Required Courses:

- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- Remaining requirements for a BA or BSc as set out in the College of Arts and Sciences section of the Undergraduate Calendar.

Double Majors and Combined Honours
The following degree programs are available to students interested in interdisciplinary studies where the larger number of majors credits is Computer Science: Bachelor of Science (120 credit hours) with Double Major, Bachelor of Science (120 credit hours) with Combined Honours, Bachelor of Arts (120 credit hours) Double Major and Bachelor of Arts (120 credit hours) Combined Honours.

Combined Honours

Students interested in taking honours in Computer Science and another subject as a combined program should consult the honours advisor through whom a suitable course of study can be arranged.

A combined honours program may well be an appropriate choice for many students. If a student is contemplating graduate work, it should be borne in mind that the work in either subject of a combined honours program may be insufficient for entry to a regular graduate program, and that a qualifying year may be necessary.

Students who wish to arrange interdisciplinary programs (with fields such as Mathematics, Physics, Psychology, and others) are invited to discuss their interests with the appropriate department and the Undergraduate Chair of the Faculty of Computer Science.

Minor in Computer Science for Non-Computer Science Major BSc
The Minor in Computer Science is available to non-CS students registered in a 120 credit hour major and honours programs. Please see Minor in Computer Science.

Certificates in Computer Science
The following Certificates have been approved for the following Bachelor of Computer Science programs: BCSC, BCSC Co-op, BCSC with Honours, BCSC Honours with Co-op, BCSC Honours Conversion, BCSC Honours Conversion with Co-op:

- Certificate in Artificial Intelligence and Intelligent Systems
- Certificate in Bioinformatics
- Certificate in Communication Technologies and Cyber Security
- Certificate in Data Science
- Certificate in Graphics, Gaming, and Media
- Certificate in Web and Mobile Development
- Certificate in User Experience Design and Evaluation

Interested students are advised to enroll early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Artificial Intelligence and Intelligent Systems
This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and two electives at the fourth year level from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3151: Web Intelligence
- CSCI 3154: AI with Gaming Applications

Elective courses are:

- CSCI 4141: Information Retrieval
- CSCI 4144: Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robots

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Communication Technologies and Cyber Security
This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and three electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3120: Operating Systems
- CSCI 3171: Network Computing

Elective courses are:

- CSCI 3172: Web-Centric Computing
- CSCI 4116: Cryptography
- CSCI 4169: Usable Privacy and Security
- CSCI 4171: Networks and Communications
- CSCI 4174: Network Security
- CSCI 4176: Mobile Computing

Requirements
Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Data Science
This certificate is intended for students completing a Bachelor of Computer Science or a Bachelor of Science in Computer Science, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take three required courses and three electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 4146: The Process of Data Science
- CSCI 4145: Cloud Computing
- One of CSCI 3151: Web Intelligence or CSCI 4125: High Performance Computing

Elective courses are:

- Either CSCI 3151: Web Intelligence or CSCI 4125: High Performance Computing, not taken as a required course
- CSCI 3154: Introduction to Artificial Intelligence with Gaming Applications
- CSCI 4141: Information Retrieval
- CSCI 4144: Introduction to Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robotics
- CSCI 4166: Visualization
- STAT 2080: Statistical methods for Data Analysis and Inference
- STAT 3340: Regression and Analysis of Variance

Requirements
Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Graphics, Gaming, and Media
This certificate is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take three required and two electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3161: Introduction to Computer Graphics with Animation
- CSCI 3162: Digital Media
- CSCI 4168: Game Design and Development

Elective courses are:

- CSCI 3154: AI and Games
- CSCI 4160: Computer Graphics
- CSCI 4166: Visualization
- CSCI 4167: Advanced Computer Animation

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in User Experience Design and Evaluation

This certificate requires a student to complete two compulsory courses, a minimum of one elective course from Group A, and the remaining three elective courses from either Group A or Group B. The minimum number of courses to be completed for this certificate is six and all courses must be completed with a grade of C or better.

Compulsary courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 4163.03: Human Computer Interaction

Group A elective courses are:

- CSCI 4126.03: Ubiquitous Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4260.03: Persuasive Computing Design

Group B elective courses are:

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 4166 03: Visualization
- CSCI 4168.03: Game Design and Development
- CSCI 4176.03: Mobile Computing
- CSCI 3190.03: Community Outreach 1 or CSCI 3691.03 Intermediate Project

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Web and Mobile Development

This certificate requires a student to complete four compulsory and two elective courses with at least a C in each of them.

Required courses are:

- CSCI 3160.03: Designing User Interfaces
- CSCI 3172.03: Web-Centric Computing
- CSCI 4176.03: Mobile Computing
- CSCI 4177.03: Advanced Web Services

Elective courses are:

- CSCI 3151.03: Web Intelligence
- CSCI 4145.03: Cloud Computing
- CSCI 4169.03: Usable Privacy and Security
- CSCI 4171.03: Networks and Communications
- CSCI 4174.03: Network Security

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

General Interest Courses

The Faculty offers a variety of courses that should be of interest to students whose major field of study while at Dalhousie will not be Computer Science.

CSCI 1105.03: Introduction to Computer Programming
CSCI 1107.03: Social Computing
CSCI 1108.03: Introduction to Experimental Robotics
CSCI 1200.03: Introduction to Computing for Non-Majors
CSCI 1206.03: Introduction to Website Creation
CSCI 2201.03: Information Security
CSCI 2202.03: Computer Modeling for Scientists
CSCI 2203.03: Data Science for Everyone

Course Descriptions

CSCI 1100 Computer Science I
CREDIT HOURS: 3
This course provides a general introduction to computer science and the hardware and software of computers. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Algorithmic concepts are stressed.
PREREQUISITES: Nova Scotia PreCalculus or Calculus Math or equivalent
EXCLUSIONS: CSCI 1202.03

CSCI 1101 Computer Science II
CREDIT HOURS: 3
This course is a continuation of CSCI 1100.03. It focuses on programming and linear data structures.
PREREQUISITES: CSCI 1100.03 or INFX 1600.03 or INFX 1604.03

CSCI 1105 Introduction to Computer Programming
CREDIT HOURS: 3
This course provides a general introduction to computer programming. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Procedural programming concepts are stressed.
EXCLUSIONS: INFX 1600X/Y.18, CSCI 1100.03

CSCI 1106 Animated Computing
CREDIT HOURS: 3
This course is a hands-on introduction to two areas of computing: robotics and game design. Students will learn how to program simple robots and will use empirical methods to investigate various aspects of robotics, such as sensors and actuators, uncertainty, knowledge representation,and failure detection and recovery. Students will also learn how to design and develop simple games and will investigate aspects of game design, such as event driven frameworks and collision detection. Students will use empirical methods to investigate the player-centric aspects of game design. Students work in groups to complete small robotics and game design projects.

CSCI 1107 Social Computing
CREDIT HOURS: 3
A hands-on course on technologies and the underlying infrastructure for social computing, including digital collaboration media, social networks and visualization, and their social impact. Students will use various applications, such as Twitter, YouTube, and wikis to examine their functionalities, and explore infrastructure technologies including databases, computer networks and Web-servers that facilitate their execution.

CSCI 1108 Introduction to Experimental Robotics
CREDIT HOURS: 3
This course is an introduction to computing in the real world, experimental evaluation, and basic team work and project management. These themes are explored through the study of the challenges and techniques for modeling, designing, and programming robotic systems to perfom complex tasks in a changing and uncertain environment.
FORMATS: Lecture

CSCI 1110 Introduction to Computer Science
CREDIT HOURS: 3
This course provides a general introduction to computer science and the hardware and software of computers. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Algorithmic concepts, linear data structures are emphasized.
CALENDAR NOTES: This course assumes that the student has some programming experience.
EXCLUSIONS: CSCI 1101.03
FORMATS: Lecture

CSCI 1120 Introduction to Computer Systems
CREDIT HOURS: 3
This course introduces some key concepts in computer systems. Students will learn fundamental systems concepts and apply them to explain how the hardware and software environment affects program behaviour. Topics include data and program representation, program translation, operating systems, software engineering, and networking.
EXCLUSIONS: INFX 1615.03, INFX 1616.03
FORMATS: Lecture

CSCI 1170 Introduction to Web Design and Development
CREDIT HOURS: 3
This course introduces students to key web concepts and skills for designing, implementing, and maintaining web content. Topics include introduction to the Web, UI and UX best practices, hypertext markup languages such as HTML, style sheets, client side programming, multimedia foundations, dynamic content and web content

organization and maintenance.
CALENDAR NOTES: This course assumes that the student has some programming experience.
EXCLUSIONS: CSCI 1206.03, INFX 1606.03
FORMATS: Lecture

CSCI 1200 Introduction to Computing for Non-Majors
CREDIT HOURS: 3
This is a course of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This course is open to Arts and Social Sciences and Health Education students only.
CALENDAR NOTES: This course cannot be counted towards the Bachelor of Commerce or a Minor in Business.
CROSSLISTED: ASSC 1000.03

CSCI 1206 Introduction to Website Creation
CREDIT HOURS: 3
This course introduces students to key web concepts and skills for creating and maintaining websites. This course is intended for students with no formal computer training. Topics include introduction to the Web, hypertext markup languages such as HTML, style sheets, client side programming, multimedia foundations, dynamic content and website organization and maintenance

CSCI 1615 Concepts in Computing
CREDIT HOURS: 3
This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Faculty of Computer Science.
CROSSLISTED: INFX 1615.03
FORMATS: Lecture

CSCI 1616 Applications in Computing
CREDIT HOURS: 3
This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is eligible to partially cover the writing requirement for students in the Faculty of Computer Science.
CROSSLISTED: INFX 1616
FORMATS: Lecture

CSCI 1800 Society and Technology before Automation
CREDIT HOURS: 3
This course examines the reciprocal influences of technology and social, political, and economic institutions from ancient times to the first industrial revolution.
EXCLUSIONS: HSTC 1800.03, HSTC 1200.06, HIST 2074.06 HSTC 2200.06, and SCIE 2000.06
FORMATS: Lecture

CSCI 1801 Society and Technology in the Automation Age
CREDIT HOURS: 3
This course examines the influence of the development of technology on our social, political, and economic institutions in the past 200 years and how it has shaped our roles and responsibilities.
EXCLUSIONS: HSTC 1801.03, HSTC 1200.06, HIST 2074.06, HSTC 2200.06, SCIE 2000.06
FORMATS: Lecture

CSCI 2100 Communication Skills: Oral and Written
CREDIT HOURS: 3
This course is designed to help students become more successful communicators by examining the communication process from both a theoretical and practical viewpoint. Students learn to formulate communication goals, to examine their audience and to deliver accurate, effective messages. Written assignments and oral presentations allow for the development of these skills through practice. Students ultimately learn to communicate effectively and with confidence in a variety of settings.
PREREQUISITES: It is recommended that students have completed their Writing Requirement.
CROSSLISTED: ENGL 2100.03
EXCLUSIONS: COMM 2701.03, COMM 1701.03, COMM 1702.03, MGMT 3602.03

CSCI 2110 Data Structures and Algorithms
CREDIT HOURS: 3
This course provides a comprehensive introduction to data structures and algorithms, including their design, analysis, and implementation. In discussing design and analysis there is a strong emphasis on abstraction. In discussing implementation, general approaches that are applicable in a wide range of procedural programming language are emphasized, in addition to a focus on the details of implementations. Topics include an introduction to asymptotic analysis and a review of basic data structures (stacks, queues, lists, vectors), trees, priority queues, dictionaries, hashing, search trees, sorting (MergeSort, QuickSort, RadixSort) and sets, and graphs (traversals, spanning trees, shortest paths).
PREREQUISITES: CSCI 1101.03 or CSCI 1110.03

CSCI 2112 Discrete Structures I
CREDIT HOURS: 3
See the course description for MATH 2112.03 in the Mathematics section of this calendar.
CROSSLISTED: MATH 2112.03

CSCI 2113 Discrete Structures II
CREDIT HOURS: 3
See the course description for MATH 2113.03 in the Mathematics section of this calendar.
PREREQUISITES: See Mathematics section
CROSSLISTED: MATH 2113.03

CSCI 2114 Mathematical Applications in Computing
CREDIT HOURS: 3
This course explores the applications of differential and integral calculus and linear algebra in Computer Science. Examples of application areas include, but are not limited to, computer graphics and animation, digital media, and machine learning.
PREREQUISITES: MATH 1000.03, MATH 1030.03, CSCI 1110.03

CSCI 2121 Computer Organization with Assembly Language
CREDIT HOURS: 3
This course deals with the fundamentals of computer organization; assembly language is used as an aid to studying computer organization. Topics include digital logic, ALU and CPU design, object code, microprogramming, CISC, RISC, and parallel computers.
COREQUISITES: CSCI 2112.03 and CSCI 2132.03
PREREQUISITES: CSCI 1101.03 or CSCI 1110.03

CSCI 2122 Systems Programming
CREDIT HOURS: 3
This course presents tools, techniques, and concepts for systems programming. Students will be exposed to assembly and will be introduced to the C programming language. The course also discusses memory hierarchies, performance measurement, exception control flow, and performance related issues. Students will be involved in significant amount of low-level programming.
PREREQUISITES: (CSCI 1101.03 or CSCI 1110.03) and CSCI 1120.03
EXCLUSIONS: CSCI 2121.03

CSCI 2132 Software Development
CREDIT HOURS: 3
This course presents techniques for programming and software development in a procedural language. It reviews the basics of procedural programming and introduces students to source code management, testing strategies, debugging, and basic scripting techniques.
PREREQUISITES: CSCI 1101.03 or CSCI 1110.03 or suitable prior programming experience

CSCI 2133 Rapid Programming Techniques for Innovation
CREDIT HOURS: 3
The goal of this course is to introduce students to advanced programming techniques and practical issues in building and maintaining software systems, with an emphasis on techniques used in rapid prototype building for implementation of innovative ideas. The course also introduces principles of design thinking and designing feasible software systems that address real problems. The students are trained to follow and design requirement specifications, build software systems according to specifications, design testing frameworks, use techniques for system debugging and performance measuring, and improve and maintain such systems. The course evaluation is based on individual assignments, and a team project that involves developing a multi-tier system that solves a real problem. The course is not strongly associated with one programming language, but instead it exposes students to different languages and tools. Intermediate knowledge of C and Java language are assumed.
PREREQUISITES: CSCI 2134 or equivalent programming experience
FORMATS: Lecture

CSCI 2134 Software Development
CREDIT HOURS: 3
This course presents techniques and methodologies for software development with modern tools. It introduces students to the software development life cycle and best practices for source code management, testing, debugging, and building. Particular focus will be on building individual skills in the development and testing phases of the life cycle. Students will be expected to work with existing medium-size code-bases that are implemented in different programming languages. Students will be exposed to a variety of software tools and will be expected to use them throughout the course.
PREREQUISITES: CSCI 1101.03 or CSCI 1110.03
EXCLUSIONS: CSCI 2132.03

CSCI 2141 Introduction to Database Systems
CREDIT HOURS: 3
This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.
PREREQUISITES: CSCI 1100.03 or CSCI 1105.03 or CSCI 1110.03 or CSCI 2202.03
CROSSLISTED: INFX 2640.03
EXCLUSIONS: CSCI 2140.03

CSCI 2170 Introduction to Server Side Scripting
CREDIT HOURS: 3
A server side scripting language is used to create web pages with dynamic content. The course provides the technology necessary for connecting client web pages to web servers and processing and storing information obtained using forms during web sessions.
COREQUISITES: CSCI 2141.03 may be taken as a co-requisite
PREREQUISITES: (CSCI 1206.03 or CSCI 1170.03 or INFX 1606.03) and CSCI 2141.03
CROSSLISTED: INFX 2670.03

CSCI 2201 Introduction to Information Security
CREDIT HOURS: 3
Information security is becoming increasingly important in today's networked world, and is impacting every aspect of our lives including finance, healthcare, government, education, arts and entertainment. The objective of this course is to teach the basic principles of information security from the perspective of providing security awareness and its best practices for the real world. Topics include motivation for security, tools and techniques used by adversaries to gather information and launch attacks, Internet security, firewalls, basics of encryption and authentication, virus protection, secure credit card and bank transactions, wireless security, computer forensics, identify theft and protection, anti-phishing and biometric security.
CROSSLISTED: INFX 2601.03

CSCI 2202 Computer Modeling for Scientists
CREDIT HOURS: 3
This is an introductory, project based, programming course for science majors. The course focuses on programming techniques useful for students in their scientific pursuits. The course introduces basic programming and then goes on to guide students through using system simulations, modelling and data-driven analysis of models. Working with web-based data archives will be emphasized. Students will gain experience with implementing stochastic models of systems of interest. Multiple computational tools and their appropriate use will be used through the course. Examples and projects will be taken primarily from the fields of biology, genetics, neuroscience, psychology, earth sciences, chemistry among others.
PREREQUISITES: Students must have successfully completed a minimum of 3.0 credit hours in Math at the 1000 level.

CSCI 2203 Data Science for Everyone
CREDIT HOURS: 3
This course will provide students with an overview of the world of data science research. It will focus on how the analysis of data from social media and other internet-based sites (e.g. Twitter, YouTube, images, Wikipedia, Google books) can be used to tackle complex and fascinating societal questions (e.g. revealing insights about how happy we are, who we are friends with, how often we lie). This course will survey several exciting research projects in this field and provide students with a general understanding about the research methods and analyses (e.g. machine learning, social network analysis) in a non-technical manner that is accessible to students of various educational backgrounds. The course content will be portrayed through a blend of lectures, multi-media, accessing on-line materials/articles, assignments to enhance critical thinking and discussion-based formats.

CSCI 2690 Introduction to Software Projects
CREDIT HOURS: 3
Students learn how software projects are planned, implemented, and closed. Topics include plan development, project life cycles, software development life cycles, measurable organizational value, work breakdown structures, scheduling, scope, risk, change requests, conflict resolution, closure, and post-mortems.
CROSSLISTED: INFX 2690
FORMATS: Lecture

CSCI 2691 Introductory Project
CREDIT HOURS: 3
Students take junior roles in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their technical, management, and professional skills.
PREREQUISITES: (CSCI 1170.03 or CSCI 1206.03 or INFX 1606.03) and (CSCI 1100.03 or CSCI 1105.03 or CSCI 1110.03)
CROSSLISTED: INFX 2691
FORMATS: Lecture

CSCI 3101 Social, Ethical and Professional Issues in Computer Science
CREDIT HOURS: 3
Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).
CROSSLISTED: PHIL 2490.03

CSCI 3110 Design and Analysis of Algorithms I
CREDIT HOURS: 3
This course covers techniques for the design and analysis of efficient algorithms and data structures. Topics include asymptotic analysis, divide and conquer algorithms, greedy algorithms, dynamic programming, data structure design, optimization algorithms, and amortized analysis. The techniques are applied to problems such as sorting, searching, identifying graph structure, and manipulating sets.
PREREQUISITES: CSCI 2110.03 and CSCI 2112.03

CSCI 3120 Operating Systems
CREDIT HOURS: 3
This course includes a review of I/O and interrupt structures. Topics covered include dynamic procedure activation, system structure and evaluation, memory management, process management, process scheduling, recovery procedures, concurrency, deadlocks, resource allocation, protection, and operating systems implementation.
PREREQUISITES: CSCI 2110.03, (CSCI 2020.03 or CSCI 2122.03), and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3121 The Need for Speed: From Pipelines to Massively Parallel Machines
CREDIT HOURS: 3
This course discusses why a modern CPU represents a massive parallel machine and what impact this has on how applications view the CPU. Topics include: evaluation of CPU performance; instruction level parallelism (ILP) and the various consequential complexities such as out-of- order execution, branch prediction, and speculative execution; design of memory hierarchies that support ITP; and complexities of multi-core design, including cache consistency and special purpose processors such as the Graphics Processing Unit.

PREREQUISITES: CSCI 2121.03 or CSCI 2122.03
EXCLUSIONS: ECED 3403.03

CSCI 3130 Introduction to Software Engineering
CREDIT HOURS: 3
The course examines the process of software development, from initial planning through implementation and maintenance. A brief survey of available tools and techniques will be presented covering the topics of analysis, planning, estimating, project management, design, testing, and evaluation. Particular emphasis will be given to organizing and planning, team participation and management, top-down design and structure charts, system and information flow diagrams, walk-throughs and peer review, and testing and quality control.
PREREQUISITES: CSCI 2110.03, CSCI 2132.03, CSCI 2134.03, or INFX 3600.03
CROSSLISTED: INFX 3630.03

CSCI 3132 Object Orientation and Generic Programming
CREDIT HOURS: 3
This course deals with the fundamental concepts of object-oriented programming: behaviour, inheritance, encapsulation and polymorphism. There is a discussion of the history of object-oriented programming, and introduction to some currently used object-oriented programming languages.
PREREQUISITES: CSCI 2110.03 and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3136 Principles of Programming Languages
CREDIT HOURS: 3
This course provides a comparative study of advanced programming language features. Topics include statement types, data types, variable binding and parameter passing mechanisms. Formal methods for syntactic and semantic description of programming languages are examined.
PREREQUISITES: CSCI 2110.03, CSCI 2112.03, and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3151 Web Intelligence
CREDIT HOURS: 3
The Web and on-line digital libraries constitute the largest repository of interconnected knowledge in text form mankind ever created. Search engines have made this knowledge accessible to the lay person. Social networks further enhance the exchange of knowledge among individual Web users. Mining the Web and associated digital libraries is the next challenge that promises to change the nature of scientific discovery, and to dramatically impact the way business is conducted. This course will introduce the core Artificial Intelligence concepts and algorithms in the context of Web and text mining: machine learning, natural language processing, semantic web, social networks and web usage mining.
PREREQUISITES: CSCI 2112.03, CSCI 2141.03, STAT 2060.03, and MATH 1030.03

CSCI 3154 Introduction to Artificial Intelligence with Gaming Application
CREDIT HOURS: 3
This course covers the breadth of Artificial Intelligence techniques and as such is divided into roughly two parts: Symbolic Al and Machine Learning. Throughout the course the problem of decision making for Non-Play Characters in computer games will form the case study and application examples used to illustrate the Al techniques studies. Symbolic Al will cover First-order Logic, Forward/Backward chaining, Rule-based systems and Fuzzy Logic. The relative trade offs in the application of such architectures to NPC decision making will be developed. The role of Planning systems in Goal orientated decision making will also be introduces, where this also makes use of search based problem solving and the A* algorithm. Search and its utility in evaluation of next moved in turn-wise games will also be specifically investigated as well it introduction to Bayesian Decision making will be made, where this leads to causal reasoning and adaptation. The second half of the course will introduce Machine Learning from the basic design decisions of Representation, Credit assignment and Cost Function. Two paradigms will be investigated in particular - Gradient decent Neural Networks and Evolutionary computation - where these illustrate the relative trade offs implicit in the three ML design decisions. Case studies and laboratories illustrating these properties include learning to play checkers, recognizing Poker hands, learning NPC behaviors through evolution.
PREREQUISITES: CSCI 2110.03, CSCI 2112.03, and (CSCI 2132.03 or CSCI 2134.03)
EXCLUSIONS: CSCI 4154.03

CSCI 3160 Designing User Interfaces
CREDIT HOURS: 3
This course deals with concepts and techniques underlying the design of interactive systems. Both human factors and the technical methods of user interface design are covered. Students will learn how to apply various techniques through the design, creation, and testing of a prototype system.
PREREQUISITES: CSCI 1170.03 or CSCI 1206.03 or INFX 1606.03

CSCI 3161 Introduction to Computer Graphics and Animation
CREDIT HOURS: 3
The course provides students with a practical foundation in high-level computer animation programming. Through the development of a significant project using industry standard graphics libraries, students will learn proven techniques that have become common currency in the field of computer animation.
PREREQUISITES: CSCI 2110.03, (CSCI 2132.03 or CSCI 2134.03), and MATH 1030.03

CSCI 3162 Digital Media
CREDIT HOURS: 3
This course covers technical aspects of digital media, including images, video, and sound. Topics covered include digital representation, processing, compression, and multimedia generation.
PREREQUISITES: MATH 1000.03, MATH 1030.03, CSCI 2110.03
EXCLUSIONS: CSCI 4165.03

CSCI 3171 Network Computing
CREDIT HOURS: 3
This course gives students a foundation in computer networks. It presents a top-down view of the layered architectural elements of communication systems, focusing on the Internet and TCP/IP. Topics include client/server systems, packet switching, protocol stacks, queuing theory, application protocols, socket programming, remote service calls, reliable transport, UDP, TCP, and security.
PREREQUISITES: CSCI 2110.03, and (CSCI 2132.03 or CSCI 2134.03)

CSCI 3172 Web-Centric Computing
CREDIT HOURS: 3
This course provides a solid grasp of core WWW technologies and a conceptual framework for understanding the development of the WWW and working with future web technologies. The course explores interactive and non-interactive web applications built using various technologies and architectural models. We explore the significance of web design and programming concepts in terms of accessibility issues both from the perspective of web robots and end-users. Web caching, proxy techniques, and security issues are also discussed.
PREREQUISITES: (CSCI 2132.03 or CSCI 2134.03), CSCI 2141.03 and (CSCI 2170.03 or INFX 2670.03)

CSCI 3190 Community Outreach
CREDIT HOURS: 3
This is a project-oriented course where the result of the project is a real-world implementation that meets the requirements of a community group such as a charity, non-profit organization, or educational institution. Students work in teams on the entire application development life cycle from requirements analysis through to maintenance. Lectures cover a range of topics such as practical application of requirements analysis, systems design, and database design methodological skills developed in prerequisite courses or from prior equivalent experience. This course cannot be counted towards a Bachelor of Informatics degree.
PREREQUISITES: CSCI 2100.03, (CSCI 2132.03 or CSCI 2134.03), and (CSCI 2140.03 or CSCI 2141.03)

CSCI 3191 Community Outreach II
CREDIT HOURS: 3
CSCI 3191 is a continuation of CSCI 3190, allowing students to undertake projects lasting two terms or to work on a second, more advanced project. When CSCI 3190 and CSCI 3191 are offered concurrently, they are jointly scheduled, and project teams are drawn from both courses, with more responsibility given to students enrolled in CSCI 3191 (e.g., team leadership). This course cannot be counted towards a Bachelor of Informatics degree.
PREREQUISITES: CSCI 3190.03 or permission of the instructor

CSCI 3691 Intermediate Project
CREDIT HOURS: 3
Students perform design and development roles in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their design, technical, management, and professional skills.
PREREQUISITES: CSCI 2141.03, CSCI 2170.03, CSCI 2690.03, CSCI 2691.03
CROSSLISTED: INFX 3601
FORMATS: Lecture

CSCI 3901 Software Development Concepts
CREDIT HOURS: 6
This course covers the (i) application of standard abstract data types, fundamental data structures, and commonly used algorithms; (ii) design and implementation of databases; and (iii) the fundamental practice of software engineering. Students reinforce the skills and concepts covered in lectures through assignments and a project that integrates all three components.
CALENDAR NOTES: This course is intended to fill in the knowledge gaps that incoming graduate students may have. Students must receive a B- or higher in this course.
RESTRICTIONS: Inclusive GR Level Restriction

CSCI 4112 Theory of Computation
CREDIT HOURS: 3
This is a course on formal languages and computational models. Topics covered include finite automata, pushdown automata, Turing machines, undecidability and recursive and recursively enumerable functions. Some applications to computer science are also discussed such as compiler design and text processing.
PREREQUISITES: CSCI 2112.03 and CSCI 3136.03
CROSSLISTED: MATH 4660.03

CSCI 4113 Design and Analysis of Algorithms II
CREDIT HOURS: 3
This course covers advanced techniques for the design and analysis of efficient algorithms. Problems are taken from a wide range of areas including combinatorics, numerical computation, graph algorithms, string matching, approximation algorithms, computational geometry, and NP-Completeness.
PREREQUISITES: CSCI 3110.03
CROSSLISTED: MATH 4130.03

CSCI 4115 Topics in Graph Theory
CREDIT HOURS: 3
See the course description for MATH 4330 in the Mathematics section of this calendar.
PREREQUISITES: See Mathematics section
CROSSLISTED: MATH 4330.03

CSCI 4116 Cryptography
CREDIT HOURS: 3
See the course description for MATH 4116 in the Mathematics section of this calendar.
PREREQUISITES: See Mathematics section
CROSSLISTED: MATH 4116.03

CSCI 4117 Advanced Data Structures
CREDIT HOURS: 3
Data structures play a central role in many modern applications, and are essential building blocks of efficient algorithms. This course covers classical results and recent advancements on data structures. Topics covered include the O(lg n) barrier in sorting and searching, online optimization of search structures, fast text retrieval, space efficient data structures for large date sets, and persistent data structures.
PREREQUISITES: CSCI 3110.03

CSCI 4125 High Performance Computing
CREDIT HOURS: 3
This course explores the design, implementation, and evaluation of computer programs for applications in which performance is a central issue. In the sequential computing setting, it explores topics such as profiling, cache effects, I/O performance, floating-point issues, compiler directives and performance tuning. In the parallel computing setting it introduces techniques for the design, implementation and evaluation of programs for both Shared-Memory Multiprocessors (SMPs) and Distributed Memory Multicomputers (clusters). It is recommended that students take CSCI 3121 prior to taking this course.
PREREQUISITES: CSCI 3120.03

CSCI 4126 Ubiquitous Computing
CREDIT HOURS: 3
Ubiquitous Computing moves computing off the desktop and into the fabric of our everyday lives. This course explores both systems and human--centric advances in Ubiquitous Computing, including sensing, middleware, locative applications, smart environments, ambient displays, and tangible interaction. Students will design and implement a Ubiquitous computing application prototype.
PREREQUISITES: CSCI 3160.03 and CSCI 3171.03

CSCI 4140 Advanced Database Systems
CREDIT HOURS: 3
This course covers advanced Database (DB) topics including, but not limited to: DB design, normalization query processing and optimization, transaction processing, concurrency control and recovery, and distributed databases. Additional topics may include object-oriented databases, multi-databases, data integration and data warehousing.
PREREQUISITES: CSCI 2141.03
EXCLUSIONS: CSCI 3140.03

CSCI 4141 Information Retrieval
CREDIT HOURS: 3
This course examines information retrieval within the context of full text databases. Topics include the major models of information retrieval, evaluation, searching and clustering, and hypertext.
PREREQUISITES: CSCI 2110.03 and (CSCI 2140.03 or CSCI 2141.03)

CSCI 4144 Introduction to Data Mining and Data Warehousing
CREDIT HOURS: 3
This course reviews main concepts in data mining and data warehouses including objectives, architectures, algorithms, implementations, and applications. The topics covered include operational information process, decision-oriented information process, data warehousing and On-Line Analytical Process (OLAP), characterization mining, association rule mining, classification and predication and clustering. Selected system tools for data mining and data warehousing are introduced.
PREREQUISITES: CSCI 2141.03 or CSCI 3140.03

CSCI 4145 Cloud Computing
CREDIT HOURS: 3
Cloud computing provides users with the ability to access and use computational, storage, and interconnect resources as services offered by cloud providers. This course provides the students with the theoretical foundations of the cloud computing as well as with hands-on experience in using various cloud technologies. Topics covered are related to the types of cloud services, cloud infrastructure, distributed storage models, and programming models offered as general services and also developed for Big Data. Topics will also include underlying technologies, such as virtualization.
PREREQUISITES: CSCI 2141.03, CSCI 3120.03, and CSCI 3171.03

CSCI 4146 The Process of Data Science
CREDIT HOURS: 3
The advent of low-cost storage and processing power coupled with ever increasing amounts of "born digital" data has created the new field of data science. The ability to achieve a specific goal or answer a business question by crunching through very large and complex databases is becoming a competitive advantage for businesses and leads to new discoveries in science and medicine. This course is an overview of the different processes that make up a data science project. While other fields concentrate on finding previously unknown knowledge or searchingfor a specific pattern, data science focuses on answering deep questions and making the conclusions accessible to the rest of the organization. This course requires the implementation of software and experimental design in order to complete the assignments.
PREREQUISITES: CSCI 2141.03, STAT 2060.03, CSCI 3130.03 and (CSCI 3151.03 or CSCI 3154.03)

CSCI 4152 Natural Language Processing
CREDIT HOURS: 3
This course presents strategies and techniques for natural language understanding by machines. The course will cover a selection of topics taken from the following three areas: parsing techniques used to represent sentence structure and discover ambiguities, the representation of word meanings and how sentence meaning can be derived from word meanings, and the application of context and world knowledge to the interpretation of language.
PREREQUISITES: CSCI 3110.03

CSCI 4155 Machine Learning
CREDIT HOURS: 3
This course focuses on the theory of learning machines, which are important techniques underlying data mining and many AI applications. The topics include supervised learning, in particular maximum likelihood estimation in stochastic model and probabilistic reasoning, ubiquitous learning machines such as support vector machines and deep neural networks; unsupervised learning which includes generative models, expectation maximization, and Boltzmann machines; and reinforcement learning including Markov decision processes and temporal difference learning. The course includes an introduction to a high level modeling language such as MATLAB or Python and refresher on probability theory and matrix algebra.
PREREQUISITES: MATH 1030.03 and STAT 2060.03
EXCLUSIONS: CSCI 4150.03

CSCI 4160 Topics in Computer Graphics
CREDIT HOURS: 3
This course presents the theory and mathematical algorithms required to develop and build a graphics package. Emphasis is on either two or three dimensions and the transformations and manipulations necessary to lead to animation. The design platform and language are left as a student choice to ensure immediate familiarity and future development advantages.
PREREQUISITES: CSCI 3161

CSCI 4163 Human-Computer Interaction
CREDIT HOURS: 3
Human-computer interaction deals with human-computer communication and how to facilitate it. This course begins with a discussion of information processing characteristics important to human-computer interaction and formal models of human-computer interaction. Subsequent topics include dialogue techniques, response times and display rates, information presentation, interaction devices, computer training, help systems, computer supported co-operative work, information search and visualization, hypermedia, and the world wide web.
PREREQUISITES: CSCI 3160.03

CSCI 4166 Visualization
CREDIT HOURS: 3
This course focuses on graphical techniques for data visualization that assist in the extraction of meaning from datasets. This involves the design and development of efficient tools for the exploration of large and often complex information domains. Applications of visualization are broad, including computer science, geography, the social sciences, mathematics, science and medicine, as well as architecture and design. The course will cover all aspects of visualization including fundamental concepts, algorithms, data structures and the role of human perception.
PREREQUISITES: CSCI 3161.03 or CSCI 4160.03

CSCI 4167 Topics in Computer Animation
CREDIT HOURS: 3
The course introduces students to fundamental and advanced techniques and algorithms in Computer Animation. Topics include interpolation based and kinematic techniques, physically based modelling, motion capture, and character animation.
PREREQUISITES: CSCI 3161.03

CSCI 4168 Game Design and Development
CREDIT HOURS: 3
This course covers the fundamentals of digital game design with an emphasis on team-based development. In this course students will produce a significant game using techniques and principles derived from established state-of-the-art industry practices. Topics include an examination of game design theories, programming architectures, audio-visual design and game production.
PREREQUISITES: CSCI 2110.03 and CSCI 3130.03

CSCI 4169 Usable Security
CREDIT HOURS: 3
Human factors play an important role in the effectiveness of security and privacy solutions, and it is important for security and privacy experts to have an understanding of how people will interact with the systems they develop. This course is designed to introduce students to a variety of usability and user interface problems related to privacy and security, and to give them experience in designing studies aimed at helping to evaluate usability issues in security and privacy systems. Topics include human threat identification, security warning design, location privacy, privacy policies, web browser privacy and security, phishing, passwords, and secure communication.
PREREQUISITES: CSCI 3160.03

CSCI 4171 Networks and Communication
CREDIT HOURS: 3
The primary objective of this course is to give the student a comprehensive understanding and specialized knowledge in the field of computer networks and communications. The course teaches through a systems approach to networks by examining the hardware and protocol components that comprise a network. The course also examines the interactions and interdependencies between protocols. Topics covered in this course include network principles and concepts, transmission principles, network architecture, routers and routing protocols, direct link networks, wireless networks, internetworking, and emerging network technologies.
PREREQUISITES: (CSCI 2121.03 or CSCI 2122.03) and CSCI 3171.03

CSCI 4174 Network Security
CREDIT HOURS: 3
Security stands out as a critical issue in the design and deployment of information systems in general, and networks in particular. This course will deal with the design of secure information systems with emphasis on secure networking and secure information transfer. It will also include topical and emerging areas in security such as the establishment of an organization-wide security plan and bio-metric identification systems.
PREREQUISITES: CSCI 3171.03

CSCI 4176 Mobile Computing
CREDIT HOURS: 3
This course covers the principles of mobile computing and the concepts and techniques underlying the design and development of mobile computing applications. Mobile computing is discussed from technological, application, and user perspectives. Topics include mobile and wireless communication technologies, development environments, application design for resource limited and failure-prone environments, user interface issues in the mobile computing setting, and the future of mobile computing.
COREQUISITES: CSCI 3171.03 or CSCI3172.03 may be taken as a co-requisite
PREREQUISITES: CSCI 3130.03 and (CSCI 3171.03 or CSCI3172.03)

CSCI 4177 Advanced Web Services
CREDIT HOURS: 3
This course provides a hands-on learning environment for advanced web development techniques, such as HTML5 APIs for the creation of dynamic web graphics as

well as adding offline functionality to web applications, and server-side APIs for extending the back-end functionality of web applications. Advanced security, performance monitoring, and testing approaches are also covered to facilitated the creation of efficient and secure web applications. Finally, this hands-on course also highlights the importance of ethical web development principles and documentation.
PREREQUISITES: CSCI 3172.03

CSCI 4180 Introduction to Computational Biology and Bioinformatics
CREDIT HOURS: 3
This course introduces biology-related applications of computer science. No background in biology is assumed. The topics covered include the following: introductory molecular biology and evolution, genomics, similarity and homology, multiple sequence alignments, phylogenetics, structural bioinformatics and gene expression. The emphasis is on the applications of computer science to biology.

CSCI 4181 Bioinformatics Algorithms
CREDIT HOURS: 3
The discipline of bioinformatics applies sophisticated computational and statistical techniques to problems in the biological domain. This course will focus on a few biosequence-related challenges in depth, examining the complexity and efficiency of different approaches, the relationship between statistical optimality and biological reality, and the consistency (or lack thereof) among methods.
PREREQUISITES: Permission by instructor

CSCI 4190 Special Topics in Computer Science
CREDIT HOURS: 3
This course examines topics determined by the interests of the students and the instructor.
PREREQUISITES: Permission of the instructor

CSCI 4191 Application Development Project
CREDIT HOURS: 3
This is a project-oriented course for students to participate in distributed software development projects, such as the Undergraduate Capstone Open Source Project (www.ucosp.ca) initiative. Students work as part of a development team on new or existing projects for real-world applications. In this course students learn how to work in large development teams, which may be geographically distributed. Students implement portions of a large software project and give a public presentation on their work. Students work under supervision of a faculty member. A specific development project must be approved by the undergraduate chair in consultation with the instructor.
PREREQUISITES: (CSCI 3120.03, CSCI 3130.03 and CSCI 3171.03) or INFX 4600.03

CSCI 4192 Directed Studies
CREDIT HOURS: 3
This course is a study of specific academic subject area not covered in another course offered at Dalhousie University, under close supervision of a faculty member. It typically consists of predetermined readings, discussions with the instructor, and a term paper summarizing the studied material. A specific directed studies course must be approved by the undergraduate chair in consultation with the instructor.
PREREQUISITES: CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03, CSCI 3171.03

CSCI 4193 Technology Innovation
CREDIT HOURS: 3
The Technology Innovation combines elements of design thinking, rapid prototyping, and software development that can be used to validate ideas that could yield new technologies and new business models. Over the semester students will work in interdisciplinary teams to address a Design Challenge posed by industry. The ideas advanced by teams will reflect the powerful synergies that exist between software development, design thinking and entrepreneurship.
PREREQUISITES: CSCI 2100.03, CSCI 2110.03, (CSCI 2132.03 or CSCI 2134.03), and CSCI 2141.03

CSCI 4260 Persuasive Computing Design
CREDIT HOURS: 3
Persuasion Technologies (PTs) are interactive systems designed to motivate people to change their behaviours without using coercion or deceit. This course will explore the fundamental theory, principle, and practice in the design, implementation, and evaluation of persuasive systems. Topics include theories of persuasion and behaviour change, persuasive strategies, application of the theories and strategies in persuasive interface/system design, persuasive system evaluation methods, approaches for personalizing and adapting persuasive systems, privacy and ethical issues of persuasive systems. Students will get hands-on experience on persuasive user interface design and evaluation, user studies, behaviour modelling, persuasive affordances of various technological platforms (e.g., mobile, social media, games), and ethics of PT through case analysis, critics, real-world project, project report, and project presentation.
PREREQUISITES: CSCI 3160.03

CSCI 4691 Advanced Project
CREDIT HOURS: 3
Students take a leadership role in project teams to solve a real-world information technology problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their leadership, management, and professional skills.
PREREQUISITES: CSCI 3130.03, CSCI 3691.03, MGMT 2303.03
CROSSLISTED: INFX 4601
FORMATS: Lecture

CSCI 8781 Co-op Work Term 1
CREDIT HOURS: 0
This course is the first work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.
COREQUISITES: CSCI 8791.00
PREREQUISITES: CSCI 8890.00 and CSCI 8791.00

CSCI 8782 Co-op Work Term 2
CREDIT HOURS: 0
This course is the second work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.
COREQUISITES: CSCI 8792.00
PREREQUISITES: CSCI 8781.00, CSCI 8792.00

CSCI 8783 Co-op Work Term 3
CREDIT HOURS: 0
This course is the third work term for students in the Co-operative Education Program. Pass/fail grading applies to this course.
COREQUISITES: CSCI 8793.00
PREREQUISITES: CSCI 8782.00, CSCI 8793.00

CSCI 8791 Co-op I
CREDIT HOURS: 1
This course is the first work term academic component for students in the Co-operative Education Program.
COREQUISITES: CSCI 8781.00
PREREQUISITES: CSCI 8990.00, CSCI 8781.00

CSCI 8792 Co-op II
CREDIT HOURS: 1
This course is the second work term academic component for students in the Co-operative Education Program.
COREQUISITES: CSCI 8782.00
PREREQUISITES: CSCI 8782.00, Minimum of a B- in CSCI 8791.01

CSCI 8793 Co-op III
CREDIT HOURS: 1
This course is the third work term academic component for students in the Co-operative Education Program.
COREQUISITES: CSCI 8783.00
PREREQUISITES: CSCI 8783.00, Minimum of B- in CSCI 8792.01

CSCI 8873 Honours Seminar
CREDIT HOURS: 3
This is a course through which students complete their Honours Thesis requirements. Honours students in Computer Science must register for this course or CSCI 8871/72. In this course, students complete their thesis research, write their honours theses, and give public presentations of their work. In a normal course sequence, the student should have taken CSCI 4192 under the direction of their thesis supervisor. During this course, the student should have acquired the necessary background knowledge for their thesis research and formulated a research plan for their thesis work. Deviations from this sequence are possible.
PREREQUISITES: Permission of the Honours Coordinator

CSCI 8874 Research Project 1
CREDIT HOURS: 3
Students carry out research and related activities under the supervision of a faculty member. Work done in this course is intended to prepare and contribute to the research to be done when the students enters the Master of Computer Science program. This is a PASS/FAIL course.
CALENDAR NOTES: This course may not be used to satisfy a CS elective requirement for any of the computer science degrees.
PREREQUISITES: CSCI 3101.03, CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03, CSCI 3171.03, a minimum GPA of 3.0, permission of instructor, and permission of the Faculty of Computer Science.

CSCI 8875 Research Project 2
CREDIT HOURS: 3
Students carry out research and related activities under the supervision of a faculty member. Work done in this course is intended to prepare and contribute to the research to be done when the students enters the Master of Computer Science program. This is a PASS/FAIL course.
CALENDAR NOTES: This course may not be used to satisfy a CS elective requirement for any of the computer science degrees. CSCI 8874.03 may be taken at the same time as CSCI 8875.03.
PREREQUISITES: CSCI 3101.03, CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03, CSCI 3171.03, CSCI 8874.03, a minimum GPA of 3.0, permission of instructor, and permission of the Faculty of Computer Science.

CSCI 8890 Co-op Seminar
CREDIT HOURS: 0
Students in the Bachelor of Computer Science Co-operative Education Program must register for this course, which orients students to the co-op system. Pass/fail grading applies to this course.
PREREQUISITES: Permission of the Faculty of Computer Science

CSCI 8891 Co-op Work Term I
CREDIT HOURS: 0
This course is the first work term for students in the Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.
PREREQUISITES: CSCI 8890.00

CSCI 8892 Co-op Work Term 2
CREDIT HOURS: 0
This course is the second work term for students in the Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.
PREREQUISITES: CSCI 8891.00

CSCI 8893 Co-op Work Term 3
CREDIT HOURS: 0
This course is the third work term for students in t he Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.
PREREQUISITES: CSCI 8892.00

Informatics

Introduction
This program is no longer accepting applications for admission. This program has been superceded by the Bachelor of Applied Computer Science.

Informatics is the multidisciplinary study of how people transform technology, and how technology transforms us. It lies at the intersection of people, technology and information systems and focuses on the expanding relationship between information systems and the daily lives of people, both at home and at work. Informatics helps develop new uses for information technology in order to design solutions that reflect the way people create, use and find information, and it takes into account the social, cultural and organizational settings in which those solutions will be used.

Informatics professionals have very diverse jobs. Some typical activities include:

- assess information needs of organizations
- manage information projects
- solve organizational information flow problems
- make software packages talk to each other
- model the information flows among a group of people
- design innovative user interfaces
- track health care resources
- design professional websites
- improve health care information systems
- develop business solutions

Bachelor of Informatics

Program Structure
There is a choice of majors: Environment, Sustainability and Society, Specialization of your own design and Software Systems. Students should consult with the Faculty of Computer Science for details on other options that are being developed.

Elective courses are any courses of your own choosing, although no more than 24 credit hours may be at the 1000 level. The electives allow you to explore possible specializations and to follow personal interests.

A **minor in Management** is available to students registered in the BInf program. For further information, please see the Management section. Note: This increases the program requirements by one course.

The co-operative education program is a mandatory component of the Bachelor of Informatics. Students are required to complete three co-op work terms as part of their bachelor degree.

The co-op office receives requests from employers for co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Co-op work terms are scheduled after terms 5, 6 and 7.

The normal academic sequence of terms follows:

Yr/Term	Fall	Winter	Summer
Year 1	AT1	AT2	FREE
Year 2	AT3	AT4	WT1
Year 3	AT5	WT2	AT6
Year 4	WT3	AT7	AT8

AT = Academic study term
WT = Co-op work term

General Requirements

- STAT 1060.03: Introduction to Statistics
- CSCI 1100.03: Computer Science I
- CSCI 1101.03: Computer Science II
- INFX 1606.03: Introduction to Website Creation
- INFX 1615.03: Concepts of Computing
- INFX 1616.03: Applications of Computing

- CSCI 2100.03: Communication Skills
- CSCI 2112.03: Discrete Structures 1
- CSCI 2141.03: Introduction to Database Systems
- CSCI 3130.03: Introduction to Software Engineering
- INFX 2601.03: Introduction to Information Security
- INFX 2670.03: Introduction to Server Side Scripting
- INFX 2690.03: Integrated Studies 1
- INFX 2691.03: Integrated Studies 2
- HAHP 3100.03: Research Methods (or equivalent)
- CSCI 3160.03: User Interface Design
- CSCI 3172.03: Web-Centric Computing
- INFX 3600.03: Project 3
- INFX 3601.03: Project 4
- INFX 4600.03: Project 5
- INFX 4601.03: Project 6
- 36 credit hours specified by the major
- 12 credit hours of free electives at or above the 1000 level
- nine credit hours of free electives at or above the 2000 level
- Completion of three co-op work terms

* Neither CSCI 3190.03 nor CSCI 3191.03 can be counted towards a Bachelor of Informatics degree.

Major in Software Systems

The Major in Software Systems follows the general Bachelor of Informatics requirements and must include the following courses:

- CSCI 2110.03: Computer Science III
- CSCI 2132.03: Software Development
- CSCI 3132.03: Object Orientation and Generic Programming
- CSCI 4140.03: Advanced Database Systems
- CSCI 3171.03: Network Computing
- 18 credit hours of CSCI courses at or above the 3000 level

Major in Environment, Sustainability and Society

The College of Sustainability offers a Major in Environment, Sustainability and Society in the BInf program. For complete details about the College, its programs and courses please see the College of Sustainability section.

The Major in Environment, Sustainability and Society follows the general Bachelor of Informatics requirements and must include the following courses:

- SUST 1000.06 (six credit hours in fall term)
- SUST 1001.06 (six credit hours in winter term)
- SUST 2000.06 or SUST 2001.06
- 18 credit hours from the approved list (at least 12 credit hours above 2000 level)

Specialization of Your Own Design

The Specialization of your own design follows the general Bachelor of Informatics requirements and must include the following:

- It is your responsibility to develop and submit to the Faculty a written proposal for these 14 courses.
- The 14 courses must be chosen from at least two disciplines other than Computer Science. Two of the disciplines must account for at least four courses each and at least 10 courses together.
- Your proposal must be developed in consultation with one undergraduate adviser from each of the disciplines.
- Your proposal must include career goals, a list of courses, a timeline, and a coherent justification for the proposal. It must be approved by the Faculty.
- At least 30 credit hours must be at the 2000 level or higher.
- At least 18 credit hours must be at the 3000 level or higher.

Entry Points to Bachelor of Informatics

Applications to the Bachelor of Informatics degree program are no longer being accepted. Potential students are encouraged to consider the Bachelor of Applied Computer Science program.

Minor in Informatics for Non-Computer Science Majors

See Minors section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

INFX 1615 Concepts of Computing
CREDIT HOURS: 3
This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

INFX 1616 Applications of Computing
CREDIT HOURS: 3
This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

INFX 2601 Introduction to Information Security
CREDIT HOURS: 3
Information security is becoming increasingly important in today's networked world, and is irnpacting every aspect of our lives including finance, healthcare, government, education, arts and entertainment. The objective of this course is to teach the basic principles of information security from the perspective of providing security awareness and its best practices for the real world. Topics include motivation for security, tools and techniques used by adversaries to gather information and launch attacks, Internet security, firewalls, basics of encryption and authentication, virus protection, secure credit card and bank ransactions, wireless security, computer forensics, identity theft and protection, anti-phishing and biometric security.
CROSSLISTED: CSCI 2201.03

INFX 2640 Introduction to Database Systems
CREDIT HOURS: 3
This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.
PREREQUISITES: CSCI 1100.03
EXCLUSIONS: CSCI 2141.03

INFX 2670 Introduction to Server Side Scripting
CREDIT HOURS: 3
A server side scripting language is used to create web pages with dynamic content. The course provides the technology necessary for connecting client web pages to web servers and processing and storing information obtained using forms during web sessions.
COREQUISITES: INFX 2640.03 or CSCI 2141.03
PREREQUISITES: CSCI 1100.03 and INFX 1606.03
CROSSLISTED: CSCI 2170.03

INFX 2690 Managing Software Development Projects
CREDIT HOURS: 3
Students work in project teams to solve a practical informatics problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their technical and professional skills.
PREREQUISITES: First year writing requirement

INFX 2691 Introductory Community Outreach Project
CREDIT HOURS: 3
This course is a continuation of INFX 2690.03
PREREQUISITES: INFX 2690.03, INFX 1606.03, CSCI 1100.03

INFX 3600 Intermediate Community Outreach Project I
CREDIT HOURS: 3
This course is a continuation of INFX 2691.03 with the development of leadership skills.
PREREQUISITES: INFX 2640.03, INFX 2670.03, INFX 2691.03

INFX 3601 Intermediate Community Outreach Project II
CREDIT HOURS: 3
This course is a continuation of INFX 3600.03
PREREQUISITES: INFX 3600.03

INFX 3630 Introduction to Software Engineering
CREDIT HOURS: 3
See the course description for CSCI 3130.03 in the Computer Science section of this calendar.
PREREQUISITES: CSCI 2110.03, CSCI 2132.03, or INFX 3600.03
CROSSLISTED: CSCI 3130.03

INFX 4600 Senior Community Outreach Project I
CREDIT HOURS: 3
Continuation of INFX 3601.03
PREREQUISITES: CSCI 3130.03, INFX 2690.03, and (INFX 3601.03 or CSCI 3191.03)

INFX 4601 Senior Community Outreach Project II
CREDIT HOURS: 3
Continuation of INFX 4600.03
PREREQUISITES: INFX 4600.03

Engineering as a Profession
Engineering is an important profession. Virtually all aspects of modern life are involved with this fascinating discipline. Engineering education at Dalhousie is demanding, because the engineering profession is demanding. Society expects its technical problem solvers to offer answers to some of the most difficult questions around, questions related to the environment, productivity, information technology, communications, transportation, and more. In general, the engineering enterprise contributes not only to human welfare, but also to the sustainable development of our resources. Engineering education provides great rewards for the engineer of the future. Specifically, there is the personal satisfaction of following a career where one's personal expertise can benefit fellow humans and contribute to the making of a better world.

The Faculty of Engineering at Dalhousie University prepares its students with the problem-solving skills needed for lifelong exploration in a field that answers some of today's most pressing concerns. The Faculty of Engineering has an excellent tradition of providing engineering education for students in the Atlantic Provinces that started in 1907 with the founding of the Nova Scotia Technical College. Our graduates occupy many important positions throughout Canada and in many other countries.

The Faculty of Engineering offers undergraduate curricula leading to the degree of Bachelor of Engineering in the following disciplines:

- Chemical Engineering
- Civil Engineering
- Electrical Engineering
- Environmental Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering
- Mineral Resource Engineering

The Faculty also offers a Bachelor of Applied Science in Food Science (admission suspended, pending review), and post-graduate studies at the master's and doctoral level.

For students who are eligible, the Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program that integrates academic study with university approved industrial experience. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined in Section E of the Engineering curricula in this calendar.

The co-operative education system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

The co-op degree program covers almost five calendar years, comprising eight or nine terms (depending on the area of specialization) each consisting of about four months' duration of university work on campus which are pursued alternately with four-month terms of supervised training in the practical experiences fundamental to the development of the graduate engineer. In a typical program of study, the total time spent in academic study is the same as that encountered in the usual course of four academic years.

Graduation from the University is the beginning of a lifelong learning experience. After completion of formal studies leading to the Bachelor of Engineering degree, and being admitted as an Engineer in Training (EIT) by an Association of Professional Engineers in Canada, four years of suitable experience are required as a condition of admission to the profession of Engineering.

The practice of engineering is regulated, by statute, in all Canadian provinces and territories. To become a Professional Engineer you must satisfy the requirements of the licensing bodies. These requirements include a degree from an accredited program, successful completion of a professional practice (law and ethics) examination, and suitable experience. Accreditation of the degree programs by the CEAB is the mechanism by which graduates qualify for registration as Professional Engineers without the need to undertake additional examinations in specific technical subject areas. The BEng programs described in this calendar have been specifically designed to satisfy the criteria of the Profession and are evaluated regularly by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada. The Faculty will not graduate any student who does not meet these requirements because this would jeopardize accreditation for the program. The department responsible for the appropriate program will use these requirements in determining the suitability of student elective course selections. The baccalaureate programs in all disciplines are accredited by the Canadian Engineering Accreditation Board.

Degree Programs

Undergraduate

Engineering

Bachelor of Engineering

Students who have successfully completed the academic study program in any of the disciplines will be granted the degree of Bachelor of Engineering.

Bachelor of Engineering with Distinction

Students who have successfully completed the requirements for the degree of Bachelor of Engineering, and have obtained a Cumulative Grade Point average of at least 3.7, will be granted the degree of Bachelor of Engineering with Distinction.

Bachelor of Engineering with Sexton Distinction

Dr. F.H. Sexton was the President of the Nova Scotia Technical College since its establishment in 1909 until his retirement in 1947. To honour his contributions, the Faculty of Engineering awards the designation of Sexton Distinction to each undergraduate student who has taken a full course load and obtained a cumulative Grade Point Average of at least 3.85 or higher with no failed marks during their program beginning in Academic Term 5.

Co-operative Program Designation

Students who have successfully completed the requirements for the degree of Bachelor of Engineering and who, in addition, have successfully completed three four-month work terms, each of a minimum of 14 weeks, with a minimum of 35 hours per week, or equivalent as determined by the Department and the Co-op office, will receive the "Co-operative Education" designation on their degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines will be granted the Diploma of Engineering.

Combined Bachelor of Science/Diploma of Engineering

Students may register in a combined Bachelor of Science/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Science Degree.

Combined Bachelor of Arts/Diploma of Engineering

Students may register in a combined Bachelor of Arts/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Arts Degree.

Food Science

Bachelor of Applied Science

This is a standard 120 credit hour curriculum. Consult the Food Science section.

Graduate

Master of Applied Science

Students who have successfully completed the course requirements for the degree and who have submitted and defended orally an acceptable thesis, will be awarded the degree of Master of Applied Science.

Master of Engineering

Students who have successfully completed the course requirements for the degree and submitted an acceptable project report, will be awarded the degree of Master of Engineering.

Master of Engineering (Internetworking)

This is a 10 month plus internship/project interdisciplinary Master's Degree program focused on the theory and technology of the Internet. This program has been designed to prepare individuals to play an active role in the rapidly expanding field of Internetworking. Students who complete the prescribed ten courses and a project course will be awarded the MEng (Internetworking).

Master of Science

Students who have successfully completed the course requirements for the degree in Engineering Mathematics or Food Science and who have submitted and defended orally an acceptable thesis or project report, shall be awarded the degree of Master of Science.

Doctor of Philosophy

Students who have successfully completed the course requirements for the PhD degree, passed their comprehensive examination, and submitted and defended orally a satisfactory thesis, will be awarded the degree of Doctor of Philosophy.

Staff

Dean
Newhook, J., BEng, MASc (TUNS), PhD (Dalhousie), PEng

Associate Dean, Undergraduate Studies and Associated Universities
Cyrus, J. P., BSc (Eng) (UWI), MASc, PhD (TUNS), PEng

Assistant Dean, Co-op
Pelot, R., BASc (Ottawa), MASc (Alberta), PhD (Waterloo), PEng

Assistant Dean, Facilities and Resource Planning
Pegg, M. J., BSc, PhD (Leeds), PEng

Assistant Dean, Planning
Bauer, R. J., BSc (Waterloo), PhD (Toronto), PEng

Assistant Dean, Student Affairs
El-Sankary, K., BEng (LU, Lebanon), MASc (Univ of Quebec), PhD (Univ of Montreal), PEng

Director, Core Program
Jarjoura, G., BEng (TUNS), MASc, PhD (Dalhousie), Peng

Engineering (Year I & II)

The Associated University Program
Students who have completed the degree requirements for a Diploma of Engineering or a Certificate of Applied Science from one of the Associated Universities are admissible to the Upper Division in the Faculty of Engineering. Admission to specific programs is competitive and is based on the students' academic standing. The Associated Universities are:

Acadia University
Wolfville, Nova Scotia
A. Mitchell, Director
The Ivan Curry School of Engineering

Cape Breton University
Sydney, Nova Scotia
E. MacLellan, Director
Diploma in Engineering Program

St. Francis Xavier University
Antigonish, Nova Scotia
F. Comeau, Chairman
Department of Engineering

Saint Mary's University
Halifax, Nova Scotia
D. MacNeil, Director
Division of Engineering

University of Prince Edward Island
Charlottetown, Prince Edward Island
N. Krouglicof, Associate Dean
School of Sustainable Design Engineering

Each of the Associated Universities establishes its own entrance requirements. Dalhousie University recognizes all of the Associated Universities and ensures proper standards of achievement by means of the Associated Universities Directors of Engineering Committee. The program at each Associated University contains courses fulfilling the minimum entrance requirements established by the Senate of Dalhousie University. Students who complete the applied science or engineering program at an Associated University may receive a Certificate or Diploma and are normally admitted to the programs in Chemical, Civil, Electrical, Environmental, Industrial, Materials, Mechanical, or Mineral Resource at Dalhousie without examination. Students should ensure that their course selection at the Associated Universities include the discipline specific courses relevant to their program of choice. Not all Associated Universities offer all discipline specific courses, and students should contact the office of the Associate Dean, Faculty of Engineering at the Sexton location, for details. Students who have completed equivalent university studies elsewhere may also be admitted subject to Dalhousie University Regulations.

Please refer to the Graduate and Professional Calendar for details of graduate programs offered by the Faculty of Engineering.

Academic Regulations

Students are reminded that the academic regulations stated in the calendar are abridged for reference. In addition to the Academic Regulations section of this calendar and the regulations stated below, the current Faculty of Engineering Working Rules also apply to all students.

Courses on Letters of Permission
The academic program for a student will normally contain a maximum of two courses on a letter of permission.

Course Grades
A student must achieve a grade of D or greater in each course of the curriculum and satisfy the regulations set out herein in order to graduate. Where Faculty regulations permit, a student who achieves a grade of FM in a required course may write a supplementary examination to attempt to raise the grade to D or greater. If the grade is not raised to at least D by means of a supplementary examination or if a supplementary examination is not permitted, the student must repeat the course. See also Supplementals.

The FM grade will be issued to students with numerical marks in the range 46-49.9%, if a supplemental examination is available in the course.

A student is permitted to repeat a failed mandatory course only once. In the case of a failed elective course, a student may choose either to repeat the course or to substitute another elective course in lieu of the failed course. In the case of a substituted course only one such substitution is allowed. A student will be academically dismissed if the grade achieved in the repeated mandatory course or the repeated elective course or the substituted course is less than D.

Readmission After Academic Dismissal
A student who has been academically dismissed only once from their program may apply to be readmitted to the same program after a minimum of eight months from the time of dismissal, or, such a student may apply to be admitted to a different engineering program starting immediately. Readmission may be granted by the Faculty on the recommendation of the Department concerned. A department may readmit a student who has been academically dismissed, subject to special academic conditions set by the department, which are based on an evaluation of the student's academic record. See also Academic Dismissal.

Scholarships
Only those students who are registered for a full load of courses as measured by the curriculum of the program concerned will be eligible for scholarships and awards in the Faculty of Engineering.

Supplementary Examinations

Eligibility:

Supplemental examinations may be offered to students who:

1. Have received a FM grade in the course (see Course Grades).
2. Are on academic probation and have received a course grade less than C, in an attempt to raise the student's term GPA to at least 2.0.

A student who is on Academic Dismissal is not eligible to write a supplemental examination. Only one supplemental examination will be permitted per session.

Marks:

The supplemental examination mark will normally replace the final examination mark in calculating the course grade. The course grade resulting from a supplemental examination will replace the original course grade for all purposes.

Availability:

Supplemental examinations will not necessarily be available for all courses. If a 1000-level or 2000-level course is offered in the Faculty of Engineering, and it that course has a final examination in the formal examination period, the course will offer supplemental examinations for eligible students. For all engineering courses, students will be informed by the instructor, at the beginning of a course, if a supplemental exam is available.

Dates:

Supplemental examinations will normally be held in late August prior to the fall term, early January in the winter term and early May in the summer term.

In the case of 1000-level and 2000-level supplemental examinations, the supplemental examination will be written at the first supplemental examination date following the final examination date. For 3000-level and 4000-level courses which offer supplemental examinations, the exam will be held at the beginning of the next regularly scheduled study term for the student's program. If the next study term is a fall term, the supplemental examinations will be held in late August, prior to the start of term.

Supplemental examinations for a particular course must be written at the first scheduled date, as outlined above, and cannot be postponed or carried forward to a later session.

Repeating Students
If changes are made in the curriculum, repeating students will be required to satisfy the new curriculum.

Auditing a Course
See definition of "audit student".

Students who are registered for a degree in the Faculty must have the approval of the Faculty to audit a course. Such approval can be obtained by submitting a written request to the Dean, who will refer the matter to the Faculty for a decision.

Students who are not registering for a degree in the Faculty must obtain the approval of the Department to audit a course.

Reporting of absences from Assessments

1. This policy applies to all courses in the Faculty of Engineering.
2. All reporting of medical excuses, or self-reporting of absences, is to the Associate Dean of Engineering.
3. Every syllabus shall specify how missed work will be accommodated.
4. "Final coursework" is excluded.
5. Medical notes are required for missing any work that is considered "Final Coursework". When medical notes are required, the following Faculty of Engineering policy shall be followed.

   Medical Notes
   Students who miss final examinations or final coursework for medical reasons must submit medical notes to the Undergraduate Studies Office for consideration by the Associate Dean of Engineering. This must be done within seven days of the submission deadline or exam date in question. The medical note is verified, and the professor advised if they may submit the grade of ILL before arrangements for special examinations or rewrites may be made. Meanwhile, the student will be given the grade earned in the class, minus the value of the missed examination.

6. A student who misses a deferred examination, shall not be given another deferred examination – in this case, medical evidence can be presented to justify a permanent grade of "ILL".

Fees
Information pertaining to fees and expenses is given in the "Fees" section.

Financial Assistance
Information pertaining to Financial Assistance is given in the "Awards and Financial Aid" section.

Bachelor of Engineering

Introduction

The engineering program is designed for students who have completed senior matriculation (Nova Scotia Grade XII) including mathematics, physics, and chemistry, and rank well in their course. Students may be admitted with advanced placement.

At Dalhousie, students benefit from our unique approach to undergraduate engineering education. Renowned for innovation in education, the unique undergraduate engineering curricula at Dalhousie University provide a sound basis in Mathematics and pure Science and in Engineering Science and Design, that are a foundation for success in any engineering career. A substantial part of the work of the first and second years is common to all programs. The content of many of these courses will change very little over the course of an engineer's career; they will become a sound basis of life-long learning.

The Faculty of Engineering has five engineering departments and one service department, the Department of Engineering Mathematics and Internetworking. Civil and Resource Engineering administers degree programs in the disciplines of Civil, Environmental and Mineral Resource Engineering. The Department of Process Engineering and Applied Science administers a degree program in the discipline of Chemical Engineering. The Mechanical Engineering department administers degree programs in Mechanical Engineering and Materials Engineering. The remaining departments are Electrical and Industrial.

At the end of Year 1, students apply for discipline placement indicating the order of their preferences. The Faculty of Engineering will inform students who have met the criteria of promotion from Year 1 to Year 2 of their conditional placement in one of the accredited programs. The curriculum for each of the basic programs combines required 'core' subjects essential to the field, and 'elective' subjects permitting considerable diversity in individual programs of study. An important part of the curriculum is a series of Complementary Studies courses. The curriculum for the first two years of Engineering at Dalhousie is indicated below. **Students should refer to the appropriate departmental chapter of the calendar once a field of specialization has been determined for subsequent years.**

Admission to an Engineering Discipline
A student must apply to be admitted into one of the engineering disciplines. Application must be made by April 30 of any year, for conditional acceptance into year two of a specified engineering program.

Every engineering discipline has a defined maximum enrollment; therefore places are assigned on a competitive basis. The criterion for this competition is the average grade over all credits completed to date in the core curriculum of the Diploma of Engineering.

The procedure is as follows:

1. By April 30, each student must specify ordered preferences for five engineering disciplines. The application is for conditional acceptance into year two of an engineering discipline.
2. Any student who has completed all of the entry requirements for an engineering discipline, with a GPA of 3.30 or better, will be guaranteed a place in that engineering discipline.
3. In a single competition, students with a GPA greater than or equal to 2.00 and less than 3.30 will be assigned conditional places (year two) in engineering disciplines, proceeding in strict order of GPA, subject to discipline capacities.
4. Any student with a GPA of less than 2.00 will not be admitted to a discipline.

Humanities Electives

Some disciplines of engineering require a student to do one or more humanities electives. In such a case, the definition of a humanities elective shall be as follows:

Humanities would normally be in the Faculty of Arts and Social Sciences and may not include signifiant science, technical or mathematics content, nor may they include economics or language acquisition. Departments which may have suitable courses include: Arabic, Bioethics, Canadian Studies, Chinese, Classics, Contemporary Studies, Creative Writing, Early Modern Studies, English, European Studies, French, Gender and Women's Studies, German, History of Science and Technology, History, International Development Studies, Italian, Journalism, King's Foundation Year Program, Law, Leisure Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Social Work, Sociology and Social Anthropology, Spanish and Latin American Studies, Sustainability, Theatre.

BSc/BEng

Students who meet the admission requirements for the Bachelor of Science program and the Bachelor of Engineering program are eligible to select this concurrent degree option. Students wishing specific advice should consult the Assistant Dean, Faculty of Science and the Associate Dean, Faculty of Engineering. Students accepted will complete the 90 credit hours BSc and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. This opportunity should appeal to students with career objectives in multi-disciplinary fields such as Biomedical Engineering, Environmental Science, or Materials Science (among others). It is thus possible to complete the requirements for the Bachelor of Science and Bachelor of Engineering degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

BA/BEng

Students wishing to do so may complete the 90 credit hours BA degree program and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. It is thus possible to complete the requirements for the Bachelor of Engineering and the Bachelor of Arts degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

Courses in the fourth and fifth years are those required to finish the Bachelor of Engineering degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines may be eligible to apply for the Diploma of Engineering. This means a student must have a minimum GPA of 2.0, and have completed, with a minimum grade of D, the required courses as specified in the discipline curriculum.

Curricula for Terms 1 - 4

Year 1—Term 1 Fall

- ENGI 1103: Engineering Design and Graphics I
- CPST 1103: Technical Communications I
- MATH 1280: Engineering Mathematics I
- ENGM 1081: Computer Programming
- CHEM 1021: Engineering Chemistry I
- PHYC 1190: Introduction to Physics I

Year 1—Term 2 Winter

- ENGI 1203: Mechanics I: Statics
- CPST 1203: Technical Communications II
- MATH 1290: Engineering Mathematics II
- ENGM 1041: Applied Linear Algebra
- CHEM 1022: Engineering Chemistry II
- PHYC 1290: Introduction to Physics II

Year 2—Term 3 Fall

- ENGM 2101: Applied Vector Calculus
- ENGM 2032: Applied Probability and Statistics
- ECED 2000: Electric Circuits
- ENGI 2102: Thermo-Fluid Engineering I
- A three credit hour writing course
- IENG 2005: Engineering Economics

Year 2—Term 4 Winter

- ENGI 2203: Engineering Design II
- HSTC 1801: History of Engineering II
- ENGM 2022: Applied Differential Equations
- Three discipline-specific electives

Discipline-Specific Electives

Chemical Engineering

- CHEE 2201: Fundamentals of Chemical Engineering
- CHEE 2203: Organic Chemistry for Chemical Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Civil Engineering

- ENGI 2204: Mechanics of Materials
- MINE 2200: Introductory Geology for Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Electrical Engineering

- ECED 2001: Circuit Analysis
- ECED 2200: Digital Circuits
- ENGM 2283: Data Structures and Algorithms

Environmental Engineering

- ENGI 2204: Mechanics of Materials
- MINE 2200: Introductory Geology for Engineers
- ENGI 2103: Thermo-Fluid Engineering II

Industrial Engineering

Three electives as follows.

- ENGM 2283: Data Structures and Algorithms
- IENG 2201: Modelling and Optimization for Engineers
- One of the following:
    - ECED 2001: Circuit Analysis
    - ECED 2200: Digital Circuits
    - CHEE 2201: Fundamentals of Chemical Engineering
    - CHEE 2203: Organic Chemistry for Chemical Engineers
    - ENGI 2204: Mechanics of Materials
    - ENGI 2103: Thermo-Fluid Engineering II
    - MINE 2200: Introductory Geology for Engineers
    - ENGI 2400: Mechanics II: Dynamics

Mechanical Engineering

- ENGI 2400: Mechanics II: Dynamics
- ENGI 2103: Thermo-Fluid Engineering II
- ENGI 2204: Mechanics of Materials

Mineral Resource Engineering

- ENGI 2204: Mechanics of Materials
- MINE 2200: Introductory Geology for Engineers
- ENGI 2103: Thermo-Fluid Engineering II

The elective choices are summarized in the table below.

	Discipline-Specific Electives	Environmental	Chemical	Civil	Electrical	Industrial	Mechanical	Mineral Resource
ECED 2001	Circuit Analysis				1	*		
ECED 2200	Digital Circuits				1	*		
CHEE 2201	Fundamentals of Chemical Engineering		1			*		
CHEE 2203	Organic Chemistry for Chemical Engineers		1			*		
ENGM 2283	Data Structures and Algorithms				1	1		
MINE 2200	Geology for Engineers	1		1		*		1
IENG 2201	Modelling and Optimization for Engineers					1		
ENGI 2103	Thermo-Fluid Engineering II	1	1	1		*	1	1
ENGI 2204	Mechanics of Materials	1		1		*	1	1
ENGI 2400	Mechanics II: Dynamics					*	1	

* any one

Engineering Co-op Program
The Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program (BEng Co-op) that allows students to alternate career focused work terms with study terms and receive a Co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined below.

BEng Co-op is a selective program. Students interested in participating must apply, via the S.I.T.E. Co-op (http://www.dal.ca/faculty/site.html) as follows:

- Chemical, Materials, and Mechanical - December 15
- Civil, Electrical, Environmental, Industrial, and Mineral Resource - March 15

The Study and Work Schedule

The co-operative system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four-month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

Each discipline has a specific work and study term schedule which students are required to follow (see the study and work sequence chart below). Work terms do not begin until third year of the program. All programs end on an academic term rather than a work term to allow for the formal integration of workplace and classroom learning.

Study and Work Sequences

Discipline	**Fall**	**Winter**	**Summer**	**Fall**	**Winter**	**Summer**	**Fall**	**Winter**
Electrical	Study	Work	Study	Work	Study	Work	Study	
Industrial	Study	Work	Study	Work	Study	Work	Study	Study
Environmental, Civil and Mineral Resource	Study	Study	Work	Work	Off	Work	Study	Study
Chemical, Materials and Mechanical	Work	Study	Work	Study	Work	Work	Study	Study

See S.I.T.E. for a full description of the Co-op Program. Further details can be obtained from the S.I.T.E. Co-op Office (http://www.dal.ca/faculty.site.html).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Courses for First 2 Years
Standard Courses for first 2 years of Study:
ECED 2000.03: Electric Circuits
ECED 2001.03: Circuit Analysis
ECED 2200.03: Digital Circuits
ENGI 1103.03: Engineering Design I
ENGI 1203.03: Mechanics I: Statics
ENGI 2102.03: Thermo-Fluid Engineering I
ENGI 2103.03: Thermo-Fluid Engineering II
ENGI 2203.03: Engineering Design II
ENGI 2400.03: Mechanics II
ENGM 1041.03: Applied Linear Algebra
ENGM 1081.03: Computer Programming
ENGM 2032.03: Applied Probability and Statistics
ENGM 2101.03: Applied Vector Calculus
IENG 2005.03: Engineering Economics
PEAS 2201.03: Fundamentals of Process Engineering
PEAS 2202.03: Fundamentals of Environmental Engineering

CPST Series: Complementary Studies Courses

CPST 1103.015: Technical Communications I
CPST 1203.015: Technical Communications II
CPST 3030.03: Engineering in Society II

Course Descriptions

CPST 1103 Technical Communications I
CREDIT HOURS: 1.5
Technical writing and presentation skills, study skills, examination skills and an introduction to the variety of disciplines of engineering and academic regulations for engineering.
COREQUISITES: ENGI 1103.03
FORMATS: Lecture

CPST 1203 Technical Communications II
CREDIT HOURS: 1.5
Introduction to the engineering profession, engineering ethics and professional responsibility as well as technical writing and presentation skills.
COREQUISITES: ENGI 1203.03
FORMATS: Lecture

CPST 3030 Engineering in Society II
CREDIT HOURS: 3
The course provides an overview of the concepts and interrelationships among sustainable development, environmental stewardship and public health and safety in relation to engineering practice. These concepts will be examined through historical examples and current theory and practice of the engineering profession. Lectures and discussion will consider global ecosystem functions, human interactions with the environment, methods of reducing human impacts; methods of achieving sustainability, engineering challenges to enhance sustainable development; and factors that influence occupational health and safety from engineering and management viewpoints. Students will be exposed to management methods and tools such as environmental auditing, ISO 14000, risk analysis and WHMIS and will be expected to consider class topics in relation to their own area of engineering specialization.
FORMATS: Lecture

ENGI 1103 Engineering Design I
CREDIT HOURS: 3
The objective ot the class is to provide students with conceptual design experience, team work experience, computer drafting experience and to develop skills in engineering free-hand sketching, 3-D visualization, and reading/drafting of engineering drawings. An integral part of the class is the Design Project, focused on design as the essence of engineering, and the process of design and reporting.
COREQUISITES: CPST 1103.03
EXCLUSIONS: ENGI 1101.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENGI 1203 Mechanics I: Statics
CREDIT HOURS: 3
This course teaches the basic concepts in engineering mechanics. Topics considered include; Vectors, forces, equilibrium of particles, rigid bodies and structures, internal loadings, centroids and moments of inertia as well as dry friction. An individual design project is a major component of this course.
COREQUISITES: CPST 1203.03
PREREQUISITES: PHYC 1190.03, MATH 1280.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENGI 2102 Thermo-Fluid Engineering I
CREDIT HOURS: 3
This course introduces the engineering sciences of thermodynamics and fluid mechanics in an integrated manner. A unified approach to energy transfer in thermal and mechanical systems is presented. The course covers basic properties of fluids, fluid statics, simplified analyses of fluid motion, the basic laws of thermodynamics, and the application of control volume techniques to engineering problems. Power systems are introduced through a study of the Rankine cycle.
PREREQUISITES: ENGI 1203.03, CHEM 1022.03; MATH 1290.03, PHYC 1190.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGI 2103 Thermo-Fluid Engineering II
CREDIT HOURS: 3
This course builds on the fluid mechanics introduction presented in Thermo-fluids I to present engineering concepts of fluid mechanics and energy. The course covers dimensional analysis, completes fluid statics from Thermo-Fluids I, puts a large emphasis on the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations, treats flow in ducts putting emphasis on head losses (friction and minor) and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.
PREREQUISITES: ENGI 2102.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGI 2203 Engineering Design II
CREDIT HOURS: 3
This class provides a project-based exercise in the engineering design process. Students work in teams and as individuals on defined projects which apply knowledge and skills in all areas of engineering studied in semesters 1 to 3. The projects encompass the design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section either through (i) construction and testing of a physical prototype or (ii) development and testing of an engineering simulation model.
PREREQUISITES: ENGI 1103.03, ENGI 1203.03, ENGM 1081.03, CPST 1103.015, CPST 1203.015

ENGI 2204 Mechanics of Materials
CREDIT HOURS: 3
This course teaches the fundamentals of stress, strain and deformation of a solid body subjected to static forces. Topics considered include; stresses and strains under axial, bending, torsional and combined loadings, transformation relations for stresses and strains, Mohr's circle and mechanical properties of materials.
PREREQUISITES: ENGI 1203.03, MATH 1290.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENGI 2400 Mechanics II
CREDIT HOURS: 3
This second class in Engineering Mechanics considers the kinematics and kinetics of a single particle and a single rigid body. The class builds on the concepts introduced in ENGI 1400.03 (Mechanics I). Both vector and scalar methods are used. Topics include kinematics of a particle, kinetics of a particle, kinematics of a rigid body in plane motion, and planar kinetics of a rigid body.
PREREQUISITES: ENGM 1081.03; MATH 1290.03; PHYC 1190.03,1290.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

ENGI 8890 Co-op Orientation and Job Competition Preparation
CREDIT HOURS: 0
This on-line course introduces aspects of career development including, self-assessment, resume and cover letter writing, interviewing skills and job search techniques. It provides students with an overview of the graduate attributes, the Pre-Grad EIT work credit, and co-op program policies and procedures. This class is available every term and is a pre-requisite for all engineering co-op classes. It must be completed one term prior to the first work term. The grade will be Pass/Fail.

Chemical Engineering

Location: F Building
1360 Barrington Street
Room 1117
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-4597

Website: www.dal.ca/peas

Email: peasugrad@dal.ca

Introduction
The Chemical Engineering program prepares students for careers in the chemical and process industries and in a variety of related fields. These encompass, among others, the traditional areas of environmental control, plastics and polymers, pulp and paper, instrumentation and process control, petrochemicals, petroleum and natural gas processing, and energy conversion and utilization, as well as the growing fields of biotechnology, food processing, composite materials, corrosion and protective coatings, and manufacture of microelectronic components.

The responsibilities assumed by Chemical Engineers include a wide range of activities such as research and development of novel products and processes, the design, development and operation of process plants, and management of technical operations and sales.

The curriculum is designed to provide the student with a broad background in the underlying sciences of Chemistry, Physics and Mathematics. This is then combined with a detailed knowledge of engineering principles and practice, along with a good appreciation of social and economic factors. Laboratory involvement is considered an important component of the students' education. Emphasis in the laboratory is placed on team work and on the development of problem-identification and problem-solving skills. The Department stresses the preparation of students for independent work and the development of interpersonal skills necessary for professional engineers.

Research opportunities leading to master's and doctoral degrees are offered in a wide range of topics within the Department as well as in conjunction with other departments and a number of research centres on the campus. Detailed information regarding the graduate program can be obtained from the Department.

Undergraduate students have the option of following a co-op program (five years) or a non-co-op program (four years).

Curriculum and course descriptions
Refer to sections IIB and IIIB, Chemical Engineering Programs in the Process Engineering and Applied Science section.

Co-operative program and schedule
Refer to section Engineering Co-op Program, in the Engineering section.

Admissions
Admission requirements are those specified by the Faculty of Engineering.

Staff

Dean
Newhook, J., BEng, MASc (TUNS), PhD (Dalhousie), PEng

Department Head, Process Engineering and Applied Science
Kuzak, S. G., BEng, MEng (McGill), PhD (TUNS), PEng

Undergraduate Program Co-ordinator
Haelssig, J., BASc, PhD (Ottawa), PEng

Civil and Resource Engineering

Introduction
The Department of Civil and Resource Engineering consists of the Civil Engineering Program, Mineral Resource Engineering Program and Environmental Engineering Program. The Department currently offers three accredited professional degree programs:

BEng in Civil Engineering, co-op and non co-op programs;

BEng in Mineral Resource Engineering, co-op and non co-op programs.

BEng in Environmental Engineering, co-op and non co-op programs.

For additional information on these programs and the nature of the engineering studies involved, the reader is referred to individual program listings in the Faculty of Engineering section of this calendar.

Staff

Dean
Newhook, J., BEng, MASc (TUNS), PhD (Dalhousie), PEng

Department Head
Liu, Y., BScE, MScE (Xi'an), PhD (UNB), PEng

Professors
Ali, N. A., BSc (Baghdad), MSc, PhD (N Carolina State), PEng, Undergraduate Civil Program Coordinator
Gagnon, G. A., BScE (Guelph), PhD (Waterloo), PEng, Associate Vice-President Research, Director, Centre for Water Resources
Garagash, D., BSc (Moscow), MS, PhD (Minnesota), PEng
Lake, C., BEng (TUNS), PhD (UWO), PEng
Liu, L., BSc (Nankai), MSc (Peking), PhD (Regina), PEng - Co-op Advisor - ENVE
Liu, Y., BScE, MScE (Xi'an), PhD (UNB), PEng
Newhook, J. P., BEng, MASc, PhD (TUNS), PEng
Satish, M. G., BSc, BECivEng (My), MEng, PhD (Concordia), PEng
Walsh, M. E., BEng (TUNS), MEng (McGill), PhD (Dalhousie), PEng
Zou, D. H., BSc (CUMT, China), PhD (UBC), PEng

Associate Professors
Corkum, A., BEng (TUNS), MEng, PhD (Alberta), PEng, Undergraduate Mineral Program Coordinator
El Naggar, H., MESc, PhD (UWO), PEng, Graduate Coordinator
Gibson, M., BA (Sheffield Hallam), MSc, PhD (Strathclyde), PEng
Hansen, D., BScE (Guelph), MScE (UNB), PhD (Ottawa), PEng, Co-op Advisor - CIVL
Jamieson, R., BEng (TUNS), MASc (Dalhousie), PhD (Guelph), PEng, Undergraduate Environmental Program Coordinator
Jones, D., Dip Eng (Memorial), BEng (TUNS), MBA (Western), PhD (TUNS), PEng

Assistant Professors
Bahrani, N., BSc (Azad Univ), MSc (Alberta), PhD (Laurentian), Co-op Advisor - MINE
Kurylyk, B., BSc, PhD (UNB), PEng
Oudah,F., BSc, (Sharjah) MSc, PhD (UC), PEng
Sadeghian, P., BSc, MSc (Sharif), PhD (Amirkabir), PEng
Stoddart, A., BEng, PhD (Dalhousie)
Tousignant, K., BASc, PhD (UT)

Adjunct Professors
Craig, S., BSc (Hons), PhD (Strathclyde)
Fam, A. Z., BSC (Alexandria) MSc, PhD (Manitoba) PEng
Hills, C., BSc, MSc (Queen Mary), PhD (Imperial)
Kenny, S., BEng, MEng, PhD (Memorial), PEng
Millward, H., BA (Lanchester Polytechnic) MA, PhD (Western)
Pegg, N., BSc (Guelph), MASc (UBC), PhD (TUNS), PEng
Rand, J., CAS (Acadia), BEng, PhD (Dalhousie)
Spooner,I., BSc, MASc (Queens) PhD (Calgary)

Targino, A. C., BSc (Campina Grande), MSc (São Paulo), MSc, PhD (Stockholm Univ)
Thomas, M., BSc (Nottingham) PhD (Univ of Aston)

Civil Engineering
Years 1 and 2 follow the program that is outlined in the 'Faculty of Engineering' section of this calendar. The two Options, Earth and Environment and Infrastructure, contain a strong common core in those aspects of engineering considered to be crucial for all civil engineering baccalaureates, irrespective of specialization. Terms 5 and 6 are the same for both Options. In Terms 7 and 8 students will have the opportunity to select some courses from a list of technical electives based on their specific interests in focus areas of Civil Engineering.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Infrastructure Option

Term 5 (Fall)

- CIVL 3101.03: Soil Mechanics
- CIVL 3300.03: Hydraulics
- CIVL 3451.03: Water Quality & Treatment
- CIVL 3505.03: Structural Systems I-Form and Analysis
- CIVL 3705.03: Mechanics of Structural Materials & Components
- CIVL 3830.03: Surveying & Applied Geomatics

Term 6 (Winter)

- CIVL 3200.03: Transportation Engineering
- CIVL 3310.03: Engineering Hydrology
- CIVL 3515.03: Structural Systems II-Loads & Behaviour
- CIVL 3725.03: Construction Materials & Methods
- ENGM 3052.03: Applied Numerical Methods
- CIVL 3840.02: Professional Practice in Civil Engineering

Term 7 (Fall)

- CIVL 4111.03: Geotechnical Engineering
- CIVL 4515.03: Reinforced Concrete Design
- CIVL 4525.03: Design of Steel Structures
- CIVL 4702.02: Senior Project I
- Technical Elective I
- Technical Elective II

Term 8 (Winter)

- CIVL 4711.02: Construction Planning
- CIVL 4703.03: Senior Project II

- CPST 3030.03: Engineering in Society II
- Technical Elective III
- Technical Elective IV
- Technical Elective V

Total number of technical electives must equal five.

Total of five (minimum of four) electives may be chosen from the following courses (schedule permitting):

- CIVL 4200.03: Transportation Systems
- CIVL 4250.03: Highway Engineering
- CIVL 4350.03: Hydraulic Engineering
- CIVL 4410.03: Engineering Hydrogeology
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4440.03: Water & Wastewater Treatment
- CIVL 4460.03: Solid Waste and Landfill Engineering
- CIVL 4542.03: Applications of Finite Element Method in Structural Eng.
- CIVL 4560.03: Special Topics in Structural Systems
- MINE 4100.03 Mining Geotechnique

Total of one elective may be chosen from the following courses (schedule permitting):

- ENGM 4675.03: Risk Assessment Management
- ERTH 3500.03: Geoscience Info Management
- IENG 4558.03: Project Management

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses. Students require a 3.30 cumulative GPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a graduate level course.
2. Not all of the technical elective courses will be offered each year.
3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought form the instructor.
4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Earth and Environment Option

Term 5 (Fall)

- CIVL 3101.03: Soil Mechanics
- CIVL 3300.03: Hydraulics
- CIVL 3451.03: Water Quality & Treatment
- CIVL 3505.03: Structural Systems I-Form and Analysis
- CIVL 3705.03: Mechanics of Structural Materials & Components
- CIVL 3830.03: Surveying & Applied Geomatics

Term 6 (Winter)

- CIVL 3200.03: Transportation Engineering
- CIVL 3310.03: Engineering Hydrology
- CIVL 3515.03: Structural Systems II-Loads & Behaviour
- CIVL 3725.03: Construction Materials & Methods
- CIVL 3840.02: Professional Practice in Civil Engineering
- ENGM 3052.03: Applied Numerical Methods

Term 7 (Fall)

- CIVL 4440.03: Water & Wastewater Treatment
- CIVL 4702.02: Senior Project I
- ENVE 4772.03: Environmental Assessment & Management
- Technical Elective I
- Technical Elective II
- Technical Elective III

Term 8 (Winter)

- CIVL 4410.03: Engineering Hydrogeology
- CIVL 4711.02: Construction Planning
- CIVL 4703.03: Senior Project II
- CPST 3030.03: Engineering in Society II
- Technical Elective IV
- Technical Elective V

Total number of technical electives must equal five.

Total of five courses (minimum of four courses) may be chosen from the following courses (schedule permitting):

- CIVL 4111.03: Geotechnical Engineering
- CIVL 4200.03: Transportation Systems
- CIVL 4350.03: Hydraulic Engineering
- CIVL 4359.03: Form and Process in Alluvial Channels
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4460.03: Solid Waste and Landfill Engineering
- MINE 4100.03 Mining Geotechnique
- MINE4815.03: Mining and the Environment

Total of one course may be chosen from the following courses (schedule permitting):

- ERTH 3500.03: Geoscience Information Management
- ENGM 4675.03: Risk Assessment Management
- IENG 4558.03: Project Management
- PLAN 4106.03: Transportation Planning

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses.
2. Not all of the technical elective courses will be offered each year.
3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought form the instructor.
4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Environmental Engineering
Environmental Engineering offers two versions of the BEng Program:

1. Non Co-op Program

2. Co-op Program

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Work Term 1 (Fall)

Term 5 (Fall)

- CIVL 3101.03: Soil Mechanics
- CIVL 3300.03: Hydraulics
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3830.03 Surveying & Applied Geomatics
- ENVE 3251.03: Environmental & Industrial Microbiology
- ENVE 3461.03: Environmental Measurements and Analysis

Term 6 (Winter)

- CIVL 3310.03: Engineering Hydrology
- CIVL 3840.02: Professional Practice in Civil Engineering
- CIVL 4460.03: Solid Waste and Landfill Engineering
- ENGM 3052.03: Applied Numerical Methods
- ENVE 3500.03: Air Quality
- LAWS 2800:03 Intro to Environmental Law

Work Term 4 (Summer)

Term 7 (Fall)

- CIVL 4440.03: Water & Wastewater Treatment
- ENVE 4401.03: Design Project for Environmental Engineering
- ENVE 4772.03: Environmental Assessment & Management
- MINE 4300.03: Optimization Methods in Mining and Civil Engineering
- Technical Elective I
- Design Elective I **(with minimum CEAB design content)

Term 8 (Winter)

- CIVL 4410.03: Engineering Hydrogeology
- CPST 3030.03: Engineering in Society II
- ENVE 4402.03: Design Project for Environmental Engineering II
- Design Elective II**
- Technical Elective II

Environmental Engineering—Recommended Technical Electives

- CIVL 4111.03 Geotechnical Engineering
- CIVL 4200.03 Transportation Systems
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4359.03: Form and Process in Alluvial Channels
- ENVS 4002.03: The Science of Wetland Ecosystems
- ERTH 3500.03: Geoscience Information Management
- IENG 4558.03: Project Management

Environmental Engineering—Recommended Design Electives

- CIVL 4111.03: Geotechnical Engineering
- CIVL 4200.03: Transportation Systems
- CIVL 4431.03: Water Distribution & Sewerage Systems
- CIVL 4350.03: Hydraulic Engineering
- MINE 4100.03: Mining Geotechnique

Note: Technical electives from other departments may be selected subject to availability and approval by the departments concerned.

Not all technical electives will be offered every year.

Mineral Resource Engineering
Years 1 and 2 follow the common program outlined in the Engineering section of this calendar.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	FREE

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Year 3 Term 5 (Fall)

- MINE 3520.03: Introductory Mining Engineering
- MINE 3530.03: Mineral Processing
- MINE 3605.03: Mining Geology I
- CIVL 3101.03: Soil Mechanics
- CIVL 3830.03: Surveying & Applied Geomatics
- MINE 3620.03: Petroleum Eng.

Year 3 Term 6 (Winter)

- MINE 3600.03: Equipment Selection & Materials Handling
- MINE 3612.03: Rock Penetration & Fragmentation
- MINE 4706.03: Mining Geology II
- MINE 4711.03: Mine Vent & Environment
- MINE 3611.03: Rock Mechanics

- MINE 4100.03: Mining Geotechnique

Year 4 Term 7 (Fall)

- MINE 4300.03: Optimization Methods in Mining and Civil Engineering
- MINE 4750.03: Senior Design Project I
- MINE 4815.03: Mining and the Env.
- MINE 4835.03: Mineral Economics
- Technical Elective I
- Technical Elective II

Year 4 Term 8 (Winter)

- MINE 4850.03: Senior Design Project II
- CPST 3030.03: Engineering in Society II
- MINE 4710.03: Mine Excavation Systems
- LAWS 2800: Introduction to Environmental Law
- Technical Elective III

* Minimum 2 of the 3 Technical electives must be from Mineral Resource Engineering (MINE xxxx)

Technical Electives:

You must take a minimum of 2 courses from Table 1

Table 1

1	MINE 4801.03	Advanced Topics in Rock Mechanics
2	MINE 4820.03	Surface Mine Slope Stability
3	MINE 4821.03	Petroleum Reservoir Engineering

You may take a maximum of 1 course from Table 2

Table 2

1	ENVE 4772.03	Environmental Assessment
2	MINE 4816.03	Mining Engineering Project
3	IENG 4558.03	Project Management and Control
4	CIVL 4111.03	Decision and Risk Analysis
5	CIVL 4410.03	Engineering Hydrogeology
6	or any other approved technical elective - must contact department for approval	

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses. Students require a 3.30 CGPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a Graduate level course.
2. Not all of the technical elective courses will be offered each year.
3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.
4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Civil Engineering Series

CIVL 3101 Soil Mechanics I
CREDIT HOURS: 3
This course is concerned with the physical and mechanical properties of soils. It includes topics of soil chemistry and soil fabric, soil classification, compaction, hydraulic conductivity, one-dimensional and two-dimensional seepage, soil compressibility, time dependant deformation of soils, and shear strength behaviour of soils. Laboratory sessions involve experimentally evaluating the engineering properties of several different soil types and the application of these results to engineering problems.
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

CIVL 3200 Transportation Engineering
CREDIT HOURS: 3
This course commences with an introduction to Transportation Engineering in the context of planning, design and operations of urban and rural systems. The course also provides an introduction to route location with special emphasis on Canadian standards and specifications. It also includes detailed study of road design elements, vehicle motion, vehicle/pavement interaction, and principles of roadway capacity.
PREREQUISITES: CIVL 3830.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CIVL 3300 Hydraulics
CREDIT HOURS: 3
Fluid mechanics principles are applied to practical hydraulic problems involving flow in closed conduits and in open channels. Topics in pipe flow include losses in pipes, pipes in series and parallel, and network analysis. Topics in open channel flow deal with classification of flows, open channels and their properties, energy and momentum principles, uniform flow, design of erodible and non-erodible channels, and gradually varied flow. These aspects are explained in lectures and validated by laboratory measurements and demonstrations.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CIVL 3310 Engineering Hydrology
CREDIT HOURS: 3
The emphasis in this course is on quantitatively describing the physical processes in the hydrologic cycle. Such processes include precipitation, evaporation, infiltration, groundwater movement, surface runoff, as well as lake/reservoir routing effects. A working rainfall-runoff model is developed, and by convolution is used to produce a design hydrograph. The size of a detention ponds, statistical hydrology, and snow hydrology are also discussed.
PREREQUISITES: ENGI 2102.03, ENGM 2022.03, ENGM 2032.03, CIVL 3300.03, MINE 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CIVL 3451 Water Quality and Treatment
CREDIT HOURS: 3
The course expands on the student's previous experience in aqueous chemistry and fluid mechanics. The course provides an Engineering perspective on: (i) water quality analysis, specifically on the physical, chemical and biological characteristics of water; (ii) significance and interpretation of water quality properties; (iii) modeling water quality in natural and engineered systems; and (iv) water treatment systems at the introductory level.
PREREQUISITES: CHEM 1021.03 and CHEM 1022.03, ENGI 2103.03
EXCLUSIONS: PEAS 2202
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 2

CIVL 3505 Structural Systems I: Form and Analysis
CREDIT HOURS: 3
This course begins with a review of the analysis of trusses and shear and moment in beams. Majority of the course covers the calculation of elastic deformations for statically determinate structures and various methods for analyzing statically indeterminate structures focusing on slope deflection method and moment distribution method. The application of matrix analysis in computer modeling using a typical commercially available structural analysis program will be introduced. Also the concept of influence lines for moving loads on statically determine structures will be discussed.
PREREQUISITES: PHYC 1190.03, ENGI 1202.045
FORMATS: Lecture | Tutorial

CIVL 3515 Structural Systems II: Loads and Behaviour
CREDIT HOURS: 3
The objective of the course is to provide students with a solid background in the fundamentals of structural design used for typical civil engineering structures such as trusses, building frames and floor systems. The background and application of the National Building Code of Canada provisions for structural design will be emphasized. The student will be able to size basic tension, compression and flexural elements using steel, concrete and timber, for representative structures.
COREQUISITES: CIVL 3725.03
PREREQUISITES: CIVL 3505.03, CIVL 3705.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CIVL 3705 Mechanics of Structural Materials and Components
CREDIT HOURS: 3
The content is focused on the application of the principles of the mechanics of solids in the design and analysis of structural materials and components. Building on engineering skills gained in the first two years, the class will examine general stress analysis, failure criteria, flexure, shear, torsion, compression buckling and plasticity as these aspects apply to structural components constructed of timber, steel, concrete and fibre-reinforced polymers.
PREREQUISITES: PHYC 1190.03, ENGI 1202.045, ENGI 2400.04, ENGM 1041.03, MATH 1280.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 2

CIVL 3725 Construction Materials and Methods
CREDIT HOURS: 3
The purpose of this course is to provide students with knowledge of residential and commercial building techniques and materials. In it, the properties and applications of common construction materials, components, and systems that relate to wood, steel, and concrete-frame structures are examined.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CIVL 3830 Surveying and Applied Geomatics
CREDIT HOURS: 3
An introduction to the principles, calculations and equipment used in surveying and geomatics is presented with focus on their applications to civil and mineral resource engineering. Topics include fundamentals of distance measurement and surveying, leveling, traverses, corrections, GPS and Total Station instruments, coordinate systems and geodetic reductions, Geographic Information Systems, and engineering applications of geomatics with particular focus on common civil engineering and mining construction activities. Laboratory exercises will cover the basics of surveying techniques, building up to an exercise in combining a measured GPS data set to a pre-existing GIS database for engineering design considerations of a facility.
EXCLUSIONS: CIVL 0124 and CIVL 4830
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

CIVL 3840 Professional Practice in Civil Engineering
CREDIT HOURS: 2
This course is designed to provide Civil Engineering students with knowledge related to professional practice in Civil Engineering. The course is designed to incorporate elements of Engineers Canada National Professional Practice Exam. Lectures and case studies will be used to discuss topics such as professionalism in Civil Engineering, ethics, professional practice, law and safety. Oral and written communication skills will be emphasized through report writing, essays, and presentations.
PREREQUISITES: CIVL 3725
EXCLUSIONS: CPST 3020
FORMATS: Lecture
LAB HOURS PER WEEK: 0

CIVL 4100 Earth Slopes/Embankments
CREDIT HOURS: 3
The focus of this class is the practical application of soil mechanics theory to soil slope stability issues in civil and mining engineering. Methods for soil slope stability analysis of natural slopes, cuts, embankments and, earth and tailings dams are presented. The effects of porewater pressures, and earthquake loadings are considered, as well as stabilization methods for slopes. Seepage through small earth dams, together with measures to control seepage, is considered. The class is focused primarily on the mining environment; however, the concepts are also directly applicable to civil engineering practice. The major topics covered include: soil mechanics and seepage applied to slope stability, modes of slope instability, methods of slope stability evaluation, remediation of unstable slopes, and soil embankments and small dams (tailings).
PREREQUISITES: CIVL 3101.03
FORMATS: Lecture | Tutorial

CIVL 4111 Geotechnical Engineering
CREDIT HOURS: 3
This course is concerned with the geotechnical aspects of temporary and permanent retaining walls for infrastructure or environmental works, deep and shallow foundations, soil-pipeline interaction, and design/analysis of natural cuts, embankments, and earth dams. The application of these design/analyses to particular infrastructure and environmental structures are emphasized in the laboratory sessions.
PREREQUISITES: CIVL 3101.03
FORMATS: Lecture | Tutorial

CIVL 4200 Transportation Systems
CREDIT HOURS: 3
This course covers urban transportation planning, transportation demand and supply, transportation management. The environmental impact of transportation systems such as noise and air pollution will be examined. Methods to measure, predict, and evaluate impact of transportation modes will be covered.
PREREQUISITES: CIVL 3200.03
FORMATS: Lecture | Tutorial

CIVL 4250 Highway Engineering
CREDIT HOURS: 3
This course provides introduction to route location with special emphasis on Canadian standards and road design elements. It includes a surveying workshop. The purpose of workshop is to expose students to operation and application of surveying instrumentation. It includes topics of vertical and horizontal curves, roadway design elements and classification, alignment and cross section elements, drainage and earthwork operations, highways materials and pavement design.
PREREQUISITES: CIVL 3200.03
FORMATS: Lecture | Tutorial

CIVL 4350 Hydraulic Engineering
CREDIT HOURS: 3
This course deals with the application of hydraulics in civil engineering design. The topics include design of culvert systems, storage dams (gravity dams, arch dams, buttress dams, earth dams and rock-fill dams), overflow and chute spillways with emphasis on design of stilling basins. Hydraulic machinery (pumps and turbines) will be discussed with an emphasis on the selection a machine for a given application. Design of single port and multi-port outfall structures for effluent disposal in rivers and in oceans will also be discussed. Regular lectures and tutorial sessions will be supplemented with expert speakers from the industry and field trips.
PREREQUISITES: CIVL 3300.03
FORMATS: Lecture | Tutorial

CIVL 4359 Form and Process in Alluvial Channels
CREDIT HOURS: 3
This course will consider various aspects of fluvial geomorphology from a civil engineering point-of-view. This will include discussion of hydraulic resistance based on quantitative estimates of channel roughness, regime concepts for artificial and natural rivers, uses of boundary shear stress and unit stream power in bed-load estimations, the hydraulics and statistics of suspended sediment, numerical versus physical modelling, and a review of case histories of responses of rivers to human activity. The hydraulics of fish habitat assessment is also considered. The application of HEC RAS to a bridged brook is done as a group project.
PREREQUISITES: CIVL 3300.03 and CIVL 3310.03 (minimum), CIVL 4350.03 (preferable)
CROSSLISTED: CIVL 6159.03
EXCLUSIONS: CIVL 6159.03
FORMATS: Lecture | Tutorial

CIVL 4410 Engineering Hydrogeology
CREDIT HOURS: 3
This quantitative introduction to groundwater engineering covers fundamental hydrogeology topics, including: saturated and unsaturated groundwater flow through porous media and fractured rock, groundwater flow equation solutions, well hydraulics and design, pumping test analysis, groundwater-surface water interactions, and subsurface contaminant transport and attenuation. Course content is addressed in the context of groundwater resources management.
PREREQUISITES: CIVL 3101.03
FORMATS: Lecture | Tutorial

CIVL 4431 Water Distribution and Sewerage Systems
CREDIT HOURS: 3
This design-oriented introduction to municipal engineering is concerned with the hydraulic and hydrologic basis for our water-related urban infrastructure. Specifically, the design of potable water distribution systems, wastewater collection systems, and storm water management systems is presented. The minimization of the environmental impacts associated with the construction of a subdivision is also presented, both qualitatively and quantitatively.
PREREQUISITES: CIVL 3300.03, CIVL 3310.03
FORMATS: Lecture | Tutorial

CIVL 4440 Water and Wastewater Treatment
CREDIT HOURS: 3
The focus of the course is on design of water treatment and municipal pollution control plants. Lectures and laboratory periods are on physical chemical and microbiological qualities of water and municipal wastewater. Lectures include various unit operations and unit processes of water and domestic wastewater treatment. Field visits to local and water and wastewater treatment plants are included.
PREREQUISITES: CIVL 3451.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 2

CIVL 4460 Solid Waste & Landfill Engineering
CREDIT HOURS: 3
This course provides the students with an understanding of the types of solid waste generation, physical and chemical properties of solid waste, solid waste treatment and disposal alternatives, design and operation of a landfill (including landfill components and configuration, landfill sitting, liner system, leachate control and treatment, and gas collection and control system).
PREREQUISITES: CIVL 3101.03, CIVL 3451.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CIVL 4515 Reinforced Concrete Design
CREDIT HOURS: 3
This course will provide students with a basic understanding of the behaviour and analysis of reinforced concrete as a structural material, elementary skills and concepts necessary for designing a variety of common structural elements, and appropriate analysis techniques and code approximations. Current design code provisions related to flexure, shear and compression members will be reviewed leading to practical design examples for one-way floor systems, columns, footings, and cantilever retaining walls.
PREREQUISITES: CIVL 3515.03
FORMATS: Lecture | Tutorial

CIVL 4525 Design of Steel Structures
CREDIT HOURS: 3
This introductory design course emphasizes the behaviour and design of steel members resisting tensile, compressive, and flexural loads and simple connections of these elements. Members subject to combined loading will also be studied. Upon course completion, the student will be able to design building elements to CSA-S16.1-01. Although most design examples will be based on framed buildings, many of the concepts apply equally to other types of structures; e.g. bridges, towers, and submarine hulls.
PREREQUISITES: CIVL 3515.03
FORMATS: Lecture | Tutorial

CIVL 4542 Applications of Finite Element Method in Structural Engineering
CREDIT HOURS: 3
This introductory course will provide students with basic understanding of the finite element method and its application in structural engineering. An overview of the FE theory is presented followed by providing the students with hands on experience in developing, validating, and analyzing models for basic structural systems using commercial FE software. Advanced topics in FE will be also introduced including structural dynamics and optimization.
PREREQUISITES: CIVL 3515.03, CIVL 3705.03, CIVL3740.03 or ENGM 3052.03
EXCLUSIONS: CIVL4541
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CIVL 4560 Special Topics in Structural Systems
CREDIT HOURS: 3
Basic knowledge acquired from introductory design courses will be extended and synthesized in the analysis and design of aggregate systems including two-way concrete floor systems, pre-stressed concrete girders, and composite systems incorporating concrete and steel materials. Basic engineering concepts in the design of masonry structures will be introduced and extended to the design of masonry beams, columns, walls and building systems.
PREREQUISITES: CIVL 3515.03, CIVL 4515.03
FORMATS: Lecture | Tutorial

CIVL 4702 Senior Project I
CREDIT HOURS: 2
This course develops the senior project required for CIVL 4703. Topics include introduction to potential senior project topics, case studies of design projects by industry representatives, client meetings to discuss project scopes, project management of design projects, team building, and report writing and oral presentation requirements for various deliverables of CIVL 4702 and CIVL 4703. The deliverable for this course, a formal proposal, must be prepared to a professional standard of engineering practice. Students are also expected to formally present their proposal to the class and faculty.
PREREQUISITES: Must have completed all third-year courses, or seek approval from the Civil, Environmental and Mineral Resource Department
EXCLUSIONS: CIVL 4801.01
FORMATS: Lecture

CIVL 4703 Senior Project II
CREDIT HOURS: 3
The objective of this course is to provide experience in the application of engineering principles to the solution of specific problems in Civil Engineering. Under the supervision of a faculty member, students execute a project that may include laboratory and/or field experiments, design work, numerical simulations, technical communications on state-of-the-art technologies, or analysis of case histories. Students prepare a formal report according to faculty standards for report preparation and make an oral presentation of their project.
PREREQUISITES: CIVL 4702.02
EXCLUSIONS: CIVL 4803.03 & CIVL 4802.02
FORMATS: Lecture

CIVL 4711 Construction Planning
CREDIT HOURS: 2
This course deals with construction administration, bidding procedures, cost controls, planning and execution of Civil Engineering construction projects. The course also covers planning and scheduling techniques such as CPM and PERT. The course presents basic methods of estimating construction costs, with applications to buildings, bridges, foundations, highways and earthworks.
PREREQUISITES: CIVL 3725
FORMATS: Lecture

CIVL 4802 Senior Project II
CREDIT HOURS: 2
The objective of this course is to provide experience in the application of engineering principles to the solution of specific problems in Civil Engineering. Under the supervision of a faculty member, students execute a project that may include laboratory and/or field experiments, design work, numerical simulations, technical communications on state-of-the-art technologies, or analysis of case histories. Students prepare a formal report according to faculty standards for report preparation and make an oral presentation of their project.
PREREQUISITES: CIVL 4801.005

CIVL 4816 Civil Engineering Research Project
CREDIT HOURS: 3
The project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor. In addition, the student must obtain approval of the undergraduate coordinator of the department by submitting an outline of the proposed project. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment. Students must have a cumulative GPA of at least 3.3 at the end of term 6 to be considered for this course.
CALENDAR NOTES: Students to contact the Civil and Resource Engineering Department for registration instructions, as registration is to be completed by override only.
EXCLUSIONS: MINE 4816
FORMATS: Lab
LAB HOURS PER WEEK: 3

Course Descriptions - Environmental Engineering Series

ENVE 3251 Environmental and Industrial Microbiology
CREDIT HOURS: 3
The principles of microbial communities are applied to biological systems. Emphasis is placed on microbial populations in air, soil and water. Further investigation

includes microorganisms found in food, aquaculture and mining industries. Applications of microbial ecology to agriculture, industry, biotechnology and environment are examined.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 3452 Soil and Water Conservation Engineering
CREDIT HOURS: 3
The prediction, nature, effects and control of natural surface and sub-surface waters and non-point source pollutants in catchments are considered. Design flood hydrograph, flood routing, porous media flow and soil erosion prediction techniques are presented. Energy dissipating structures used to control flood flows which are discussed include terraces, chutes, drop inlets, grassed waterways, culverts and small earth dams. An earth dam design project extends over the course duration.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENVE 3461 Environmental Measurement and Analysis
CREDIT HOURS: 3
This course will cover the fundamentals of characterizing and monitoring processes within environmental systems through measurement and analysis. The course will begin with an overview of transducers and the various types of sensors and data acquisition systems typically used in environmental monitoring. Students will learn how to properly measure fluid flow processes and sample for contaminants within surface water and ground water. In addition, the measurement and analysis of contaminants in soil and atmospheric media will be covered. Data presentation and the use of geographical information systems (GIS) and global positioning systems (GPS) will also be covered. Students will gain hands-on experience using environmental monitoring equipment and instrumental methods of analysis during field and laboratory classes. Students taking this class as a core course will be expected to attend a two-day surveying field camp on the Sexton Campus over the first weekend of term.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 3500 Air Quality
CREDIT HOURS: 3
This course covers sources, the impact on health and the environment, atmospheric chemistry, fate and transport and the measurement and modeling of atmospheric pollutants. The application of regulatory computer models to air quality case studies will be demonstrated in laboratory classes. In addition, field and laboratory classes will provide hands on experience of measuring and characterizing air pollutants. Problem solving sessions are used to illustrate the application of meteorology, measurements and models to determine the sources and impact of air pollutants at various receptors found both outdoors and indoors.
EXCLUSIONS: ENVE 4621.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 4000 Small Watershed Hydrology
CREDIT HOURS: 3
Following an overivew of the nature of hydrolic data and models, emphasis is placed on deterministic mathematical modelling of component processes and the synthesis of complete hydrographs. Components examined include precipitation, infiltration, evapotranspiration, surface and subsurface flow. The structure and application of selected current models are presented.
PREREQUISITES: A first class in engineering hydrology and microcomputer experience
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 4123 Environmental Biotechnology
CREDIT HOURS: 3
This course outlines the principles and applications of environmental biotechnology. Quantitative tools for describing microbial stoichiometry and kinetics will examined and related to reactors of interest to environmental engineering. Applications of biological treatment processes will be studied and may include the activated sludge process, lagoons, anaerobic treatment and bioremediation.
PREREQUISITES: ENVE 3251
EXCLUSIONS: ENVE 3432
FORMATS: Lecture | Tutorial

ENVE 4342 Industrial Biotechnology
CREDIT HOURS: 3
This class introduces students to industrial applications of biotechnology. Basic biochemistry and molecular biology are covered in addition to stoichiometry and kinetics for bioprocesses. Modern tools and aproaches of biotechnology are presented, followed by application of biotechnology to diverse areas (e.g. the environment, medicine, agriculture, pharmaceutical and food processing industries). This class is suitable for engineering/science students who may wish to pursue employment in the biotechnology sector with little/no prior knowledge of biotechnology or genetic engineering.

ENVE 4401 Design Project for Environmental Engineers I
CREDIT HOURS: 3
The objective of the course is to provide students with first hand experience in applying engineering design principles, biogeochemical analyses and environmental assessment techniques to the solution of specific environmental problems related to air, soil and water pollution control. Students are expected to display a high level of initiative and ingenuity in carrying out the project.
PREREQUISITES: Senior students only
FORMATS: Lecture | Tutorial

ENVE 4402 Design Project for Environmental Engineers II
CREDIT HOURS: 3
This is a continuation of ENVE 4401 leading to a final presentation in both oral and written format.

PREREQUISITES: ENVE 4401.03
FORMATS: Lecture | Tutorial

ENVE 4411 Indoor Environment Control and Air Quality
CREDIT HOURS: 3
The course deals with the design of heating, ventilating and air conditioning systems for controlled environment facilities such as: animal housing, residential and commercial buildings. Indoor air quality for humans and animals is discussed in relation to current methods of environmental control and energy conservation in buildings. Completion of an assigned term project is a part of this course.
PREREQUISITES: PEAS 3600.03 or equivalent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 4432 Waste Management
CREDIT HOURS: 3
This course examines the characteristics of solid waste, and options for collection systems and treatment/processing. Landfill disposal will be examined and emphasis put on other options such as energy recovery and biochemical treatment.
PREREQUISITES: ENVE 3251.03
EXCLUSIONS: ENVE 3432.03
FORMATS: Lecture | Tutorial

ENVE 4612 Waste Disposal and Utilization
CREDIT HOURS: 3
The physical, chemical and biological properties of liquid and solid wastes are discussed and related to current handling and disposal methods. Solution to problems of pumping liquid waste, lagoon design and holding facilities are presented. Methods of land application of wastes are compared based on pollution problems and fertilizer issues. Technological advances of utilization of wastes for the production of compost, single cell protein, alcohol, fertilizer, biogas, and chemicals are discussed. The course includes a term project, field trips, and seminars.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 4621 Atmospheric Air Quality
CREDIT HOURS: 3
This course will cover fundamentals of air quality. Sources and characteristics of atmospheric pollutants will be introduced as well as methods for sampling/measuring air pollutants and atmospheric processes. The thermodynamics and fluid mechanics of the planetary boundary layer, and the behaviour of plumes, will be primary focus. Contaminant transformations in the atmosphere, as well as wet and dry deposition of pollutants, will be covered. Other topics will include computer models, standards/legislation and climate change.
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 2

ENVE 4641 Contaminant Fate and Transport
CREDIT HOURS: 3
This course focuses on the quantitative analysis of mechanisms that control the fate and transport of contaminants in the environment. The occurrence, movement, and transformation of contaminants in a variety of environmental media, including surface waters, terrestrial environments, and the atmosphere are covered. A 3-d field lab will be held at the beginning of the semester, in which students will gain experience in: (i)sampling environmental media, and (ii)characterizing transport processes in terrestrial and aquatic environments.
PREREQUISITES: ENVE 3452.03/CIVL 3310.03, PEAS 2202.03/CIVL 3450.03, ENGM 3052.03/CIVL 4720.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ENVE 4707 Green Engineering: Principles and Implementation
CREDIT HOURS: 3
Management of today’s environmental challenges requires rethinking of the traditional approaches of process development and product design. Efforts should be directed toward incorporating the quantitative sustainability tools into the engineering design. This course introduces the framework required for the assessment of products and processes with respect to their environmental impact and provides the foundation for environmentally conscious design of products and processes. The major sustainability challenges associated with the release of chemicals into the environment will be reviewed. Economic, environmental and social indicators of sustainability will be discussed. The criteria for evaluation of sustainable materials (e.g., biodegradability, toxicity, end of life options) and green processes (e.g., risk assessment and life cycle analysis) will be covered. Students will be provided with various opportunities throughout the course to evaluate the green attribute of alternative product and processes by applying the sustainability metrices.
PREREQUISITES: PEAS 3600.03 or by instructor's permission.
FORMATS: Lecture | Tutorial

ENVE 4772 Environmental Assessment and Management
CREDIT HOURS: 3
This course examines the ecological impacts of human activities with regard to water, air and soil pollution. Ecological theory and practice are reviewed and methods of environmental regulation and management considered in the light of the concepts of sustainability and maintenance of biodiversity. Lectures will include presentations by government and corporate regulators and managers. Tutorials will be devoted to the preparation and presentation of hypothetical environmental impact statements and assessments.
FORMATS: Lecture | Tutorial

ENVE 4872 Air Pollution Control
CREDIT HOURS: 3
This course deals with air pollution from the standpoint of its generation and control. Both gaseous and particulate matter emitted from combustion and industrial

sources are considered.
EXCLUSIONS: CHEE 4872.03
FORMATS: Lecture | Tutorial

Course Descriptions - Mineral Resource Engineering Series

MINE 2200 Introductory Geology for Engineers
CREDIT HOURS: 3
This course deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater, glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.
EXCLUSIONS: MINE 3500.03, ERTH 1080.03 and ERTH 1090.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3520 Introductory Mining Engineering
CREDIT HOURS: 3
This courseis an introduction to the mineral industry and mining engineering. Emphasis is placed on unit operations, equipment and surface and underground mining methods. Summaries of the national and global mineral industries, innovative technologies and practices, and the relationships between mining and mineral processing are included. A mandatory field trip is an integral part of the course to give students exposure to real life operations.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Tutorial

MINE 3530 Mineral Processing
CREDIT HOURS: 3
This course is concerned with the principles of unit operations employed in the physical processing of minerals: examination of mineral characteristics on which mineral separation methods are based, liberation of minerals, crushing, grinding, screening and classification. Mineral separation methods include: gravity, dense medium, magnetic and high tension separations, radiometric sorting, flotation and selective flocculation. Laboratory tests, their interpretations, and assessment of separation performance are covered.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Tutorial

MINE 3600 Equipment Selection and Materials Handling
CREDIT HOURS: 3
This course deals with mining equipment, analysis of parameters influencing the performance of equipment, and equipment selection. Included are cost analysis and estimation, unit costs, compressed air and hydraulic power systems applications in mining, pump selection, materials handling systems in underground and surface mining operations, ore and waste pass systems, and storage bins.
PREREQUISITES: MINE 3520
FORMATS: Lecture | Tutorial

MINE 3605 Mining Geology I
CREDIT HOURS: 3
This course covers the topics of mineralogy, geologic structures, petrology of igneous, sedimentary and metamorphic rocks and tectonic processes. Emphasis is placed on the relationships between these topics and mining engineering. Laboratory exercises and assignments cover petrographic analysis, geologic maps and sections, stereographic projection and mineral stoichiometry.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3611 Rock Mechanics
CREDIT HOURS: 3
Concepts of mechanical behaviour and intact strength properties of rock masses are discussed. Classification systems and failure criteria for rocks are described. The principles of engineering design for underground and surface mine structures are covered. Stereographic projections and numerical methods are used to analyze surface and underground rock stability. Rock mechanics instrumentation is discussed. Laboratory sessions cover sample preparation and rock testing.
PREREQUISITES: MINE 3605.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3612 Rock Penetration and Fragmentation
CREDIT HOURS: 3
This course presents the principles and theories of rock drilling and blasting in both underground and surface mining applications. It covers the properties of explosives and the principles for selection of explosives for different situations. The transportation methods, loading techniques and priming procedures for explosives are discussed. Current trends in drilling and blasting practices are considered as well as controlled blasting and blast monitoring methods. State-of-the-art techniques in rock penetration and fragmentation are presented.
FORMATS: Lecture

MINE 3620 Petroleum Engineering
CREDIT HOURS: 3
This course is designed to provide a comprehensive overview of the engineering aspects of the petroleum industry. Similarities between mining and petroleum engineering are stressed. Major topics cover well planning, rotary drilling techniques, drilling optimization, well cementing, well completion, and production methods. Equipment selection and design procedures follow each unit operation.

PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4100 Mining Geotechnique
CREDIT HOURS: 3
The focus of the class is the practical application of soil mechanics theory to soil slope/embankment stability in the mining environment. Methods of stability analysis for natural slopes, cuts, embankments and earth/tailings dams are outlined. The effects of seepage/porewater pressure and earthquake loading are considered, as well as stabilization methods for slopes. A project dealing with earth slopes or embankments is undertaken by the students, including an in class oral presentation.
PREREQUISITES: CIVL 3101
EXCLUSIONS: CIVL 4100
FORMATS: Lecture | Tutorial

MINE 4300 Optimization Methods in Mining and Civil Engineering
CREDIT HOURS: 3
This course will introduce students in mineral resource and civil engineering to fundamental operations research theories and their applications to the planning and management of a variety of mining and civil engineering systems. A number of operations research models and methodologies will be discussed and solution algorithms to these optimization models will be introduced. In addition, uncertainty-based optimization techniques including interval-parameter, fuzzy logic and stochastic analysis for addressing systems' variability and complexity will also be discussed.
CALENDAR NOTES: Mineral, Civil, Environmental Students
FORMATS: Lecture | Tutorial

MINE 4706 Mining Geology II
CREDIT HOURS: 3
The Physical characteristics and origins of the main types of mineral deposits are covered. Individual mineral deposits are described in terms of their mineralogy, rock types, structures and geologic factors affecting mining engineering. Assignments and laboratory exercises concentrate on the three-dimensional analysis of mineral deposits using hand specimens, maps, sections, structure contours and modelling of reserves. Case studies are covered in assigned readings
PREREQUISITES: MINE 3605.03, MINE 3520.03
EXCLUSIONS: MINE 4705.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 4710 Mine Excavation Systems
CREDIT HOURS: 3
This course deals with several specialized mining topics related to mine excavation including mine drainage in underground and surface operations, tunneling and shaft sinking equipment and techniques, mining related soil mechanics, pressure grouting, ground freezing and mine backfilling.
PREREQUISITES: MINE 3611
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4711 Mine Ventilation and Environment Control
CREDIT HOURS: 3
This course presents the main principles of total mine air conditioning: air quality, air quantity, and temperature-humidity control in underground mines. Health hazards such as mine dusts, gases, radiation, and heat stress are discussed. Design of airflow in single openings, circuit analysis, and ventilation network design are studied using manual and computer based techniques. Temperature-humidity control systems design is discussed. Mine illumination and noise control are studied as part of the total mine environment.
PREREQUISITES: MINE 3520
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4750 Senior Design Project I
CREDIT HOURS: 3
This is the first part of a two-part senior project. Methods of mineral /exploration are introduced. Methods of resources/reserves estimation are discussed. Surface and drillhole data are provided. Mineral deposit is outline by exploration together with information on site description, property rights, stratigraphy and structure, map and cross-sections. Students will use the provided data to create ore bodies and estimate ore reserves. Industrial software will be used to complete the project. A mandatory field trip is an integral part of the course to give students exposure to real life operations.
PREREQUISITES: MINE 3520.03 and MINE 3605.03 and MINE 4706.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4801 Advanced Topics in Rock Mechanics
CREDIT HOURS: 3
This course deals with several specific topics in rock mechanics related to ground stability control in surface and underground mines. It covers ground failure, ground movement monitoring, “in-situ” stress management, application of numerical modelling methods, and back-analysis techniques in mining engineering. Theory and state-of-the-art of relevant techniques are discussed. Case studies are introduced to discuss practical problems.
PREREQUISITES: MINE 3611.03 or permission by instructor
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 4815 Mining and the Environment
CREDIT HOURS: 3
This course covers environmental practices, problems and solutions in the mineral industry. Topics include regulations, reclamation, mine closure, acid rock drainage, surface subsidence, nuclear waste disposal and coal mine explosions. Case studies are used to highlight these topics. Class participation is emphasized through oral and written presentations.
PREREQUISITES: MINE 2200.03 and MINE 4706.03
CROSSLISTED: MINE 6014
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4816 Mining Engineering Project
CREDIT HOURS: 3
This project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor and agreement on the proposal scope of the research topic. In addition, the student must obtain approval of the undergraduate coordinator of the department. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment.
CALENDAR NOTES: Students to contact the Civil and Resource Engineering Department for registration instructions, as registration is to be completed by override only
FORMATS: Lab
LAB HOURS PER WEEK: 3

MINE 4820 Surface Mine Slope Stability
CREDIT HOURS: 3
This course deals with the fundamentals of slope stability analysis in surface mining. A brief discussion is first given to field data collection and the mechanism of slope failure. Various techniques for solving slope problems encountered in the mining industry are then introduced, including plane failure, wedge failure, toppling, and rotational failure.
PREREQUISITES: MINE 3611.03 MINE 3520.03
FORMATS: Lecture | Tutorial

MINE 4821 Petroleum Reservoir Engineering
CREDIT HOURS: 3
This course discusses the theory and calculations in petroleum reservoir engineering. Major topics include petroleum composition, formation, migration and trapping mechanisms, classification and properties of reservoir rocks and fluids, fluid flow through porous media, phase behaviour diagrams, reservoir energy and recovery mechanisms, reservoir evaluation, as well as geological and reservoir considerations in drilling, and production engineering. An introduction to petroleum exploration methods, and data interpretation techniques is also included.
PREREQUISITES: MINE 2200.03, MINE 3605.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4835 Mineral Economics and Mine Production
CREDIT HOURS: 3
Major topics in Mineral Economics include the influence of mineral industry on the economy and mineral policy, marketing of minerals, price mechanisms, mine project evaluations and financing. Mine Production will cover topics on mine management, techniques to increase mine productivity, operating units analysis, mine maintenance, production scheduling and optimization.
PREREQUISITES: MINE 3520.03
EXCLUSIONS: MINE 4713.03 and MINE 4812.03
FORMATS: Lecture | Tutorial

MINE 4850 Senior Design Project II
CREDIT HOURS: 3
This is the second part of the two-part senior design project. Based on the work completed in part one, students, working in groups, will select proper mining methods, design mine structures of an underground and/or surface mine, select mining equipment, surface infrastructures and mineral processing facilities. This is followed by environmental considerations, mine evaluation and risk assessment. Regular progress reports, a final report and group presentations are required. Design projects in petroleum engineering with equivalent amount of work may be considered at the beginning of this course
PREREQUISITES: MINE 4750.03 and Completion of all courses prior to Term 8 in the program. Exception may only be made to those with proven knowledge and industrial experience.
EXCLUSIONS: MINE 4811.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

Course Descriptions - Mechanical Engineering Series

MECH 3010 Machine Design: Loading of Components
CREDIT HOURS: 3
The application of basic methods and concepts of strength of materials to machine design including design concepts, stress, and theories of failure is developed. Topics include: load analysis, materials, static stresses, strain and deflection, failure, impact, fatigue, surface damage. Applications include: screw fastenings, springs.
PREREQUISITES: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03
FORMATS: Lecture | Lab | Tutorial

MECH 3020 Machine Design: Power Components
CREDIT HOURS: 3
The use of engineering principles in the design of machine power components is developed. Topics include: Lubrication and sliding bearings, roller bearings, spur

gears, helical, bevel and worm gears, shafts, clutches and brakes, power transmissions such as belts and chains.
PREREQUISITES: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03
FORMATS: Lecture | Lab | Tutorial

MECH 3305 Fluid Mechanics
CREDIT HOURS: 3
This course presents the dynamic governing equations of fluid flow in differential forms: continuity, Navier-Stokes and energy. Concepts of stream function, vorticity and velocity potential are also introduced. The physics and modeling of Turbulence in fluid systems is shown. The boundary layer theory is shown and flow past immersed bodies are studied: concepts of drag and lift forces are presented. Compressible flow is introduced: speed of sound, nozzle and diffuser, shock waves, Rayleigh and Fanno flow are all studied.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab | Tutorial

MECH 3500 Dynamics of Machines
CREDIT HOURS: 3
The course focuses on design of mechanism, their motion, static and dynamic loads, and power transmission. It includes planar and spatial 4-bar and 6-bar linkages, cam mechanisms, gear trains, rotor systems, and manipulators. Linkage inversion, transformation, and synthesis are used for design of new mechanisms. Graphic, analytical, computer, and physical modeling techniques are used. Many real life mechanisms are analyzed.
PREREQUISITES: ENGI 2400.03, MECH 2100.03, or ENGI 2203.03, ENGM 1041.03, ENGI 1400.03 or PHYC 1280.03
FORMATS: Lecture | Lab | Tutorial

MECH 3660 Finite Element Method in Mechanical Design
CREDIT HOURS: 3
This course deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by extensive applications to the design of machine and structural components. Mechanical and thermal stresses in trusses, beams, axisymmetric, shell, and 3D solid elements are considered. Professional finite element modeling best practices are discussed. A finite element pre-processor, code, post-processor are introduced and used in the course assignments.
PREREQUISITES: ENGI 2204.03
FORMATS: Lecture | Lab | Tutorial

MECH 3705 Heat Transfer
CREDIT HOURS: 3
This course is an introduction to the three modes of heat transfer: conduction, convection and radiation. Topics covered in conduction include steady-state and transient conduction, in one and two-dimensional system, and the study of extended surfaces. Force and free convection for internal and external flows are examined. The fundamentals of radiation heat transfer are covered, including blackbody radiation, gray surfaces, Kirchhoff's law and radiation exchange between surfaces.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MECH 3805 Mechanical Engineering Thermodynamics
CREDIT HOURS: 3
This course builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab | Tutorial

MECH 3900 Systems I
CREDIT HOURS: 3
The course deals with the analysis of dynamic physical systems. Ordinary-differential-equation models are developed for mechanical, thermal, fluid and electrical systems. System equations are solved using classical methods and Laplace-transform techniques. S-plane characteristics are introduced, as are block-diagram & state-space representations. Systems are simulated by digital computer in the laboratory portion.
PREREQUISITES: ENGM 2021.03 or ENGM 2022.03, ENGM 1081.03 or ENGM 2081.03
FORMATS: Lecture | Lab | Tutorial

MECH 4000 Manufacturing
CREDIT HOURS: 3
The course starts with a manufacturing process overview and a detailed process study in the following areas: manual assembly, machining, injection molding, thermoforming and casting. A relationship between process and design is examined and design for manufacturing methodologies is introduced. Quality control and quality assurance issues are overviewed. The principles of cell design for assembly and machining are introduced and part redesign for process and system is studied.
PREREQUISITES: MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4015 Design Project I
CREDIT HOURS: 5
This course provides a project-based exercise in the engineering design process in a real world engineering context. Students work in teams and are expected to take the project from its preliminary stage through the design stages to the ultimate completion of the design including: technical reports with calculations, engineering drawings, peer evaluation, oral presentations and possibly a physical prototype or model.
PREREQUISITES: MECH 3010.03 or MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4025 Design Project II
CREDIT HOURS: 5
This course is a direct continuation of Design Project I leading to the implementation of the student team design. All projects involve evaluation/testing of student designs, this is usually done via a constructed physical prototype or a model. Students produce a final technical report, conduct peer evaluations and give a formal presentation.
PREREQUISITES: MECH 4015.05
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4210 Introduction to Additive Manufacturing
CREDIT HOURS: 3
This course is designed to give students a fundamental understanding of additive manufacturing (also known as 3D printing). Lectures will cover the complete flow path from foundational design concepts to the inspection of a finished component. An emphasis will be placed on metallic materials. Practical aspects of the technology will be illustrated through case studies of commercial products and hands-on laboratories dedicated to feedstock systems as well as component fabrication using multiple additive manufacturing technologies.
PREREQUISITES: MATL 3500 or equivalent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4300 Stress Analysis
CREDIT HOURS: 3
Course topics include: general state of stress, equilibrium equations, stress-strain-temperature relations, plane stress, axisymmetrical stress problems, thick cylindrical pressure vessels, rotating disks, bending of rectangular and circular plates, torsion of non-circular members, membrane analogy, thin-walled hollow sections, non-symmetrical bending, properties of cross-sections, shear center, composite beams, plastic hinge. Energy Methods, Castigliano's theorems, statically indeterminate problems.
PREREQUISITES: ENGI 2200.03
FORMATS: Lecture | Lab | Tutorial

MECH 4340 Energy Management I
CREDIT HOURS: 3
The purpose of this course is to introduce the concepts and techniques of energy management and conservation. The subjects that will be discussed are energy supply and demand, energy pricing, scope of the energy problem and approaches to provide solutions; energy auditing; improving energy utilization in space conditioning, and steam, hot water and compressed air systems; insulation; and electrical energy conservation. An interdisciplinary approach will be employed in this course to provide a wider understanding of the subject.
PREREQUISITES: MECH 3305.03 or MECH 3705.03 or MECH 4805.03
CROSSLISTED: MECH 6340.03
FORMATS: Lecture | Tutorial

MECH 4430 Turbomachines
CREDIT HOURS: 3
Various types of turbomachines, from wind turbines to high-ratio compressors are studied. Although hydraulic pumps and turbines are treated, the majority of the class time is devoted to compressible flow turbomachines and their characteristics. Emphasis is placed on practical design and performance parameters.
FORMATS: Lecture | Lab | Tutorial

MECH 4440 Principles of Marine Craft Design
CREDIT HOURS: 3
This course covers the fundamentals of hydrostatics and hydrodynamics of marine craft. Topics include: hydrostatics and stability calculations for marine craft; dimensional analysis and modelling of marine systems; resistance estimation of low-speed and high-speed craft; sail power, marine propellers and jet propulsion; directional stability and control and wave theory and motion in waves.
PREREQUISITES: MECH 3300.03 or MECH 3305.03
FORMATS: Lecture | Lab | Tutorial

MECH 4444 Mechatronics
CREDIT HOURS: 3
This course deals with the integration of mechanical, electrical, computer and control engineering which is increasingly becoming an important part of engineering design. Topics include Mechanical and Electrical Actuation Systems, Sensors, and Signal Conditioning, Microprocessors and Programming and Control. A major part of the course is project-based enabling students to apply the concepts studies in the course.
PREREQUISITES: MECH 3900.03, MECH 3020.03
EXCLUSIONS: BIOE 4312.03
FORMATS: Lecture | Lab | Tutorial

MECH 4450 Marine Craft Design and Construction
CREDIT HOURS: 3
This course deals with design and construction methods for marine craft. Each student completes a preliminary design of a small marine vessel. Topics include: engineering and economic principles governing selection of dimensions and coefficients for marine craft, computer-aided design, design and generation of hull forms, performance and operability in the ocean environment, construction methods for glass-fibre, wood, aluminum and steel marine craft, and structural analysis and design.
PREREQUISITES: MECH 4440.03 or instructor’s consent
FORMATS: Lecture | Lab | Tutorial

MECH 4500 Vibrations
CREDIT HOURS: 3
Single and multiple degree of freedom lumped parameter systems subjected to harmonic and transient excitation are examined. Analytical as well as numerical

solutions are covered. Vibrations of continuous systems such as beams and shafts are introduced. Laboratory experiments deal with vibration of lumped parameter physical models as well as vibrations of rotating machinery. Vibration control in industrial applications is emphasized and the effects of whole body vibration on humans is treated as a safety issue.
PREREQUISITES: MECH 3500.03, MECH 3900.03
FORMATS: Lecture | Lab | Tutorial

MECH 4510 Mechanics of Composite Materials
CREDIT HOURS: 3
The course introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced.
PREREQUISITES: MECH 3010.03 and MECH 4300.03
CROSSLISTED: MECH 6530.03
FORMATS: Lecture | Lab | Tutorial

MECH 4521 Applied Dynamics
CREDIT HOURS: 3
This course begins with a review of planar kinematics and kinetics of rigid bodies. These concepts are extended to kinematics and kinetics of rigid bodies undergoing general three dimensional motion. Euler's Equations are applied to a wide range of engineering problems including vehicular and gyroscopic dynamics. Energy methods for bodies undergoing three dimensional motion are applied to multi-degree-of-freedom systems. Single-degree-of-freedom systems subjected to random and shock inputs are analyzed.
CROSSLISTED: MECH 6521.03
FORMATS: Lecture | Lab | Tutorial

MECH 4540 Aerodynamics
CREDIT HOURS: 3
The course deals with the fundamentals of aerodynamics and the theory of flight. Material covered includes: the standard atmosphere; airfoil coefficients and section properties; finite wings and induced drag; airplane performance - power required, rate of climb, range and endurance; basics of stability and control.
PREREQUISITES: MECH 3300.03 or MECH 3305.03
FORMATS: Lecture | Lab | Tutorial

MECH 4560 Space Systems
CREDIT HOURS: 3
This course deals with the engineering design and analysis of space systems and their interrelationships. Topics include orbital mechanics, satellite pertubations, satellite actuator and sensor systems, satellite access and coverage.
PREREQUISITES: MECH 3900.03
CROSSLISTED: MECH 6560.03
FORMATS: Lecture | Tutorial

MECH 4600 Engineering Measurements
CREDIT HOURS: 3
The static and dynamic characteristics of first and second order transducers and measurement systems are examined. The experimental versus theoretical approach to engineering problems is studied. Topics include data acquisition, analysis, and presentation, including the probabilistic nature of engineering measurements. The course is laboratory intensive covering measurements of force, strain, temperature, pressure, velocity, and fluid flow. Computers are used extensively in the laboratory experiments.
PREREQUISITES: ENGM 2032.03
FORMATS: Lecture | Lab | Tutorial

MECH 4631 CAD/CAM - Computer Aided Design/Computer Aided Manufacturing
CREDIT HOURS: 3
The student is introduced to the concept of automation with application to design, production, and manufacturing systems. The use of digital computers is considered in design, including peripheral equipment and types of languages. Other topics include numerical control manufacturing systems such as Direct Numerical Control (DNC). Computer Numerical Control (CNC), Adaptive Control and Industrial Robots. Due to the diverse nature of the course content, various personnel from both the academic and industrial community aid in the class presentation.
PREREQUISITES: MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4638 Computer Aided Tolerancing and Dimensioning
CREDIT HOURS: 3
This course deals with dimensioning and mechanical tolerances to international standards - key factors in quality production. Topics covered include: review of basic manufacturing processes and tools, fundamental dimensioning and tolerances techniques, working and assembly drawings, CAD/CAM drawings for computer numerical control, geometric and positional tolerancing, quantity production, parts assembly, quality control and application of statistical and probabilistic methods. Biweekly assignments requires use of Auto-CAD, interactive computer programs for geometrical dimensioning/tolerancing, and a Coordinate Measuring Machine (CCM).
PREREQUISITES: MECH 3010.03, MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4640 Robotics
CREDIT HOURS: 3
The prime objective of the course is to provide a survey of the state-of-the-art in robotics. A large portion of the course is focused on the robot hardware. However, robotics in an inherently interdisciplinary field and the course will also involve robotics control and application. Topics covered include kinematics and dynamics of the

robot arm and gripper, drives, robot position measuring systems, external sensors and feeding, storage, changing position and clamping devices, all of which, together with the robot itself, constitute a “robotized” workplace.
PREREQUISITES: MECH 3500.03, MECH 3900.03
CROSSLISTED: BIOE 4011.03
FORMATS: Lecture | Lab | Tutorial

MECH 4650 Biomechanical Engineering
CREDIT HOURS: 3
Engineering analysis of biological systems provides novel insight into evolutionary design of animals and plants and into the intelligent design of medical devices. This course examines the structure and function of the cardiovascular, pulmonary, and musculoskeletal systems using tools from solid and fluid mechanics. Topics include the heart as a pump, blood flow, arterial pulse propagation, the mechanics of breathing lung elasticity, muscle contraction, tissue mechanics, basic skeletal design, locomotion, and engineering of surgical implants.
FORMATS: Lecture | Lab | Tutorial

MECH 4652 Kinematics of Human Motion
CREDIT HOURS: 3
The science of biomechanics is based on mechanical models and biological experiments. Students will explore the application of classical mechanics to the analysis of human motion related to athletics, orthopaedics, and rehabilitation. Emphasis is also placed on numerous experimental facts collected from the biomechanical research literature. Topics include kinematic geometry of a single body, the description of joint configuration, and differential kinematics of biokinematic chains. Three-dimensional kinematics of individual joints (i.e., the knee, hip and elbow) is emphasized from the perspective of total joint replacement design.
FORMATS: Lecture | Lab | Tutorial

MECH 4670 Finite-Element Simulation Techniques
CREDIT HOURS: 3
This course builds on MECH 3660. It deals with the applications of the finite-element method to analyze practical problems in mechanical design and delves into the associated fundamental numerical aspects. Robust modelling concepts such as plane stress, plane strain and axisymmetric techniques will be discussed, as well as the use of beam, plates and shell elements in modelling of more complex system. The course will consider static and dynamic analyses and elastic-plastic analysis.
PREREQUISITES: MECH 3660.03 or equivalent
EXCLUSIONS: MECH 6660.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

MECH 4720 Advanced Heat Exchanger Design
CREDIT HOURS: 3
This course deals with the design of heat exchangers. Topics include the thermodynamics, fluid mechanics and heat transfer fundamentals associated with heat exchangers, the various types and applications of heat exchangers, and in particular the design of heat exchangers that rely on natural convection/natural circulation on one or both sides of the heat exchanger.
PREREQUISITES: MECH 3705.03, MECH 3305.03
FORMATS: Lecture | Tutorial

MECH 4760 Optical Components and Instruments
CREDIT HOURS: 3
This course deals with light, optical components and optical instruments Emphasis will be placed on practical engineering applications. Topics include: light, light sources, reflection and refraction, geometric optics, lens, microscopes, telescopes, polarization, diffraction and interference.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4805 Thermo-Fluid Engineering III
CREDIT HOURS: 3
This class combines and builds on the knowledge and experiences gained from earlier Thermodynamics, Fluid Mechanics and Heat Transfer courses. the concepts of ideal gas mixtures and psychrometric applications, combustion and chemical equilibrium are introduced. Heat exchanger are studies, using the LMTD and the effectiveness-NTU methods. Numerical modeling of thermo-fluid phenomena are presented using computational fluid dynamics and computational heat transfer: the finite volume method and the finite element method are both used and applied.
PREREQUISITES: MECH 3705.03, MECH 3305.03, MECH 3805.03
FORMATS: Lecture | Lab | Tutorial

MECH 4810 Energy Conversion Systems
CREDIT HOURS: 3
Application of basic principles of thermodynamics, fluid mechanics and heat transfer to the analysis and synthesis of energy conversion systems are studied. Primary energy sources and global energy demand are examined. Principles of conventional methods, thermal systems, fuel types, combustors, and gas turbines, initial planning of a hydroelectric power plant, selection of turbines and other components, nuclear fission and fusion, clean energy production, and environmental aspects of energy production are covered.
PREREQUISITES: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03, ENGI 2103.03 or ENGI 2300.03
FORMATS: Lecture | Lab | Tutorial

MECH 4820 Energy from Renewable Resources
CREDIT HOURS: 3
This course concentrates on the theoretical and practical aspects of solar, wind, tidal and wave sources of energy with particular emphasis on their availability and use in the Atlantic Provinces. Design feasibility studies are undertaken on particular aspects of energy conversion from these sources. The impact of the environment of consumption of conventional energy forms is investigated. The nature and magnitude of energy consumption world-wide and locally is considered.

PREREQUISITES: MECH 3700.03 or MECH 3705.03
FORMATS: Lecture | Lab | Tutorial

MECH 4830 Reciprocating Internal-Combustion Engines
CREDIT HOURS: 3
The major topics of this course are basic engine types, test methods and pressure measurements, combustion, ideal cycles and model processes, equilibrium charts, fuel specifications and tests, engine knock, exhaust analysis, fuel systems, ignition systems, engine performance and supercharger matching. Hands-on laboratory work is an integral part of this course.
PREREQUISITES: MECH 3800.03 or MECH 3805.03
FORMATS: Lecture | Lab | Tutorial

MECH 4840 Steam Plant Engineering
CREDIT HOURS: 3
This course aims to provide basic fundamental and practical information to engineering students to design and operate thermal power plants. Topics covered are: classification of steam generator; comparison of water-tube and fire-tube boilers; energy sources; fuels and combustion; thermal analysis of furnaces; superheaters, economizers, and air preheaters; boiler efficency calculations; burner, pulverizer, cyclones, fluidized beds; auxilliary equipment (fans, stacks); control system; cooling system design; environmental considerations.
PREREQUISITES: ENGI 2102.03 or ENGI 2800.03
FORMATS: Lecture | Lab | Tutorial

MECH 4850 Solar Energy Engineering
CREDIT HOURS: 3
This course deals with solar energy conversion and utilization with emphasis on its availability and use in Canada. Topics included solar heating of domestic and process hot water, solar space heating, the direct conversion of solar energy into electricity (photovoltaics), passive solar heating, solar cooling and solar thermal electric power. The nature and magnitude of energy supply and demand are also discussed.
FORMATS: Lecture

MECH 4851 Heating, Ventilating and Air Conditioning
CREDIT HOURS: 3
This is an introduction to the design of thermal systems for indoor climate control. The major topics include: human comfort requirements, outdoor climate variables, heating and dehumidification loads, cooling and dehumidification loads, ventilation requirements and criteria, central system types and selection, energy sources and costs, piping, pumps, ducts, fans, and control systems. Computer programs will be introduced for design calculations involving heating and cooling load, piping, ducting and energy consumption.
COREQUISITES: MECH 4805.03
FORMATS: Lecture | Tutorial

MECH 4880 Introduction to Nuclear Engineering
CREDIT HOURS: 3
The purpose of this course is to introduce the concepts of nuclear engineering and the resulting applications. The subjects that will be discussed are the fundamentals of particle physics: proton, neutron, electron, photon and neutrino, and the atomic model; radioactivity and radiation detection, protection and shielding; principle of nuclear energetic: fission and fusion; nuclear reactor kinetics and control; nuclear reactor design and cooling; nuclear propulsion, nuclear waste disposal.
PREREQUISITES: MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03
FORMATS: Lecture | Tutorial

MECH 4900 Systems II
CREDIT HOURS: 3
Response characteristics of open loop and feedback control systems are studied. Various controller types and their uses are analyzed. Techniques such as root-locus diagrams and Bode & Nichols plots are used for stability and performance evaluation. Digital simulations and experiments on computer-based control systems are done in the laboratory portion.
PREREQUISITES: MECH 3900.03
FORMATS: Lecture | Lab | Tutorial

MECH 4910 Fluid Power
CREDIT HOURS: 3
This is an introductory course to fluid power systems covering the principles of power hydraulics, hydraulic fluids, hydraulic actuators and power generation transducers. The concept of pressure controls, volume controls and directional controls is also covered, including an introduction to electro-hydraulic servos and the design of basic open and closed-center circuits. The time domain analysis of feedback systems is introduced. The student is introduced to the design and compensation of systems using both s-plane and time domain methods. Other topics include simulation and analysis of control systems using graphics terminal computer facilities.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MECH 4950 Advanced Control Engineering
CREDIT HOURS: 3
The course develops the students' capabilities in system simulation and feed forward/feedback control-system design and implementation. Topics include: system-parameter identification, control-system hardware, computer-based control systems, design techniques for multiple-input multiple-output systems, and adaptive control. The course is supported by computer-based simulation activities and design procedures, and by hands-on laboratory experience.
PREREQUISITES: MECH 3900.03
CROSSLISTED: MECH 6950.03
FORMATS: Lecture | Lab | Tutorial

MECH 4960 Computational Methods in Engineering
CREDIT HOURS: 3
The course presents basic computer methods of application of mathematical tools to solve engineering problems. Numerical methods such as finite differences, series expansions, and numerical integration are introduced. Numerical solutions of ordinary and partial differential equations with applications to equilibrium, cigenvalue and propagation problems in engineering are considered. Application of mathematical libraries, X-window system and the software tools associated with the Unix system are included.
PREREQUISITES: ENGM 3356.03 or ENGM 3361.03
CROSSLISTED: MECH 6960.03
FORMATS: Lecture | Lab | Tutorial

MINE 2200 Introductory Geology for Engineers
CREDIT HOURS: 3
This course deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater, glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.
EXCLUSIONS: MINE 3500.03, ERTH 1080.03 and ERTH 1090.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3520 Introductory Mining Engineering
CREDIT HOURS: 3
This courseis an introduction to the mineral industry and mining engineering. Emphasis is placed on unit operations, equipment and surface and underground mining methods. Summaries of the national and global mineral industries, innovative technologies and practices, and the relationships between mining and mineral processing are included. A mandatory field trip is an integral part of the course to give students exposure to real life operations.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Tutorial

MINE 3530 Mineral Processing
CREDIT HOURS: 3
This course is concerned with the principles of unit operations employed in the physical processing of minerals: examination of mineral characteristics on which mineral separation methods are based, liberation of minerals, crushing, grinding, screening and classification. Mineral separation methods include: gravity, dense medium, magnetic and high tension separations, radiometric sorting, flotation and selective flocculation. Laboratory tests, their interpretations, and assessment of separation performance are covered.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Tutorial

MINE 3600 Equipment Selection and Materials Handling
CREDIT HOURS: 3
This course deals with mining equipment, analysis of parameters influencing the performance of equipment, and equipment selection. Included are cost analysis and estimation, unit costs, compressed air and hydraulic power systems applications in mining, pump selection, materials handling systems in underground and surface mining operations, ore and waste pass systems, and storage bins.
PREREQUISITES: MINE 3520
FORMATS: Lecture | Tutorial

MINE 3605 Mining Geology I
CREDIT HOURS: 3
This course covers the topics of mineralogy, geologic structures, petrology of igneous, sedimentary and metamorphic rocks and tectonic processes. Emphasis is placed on the relationships between these topics and mining engineering. Laboratory exercises and assignments cover petrographic analysis, geologic maps and sections, stereographic projection and mineral stoichiometry.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3611 Rock Mechanics
CREDIT HOURS: 3
Concepts of mechanical behaviour and intact strength properties of rock masses are discussed. Classification systems and failure criteria for rocks are described. The principles of engineering design for underground and surface mine structures are covered. Stereographic projections and numerical methods are used to analyze surface and underground rock stability. Rock mechanics instrumentation is discussed. Laboratory sessions cover sample preparation and rock testing.
PREREQUISITES: MINE 3605.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 3612 Rock Penetration and Fragmentation
CREDIT HOURS: 3
This course presents the principles and theories of rock drilling and blasting in both underground and surface mining applications. It covers the properties of explosives and the principles for selection of explosives for different situations. The transportation methods, loading techniques and priming procedures for explosives are discussed. Current trends in drilling and blasting practices are considered as well as controlled blasting and blast monitoring methods. State-of-the-art techniques in rock penetration and fragmentation are presented.
FORMATS: Lecture

MINE 3620 Petroleum Engineering
CREDIT HOURS: 3
This course is designed to provide a comprehensive overview of the engineering aspects of the petroleum industry. Similarities between mining and petroleum engineering are stressed. Major topics cover well planning, rotary drilling techniques, drilling optimization, well cementing, well completion, and production methods. Equipment selection and design procedures follow each unit operation.
PREREQUISITES: MINE 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4100 Mining Geotechnique
CREDIT HOURS: 3
The focus of the class is the practical application of soil mechanics theory to soil slope/embankment stability in the mining environment. Methods of stability analysis for natural slopes, cuts, embankments and earth/tailings dams are outlined. The effects of seepage/porewater pressure and earthquake loading are considered, as well as stabilization methods for slopes. A project dealing with earth slopes or embankments is undertaken by the students, including an in class oral presentation.
PREREQUISITES: CIVL 3101
EXCLUSIONS: CIVL 4100
FORMATS: Lecture | Tutorial

MINE 4300 Optimization Methods in Mining and Civil Engineering
CREDIT HOURS: 3
This course will introduce students in mineral resource and civil engineering to fundamental operations research theories and their applications to the planning and management of a variety of mining and civil engineering systems. A number of operations research models and methodologies will be discussed and solution algorithms to these optimization models will be introduced. In addition, uncertainty-based optimization techniques including interval-parameter, fuzzy logic and stochastic analysis for addressing systems' variability and complexity will also be discussed.
CALENDAR NOTES: Mineral, Civil, Environmental Students
FORMATS: Lecture | Tutorial

MINE 4706 Mining Geology II
CREDIT HOURS: 3
The Physical characteristics and origins of the main types of mineral deposits are covered. Individual mineral deposits are described in terms of their mineralogy, rock types, structures and geologic factors affecting mining engineering. Assignments and laboratory exercises concentrate on the three-dimensional analysis of mineral deposits using hand specimens, maps, sections, structure contours and modelling of reserves. Case studies are covered in assigned readings
PREREQUISITES: MINE 3605.03, MINE 3520.03
EXCLUSIONS: MINE 4705.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 4710 Mine Excavation Systems
CREDIT HOURS: 3
This course deals with several specialized mining topics related to mine excavation including mine drainage in underground and surface operations, tunneling and shaft sinking equipment and techniques, mining related soil mechanics, pressure grouting, ground freezing and mine backfilling.
PREREQUISITES: MINE 3611
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4711 Mine Ventilation and Environment Control
CREDIT HOURS: 3
This course presents the main principles of total mine air conditioning: air quality, air quantity, and temperature-humidity control in underground mines. Health hazards such as mine dusts, gases, radiation, and heat stress are discussed. Design of airflow in single openings, circuit analysis, and ventilation network design are studied using manual and computer based techniques. Temperature-humidity control systems design is discussed. Mine illumination and noise control are studied as part of the total mine environment.
PREREQUISITES: MINE 3520
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4750 Senior Design Project I
CREDIT HOURS: 3
This is the first part of a two-part senior project. Methods of mineral /exploration are introduced. Methods of resources/reserves estimation are discussed. Surface and drillhole data are provided. Mineral deposit is outline by exploration together with information on site description, property rights, stratigraphy and structure, map and cross-sections. Students will use the provided data to create ore bodies and estimate ore reserves. Industrial software will be used to complete the project. A mandatory field trip is an integral part of the course to give students exposure to real life operations.
PREREQUISITES: MINE 3520.03 and MINE 3605.03 and MINE 4706.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4801 Advanced Topics in Rock Mechanics
CREDIT HOURS: 3
This course deals with several specific topics in rock mechanics related to ground stability control in surface and underground mines. It covers ground failure, ground movement monitoring, “in-situ” stress management, application of numerical modelling methods, and back-analysis techniques in mining engineering. Theory and state-of-the-art of relevant techniques are discussed. Case studies are introduced to discuss practical problems.
PREREQUISITES: MINE 3611.03 or permission by instructor

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MINE 4815 Mining and the Environment
CREDIT HOURS: 3
This course covers environmental practices, problems and solutions in the mineral industry. Topics include regulations, reclamation, mine closure, acid rock drainage, surface subsidence, nuclear waste disposal and coal mine explosions. Case studies are used to highlight these topics. Class participation is emphasized through oral and written presentations.
PREREQUISITES: MINE 2200.03 and MINE 4706.03
CROSSLISTED: MINE 6014
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4816 Mining Engineering Project
CREDIT HOURS: 3
This project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor and agreement on the proposal scope of the research topic. In addition, the student must obtain approval of the undergraduate coordinator of the department. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment.
CALENDAR NOTES: Students to contact the Civil and Resource Engineering Department for registration instructions, as registration is to be completed by override only
FORMATS: Lab
LAB HOURS PER WEEK: 3

MINE 4820 Surface Mine Slope Stability
CREDIT HOURS: 3
This course deals with the fundamentals of slope stability analysis in surface mining. A brief discussion is first given to field data collection and the mechanism of slope failure. Various techniques for solving slope problems encountered in the mining industry are then introduced, including plane failure, wedge failure, toppling, and rotational failure.
PREREQUISITES: MINE 3611.03 MINE 3520.03
FORMATS: Lecture | Tutorial

MINE 4821 Petroleum Reservoir Engineering
CREDIT HOURS: 3
This course discusses the theory and calculations in petroleum reservoir engineering. Major topics include petroleum composition, formation, migration and trapping mechanisms, classification and properties of reservoir rocks and fluids, fluid flow through porous media, phase behaviour diagrams, reservoir energy and recovery mechanisms, reservoir evaluation, as well as geological and reservoir considerations in drilling, and production engineering. An introduction to petroleum exploration methods, and data interpretation techniques is also included.
PREREQUISITES: MINE 2200.03, MINE 3605.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MINE 4835 Mineral Economics and Mine Production
CREDIT HOURS: 3
Major topics in Mineral Economics include the influence of mineral industry on the economy and mineral policy, marketing of minerals, price mechanisms, mine project evaluations and financing. Mine Production will cover topics on mine management, techniques to increase mine productivity, operating units analysis, mine maintenance, production scheduling and optimization.
PREREQUISITES: MINE 3520.03
EXCLUSIONS: MINE 4713.03 and MINE 4812.03
FORMATS: Lecture | Tutorial

MINE 4850 Senior Design Project II
CREDIT HOURS: 3
This is the second part of the two-part senior design project. Based on the work completed in part one, students, working in groups, will select proper mining methods, design mine structures of an underground and/or surface mine, select mining equipment, surface infrastructures and mineral processing facilities. This is followed by environmental considerations, mine evaluation and risk assessment. Regular progress reports, a final report and group presentations are required. Design projects in petroleum engineering with equivalent amount of work may be considered at the beginning of this course
PREREQUISITES: MINE 4750.03 and Completion of all courses prior to Term 8 in the program. Exception may only be made to those with proven knowledge and industrial experience.
EXCLUSIONS: MINE 4811.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

Civil and Resource Engineering

Introduction
Civil engineering deals with the design, construction, and maintenance of the infrastructure of human civilization. Civil engineers are engaged in addressing two fundamental questions. First, how do we protect our society and its infrastructure from the impacts of the natural environment? Second, what are the impacts of society and its nfrastructure on our natural environment? The infrastructure considered may be at the feasibility or the design stage, or already in existence.

First, humans need protection from the elements to thrive on this planet. With the growth of centers of population and highly organized societies, the need for very diverse kinds of ‘shelter’ has also dramatically increased – now routinely including hospitals, schools, skyscrapers, factories, and theatres. Cities and other centres

require energy and must be connected, giving rise to the need for such ancillary infrastructure as hydro-dams, road networks, bridges, and airports. The results of the design work of the civil engineer are therefore quite visible and a source of enduring pride. However, nature sometimes deals harshly with our infrastructure, striking it with hurricanes and/or ice storms. Even if the basic designs are sound, a significant maintenance effort by engineers who are knowledgeable about the basis for the original designs is implied.

Second, Civil engineers must recognize that humans are biological entities that consume resources and generate waste. They need water, they generate wastewater. They buy consumer goods, they generate solid waste. How can we ensure that our water is pure, and that it stays pure? How can we ensure that the waste from our cities is handled in such a way that damage to the environment and risks to our own health are minimized, or perhaps even nullified? Nature metes out drought and heat, floods and freezing temperatures. How can we prepare society for such eventualities? The fact that our water and other planetary resources asre also finite, can be badly or well-managed, and have been abused in the past all raise additional questions and endeavours that come under the purview of civil engineering. That the undergraduate civil engineering program at Dalhousie University has two options (the Infrastructure Option and Earth and Environment Option) is a reflection of the long-standing relevance and importance of the role of Civil engineers in addressing the above questions.

Although civil engineering is only one among many engineering disciplines available at Dalhousie, as an applied science it is characterized by exceptional technical diversity, great breadth and depth of subject matter, and a propensity for proactively addressing the practical needs of society. It is therefore natural that a BEng. in civil engineering is an excellent way to start 'life in the universe'. It is often used by our graduates as a launching pad for post-graduate studies in very diverse realms of study. Civil engineers are found in all levels of government, in private consulting companies, in public utilities, in global enterprises, and in a wide range of fields that has included technology management, business administration, and even biomedical engineering.

The Department of Civil and Resource Engineering has about 60 graduate students. They are involved in a wide-range of projects that will affect engineering practice. Our experienced and diversely-trained faculty members therefore have many research outcomes upon which they can draw when coming to the classroom or the laboratory and in doing so are eminently able to keep the undergraduate program current and modern.

A. Infrastructure Option
In this option, the following aspects of civil engineering are emphasized:
structural engineering and design, materials of construction (steel, concrete, timber, masonry, asphalt, fibre reinforced polymers), transportation engineering, construction management, and soil mechanics.

B. Earth and Environment Option
In this option the following aspects of civil engineering receive some emphasis:
environmental engineering, water and wastewater treatment, water resources and hydrogeology, geo-environmental engineering, and waste management.

Curriculum and Course Descriptions
Refer to sections IIA and IIIA, Civil Engineering Program, in the Civil and Resource Engineering section of this calendar.

Electrical and Computer Engineering

Introduction
No other branch of engineering can claim to have such an impact on modern society as Electrical and Computer Engineering. The ease, speed and precision by which electrical energy and electrical signals can be transmitted, transformed and controlled has influenced not only our daily life, but has also changed the course of many other disciplines. Over only a few decades, Electrical and Computer Engineering has grown to a multi-branch discipline with significant applications in the areas of power systems, communication systems, microelectronics, photonics, computers and biomedical applications. This rapid growth, coupled with major advances in technology and material science, has made the field very dynamic, and poses a challenge to the student, to the educator and to the practicing Electrical and Computer Engineer for the breadth of its activities.

The Electrical and Computer Engineering curriculum is based on the physical and mathematical principles which constitute the unchanging foundation of the discipline. Courses apply these foundational principles to state-of-the-art applications within specialized areas of the field.

In the final year, technical elective courses are provided to enable the student to obtain a deeper, more detailed understanding of current technology in a field of interest. Technical electives may also be chosen from listed courses offered by other Departments. In addition, during the final year, the students work on a senior capstone project in teams of three to four. The project involves analysis, design and implementation to solve a realistic electrical or computer engineering problem. The projects are submitted by professionals in local industry or research facilities who then provide supervision in conjunction with an assigned Faculty Advisor.

Laboratory sessions form an integral part of most Electrical and Computer Engineering courses. These sessions are conducted in laboratories housed on campus.

Students enrolled in the Electrical and Computer Engineering Degree Programs may take part in Co-Operative Education where they can apply for up to three four-month work placements in industry. Students participating in the Co-op Program will require two years and four months to complete their degree while students not in the Co-op Program can finish in one year and eight months.

Students participating in our program may pursue either the Electrical or the Computer options as listed below. Additionally, the Electrical and Computer Engineering Department offers an exciting Specialiation in Biomedial Engineering.

Staff

Dean
Newhook, J., BEng, MASc (TUNS), PhD (Dalhousie), PEng

Department Head
Bousquet, J-F., BEng (Ecole Polytechnique), MSc, PhD (Calgary), PEng
Interim Department Head & Undergraduate Advisor

Professor Emeritus
Marble, A. E., BEng, MASc, PhD (TUNS), PEng

Professors
Cada, M., Dipl. Ing., MSc, PhD (Prague), PEng
Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE, FEIC
El-Hawary, M. E., BEng (Alexandria), PhD (Alberta), PEng, FIEEE, FCAE, FEIC
El-Masry, E. I., BEng, MSc (Alexandria), PhD (Man), PEng
Gu, J., BSc (Hefei), MSc (Shanghai), PhD (Alberta), PEng
Hughes, F. L., BSc (Carleton), MSc, PhD (Newcastle upon Tyne)
Ilow, J., BSc (Poland), MASc, PhD (Toronto), PEng
Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng

Associate Professors
Adamson, R.,PhD (Toronto)
Brown, J.,PhD (Queen's)
El-Sankary, K., BEng (LU, Lebanon), MASc (Univ of Quebec), PhD (Univ of Montreal), PEng
Little, T. A., BScEng (UNB), MEng (Memorial), PhD (UNB), PEng
Ma, Y., BSc, MEng (Southeast), MSc, PhD (Alberta), PEng
Ponomarenko, S., Dipl. Phys. (Novosibirsk, Russia), PhD (Univ of Rochester)
Sieben, V., PhD, (Alberta), PEng

Assistant Professor
Bousquet, J-F., BEng (Ecole Polytechnique), MSc, PhD (Calgary), PEng, Undergraduate Advisor
Gonzalez-Cueto, J., BEng, MScE (Cuba), PhD (UNB), Co-op Advisor
Koleilat, G., BSc, (Concordia), MASc, PhD (Toronto)
Trukhachev, D., BSc (St. Petersburgh), PhD (LUND), Graduate Coordinator

Adjunct Professors
Aly, H., BEng, MASc (Egypt), PhD (Dalhousie)
Gregson, P., PhD, F.E.C., PEng (Post-Retirement)
Hanafi, H., PhD (Dalhousie)
Hines, P., BS (Dalhousie), PhD (Univ of Bath)
Jin, P., BSc (Jilin China), MSc, PhD (HIT China)
MacNeill, A., BEng, PhD (Dalhousie)
Marble, A. E., BEng, MASc, PhD (TUNS), PEng
Nie, H., MEng (Tsinghua), PhD (UBC), PEng
Schlegel, C., BEng (Switzerland), MSEE, PhD (Notre Dame, US), FIEEE
Yu, Y., BEng (Beijing), MSc, PhD (Swansea, UK)

Cross Appointment
Freund, M., (From Faculty of Science, Chemistry), PhD
Hill. I., (From Faculty of Science, Physics), BSc, PhD (Queen's)
Seto, M., (From Mechanical Engineering) BSc, MSc, PhD (UBC) PEng

Electrical Engineering Option
Students in the Electrical Engineering Option must have completed the Diploma in Engineering from Dalhousie or its Associated Universities, with the appropriate course requirements. In year 3, the Electrical Engineering Option is defined as follows:

Study Term 5 (Fall)

- ECED 3003.03: Networks & Systems
- ECED 3102.03: Electromechanics
- ECED 3201.03: Introduction to Electronics
- ECED 3204.03: Microprocessors
- ECED 3300.03: Electromagnetic Fields
- ECED 3500.03: Signal Analysis

Work Term 1 (Winter)
Study Term 6 (Summer)

- ECED 3101.03: Power Systems I
- ECED 3202.03: Analog Electronics
- ECED 3301.03: Electromagnetic Waves and Propagation
- ECED 3511.03: Communication Systems
- ECED 3901.03: Electrical Engineering Design II

Work Term 2 (Fall)
Study Term 7 (Winter)

- ECED 4502.03: Digital Signal Processing
- ECED 4513.03: Communication Networks
- ECED 4602.03: Modern Control Systems
- ECED 4900.03: Senior Year Project I
- Technical Elective I
- Technical Elective II

Work Term 3 (Summer)
Study Term 8 (Fall)
CPST 3030.03: Engineering in Society II

- ECED 4601.03: Digital Control Systems
- ECED 4901.03: Senior Year Project II
- Humanities Elective
- Technical Elective III

Computer Engineering Option
Students in the Computer Engineering Option must have completed the Diploma in Engineering from Dalhousie or its Associated Universities, with the appropriate course requirements. Starting in year 3, the Computer Engineering Option is defined as follows

Study Term 5 (Fall)

- ECED 3003.03: Networks & Systems
- ECED 3102.03: Electromechanics
- ECED 3201.03: Introduction to Electronics
- ECED 3204.03: Microprocessors
- ECED 3401.03: Systems Analysis
- ECED 3500.03: Signal Analysis

Work Term 1 (Winter)
Study Term 6 (Summer)

- CSCI 3120.03: Operating Systems
- ECED 3202.03: Analog Electronics
- ECED 3403.03: Computer Architecture
- ECED 3511.03: Communication Systems
- ECED 3901.03: Electrical Engineering Design II

Work Term 2 (Fall)
Study Term 7 (Winter)

- ECED 4404.03: Computer Networks & Communications
- ECED 4502.03: Digital Signal Processing
- ECED 4513.03: Communication Networks
- ECED 4602.03: Control Systems

- ECED 4900.03: Senior Year Project I
- Technical Elective I

Work Term 3 (Summer)
Study Term 8 (Fall)

- CPST 3030.03: Engineering in Society II
- ECED 4402.03: Real Time Systems
- ECED 4406.03: Cybersecurity
- ECED 4901.03: Senior Year Project II
- Technical Elective II
- Humanities Elective

Co-op Program
The students who choose the Co-op Program in either the electrical engineering or computer engineering stream follow the schedule below:

Year/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	Work Term 1	Study Term 6
Year 4	Work Term 2	Study Term 7	Work Term 3
Year 5	Study Term 8		

Non-Co-op Program
The students who choose the Non Co-op Program in either the electrical engineering or computer engineering stream follow the schedule below:

Year/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	FREE	Study Term 6
Year 4	Study Term 8	Study Term 7	

Technical Electives

- ECED 4071.03: Analog Filter Design
- ECED 4082.03: MOS Switched-Capacitor Circuits
- ECED 4130.03: Electric Power Systems II
- ECED 4140.03: Power Systems III
- ECED 4260.03: IC Design and Fabrication
- ECED 4350.03: Semiconductor Materials and Devices
- ECED 4360.03: Antenna Theory and Design
- ECED 4421.03: Technology and Applications of Fiber Optics
- ECED 4460.03: Communications Electronics
- ECED 4504.03: Digital Transmission Theory
- ECED 4760.03: Biomedical Engineering

Electrical Engineering Option students can also use courses below as Technical Electives

- ECED 4402: Real Time Systems
- ECED 4404: Computer Networks

Computer Engineering Option students can also use courses below as Technical Electives

- ECED 4601: Digital Control Systems

Specialization in Biomedical Engineering
Biomedical engineering is a subdiscipline of electrical engineering concerned with the design of engineering solutions that address human health problems. Electrical biomedical engineers have played a key role in the development of much of modern medical technology including implanted devices such as pacemakers, hearing aids, diagnostic imaging systems and robotic devices. The field is highly multi-disciplinary and is among the fastest growing areas of engineering.

The Electrical and Computer Engineering Department offers a Specialization in Biomedical Engineering within both its electrical and computer options. To meet the specialization requirements, students **must take a minimum of four half-credit courses related to Biomedical Engineering**. These four half-credits may include two half-credits from ECED 4900/4901: Senior Year Project if the project is on a biomedical engineering topic. Generally, electrical and computer engineering students will meet the specialization requirements by taking the core course BIOL 1030: Biology for Engineers, 3 credit hours and the technical elective ECED 4760: Biomedical Engineering, 3 credit hours and undertake a **senior year project on a biomedical engineering-related topic.** Some students may alternatively choose to pursue undergraduate biomedical engineering courses outside the standard ECE stream. The full list of courses that qualify for the specialization is given below:

BIOL 1030: Biology for Engineers, 3 credit hours

ECED 4900/4901: Senior Year Project (if project is on a biomedical engineering topic), 3 credit hours
ECED 4760: Biomedical Engineering, 3 credit hours

BIOE 3321: Properties of Biological Materials, 3 credit hours

MECH 4650 Biomechanical Engineering, 3 credit hours
MECH 4652: Kinematics of Human Motion, 3 credit hours

Students intending to pursue the specialization should **notify the department by the end of their third year of study**. Students who successfully complete the specialization requirements will be recognized with a note on their transcript and a certificate.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ECED 2000 Electric Circuits
CREDIT HOURS: 3
This is an introductory course in electric circuit analysis. The material covered starts with a review of the fundamental circuit variables such as voltage, current, charge, power and energy. Kirchhoff's laws are introduced and developed into node and loop analysis techniques. Terminal behavior and circuit equivalence including

Thevenin and Norton circuits are covered. Analysis with controlled sources and energy storage elements is developed including steady state and transient response for first order networks. Phasors and sinusoidal steady state are introduced. Students are introduced to circuit simulation tools such as p-spice.
PREREQUISITES: MATH 1290.03, PHYC 1290.03 or equivalent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 2001 Circuit Analysis
CREDIT HOURS: 3
This course covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behavior and performance. Real and reactive power flow is covered before the introduction of balanced three phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.
PREREQUISITES: ECED 2000.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 2200 Digital Circuits
CREDIT HOURS: 3
This course includes an introduction to: Boolean algebra, encoders, decoders, shift registers, asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines, is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer aided design and analysis software is used throughout the course.
PREREQUISITES: ECED 2000.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 3003 Networks & Systems
CREDIT HOURS: 3
This course provides the basic networks and systems analysis skills required in subsequent courses in the Electrical and Computer Engineering program. It covers topics such as signals and systems modelling concepts; applications of Laplace transform in network analysis, Bode plots, block diagram; state-variable analysis; generalized two-port parameters; properties and analysis of linear time-invariant (LTI) systems, the convolution integral and Eigenfunction and Eigenvalues of LTI systems.
PREREQUISITES: ECED 2001.03, ENGM 2202.03
FORMATS: Lecture | Tutorial

ECED 3101 Power Systems I
CREDIT HOURS: 3
This course presents the development of the models of each of the components making up a power system including: transformer behavior (power, control and instrument transformers), synchronous machine behavior (cylindrical rotor and salient pole theory) and transmission line behavior (lumped and distributed parameter). Per unit normalization is covered. The equipment models are compiled to present network models that can be used to study power system operation. Load flow is discussed as well as fault estimation and circuit protection.
PREREQUISITES: ECED 2001.03
FORMATS: Lecture | Tutorial

ECED 3102 Electromechanics
CREDIT HOURS: 3
This course covers the principles of electromechanical energy conversion and electric motors. A review of magnetic field behavior leads to magnetic circuit calculations and permanent magnet circuit behavior. Energy balance principles are used to develop force and torque relationships for many electromechanical applications including relays, meter movements and motor operation. Basic principles of motor operation such as rotating magnetic fields, efficiency and machine ratings are given as a prelude to an in depth presentation of AC and DC motor behavior. Emphasis is placed on motor control and application.
PREREQUISITES: ECED 3101.03
EXCLUSIONS: ECED 3100.03, ECED 4102.03
FORMATS: Lecture | Lab | Tutorial

ECED 3201 Introduction to Electronics
CREDIT HOURS: 3
The course gives an introduction to semiconductor physics. The theory of operation of semiconductor diodes, bipolar junction transistors (BJTs), and junction and metal oxide field effect transistors (MOSFETs), is covered in detail. The analysis and design of diode, BJT, and MOSFET circuits is covered including voltage multipliers, voltage regulators, and low frequency small signal amplifiers. Contemporary computer aided design and analysis software is applied to the aforementioned circuits.
PREREQUISITES: ECED 2000.03
FORMATS: Lecture | Tutorial

ECED 3202 Analog Electronics
CREDIT HOURS: 3
This course covers the design and analysis of transistor amplifier circuits. Students are introduced to amplifier circuit designs of increasing complexity, starting with single-transistor circuits and proceeding to large multi-stage circuits such as opamps. Topics covered include biasing circuits, the role of amplifiers in signal amplification and buffering, large and small signal transistor models, high-frequency behaviour of transistors, differential amplification, feedback amplifiers, and power amplifier stages.
PREREQUISITES: ECED 3003.03 and ECED 3201.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

ECED 3204 Microprocessors
CREDIT HOURS: 3
This course introduces a currently available microprocessor system. Topics include microcontrollers as a type of microprocessor, microprocessor architecture, address, data and control buses, allocation of external memory modules, use of decoders, latches, flip-flops and other elements of a microprocessor system, CPU bus cycle, cycle-by-cycle execution, timing diagrams, I/O methods, I/O allocation, asyncronous serial communication, RS-232 standard, parallel port interfacing, handshaking protocols, timers, timer functions, interrupts, interrupt priority, assembly programming, software development and debugging.
PREREQUISITES: ECED 2200.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 3300 Electromagnetic Fields
CREDIT HOURS: 3
This course forms an introduction to basic electromagnetic principles upon which Electrical Engineering is based. The laws underlying the theory are presented in integral and differential form. A classical development of electrostatics, steady state current, and magnetostatics will lead to Maxwell's equations. The theory developed is applied to calculating circuit parameters such as resistance, capacitance, and inductance for any electronic or magnetic structure.
PREREQUISITES: ENGM 2101.03
FORMATS: Lecture | Tutorial

ECED 3301 Electromagnetic Waves & Propagation
CREDIT HOURS: 3
This course presents the basic theory and applications of propagation of electromagnetic waves. Major topics include: time-varying Maxwell's equations, electromotive force, electromagnetic spectrum, transmission of plane waves, reflection and refraction, polarization, radiation, transmission line theory, standing wave ratio, Smith Chart, impedance matching, guided wave structures, modes and cut-off frequencies.
PREREQUISITES: ECED 3300.03
EXCLUSIONS: ECED 4301.03
FORMATS: Lecture | Tutorial

ECED 3401 System Analysis
CREDIT HOURS: 3
Requirement analysis, specifications, concepts of transforming an ill-defined problem into a set of specifications. Functional decomposition and data dictionaries. Top down structured and object oriented analysis techniques. Laboratory and assignment work will address the analysis of relatively complicated systems using the different techniques.
PREREQUISITES: ECED 2200.03
EXCLUSIONS: ECED 2400.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 3403 Computer Architecture
CREDIT HOURS: 3
This course deals with controllers, processor instruction sets, and memory systems. The student will study design methods, implementation techniques, modelling techniques, and performance analysis. Reduced instruction set architectures (RISC), pipelining, pipeline hazards, and their implementation for modern high speed applications will be studied. The student project will require a team to design and implement (or simulate) a RISC architecture.
PREREQUISITES: ECED 3401.03 or ECED 3204.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 3500 Signal Analysis
CREDIT HOURS: 3
This course covers the fundamentals of continuous-time signals and system properties, including: 1) the convolution integral and the properties of linear time invariant systems; 2) the Fourier series representation of periodic signals. 3) the filtering of periodic signals; 4) the Fourier transform synthesis, analysis equations and properties; 5) the filtering of aperiodic signals; 6) the sampling theorem, including aliasing distortion and its prevention; 7) fundamentals of communications, including exponential and sinusoidal amplitude modulation, demodulation and demultiplexing.
PREREQUISITES: ENGM 1041.03 and ENGM 2022.03 and ENGM 2101.03
FORMATS: Lecture | Tutorial

ECED 3511 Communication Systems
CREDIT HOURS: 3
Transmission of information in the presence of noise. The course combines a rigorous development of the fundamental principles in transceiver implementations with examples of modulation schemes that are used in modern communication systems, via quadrature modulation phase and frequency-shift keying and OFOM. Mathematical foundations of communications are applied to develop state-of-the-art digital modulation.
PREREQUISITES: ECED 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 3901 Electrical Engineering Design II
CREDIT HOURS: 3
This course covers advanced aspects of design, interdisciplinary design and failure analysis. Students gain experience in the design of complex systems. The course culminates in a design contest in which groups of students design and implement a system to meet design objectives, and present and defend their design in an oral design review. The course will consist of both classroom and lab work. The classroom component will use case studies, design reviews and conventional lectures. The lab component is devoted to the design and implementation of a solution to the contest challenge.
PREREQUISITES: ENGI 2203.03

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 4071 Analog Filter Design
CREDIT HOURS: 3
This course deals with the theory and design of active filters, for audio-frequency applications, using op amps. It consists, basically, of two phases. Phase 1 deals with the realization of a given transfer function using cascade of first and/or second-order RC-op amps circuits. In phase II, the transfer functions of filters are studied in combination with frequency-response approximations such as Butterworth, Chebyshev, Inverse-Chebyshev, Caver (or Elliptic) and Bessel-Thompson.
PREREQUISITES: ECED 3003.03 and ECED 3202.03
FORMATS: Lecture | Tutorial

ECED 4082 MOS Switched-Capacitor Circuits
CREDIT HOURS: 3
Metal-oxide-semiconductor (MOS) switched-capacitor (SC) techniques are the most common approach for realizing analog integrated circuits due to their high degree of accuracy and linearity. This course deals with the theory, analysis and design of SC circuits. It covers the following topics: fundamentals of sampled-data systems, MOS technologies, MOS devices for linear analog integrated circuits, Parasetic-capacitances, systematic analysis techniques, basic building blocks of SC filters, synthesis and design of SC filters.
PREREQUISITES: Permission of instructor
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4130 Electric Power Systems II
CREDIT HOURS: 3
Analysis of Interconnected Systems, Power Flow problem, and iterative methods for its solution. Power System Protection, Power System Stability, Optimal Operation of Electric Power Systems.
PREREQUISITES: ECED 3101.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4140 Power Systems III
CREDIT HOURS: 3
The course covers topics such as load curves and forecasting, characteristics and peak demand forecasting, weather-load models, discounted multiple regression and ARMA models, introduction to power system reliability evaluation, generating capacity reserve evaluation, contingency evaluation and an introduction to long-range power system expansion planning packages and production costing.
PREREQUISITES: Permission of the Instructor.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4260 IC Design and Fabrication
CREDIT HOURS: 3
The theory of operation of MOS transistors is reviewed. Processing technologies such as diffusion, ion implantation, and etching are presented with an emphasis on CMOS circuit fabrication. Electrical and physical characteristics of circuits and clocking and I/O structures are studied. Subsystem design of PLA' s, adders, counters, ROM, and RAM will be examined. Extensive use of CAD tools will give the student hands-on experience with systems typical of those used in industry.
PREREQUISITES: ECED 2200.03 and ECED 3201.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4350 Semiconductor Materials and Devices
CREDIT HOURS: 3
This course deals with the fundamentals of generation and detection of light in semiconductor materials as they pertain to optoelectronic devices such as light emitting diodes, laser diodes, photo detectors, and optocouplers. Major topics include: review of semiconductor properties; photo detectors such as PIN photodiodes and avalanche photodiodes (APDS); spontaneous emission and injection luminescence in light emitting diodes (LEDS); and stimulated emission and optical gain in laser diodes (LDS). Typical materials, structures, characteristics and parameters of these devices are discussed with relation to various applications in fiber optics, sensing and consumer products.
FORMATS: Lecture | Tutorial

ECED 4402 Real Time Systems
CREDIT HOURS: 3
This course reviews system analysis and design techniques and then addresses real time implementation methods. Real time operating system (RTOS) requirements are covered. Topics include message queuing, resource sharing, priority assignments, event flags, interrupts, memory allocation, and typical RTOS configurations. Examples in engineering and networking will be discussed. A significant design and implementation project will be undertaken.
PREREQUISITES: ECED 3401.03 or ECED 3204.03, and CSCI 3120.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

ECED 4404 Computer Networks & Communications
CREDIT HOURS: 3
Network architecture and topology, ISO, physical and data link layers, LANS, ATM, routing, quality of service, and emerging technologies. The laboratory and assignments will require implementation of network software and evaluation of current technologies.
PREREQUISITES: ECED 3403.03

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4406 Computer Security
CREDIT HOURS: 3
Design of secure embedded systems is critical for deploying and connected technology today. This class covers methods used to secure computer systems in general, and then applies them to embedded systems. Many attacks specific to embedded systems are covered, and students will be performing their own tests and development of attacks. Attacks specific to embedded systems including invasive and non-invasive attacks will be covered in detail, both theoretically and in labs.

ECED 4421 Technology and Applications of Fiber Optics
CREDIT HOURS: 3
This course deals with the basic principles and applications of optical fiber communications. Major topics include: ray theory and electromagnetic modes in optical fiber waveguides; step-index and graded-index multimode and single-mode fibers; transmission characteristics of optical fibers such as attenuation (absorption, scattering, bending), dispersion (multipath, waveguide, material, profile), and polarization (random, preserved); optical fiber communication systems (transmitter, receiver, digital and analog system design); advanced systems; non-communications applications.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4460 Communications Electronics
CREDIT HOURS: 3
This course provides an introduction to the theory and design of electronic circuits for communications systems. Topics include: the realization of passive components for high frequency applications; small signal amplifier design and characterization employing s-parameter techniques; large signal circuit design realization and analysis employing volterra series and harmonic balance nonlinear analysis procedure; the realization and characterization of non-linear circuits as high efficiency power amplifiers, oscillators, frequency converters, and modulator/demodulator subsystems; the integration of appropriate subsystems into analog and digital terrestrial and space borne radio communication systems.
PREREQUISITES: ECED 3202.03 and ECED 3301.03
FORMATS: Lecture | Tutorial

ECED 4502 Digital Signal Processing
CREDIT HOURS: 3
This course introduces the basics of filtering and analysis of discrete time signals and systems. An overview of the sampling theorem is followed by a discussion of the discrete Fourier transform and the z-transform. The analysis of discrete time signals is introduced, and the design and synthesis of digital filters is covered. Contemporary signal processing hardware and design software is introduced.
PREREQUISITES: ECED 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4504 Digital Transmission Theory
CREDIT HOURS: 3
Topics covered will include detailed analysis of channel and source coding techniques with derivation of bit error rates for various modulation schemes and power-bandwidth efficiency trade-offs. Design of optimum receivers is examined. Coding gains of error control coding schemes are calculated. Power Spectral Density of communications waveforms is presented. Channel fading and performance degradations are discussed. Information Theory issues are examined. Teletraffic analysis is presented for both circuit and packet switched networks.
PREREQUISITES: Permission of instructor
FORMATS: Lecture | Tutorial

ECED 4513 Communication Networks
CREDIT HOURS: 3
This course focuses on the fundamentals of data communication networks. It covers the layered architecture of packet networks and their network elements (switches, routers, bridges). The protocols used to enable transmission of packets through the Internet are examined in detail. Analysis and design of protocols to enhance the efficiency of data transmission in the context of information theory is also presented. Students will gain an appreciation of implementing voice over IP, DVB and WiFi transmissions.
PREREQUISITES: ECED 3511.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ECED 4601 Digital Control Systems
CREDIT HOURS: 3
This course deals with digital control systems analysis and design aspects. Techniques for analyzing the performance of sampled data systems are introduced. Emphasis is on the use of the Z-transform in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for digital control systems to achieve desired response are discussed.
PREREQUISITES: ECED 3600.03 or Permission of the Instructor.
FORMATS: Lecture | Tutorial

ECED 4602 Control Systems
CREDIT HOURS: 3

ECED 4760 Biomedical Engineering
CREDIT HOURS: 3
The first half of the course addresses topics in electrophysiology, including the biological effects of electricity, the generation of electrochemical potentials in the body, the generation of action potentials by cells and their propagation in nerve and muscle cells. This leads into a discussion of the applications of bioelectricity including the measurement of biopotentials for diagnostics, electrostimulation of tissues, electrical safety and the functional role of electrophysiology at the organ level in the heart and brain. The second half of the course is devoted to modern medical imaging technologies. Students are introduced to the physics and signal processing techniques used in x-ray, computed tomography (CT), positron-emission tomography (PET), magnetic resonance imaging (MRI) and ultrasound imaging. Course lectures are supplemented by guest lectures from local biomedical scientists and clinicians on current topics and by labs on bioimpedance measurement and electrocardiography.
FORMATS: Lecture | Lab | Tutorial

ECED 4900 Senior Year Project I
CREDIT HOURS: 3
This course develops the use of fundamental theory in the detailed design of a suitable project selected by the student in consultation with the department. The student is expected to take the project from its preliminary stage through the various design stages to the ultimate completion of the design, which include a detailed report with calculations, drawings, possibly a model and verbal presentation.
PREREQUISITES: Successful completion of all third year courses
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

ECED 4901 Senior Year Project II
CREDIT HOURS: 3
This course is a continuation of Senior Year Project I leading to a final report and formal presentation. The presentation will be made to fellow students and departmental staff members.
PREREQUISITES: ECED 4900.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 5

Introduction
The Department provides the Applied Mathematics courses required to support the engineering programs offered by the other departments. It also provides a specialized graduate program in Engineering Mathematics and Internetworking with several specializations offered with the co-operation of Engineering Departments and the Faculty of Computer Science.

The technical subjects offered by the Engineering Departments depend upon a sound knowledge of mathematical principles. Courses in Engineering Mathematics are therefore offered to students in each of the Engineering Departments. Emphasis is placed on the application of mathematical techniques to the description and solution of engineering problems. The lectures are supplemented by tutorial sessions and, when appropriate, are illustrated by application of techniques that require use of the available computing facilities.

Zamir, M., BSc, PhD (Univ of London), PEng

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ENGM 1011 Engineering Mathematics I
CREDIT HOURS: 3
This course covers functions, limits, continuity, differentiation and integration of polynomials, exponential, logarithmic and trigonometric functions, product, quotient and chain rules applications of differentiation to graphing, maximum-minimum problems and related rate problems, definite and indefinite integrals, and the fundamental theorem of Calculus.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 1012 Engineering Mathematics II
CREDIT HOURS: 3
This course covers applications of integration including areas, volumes, moments, pressure and work, techniques of integration, numerical integration, length of curves, surfaces of revolution, parametric equations, polar coordinates, sequences and series, and Taylor series.
PREREQUISITES: ENGM 1011.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 1041 Applied Linear Algebra
CREDIT HOURS: 3
This course covers geometric vectors in three dimensions, dot product, cross product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 1081 Computer Programming
CREDIT HOURS: 3
This course covers fundamental programming principles including flow control, modularity, and structured programming. The student will implement significant programs in the C language to solve engineering problems.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 2022 Applied Differential Equations
CREDIT HOURS: 3
This course covers first order linear and non-linear differential equations, differential equations of higher order with constant coefficients, applications to Engineering problems, Laplace transforms, periodic functions, applications of Laplace transforms to linear systems, Fourier Series, the line spectrum.
PREREQUISITES: MATH 1280.03 and MATH 1290.03, 36 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 2032 Applied Probability and Statistics
CREDIT HOURS: 3
The topics covered include probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, inferences concerning mean and variance, tests of hypotheses, and introduction to linear regression. The course emphasizes engineering applications and makes extensive use of statistical computer packages.

PREREQUISITES: MATH 1280.03 and MATH 1290.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 2101 Applied Vector Calculus
CREDIT HOURS: 3
This course covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, change of variables in multiple integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem, the Divergence Theorem, and applications to heat flow, electrostatics and fluid flow. Programming skills are developed using software tools to solve practical problems.
PREREQUISITES: MATH 1280.03 and MATH 1290.03
FORMATS: Lecture | Tutorial

ENGM 2283 Data Structures and Algorithms
CREDIT HOURS: 3
This course introduces the student to the fundamentals of software design, implemention, testing, and analysis. Topics covered include data represtation, software develpment environments, libraries, modular programming, basic data structures (stacks, queues, and linked-lists), advanced data structures (trees and graphs), and their associated algorithms, algorithmic complexity, and classic sorting and searching algorithms. The data structures and algorithms are applied to engineering problems.
PREREQUISITES: ENGM 1081.03
FORMATS: Lecture

ENGM 3032 Applied Statistics
CREDIT HOURS: 3
This course deals with some statistical techniques and their application to engineering problems. Topics included are: review of statistical inference, linear regression and correlation, analysis of variance, the design of experiments and nonparametric statistical methods.
PREREQUISITES: ENGM 2032.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 3052 Applied Numerical Methods
CREDIT HOURS: 3
This course provides an introduction to Numerical Analysis with emphasis on solution of Engineering problems. The course covers the following topics: a brief review of Computer Programming; concepts of software engineering; approximations and errors; roots of linear and non-linear equations; LU decomposition, Singular value decomposition, condition number; curve fitting; numerical differentiation and integration; and numerical solution of ordinary differential equations.
PREREQUISITES: ENGM 1081.03, ENGM 2022.03, ENGM 2101.03
EXCLUSIONS: ENGM 3356.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 3271 Engineering Mathematics V
CREDIT HOURS: 3
This course has three parts. The first is complex analysis, including the residue theorem and its applications. The second part concerns transform theory including Fourier Series, Fourier Transform, the frequency domain representation of signals, impulse response, and transfer function. The third part concerns partial differential equations including the classification of equations and boundary conditions, separation of variables, the wave equation, Laplace's equation, and applications to electrical engineering problems.
PREREQUISITES: ENGM 1041.03, ENGM 2022.03, ENGM 2101.03
CROSSLISTED: ECED 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 3282 Data Structures and Numerical Methods
CREDIT HOURS: 3
This course introduces the student to system analysis, and software techniques. Topics covered include objects, stacks, queues, multiple linked lists, searching and sorting algorithms and their implementations in the C++ programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.
PREREQUISITES: ENGM 1041.03, ENGM 1081.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 3356 Numerical Methods and Partial Differential Equations
CREDIT HOURS: 3
This course provides an introduction to Numerical Analysis and Partial Differential Equations with emphasis on solution of problems related to Mechanical Engineering. The following topics are covered: approximations and errors; roots of non-linear equations; systems of equations, curve fitting; numerical integration and differentiation; numerical solution of ordinary differential equations; partial differential equations, separation of variables, solution of the equation, wave equation, and Laplace's equation with various boundary conditions; numerical solutions of partial differential equations.
PREREQUISITES: ENGM 1081.03, ENGM 2101.03, ENGM 2022.03
EXCLUSIONS: ENGM 3052.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 4675 Risk Assessment and Management
CREDIT HOURS: 3
This course introduces the risk assessment and system reliability methodologies, from classical event trees to simulation. Examples of risk-based decision making analyses will be covered, ranging from oil exploration to environmental site remediation. The student will carry out a risk assessment involving design decisions on a project of their own choosing.
PREREQUISITES: ENGM 2032.03
CROSSLISTED: ENGM 6675.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ENGM 4680 Ecosystem Modelling of Marine and Freshwater Environments
CREDIT HOURS: 3
Students develop and apply mathematical models of marine and freshwater ecosystems to study biological production, biogeochemical cycling etc. Lectures provide theoretical background for coupling nutrient and plankton dynamics, including parameterizing biological processes and physical effects. Computer sessions provide hands-on modelling experience. Students also learn to critique modelling literature in a journal-club setting.
CROSSLISTED: ENGM 6680.03, OCEA 5680.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

Environmental Engineering

Location: "D" Building
1360 Barrington Street
Room D215
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3960

Fax: (902) 494-3108

Website: www.dal.ca/faculty/engineering/civil-resource.html

Email: care@dal.ca

Introduction
Environmental Engineering is a rapidly growing discipline within the engineering profession. The program is intended to satisfy the needs of interested students and the environmental industry. The curriculum is designed to train professionals in multidisciplinary approaches to environmentally-based design, waste management, water and soil quality, energy conservation and renewables, and air quality.

Sustainable environmental approaches to production and management systems will continue to be required by industry, government and the consulting sector at the provincial, regional, national and international level. Challenging Environmental Engineering career positions are found in national and international petroleum companies and power utilities, manufacturers of environmental and energy efficient products, environmental consulting companies, provincial and national Government departments such as Natural Resources, Environment, Forestry, Agriculture and Food to name just a few.

Curriculum and course descriptions
For complete course descriptions please see Civil and Resource Engineering.

Co-operative program and schedule
Refer to section Technical Co-op Program, in the Engineering section.

Admissions

- Students who have successfully completed first year engineering at a recognized university will be eligible for admission in Year II of the Environmental Engineering program.
- Students who have completed a first year science program will be considered for admission into Environmental Engineering.
- Students who have completed two or more years of university studies will be considered for admission on the basis of transfer of credits.

Food Science

Location: "D" Building, Sexton Campus
1360 Barrington Street
3rd Floor
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3953

Website: foodscience.engineering.dal.ca/

Email: Food.Science@dal.ca

Introduction
Food Science is a discipline that combines a basic knowledge of science and engineering principles in the study of food products and preservation technologies. Food scientists have training in and employ the principles of the basic sciences such as physics, mathematics, chemistry, biology, biochemistry, and microbiology. Food Science is the application of the basic sciences and engineering to food processing, preservation and safety.

A Minor in Food Science is available to students registered in the BSc 120 credit hour major and honours programs.

Curriculum and course descriptions
Refer to sections IID and IIID, Food Science Program, in the Process Engineering and Applied Science section.

Admissions
Students from Canadian High schools are recommended to take the following subjects in high school: Pre-calculus Math and English and two or more of Physics, Chemistry, Food Science or Biology. The admission requirements are the same as for admission to the Bachelor of Science program. Many of our students have traditionally been transfer students. Please contact the program chair for advice on this matter.

Introduction
Industrial Engineers design systems to enable people and society to improve productivity, efficiency, effectiveness and quality. All engineers work at planning, designing, implementing and controlling the systems that enable people to use technology. The systems that industrial engineers design are broad and are characterized by a need to integrate both the physical and decision making capabilities of humans with all other aspects of the system design. Problems range from the design of a work method and work station, to the design of a factory layout and methods of controlling the flow of materials on the factory floor, to the design of an overall corporate plan involving materials procurement, production, inventory and distribution. The idea of a factory is also extended to include communications, systems, energy systems, health care systems, municipal systems, transportation systems; in fact all systems that are essential to the functioning of modern society. To facilitate effective decision-making and achieve high performance in areas such as scheduling, inventory and quality control, industrial engineers are often required to design and implement computer based information systems.

Human behaviour and capabilities are key elements in the systems industrial engineers work with. In designing the layout of a production line for an automobile manufacturer, the checkout counter for a supermarket, the organization of work flow for a bank or the materials handling system for a steel plant, the engineer must consider both physical requirements and cost parameters, and the physiological and behavioural performance of the human operators. The industrial engineer has a dual role, both to extend human capability to operate, manage and control the overall production system, and to ensure the safety and well being of those working in the system.

Design and development of these systems requires the unique background of the industrial engineer. The process of engineering always starts with measurement. Where other engineers might measure temperatures, pressures, or loads, the industrial engineer measures the time of a work cycle, dollar value of expenditures, rates of machine failures, and demand for finished goods. Usually the mathematical analysis must take into account risk and uncertainty to a larger extent than in other

engineering fields. Computer simulation and optimization are often required. The concepts and techniques found in the Industrial Engineering curriculum have been selected to assist the student to develop the skills that meet the specific challenges of systems which involve managerial activities.

Students begin the Industrial Engineering program with a background in engineering fundamentals studied during their initial two years. In the latter portion of the IE program, they are introduced to the fundamental approaches of work place design and operations research, while at the same time enhancing their mathematical and computer background. Later, more advanced modelling approaches are examined together with courses more directly related to the management process. Production scheduling, inventory control, quality management and plant layout are studied, as are the factors which influence human performance. Students are provided with the opportunity to study such areas as manufacturing, service systems, or maintenance through the Department's elective course offerings.

In their final year, all students undertake a major design project. Projects are drawn from companies or institutions outside the University and are treated as a consulting assignment. Students are evaluated on their ability to achieve an innovative solution by drawing upon the analytical skills developed throughout their program of studies. They must also, of course, satisfy the practical requirements of the client.

Job opportunities for industrial engineers are both plentiful and widely based. Former graduates are currently practicing industrial engineering in areas ranging from semi-conductor manufacturing and airlines, to utilities and hospitals. Invariably, the work assigned is original in its nature, demanding that the industrial engineer be creative in applying his or her many abilities to achieve the best solution. Managers require such results if they are to keep their costs under control in an increasingly competitive world. This requirement will sustain the high demand for industrial engineers well into the future.

Program Guide
Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Work Term 1	Study Term 6
4	Work Term 2	Study Term 7	Work Term 3
5	Study Term 8	Study Term 9	

Year 3, Term 5 (Fall)

IENG 3302.03: Processes & Systems

IENG 3303.03: Ergonomics and Work Design

IENG 3305.03: Computational Methods and Algorithms for IE

IENG 3344.03: Operations Research: Linear Models

IENG 3316.03: Design of Information Management Systems

Year 3, Work Term 1 (Winter)

Year 3, Term 6 (Summer)

IENG 3304.03: Data Management & Analytics

IENG 3320.03: Analysis and Design of Production Systems

IENG 3334.03: Industrial Statistics

IENG 3337.03: Business Operations and Entrepreneurship

IENG 3345.03: Operations Research: Stochastic and Non-Linear Models

Year 4, Work Term 2 (Fall)

Year 4, Term 7 (Winter)

IENG 4432.03: Simulation of Industrial Systems

IENG 4443.03: Quality Control and Reliability

IENG 4445.03: Facilities Design

IENG 4454.03: Design of Inventory Systems

IENG 4480.03: Industrial Engineering Design

Year 4, Work Term 3 (Summer)

Year 5, Term 8 (Fall)

IENG 4458.03: Project Management and Control

IENG 4565.03: Lean Engineering

IENG 4581X/Y.06: Industrial Engineering Design Project

IE Elective

Year 5, Term 9 (Winter)

IENG 4529.03: Industrial and Organizational Psychology

IENG 4581X/Y.06: Industrial Engineering Design Project

IE Elective

IE Elective

Industrial Engineering Electives

- IENG 4544.03: Routing and Scheduling
- IENG 4562.03: Maintenance Engineering and Management
- IENG 4564.03: Design and Optimization of Service Systems
- IENG 4571.03: Computer Integrated Manufacturing Systems
- IENG 4573.03: Industrial Biomechanics
- IENG 4574.03: Decision and Risk Analysis
- IENG 4575.03: Stochastic Processes and Queueing
- IENG 4578.03: Organizational Aspects of Quality Management
- IENG 4579.03: Supply Chain Management
- IENG 4580.03: Modelling and Performance Analysis of Computer Networks
- IENG 4599.03: Special Topics in Industrial Engineering

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	Study Term 6
3	Study Term 5	Study Term 7	FREE
4	Study Term 8	Study Term 9	

Students not wishing to participate in the co-op program are able to structure their academic program over a two-year time period. To do so requires the student to begin the program at the beginning of the summer study term, which commences the first week of May (Study Term 6). The student then completes Study Term 5 in the fall, and then Study Term 7 in the winter. After a summer "off", the student completes the final two study terms in the same order as students in the co-op program thus completing the five study or academic terms within two calendar years.

Year 3, Term 5 (Fall)

IENG 3302.03: Processes & Systems

IENG 3303.03: Ergonomics and Work Design

IENG 3305.03: Computational Methods and Algorithms for IE

IENG 3344.03: Operations Research: Linear Models

IENG 3316.03: Design of Information Management Systems

Year 3, Work Term 1 (Winter)

Year 3, Term 6 (Summer)

IENG 3304.03: Data Management & Analytics

IENG 3320.03: Analysis and Design of Production Systems

IENG 3334.03: Industrial Statistics

- IENG 4562.03: Maintenance Engineering and Management
- IENG 4564.03: Design and Optimization of Service Systems
- IENG 4571.03: Computer Integrated Manufacturing Systems
- IENG 4573.03: Industrial Biomechanics
- IENG 4574.03: Decision and Risk Analysis
- IENG 4575.03: Stochastic Processes and Queueing
- IENG 4578.03: Organizational Aspects of Quality Management
- IENG 4579.03: Supply Chain Management
- IENG 4580.03: Modelling and Performance Analysis of Computer Networks
- IENG 4599.03: Special Topics in Industrial Engineering

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

IENG 2005 Engineering Economics
CREDIT HOURS: 3
This course is designed to provide students with the fundamentals of engineering economics. Engineers must function as managers in the real world of decision making where the criteria include not only technological excellence, but cost. Time value of money, project screening, and a variety of discounting analysis techniques are presented. Make versus buy decisions and repair versus replace decisions are discussed. The tax effects on project cash flow and viability are also presented. This course is designed to introduce students to these fundamentals, and apply them through the use of software and projects.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 2201 Modelling and Optimization for Engineers
CREDIT HOURS: 3
This course will introduce students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The focus of this course will be on formulating, building and solving optimization models primarily using Microsoft Excel. Topics to be covered include linear programming, assignment models, transportation and network models, project management, decision analysis & risk, queueing models, and nonlinear optimization.
PREREQUISITES: ENGM 1081.03, ENGM 2032.03
EXCLUSIONS: ENGN 2201.03

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3302 Processes & Systems
CREDIT HOURS: 3
The purpose of this course is to introduce students to process analysis and systems engineering. Process analysis will include the process charting, value stream mapping, work measurement, and process improvement techniques. Systems engineering topics include an introduction to the general concepts of systems, classical linear systems theory, and how industrial engineering design can be viewed as a control system problem.
EXCLUSIONS: IENG 3301, IENG 3348
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3303 Ergonomics and Work Design
CREDIT HOURS: 3
Ergonomics is the science of applying knowledge of the capabilities and limitations of humans into the design of products, work spaces and systems we use every day. Topics in this course include the musculoskeletal system, anthropometry, manual material handling, work physiology, the effect of work environment on performance, human/machine interaction, cognition and information processing. Design principles based on this knowledge will be presented. This course will include labs and final design project.
CROSSLISTED: KINE 3476.03
EXCLUSIONS: IENG 3313.03, IENG 3347.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

IENG 3304 Data Management & Analytics
CREDIT HOURS: 3
The purpose of this course is to introduce students to process analysis and systems engineering. Process analysis will include the process charting, value stream mapping, work measurement, and process improvement techniques. Systems engineering topics include an introduction to the general concepts of systems, classical linear systems theory, and how industrial engineering design can be viewed as a control system problem.
EXCLUSIONS: IENG 3301, IENG 3348
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3305 Computational Methods and Algorithms for IE
CREDIT HOURS: 3
An overview of advanced programming methods is presented with an introduction to algorithms used in industrial engineering applications. Topics covered include sorting searching, data structures, shortest paths, random number generation, simulated annealing, matrix operations, curve fitting and geometric algorithms. Theta notation (used for measuring the efficiency of algorithms is introduced, as well as analytical and empirical measurement techniques. Techniques for writing and debugging large program, and controlling numerical errors are taught. The VBA programming language will be used for implementation.
PREREQUISITES: ENGM 1081.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3316 Design of Information Management Systems
CREDIT HOURS: 3
Techniques used in the design of information management systems to support decision making are taught. This includes the principles of systems analysis, software engineering and requirements analysis. The design of relational database systems, user interfaces and documentation are covered. Current technologies for computer hardware, software, networking and communications are reviewed. Students are taught how to program database applications in a fourth generation environment. Software development projects will be assigned.
PREREQUISITES: ENGM 1081.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3320 Analysis and Design of Production Systems
CREDIT HOURS: 3
This course provides the student with an introduction to issues in planning and control of production systems and scheduling techniques used in production environments. Topics include line balancing models, performance measurement, materials requirements planning, production lot-sizing, just-in-time (JIT) models and other pull control systems, and job shop/flow shop scheduling and sequencing. Programs currently practiced in industry, such as Lean Manufacturing and Six-Sigma, will also be introduced.
PREREQUISITES: ENGM 1081.03, ENGM 2022.03, ENGM 2032.03, IENG 2005.03, IENG 3345.03 (may be taken concurrently)
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

IENG 3334 Industrial Statistics
CREDIT HOURS: 3
This course covers hypothesis testing, chi-square tests and nonparamatric techniques, analysis of variance and experimental design, as well as simple and multiple linear regression. Numerical examples are solved by straightforward calculation as well as by computer software, and various applications are presented.
PREREQUISITES: ENGM 2032.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3337 Business Operations & Entrepreneurship
CREDIT HOURS: 3
The purpose of this course is to introduce the student to the management and operation of small and large businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, human resources, industrial relations, managerial accounting, and marketing & sales. A team project centered on the creation of a business plan is an integral part of this course.
EXCLUSIONS: IENG 4547
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 3344 Operations Research: Linear Models
CREDIT HOURS: 3
This course is an introduction to linear programming and its applications to industrial engineering design. The simplex method and duality theory are covered in detail. Formulation, solution algorithms, and applications of several problem classes are presented including network models and integer programs. Through a class project, students are introduced to the process of developing an optimization model, including the ideas of database, matrix generators, and report writers.
PREREQUISITES: ENGM 2101.03, ENGM 1041.03, ENGM 1081.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

IENG 3345 Operations Research: Stochastic and Non-Linear Models
CREDIT HOURS: 3
This course consists of an analysis of important probabilistic and nonlinear models in operational research. These include dynamic programming, queuing models and metaheuristics. Aspects of Markov processes and nonlinear programming are introduced. Application of these methods is reinforced through a term project.
PREREQUISITES: ENGM 2032.03, ENGM 1081.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4432 Simulation of Industrial Systems
CREDIT HOURS: 3
This course covers discrete event systems simulation. Model development includes validation and verification methods, the generation of pseudo-random numbers from continuous and discrete distributions, selection of probability distributions and variance reduction techniques. Statistical output analysis and inference are studied for effective interpretation of results. Applications in areas such as manufacturing, service operations, project management and system design are reviewed. Simulation software is used throughout the course.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3334.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
EXCLUSIONS: IENG 3432.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4443 Quality Control and Reliability
CREDIT HOURS: 3
This course evaluates aspects of production to ensure that products meet specifications. Statistical quality control, which is used to determine process capability and to detect process changes, involves the design and use of different types of control charts. Sampling inspection, which is used to separate good lots from poor lots, covers the design of sampling plans. Reliability is concerned with the design of products and reliability testing.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3334.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
EXCLUSIONS: IENG 3443.03
FORMATS: Lecture

IENG 4445 Facilities Design
CREDIT HOURS: 3
This course deals with the principles, concepts and methods of plant layout and materials handling for the optimum design of a facility. The topics include information requirements for facility design, conventional and newer quantitative techniques for analyzing material flow, facilities location, space determination, computerized plant layout techniques, the unit load concept, materials handling equipment selection and automatic storage and retrieval systems. A project involves facilities design for the manufacture and assembly of a mechanical device.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3344.03, IENG 3320.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
EXCLUSIONS: IENG 3445.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4454 Design of Inventory Systems
CREDIT HOURS: 3
This course introduces a number of quantitative methods for the analysis and of inventory systems. These include deterministic and probabilistic economic order quantity (EOQ) models and variants, single and multiple period inventory models, exchange curves, and other advanced inventory models. Forecasting algorithms applicable to inventory systems are also covered.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3320.03, IENG 3334.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG

3345.03, IENG 3348.03 or IENG 4548.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

IENG 4458 Project and Management Control
CREDIT HOURS: 3
This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of acheiving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3344.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
EXCLUSIONS: IENG 4558
FORMATS: Lecture | Tutorial
LAB HOURS PER WEEK: 2

IENG 4480 Industrial Engineering Design
CREDIT HOURS: 3
This is a project-based course designed to prepare students for their senior capstone design project. Students will receive instruction in areas such as expectations of project deliverables, common pitfalls, data collection, design reviews, time management, effective presentation & writing skills, and professionalism. The focus of this course will be a major team project for an actual industry client.
PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3304.03, IENG 3305.03, IENG 3316.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3344.03, IENG 3345.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

IENG 4500 Operations Research Methods for Systems Engineering
CREDIT HOURS: 3
This course will introduce non-industrial engineering students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The objectives of this course will be to provide students with the skills to solve a variety of linear and non-linear models and the ability to recognize how such models can be applied in a wide variety of engineering disciplines. Topics to be covered include linear programming, integer programming, network models, decision analysis, dynamic programming, queuing models, and non-linear optimization. Applications will focus on diverse areas of engineering including mining, transportation, and environmental management.
PREREQUISITES: ENGM 2032.03

IENG 4529 Industrial and Organizational Psychology
CREDIT HOURS: 3
Individual behaviour and group processes are reviewed, particularly as they relate to activities in organizations. Perception, learning, motivation and attitudes are covered. The implications of different personality types at work are taught. Organizational issues such as group dynamics, communication, power and conflict are studied. Applications include job analysis, team effectiveness, personnel selection and training, job enrichment, leadership and career management.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4544 Routing and Scheduling
CREDIT HOURS: 3
Optimization techniques for solving vehicle routing and scheduling problems are covered. Elementary concepts and notation for graphs, networks, maps and geographic information systems (GIS) are presented. Specific issues include NP-complete problems, shortest paths and travelling salesperson problems. Vehicle routing and scheduling with capacity constraints, time windows, pick-up and delivery constraints are also discussed. Applications in manufacturing and transportation are reviewed.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4547 Company Operations and Management
CREDIT HOURS: 3
The purpose of this course is to introduce the student to the management and operation of large and small businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, managing projects, human resources, industrial relations, management finance, marketing and sales. A term project is an integral part of this course.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 2005.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4558 Project Management and Control
CREDIT HOURS: 3
This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4562 Maintenance Engineering and Management
CREDIT HOURS: 3
The course deals with basic maintenance systems of equipment and buildings, maintenance job planning and scheduling, maintenance work measurement/universal maintenance standard (UMS), breakdown versus preventive maintenance, total productive maintenance (TPM), budgets and cost control, computerized maintenance management information system, reliability measurement based on the Weibull distribution, maintainability measures and managing maintenance.
PREREQUISITES: For students entering Upper Divison in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03, IENG 4443.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03, IENG 4443.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4564 Design of Health Care Systems
CREDIT HOURS: 3
This course will focus on the design of systems in Canada's largest industry: healthcare. Throughout the course, examples drawn from healthcare will be used to illustrate how industrial engineering techniques can be applied in a wide variety of settings. Topics to be discussed include capacity planning, service distribution, quality, decision analysis, scheduling, and waiting line models.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4565 Lean Engineering
CREDIT HOURS: 3
Lean Six Sigma is a process improvement methodology used in several organizations, including manufacturing, service industries, healthcare, government and retail. This course will cover the Lean Six Sigma fundamental principles of eliminating waste and providing value to customers. We will explore the DMAIC approach, including developing a problem statement, stakeholder analysis, value stream mapping, Gamba, A3, data collection plans, root cause analysis and change management.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4570 Project Management for Industrial Engineers
CREDIT HOURS: 3
This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of acheiving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3344.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
EXCLUSIONS: IENG 4558.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4571 Computer Integrated Manufacturing Systems
CREDIT HOURS: 3
Techniques are introduced for the analysis and design of computer integrated manufacturing systems. The architecture of CIM systems is discussed, including machining stations, material handling, robotics, computer control and information systems. Specific topics include manufacturing simulation, automated material handling, warehouse management, robotics, manufacturing planning and control, just-in-time systems, group technology, cellular manufacturing, flexible manufacturing systems, concurrent engineering, computer aided process planning and information system design.
PREREQUISITES: IENG 3320.03, IENG 3321.03, IENG 4432.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4573 Industrial Biomechanics
CREDIT HOURS: 3
The course primarily deals with the functioning of the structural elements of the human body and the effects of external and internal forces on the body. Due emphasis is given to the biomechanical approach to job design. This takes into account human motor capabilities and limitations, work physiology, task demands, equipment and workplace characteristics in an integrated manner. Use of bioinstrumentation and applications of biomechanics in work, industry and rehabilitation are discussed.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4574 Decision and Risk Analysis
CREDIT HOURS: 3
This course teaches the principles and applications of decision analysis. The cognitive processes involved with information acquisition, judgment, value assessment, and decision-making are presented. Methods for scoping a decision-making problem, decomposing it into elements, establishing criteria, and evaluating the options are discussed. Probability assessment under uncertainty, decision trees, value of information, utility theory, and multiple-agent contexts are explored to address increasingly complex scenarios.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.04 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4575 Stochastic Processes and Queueing
CREDIT HOURS: 3
This course covers the analysis of stochastic models. After a review of the relevant aspects of probability theory, the course examines discrete-time Markov chains, Poisson processes, continuous-time Markov chains, and renewal theory. The course also touches on applications of the theory to queuing, inventory, and reliability.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4578 Organizational Aspects of Quality Management
CREDIT HOURS: 3
In this course, quality is investigated as a strategic initiative for organizations. The concept of quality is described in relation to the philosophies of Shewart, Deming, and Juran. The organizational structures needed to support Total Quality Management (TQM) programs are described. Tools for process analysis and improvement are discussed, as is the concept of change management. The course concludes with an evaluation of current quality certification protocols, particularly the ISO 9000 series of standards.
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4579 Supply Chain Management
CREDIT HOURS: 3
This course covers the design, analysis and operational control of manufacturing supply chain systems. Models of the supply chain at the strategic, tactical and operational levels are examined as well as the incorporation of these models in a variety of decision support systems. The role of information technology, including enterprise resource planning software, is studied in the supply chain context.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03, IENG 4454 For students entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03, IENG 4454
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4580 Modeling and Performance Analysis of Computer Networks
CREDIT HOURS: 3
The fundamentals of computer network operation and design are covered. Topics include protocols, wide area networks, local area networks, internetworks, performance measurement, and data network simulation. A network design project will be assigned.
PREREQUISITES: IENG 4432.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4581 Industrial Engineering Design Project
CREDIT HOURS: 6
In this course, the students work in groups on an actual industrial engineering design problem from an organization outside the university. The problem may be in a manufacturing plant, a consulting firm, or a service industry. The ability to solve problems and communicate with the client organizations and with professional Industrial Engineers is stressed. Students are required to maintain a professional log, to prepare an interim report, and to demonstrate their presentation skills.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: For students entering Upper Division in 2017/18: IENG 4432.03, IENG 4443.03, IENG 4445.03, IENG 4454.03, IENG 4480.03 For students

entering Upper Division prior to 2017/18: IENG 3301.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3320.03, IENG 3321.03, IENG 3334.03 or STAT 2080.03, IENG 3345.03, IENG 3348.03 or IENG 4548.03, IENG 4432.03, IENG 4443.03, IENG 4445.03, IENG 4454.03, IENG 4458.03
FORMATS: Lab
LAB HOURS PER WEEK: 6

IENG 4598 Special Topics in Industrial Engineering II
CREDIT HOURS: 3
This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.
PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

IENG 4599 Special Topics in Industrial Engineering
CREDIT HOURS: 3
This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.
PREREQUISITES: IENG 3302.03, IENG 3303.03, IENG 3305.03, IENG 3316.03, IENG 3344.03, IENG 3304.03, IENG 3320.03, IENG 3334.03, IENG 3337.03, IENG 3345.03
RESTRICTIONS: Minimum of 30 credit hours
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

Materials Engineering

Introduction
Metals and materials are found in every aspect of society today. Materials have always been central to the advancement of civilization so it is not surprising that entire eras are named after them (bronze age, iron age). The importance of developing new, advanced materials is truly a global issue with societal demands for things such as more fuel efficient vehicles and faster computer processors reaching all time highs. Materials Engineers are the driving force behind such developments, having an unsurpassed understanding of the respective structure, properties and processing of materials. Consequently, graduates are employed in practically all industries. Principles amongst these are primary metal production, automotive, aerospace, government research establishments and consulting firms.

The program has been designed to give students extensive coverage of this highly unique field which in itself is very broad. The principal branches of Materials Engineering in which students receive instruction include (i) Extractive Processing of Materials, (ii) Structure of Materials, and (iii) Mechanical Properties and Testing of Materials; usually the graduating engineer chooses to specialize in one of these three. Students learn about all of the major courses of materials including metals, ceramics, polymers, and composites -graduates are true “Materials Experts.” In doing so, the respective curricula are designed to provide in-depth knowledge of engineering and more importantly, extensive coverage of discipline-specific areas.

Students are able to obtain a Bachelor of Materials Engineering with Co-Op distinction in two years following the completion of a Diploma in Engineering. There are two Co-op programs offered in Materials Engineering. One is a Bachelor of Engineering, the other a combined BEng/MASc Degree. The undergraduate curriculum is the same for both programs.

The BEng/MASc was developed in light of the program's strong commitment to research and to permit the identification of students interested in graduate studies before they completed their undergraduate courses. In this regard, all faculty members are actively involved in international research and development initiatives. Consequently, students may also choose to pursue Master's and Doctoral degrees in Materials engineering at Dalhousie in many technically challenging fields of global importance. Included are ceramic and metal matrix composites, automotive alloys, aerospace materials, electronic materials, corrosion, wear, and near-net-shape materials processing technologies.

Curriculum and course descriptions
Refer to sections IIE and IIIE, Materials Engineering Program, in the Mechanical Engineering section.

Co-operative program and schedule
Refer to Technical Co-op Program, in the Engineering section.

Introduction
Mechanical Engineering covers a very broad field of professional activity in such areas as land, sea, air, and space transportation; primary and secondary manufacturing industries; energy supply, conversion and utilization; environmental control; and industrial management. In these areas, the Mechanical Engineer may become involved with design, construction, operation, development, research, planning, sales and management.

The curriculum is designed to develop an understanding of the fundamental principles of Mechanical Engineering through lecture, tutorial, and laboratory activities. Well-instrumented laboratories in thermofluids, energy conversion, stress analysis, vibrations, and control systems provide experience in measurements and applications, to ensure a thorough understanding and appreciation of the subject matter. Courses in mathematics, and various non-technical subjects are offered to broaden the student's outlook and understanding of the profession.

Laboratory involvement is considered an important component of mechanical engineering students' education. Emphasis in the laboratory is placed on project work in which design, development and testing are combined in term projects. The laboratory facilities include extensive equipment which is available for use by both undergraduate and graduate students. Measurement techniques and interpretation of test data are emphasized in the laboratories.

Most undergraduate laboratories use high-speed PC-based digital data acquisition and control systems with graphical interfaces for lab experiments and computations, and the Department has several advanced computer graphics systems.

A design project is an integral part of the senior year curriculum. This involves the student in the original design of a machine or system. Generally, the material learned in several courses must be applied in an imaginative way to achieve the required objective. Non-credit machine-shop practice courses are available to aid the design and construction of projects. Many design projects are sponsored by industry. Most projects involve hardware and typically result in construction and testing of prototypes.

Postgraduate studies in the Department are concentrated in the areas of renewable energy, conversion and storage, stress analysis, heat transfer, multi-phase flow, fluid and thermal power, dynamics of rotating machines, robotics, MEMS and computer aided design and manufacturing. Research and project master's degrees as well as the doctoral degree are offered.

Program Guide
Mechanical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Staff

Dean
Newhook, J., BEng, MASc (TUNS), PhD (Dalhousie), PEng

Department Head
Doman, D. A., BASc, MASc (Waterloo) PhD (Dalhousie), PEng

Professors Emeriti
Caley, W. F., BSc (Eng), MSc (Eng) (Queen's), PhD (Toronto), PEng
Hancock, H., BASc, MASc, PhD (Toronto), PEng
Russell, L. T., BEng (TUNS), MSc (Queen's), PhD (Car), PEng

Professors
Allen, P. L., BSc (Mt. A), BEng (TUNS), MESc (UWO), PhD (TUNS), PEng
Basu, P., BEng (Calcutta), D.Phil (Burdwan), PhD (Aston in Birmingham), PEng
Bauer, R. J., BSc (Waterloo), PhD (Toronto), FEC, PEng
Bishop, D. P., BEng, MASc (TUNS), PhD (Dalhousie)
Corbin, S. F., BEng, MAsc (TUNS), PhD (McMaster)
Farhat, Z., BASc, MASc, PhD (Windsor), Materials Program Undergraduate Co-ordinator)
Hubbard, T., BSc (Dalhousie), BEng (TUNS), PhD (Caltech), PEng, Mechanical Program Undergraduate Coordinator

Groulx, D.,BSc, PhD (Sherbrooke), Ing, PEng, FCSME, Graduate Program Co-ordinator
Kalamkarov, A. L., BSc, MASc, PhD (Moscow State), DSc (Acad Sci, USSR), PEng, Co-op Coordinator
Militzer, J., BSc (EEM Brazil), MSc (USP Brazil), PhD (Wat), PEng
Pan, Y., BEng (Yanshan, China), MEng (Zhejiang, China), PhD (NUS, Singapore), PEng
Plucknett, K. P., BSc, PhD (Warwick)
Taheri, F., BEng, MASc, PhD (TUNS)
Ugursal, V. I., BSc (Bogazici), MEng, PhD (TUNS), PEng, FCSME, Recruitment Coordinator
Warkentin, A., BEng Mgt, MEng (McMaster), PhD (Waterloo), PEng
Yemenidjian, N. B., BEng, PhD (Cordordia)

Associate Professors
Doman, D. A., BASc, MASc (Waterloo), PhD (Dalhousie), PEng
Johnston, C. R., BSc, MSc (Alberta), PhD (Calgary), PEng
Seto, M., BSc, MSc, PhD (UBC), PEng
Swan, L., BSc (CalPoly), MASc, PhD (Dalhousie), PEng

Adjunct Professors
Acharya, B., BEng (ICE, Tribhuvan Univ), MEng (AIT), PhD (Dal)
Beausoleil-Morrison, I., BASc, MASc (Waterloo), PhD (Univ of Strathclyde)
Donaldson, I., BSc (Univ of Michigan), MSc (Worcester Polytechnic Institute)
Fung, A., BSc (Dalhousie), BEng, MASc (TUNS), PhD (Dalhousie), PEng
Irani, R., BASc (Windsor), MASc, PhD (Dalhousie)
Joseph, A., BSc (St. FX), MSc (NSAC), PhD (Dalhousie)
Kipouros, G. J., DiplEng (NTU Athens), MASc, PhD (Toronto), PEng
Mahallati, A., BEng (Marine Eng), MASc (Dalhousie), PhD (Carleton)
Nolting, A., BASc (Waterloo), MASc (Royal Military College), PhD (Royal Military College)
Schumann, A., BSc, MSc (Univ of Natal), PhD (Univ of Georgia)
Warnat, S., Dipl.-ing. (FH), MSc, PhD (Christian-Albrechts)

Senior Instructor
Warner, R. A., BEng (TUNS), PEng

Instructor
Pharoah, H., BSc (Univ of Calgary), MASc (Dalhousie)

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Year 3, Work Term 1 (Fall)

Year 3, Study Term 5 (Winter)

- MECH 3010.03: Machine Design: Loading of Components
- MECH 3500.03: Dynamics of Machines
- MECH 3805.03: Mechanical Engineering Thermodynamics
- CPST 3030.03: Engineering in Society II
- ENGM 3356.03: Numerical Methods and Partial Differential Equations
- MATL 3500.03: Materials Engineering

Year 3, Work Term 2 (Summer)

Year 4, Study Term 6 (Fall)

- MECH 3020.03: Machine Design: Power Components
- MECH 3305.03: Fluid Mechanics
- MECH 3660.03: Finite Element Method in Mechanical Design
- MECH 3705.03: Heat Transfer

- MECH 3900.03: Systems I
- Humanities Course*

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Study Term 7 (Fall)

- MECH 4015.05: Design Project I
- MECH 4300.03: Stress Analysis
- MECH 4600.03: Engineering Measurements
- MECH 4805.03: Thermo-Fluid Engineering III
- Technical Elective I

Year 5, Study Term 8 (Winter)

- MECH 4025.05: Design Project II
- MECH 4500.03: Vibrations
- MECH 4900.03: Systems II
- Technical Elective II
- Technical Elective III

***Humanities Course**
Refer to general Engineering section for details.

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Study Term 6 may be taken before Study Term 5 if desired. In this way, the program can be done in a total of four years.

Technical Elective Courses

- MECH 4000.03: Manufacturing
- MECH 4340.03: Energy Management I
- MECH 4430.03: Turbomachines
- MECH 4440.03: Principles of Marine Craft Design
- MECH 4444.03: Mechatronics
- MECH 4450.03: Marine Craft Design and Construction
- MECH 4510.03: Mechanics of Composite Materials
- MECH 4521.03: Applied Dynamics
- MECH 4540.03: Aerodynamics
- MECH 4560.03: Space Systems
- MECH 4631.03: CAD/CAM
- MECH 4640.03: Robotics
- MECH 4650.03: Biomechanical Engineering
- MECH 4652.03: Kinematics of Human Motion
- MECH 4670.03: Finite Element Simulation Techniques
- MECH 4810.03: Energy Conversion Systems
- MECH 4820.03: Energy from Renewable Resources
- MECH 4830.03: Reciprocating Internal-Combustion Engines

- MECH 4840.03: Steam Plant Engineering
- MECH 4850.03: Solar Energy Engineering
- MECH 4851.03: Heating, Ventilating & Air Conditioning
- MECH 4880.03: Introduction to Nuclear Engineering
- MECH 4910.03: Fluid Power
- MECH 4950.03: Advanced Control Engineering
- MECH 4960.03: Computational Methods in Engineering

NOTES:

1. Not all of these courses will be offered every year.
2. Seniors may take one graduate course as a technical elective with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.
3. Seniors may take one technical elective from another engineering department at Dalhousie with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.

Materials Engineering

Materials Engineering offers two versions of the BEng Program:

1. Co-op Program

2. Non Co-op Program

Co-op Program Sequencing

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Year 3, Work Term 1 (Fall)

Year 3, Term 5 (Winter)

- MATL 3500.03: Materials Engineering
- MATL 3510.03: Extraction of Materials
- MATL 3520.03: Structure of Materials
- ENGM 3356.03: Numerical Methods
- MECH 3805.03: Mechanical Engineering Thermo
  ***Humanities taken by Yr 3 Non Coop students instead of MATL 3500**

Year 3, Work Term 2 (Summer)

Year 4, Term 6 (Fall)

- MATL 3600.03: Mechanical & Physical Behavior of Materials
- MINE 3530.03: Mineral Processing
- MECH 3705.03: Heat Transfer
- PEAS 3700.03: Law and Ethics in Process Engineering
- Technical Elective I
- Humanities
  ***MATL 3500 Materials Engineering taken by Yr3 Non Coop students instead of Humanities**

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Term 7 (Fall)

- MATL 4700.03: Materials Design Project I
- MATL 4710.03: Ferrous Alloys & Joining of Materials
- MATL 4720.03: Industrial Processing of Materials
- MATL 4825.03: Solidification and Casting
- PEAS 4773.03: Industrial Safety & Loss Management
- Technical elective II
- Graduate Course I (for combined BEng/MASc Students Only)

Year 5, Term 8 (Winter)

- MATL 4800.03: Materials Design Project II
- MATL 4810.03: Materials Process Design
- MATL 4820.03: Non-Metallic Materials
- MATL 4830.03: Non-Ferrous Alloys
- MATL 4840.03: Corrosion and Degradation of Materials
- Technical Election III
- Graduate Course II (for combined BEng/MASc Students Only)

Year 5, Term 9 (Summer) (for combined BEng/MASc; Optional for BEng)

- Technical Elective I
- Technical Elective II
- Technical Elective III
- Graduate Course III (for combined BEng/MASc Students Only)

Non Co-op Program Sequencing

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.

Combined BEng - MASc Program Guide

1. Program Entrance Requirements

To be eligible to enter the Combined BEng/MASc Program, a student must be able to demonstrate an overall average of 70% based on the subjects in the first three academic terms of the Materials Engineering Program.

Since the first two academic terms of the BEng and combined BEng/MASc Programs are common, students enrolled in the BEng Program may apply for entrance into the combined degree program at any time before the beginning of the seventh academic term.

2. Financial Support

All students accepted into the BEng/MASc Program will be eligible for financial assistance beginning at the start of the seventh academic term. The assistance will be spread over the remainder of the academic terms and may have a total value of approximately $15,000.

Part of the financial assistance is derived from money obtained to further specific research objectives on which the student is expected to work for his or her Master's Thesis. The remainder of the financial support is normally derived from assigned duties as Part-Time Teaching Assistants. A course work Master's Program (MEng) can be followed but the amount of financial assistance will be considerably reduced.

3. Maintenance of Standing

In order to retain standing in the Combined BEng/MASc Program, students must continue to maintain an academic average of B-. Failing this, a student may obtain a BEng Degree only by completing the required courses, but will not be eligible for further financial assistance from the Department. However, on graduation should the student attain an average of B, he/she may be eligible to pursue graduate studies in the department.

4. Scholarships
Students in the Combined BEng/MASc Program are encouraged to apply for the usual scholarships and bursaries in order to partially augment the financial support received. Contact the Department for details.

5. Combined BEng/MASc Scheduling
The combined BEng/MASc Degree follows the program as indicated for the BEng with the addition of two academic terms as follows:

Year 6, Term 10 (Fall)

- Graduate Course IV
- Thesis

Year 6, Term 11 (Winter)

- Thesis

6. Technical Electives
Choose three:

- ENVE 3461.03: Environmental Measurement and Analysis
- ENVE 4707.03: Green Engineering
- ENVE 4772.03: Environmental Assessment and Management
- IENG 4558.03: Project Management and Control
- IENG 4547.03: Company Operations and Management
- MATL 4805.03: Electrochemical Processing of Materials
- MATL 4806.03: Particulates in Materials Engineering
- MATL 4813.03: Iron and Steel Production
- MATL 4825.03: Solidification and Casting
- MATL 4826.03: Physical Metallurgy and Ceramics
- MECH 4330.03: Mechanical Design
- MECH 4650.03: Biomechanical Engineering
- MECH 4880.03: Introduction to Nuclear Engineering
- MINE 4830.03: Advanced Mineral Processing

Technical electives from other engineering departments may be selected subject to availability and approval by the departments concerned.

Not all technical electives will be offered every year.

Courses
Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Materials Engineering

MATL 3500 Materials Engineering
CREDIT HOURS: 3
This course correlates properties of engineering materials with their structure. Laboratory objectives include preparation of reports in publication format and illustration of lecture material. Basic concepts of crystallography, chemical bonding and binary phase diagrams are introduced. These are used to describe properties of metallic and nonmetallic materials and how these may be controlled by engineers. Materials discussed include ferrous and nonferrous metals and alloys, ceramics, composites and semiconductors.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 3510 Extraction of Materials
CREDIT HOURS: 3
The lecture portion of this course covers the fundamental principles involved in the high temperature extraction of materials from their ores. Included are descriptions of the equipment used in unit operations such as roasting, smelting and refining and the application of these operations to the production of iron and steel and the more common nonferrous metals. The laboratory portion of this course consists of practice in stoichiometric mass balance and thermochemical calculations of common pyrometallurgical processes for extracting materials.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 3520 Structure of Materials
CREDIT HOURS: 3
This course presents the following topics: the electronic structure of materials, fundamentals of crystallography, electron motion in the space lattice, introduction to composites, X-ray diffraction and X-ray diffraction techniques, and the crystal structure of crystalline materials. Typical binary phase diagrams are discussed from the structural point of view. Laboratory experiments include preparation and evaluation of X-ray films and diffractometer charts, structural investigation of binary alloys, and crystallite size structure.
EXCLUSIONS: MATL 3601.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 3600 Mechanical and Physical Behaviour of Materials
CREDIT HOURS: 3
This course is designed to give students a fundamental understanding of how materials deform and the mechanisms that can be engineered within the atomic structure so as to alter this behaviour. Core topics include basic crystallography, dislocation theory, strengthening mechanisms (dislocations, dispersoids, precipitation hardening, and ceramic reinforcements), and mechanical testing, For the latter, specific emphasis is placed on the techniques of tensile, creep, and fatigue testing.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4700 Materials Design Project I
CREDIT HOURS: 3
The course objective is to provide experience in the application of engineering principles to the solution of a specific problem in Materials Engineering. A project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, designs experimental setup as needed, and arranges for the acquisition of necessary equipment. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Oral progress reports are required. A written report and an oral presentation are required at the end of the term.
PREREQUISITES: MATL 3500.03
FORMATS: Lab
LAB HOURS PER WEEK: 6

MATL 4710 Ferrous Alloys and Joining of Materials
CREDIT HOURS: 3
The course reviews the iron-carbon system, including the transformation products of austenite, alloying elements and combined thermo-mechanical treatments. Specific classes of steels, ranging from the simple plain carbon steels to the duplex stainless steels, are considered. The course also discusses the fusion welding of a representative selection of steels. Fusion welding process variables are studied together with the metallurgy of the weld metal and the heat-affected zone. Hands-on laboratory experiments are included to reinforce key topics
PREREQUISITES: MATL 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MATL 4720 Industrial Processing of Materials
CREDIT HOURS: 3
The fundamentals of metal working in relation to rolling, forging, extrusion, and drawing are studied. In each scenario the physical and mechanical metallurgy principals involved are considered as in the role of tribology. Case studies for a variety of processes are considered.
PREREQUISITES: MATL 3500
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4800 Materials Design Project II
CREDIT HOURS: 3
The objective of this course is to provide experience in the design of materials to the solution of a specific problem. A design project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, and designs an experimental setup. The student conducts the planned work, analyses the data and critically evaluates the results. Students communicate their findings through written reports and an oral talk at the end of the term.

PREREQUISITES: MATL 3500.03 and MATL 4700.03
FORMATS: Lab
LAB HOURS PER WEEK: 6

MATL 4806 Particulates in Materials Engineering
CREDIT HOURS: 3
The course covers the preparation, characterization, physical and chemical properties and processing of powders in materials processing including agglomeration, gas-solid reactions, sintering and hot pressing.
CROSSLISTED: MATL 6806.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4810 Materials Process Design
CREDIT HOURS: 3
This course focuses on the design of new metallurgical plants, processes and products based on knowledge acquired in previous core courses. Material and heat balances, metal economics, design and optimization aspects are covered. Groups of students undertake design projects aiming at modernization of existing plants or establishing new plants operating on new technology. Emphasis is placed on process selection and economic evaluation, detailed design of process equipment, sizing, costing and optimizing the processing units.
PREREQUISITES: MATL 3500.03, MATL 4710.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4817 Metallurgical Processing
CREDIT HOURS: 3
This course covers the principal practices related to metallurgical processing and the marketing of metals, including modification of concentrates (sintering, pelletizing, briquetting).Descriptive outlines of metallurgical processes such as iron and steel, lead, aluminum and zinc production are presented, along with utilization of fuels for metallurgical purposes (coal, coke, oil).
FORMATS: Lecture

MATL 4820 Non-Metallic Materials
CREDIT HOURS: 3
This course includes a description of the chemical and structural characteristics of various common non-metallic materials as well as manufacturing methods. A number of applications for such materials are considered including glass, composites, refractors, solid electrolytes and electronic materials. The chemistry of multi-component systems are also discussed. The laboratory experiments are designed to illustrate the lecture material.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MATL 4825 Solidification and Casting
CREDIT HOURS: 3
The fundamental principles of solidification and practical applications in the casting industry are dealt within this course. The topics covered are nucleation processes, the growth of single crystals, plane front, cellular and dendritic solidification in single and polyphase alloys, solidification of castings, ingot moulding and core making processes, moulding sands, design of risers and gates, and the melting of metals. The laboratory experiments cover the growth of single crystals of pure metals, alloys, and semiconductors; pattern, mould and core making; and, the casting of commercial alloys.
PREREQUISITES: PEAS 3600.03 or MECH 3705
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4826 Physical Metallurgy and Ceramics
CREDIT HOURS: 3
The first portion of this course covers the physical metallurgy, properties and uses of the principle industrial alloys. The remainder of the course deals with the structure of important ceramic materials such as glass, porcelain and refractors, their properties, and the processing and applications of ceramics. The laboratory experiments will illustrate the principles discussed in the lectures.
PREREQUISITES: MATL 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4830 Non-Ferrous Alloys
CREDIT HOURS: 3
The objective of this course is to introduce students to the structure, properties, and processing of different types of non-ferrous alloys. Alloys of principal interest include those that are premised on aluminum, copper, nickel, and titanium. Select applications for these industrially-important material are also reviewed.
PREREQUISITES: MATL 3500.03
EXCLUSIONS: MATL 4823.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MATL 4840 Corrosion and Degradation of Materials
CREDIT HOURS: 3
This course introduces the students to the basic theory of corrosion as well as the basic principles of hydrometallurgy. Students will also be introduced to the different types of corrosion and the practices of corrosion prevention and remediation.
PREREQUISITES: PEAS 3500.03 or MECH 3805

FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

Course Descriptions - Mechanical Engineering

MECH 3010 Machine Design: Loading of Components
CREDIT HOURS: 3
The application of basic methods and concepts of strength of materials to machine design including design concepts, stress, and theories of failure is developed. Topics include: load analysis, materials, static stresses, strain and deflection, failure, impact, fatigue, surface damage. Applications include: screw fastenings, springs.
PREREQUISITES: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03
FORMATS: Lecture | Lab | Tutorial

MECH 3020 Machine Design: Power Components
CREDIT HOURS: 3
The use of engineering principles in the design of machine power components is developed. Topics include: Lubrication and sliding bearings, roller bearings, spur gears, helical, bevel and worm gears, shafts, clutches and brakes, power transmissions such as belts and chains.
PREREQUISITES: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03
FORMATS: Lecture | Lab | Tutorial

MECH 3305 Fluid Mechanics
CREDIT HOURS: 3
This course presents the dynamic governing equations of fluid flow in differential forms: continuity, Navier-Stokes and energy. Concepts of stream function, vorticity and velocity potential are also introduced. The physics and modeling of Turbulence in fluid systems is shown. The boundary layer theory is shown and flow past immersed bodies are studied: concepts of drag and lift forces are presented. Compressible flow is introduced: speed of sound, nozzle and diffuser, shock waves, Rayleigh and Fanno flow are all studied.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab | Tutorial

MECH 3500 Dynamics of Machines
CREDIT HOURS: 3
The course focuses on design of mechanism, their motion, static and dynamic loads, and power transmission. It includes planar and spatial 4-bar and 6-bar linkages, cam mechanisms, gear trains, rotor systems, and manipulators. Linkage inversion, transformation, and synthesis are used for design of new mechanisms. Graphic, analytical, computer, and physical modeling techniques are used. Many real life mechanisms are analyzed.
PREREQUISITES: ENGI 2400.03, MECH 2100.03, or ENGI 2203.03, ENGM 1041.03, ENGI 1400.03 or PHYC 1280.03
FORMATS: Lecture | Lab | Tutorial

MECH 3660 Finite Element Method in Mechanical Design
CREDIT HOURS: 3
This course deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by extensive applications to the design of machine and structural components. Mechanical and thermal stresses in trusses, beams, axisymmetric, shell, and 3D solid elements are considered. Professional finite element modeling best practices are discussed. A finite element pre-processor, code, post-processor are introduced and used in the course assignments.
PREREQUISITES: ENGI 2204.03
FORMATS: Lecture | Lab | Tutorial

MECH 3705 Heat Transfer
CREDIT HOURS: 3
This course is an introduction to the three modes of heat transfer: conduction, convection and radiation. Topics covered in conduction include steady-state and transient conduction, in one and two-dimensional system, and the study of extended surfaces. Force and free convection for internal and external flows are examined. The fundamentals of radiation heat transfer are covered, including blackbody radiation, gray surfaces, Kirchhoff's law and radiation exchange between surfaces.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MECH 3805 Mechanical Engineering Thermodynamics
CREDIT HOURS: 3
This course builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.
PREREQUISITES: ENGI 2102.03, ENGI 2103.03
FORMATS: Lecture | Lab | Tutorial

MECH 3900 Systems I
CREDIT HOURS: 3
The course deals with the analysis of dynamic physical systems. Ordinary-differential-equation models are developed for mechanical, thermal, fluid and electrical systems. System equations are solved using classical methods and Laplace-transform techniques. S-plane characteristics are introduced, as are block-diagram & state-space representations. Systems are simulated by digital computer in the laboratory portion.
PREREQUISITES: ENGM 2021.03 or ENGM 2022.03, ENGM 1081.03 or ENGM 2081.03
FORMATS: Lecture | Lab | Tutorial

MECH 4000 Manufacturing
CREDIT HOURS: 3
The course starts with a manufacturing process overview and a detailed process study in the following areas: manual assembly, machining, injection molding, thermoforming and casting. A relationship between process and design is examined and design for manufacturing methodologies is introduced. Quality control and quality assurance issues are overviewed. The principles of cell design for assembly and machining are introduced and part redesign for process and system is studied.
PREREQUISITES: MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4015 Design Project I
CREDIT HOURS: 5
This course provides a project-based exercise in the engineering design process in a real world engineering context. Students work in teams and are expected to take the project from its preliminary stage through the design stages to the ultimate completion of the design including: technical reports with calculations, engineering drawings, peer evaluation, oral presentations and possibly a physical prototype or model.
PREREQUISITES: MECH 3010.03 or MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4025 Design Project II
CREDIT HOURS: 5
This course is a direct continuation of Design Project I leading to the implementation of the student team design. All projects involve evaluation/testing of student designs, this is usually done via a constructed physical prototype or a model. Students produce a final technical report, conduct peer evaluations and give a formal presentation.
PREREQUISITES: MECH 4015.05
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4210 Introduction to Additive Manufacturing
CREDIT HOURS: 3
This course is designed to give students a fundamental understanding of additive manufacturing (also known as 3D printing). Lectures will cover the complete flow path from foundational design concepts to the inspection of a finished component. An emphasis will be placed on metallic materials. Practical aspects of the technology will be illustrated through case studies of commercial products and hands-on laboratories dedicated to feedstock systems as well as component fabrication using multiple additive manufacturing technologies.
PREREQUISITES: MATL 3500 or equivalent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4300 Stress Analysis
CREDIT HOURS: 3
Course topics include: general state of stress, equilibrium equations, stress-strain-temperature relations, plane stress, axisymmetrical stress problems, thick cylindrical pressure vessels, rotating disks, bending of rectangular and circular plates, torsion of non-circular members, membrane analogy, thin-walled hollow sections, non-symmetrical bending, properties of cross-sections, shear center, composite beams, plastic hinge. Energy Methods, Castigliano's theorems, statically indeterminate problems.
PREREQUISITES: ENGI 2200.03
FORMATS: Lecture | Lab | Tutorial

MECH 4340 Energy Management I
CREDIT HOURS: 3
The purpose of this course is to introduce the concepts and techniques of energy management and conservation. The subjects that will be discussed are energy supply and demand, energy pricing, scope of the energy problem and approaches to provide solutions; energy auditing; improving energy utilization in space conditioning, and steam, hot water and compressed air systems; insulation; and electrical energy conservation. An interdisciplinary approach will be employed in this course to provide a wider understanding of the subject.
PREREQUISITES: MECH 3305.03 or MECH 3705.03 or MECH 4805.03
CROSSLISTED: MECH 6340.03
FORMATS: Lecture | Tutorial

MECH 4430 Turbomachines
CREDIT HOURS: 3
Various types of turbomachines, from wind turbines to high-ratio compressors are studied. Although hydraulic pumps and turbines are treated, the majority of the class time is devoted to compressible flow turbomachines and their characteristics. Emphasis is placed on practical design and performance parameters.
FORMATS: Lecture | Lab | Tutorial

MECH 4440 Principles of Marine Craft Design
CREDIT HOURS: 3
This course covers the fundamentals of hydrostatics and hydrodynamics of marine craft. Topics include: hydrostatics and stability calculations for marine craft; dimensional analysis and modelling of marine systems; resistance estimation of low-speed and high-speed craft; sail power, marine propellers and jet propulsion; directional stability and control and wave theory and motion in waves.
PREREQUISITES: MECH 3300.03 or MECH 3305.03
FORMATS: Lecture | Lab | Tutorial

MECH 4444 Mechatronics
CREDIT HOURS: 3
This course deals with the integration of mechanical, electrical, computer and control engineering which is increasingly becoming an important part of engineering design. Topics include Mechanical and Electrical Actuation Systems, Sensors, and Signal Conditioning, Microprocessors and Programming and Control. A major part

of the course is project-based enabling students to apply the concepts studies in the course.
PREREQUISITES: MECH 3900.03, MECH 3020.03
EXCLUSIONS: BIOE 4312.03
FORMATS: Lecture | Lab | Tutorial

MECH 4450 Marine Craft Design and Construction
CREDIT HOURS: 3
This course deals with design and construction methods for marine craft. Each student completes a preliminary design of a small marine vessel. Topics include: engineering and economic principles governing selection of dimensions and coefficients for marine craft, computer-aided design, design and generation of hull forms, performance and operability in the ocean environment, construction methods for glass-fibre, wood, aluminum and steel marine craft, and structural analysis and design.
PREREQUISITES: MECH 4440.03 or instructor's consent
FORMATS: Lecture | Lab | Tutorial

MECH 4500 Vibrations
CREDIT HOURS: 3
Single and multiple degree of freedom lumped parameter systems subjected to harmonic and transient excitation are examined. Analytical as well as numerical solutions are covered. Vibrations of continuous systems such as beams and shafts are introduced. Laboratory experiments deal with vibration of lumped parameter physical models as well as vibrations of rotating machinery. Vibration control in industrial applications is emphasized and the effects of whole body vibration on humans is treated as a safety issue.
PREREQUISITES: MECH 3500.03, MECH 3900.03
FORMATS: Lecture | Lab | Tutorial

MECH 4510 Mechanics of Composite Materials
CREDIT HOURS: 3
The course introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced.
PREREQUISITES: MECH 3010.03 and MECH 4300.03
CROSSLISTED: MECH 6530.03
FORMATS: Lecture | Lab | Tutorial

MECH 4521 Applied Dynamics
CREDIT HOURS: 3
This course begins with a review of planar kinematics and kinetics of rigid bodies. These concepts are extended to kinematics and kinetics of rigid bodies undergoing general three dimensional motion. Euler's Equations are applied to a wide range of engineering problems including vehicular and gyroscopic dynamics. Energy methods for bodies undergoing three dimensional motion are applied to multi-degree-of-freedom systems. Single-degree-of-freedom systems subjected to random and shock inputs are analyzed.
CROSSLISTED: MECH 6521.03
FORMATS: Lecture | Lab | Tutorial

MECH 4540 Aerodynamics
CREDIT HOURS: 3
The course deals with the fundamentals of aerodynamics and the theory of flight. Material covered includes: the standard atmosphere; airfoil coefficients and section properties; finite wings and induced drag; airplane performance - power required, rate of climb, range and endurance; basics of stability and control.
PREREQUISITES: MECH 3300.03 or MECH 3305.03
FORMATS: Lecture | Lab | Tutorial

MECH 4560 Space Systems
CREDIT HOURS: 3
This course deals with the engineering design and analysis of space systems and their interrelationships. Topics include orbital mechanics, satellite pertubations, satellite actuator and sensor systems, satellite access and coverage.
PREREQUISITES: MECH 3900.03
CROSSLISTED: MECH 6560.03
FORMATS: Lecture | Tutorial

MECH 4600 Engineering Measurements
CREDIT HOURS: 3
The static and dynamic characteristics of first and second order transducers and measurement systems are examined. The experimental versus theoretical approach to engineering problems is studied. Topics include data acquisition, analysis, and presentation, including the probabilistic nature of engineering measurements. The course is laboratory intensive covering measurements of force, strain, temperature, pressure, velocity, and fluid flow. Computers are used extensively in the laboratory experiments.
PREREQUISITES: ENGM 2032.03
FORMATS: Lecture | Lab | Tutorial

MECH 4631 CAD/CAM - Computer Aided Design/Computer Aided Manufacturing
CREDIT HOURS: 3
The student is introduced to the concept of automation with application to design, production, and manufacturing systems. The use of digital computers is considered in design, including peripheral equipment and types of languages. Other topics include numerical control manufacturing systems such as Direct Numerical Control (DNC). Computer Numerical Control (CNC), Adaptive Control and Industrial Robots. Due to the diverse nature of the course content, various personnel from both the academic and industrial community aid in the class presentation.

PREREQUISITES: MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4638 Computer Aided Tolerancing and Dimensioning
CREDIT HOURS: 3
This course deals with dimensioning and mechanical tolerances to international standards - key factors in quality production. Topics covered include: review of basic manufacturing processes and tools, fundamental dimensioning and tolerances techniques, working and assembly drawings, CAD/CAM drawings for computer numerical control, geometric and positional tolerancing, quantity production, parts assembly, quality control and application of statistical and probabilistic methods. Biweekly assignments requires use of Auto-CAD, interactive computer programs for geometrical dimensioning/tolerancing, and a Coordinate Measuring Machine (CCM).
PREREQUISITES: MECH 3010.03, MECH 3020.03
FORMATS: Lecture | Lab | Tutorial

MECH 4640 Robotics
CREDIT HOURS: 3
The prime objective of the course is to provide a survey of the state-of-the-art in robotics. A large portion of the course is focused on the robot hardware. However, robotics in an inherently interdisciplinary field and the course will also involve robotics control and application. Topics covered include kinematics and dynamics of the robot arm and gripper, drives, robot position measuring systems, external sensors and feeding, storage, changing position and clamping devices, all of which, together with the robot itself, constitute a “robotized” workplace.
PREREQUISITES: MECH 3500.03, MECH 3900.03
CROSSLISTED: BIOE 4011.03
FORMATS: Lecture | Lab | Tutorial

MECH 4650 Biomechanical Engineering
CREDIT HOURS: 3
Engineering analysis of biological systems provides novel insight into evolutionary design of animals and plants and into the intelligent design of medical devices. This course examines the structure and function of the cardiovascular, pulmonary, and musculoskeletal systems using tools from solid and fluid mechanics. Topics include the heart as a pump, blood flow, arterial pulse propagation, the mechanics of breathing lung elasticity, muscle contraction, tissue mechanics, basic skeletal design, locomotion, and engineering of surgical implants.
FORMATS: Lecture | Lab | Tutorial

MECH 4652 Kinematics of Human Motion
CREDIT HOURS: 3
The science of biomechanics is based on mechanical models and biological experiments. Students will explore the application of classical mechanics to the analysis of human motion related to athletics, orthopaedics, and rehabilitation. Emphasis is also placed on numerous experimental facts collected from the biomechanical research literature. Topics include kinematic geometry of a single body, the description of joint configuration, and differential kinematics of biokinematic chains. Three-dimensional kinematics of individual joints (i.e., the knee, hip and elbow) is emphasized from the perspective of total joint replacement design.
FORMATS: Lecture | Lab | Tutorial

MECH 4670 Finite-Element Simulation Techniques
CREDIT HOURS: 3
This course builds on MECH 3660. It deals with the applications of the finite-element method to analyze practical problems in mechanical design and delves into the associated fundamental numerical aspects. Robust modelling concepts such as plane stress, plane strain and axisymmetric techniques will be discussed, as well as the use of beam, plates and shell elements in modelling of more complex system. The course will consider static and dynamic analyses and elastic-plastic analysis.
PREREQUISITES: MECH 3660.03 or equivalent
EXCLUSIONS: MECH 6660.03
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

MECH 4720 Advanced Heat Exchanger Design
CREDIT HOURS: 3
This course deals with the design of heat exchangers. Topics include the thermodynamics, fluid mechanics and heat transfer fundamentals associated with heat exchangers, the various types and applications of heat exchangers, and in particular the design of heat exchangers that rely on natural convection/natural circulation on one or both sides of the heat exchanger.
PREREQUISITES: MECH 3705.03, MECH 3305.03
FORMATS: Lecture | Tutorial

MECH 4760 Optical Components and Instruments
CREDIT HOURS: 3
This course deals with light, optical components and optical instruments Emphasis will be placed on practical engineering applications. Topics include: light, light sources, reflection and refraction, geometric optics, lens, microscopes, telescopes, polarization, diffraction and interference.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

MECH 4805 Thermo-Fluid Engineering III
CREDIT HOURS: 3
This class combines and builds on the knowledge and experiences gained from earlier Thermodynamics, Fluid Mechanics and Heat Transfer courses. the concepts of ideal gas mixtures and psychrometric applications, combustion and chemical equilibrium are introduced. Heat exchanger are studies, using the LMTD and the effectiveness-NTU methods. Numerical modeling of thermo-fluid phenomena are presented using computational fluid dynamics and computational heat transfer: the finite volume method and the finite element method are both used and applied.

PREREQUISITES: MECH 3705.03, MECH 3305.03, MECH 3805.03
FORMATS: Lecture | Lab | Tutorial

MECH 4810 Energy Conversion Systems
CREDIT HOURS: 3
Application of basic principles of thermodynamics, fluid mechanics and heat transfer to the analysis and synthesis of energy conversion systems are studied. Primary energy sources and global energy demand are examined. Principles of conventional methods, thermal systems, fuel types, combustors, and gas turbines, initial planning of a hydroelectric power plant, selection of turbines and other components, nuclear fission and fusion, clean energy production, and environmental aspects of energy production are covered.
PREREQUISITES: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03, ENGI 2103.03 or ENGI 2300.03
FORMATS: Lecture | Lab | Tutorial

MECH 4820 Energy from Renewable Resources
CREDIT HOURS: 3
This course concentrates on the theoretical and practical aspects of solar, wind, tidal and wave sources of energy with particular emphasis on their availability and use in the Atlantic Provinces. Design feasibility studies are undertaken on particular aspects of energy conversion from these sources. The impact of the environment of consumption of conventional energy forms is investigated. The nature and magnitude of energy consumption world-wide and locally is considered.
PREREQUISITES: MECH 3700.03 or MECH 3705.03
FORMATS: Lecture | Lab | Tutorial

MECH 4830 Reciprocating Internal-Combustion Engines
CREDIT HOURS: 3
The major topics of this course are basic engine types, test methods and pressure measurements, combustion, ideal cycles and model processes, equilibrium charts, fuel specifications and tests, engine knock, exhaust analysis, fuel systems, ignition systems, engine performance and supercharger matching. Hands-on laboratory work is an integral part of this course.
PREREQUISITES: MECH 3800.03 or MECH 3805.03
FORMATS: Lecture | Lab | Tutorial

MECH 4840 Steam Plant Engineering
CREDIT HOURS: 3
This course aims to provide basic fundamental and practical information to engineering students to design and operate thermal power plants. Topics covered are: classification of steam generator; comparison of water-tube and fire-tube boilers; energy sources; fuels and combustion; thermal analysis of furnaces; superheaters, economizers, and air preheaters; boiler efficency calculations; burner, pulverizer, cyclones, fluidized beds; auxilliary equipment (fans, stacks); control system; cooling system design; environmental considerations.
PREREQUISITES: ENGI 2102.03 or ENGI 2800.03
FORMATS: Lecture | Lab | Tutorial

MECH 4850 Solar Energy Engineering
CREDIT HOURS: 3
This course deals with solar energy conversion and utilization with emphasis on its availability and use in Canada. Topics included solar heating of domestic and process hot water, solar space heating, the direct conversion of solar energy into electricity (photovoltaics), passive solar heating, solar cooling and solar thermal electric power. The nature and magnitude of energy supply and demand are also discussed.
FORMATS: Lecture

MECH 4851 Heating, Ventilating and Air Conditioning
CREDIT HOURS: 3
This is an introduction to the design of thermal systems for indoor climate control. The major topics include: human comfort requirements, outdoor climate variables, heating and dehumidification loads, cooling and dehumidification loads, ventilation requirements and criteria, central system types and selection, energy sources and costs, piping, pumps, ducts, fans, and control systems. Computer programs will be introduced for design calculations involving heating and cooling load, piping, ducting and energy consumption.
COREQUISITES: MECH 4805.03
FORMATS: Lecture | Tutorial

MECH 4880 Introduction to Nuclear Engineering
CREDIT HOURS: 3
The purpose of this course is to introduce the concepts of nuclear engineering and the resulting applications. The subjects that will be discussed are the fundamentals of particle physics: proton, neutron, electron, photon and neutrino, and the atomic model; radioactivity and radiation detection, protection and shielding; principle of nuclear energetic: fission and fusion; nuclear reactor kinetics and control; nuclear reactor design and cooling; nuclear propulsion, nuclear waste disposal.
PREREQUISITES: MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03
FORMATS: Lecture | Tutorial

MECH 4900 Systems II
CREDIT HOURS: 3
Response characteristics of open loop and feedback control systems are studied. Various controller types and their uses are analyzed. Techniques such as root-locus diagrams and Bode & Nichols plots are used for stability and performance evaluation. Digital simulations and experiments on computer-based control systems are done in the laboratory portion.
PREREQUISITES: MECH 3900.03
FORMATS: Lecture | Lab | Tutorial

MECH 4910 Fluid Power
CREDIT HOURS: 3
This is an introductory course to fluid power systems covering the principles of power hydraulics, hydraulic fluids, hydraulic actuators and power generation

transducers. The concept of pressure controls, volume controls and directional controls is also covered, including an introduction to electro-hydraulic servos and the design of basic open and closed-center circuits. The time domain analysis of feedback systems is introduced. The student is introduced to the design and compensation of systems using both s-plane and time domain methods. Other topics include simulation and analysis of control systems using graphics terminal computer facilities.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

MECH 4950 Advanced Control Engineering
CREDIT HOURS: 3
The course develops the students' capabilities in system simulation and feed forward/feedback control-system design and implementation. Topics include: system-parameter identification, control-system hardware, computer-based control systems, design techniques for multiple-input multiple-output systems, and adaptive control. The course is supported by computer-based simulation activities and design procedures, and by hands-on laboratory experience.
PREREQUISITES: MECH 3900.03
CROSSLISTED: MECH 6950.03
FORMATS: Lecture | Lab | Tutorial

MECH 4960 Computational Methods in Engineering
CREDIT HOURS: 3
The course presents basic computer methods of application of mathematical tools to solve engineering problems. Numerical methods such as finite differences, series expansions, and numerical integration are introduced. Numerical solutions of ordinary and partial differential equations with applications to equilibrium, cigenvalue and propagation problems in engineering are considered. Application of mathematical libraries, X-window system and the software tools associated with the Unix system are included.
PREREQUISITES: ENGM 3356.03 or ENGM 3361.03
CROSSLISTED: MECH 6960.03
FORMATS: Lecture | Lab | Tutorial

Mineral Resource Engineering

Location: Sexton Campus
1360 Barrington Street
Room D215
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3960

Fax: (902) 494-3108

Website: www.dal.ca/faculty/engineering/civil-resource.html

Email: care@dal.ca

Introduction
The Mineral Resource Engineering Program concentrates on the technical, environmental and economic aspects of the extraction and processing of the Earth’s mineral resources. Students can pursue options in mineral resource engineering, petroleum engineering and mineral processing.

The main employers for Mineral Resource Engineering graduates are the mineral resource industries, oil and gas industries, financial and government institutions, consulting companies, mining equipment manufacturers and dealerships, marketing mine service companies, mineral investment and financial institutions, and research and teaching institutions. The development of an analytical attitude, team work and communication skills are important aims of the Mineral Resource Engineering Program. Participation in field trips to mining and petroleum operations in the Maritime region is a degree requirement and each student is required to share costs.

Opportunity also exists to continue in the MASc, MEng, and PhD programs for those who would like to specialize in areas of Mineral Extraction, Mineral Processing and Petroleum Engineering at Dalhousie.

Curriculum and course descriptions
Refer to sections IIB and IIIB, Mineral Resource Engineering Programs, in the Civil and Resource Engineering section.

Introduction
The Department of Process Engineering and Applied Science prepares students for professional careers in a wide range of fields related to the process industries. Process engineers and scientists research and develop new materials and processes to meet a specific need or create a value-added product. In an industrial setting, they optimize systems and processes so that they are not only environmentally sustainable, but are also inherently safe, produce high-quality products, and are cost effective.

Process Engineering graduates are actively being employed in the bioprocess industry (food, fiber, pharmaceutical, ...), materials process industry (metals, ceramics, composites, ...), petrochemical process industry (oil, gas, plastics, ...), energy engineering (energy efficiency, renewable sources ...), and several others.

The Department of Process Engineering and Applied Science offers one undergraduate degree: a B.Eng. in Chemical Engineering with both co-op and non-co-op options.

There is ongoing research in the Department that provides opportunities for graduate studies leading to master's and doctoral degrees. Consult the Graduate Calendar, Dalhousie University for more details on these graduate programs.

Amyotte, P. R., BEng (RMC), MSc (Eng) (Queen's), PhD (TUNS), PEng
Brooks, S. L., BTech (Hons) (Massey), PhD (Cambridge)
Budge, S. M., BSc (Acadia), PhD (Memorial), Undergraduate Program Coordinator, Food Science
Paulson, A. T., BSc (Agr), MSc, PhD (UBC)
Pegg, M. J., BSc, PhD (Leeds), PEng
Speers, R. A., BSc (Agr), MSc, PhD (UBC)

Associate Professors
Donaldson, A., BASc, MASc, PhD (Ottawa), PEng
Ghanem, A., BSc, Eng (UNB), PhD (Cornell), PEng
Haelssig, J., BASc, PhD (Ottawa), EIT, Undergraduate Program Coordinator, Chemical Engineering
Mazzanti, G., BSc (Univ de America), MSc, PhD (Guelph)

Assistant Professors
Kermanshahi Pour, A., BSc (Ferdowsi), MSc (Western Ontario), PhD (McGill)
Sokolenko, S., BASc, PhD (Waterloo)

Adjunct Professors
Al Taweel, A. M., BSc (Alexandria), MSc, PhD (Colorado), PEng
Armenta, R., BEng (Sonora), MSc, PhD (Mexico)
Blouin, S., BASc (Laval), MASc (Ecole Polytechnique), PhD (Queen's)
Brooks, S., BSc, MS (Brock), PhD (Michigan State)
Conlon, M., BSc (Flinders Univ, Australia), PhD (Univ of Adelaide, Australia)
Craig, S. S., BSc (Hons), PhD (Strathclyde)
Fels, M., BEng, MEng (McGill), PhD (Waterloo)
Gillis, M., BSc, MSc (UNB), PhD (Univ of Saskatoon)
Gordon, R., BSc, MSc (McGill), PhD (Guelph), PEng, PAg
Hart, W., BA (Ohio Wesleyan), PhD (Dalhousie)
Kalmokoff, M., BSc (Guelph), MSc (Saskatchewan), PhD (Queen's)
Khan, F., BSc Engg (Aligarh Muslim Univ), ME (Univ of Roorkes), PhD (Pondicerry Univ)
Lake, J., BSc, PhD (Dalhousie)
MacKinnon, S., BSc (Hons) (UNB), MSc (Dalhousie), PhD (Ottawa)

Marangoni, A., BSc (McGill), PhD (Guelph)
Miadonye, A., BSc (Univ of Southbank UK), PhD (Loughborough Univ UK)
Newling, B., BA, PhD (Cambridge, UK)
Pink, D., BSc (St. FX), PhD (UBC)
Ritter, J., BASc, PhD (Dalhousie)
Ryan, S., BSc, PhD (UNB)
Yost, C., BSc (Victoria), PhD (Calgary)

Cross Appointment
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC)
Gibson, M., BA (Sheffield Hallam), MSc, PhD (Strathelyde)
Gratzer, P., BASc, MASc, PhD (Toronto)
Jamieson, R., BEng (TUNS), MASc (Dalhousie), PhD (Guelph), PEng

Instructor
Hastie, M., BASc, MASc (Ottawa), EIT, Departmental Co-op Co-ordinator

Chemical Engineering
Chemical Engineering offers two versions of the BEng Program:

1. Co-op Program

2. Non Co-op Program

Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section.

Year 3, Work Term 1 (Fall)

Year 3, Term 5 (Winter)

- CHEE 3501.03: Unit Ops Lab
- CHEE 3522.03: Mechanical Unit Operations
- CHEE 3525.03: Separation Processes
- CHEE 3540.03: Law & Ethics
- CHEE 3560.03: Green Engineering
- CHEE 3530.03: Chemical Engineering Thermodynamics

Year 3, Work Term 2 (Summer)

Year 4, Term 6 (Fall)

- CHEE 3601.03: Thermal Unit Operations
- CHEE 3634.03: Chemical Reaction Engineering
- MATL 3500.03: Materials Engineering
- CHEE 3621.03: Computational Methods
- CHEE 3600.03: Transport Phenomena
- Complimentary Studies Elective

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Term 7 (Fall)

- CHEE 4703.03: Process Dynamics & Control
- CHEE 4704.03: Separation Processes II

- CHEE 4705.03: Pilot Scale Operations
- CHEE 4741.03: Process and Product Design I
- CHEE 4730.03: Bioprocess Engineering
- Technical Elective I

Year 5, Term 8 (Winter)

- CHEE 4842.03: Process and Product Design II
- CHEE 4844.03: Design Course
- CHEE 4873.03 Industrial Safety and Loss Management
- Technical Elective II
- Technical Election III

Technical Electives

This list is not exhaustive, nor does it imply that each course will be offered every year. Students should check with the Undergraduate Program Co-ordinator.

- ENVE 3251.03: Envir and Ind Microbiology
- ENVE 3500.03: Air Quality
- ENVE 4707.03: Green Engineering
- ENVE 4772.03: Environmental Assessment and Management
- ENVE 4872.03: Air Pollution
- CHEE 4791.03: Research Project I
- CHEE 4885.03: Polymers
- CHEE 4892.03: Research Project II
- FOSC 4070.03: Food Processing
- FOSC 4081.03: Brewing Science
- IENG 4547.03: Company Operations and Management
- IENG 4558.03: Project Management and Control
- IENG 4574.03: Decision and Risk Analysis
- ECED 4350.03: Optical Electronics

Notes:

1. Undergraduate students in their final year of study may take a postgraduate course as a Technical elective with the approval of the Undergraduate Program Coordinator and the professor offering the course.
2. Not all technical electives are available each year and other elective courses may be available. Please check with the department prior to registration.

Non Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.

Minor in Food Science for BSc Major or Honours
See Minors section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Biological Engineering Series

BIOE 3051 Principles of Food Engineering
CREDIT HOURS: 3
This course presents principles of engineering and applications to food processing unit operations. This course is intended for primarily food science majors, and other non-engineering students. Topics covered are units and dimensions, unit operations in food processing, material balance, thermodynamics and energy balance, fluid flow, heat transfer, and mass transfer.
PREREQUISITES: MATH 1280.03 and 1290.03, or ENGM 1011.03 and 1012.03, PHYC 1300X/Y.06
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOE 4341 Food Science for Engineers
CREDIT HOURS: 3
This course introduces the fundamental chemical, nutritional and microbiological aspects of food processing. Emphasis is placed on food quality, deterioration and principles of its preservation. Topics covered include: constituents of food (properties, significance, and nutritive aspects); factors related to quality and deterioration; fats and oils; food additives; and the requirements for food preservation, packaging and storage.
PREREQUISITES: BIOE 3251.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOE 4351 Bioprocess Engineering
CREDIT HOURS: 3
This course focuses on the process design of unit operations involved in bioprocessing. Topics include fluid flow and mixing, transport phenomena in bioprocess systems, design and analysis of biological reactors, and bioseparation processes. Examples encompass various areas of bioprocessing. Simulation of a bioprocess is demonstrated using a software package.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOE 4352 Food Engineering
CREDIT HOURS: 3
This course focuses on the process design of unit operations in food processing, preservation, packaging and storage. Topics include mass and energy balances, reaction kinetics modelling, size reduction, emulsification, food dehydration, packaging and storage, extrusion processes, freezing and thawing, evaporation and freeze concentration, crystallization, thermal process calculations and microwave heating. As a term project, a food process is simulated using a software package.
PREREQUISITES: BIOE 3252.03 or equivalent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

BIOE 4391 Polymeric Biomaterials
CREDIT HOURS: 3
This course provides an introduction to the characterization, fabrication and use of synthetic and naturally-derived polymeric materials to replace or regenerate tissues and organs in the human body. Classes will include a discussion of natural and synthetic macromolecular structure, properties (chemical, physical, mechanical), synthesis, and interactions with the human body. The design and application of polymeric materials in tissues engineering, drug delivery, and prosthetics will also be discussed using specific examples including: blood vessel replacement, artificial pancreas, skin substitutes, and nerve regeneration.
FORMATS: Lecture

Course Descriptions - Chemical Engineering Series

CHEE 2201 Fundamentals of Chemical Engineering
CREDIT HOURS: 3
The main objective of this course is to develop the student's ability to perform mass and energy balances on non-reactive and reactive processes. Introductory topics include systems of units and a study of process variables such a temperature, pressure and flow rate. Also covered are fundamental properties of multipahase systems, including phase equilibrium, vapour pressure, and Raoult's and Henry's Laws. Emphasis is placed on developing problem solving skills and adopting a consistent approach to the analysis of process systems.
PREREQUISITES: ENGI 2102.03, CHEM1022.03
EXCLUSIONS: PEAS 2201.03
FORMATS: Lecture

CHEE 3501 Unit Operations Lab
CREDIT HOURS: 3
In this class students will gain practical experience on equipment common to process engineering through equipment operation and virtual simulations. Emphasis is based on practical operation of mechanical equipment, relation of operational characteristics to fundamental theory, the introduction of simulation tools applied to unit operations, and interpretation and reporting of experimental results.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 3522 Mechanical Unit Operations
CREDIT HOURS: 3
This course introduces the student to the principles and practices involved in contacting, conveying, separating and storing single-phase and multiphase systems. It includes the flow of incompressible and compressible fluids in conduits and past immersed bodies, as well as the transportation, metering, and mixing of fluids. Unit

operations involved in the contacting and separation of phases, such as fluidization, sedimentation and centrifugation, are also studied.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 3525 Separation Processes
CREDIT HOURS: 3
This course provides an introduction to cascade theory and develops fundamentals for design and analysis of staged operations such as leaching, liquid-liquid extraction and distillation. Topics include single-stage operations, multi-stage, counter-current cascade with and without reflux, and binary and multi-component distillation.
FORMATS: Lecture | Tutorial

CHEE 3530 Chemical Engineering Thermodynamics
CREDIT HOURS: 3
The course deals with theory and practice of chemical thermodynamics. A brief review is given of concepts in physical chemistry: partial molal quantities and vapour-liquid equilibria in ideal and non-ideal systems including miscible and partially miscible components. The course also deals with thermophysical properties of pure liquids, properties of solutions, and a comprehensive study of vapour-liquid equilibrium and equilibrium constants in chemical reactions.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

CHEE 3540 Law and Ethics for Chemical Engineers
CREDIT HOURS: 3
This course covers the legal and ethical framework for the practice of engineering. Ethical theories are introduced and demonstrated in relation to engineering codes of ethics. These theories and the codes of ethics are used in case studies to address real ethical dilemmas that can arise in engineering practice. The basics of contract law, professional liability and tort law, and intellectual property law, and their relation to the practice of engineering are also introduced.
EXCLUSIONS: PEAS 3700

CHEE 3560 Green Engineering
CREDIT HOURS: 3
This course introduces the framework required to assess the environmental impact of products and processes, and provides the foundation for environmentally conscious engineering design. Major sustainability challenges associated with the release of chemicals into the environment will be reviewed. Economic, environmental and social indicators of sustainability, and the criteria for evaluation of sustainable materials and green processes will be covered. Students will evaluate the green attributes of alternative products and processes by applying sustainability metrics.

CHEE 3600 Transport Phenomena
CREDIT HOURS: 3
This course covers the physical, chemical and thermal factors affecting the mechanisms of heat and mass transfer in biological, chemical and physical systems. The principles of physical and mathematical modeling are demonstrated and applied to real applications in the fields of interest to chemical engineers. Problem solving sessions are used to illustrate the application of the above concepts.
EXCLUSIONS: PEAS 3600.03
LAB HOURS PER WEEK: 3

CHEE 3601 Thermal Unit Operations
CREDIT HOURS: 3
In this course students will learn how to apply the fundamental concepts of momentum and energy transfer to the design of thermal processing unit operations. Examples include double pipe heat exchanger, shell and tube heat exchanger, plate heat exchangers, air cooled heat exchangers, cooling towers, condensers, and boilers.
COREQUISITES: PEAS 3600.03
FORMATS: Lecture | Tutorial

CHEE 3602 Computational Methods for Chemical Engineers
CREDIT HOURS: 3
This course introduces the use of computers and numerical methods to analyze applications in process engineering. Applications include process analysis, thermodynamics, fluid mechanics, and heat and mass transfer. Important computational tools, such as Microsoft Excel and MATLAB, are introduced. Commonly used numerical methods for the solution of nonlinear equations, linear and nonlinear systems of equations, and differential equations are introduced. Techniques for numerical integration, curve fitting, nonlinear regression and interpolation are also covered.
EXCLUSIONS: PEAS 3601.03

CHEE 3634 Chemical Reaction Engineering
CREDIT HOURS: 3
This course introduces the subject of chemical reaction engineering. Classical reaction kinetics concerning rates, mechanisms, temperature effects and multiple reactions are studied. The concepts of batch, continuous stirred-tank and plug flow reactors are introduced for the ideal case. Non-isothermal reactors and non-ideal flow are considered in the design of chemical reactor systems. Heterogeneous reactors and catalysis are also discussed. Emphasis is placed on computational techniques for reactor problem solutions.
FORMATS: Lecture | Tutorial

CHEE 4123 Environmental Biotechnology
CREDIT HOURS: 3
This course outlines the principles and applications of environmental biotechnology. Quantitative tools for describing microbial stoichiometry and kinetics will be examined and related to reactors of interest to environmental engineering. Applications of biological treatment processes will be studied and may include the activated sludge process, lagoons, anaerobic treatment and bioremediation.
EXCLUSIONS: ENVE 3432.03, ENVE 4123.03
FORMATS: Lecture

CHEE 4702 Unit Operations Lab 1
CREDIT HOURS: 3
In this course, students will apply the principles of Unit Operations in the Laboratory using pilot scale equipment. An emphasis is placed on experimental, analysis and reporting.
PREREQUISITES: CHEE 3522.03, CHEE 3601.03, CHEE 3525.03, CHEE 3634.03, PEAS 3500.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4703 Process Dynamics and Control
CREDIT HOURS: 3
This course deals with the control and mathematical modeling of chemical processes. The dynamics of behaviour of processes is analyzed through transfer functions and means of determining the dynamic performance of feedback control systems are presented. Stability and Root Locus Analysis and design considerations, and multivariable systems are covered.
PREREQUISITES: CHEE 3501, CHEE 3525, CHEE 3634
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 2

CHEE 4704 Separation Processes II
CREDIT HOURS: 3
In this course, students will learn how to apply the fundamental concepts of momentum, energy and mass transport to the design of unit operations designed for separations of chemical streams. This is intended as a continuation of CHEE 3525: Separation Processes. Unit operations including but not limited to absorption/desorption, adsorption, solvent extraction, drying, humidification/dehumidification, solvent extraction, leaching and ion exchange will be covered.
PREREQUISITES: PEAS 3600.03, CHEE 3525.03, PEAS 3500.03
FORMATS: Lecture | Tutorial

CHEE 4705 Pilot Scale Operations
CREDIT HOURS: 3
This class builds on CHEE 3501, focusing on equipment with increasing complexity and integrated operations. Emphasis is placed on experimental design, operation of integrated systems, process control/safety and the analysis and reporting of data.
PREREQUISITES: CHEE 3501
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4730 Bioprocess Engineering
CREDIT HOURS: 3
This course involves the application of chemical engineering approaches to biologically-based systems. These bioprocesses can be used to produce pharmaceuticals, specialty chemicals and genetically-engineered products. Topics include an overview of cell biology, kinetics of enzymatic and cellular processes, bioreactor design and operation, and an overview of downstream processes. Students will be exposed to recent research publications as part of their term project.
PREREQUISITES: PEAS 3600.03 or CHEE 3600.03 or instructor permission

CHEE 4741 Process and Product Design I
CREDIT HOURS: 3
This course, in conjunction with CHEE4842, provides students with a capstone design project analogous to that of a consulting engineer. Through the solution of client-based problems and application of concepts and theory learned during the undergraduate curriculum, this course provides an opportunity for students to take leadership roles and demonstrate independence in proposing and exploring engineering solutions to process and product design requests.
PREREQUISITES: CHEE 3522.03, CHEE 3525.03, CHEE 3634.03, CHEE 3601.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4760 Fundamentals of Combustion
CREDIT HOURS: 3
This course is an introduction to the principles of combustion processes. The properties of premixed gas flames are examined. Diffusion flames and the burning of liquid and solid fuels are studied. Ignition phenomena and spontaneous combustion, with particular reference to safety in the chemical process industries, are examined.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 4773 Industrial Safety and Loss Management
CREDIT HOURS: 3
Topics covered in this course include: history of health and safety; causes and effects of loss; policy development; loss control and health basics; emergency preparedness and standards; hazard identification; safe process design; inspection and investigation processes; measurement, evaluation and audits of OH&S program elements; legislation.
PREREQUISITES: PEAS 3700.03
EXCLUSIONS: CHEE 6701.03
FORMATS: Lecture | Tutorial

CHEE 4791 Research Project I
CREDIT HOURS: 3
The course objective is to provide experience in the application of engineering principles to the solution of a specific problem in Chemical Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search pertinent to the problem, designs an experimental setup, if needed, and arranges for the acquisition of necessary equipment. Interim and final progress reports are required in both written and oral formats.

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 4802 Unit Operations Lab II
CREDIT HOURS: 3
This course is a continuation of CHEE 4702.03 where additional Unit Operations experiments will be conducted, analyzed and reported.
PREREQUISITES: CHEE 4702.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4803 Oil and Gas Processing
CREDIT HOURS: 3
This course provides an overview of the oil and gas industry as a whole, introducing the typical technologies, processes and unit operations. Topics covered include: natural gas recovery and purification; and the properties of bitumen, its recovery, and subsequent refinement. Specific emphasis is placed on detailed design of unit operations for petroleum upgrading and the interrelation between processing steps for optimized petrochemical fuels production.
PREREQUISITES: CHEE 3601.03, CHEE 4704.03, CHEE 3634.03 or instructor approval
FORMATS: Lecture | Tutorial

CHEE 4842 Process and Product Design II
CREDIT HOURS: 3
This course builds on the work completed in CHEE 4741, providing students with a capstone design project analogous to that of a consulting engineer. Focusing on the solution of client-based problems through application of concepts and theory from the undergraduate curriculum, this course provides an opportunity for students to take leadership roles and demonstrate independence in proposing and exploring engineering solutions to process and product design requests.
PREREQUISITES: CHEE 4741.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4844 Process Simulation and Plant Design
CREDIT HOURS: 3
This course requires students to synthesize processing elements into an integrated plant that is capable of meeting stated design criteria. Emphasis is placed on flow sheet adaptation into suitable forms for simulation and design, design of specific unit operations using available software, process performance characterization and optimization, process safety systems, equipment costing and economic evaluation of multi-year projects.
PREREQUISITES: CHEE 3525.03, CHEE 3634.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 4

CHEE 4854 Computer Process Control
CREDIT HOURS: 3
This course deals with digital computer control of chemical processes. Methods for analyzing and designing control systems using z-transforms are covered. Experience is provided in the use of currently popular control methods, such as model predictive control. An introduction is given for other advanced techniques, such as adaptive control, optimal control and stochastic control.
PREREQUISITES: Instructor's permission
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 4856 Process Optimization
CREDIT HOURS: 3
The course deals with the study and application of optimization techniques to engineering problems, with particular emphasis on chemical processes. Topics include analytical and numerical techniques for optimization of single and multi-dimensional problems, linear programming, nonlinear programming and dynamic programming. The course employs available computer software and student-developed programs to solve the problems.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 4862 Fundamentals of Combustion Engineering
CREDIT HOURS: 3
In this course, the principles of combustion processes (studied in Fundamentals of Combustion) are applied to industrial applications. The properties of solid, liquid and gaseous fuels are discussed. Various burner systems and the importance of combustion aerodynamics in boilers, furnaces and kilns are studied. The method of determining boiler and furnace efficiency and an introduction to pollution control are presented.
PREREQUISITES: CHEE 4760.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

CHEE 4873 Industrial Safety and Loss Management
CREDIT HOURS: 3
Topics covered in this course include: history of health and safety; causes and effects of loss; policy development; loss control and health basics; emergency preparedness and standards; hazard identification; safe process design; inspection and investigation processes; measurement, evaluation and audits of OH&S program elements; legislation.
PREREQUISITES: CHEE 3540.03, PEAS 3700.03
EXCLUSIONS: PEAS 4773.03, CHEE 6701.03

CHEE 4885 Polymer Engineering
CREDIT HOURS: 3
Polymers are ubiquitous materials used in a diveristy of fields such as plastics, adhesives, biomedical, surface coatings, textiles. This course is intended for Chemical Engineering students to get an introduction of the major steps in this industry. The course covers the following topics: the chemical and physical structures of polymers, the mechanisms of polymer formation and the industrial processes used, the properties of polymers and applications, methods of processing polymers, and polymer modification and additives.
PREREQUISITES: PEAS 3203.03
FORMATS: Lecture

CHEE 4892 Research Project II
CREDIT HOURS: 3
This course is a continuation of Research Project I. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Written and oral progress reports are required at mid-term. A written report and an oral presentation are required at the end of the term.
PREREQUISITES: CHEE 4791.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

Course Descriptions - Food Science Series

FOSC 2010 Food Commodities
CREDIT HOURS: 3
This course will study the basic scientific principles underlying the processing of varying food commodities. General preservation methods such as freezing, dehydration, thermal processing, irradiation and microwave heating and their applicability to various foods will be examined during lectures and tours to industrial food processing plants. The practices of food manufacturing, preservation, distribution, and marketing of food materials will be related to basic food science principles.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

FOSC 3080 Food Microbiology
CREDIT HOURS: 3
This course is designed to introduce students to current aspects of food microbiology with special emphasis on spoilage organisms and foodborne pathogens. Subjects covered will include food infection and intoxication, factors affecting microbial growth and death, sanitation and predictive microbiology. Special emphasis will be given to the microbial ecologies associated with foods from agricultural and marine sources. The characteristics of emerging food pathogens and their influence on the safety of the food supply will be examined. Rapid methods of detection of foodborne microorganisms will be studied.
PREREQUISITES: BIOL 2004.03 or MICI 2100.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

FOSC 4030 Food Product Development
CREDIT HOURS: 3
This course examines the process of food product development and techniques used to measure food sensory aspects, shelf life and food stability. Topics covered will include food structure, colorimetry, shelf life modelling and sensory analysis. This course has been designated as a “capstone” course and it will incorporate concepts from other food science courses to develop problem solving and critical thinking abilities.
PREREQUISITES: FOSC 3030.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

FOSC 4070 Food Processing
CREDIT HOURS: 3
This course will examine various unit operations in food processing. Topics examined will include low temperature processes (chilling and freezing); thermal processing including commercial blanching, pasteurization and sterilization; drying and non-thermal processes including high pressure processes and irradiation. The unit operations of various food and seafood commodities will be examined in detail.
PREREQUISITES: Permission of instructor
CROSSLISTED: FOSC 6325
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

FOSC 4081 Brewing Science
CREDIT HOURS: 3
This course will examine unit operations employed during the production of malt and beer. Brewing, fermentation and packaging aspects of beer production as well as brewing quality assurance, colloidal, flavour and haze stability will be discussed.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

FOSC 4250 Food Product Development Project
CREDIT HOURS: 3
The objective of this course is to provide the student with experience in the application of food product development techniques. The student will be expected to develop a novel food product from initial stages through to pilot plant trials and shelf life evaluation. A final report and presentation will be required.
PREREQUISITES: FOSC 4030.03
EXCLUSIONS: FOSC 4750.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

Course Descriptions - Process Engineering Series

PEAS 3203 Organic Chemistry for Process Engineers
CREDIT HOURS: 3
Students will first develop an understanding of structure and bonding in organic compounds. With this background, the chemical and physical properties of the major functional groups will be introduced, with a focus on applications relevant to process engineers. Specifically, the synthesis and chemical reactions of commercially important molecules will be highlighted. Physical separations (i.e., distillation, crystallization) used in organic synthesis and spectroscopic methods of analysis will also be described.
PREREQUISITES: CHEM 1021.03 and CHEM 1022.03
EXCLUSIONS: PEAS 2203.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

PEAS 4773 Industrial Safety & Loss Management
CREDIT HOURS: 3
Topics covered in this course include: history of health and safety; causes and effects of loss; policy development; loss control and health basics; emergency preparedness and standards; hazard identification; safe process design; inspection and investigation processes; measurement, evaluation and audits of OH&S program elements; legislation.
PREREQUISITES: PEAS 3700.03
EXCLUSIONS: CHEE 6701.03
FORMATS: Lecture | Tutorial

Faculty of Health

Location: Burbidge Building
5968 College Street
3rd Floor
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3327

Fax: (902) 494-1966

Website: www.dal.ca/faculty/health.html

Email: health@dal.ca

Introduction
The Faculty of Health consists of the School of Health and Human Performance, School of Health Administration, School of Communication Sciences and Disorders, School of Social Work, School of Nursing, School of Occupational Therapy, School of Physiotherapy, College of Pharmacy, and the School of Health Sciences. The various undergraduate programs are described in the College, School, and other program sections of this Calendar. Details of the graduate programs in the Clinical Vision Science program and offered in the Schools are described in the Calendar of the Faculty of Graduate Studies.

In addition to the policies listed, please refer to the following other student related policies at http://healthprofessions.dal.ca:

- Allegation of Professional Unsuitability Policy
- FHP Immunization Policy
- Occupational Health and Infectious Diseases: Pre-clinical Placement Requirements for Health Care Worker Students
- Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability
- Guidelines for Personal Safety in Fieldwork Placements

Policy Statement on Affirmative Action
The Faculty of Health recognizes that Affirmative Action is required to increase the admission of and number of graduates from underrepresented groups; Aboriginal peoples, African Canadians and Persons with (dis)Abilities. The constituent Units of the Faculty will develop and implement Affirmative Action policies that are consistent with the Human Rights Commission.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems that will encourage and support members of these underrepresented groups to apply to and graduate from the Faculty of Health.

Policy Statement on Interprofessional Health Education
Students in the Faculties of Dentistry, Health and Medicine are required to participate in interprofessional health education activities. These activities, together with specific program requirements, are currently evolving and in transition and are integrated into the curricula of individual programs. Participation is mandatory. The objective of interprofessional education in the Faculty of Health include developing:

- knowledge and understanding of, and respect for, the expertise, roles and values of other health and human service professionals.
- understanding the concept and practice of patient/client/family-centred care.
- effective communication, teamwork and leadership skills applied in interprofessional contexts.
- positive attitudes related to the value of collaboration and teamwork in health and human service contexts.
- an understanding, from a multi-disciplinary perspective, of the Canadian health and social systems, the legal and regulatory foundation of professional practice, how health and human service institutions are organized and operate, and how different health and human service professions contribute to the systems and institutions.

Students in the entry-to-practice programs in the Faculty of Health, are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation in these programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration; to be presented by the Faculty of Health. For more information, students should contact their specific school/college.

Statement Regarding Criminal Records Check

The Faculty of Health of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g., Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures may be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic class assignment, which, in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedures. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the class, and as a result, in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

Practicum/Fieldwork Placements Outside Halifax
Students enrolled in programs of study in the Faculty of Health (Health Sciences, Nursing, Health and Human Performance, Social Work and Pharmacy) are advised that they may have to do some or all of their required clinical education/fieldwork at sites outside Halifax, and hence may have to incur additional personal expenses for travel and temporary accommodation.

In some situations, sites may require a payment to the site for support of clinical education/fieldwork supervision, and some sites may require separate disability insurance in lieu of eligibility for Worker Compensation coverage. Such costs are the responsibility of the student.

Student Disclosure of Health Information

Faculty of Health

Students registered in this Faculty are encouraged to inform both the School/College and the field work learning sites if they have a health concern that has the potential to compromise client, student and/or agency personnel safety and/or has the potential for limiting their ability to learn and perform their role as learner.

For the purposes of this policy, the term health concern refers to any cognitive, affective, and/or physical health problem, injury, or condition that may place the student and/or others at risk and/or inhibit the student's learning ability and performance.

Guidelines for Disclosure

The student has the right to decide if disclosure of health information is appropriate. The method, timing, and extent of the disclosure is at the student's discretion (for consultation options, see below). Early disclosure of the following information regarding the health concern may be helpful to students in the academic and/or field work sites.

To disclose this information:

1. Clearly describe the nature of the health concern and the potential limitations with regard to the learning tasks expected in either the academic or field work site. Appropriate verification of the information may be required.
2. List any adaptations, modifications, and/or safety procedures that may be required in planning the student's learning experiences in either setting.
3. Provide clear and appropriate advice regarding the management of this health concern.

If the disclosure of health information in field work and/or academic sites produces difficulties, students are encouraged to report these difficulties immediately to the appropriate person(s) within both the field work site and/or within their educational program (see below). Discrimination in any form will not be tolerated.

Students are advised to make the initial contact with the person with whom they are most comfortable from the lists below. These individuals would be available for consultation/advocacy:

- Academic /faculty advisor
- Field work coordinator(s)
- Director of the School or College where student is enrolled
- Dean of the Faculty of Health
- Advisor to Students with Disabilities, Dalhousie University
- Dalhousie/King's Association of Students with Disabilities
- Human Rights Commission

College of Pharmacy

- Preceptor
- Site coordinator
- Externship administrator

School of Nursing

- Clinical instructor
- Class professor
- Associate Director, Undergraduate Student Affairs
- Nurse Practitioner/Arctic Nursing Program Coordinator

School of Occupational Therapy

- Preceptor
- Field site director
- Provincial or Atlantic Region fieldwork education coordinators

School of Physiotherapy

- Clinical Instructor

- Centre Coordinator of Clinical Education
- Provincial Coordinator

School of Social Work

- Agency field instructor
- Program coordinator
- Faculty field instructor

School of Health Administration

- Preceptor

School of Communication Sciences and Disorders

- Clinical Educator

School of Health and Human Performance

- Student Services Administrator

School of Health Sciences

- Clinical Education Coordinator

Regulations
Students registered in the courses of the Disability Management Certificate Program (CDM) are bound by the University and Faculty regulations in the same manner as all Dalhousie students. The University and Faculty of Health regulations are found in the University Regulations section of the Dalhousie University Calendar. Academic regulations are found in the Academic Regulations section of the Calendar. It is the responsibility of each CDM student to become familiar with both the University and Faculty of Health regulations.

Please make note of the "Acceptable Use Policy" found in the University Regulations section of the Dalhousie Calendar. Because of the distance learning component of this Program, students should pay particular attention to regulations designed to respect the rights of other computer users.

Course Grades
The minimum passing grade for all of the CDM courses is 50%. A course may be repeated only once, with a maximum of two repeated courses permitted. A student who fails the same course twice will not be awarded the Certificate.

Appeals
On occasion, conflict or disagreement on final grades or evaluative procedures may arise. All students are expected to familiarize themselves with the processes available to them for academic appeals. Timeliness is of the essence for presentation and consideration of all appeals and, in all instances, the first level of appeal will be at the informal level.

Formal appeals of a final grade or a procedural problem must follow the regulations as stated in the University Calendar and such appeals will only be considered after failure to resolve the issue at the informal level has occurred. Students who do not follow these procedures will automatically forfeit their right to further consideration of their appeal and the original decision will remain in effect.

Informal Process
For each instance, the student and instructor, with guidance for the CDM Program Coordinator, are expected to attempt to resolve the matter informally within 15 days of the matter giving rise to the appeal.

Formal Process
If the matter cannot be resolved informally, the student my initiate a formal appeal by following the procedures set down in the University Calendar (see Regulation 16.7 of the Academic Regulations section for appeals of grades, and the Academic Regulations section for the Faculty of Health appeals process.

Note that both the Dalhousie University Calendar and the Faculty of Health policies appear on the Dalhousie University website.

Certificate Completion
Upon completion of all four courses of the Certificate in Disability Management Program, students submit the Request for Certificate form to the office of the Certificate in Disability Management Program. Once the Request form has been processed and approved, the Certificate is granted to the student. This Certificate is not awarded at Convocation.

To obtain the Request for Certificate form please refer to the Disability Management Program and click on How to Apply.

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate in Disability Management (CDM) Program specifically designed to education and engage students in the elements of disability management. Disability management team members provide effective, efficient and safe co-ordination of services needed to help injured or ill individuals achieve their maximum level of functioning, and facilitate their ability to remain at or return to work. Graduates of the CDM Program will typically work as disability case managers, insurance case managers, return to work facilitators, vocational rehabilitation consultants, vocational counsellors, or employee wellness program administrators.

People in the field of disability management come from many different professional backgrounds such as education, human resources, kinesiology, nursing, occupational therapy, physiotherapy, and social work. More and more organizations are recognizing the important role that disability management can play, with benefits of an effective disability management program including reducing cost due to less work disruptions, enhanced employee morale and sense of belonging, as well as improved manpower consistency. Practical applications of disability management have been made in different sectors of occupational activity such as administrative, industrial, service provision, technical and business. With so many multi-faceted aspects characterizing the field of disability management, the Dalhousie program draws on many bodies of knowledge spanning theoretical and practical application.

Program Overview

The overall goal of the CDM Program is to educate individuals with integrated knowledge and skills necessary to provide quality disability management services, through recognizing and understanding the dynamic interaction between disability and work performance. Upon completion of the CDM Program, students will be able to demonstrate and apply skills and competencies in the areas of:

1. Foundations of Disability Management
2. Communication and Professional Relationships
3. Return to Work and Case Management
4. Policies, Ethics and Legal Issues

The CDM Program is made up of four academic undergraduate three credit hours courses that are taught completely online. These courses are normally taken as electives by students currently enrolled in an academic program at Dalhousie or another Canadian University. However, students not enrolled in a university program can pursue the CDM by applying as a Special Student Undergraduate. Any student interested in taking courses in the CDM Program must register through the Registrar's Office. Admission requirements vary based on previous education and the intended program of study at Dalhousie. The Registrar's Office can help guide students as to the eligibility for admission to specific Dalhousie programs.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

DISM 3010 Introduction to Disability and Disability Management
CREDIT HOURS: 3
This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.
http://www.bookstore.dal.ca/Course/campus
CROSSLISTED: KINE 3010.03

DISM 4010 Case Management and Return-to-Work
CREDIT HOURS: 3
This course will focus on the return-to-work process, with emphasis on the components of Disability Management that are critical for successful return-to-work outcomes. Appraisal of case management strategies, vocational rehabilitation, and ethical and legal implications of the return-to-work process will be highlighted.
http://www.bookstore.dal.ca/Course/campus
PREREQUISITES: DISM 3010.03

DISM 4040 Understanding the Relationship between Health and Work
CREDIT HOURS: 3
This course will distinguish issues that span the continuum of health and work performance, and examine the complex interaction between health conditions and ability and/or capacity to work. Concepts presented will include acute illness and injury, chronic health conditions, and workplace health promotion and prevention.
http://www.bookstore.dal.ca/Course/campus
PREREQUISITES: DISM 3010.03

DISM 4050 Communication and Professional Relationships in Disability Management
CREDIT HOURS: 3
This course identifies and analyzes key components that are part of the Disability Management communication toolkit. Application of strategies to enhance the professional relationships frequently encountered in the Disability Management process will be emphasized.

Diploma in Emergency Health Services Management (DEHSM)

The School of Health Administration offers an undergraduate diploma program in Emergency Health Services Management (DEHSM). The program meets the need for an educational program for students interested in emergency health services management and for mid-career managers working in the Emergency Health Services systems in Canada. The academic objectives of the program are to provide education in emergency health services management for potential managers of large and small emergency health services organizations, and to provide access to further education in Health Services Administration and Emergency Health Services for such individuals.

The program is designed for professionals working in emergency and/or first responder settings. Students may complete the DEHSM on a full-time or part-time basis.

The program is conducted through the Dalhousie e-learning. The Dalhousie e-learning platform consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the e-learning format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

A. Application Procedure

Applicants must meet the university's undergraduate admission requirements to be considered for admission into the program. Applicants require university preparation (you may not apply from high school). Prospective students should submit a letter outlining their work experience and other activities with their application, fee and academic transcripts. In addition, students are required to submit a current resume and at least one letter of reference with their application to the diploma program.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Emergency Health Management program may be obtained from:
School of Health Administration, Dalhousie University
Sir Charles Tupper Medical Building

5850 College Street, 2nd floor
PO Box 15000
Halifax, NS B3H 4R2
902-494-7097
healthadmin@dal.ca

Application forms are available online at www.dal.ca/admissions/apply. Deadline for September admission is March 1, November 15 for January admission and March 15 for May admission.

B. Curriculum

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4004.03: Healthcare Planning
- HESA 4005.03: Healthcare Financial Management
- HESA 4400.03: Introduction to Healthcare Economics
- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4010.03: Management Process and Human Resource Issues in EHS
- HESA 4020.03: Quality Improvement in EHS
- HESA 4200.03: Epidemiology for Managers

Summer term

- HESA 4030.03: EHS System Design
- HESA 4040.03: Principles of Community-Based EHS

Diploma in Health Services Administration (DHSA)

The Diploma in Health Services Administration (DHSA) program is designed to prepare students for a career in healthcare at the managerial level. It meets the needs of students interested in health services administration and of those currently employed in the healthcare sector in a managerial capacity, particularly, middle managers in medium and large institutions, administrators in small facilities, and employees in community health, long-term care, primary care, multi-service centres, and community health boards.

The program provides a conceptual background for the increasingly complex managerial tasks performed in health institutions, agencies, and health-related government departments. Every effort is made to balance political, social, economic, cultural, medical, and ethical approaches to understanding the healthcare delivery system with those of the management sciences.

All students must observe the University and Academic Regulations described in the calendar.

Students may complete the DHSA on a full-time or part-time basis.

The program is conducted through the Dalhousie e-learning. The Dalhousie e-learning platform consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the e-learning format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

Application Procedure

Applicants must meet the Dalhousie University undergraduate admission requirements to warrant consideration into this program. Applicants require university preparation (you may not apply from high school). In addition to transcripts, students are required to submit a current resume and at least one letter of reference with their application to the Diploma program.

Applications should be submitted as early as possible, and not later than March 1 for September admission, and November 15th for January admission.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Health Services Administration program may be obtained from:
School of Health Administration
Dalhousie University
Sir Charles Tupper Medical Building
5850 College Street, 2nd floor
PO Box 15000
Halifax, NS B3H 4R2
902-494-7097
healthadmin@dal.ca

Application forms are available online at www.dal.ca/admissions/apply.html

Curriculum

The one-year program features both an academic and outcome-oriented curriculum. Students accepted into the DHSA program take the following three credit hour courses:

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4004.03: Healthcare Planning
- HESA 4005.03: Healthcare Financial Management
- HESA 4400.03: Introduction to Healthcare Economics
- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4001.03: Management Roles and Competencies
- HESA 4002.03: Health Human Resource Management
- HESA 4003.03: Quality Management
- HESA 4200.03: Epidemiology for Managers

As well as **one three credit hour elective as approved by the School required**. Elective may be taken in fall, winter, or summer term.

Certificate in Emergency Health Services Management
The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services Management (CEHSM)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Assist in developing effective community-based programs through adverse outcome reduction
- Assist in the development of program-based budget and accounting controls
- Guide students in formulating effective communication and awareness at the community level.

The **Certificate in Emergency Health Services Management (CEHSM)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University undergraduate admission requirements to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed application form and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services Management (CEHSM)** take the following classes:

- **Fall Semester - Required Course**
  HESA 4005: Healthcare Financial Management
- **Winter Semester - Required Course**
  HESA 4020: Quality Improvement in Emergency Health Services
- **Summer Semester - Required Course**
  HESA 4040: Principles of Community Based Emergency Health Services

Program Delivery

The **Certificate in Emergency Health Services Management (CEHSM)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools, which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Certificate in Emergency Health Services Systems Planning

The School of Health Administration offers an undergraduate **Certificate in Emergency Health Services System Planning (CEHSP)**. The certificate is designed for professionals seeking domain-specific knowledge in Emergency Health Services management.

The objective of the certificate is to assist individuals working in emergency health services organizations to more effectively manage community needs and resources. The certificate aims to:

- Help emergency and disaster health services managers to design an efficient pre-hospital care system through community-based emergency health need assessment with regard to people, time, and place
- Enable managers to design an Emergency Health Services system that meets the needs of community by integrating the elements of planning cycle and unique specification of Emergency Health Services system structure

The **Certificate in Emergency Health Services System Planning (CEHSP)** is also designed in a manner that allows the interested individual to continue on with more advanced training.

Admission Requirements

You must meet the Dalhousie University undergraduate admission requirements to be considered for this program. This certificate program does not typically accept people applying directly from high school. It is recommended that you have work or volunteer experience in the health services industry before applying for the program.

A complete application consists of the following documents:

- A completed application form and fee
- An official transcript of the record of academic work completed to date
- One letter of reference (academic or professional)
- Resume/curriculum vitae
- Applicants whose first language is not English must provide proof of English proficiency. See General Admission Requirements.

Application deadlines are:

- March 1 for September start
- November 15 for January start
- March 15 for May start

Curriculum

The one-year certificate features both academic and results-oriented curriculum. Students accepted into the **Certificate in Emergency Health Services System Planning (CEHSP)** take the following half credit classes:

- **Fall Semester - Required Course**HESA 4004: Healthcare Planning
- **Winter Semester - Required Course**
  HESA 4200: Epidemiology for Managers
- **Summer Semester - Required Course**
  HESA 4030: Emergency Health Services Systems Design

Program Delivery

The **Certificate in Emergency Health Services System Planning (CEHSP)** is fully online offering flexible study options. The certificate is conducted through the Internet and web-based conferencing tool within the Dalhousie e-Learning platform. The Dalhousie e-Learning platform consists of a well-established suite of tools,

which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing. The certificate uses on-line learning technology for recommended readings, lessons, and course activities (e.g. assignments, tests, self-tests, etc.).

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

HESA 4000 Canadian Healthcare Delivery System
CREDIT HOURS: 3
The course is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this course is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction.
CROSSLISTED: CANA 4300.00

HESA 4001 Management Roles and Competencies
CREDIT HOURS: 3
This course seeks to help students to examine what managers do to add value to their organizations. As a starting point we will briefly explore the evolution of management theories, comparing the founding theories with more recent literature. We will also examine the role of managers in public organizations such as hospitals. Finally, we will examine specific skills and duties of healthcare managers including: leadership, power, motivation, decision making, communication, teamwork, conflict resolution, organizational change, and others. Learning is facilitated through a mix of individual study and group discussions, and direct feedback from the instructor.

HESA 4002 Health Human Resource Management
CREDIT HOURS: 3
This course will provide the student with a working knowledge of the day to day operational management of human resources. The course will focus on the requirements of a manager to mentor, lead and manage the organization's human resources. The interaction and interdependencies between the manager and the human resource department will be examined. Topics include labor management relations; human rights and labor related legislation; recruitment and selection; performance development and management; professional development and training; compensation related issues; collective bargaining and dealing with special employment related issues. Approved with Canadian Studies.
CROSSLISTED: HESA 4010.03

HESA 4003 Quality Management
CREDIT HOURS: 3
This course will provide an introduction to the concept of quality improvement. Students will be exposed to the various methods to measure and assess quality in healthcare and be provided exposure with tools and techniques utilized in practice. A focus on safety and risk, patient satisfaction, team leadership as well as accreditation will be undertaken to ensure students gain practical understanding of the drivers of quality in Canadian healthcare. Approved with Canadian Studies.
CROSSLISTED: HESA 4020.03

HESA 4004 Healthcare Planning
CREDIT HOURS: 3
This course will use lectures, readings and case discussion to explore issues and methods related to health planning and evaluation. Emphasis will be placed on learning how to apply theory to practice at the system, organization, and service levels.

HESA 4005 Healthcare Financial Management
CREDIT HOURS: 3
This course will introduce the student to financial management concepts. The key concepts of financial resource management will be explored with particular emphasis on implementation in the healthcare sector. Introduction of the basic components will enable the student to understand the concepts within the larger framework of strategic and organizational resource planning and utilization. Topics covered include preparing, managing, and evaluating department budgets, payment systems, and fiscal accountability.

HESA 4010 Management Process and Human Resource Issues in EHS
CREDIT HOURS: 3
The course is designed to develop skills in the eight core management processes required to effectively manage an EHS operation. The core management skills taught in this course include: Interpersonal Communications and Coaching, Building Effective Teams, Monitoring and Managing Performance, Project Management, Leading Others, productivity Improvement, Influencing and Negotiating with Others, and Managing Innovation and Change. The overall aim of this course is to provide EHS practitioners with the skills required to manage people effectively. The course has two principle goals: provide EHS practitioners with the management and human resource skills necessary to manage effectively in their own work environment, and introduce EHS practitioners to innovations in EHS systems design and management practices.
CROSSLISTED: HESA 4002.03

HESA 4020 Quality Improvement in EHS
CREDIT HOURS: 3
The objectives of this course are to (1) lead EHS managers through a step by step process to design, plan, implement, monitor and evaluate a continuous quality improvement initiatives, (2) link continuous quality improvement principles to the concepts and practices of Higher Performance Systems (HPS), (3) apply the principles, practices and tools of continuous quality improvement to an EHS operation, and (4) create a team based continuous quality improvement environment. Participants will be introduced to and will apply the concepts of healthcare improvement teams throughout the course.
CROSSLISTED: HESA 4003.03

HESA 4030 EHS System Design
CREDIT HOURS: 3
The advent of the high performance EHS system makes it evident that it is possible to "do more with less", however, that possibility requires sensible design tempered by the political realities of the services area. It also requires the use of CQI practices to modify the design and ever vigilant system status management to maintain high performance. This course will consider first the public policy issues that bear upon EHS system design. This course will consider first the structure issues, both external and internal, that bear upon EHS system design. Then the course will consider the different designs originated from organizational theory. In the second half of the course the various system components will be presented. Finally, the course will consider disaster management of EHS systems. The objectives of this course are: (1) provide managers and management-bound students a broad perspective of the process of providing EHS services, (2) identify the scope of factors that influence, create and alter the design of EHS systems, (3) provide a foundation for system evaluation, and (4) challenge students to anticipate the factors that will affect system design when disaster strikes.

HESA 4040 Principles of Community-Based EHS
CREDIT HOURS: 3
Emergency Health Service (EHS) systems face challenging environments. However, strategics can be developed that go beyond merely reacting to what occurs in the environment. This course presents public relations planning so that a disaster or even a scandal can be turned into an opportunity. In addition, the course offers a basic understanding of marketing strategies that can help offset market pressures and demands. The objectives of the course are: (1) appreciate how marketing strategies vary when designed for the public good or a public service, (2) develop a marketing plan specific to the student's emergency health service system, (3) develop and evaluate an emergency health services public relations plan, and (4) facilitate a collaborative activity between the student's emergency health organization and some of its stakeholders.

HESA 4200 Epidemiology for Managers
CREDIT HOURS: 3
This course is a general, introductory course in the principles of epidemiology. Discussion will concentrate on the occurrence of disease and injuries in human populations, examine methods of determining the causes of illness and death, and analyze conclusions which have been gained through the application of epidemiological studies.

HESA 4400 Introduction to Healthcare Economics
CREDIT HOURS: 3
This course is an introduction to the principle of health economics. Starting with basic concepts of opportunity cost, trade-offs and the benefits of trade, the course focuses on understanding economic concepts such as demand, supply, costs, revenue, profit and market structure. The course then covers issues related to market failures such as imperfect competition in health care sector. The final section of the course provides an overview on health technology assessment.

Health and Human Performance

Introduction
Purposes of the School
Through effective teaching, innovative research and meaningful partnerships, we develop, apply and advance knowledge in health promotion, kinesiology and leisure studies.

Limited Enrolment
All programs offered by the School of Health and Human Performance have enrolment limits.

Interprofessional Health Education
Students are required to maintain enrolment in IPHE 4900.00 (see calendar section on Health, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 2).** Successful completion is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Equitable Admissions Policy

Purpose of the Policy

This policy is intended to create opportunities to increase the support and admission, and graduation of students who self-identify as belonging to historically underrepresented groups: Persons of Aborginal/Indigenous ancestry (especially Mi'kmaq), members of racialized groups, persons of African descent (especially African Nova Scotians), Acadians, persons with dis/Abilities, and persons belonging to minority sexual orientation and/or gender identity (SOGI) groups.

Eligibility

Persons eligible to be considered under this policy must self-identify. Although the School of Health and Human Performance is committed to supporting eligible students from across Canada, preference will be given to those who are a resident of Atlantic Canada or who have a parent residing in Atlantic Canada at the time of application.

Consideration for admission under this policy is optional. Applicants wishing to be considered under this policy must identify on the undergraduate application form.

Requirements

To be considered for admission under this policy, the following criteria must be met:

1. Those applying directly from high school must have attained a minimum grade of 65% in each of the prerequisites listed for the program of choice. Transfer students (e.g. individuals having completed post secondary courses) must have achieved a minimum overall GPA of 2.3 (C+).
2. The applicant would otherwise not have been admitted through the regular admission process.
3. The application and a written statement outlining his/her motivation for applying must be submitted to the Registrar's Office no later than March 15.

Support Services

Once admitted to the School, students wishing to access the following support services must identify their need to the Student Services Administrator, or the course professor.

School of Health and Human Performance:

1. The Student Services Administrator will meet regularly with students to assist with advising, administrative needs, and other concerns.
2. Faculty members will facilitate extra support or instruction for their course content if necessary.
3. Faculty members who are members of the designated groups, or who are closely affiliated with those groups, will be asked to provide academic mentorship if required.
4. Faculty whose office is in a building that might be inaccessible to students with a physical disability will arrange an alternative, more accessible, space for meeting with those students.

Dalhousie University offers a variety of services to students

For further information go to www.dal.ca/campus_life/student_services.html

School of Health and Human Performance Regulations

1. All students must observe the University and Academic Regulations described in this Calendar.

2. Attendance

All students must attend the classes of their prescribed course regularly and punctually. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to discontinue the course concerned.

3. Workload

The maximum course load for any fall or winter term is 15 credit hours (five half-credits) and during spring and summer terms, the maximum course load for each is 6 credit hours. Students wishing to exceed the maximum course load must receive permission from the academic advisor within the School. Permission will not normally be granted to any student in his or her first year of study or to any student who does not have a cumulative GPA of 3.00 or above. Other requests based on extenuating circumstances will be considered.

4. Grade Point Average Requirements

The grade point average system is described in the Academic Regulations.

5. Supplemental Examinations

The School of Health and Human Performance does not offer supplemental examinations in any of its programs.

6. Academic Appeals Procedures

A student wishing to appeal a decision based on School regulations should in the first instance attempt to resolve the issue with the instructor(s) concerned before proceeding as per School Appeal Procedures, See Academic Regulation 24.6.

6.a School Committee on Undergraduate Student Appeals

A School-wide Committee on Undergraduate Student Appeals exists for the purpose of hearing initial student appeals of academic decisions.

The student appellant is responsible for the preparation of all documentation in support of his/her appeal.

The student must submit the appeal to the Chair, Committee on Undergraduate Student Appeals.

The student has the right to appear before the Committee on Undergraduate Student Appeals and he/she should notify the Chair of his/her desire to do so. The student also has the right to be represented by an advocate of his/her choice.

The decision of the Committee on Undergraduate Student Appeals shall be conveyed to the student, in writing, by the Chair, Committee on Undergraduate Student Appeals within three working days after the conclusion of the appeal. If the student's appeal is being denied, this notification should include information about procedures to appeal to the Committee on Undergraduate Student Appeals of the Faculty of Health (see Academic Regulation 25.6). It should be noted that this appeal to the Faculty Committee on Undergraduate Student Appeals must be presented within 30 days of notification from the School of the disputed academic decision.

7. Student Advisory Programs

Although many courses are compulsory in the School's programs, considerable latitude exists for the development and extension of individual interests. To help in planning their program of studies each student may consult with one of the Student Services Administrators. They can help students to select courses, avoid common pitfalls, interpret regulations, and solve various types of problems. Although students are responsible for their own programs and for maintaining high academic standards, they should consult one of the advisors regularly.

Degree Programs
The School offers the following programs:

- BSc (Health Promotion)
- BSc (Health Promotion) with Honours*
- BSc (Kinesiology)
- BSc (Kinesiology) with Honours*
- BSc (Recreation)**
- BSc (Recreation) with Honours*
- BSc (Recreation)/Bachelor of Management***
- BSc (Recreation) with Honours*/Bachelor of Management***

* Application is made to the Honours Coordinator by November 15 for HPRO, Rec (TR) and April 1 for Kinesiology, of the student's third year. Rec (Mgmt) students apply by November 15 of their fourth year. Consult department for further information.
** The BSc (Recreation) is a degree in Therapeutic Recreation.
***This is a five-year combined degree in which the student will graduate with both a Bachelor of Science (Recreation) and Bachelor of Management degree.

NOTE 1: Students entering into any of the above degree programs from high school should refer to the Admission Requirements section of this calendar.
NOTE 2: Students who are transferring into any of the above degree programs with previous academic work will formulate a program of study with the Student Services Administrator, based on previous work and area of concentration. Students transferring into the BSc (Health Promotion), BSc (Recreation) and BSc (Recreation)/BManagement programs should note that the internship experiences required in the final year of these programs are normally only offered in the fall and winter terms.

School of Health and Human Performance Courses
The following courses are required for certain degree programs within the School. Please refer to the Required Courses section of the specific degree program of interest:

- HAHP 2000.03 3
- HAHP 3000.03 3
- HAHP 3100.03 3

HAHP Course Descriptions

- HAHP 2000.03: Human Growth and Development.
- HAHP 3000.03: Community Development.
- HAHP 3100.03: Introduction to Research Methods.

Staff

Director
Rehman, L., BHK, MA (UBC), PhD (Waterloo)

Professors Emeriti
Belzer Jr., E. G., BS (West Chester State Coll), MS (Maryland), PhD (Illinois)
Lyons, R. F., BA (Dalhousie), MEd (Xavier Univ), PhD (Oregon)

Professors
Blanchard, C., BA (Hon) (UPEI), MA, PhD (Alberta), major appointment with Department of Medicine
Gahagan, J., BA, BA Honours (Carleton), MA (Univ of Windsor), PhD (Wayne State Univ)
Jackson, L. A., BA, MA, PhD (Toronto)
Karabanow, J., BA (Hon), MA (McGill), PhD (Wilfred Laurier), major appointment with Social Work.
Rehman, L. A., BHK, MA (UBC), PhD (Waterloo)
Westwood, D. A., BSc, MA, PhD (Waterloo)

Associate Professors
Boe, S., BPhED (Brock), MSc, PhD, MPT (Western Ontario), major appointment with School of Physiotherapy
Grandy, S., BSc, MSc, PhD (Dalhousie)
Hutchinson, S. L., BA (Victoria), MA (Dalhousie), PhD (Georgia)
Keats, M., BA (Calgary), MA (Alberta), PhD (Calgary)
Kimmerly, D., BSc (Hons (Waterloo), MSc, PhD (Western Ontario)
Kirk, S., BSc Honours (Leeds Metropolitan Univ), PhD (Univ of Leeds)
Kozey, J. W., BSc, MSc (Waterloo), PhD (TUNS)
Martin, D., BRec (Memorial), MA, PhD (Dalhousie)
Robinson, L. M., BSc Honours 1st. class (UVIC), MA, PhD (Simon Fraser)
Weeks, L., BSc (UPEI), MSc (Univ Maine), PhD (Virginia Tech), major appointment with School of Nursing.

Assistant Professors
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State)
Gallant, K., BSc (Hon) (Mt. A), BJourn (Univ of King's College), MSc, PhD (Waterloo)
Grandy, S., BSc, MSc, PhD (Dalhousie)
Hajizadeh, M., BA, MSc (Iran Univ), PhD (Queensland), major appointment with School of Health Administration
Hamilton-Hinch, B., BSc, MA, PhD (Dalhousie)
Kimmerly, D. S., BSc (Hons) (Waterloo), MSc, PhD (Western Ontario)
Kozey, C. L., BPE (UNB), MSc (Waterloo), PhD (Dalhousie), major appointment with the School of Physiotherapy
Ladouceur, M., BSc, MSc (Sherbrooke), PhD (McGill)
Martin, D., BRec (Memorial), MA, PhD (Dalhousie)
Moreside, J., BSc (UBC), MHK (Windsor), PhD (Waterloo)
Neyedli, H., BSc (Dalhousie), MASc, PhD (Toronto)
Numer, M., BA (Robert Morris Univ), MEd (California Univ), PhD (Dalhousie)
Stone, M., BPHE, BSc (Queen's), MSc (Saskatchewan), PhD (Exeter)
Welch, J., BA, BSc Honours (Carleton), MSc (Alberta), PhD (Purdue Univ)
Wong, I., BScH (Acadia), MD (Dalhousie), major appointment with Department of Surgery

Adjunct Appointees
Arthur, M., BA (Carleton), BSc (Ottawa), MSc (Dalhousie)
Bayers, L., BA, BEd (Dalhousie), MA (St. Mary's), PhD (South Australia)
Brooks, C., MD (Manchester Univ), Dipl Avration Med (Farnborough)
Fenton, L., BA (Alberta), MA (Prescott College), PhD (Alberta)
Forbes, C., BSc (St.FX), MSc, PhD (Alberta)
Holt, L., BSc, MSc (Springfield Coll), PhD (Southern Illinois)
Maher, P., BA, HBOR (Lakehead), PhD (Lincoln)
Meisner, B., HBSc (Toronto), MSc, PhD (York)
Steeves, D., BEd (UNB), MSc (Dalhousie)
Thornley, L., BSc (Univ of Brighton), MSc (Dalhousie)
Willgress, S., BSc, MSc (Calgary)

Instructors
Frayne, R., BScH (Guelph), MSc, PhD (Western Ontario)
Huybers, B., BSc (MSVU), MA, PhD (Dalhousie)
Spencer, B., BSc, MA (Dalhousie)
Stevens, D., BSc (Hons) (Wolverhampton), MSc (Cardiff), PhD (Exeter)
Woodford, K., BA, BRec (Memorial), MA (MSVU)

Bachelor of Science (Health Promotion)

The Bachelor of Science (Health Promotion) is a four-year degree program. The goal of health promotion is to educate health promotion professionals in promoting, maintaining and improving the health and well-being of individuals, families and communities. As a profession, Health Promotion is principally devoted to employing health promotion processes and to fostering healthy behaviors.

The responsibilities of health promoters include: assessing health promotion needs; planning, conducting and evaluating health promotion programs; coordinating health promotion activities and resources; promoting health throughout the community; and professional development.

The BSc (Health Promotion) program guides students in attaining: (1) knowledge, attitudes and practices conducive to a healthy lifestyle; (2) professional preparation for a career in community health promotion; and (3) academic preparation for advanced study and research in health promotion or health-related fields.

Program of Study

NOTE: On admission into the BSc (Health Promotion) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Health Promotion)

Stream Requirements

Common Year One

HPRO 1000.03	3
HPRO 1195.03	3

ANAT 1020.03	3
CSCI 1200.03	3
STAT 1060.03	3
PHYL 1011.03	3
PHYL 1012.03	3
SOSA 1002.03 and SOSA 1003.03 or SOSA 1050.06 or SOSA 1100.06 or SOSA 1200.06	6
Open Elective **	3

After the common first year, students will choose either the Community Health Promotion stream or the Health Promotion Research and Policy stream, and will follow the requirements as outlined below.

Community Health Promotion Stream
Year Two

HAHP 2000.03	3
HPRO 2110.03	3
HPRO 2120.03	3
HPRO 2361.03	3
One from List A***	
HPRO 2255.03, HPRO 4412.03, HPRO 4365.03	3
PSYO 1011 or PSYO 1021 and PSYO 1012 or PSYO 1022	6
Language and Humanities Elective*	3
Writing Requirement*****	6

Year Three

HAHP 3000.03	3
HAHP 3100.03	3
HPRO 3397.03	3
HPRO 3325.03	3
One from List B***	
HPRO 3335.03, HPRO 3345.03, HPRO 3351.03	3
Open Electives**	9
Health Related Elective(s)****	6

Year Four

One from List A***	
HPRO 2255.03, HPRO 4412.03, HPRO 4365.03	3
One from List B***	
HPRO 3335.03, HPRO 3345.03, HPRO 3351.03	3
HPRO 4450.03	3
Open Elective(s)**	6
HPRO 4495.15	15

Health Promotion Research and Policy Stream
Year Two

HAHP 2000.03	3
HPRO 2110.03	3
HPRO 2120.03	3
HPRO 2361.03	3
PSYO 1011 or PSYO 1021 and PSYO 1012 or PSYO 1022	6

Language and Humanities Elective*	3
Writing Requirement*****	6
PHIL 2660 or PHIL 2670	3

Year Three

HAHP 3000.03	3
HAHP 3100.03	3
HPRO 3397.03	3
HPRO 4101.03	3
One from List C***	
HPRO 3360.03, HPRO 3370.03	3
Open Elective**	3
Health Related Electives****	12

Year Four

Health Related Elective****	9
Open Elective(s)**	6
HPRO 4495.15	15

* Language/Humanities Elective - see list under Degree Requirements Section in the Academic Calendar.
** Open Electives can be chosen from any available course at Dalhousie
***Students in the Research and Policy Stream must take one course from List C: HPRO 3360 or HPRO 3370. Students in the Community Health Promotion Stream must complete: Two courses from List A: HPRO 2255, HPRO 4412, or HPRO 4365; Two courses from List B: HPRO 3335, HPRO 3345, or HPRO 3351.
**** Health Related Electives - To ensure the courses you select fill this requirement, please check with an advisor.
***** See list of writing requirement courses under Degree Requirements Section in the Academic Calendar. If students take SOSA 1050 in Year One, the Writing Requirement becomes six credit hours of open electives.

At graduation, valid Standard First Aid and CPR Level C Certification are required. Students must submit copies of valid certification to the Student Services Administrator before the end of their final term.

Bachelor of Science (Health Promotion) with Honours

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Health Promotion) degree. For the Community Stream, HPRO 4101.03 and HPRO 4102.03 may be applied as open electives or as health-related electives on the Program of Studies form (see the School's Student Services Administrator). For the Research and Policy Stream, HPRO 4101.03 is required and HPRO 4102.03 can be applied as an open or health-related elective on the Program of Studies form (see the School's Student Services Administrator).

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. ***Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.***

1. Completed a minimum 75 credit hours towards their undergraduate degree.
2. Obtained a GPA of 3.5 based on the previous 45 credit hours of work.
3. Completed HAHP 3100 with a minimum grade of B.
4. Completed a 3000 level or higher HPRO course most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year.
NOTE: Students accepted into the Honours program must complete HPRO 4101.03 and HPRO 4102.03

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion
Students who have graduated with a Bachelor of Science (Health Promotion) degree can apply for the Honours Conversion program. Before taking HPRO 4101.03 and HPRO 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with HPRO 4101.03 and HPRO 4102.03. Application is made through the Honours Coordinator (details in the BSc (Health Promotion) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Bachelor of Science (Kinesiology)

Program Description

Kinesiology is the study of the structure and function of the human body within the context of human movement and with a focus on the maintenance and enhancement of health and well-being. Students may elect to concentrate in one of three professional areas - ergonomics; fitness and lifestyle; or coaching science* - or follow a more

general stream with a focus on research or other professional areas in which human movement and health are central. The School offers a four-year BSc (Kinesiology) degree as well as a four-year honours degree in Kinesiology.
* See stream requirements under Program of Study below.

The goals of these degrees are to provide students with:

1. A broad background in various subdisciplines of Kinesiology, including anatomy, physiology, neurophysiology, biomechanics, movement control and psychology of performance;
2. An exposure to several science disciplines which are prerequisite and/or complementary to the kinesiology subdisciplines (e.g. biology, physics, psychology, mathematics);
3. An introduction to the discipline of health promotion and an appreciation of the role kinesiology plays in health and well-being concerns of the individual;
4. An exposure to some aspects of the humanities and social sciences, as a means of enhancing the liberal education of the student and addressing social concerns in relation to health promotion;
5. A solid foundation in research methodology and statistics, including opportunities for independent research if the student should so choose;
6. An understanding of the principles and tools necessary to evaluate human movement from a variety of perspectives and in a variety of settings, as well as hands-on experience in several evaluative procedures;
7. Professional preparation in the areas of fitness and lifestyle; ergonomics; or coaching sciences;
8. Experiences in active and problem-based learning;
9. The necessary background to enable the student to pursue graduate work in kinesiology or other related fields.

Program of Study

On admission into the BSc (Kinesiology) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Kinesiology)

- ENGL 1100.03 3
- HAHP 2000.03 3
- HAHP 3100.03 3
- ANAT 1020.03 3
- PHYC 1310.03 3
- PHYL 1011.03 3
- PHYL 1012.03 3
- KINE 1102.03 3
- KINE 1104.03 3
- KINE 1106.06 3
- KINE 1108.03 3
- KINE 3250.03 3
- KINE 2310.03 3
- KINE 2320.03 3
- KINE 2430.03 3
- KINE 2465.03 3
- KINE 3200.03 3
- KINE 3500.03 3
- MATH 1060.03 /STAT 1060.03 3

Kinesiology Electives* 21
Science Electives** 12
Open Electives*** 30

* 6 credit hours of Kinesiology electives must be at the 4000 level; the remaining 15 credit hours must be either at the 3000 or 4000 level.
**12 credit hours of science electives must be selected from the following list:

- BIOL 1010.03 or BIOL 1020.03: Principles of General Biology I
- BIOL 1011.03 or BIOL 1021.03: Principles of General Biology II
- PHYC 1320.03: Physics In and Around You
- CHEM 1011.03: General Chemistry Part I
- CHEM 1012.03: General Chemistry Part II
- MATH 1000.03: Differential & Integral Calculus or MATH 1215.03
- MATH 1010.03: Differential & Integral Calculus
- PSYO 1011, PSYO 1021.03 or PSYO 1031.03: Introduction to Psychology and Neuroscience I
- PSYO 1012 or PSYO 1022.03 or PSYO 1032.03: Introduction to Psychology and Neuroscience II

*** Open electives must include at least 15 credit hours at the 2000 level or above.

Students considering the Honours degree are required to take six credit hours of Math and are required to have 12 credit hours of science electives. For further information see Bachelor of Science (Kinesiology) with Honours.

Stream Requirements

Students interested in focusing on Ergonomics; Fitness and Lifestyle; or Coaching Science at an advanced level will be guided into one of three specialty streams. A maximum of 12 students/year/stream will be selected, primarily on the basis of GPA. Students wishing to complete a stream should consult the student advisor.

The following is a list of required courses for each stream. Any courses over the 18 credit hours of required KINE electives can be counted as open electives:

Ergonomics Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
- KINE 3476.03: Principles of Ergonomics
- KINE 3482.03: Care & Prevention of Injuries
- KINE 4466.03: Advanced Biomechanics
- KINE 4577.03: Cognitive Ergonomics
- KINE 4578.03: Physical Ergonomics
- KINE 4588.03: Clinical and Occupational Kinesiology

Fitness and Lifestyle Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3485.03: Psychology of Sport **OR**
- LEIS 3492.03: Counselling for Health and Well-being
- KINE 4108.03: Mind/Body Connections and Well-being
- KINE 4412.06: Advanced Fitness Assessment Exercise Prescription and Lifestyle Counselling

Coaching Science Stream

- KINE 3320.03: Anatomical Basis of Human Movement
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3430.03: Principles of Skill Acquisition
- KINE 3482.03: Care and Prevention of Injuries
- KINE 3485.03: Psychology of Sport
- KINE 3740.03: Coaching Science Seminar
- KINE 3741.03: Coaching Science Practicum
- KINE 4740.03: Advanced Coaching Science Seminar
- KINE 4741.03: Advanced Coaching Science Practicum
- MGMT 2401.03: Introduction to Marketing

Bachelor of Science (Kinesiology) with Honours

Students who wish to complete the Honours Program may apply by April 1st of their third year of study. ***Acceptance into the honours program is contingent upon the willingness of a faculty member to serve as the honours thesis advisor.*** To be considered for admission into the program, students must have fulfilled the following requirements:

1. Completed MATH 1060 / STAT 1060.
2. Completed a minimum of 12 credit hours of science electives, including a math course in addition to the required MATH 1060 / STAT 1060. The other math credit can be chosen from any MATH/STAT course at Dalhousie except for MATH 1001.03, MATH 1002.03, MATH 1110.03, MATH 1120.03, or MATH 1115.03.
3. Completed an upper level Kinesiology course (at the 3000 level or above) in the area in which the research will be undertaken (e.g. ergonomics, biomechanics, exercise physiology, neuromuscular physiology) with a grade of at least B;
4. Obtained an overall GPA of 3.5 on the previous 60 credit hours of work;
5. Completed HAHP 3100.03 (Research Methods) with a minimum grade of B.

Application is made through the Honours Coordinator by April 1st of the student's third year.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Students accepted into the Honours program must complete KINE 4900.06. This requirement is in lieu of six credit hours of Open Electives listed as part of the requirements for the BSc (Kinesiology).

Honours Conversion
Students who have graduated with a Bachelor of Science (Kinesiology) degree can apply for the Honours Conversion program. Before taking KINE 4900.06, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with KINE 4900. Application is made through the Honours Coordinator (details in the BSc (Kinesiology) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Bachelor of Science (Recreation) - Therapeutic Recreation

Program Description

Therapeutic Recreation involves the delivery of change-oriented services to individuals with disabilities, illness and other limitations, with the focus on increasing quality of life through leisure and recreation involvement. The graduates of the Therapeutic Recreation degree will be skilled in the areas of: disability and illness, leisure theory, assessment, planning (program and client planning), program implementation and evaluation, and documentation. Graduates will find employment in both traditional clinical settings such as rehabilitation facilities, psychiatric hospitals and nursing homes, and in community settings such as community mental health centres or associations for community living, etc.

Objectives

The general objectives of the program are:

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g. Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the roles of leadership, advocacy, constancy and education in recreation and leisure services;
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies or the social sciences and humanities.

Program of Study

On admission into the BSc (Recreation) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses BSc (Recreation) - Therapeutic Recreation

- HAHP 2000.03 3
- HAHP 3000.03 3
- HAHP 3100.03 3
- ANAT 1020.03 3

- PHYL 1012.03 3
- LEIS 1127.03 3
- LEIS 2127.03 3
- LEIS 2130.03 3
- LEIS 2296.03 3
- LEIS 2361.03 3
- LEIS 2384.03 3
- LEIS 3127.03 3
- LEIS 3426.03 3
- STAT 1060.03/MATH 1060.03 3
- LEIS 3492.03 3
- LEIS 4365.03 3
- LEIS 4598.15 15

Required Arts and Social Science Courses

- PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03
- PSYO 2220.03
- SOSA 1002.03 and SOSA 1003.03 or SOSA 1050.06 or SOSA 1200.06

Therapeutic Recreation Electives

Two of the following:

- LEIS 4482.03 3
- LEIS 4512.03 3
- LEIS 4540.03 3
- LEIS 4563.03 3
- Designated Elective* 3
- LEIS Elective 3
- Open Electives** 27

* Designated electives can be chosen from the courses in the Language/Humanities list (under College of Arts and Science Degree Requirements at the front of the calendar), Health or Interdisciplinary Health, Health Services Administration or Social Sciences.
**12 of the 27 credit hours of the open electives must be 2000 level or above.
NOTE: Students should consult the NCTRC website (http://www.NCTRC.org) for CTRS Certification requirements.

Bachelor of Science (Recreation) with Honours

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 75 credit hours towards the Bachelor of Science (Recreation) degree. Normally students will have completed five semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.5 based on the previous 45 credit hours of work.
3. Completed HAHP 3100: Research Methods with a minimum grade of B.
4. Completed a 3000 level or higher LEIS course most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year.

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as MGMT/LEIS electives.

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Recreation) degree.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion
Students who have graduated with a Bachelor of Science (Recreation) degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite courses concurrently with LEIS 4101.03 and LEIS 4102.03. Application is made through the Honours Coordinator.

Bachelor of Science (Recreation)/Bachelor of Management

Program Description

The curriculum of this combined program was developed in response to guidance from alumni and practicing professionals in the field — it was clear that while graduates entering the field of recreation administration needed the strong grounding in the recreation discipline, they also needed more management skills. The Faculty of Management's Bachelor of Management degree emphasizes an orientation to management in the public and non-profit sector. This combined degree program enhances career options of future recreation students.

The Bachelor of Science (Recreation)/Bachelor of Management is a five-year program comprising 150 credit hours. Upon completion of this program, the successful student graduates with a Bachelor of Science (Recreation) degree and a Bachelor of Management degree.

Objectives

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the professional roles of leadership, advocacy, education and service delivery in recreation.
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies, or the social sciences and humanities.

Required Courses - Bachelor of Science (Recreation)/Bachelor of Management

Required Health and Human Performance Courses

- HAHP 2000.03 3
- HAHP 3000.03 3

- HAHP 3100.03 3
- LEIS 1127.03 3
- LEIS 2127.03 3
- LEIS 2296.03 3
- LEIS 2361.03 3
- LEIS 2384.03 3
- LEIS 3127.03 3
- LEIS 3360.03 3
- LEIS 3362.03 3
- LEIS 3370.03 3
- LEIS 4362.03 3
- LEIS 4597.15 15

Required Management Courses

- MGMT 1000.03 3
- MGMT 1001.03 3
- MGMT 1501.03 3
- MGMT 1601.03 3
- MGMT 1702.03 3
- MGMT 2101.03 3
- MGMT 2303.03 3
- MGMT 2304.03 3
- MGMT 2401.03 3
- MGMT 2702.03 3
- MGMT 2801.03 3
- MGMT 2803.03 3
- MGMT 3201.03 3
- MGMT 3501.03 3
- MGMT 3602.03 3
- MGMT 4001.03 3

Other Required Courses

- ECON 1101.03
- ECON 1102.03
- SOSA 1002.03 and SOSA 1003.03 or SOSA 1050.06 or SOSA 1100.06 or SOSA 1200.06
- Writing Requirement (6)*
- Open Electives (24)**
- MGMT/LEIS electives (06)***

*Students must complete a six credit hour writing requirement. This can be completed by choosing six credit hours from the list of Writing Courses within the College of Arts and Science Degree requirements.
**The equivalent of 24 credit hours chosen from all courses offered in the University. Twelve of the 24 credit hours must be 2000 level or above.
***The equivalent of six credit hours must be chosen from any MGMT or LEIS course not already required.

Bachelor of Science (Recreation) with Honours/Bachelor of Management

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 105 credit hours towards the Bachelor of Science (Recreation)/Bachelor of Management degree. Normally students will have completed seven semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.5 based on the previous 75 credit hours of work.
3. Completed HAHP 3100: Research Methods with a minimum grade of B.
4. Completed a 3000 level or higher LEIS course most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's fourth year.

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as MGMT/LEIS electives.

The Honours Program is part of the 150 credit hours required for the Recreation Management program.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Recreation)/Bachelor of Management degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite courses concurrently with LEIS 4101.03 and LEIS 4102.03. Application is made through the Honours Coordinator.

Certificate in Interdisciplinary Health Studies
This certificate has been terminated as approved by Senate in April 2018.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions - Health and Human Performance

HAHP 2000 Human Growth and Development
CREDIT HOURS: 3
A study of factors influencing human growth and development from birth to maturity and throughout the lifespan, as revealed by observational and experimental studies.
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Science students. Others by permission of instructor with priority to Health Professions students.
FORMATS: Lecture

HAHP 3000 Community Development
CREDIT HOURS: 3
This course examines the nature and process of community development, reviews differing interpretations and approaches to community development, and provides students the opportunity to develop skills to catalyze and engage in the process. The course will investigate current Canadian initiatives and projects that encourage the practice of community development, and provide the opportunity to witness and become involved in local health-related projects that foster the principles of community development.
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Restricted to students in the School of Health and Human Performance.
FORMATS: Lecture | Tutorial | Discussion

HAHP 3100 Introduction to Research Methods
CREDIT HOURS: 3
This course provides students with basic knowledge for conducting research in health professions. The content covers ethics associated with research, research design, issues in measurement, sampling, data collection strategies, data analysis and report writing. Students will learn about different approaches to research from the classical scientific model to more subjective interpretative models of inquiry. Testing, as well as written assignments will serve as evaluative techniques.
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Informatics students.
EXCLUSIONS: HSCE 3010.03
FORMATS: Lecture | Discussion

Course Descriptions - Health Promotion

HPRO 1000 Introduction to Health, Health Promotion and Health Professions.
CREDIT HOURS: 3
This course provides the philosophical and practical scope of the School's unique perspective on health. It includes an examination of theories, research, politics and practices that have helped to define health, and health promotion as an umbrella for health-related activities. An historical perspective of health and healthcare is offered and current international, national and local issues are considered. Also included is an introduction to the professional streams offered in the School and how they fit into health promotion and the Canadian healthcare system.
COREQUISITES: IPHE 4900
EXCLUSIONS: HAHP 1000
FORMATS: Lecture | Seminar

HPRO 1195 Introduction to Health Promotion
CREDIT HOURS: 3
While students are developing knowledge, understandings, attitudes and appreciations related to health and professional health promotion, they will be improving skills in library research, scholarly writing, and public speaking. In addition to the regular classroom meetings, the course includes a self-study assignment related to the organization and functioning of a charitable community-based health-related agency.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.
FORMATS: Lecture | Seminar | Discussion

HPRO 2110 Health Promotion Theory
CREDIT HOURS: 3
This course is designed to encourage those working and studying in the areas of health promotion to better understand the connection between health promotion theory and research, policy and community practice. This course will also provide students with an opportunity to explore and critically analyze the principal methods and theoretical approaches in the evolution and assessment of evidence for effectiveness of health promotion programs and interventions.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2120 Health Promotion Policy
CREDIT HOURS: 3
The purpose of the course is to introduce students to the concept of policy and health promotion policy in particular. Students will be exposed to content that describes how policy is developed/approved/changed on the basis of research/evidence and what processes/tools can be used to influence political decision-making as it relates to the adoption of new/changed policy. Through the use of case studies, students will be asked to critically analyze existing health promotion policies and understand issues related to policy interpretation, application and compliance at national, provincial and local levels.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2255 Drugs and Drug Education
CREDIT HOURS: 3
International, national and regional issues of promotion, prevention, treatment and legislation of drug use are examined. Recreational, over-the-counter and some prescription drugs will be considered. Some strategies and methods of educating about drugs and drug-related issues will be included.
RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture

HPRO 2361 Program Planning
CREDIT HOURS: 3
Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health promotion. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This course reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03 or LEIS 1127.03
CROSSLISTED: LEIS 2361.03
RESTRICTIONS: Restricted to Recreation and Health Promotion students
FORMATS: Lecture | Discussion

HPRO 3250 Interdisciplinary Class in Human Nutrition
CREDIT HOURS: 3
This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.
CROSSLISTED: KINE 3250.03, NURS 4800.03, KINE 5990.03
RESTRICTIONS: Restricted to students in 2nd year or higher.
EXCLUSIONS: HPRO 2250
FORMATS: Lecture

HPRO 3325 Mental Health Promotion
CREDIT HOURS: 3
Concepts and issues of mental health are explored through an examination of related theories, research, writings and practices. Emphasis is placed on promoting individual and community mental health, but mental illness and its treatment are included. Mental health-related organizations and services will also be studied.
COREQUISITES: IPHE 4900
PREREQUISITES: PSYO 1011.03 or 1021.03 and PSYO 1012.03 or PSYO 1022.03, HAHP 2000.03, or permission of instructor
RESTRICTIONS: Restricted to School of Health and Human Performance students; limited space for other students may be made available.
FORMATS: Lecture | Seminar

HPRO 3335 Introduction to Disease Prevention
CREDIT HOURS: 3
This course will consider the concept of disease, the study of disease, and the causes of disease from the perspective of prevention. Primary, secondary and tertiary prevention strategies and methods will be examined, along with the role of the health promotion specialist. Selected communicable diseases will be used to illustrate these concepts.
COREQUISITES: IPHE 4900

PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, HPRO 1195.03/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06, or PHYL 2030X/Y.06, or permission of instructor
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students
FORMATS: Lecture | Discussion

HPRO 3345 Epidemiological Approach to Disease
CREDIT HOURS: 3
This course introduces students to the basic concepts of epidemiology - the study of the causes and distribution of disease in human populations. Emphasis will be on disease causation, morbidity and mortality through studying selected chronic conditions. In addition, this course examines social determinants of health and their relationship to chronic conditions.
COREQUISITES: IPHE 4900
PREREQUISITES: ANAT 1020.03, or ANAT 1010.03, HPRO 1195.03/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06 or PHYL 2030X/Y.06, or permission of instructor
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students
FORMATS: Lecture | Discussion

HPRO 3351 Injury Prevention and Safety Education
CREDIT HOURS: 3
Students are introduced to the concept of safety, the causes and effects of injuries, and strategies for reducing same through safety education, engineering and legislation. Specific study of injuries, their causes, and preventive measures and programs is preceded by a review of definitions of health, health promotion/education models and policies. The latter part of the course focuses on community orientations to injury prevention.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students
FORMATS: Lecture | Discussion

HPRO 3360 Multicultural Health Promotion Research and Policy
CREDIT HOURS: 3
The purpose of this course is to provide students with an opportunity to explore the distinct and integrated influence of research and policy on the health of multicultural populations within the Canadian context. In particular, this course will assist students in developing a critical understanding of the intersection of multicultural health with policies and power. Through engagement with multidisciplinary perspectives, students will examine health research and policy issues pertaining specifically to New Canadians (Immigrants), African Canadians, and Aboriginal peoples.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2110.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3370 International Health Promotion Research and Policy
CREDIT HOURS: 3
The main goal of the course is to introduce students to the ways in which health promotion research questions, methods and ethics, as well as health policies, vary depending upon the specific international context (local and national). A comparative analysis will be undertaken of the disparities in health/well-being between (and within) developed and developing countries while considering the historical development of underdevelopment. Each year the students will choose from a number of cases two that will be examined in-depth by the class. Students will choose from among a variety of key global health issues (e.g. tobacco addiction, health issues for migrant workers, HIV/AIDS and nutrition). Focus will be placed on the social determinants of these health issues/problems, and the types of health promotion research and policy issues needed to address these health problems within particular geographical contexts/countries. One of the central tenets of the course is how societies are organized, and the way in which resources are invested and whose interests the investments serve, affect the health of individuals and populations within the society.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2110.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3397 Community Health Promotion Strategies
CREDIT HOURS: 3
A broad spectrum of health promotion strategies is available to facilitate health in various community settings and with diverse populations. The course reviews these major strategies and offers students practice in applying them. In addition, the various models and theories of health behaviour change will be examined.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03, HPRO 2361.03/HEED 2361.03
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor with priority to Health Professions students
FORMATS: Lecture

HPRO 4101 Advanced Topics in Applied Research Methods in Health Promotion and Policy
CREDIT HOURS: 3
The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific health promotion topic. Health policies will be discussed and considered relative to specific health issues.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03/HEED 1195.03, HAHP 3100.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4102 Honours Thesis
CREDIT HOURS: 3
The purpose of the course is to develop research skills by completing a major independent research project and writing a formal research report in the form of a thesis. By way of their research, students will demonstrate skills, knowledge and ability in literature research, research design, data collection/analysis and formal academic writing.
COREQUISITES: IPHE 4900

PREREQUISITES: HAHP 3100.03 and HPRO 4101.03 with a grade of B or better in each, and ethical approval by August 1.
RESTRICTIONS: Restricted to Health Promotion honours student.

HPRO 4365 Health: A Biopsychosocial Approach
CREDIT HOURS: 3
Health is increasingly recognized as multiply determined by the complex interactions of biological, psychological, and social systems and determinants. Research into these interactions is advancing rapidly. Students in this course are expected to develop an understanding of these processes, be aware of the most recent research and be capable of seeking out new research in the future and applying this knowledge to health problems in Canada.
PREREQUISITES: HPRO 3335.03 or HPRO 3345.03
RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4412 Human Sexuality
CREDIT HOURS: 3
This course is concerned with biological, cultural, ethical, historical, psychological, religious and semantic aspects of human sexuality. Four themes are threaded throughout the course - diversity in gender roles and in sexual attitudes, behaviours and customs; critical thinking; making responsible decisions; sexual health. The course is designed to support positive integration of sexuality into the lives of individuals and to foster the prevention of sexuality-related problems, at all stages of life.
CROSSLISTED: GWST 2412.03
FORMATS: Lecture | Discussion

HPRO 4422 Environmental Health
CREDIT HOURS: 3
Individual health and well-being is partially determined by the values we hold and the choices we make as individuals. Equally important is the environment that enables us to make those choices that maintain and enhance our health. This course emphasizes the importance of the environment, both physical and social, and how it is implicated in the work of health promoters and other health professionals. The content reviews principles of natural and social ecology, the role of policy in shaping our environments, and research aimed at understanding the impact of various environmental conditions on health. Students will explore environmental health issues within the community and propose educational strategies to maintain and enhance health and well-being.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students
FORMATS: Lecture | Discussion

HPRO 4450 Comprehensive School Health Promotion
CREDIT HOURS: 3
This course will provide students with an overview of the components of a comprehensive health promotion program in the public school system from a community health promotion perspective. The school health curriculum, school health services, and the healthy school environment - and how a community health promoter might interact with the school system will comprise the content of the course.
COREQUISITES: IPHE 4900
PREREQUISITES: HPRO 1195.03, HPRO, 2110.03, HPRO 2361.03, HPRO 3397.03; at least two of HPRO 2255, HPRO 4412, HPRO 4365, HPRO 3335, HPRO 3345, or HPRO 3351
RESTRICTIONS: Restricted to Health Promotion students in their final year of study.
FORMATS: Lecture | Tutorial

HPRO 4495 Health Promotion Internship
CREDIT HOURS: 15
This course is an extended professional development internship during the final year of study. It requires completion of a 14-week, 40 hours per week internship in a health promotion agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.
COREQUISITES: IPHE 4900
PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. A Standard First Aid and Level C CPR Certification.
RESTRICTIONS: Restricted to Bachelor of Science (Health Promotion) students in their final term.
FORMATS: Lab

HPRO 4599 Health Promotion Internship
CREDIT HOURS: 7.5
COREQUISITES: IPHE 4900.00

HPRO 4800 Independent Study
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to HPRO 4801/HPRO 4802.
CALENDAR NOTES: Students may take no more than a total of 6 credit hours of independent studies.
COREQUISITES: IPHE 4900.00
PREREQUISITES: Fourth year status; a GPA of at least 3.00; a “B” grade in an earlier class in the area of study (where appropriate); consent of advisor; consent of tutor. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.
RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students
FORMATS: Tutorial

HPRO 4801 Directed Study
CREDIT HOURS: 3
See HPRO 4800.
COREQUISITES: IPHE 4900.00

HPRO 4802 Directed Study
CREDIT HOURS: 3
See HPRO 4800.
COREQUISITES: IPHE 4900.00

Course Descriptions - Kinesiology

KINE 1102 Physical Activity and Health
CREDIT HOURS: 3
This course is designed to introduce students to the connection between exercise and health. The lecture portion explores how exercise affects the most prevalent diseases currently afflicting our society. The laboratory portion is designed to help students develop a progressive exercise program for themselves based on their current fitness and strength levels as well as physical activity preferences.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Kinesiology students only
FORMATS: Lecture | Lab

KINE 1104 Foundations in Kinesiology
CREDIT HOURS: 3
The objective of this course is to introduce students to Kinesiology as a discipline and for them to learn about the sub-disciplines and content areas that contribute to the general body of knowledge in Kinesiology. In addition to understanding what these sub-disciplines are, students will gain an understanding of the interrelationships among these sub-disciplines and the types of careers that students can enter. Students will be exposed to discipline content as well as the methods of measurement and evaluation and the technology involved in each of the disciplines. Problem Based Learning (PBL) will be used as the course instruction method.
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Restricted to Kinesiology students
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

KINE 1106 Philosophy and Ethics for Kinesiologists
CREDIT HOURS: 3
Physical activity figures prominently in many aspects of society and culture. Kinesiologists are in a unique position to bridge the gap between the scientific study of physical activity and the implementation of physical activity programs in public and professional contexts. This course develops core principles in philosophy and ethics to help the aspiring kinesiologist think about and evaluate their role in society. Debate and critical analysis will figure prominently in the course.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Kinesiology students only
FORMATS: Lecture | Tutorial

KINE 1108 Psychology and Physical Activity
CREDIT HOURS: 3
Physical inactivity is widely recognized as a lifestyle associated with considerable health risk. The challenge of increasing the level of physical activity in the population requires an in-depth understanding of the individual and environmental factors that either promote or inhibit regular activity. Accordingly, this introductory course will provide students with the fundamental knowledge of how psychological concepts are related to physical activity participation and health. The main focus is to provide (a) a basic understanding of various social-psychological concepts and principles involved in health and exercise psychology, and (b) to see how these concepts and principles might be translated into promoting health and wellness via physical activity participation. Core concepts include the basics of psychology research, theories, motivation, adherence, and behaviour modification.
COREQUISITES: IPHE 4900
RESTRICTIONS: Priority given to Kinesiology students
FORMATS: Lecture | Lab

KINE 2310 Physiology of Exercise
CREDIT HOURS: 3
This is an introductory course for students with a basic knowledge of anatomy and physiology. It concentrates on the respiratory, cardiovascular and neuromuscular systems in terms of their involvement during exercise, their adaptation to different types of training and how they limit performance during exercise in different environmental conditions.
COREQUISITES: IPHE 4900.00
PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06
RESTRICTIONS: Restricted to Kinesiology students
FORMATS: Lecture | Lab

KINE 2320 Kinesiological Anatomy
CREDIT HOURS: 3
Neuroanatomical and musculoskeletal structures are presented and discussed in order to establish the understandings necessary for an in-depth analysis of human movement.
COREQUISITES: IPHE 4900.00
PREREQUISITES: ANAT 1020.03 or ANAT 1010.03 and PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06.
RESTRICTIONS: Restricted to Kinesiology students
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 2430 Motor Control and Learning
CREDIT HOURS: 3
This course deals with efficiency in completing movements to achieve a desired goal. It involves systematic changes in perception of the environment, decisions about what movements to make, as well as changes in how these movements are carried out. This course covers what is known about these processes as well as how this

information can be applied.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Kinesiology students
FORMATS: Lecture | Lab

KINE 2465 Introductory Biomechanics
CREDIT HOURS: 3
The purpose of this course is to introduce students to the area of biomechanics in human motion analysis. Students will be exposed to the concepts of kinematic and kinetic analysis of motion as well as muscle forces and moments of force as applied to the human system.
COREQUISITES: IPHE 4900.00
PREREQUISITES: PHYC 1300.06 or PHYC 1310.03
RESTRICTIONS: Restricted to Kinesiology students
EXCLUSIONS: PHYC 2610.03
FORMATS: Lecture | Lab

KINE 3010 Introduction to Diability and Disability Management
CREDIT HOURS: 3
This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.
COREQUISITES: IPHE 4900
CROSSLISTED: DISM 3010.03

KINE 3200 Sociocultural Issues in Physical Activity
CREDIT HOURS: 3
This course will provide students with an introduction to social theory, culture, and social psychology as applied to physical activity and sport. While recognizing that physical activity does not take place in a social vacuum, and that social content often influences how physical activity and sport are experienced, this course explores participation in, and perceptions of physical activity and sport according to gender, social class, age, sexual orientation, ethnic group and nationality. The meaning of physical activity and sport in society, the role of Canadian public policy in promoting and facilitating participation in physical activity, and sport as an agent for social change will also be explored.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 1106.03 or PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 or PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 or SOSA 1002.03 or SOSA 1003.03 or SOSA 1200.06 or SOSA 1050.06 or SOSA 1100.06 or PHIL 1000.06 or PHIL 1010.06 or permission of the instructor
FORMATS: Lecture

KINE 3250 Interdisciplinary Class in Human Nutrition
CREDIT HOURS: 3
This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.
CROSSLISTED: HPRO 3250.03, NURS 4800, KINE 5990
RESTRICTIONS: Restricted to students in 2nd year or higher.
EXCLUSIONS: KINE 2250
FORMATS: Lecture

KINE 3320 Anatomical Basis of Human Movement
CREDIT HOURS: 3
The purpose of this course is to integrate information from movement sciences in order to analyze a broad spectrum of human activities, from simple single contractions to complex patterns of both fine motor and gross motor activities. Industrial, recreational, sport and fitness movements will be examined using an integrated digital video/8 channel EMG approach.
COREQUISITES: IPHE 4900
PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture

KINE 3384 Physical Activity for Persons with Disabilities
CREDIT HOURS: 3
The etiology and effects of the more prevalent disabling conditions form the bases of strategies for teaching, coaching and rehabilitating those affected. Emphasis is placed on the physical components of disability and the adaptation of the environment and equipment to facilitate learning of ADL skills and sport. A practicum is required.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2320.03
FORMATS: Lecture

KINE 3414 Exercise Testing and Prescription for Healthy Populations
CREDIT HOURS: 3
The class will cover basic exercise testing techniques required to assess physical fitness as well as the knowledge required to design physical activity/exercise programs for healthy populations (children and youth, adults and older adults). Techniques to assess aerobic fitness, body composition, muscular endurance and flexibility will be covered in laboratory sessions.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2310.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

KINE 3419 Application of Physiological Principles to Human Performance
CREDIT HOURS: 3
This course focuses on physiological adaptations made by the body to different kinds of physical training. How selected factors can influence these adaptations is also examined. Students apply their knowledge of exercise physiology to athletic performance in a research project.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2310.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 3430 Principles of Skill Acquisition
CREDIT HOURS: 3
This course will provide students with experience in applying the theoretical concepts of motor control and learning. Variables that impact on skill acquisition, practice and instruction will be examined and applied. Real world settings will be used to illustrate the application of the principles of skill acquisition.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2430.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture

KINE 3440 Neural Basis of Sensory and Motor Function
CREDIT HOURS: 3
This course will provide students with a comprehensive understanding of the neural systems that mediate sensory and motor functions in the human. Proprioception, vision, somatosensation and vestibular sense will be explored in detail. Spinal reflexes, supraspinal pathways and cortical systems will be analyzed in detail, using case studies to illustrate key principles. Students will learn about the major classes of neurological movement disorders, from assessment to intervention. The course will build upon introductory courses in neural basis of behaviour.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2430 or PSYO/NESC 2470
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Tutorial

KINE 3476 Principles of Ergonomics
CREDIT HOURS: 3
This course applies health and human performance concepts in kinesiology to the workplace. The course content includes identifying characteristics of work environments and the effect on performance and health, the design of effective workplaces and the use of training and educational programs to increase productivity and to reduce injuries.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2310.03; KINE 2320.03; KINE 2430.03; KINE 2465.03
CROSSLISTED: IENG 3303.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab

KINE 3482 Prevention and Care of Injuries
CREDIT HOURS: 3
An introduction into the fields of Sports Medicine and work-related musculo-skeletal disorders, specifically the basic injury mechanisms, early recognition, care and prevention, pathology, tissue healing, emergency care, and basic principles of therapeutic exercise and modalities.
COREQUISITES: IPHE 4900
PREREQUISITES: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or 1000.06 or PHYL 2030.06, KINE 2320.03
RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab

KINE 3485 Psychology of Sport
CREDIT HOURS: 3
This course offers an awareness and understanding of the phenomena involved in mental preparation in sport. It will systematically analyze, investigate and assess psychological skills, attributes and preparation in this area, and their application in other environments. Emphasis will also be placed upon personal experience and practical application.
PREREQUISITES: PSYO 1011.03, 1021.03 or 1031.03 and PSYO 1012.03 or 1022.03 or permission of instructor
FORMATS: Lecture

KINE 3500 Principles of Measurement and Evaluation
CREDIT HOURS: 3
An introduction to the fundamentals involved in measurement and evaluation, including writing objectives, designing and administering tests, organizing and analyzing test results. Tests used to measure physical fitness, specific motor skills and health knowledge are investigated.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 1104.03, ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, STAT 1060.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 3740 Coaching Science Seminar
CREDIT HOURS: 3
The purpose of this course is to provide students with the opportunity to learn about the fundamental principles and concepts of effective coaching planning and practice. Students will explore the role of the coach; the philosophical approaches to coaching pedagogy; the holistic attainment of individual potential; as well as the coaching code of ethics. Identification of issues related to risk management; developmental age; skill analysis and development; and physical preparation will also prepare students to meet the requirements for the Part A and Part B of the Theory component of the National Coaching Certification Program (NCCP).
COREQUISITES: IPHE 4900
PREREQUISITES: HAHP 2000, KINE 1104, KINE 2310, KINE 2320, KINE 2430, KINE 2465
FORMATS: Lecture

KINE 3741 Coaching Science Practicum
CREDIT HOURS: 3
The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the fundamental principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a school, or club, mentor coach.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 3740.03

KINE 4108 Mind/Body Connections and Well-being
CREDIT HOURS: 3
The connection of mind and body as it relates to well-being is addressed through a survey of complementary (or alternative) healthcare practices including mind/body medicine (e.g. , relaxation, meditation), therapeutic systems (e.g., chiropractic, homeopathy), herbology, bodywork techniques (e.g., massage, pressure point therapies), movement therapies and exercises (e.g. Alexander, yoga) and integrated medical systems (e.g., Chinese medicine, Ayurveda). Theoretical and scientific bases of each are covered and controversies surrounding these practices are addressed. This course is not designed to train students to be practitioners of any technique.
COREQUISITES: IPHE 4900
PREREQUISITES: HAHP 3100.03
RESTRICTIONS: Restricted to students enrolled in their final year of study in the School of Health and Human Performance or by permission of instructor
FORMATS: Lecture

KINE 4412 Advanced Exercise Testing and Prescription for Clinical Populations
CREDIT HOURS: 6
This class will cover advanced exercise testing techniques (e.g. graded exercise testing, ECG, etc.) required to assess physical fitness in clinical populations as well as the theory required to design exercise programs for these populations Pathophysiology and basic pharmacology will also be discussed. Disease topics covered include cardiovascular, pulmonary, metabolic and autoimmune diseases.SIGNATURE REQUIRED
COREQUISITES: IPHE 4900
PREREQUISITES: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 2310.03, KINE 3414.03, KINE 3419.03, CPR
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 4466 Advanced Biomechanics
CREDIT HOURS: 3
This course takes a quantitative approach to understanding human movement from a mechanical perspective. Concepts presented in the course will be illustrated with examples taken from the areas of sport, exercise, activities of daily living, and ergonomics. Students will be introduced to several techniques used in biomechanics research.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 2465.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

KINE 4577 Cognitive Ergonomics
CREDIT HOURS: 3
This course examines the role of cognition in human system performance. The course generally takes an information processing and a systems engineering approach to consider the various topics and related issues. The course requirements include written tests on the content, a project and presentations.
COREQUISITES: IPHE 4900.00
PREREQUISITES: KINE 3476.03 or IENG 3303.03
RESTRICTIONS: Restricted to Kinesiology students and Industrial Engineering Students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Seminar

KINE 4578 Physical Ergonomics
CREDIT HOURS: 3
This advanced level course examines the application of the physical sciences in the productivity, health and safety of the workplace. The course will consider the design of work and the workplace from a physical science perspective. Due emphasis will be placed on the importance of the understanding of, and designing for, the capacity and capabilities of the human operator. When possible, the course will consider the present national and international standards in health and safety related to the content areas. The course requirements include a written test on the content, a project and a class presentation.
COREQUISITES: IPHE 4900
PREREQUISITES: STAT 1060.03 or STAT 2060, KINE 2310.03, KINE 2320.03, KINE 2465.03, KINE 3476.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 4588 Clinical and Occupational Kinesiology
CREDIT HOURS: 3
This advanced level course examines the role that Kinesiology can play in clinical and occupational settings. In particular, the course will expose the student to an integrated approach in human motion analysis with a primary focus on the use of electromyography and its relationship to other biomechanical and physiological measures. Due emphasis will be placed on the importance of understanding the strengths and weaknesses of present laboratory and field measures of human motion. The course requirements include a written test on the content, a project and a class presentation.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 3414.03, KINE 4466.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 1

KINE 4600 Practicum in Kinesiology
CREDIT HOURS: 3
Students take part in a supervised practical experience that links classroom knowledge to professional practice. Under the supervision of a kinesiologist, fitness or training professional, physical or occupational therapist, ergonomist or other related professional, students gain hands-on experience in a fitness/wellness/allied health field. Students document and critically evaluate their experiences.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03, HAHP 2000.03, HAHP 3100.03, KINE 3500.03, and at least three 3000 or 4000 level kinesiology courses.
RESTRICTIONS: Restricted to Kinesiology students enrolled in their final year of study in the School of Health and Human Performance.
FORMATS: Seminar

KINE 4700 Senior Seminar
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to KINE 4701/KINE 4702.
CALENDAR NOTES: Students taking KINE 4700 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Kinesiology students in their final year of study.
FORMATS: Seminar

KINE 4701 Senior Seminar
CREDIT HOURS: 3
See KINE 4700.
COREQUISITES: IPHE 4900

KINE 4702 Senior Seminar
CREDIT HOURS: 3
See KINE 4700.
COREQUISITES: IPHE 4900

KINE 4740 Advanced Coaching Science Seminar
CREDIT HOURS: 3
The purpose of this course is to provide students with the opportunity to learn about the advanced principles and concepts of effective coaching planning and practice. Students will design, quantify and monitor a season training plan using PLAN software, addressing the performance factors of speed, strength, suppleness, stamina and skill appropriate to the maturational level of the athlete, as well as the integration of psychological preparation and competitive strategies. The course will also prepare students to meet the requirements for Level Three of the Theory component of the national Coaching Certification Program (NCCP).
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 3740.03 and KINE 3741.03, Level 1 Technical, National Coaching Certification Programme. (Students are required, at their own expense, to pursue this certification externally.)
FORMATS: Lecture

KINE 4741 Advanced Coaching Science Practicum
CREDIT HOURS: 3
The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the advanced principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a varsity, school, or club, mentor coach. Students will also apply an intervention strategy developed to enhance a controllable specific performance factor in a sport of choice.
COREQUISITES: IPHE 4900
PREREQUISITES: KINE 4740.03

KINE 4800 Independent Study
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to KINE 4801/KINE 4802.
CALENDAR NOTES: Students may take no more than a total of 6 credit hours of independent studies
COREQUISITES: IPHE 4900.00
PREREQUISITES: The same as those for experimental research independent studies described under FORMAT I above, except that classes in research methods and

statistics are not required
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4801 Directed Study
CREDIT HOURS: 3
See KINE 4800.
COREQUISITES: IPHE 4900.00

KINE 4802 Directed Study
CREDIT HOURS: 3
See KINE 4800.
COREQUISITES: IPHE 4900.00

KINE 4900 Honours Thesis
CREDIT HOURS: 6
Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Kinesiology honours students.

Course Descriptions - Leisure

LEIS 1127 Foundations of Recreation
CREDIT HOURS: 3
An understanding of the place and potential of leisure for individual Canadians and Canadian society is essential if we are to move beyond the conviction that only labor is to be valued. This course introduces students to concepts including play, sport, recreation and leisure; how they are viewed and valued in our society; and how they relate to health and well-being. The content provides an overview of leisure service delivery, public access to leisure opportunities, variations in leisure involvement due to social and cultural differences, and issues that are important for future leisure service professionals. Students will have the opportunity to increase writing, verbal communication and computer skills, and learn how to use the library effectively. Participation in a professional conference is a component of the learning experience of this course. The students are required to participate in an Orientation to the recreation program that will provide the environment that will create a learning community for the next three to four years of their education experience. Students are also required to join a recreation professional group while enrolled in this course.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 2127 Leisure Theory
CREDIT HOURS: 3
This course will provide an introductory analysis of leisure in modern society from sociological, psychological, and social psychological perspectives. The role of leisure in the everyday life of individuals will be discussed in terms of social relationships, life stage, gender, the family, work, attitudes and motivations, etc. In addition, since the role and function of leisure is affected by political, economic, and cultural systems, a main-level perspective on leisure will also be provided by focusing on such topics as the influence of modern technology, the commercialization of leisure, the influence of social institutions and of the mass media.
COREQUISITES: IPHE 4900
PREREQUISITES: SOSA 1002.03 and 1003.03 or SOSA 1200.06 or PSYO 1011.03, 1021.03, or 1031.03 and PSYO 1012.03 or 1022.03; LEIS 1127.03
RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 2130 Foundations and Concepts of Therapeutic Recreation
CREDIT HOURS: 3
This course provides the conceptual foundation for the study of therapeutic recreation. Philosophical, conceptual and historical issues related to the delivery of therapeutic recreation services will be discussed in terms of health and health promotion. The course will also involve the examination of professional issues such as standards of practice, ethics, quality assurance, etc.; the scope of therapeutic recreation service delivery; and service delivery settings. Finally, students will be exposed to the variety of therapeutic recreation settings through site visits and observation. Students are required to join a therapeutic recreation professional group or provide the instructor with documentation on their current membership in a therapeutic recreation organization.
COREQUISITES: IPHE 4900.00
PREREQUISITES: LEIS 1127.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 2296 Leadership and Group Dynamics
CREDIT HOURS: 3
This course will focus primarily on the function of leadership and the process of small group dynamics, as applied to recreation and health education service delivery. Emphasis will be placed on the achievement of individual and group goals in health related settings. In addition, effective leadership of individuals and groups within a community, through direct experience and observation, will be emphasized.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03 or HPRO 1195.03
RESTRICTIONS: Restricted to Health Promotion and Recreation students.
EXCLUSIONS: LEIS 3296.03
FORMATS: Lecture | Discussion

LEIS 2361 Program Planning
CREDIT HOURS: 3
Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health education. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This course reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03
CROSSLISTED: HPRO/HEED 2361.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation), Bachelor of Science (Recreation)/Bachelor of Management and Bachelor of Science (Health Promotion) students or with permission of the instructor.
FORMATS: Lecture | Discussion

LEIS 2384 Leisure and Individuals with Disabilities
CREDIT HOURS: 3
An introduction of current philosophy, issues and practices relating to leisure opportunities for persons who, due to physical, mental, and social conditions, have difficulty gaining access to community services. An analysis of leisure behaviours, attitudes and attitudinal development, barriers, and needs of individuals with various disabilities and members of the community will be provided throughout the course. Issues related to mainstreaming, integration and normalization will be themes throughout the course. A practicum is required in order to facilitate hands-on experience with individuals with disabilities.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03
RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 3127 Leisure Education
CREDIT HOURS: 3
This course is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals with disabilities. While the focus of the course is on leisure education, the overarching concepts of health, wellness, and health promotion will be incorporated into the course material. The course will address the following three broad areas: a) concepts and models of leisure education, b) content related to specific skills required for leisure involvement [leisure awareness, values clarification, social skills development, friendship development, stress management, assertiveness, leisure resources, decision making, etc.] and c) instructional and interactional techniques used in leisure education. In addition, students will have the opportunity to plan and facilitate leisure education experiences in class.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03; LEIS 2361.03; LEIS 2384.03
RESTRICTIONS: Restricted to Recreation students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Lab | Discussion
LAB HOURS PER WEEK: 3

LEIS 3360 Analysis of Leisure Service Delivery Settings
CREDIT HOURS: 3
Reflections on the twentieth century reveal tremendous changes in the way people live. These changes have impacted work, family structure, and mental and physical well-being, and signal the importance and need of opportunities for leisure pursuits. Leisure is one of life's greatest gifts — an important dimension influencing the quality of an individual's life. Similarly, leisure enhances the quality of life available to a society or culture. The growth of the leisure industry reflects the ever increasing value that individuals are placing upon leisure in their lives. It is essential for the student of recreation management to know and understand that leisure delivery and life satisfaction are dependent upon effective organizational analysis and the quality of services provided. This course presents historical and contemporary concepts of the diverse types of agencies and institutions providing leisure services in North America. It will review the nature and effectiveness of services provided by various leisure service agencies in the private, private non-profit, commercial recreation, travel and tourism sectors of the leisure industry. It will seek to (a) evaluate the political, social, physical and economic impact on each of the sectors, (b) determine ways of assessing the assurance of quality service delivery, and (c) find ways of motivating improvements in the identifying and meeting of consumers' leisure needs, today and in the future. Consideration is also given to organizational structure and governance within leisure service settings, and the incorporation of the “benefits based approach” to leisure service delivery.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS/HPRO/HEED 2361.03, MGMT 2801.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 3362 Financial Management and Fundraising
CREDIT HOURS: 3
This course builds on previous functions of management such as program planning and analysis of leisure services by further focusing on the budgeting process, cost analysis, pricing of services, resource inventory and management, fundraising and grant writing. Strategic analysis of economic trends in understanding financial management, purchasing, inventory control, fiscal policy and accountability, and financial auditing will also be examined. Course content will be presented through lecture, case study analysis, budget, and grant proposal development. Such information will be applicable to management of public, private, commercial and/or community non-governmental recreation, health, and/or sport organizations.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS/HPRO/HEED 2361.03, MGMT 2101.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.
EXCLUSIONS: LEIS 4361.03

LEIS 3370 Recreation Facility Design and Operations Management
CREDIT HOURS: 3
This course will emphasize the management functions of planning, organizing, and coordinating as it looks at the role of the manager in effectively managing recreation

physical facilities and environmental resources. The course will review the new and emerging trends in facility design and cover the management process in the planning, and construction of indoor and outdoor recreation facilities, parks, playgrounds and pools. The course content will also focus on the core operational management competencies essential for the management of recreational facilities: namely, organizational structure and staffing; facility operations and maintenance, control and security; risk management and litigation; equipment procuring and inventory control.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2361.03/HPRO 2361.03/HEED 2361.03, MGMT 1601.03, MGMT 2303.03 and MGMT 2304.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture

LEIS 3426 Therapeutic Recreation Service Delivery
CREDIT HOURS: 3
Issues related to the delivery of therapeutic recreation services will be the focus of this course. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation. The final component of this course will be the opportunity to work with individuals with disabilities in a program planning context.
COREQUISITES: IPHE 4900.00
PREREQUISITES: LEIS 1127.03, LEIS 2130.03, LEIS/HPRO/HEED 2361.03, LEIS 2384.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 3492 Counselling for Health and Well-being
CREDIT HOURS: 3
This course is designed to provide students with the knowledge and skills required to utilize effective communication and helping behaviours which are designed to facilitate change in the leisure behaviour of individuals with disabilities or other health problems. While the focus of the course is on facilitation techniques, the overarching concepts of quality of life, health, and health promotion will be incorporated into the course material. The course will address four broad topical areas: a) concepts of quality of life, health, health promotion, and lifestyle; b) concepts and models of helping; c) communication skills and therapeutic techniques; d) lifestyles issues related to health and well-being. Finally, students will have the opportunity to practice counselling techniques through role playing and simulations.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Faculty of Health students.
FORMATS: Lecture | Lab | Discussion
LAB HOURS PER WEEK: 3

LEIS 4101 Advanced Research Methods
CREDIT HOURS: 3
The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific recreation/leisure studies topic. Theories and methodologies will be discussed with relevance to leisure studies. The students will develop an honours thesis and ethics proposal as part of the course requirements.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, HAHP 3100.03
RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4102 Honours Thesis
CREDIT HOURS: 3
The purpose of this course is to develop research skills by conducting an independent research project and writing a formal research report based on the findings. Students will demonstrate their knowledge and ability in research methodologies, data collection, analysis, and formal academic writing.
COREQUISITES: IPHE 4900
PREREQUISITES: HAHP 3100.03 and LEIS 4101.03 with a grade of B or better in each, and ethical approval by August 1.
RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4362 Recreation Entrepreneurship and Special Events
CREDIT HOURS: 3
Through lecture, discussion, and case study analysis, this course will provide the student with advanced insight and applied experience in selective people-based management concepts and functions of directing, coordinating and staffing that will be useful to the potential or practicing manager in sport administration, community, or commercial leisure and health service delivery agencies. In particular, a focus will be directed towards special event management and planning, and marketing and business plan development.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS/HPRO/HEED 2361.03, LEIS 3362.03, MGMT 2303.03, MGMT 2401.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.
EXCLUSIONS: LEIS 3361.03

LEIS 4365 Administrative Concepts in Therapeutic Recreation
CREDIT HOURS: 3
This course emphasizes the essentials of management that are pertinent to being an effective practicing therapeutic recreation manager in either a clinical setting, a healthcare facility, or a community-based leisure or health service setting. After introducing the student to the theory and discipline of management and related ethical perspectives, the course will examine selective administrative functions in each of the areas of (a) *Operational Management*, i.e. budgeting and financial management, sources of revenue generation and grant writing, decision making, problem solving and conflict management, etc.; (b) *Human Services Management*, i.e., staff recruiting and selection, staff training and development, effective communication, motivation, performance appraisal, and volunteer management, etc. (C) *Consumer Management*, i.e., quality service management, practitioner performance, legal liability and risk management, etc.
COREQUISITES: IPHE 4900

PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 4482 Therapeutic Recreation Specialization: Youth at Risk
CREDIT HOURS: 3
Youth as a sector of society and as a stage in human development is of great significance in the study of leisure. Particularly relevant is the issue of unemployment and underemployment which has created a number of problems such as low self-worth, alcohol abuse, teenage suicide, etc. There are programs being developed to address these problems, many of which are experientially based, e.g., Outward Bound, study service, service learning and national service. This course will study the phenomenon of youth development in the light of experiential educational approaches. During the course there will be an expectation that the students will meet and interact with a variety of youth. A practicum is included.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03
RESTRICTIONS: Bachelor of Science (Recreation) students in their final two years of study.
FORMATS: Lecture | Discussion

LEIS 4512 Therapeutic Recreation Specialization: Physical and Developmental Disabilities
CREDIT HOURS: 3
This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to clients with physical and developmental disabilities. Initially, issues related to etiology, characteristics, and treatment needs of clients with various physical and developmental disabilities will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to physical and developmental disabilities will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 4540 Therapeutic Recreation Specialization: Addiction and Mental Illness
CREDIT HOURS: 3
This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to clients with mental health problems and/or addiction. Initially, issues related to etiology, characteristics, and treatment needs of clients with addiction and mental illness will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to mental illness and addiction will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 4563 Therapeutic Recreation Specialization: Aging and Lifestyle
CREDIT HOURS: 3
This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to older adults. Initially, issues related to theories of aging, characteristics of older adults and pre-retirement planning will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to older adults will be examined, including assessment procedures, program intervention techniques, documentation and efficacy of therapeutic recreation service delivery for this population. Site visits, observations, and simulations will be used to facilitate the application of this material.
COREQUISITES: IPHE 4900
PREREQUISITES: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.
FORMATS: Lecture | Discussion

LEIS 4597 Recreation Management Internship
CREDIT HOURS: 15
This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 16-week internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.
COREQUISITES: IPHE 4900
PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.
RESTRICTIONS: Restricted to Bachelor of Science (Recreation), and Bachelor of Science (Recreation)/Bachelor of Management students in their final term.

LEIS 4598 Therapeutic Recreation Internship
CREDIT HOURS: 15
CALENDAR NOTES: This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 16 week,

35 hours per week internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.
COREQUISITES: IPHE 4900
PREREQUISITES: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.
RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final term.

LEIS 4599 Recreation Internship
CREDIT HOURS: 7.5
COREQUISITES: IPHE 4900

LEIS 4700 Senior Seminar
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to LEIS 4701/LEIS 4702.
COREQUISITES: IPHE 4900
RESTRICTIONS: Restricted to Recreation students in their final year of study
FORMATS: Seminar

LEIS 4701 Senior Seminar
CREDIT HOURS: 3
See LEIS 4700.
COREQUISITES: IPHE 4900

LEIS 4702 Senior Seminar
CREDIT HOURS: 3
See LEIS 4700.
COREQUISITES: IPHE 4900
PREREQUISITES:

LEIS 4800 Independent Study
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to LEIS 4801/LEIS 4802.
CALENDAR NOTES: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
COREQUISITES: IPHE 4900
PREREQUISITES: A GPA of at least 3.00, a "B" grade in an earlier class in the area in which the project will be conducted (where applicable), consent of advisor, consent of faculty. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.
NOTE: Students may take no more than 6 credit hours of independent studies.

LEIS 4801 Directed Study
CREDIT HOURS: 3
See LEIS 4800.
COREQUISITES: IPHE 4900.00

LEIS 4802 Directed Study
CREDIT HOURS: 3
See LEIS 4800.
COREQUISITES: IPHE 4900.00

Course Descriptions - Interdisciplinary Health Studies

HLTH 4040 Health Law for Non-Lawyers
CREDIT HOURS: 3
The objective of this course is to provide the non-law student with an overview of significant legal issues that arise in the healthcare context. The first part of the course covers an introduction to the Canadian legal system, the Canadian healthcare system from a legal perspective, and the nature of legal proceedings. The second part focuses on issues of particular relevance in the provision of health services; these issues may include: practice management; confidentiality and disclosure of information, including whistle blowing; consent to treatment, including issues regarding minors and those lacking capacity; mental health law; and the regulation of drugs. Finally, the third part addresses contemporary issues in health law such as cost containment, issues of care at the end of life, and the impact of human rights legislation on healthcare services and delivery.
RESTRICTIONS: Health Profession students only

Lushman, E.
MacLeod, R.
Mamye, M.
Munroe, A.
Scott, T.
Smith, N.
Sponagle, M.
Williams, J.

Bachelor of Health Science Degree Program

BHSc programs are four-year degree programs that provide integrated courses of study including both theory and practice. There is also a post-diploma offering for practicing professionals. (See section on Post-Diploma)

The School of Health Sciences offers degrees in five professional disciplines:

- BHSc in Diagnostic Medical Ultrasound
- BHSc in Nuclear Medicine Technology
- BHSc in Radiological Technology
- BHSc in Respiratory Therapy
- and BHSc in Medical Laboratory Technology (post diploma only)

Students follow an integrated curriculum that includes core, interdisciplinary and discipline-specific courses. Clinical practica are included in each year of study requiring a full-time commitment in the May-June time period.

In order to accommodate all third year Respiratory Therapy students in required clinical rotations, courses for this group only will begin on August 31, 2019.

Dalhousie University confers a Diploma in Health Science (for Diagnostic Medical Ultrasound, and Respiratory Therapy only) and a Bachelor of Health Science (Specific Discipline) degree. The active programs leading to these credentials are accredited. The University *does not* determine eligibility for certification/ registry exams. Rather, through accreditation, the University ensures that graduates of its programs meet the eligibility criteria set by the professional associations. Diagnostic Medical Ultrasound (General, Cardiac and Vascular), Nuclear Medicine and Radiological Technology are accredited by Accreditation Canada. Respiratory Therapy is accredited by The Council on Accreditation for Respiratory Therapy Education.

For the professions of Diagnostic Medical Ultrasound, and Respiratory Therapy

Students are eligible to write the certification/registry exam upon successful completion of Year 3, when all requirements for a diploma exit have been met. They are eligible even if they choose not to exit with a diploma. Students should check with faculty concerning examination dates.

Following degree completion, students in Diagnostic Medical Ultrasound may be eligible to write certification/registry exams in the specialized areas of cardiac and vascular sonography.

For the professions of Nuclear Medicine Technology and Radiological Technology

Students are eligible to write the CAMRT certification exam upon successful completion of the Bachelor of Health Science degree.

The Professions

Diagnostic Medical Ultrasound

The Diagnostic Medical Sonographer utilizes high frequency sound waves, specialized equipment, and other diagnostic techniques to collect detailed information on the anatomical, physiological and pathological state of the patient. This health professional is able to produce and evaluate ultrasound images and related data that are used by specialized physicians to render a medical diagnosis. Sonographers typically provide technical expertise in abdomen, superficial structures, obstetrics/gynecology, vascular and cardiac applications.

Nuclear Medicine Technology

A nuclear medicine technologist is a health professional responsible for performing diagnostic and therapeutic nuclear medicine procedures. The technologist administers radiopharmaceuticals to the patient most often by way of an intravenous injection while adhering to proper drug preparation techniques, radiation protection guidelines and patient care practices.

The technologist operates a variety of radiation detection equipment, one of which is the gamma camera, in order to provide an assessment of the distribution of the radiopharmaceutical within the patient. By using various computer programs, the technologist analyzes the data to obtain the best information from the study which is then interpreted by a nuclear medicine physician.

Optimum operation of all equipment used in the practice of nuclear medicine is accomplished by the technologist, through the accurate implementation of a quality control program involving the assessment of radiation detection equipment, gamma cameras, and computers.

Radiological Technology

The radiological technologist is a health professional who utilizes radiation to produce images of patient's anatomical structures. The quality of the image is critical as it will assist the physician in the diagnosis/treatment of the disease or injury.

The technologist must be knowledgeable and skilled in a wide variety of procedures as all body systems are imaged. Responsibilities include (but are not limited to) positioning the patient for radiologic procedures, care of the patient, appropriate choice and use of equipment, image manipulation, selection of radiation exposure factors, implementation of radiation protection techniques and critique of the radiograph. Whatever the procedure, the technologist must be adaptable to meet challenges presented by the patient's physical or psychological state.

Respiratory Therapy

A respiratory therapist is a health professional who assists in the diagnosis, treatment and health promotion of patients with cardio-respiratory disorders through therapeutic means. Respiratory therapists provide cardio-pulmonary support, including cardio-pulmonary resuscitation, mechanical ventilation support, administration of medical gases, aerosolized medications, humidity therapy and airway management. The respiratory therapist also performs respiratory assessments of patients, tests and monitors cardio-pulmonary function, assists with the transport of high-risk patients and participates in home care programs.

The therapist plays an important role in the education of patients, families and hospital staff. The therapist is also involved in the maintenance, repair, testing and evaluation of respiratory equipment. The therapist must be able to provide competent assistance in cardio-pulmonary research.

Pre-Enrolment and Clinical Requirements

Immunization (current detailed version of policy can be found at www.dal.ca/health (current students, Policies and Procedures, clinical placement-immunization forms)

1. It is a regulation of the Faculty of Health Professions and affiliated health care agencies that all students must be immunized. This has been instituted to protect patients as well as to protect students and employees.
2. Upon entering the program students must show certification for current immune status against tetanus, diphtheria, measles, mumps, rubella, rubeola and varicella (chickenpox). Evidence of tuberculin testing (Mantoux – two step method) must also be shown. Annual Mantoux testing is also required. It is recommended that students be immunized for influenza on an annual basis.
3. The Hepatitis-B vaccination is required for all students. It is a series of three injections: the second and third shots are administered one month and six months after the first injection. The vaccination lasts for several years. This cost (approximately $105, subject to change) must be paid by the student.

Criminal Record Check

- All BHSc students must provide a criminal record check and a vulnerable sector survey (obtained within the previous six months) prior to attendance at any NSHA or IWK facility. An additional check may be required depending on clinical site requirements for subsequent placements.

BLS-HCP Certification

- All BHSc students must present proof of current certification in BLS at a Healthcare Provider level prior to entry into the program. Students are required to recertify on an annual basis.

First Aid Certification

- All BHSc students must show proof of current Standard First Aid certification prior to entry into the program. In order to be eligible for clinical practicum, Standard First Aid must not expire prior to July 15 of each academic year.

N95 Mask Fit Testing

- All BHSc students must be mask fit tested for a particulate respirator according to clinical site requirements. This must be recertified every two years, and may need to be recertified annually, depending on the mask in use at your clinical site.

Additional Costs

There are additional costs associated with all professional streams of the BHSc program, including but not limited to Standard First Aid and BLS-HCP certification, immunization, uniforms, membership in professional associations, equipment, fees for writing registry exams, N95 mask-fit testing, criminal record check, and travel to clinical sites. These additional costs are the responsibility of the student. A detailed list is available from the School.

Intellectual, Emotional and Physical Demands

The health professions included in the Bachelor of Health Science program are intellectually, emotionally and physically demanding. It is important that students become familiar with the profession before entering the program so that they are able to function at an acceptable standard. It is common to have to lift and move heavy equipment, position patients, wear lead aprons, manipulate valves and knobs on equipment, remain on your feet for extended periods of time and move frequently from one clinical area to another. It is also common to have to view information displayed on computer monitors or on slides under a microscope. It might be necessary to distinguish fine gradations of color and to respond to alarms and buzzers. There may be emergency situations that arise in the health care setting that require students to respond immediately. Shift work may be required, including rotating 12-hour shifts. Latex gloves are in wide use and chemicals are used in a variety of settings. Refer to http://www.dal.cal/shs (Admissions) for Statements of Fitness required for each profession. Students who have concerns about fitness should contact the School for further information.

Program Outline

Four-Year Entry-Level Program

The curriculum is comprised of four years of full-time study with each year including core, interdisciplinary, discipline-specific, health professional and basic science courses.

Fourth-year BHSc students must meet the School's clinical skills maintenance requirements and complete the "Record of Clinical Practice for Year 4" each term, until the 4th-year classwork is completed. Students should contact the School for full details.

Diagnostic Medical Ultrasound

Year 1

- DMUT 1000.03: Fundamentals of Sonography I
- DMUT 1010.03: Principles and Instrumentation of Diagnostic Medical Ultrasound I
- DMUT 1020.03: Fundamentals of Sonography II
- DMUT 1500.03: Clinical Practicum I in Diagnostic Medical Ultrasound
- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Imaging
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II

Year 2

- DMUT 2000.03: Sonography of the Abdomen/Superficial Structures I
- DMUT 2010.03: Sonography in Gynecology
- DMUT 2020.03: Principles and Instrumentation of Diagnostic Medical Ultrasound II
- DMUT 2030.03: Sonography of the Abdomen/Superficial Structures II
- DMUT 2040.03: Sonography in Obstetrics I
- DMUT 2500.03: Clinical Practicum II in Diagnostic Medical Ultrasound
- HSCE 2000.03: Health Care Ethics
- HSCE 2040.03: Pathophysiology for Health Sciences

- HSCE 3000.03: Culture, Diversity and Health
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Open elective (3 credit hours)

Year 3

- DMUT 3000.03: Sonography in Obstetrics II
- DMUT 3010.03: Sonography of the Abdomen/Superficial Structures III
- DMUT 3200.03: Abdominal Imaging
- DMUT 3210.03: Obstetrical Imaging
- DMUT 3220.03: Gynecological Imaging
- DMUT 3230.03: Superficial Structure Imaging
- DMUT 3240.03: Application of Ultrasound Instrumentation
- DMUT 3500.03: Clinical Practicum III in Diagnostic Medical Ultrasound
- HESA 4000.03: Canadian Healthcare Delivery System
- HSCE 3010.03: Introduction to Health Research
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- Open elective (three credit hours or HLTH 4040.03 if enrolled in MRIT certificate program)
- MRIT 4100.03 (if enrolled in MRIT certificate program)

Year 4
Required:

- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4030.03: Leadership in Health Care
- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- Students must select 12 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
  ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives).
  ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.
- Open elective (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- DMUT 4000.12: Specialty Practice I/Specialty Practice II
- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications

Nuclear Medicine Technology

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- HSCE 2020.03: Radiation Physics
- HSCE 2030.03: Radiation Biology and Protection
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio

- NUMT 1000.03: Fundamentals of Nuclear Medicine
- NUMT 1020.03: Nuclear Medicine Clinical Procedures I
- NUMT 1500.03: Nuclear Medicine Clinical Practicum I
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 2040.03: Pathophysiology for Health Sciences
- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- HSCE 3010.03: Introduction to Health Research
- HESA 4000.03: Canadian Healthcare Delivery System
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- NUMT 1010.03: Nuclear Medicine Instrumentation I
- NUMT 2000.03: Radiopharmacy
- NUMT 2010.03: Nuclear Medicine Clinical Procedures II
- NUMT 2020.03: Nuclear Medicine Clinical Procedures III
- NUMT 2500.03: Nuclear Medicine Practicum II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

Year 3

- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3020.03: Computed Tomography Instrumentation and Applications
- HSCE 4030.03: Leadership in Health Care
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- MRIT 4100.03 (if enrolled in MRIT certificate program)
- NUMT 3020.03: Positron Emission Tomography
- NUMT 3200.03: Radiopharmacy
- NUMT 3220.03: General Imaging I
- NUMT 3222.03: General Imaging II
- NUMT 3230.03: Cardiac Imaging
- NUMT 3500.03: Clinical Practicum in Nuclear Medicine Technology III
- Open elective (three credit hours)

Year 4
Required:

- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- NUMT 3210.03: Non-Imaging Procedures
- NUMT 3240.03: Pediatric Imaging
- NUMT 4210.03: Professional Practice in Nuclear Medicine Technology I
- NUMT 4220.03: Professional Practice in Nuclear Medicine Technology II
- Students must select 6 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
  ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives).
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- NUMT 4000.12: Special Practice Nuclear Medicine
- Open elective (three credit hours)

Radiological Technology

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- PHYC 1310.03: Physics In and Around You I
- PHYC 1320.03: Physics In and Around You II
- RADT 1000.03: Skeletal Radiography
- RADT 1010.03: Imaging Fundamentals
- RADT 1020.03: Skeletal and Systems Radiography
- Open elective (three credit hours)
- RADT 1500.03: Clinical Practicum I in Radiological Technology

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 2020.03: Radiation Physics
- HSCE 2030.03: Radiation Biology and Protection
- HSCE 2040.03: Pathophysiology for Health Sciences
- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Medical Imaging
- HSCE 3010.03: Introduction to Health Research
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 2000.03: Advanced Skeletal & Systems Radiography
- RADT 2020.03: Adaption Radiography
- RADT 2010.03: Imaging Equipment
- RADT 2500.03: Clinical Practicum II in Radiological Technology
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

Year 3

- HESA 4000.03: Canadian Healthcare Delivery System
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3020.03: Computed Tomography Instrumentation and Applications
- HSCE 4030.03: Leadership in Health Care
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 3000.03: Applied Pathology in Radiological Technology
- RADT 3210.03: CT and Interventional Imaging
- RADT 3220.03: Fluoroscopic Imaging and Special Procedures
- RADT 3240.06: General/Adaption Radiography
- RADT 3500.03: Clinical Practicum III
- MRIT 4100.03 (if enrolled in MRIT certificate program)
- open elective (3 credit hours)

Year 4
Required:

- HLTH 4040.03: Health Law for Non-Lawyers

- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RADT 4200.03: Pediatric Radiology
- RADT 4220.03: Professional Practice in Radiological Technology
- In year 4 of the BHSc, students must select 9 credit hours from the Faculty of Health. These courses can be any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
  ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives).
  * Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRI certificate:

Required:

- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- RADT 4000.12: Specialty Practice I
- Faculty of Health Professions (FHP) Electives (3 credit hours)*

* some courses may require the approval of the applicable department

Respiratory Therapy

Year 1

- HSCE 1000.03: Foundations of Health Care Practice
- HSCE 1010.03: Clinical Skills for Health Sciences
- HSCE 1020.03: Human Anatomy and Physiology I
- HSCE 1030.03: Human Anatomy and Physiology II
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 1000.03: Respiratory Therapy Instrumentation and Techniques
- RSPT 1020.03: Respiratory Therapy Clinical Assessment and Techniques
- RSPT 1030.03: Cardiopulmonary Physiology I
- RSPT 1500.03: Clinical Practicum I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- Open elective (six credit hours)

Year 2

- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3010.03: Introduction to Health Research
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 2000.03: Principles of Mechanical Ventilation
- RSPT 2020.03: Application of Mechanical Ventilation
- RSPT 2030.03: Cardiopulmonary Physiology II
- RSPT 2050.03: Health Practice for Respiratory Therapy
- RSPT 2063.03: Respiratory Disease & Therapeutics I
- RSPT 2065.03: Respiratory Disease & Therapeutics II
- RSPT 2070.03: Human Pregnancy and Fetal/Newborn Development
- RSPT 2500.03: Clinical Practicum II

Year 3

- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- RSPT 3000X/Y.06: Anesthesia Instrumentation and Clinical Techniques
- RSPT 3010X/Y.06: Neonatal and Pediatric Therapeutics
- RSPT 3020X/Y.06: Cardiac and Pulmonary Diagnostics
- RSPT 3230X/Y.06: Critical Care Instrumentation and Clinical Techniques
- RSPT 3250X/Y.06: Health Practice
- RSPT 3500.03: Clinical Practicum III

Note: Fall term start date for RSPT year three is August 31, 2019.

Year 4
Required:

- HESA 4000.03: Canadian Healthcare Delivery System
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4030.03: Leadership in Health Care
- HSCE 4200.03: Foundations in Clinical & Professional Education
- HSCE 4220.03: Critical Research Appraisal and Practices
- IPHE 4900.00 (section 3): Interprofessional Health Education Portfolio
- In year 4 of the BHSc, students must select 9 credit hours from the Faculty of Health. These courses can be of any Faculty of Health course, which may or may not include a discipline-specific specialty practice. A Suggested Faculty of Health Electives list will be provided to the student by their academic advisor.
  ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives).
  ** Note - students who take all 4 DISM courses receive an additional Disabilty Management Certificate along with their BHSc degree.
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

A note about Open Electives: Open electives in both the BHSc and BHSc-Post Diploma programs can be any Dalhousie course at any level, or any course that Dalhousie accepts as a Transfer Credit.
** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore a maximum of 3 additional HESA electives are allowed).
** Note - student who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

BHSc Degree Completion Program

This program requires 30 credit hours of university study. It is available only to students who have successfully completed the Dalhousie diploma portion of the BHSc degree program in the professional stream for which you are applying.

For Admission Requirements see Admission Requirements under Faculty of Health, School of Health Sciences (BHSc Degree Completion Program).

Post Diploma Program

The School of Health Sciences offers a post diploma program leading to a Bachelor of Health Science in any of: Diagnostic Medical Ultrasound, Medical Laboratory Technology, Nuclear Medicine Technology, Radiological Technology and Respiratory Therapy. The program has been developed to meet the needs of practicing technologists, sonographers and respiratory therapists who have expressed an interest in the opportunity to complete a baccalaureate degree as a means of pursuing life long learning and increasing career opportunities.

Through a guided selection process, students will choose courses that contribute to their professional growth and interest. Students will be provided the opportunity to broaden their knowledge and scope of the Canadian health care system as well as to enhance leadership abilities and to equip themselves for participation in a rapidly changing health care environment.

The post-diploma BHSc curriculum is equivalent to two years of full time university study (60 credit hours). Courses may be completed in the sequence best suited for the student; however, attention must be paid to the course pre-requisites. To accommodate the working professional the post diploma program is available on a full time or part-time basis and most of the courses are delivered via Online Web Learning (OWL). There are university regulations concerning the maximum length of time allowed for degree completion. Refer to Academic Regulation 15.2 (Duration of Undergraduate Studies).

Required Courses (30 credit hours)

- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HSCE 1000.03: Introduction to Health Professional Practice
- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3010.03: Introduction to Research Methods

- HSCE 4030.03: Leadership in Healthcare
- HESA 4000.03: Canadian Health Care Delivery
- HSCE 4200.03: Foundations in Clinical and Professional Education
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4220.03: Critical Research Evaluation

Faculty of Health electives (15 credit hours)

- Students may choose 5 electives from the Faculty of Health. The Post-Diploma Advisor will provide a list of suggested courses for Faculty of Health Electives. Consult the academic timetable for details regarding the academic term and course information.
  ** Note - a student can take no more than 3 HESA elective courses in both the Faculty of Health Electives and Open electives combined.
  ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their post diploma degree.

Open elective courses (15 credit hours)*

- Students may choose 5 electives from Dalhousie University. Consult the academic timetable for details regarding the academic term and course information.
  ** Note – a student can take no more than 3 HESA elective courses in both the Faculty of Health Electives and Open electives combined.
  ** Note - a student cannot repeat any courses they completed in their diploma. If a student does take a course that was completed in their diploma it will not be counted towards their health science degree. Consult the Post-Diploma advisor on any questions regarding electives.

* some courses may require the approval of the applicable department/faculty

Additional Options:

There are additional options (such as discipline-specific specialty practice, independent study courses, etc) available. Consult the Post-Diploma Advisor for approvals and information on restrictions."

Certificate in Magnetic Resonance Imaging (MRI)

Certificate in Anaesthesia Assistant has been suspended until further notice.

Certificate in Cardiac Ultrasound

Certificate in Vascular Ultrasound

Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this calendar.

Academic

Workload

The normal workload is 30 credit hours per year during the regular academic session (September - April). In addition, an eight to 10 week clinical practicum worth three credit hours takes place in May - June following Years 1, 2, and 3 of the BHSc program:

Fall Term	15 credit hours
Winter Term	15 credit hours
Spring Term (May-June)	three credit hours

Normally, only a full-time course of studies (30 credit hours during the regular academic year and a three credit-hour practicum in the May-June time period) can be taken in the first three years of the four-year entry-level program. Interruption of studies will only be granted for leave of absence or voluntary withdrawal. The fourth year can be pursued on a part-time basis, subject to Academic Regulation 15.2, which regulates duration of undergraduate studies.

It is the responsibility of each individual student to ensure she/he is enrolled in the courses required to complete the BHSc program of study. Therefore students are expected to meet with their academic advisors to seek counselling in this regard, to ensure that course selections and course load are appropriate, and will not cause difficulties later on in the program.

The BHSc post-diploma program is available on a part time basis.

Permission to carry more than a normal workload

A workload exceeding these credit hours in any given term will be considered an *Overload*.

- Students who wish to take on an overload must have the approval from the School of Health Sciences Academic Regulations Officer. Any student applying for an increased workload (overload) must apply at least four weeks in advance of the start of the semester or year in question.
- In their request, students should include their reasons for seeking an overload and include supporting arguments and evidence, such as their academic record and any other relevant considerations.
- Applications from students who give good reasons for wishing to take an overload will be considered. Such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.

- During Clinical Practicum and/or Clinical Education Courses no additional courses will be permitted without prior approval from the Academic Regulations Officer.
- Such requests require student completion of a Waiver of Academic Regulation Application, available from your academic advisor, or the Registrar's Office.
- Students who exceed the normal workload per academic term without the Academic Regulations Officer's approval, will be required to withdraw from the course.

Attendance at Courses

Regular and punctual attendance at courses is required; students are expected to notify instructors if they are going to miss a course component. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to withdraw from the school.

Grade Requirements

A student must receive a grade of C+ in each course with a course number in the School of Health Sciences (HSCE, DMUT, MDLT, MRIT, NUMT, RADT, RSPT) in order for that course:

- to be counted as a credit towards the Bachelor of Health Science or Diploma in Health Science
- to be considered as a prerequisite for another course

Since most professional courses are prerequisites for more advanced courses and for clinical practica, the student's academic progress will be severely impacted by a failure. Students must seek academic advice.

Any student failing a required course for the second time must withdraw from the School of Health Sciences. Such a failure will be deemed an academic dismissal. See Regulation 20.2 for information on applying for readmission following an academic dismissal.

Students are reminded of Academic Regulations 18, 19.2 and 20.2 governing good standing, probation and academic dismissal.

Grade Point Average

A description of the grade point average (GPA) is found in Regulation 17.1.1 in the Dalhousie Undergraduate Calendar. The grade scale and definitions are found in Regulation 17.1.

Grading of Clinical Courses

Clinical education and specialty practice courses are graded on a letter grade basis.

Students who have been removed from any course due to unsafe or unsatisfactory clinical performance will receive a failing (F) grade.

Supplemental Exams

In courses with a course number in the School of Health Sciences, supplemental privileges may be granted only at the discretion of the course professor to a student with a final grade of FM (Regulation 16.5, Dalhousie Undergraduate Calendar). Each course outline will state the conditions that must be met in order to be eligible. The supplemental may be practical, written or combined practical/written exam at the discretion of the professor. Students who receive a grade of F are ineligible for supplemental privileges and will be required to repeat the course.

The date and time of the supplemental exam will be negotiated between the student and course professor within the following guidelines: For Fall Term courses, the supplemental exam must be completed before the end of the first week of classes of the Winter Term. For Winter Term courses, the supplemental exam must be passed before the student can begin their clinical placement. In no case will a clinical placement be delayed for more than two weeks.

No more than two supplemental exams for courses with course numbers in the School of Health Sciences will be allowed in one year. Only one supplemental exam is allowed per course.

Voluntary Withdrawal

Students who voluntarily withdraw from the School of Health Sciences, having satisfactorily completed courses toward the BHSc (specific discipline) degree, with the intention of returning at a later date are advised that re-acceptance is contingent upon there being an available place.

Leave of Absence

1. Students who apply for a leave of absence (LOA) from their program of study must do so in writing to the School of Health Sciences Academic Regulations Officer. If possible, such applications should be made in advance of the term or year for which a LOA is being requested.
2. A request for Leave of Absence may be for a duration of one term to a maximum of one year in length. Students are eligible for a maximum of one such leave for the duration of their program.
3. Following approval of the application for LOA, the Academic Regulations Officer will notify the following individuals:
   a) The student;
   b) Dalhousie University Registrar's Office;
   c) Students Services office at the School; and
   d) Student's academic advisor
4. Students may apply to return to the program prior to the designated end of the LOA. At the time students return to the program, the LOA is considered ended.
5. At least two to three months prior to returning to the program, students granted LOA will inform the following, in writing, of their intent to resume their studies:
   a) Academic Regulations Officer; and
   b) Student's academic advisor
   Students should also initiate discussion with his/her academic advisor to discuss plans for resumption of courses and required remedial action plan.

6. The Academic Regulations Officer will notify the Dalhousie Registrar's Office and the Student Services office at the School of the student's planned return date to the program.
7. It is important to note that for the duration of a leave of absence, the clock stops on the six year rule for discipline-specific courses, and the 10 year rule for all other courses.
8. No academic credit will be granted towards BHSc course requirements for work completed at another institution during a LOA.
9. If a leave of absence is granted, students must ensure they formally withdraw from courses in accordance with Dalhousie University regulations.
10. Students on approved leave of absence will be considered in abeyance from regular academic programming, and therefore not a student at Dalhousie University, until such time that they reactivate their student status through the Registrar's Office.

Policy on Students at Risk

The School of Health Sciences is committed to providing students every opportunity for success in their program. Although the responsibility lies with the student, processes are in place at the School to identify, and assist students at academic risk.

The School of Health Sciences Students at Risk Policy aims to identify students at risk and recommend a course of academic and/or clinical remediation to ensure students are provided the opportunity to achieve academic and clinical success.

Re-Admission of Academically Dismissed Students Policy

The primary goal of the School of Health Sciences and Dalhousie University is to ensure students are successful in their chosen profession while maintaining integrity of the program. Academic Regulation Section 20.1.3 allows for students who have been academically dismissed to apply for readmission to the University. Decisions on readmission to a program in the School of Health Sciences are made in consultation with the individual stream, clinical coordinator, and the Admissions Committee and will include, but not be limited to, consideration of availability of clinical placements.

Appeal

Students who wish to appeal a decision based on school or university regulations should consult the Academic Regulations Officer or their Advisor concerning the correct procedure. Contact the School main office for complete terms of reference for the Faculty of Health Student Appeals Committee and the application regarding academic appeals.

Clinical Education Components of Health Sciences

Health Sciences education encompasses a broad spectrum of learning experiences that together prepare caring, competent and ethical practitioners able to function in a rapidly changing health care environment. The BHSc program is delivered through an integrated curriculum and students receive clinical education logically sequenced within core, interdisciplinary, discipline-specific, and clinical education courses and clinical practica. Clinical education components enable students to integrate theory with practice, master clinical competencies, develop critical reasoning skills and demonstrate professional behavior in a variety of settings with a diversity of patients.

Successful completion of all clinical components of the program is mandatory. Clinical practica and clinical education courses are required courses in the program of study and it is not possible to exercise the diploma exit option or to receive a BHSc degree without successfully completing these courses. In addition, each of the clinical experiences is a prerequisite for further progress in the program. Course outlines provide specific information about criteria for successful completion and opportunities for remediation.

In preparation for clinical practicum, all students must participate in a workshop dedicated to professional behavior. The specific date is available from the School of Health Sciences.

Three elements of clinical education are:

Clinical Practicum

The program includes three clinical practica scheduled during the May - June time period following Years 1, 2, and 3. The Clinical Practicum is designed to provide students with opportunities to develop the knowledge, skills and professional attitudes necessary to function as competent entry-level practitioners within a variety of settings and with a broad range of patients. Students are assigned to various clinical sites, based on their level within the program, the expected learning outcomes of their professional stream, and the availability of appropriate sites.

Clinical placements will be arranged by the Clinical Coordinator for the School of Health Sciences. Students may be assigned to clinical sites located within the Halifax region, throughout the Atlantic provinces, and in various sites across Canada. All expenses related to clinical placement are the responsibility of the student. Students are scheduled in a clinical setting for eight-to-ten consecutive weeks, and are supervised by preceptors. The normal student/preceptor ratio is one-to-one. Evaluation may include, but is not limited to, assessment of skills competencies, demonstration of professional behaviors, and application of theory to practice. Students monitor their personal and professional growth through introspection and reflection by maintaining journals, recording experiences in skills log books, successfully passing examinations or presenting case studies.

Clinical Education Courses

These courses provide students with an opportunity to gain hands-on experience in a specific area of clinical practice. Scheduling requires full-time rotations in the clinical setting and, depending on the area, may require shift work and/or off-site rotation. Students may be required to travel to a site outside Halifax in order to meet their clinical learning objectives. Preceptors supervise and guide students through this period of study and skills practice. Faculty continue to support students by facilitating seminars/tutorials, conducting assessments, providing constructive feedback and structuring learning experiences to further develop critical reasoning skills. Medical specialists and practitioners may be invited to share their expertise with students. There may be interprofessional learning experiences designed to enhance students' understanding of the team approach to health care. Evaluation methods may include, but are not limited to, a written examination to assess knowledge of subject matter, and practical assessments to confirm that clinical skills and professional behavior are readily applied at the expected level of performance. Clinical Education Courses are taken in Year 3 at all programs. In addition, Clinical Education Courses are a required part of the Year 4 curriculum for students in Nuclear Medicine Technology and Radiological Technology.

Specialty Practice Courses

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the discipline specific program/post diploma advisor.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 section 3.** Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Certificate in Cardiac Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound may complete a 15 credit hour program leading to a Certificate in Cardiac Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements may also complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Cardiac Ultrasound

DMUT 4020.03: Cardiac Ultrasound
DMUT 4000.12: Specialty Practice (Cardiac Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Cardiac Ultrasound. To enrol, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Certificate in Magnetic Resonance Imaging

Entry level students in their fourth year or School of Health Sciences Alumni in Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology may elect to complete a 27 credit hour Magnetic Resonance Imaging (MRI) Certificate. Entry level students who pursue the MRI certificate will complete courses/credit hours in addition to their normal degree requirements. (Entry level students in NUMT and RADT will complete 12 credit hours beyond the degree requirement and DMUT students will complete three credit hours beyond the degree requirement.)

The 27 credit hour certificate program requires successful completion of:

- HSCE 2050.03: Cross Sectional Anatomy for Multimodality Imaging
- MRIT 4100.03: MRI Physics
- MRIT 4110.03: Advanced MRI Physics

- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- DMUT 4000.12, NUMT 4000.12, or RADT 4000.12: Specialty Practice in MRI

Clinical Requirements

Clinical site criteria must be met as a requirement of admission. Students enrolled in this program must meet School pre-enrollment and clinical requirements.

Information

Upon approval from the MRI Advisor/Admissions committee, students must enrol in the Certificate in Magnetic Resonance Imaging. To enrol, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate). To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Please contact the School of Health Sciences' MRI advisor for more information regarding the MRI certificate program.

Certificate in Vascular Ultrasound
Fourth-year and post-diploma students in Diagnostic Medical Ultrasound may complete a 15 credit hour program leading to a Certificate in Vascular Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements may also complete the Certificate as a stand-alone credential. The 15 credit hour certificate requires successful completion of the following Dalhousie courses:

Certificate in Vascular Ultrasound
DMUT 4010.03: Vascular Ultrasound
DMUT 4000.12: Specialty Practice (Vascular Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Upon approval from the DMUT Advisor, students must enrol in the Certificate in Vascular Ultrasound. To enrol, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate per the timelines determined by the Registrar's Office.

Contact the School for further details.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

DCYT Diagnostic Cytology - Course Descriptions

DMUT 1000 Fundamentals of Sonography I
CREDIT HOURS: 3
This course provides a general overview of organs and structures within the abdominopelvic cavity which are fundamental to sonography. It includes concepts of relational sectional anatomy and basic ultrasound scanning principles. Also included is an historical perspective and discussions involving the national Code of Ethics for the profession of Diagnostic Medical Ultrasound.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

DMUT 1010 Principles and Instrumentation of Diagnostic Medical Ultrasound I
CREDIT HOURS: 3
This course provides the student with the basic knowledge of the physical principles of ultrasound. It examines how diagnostic ultrasound works (how it is generated and how it interacts with tissues). Also covered in this course is the instrumentation used to transmit, receive and present echo information and the application of these to the practice of Diagnostic Medical Ultrasound.
COREQUISITES: PHYC 1320.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture

DMUT 1020 Fundamentals of Sonography II
CREDIT HOURS: 3
This course provides a general overview of the normal sonographic appearance of organs and structures of the adbominopelvic cavity which are fundamental to sonography. Where applicable, the sonographic application and normal variants of specific organs and structures within the abdominopelvic cavity are also discussed. Included are reference charts highlighting other common diagnostic tests, normal measurements, and laboratory values associated with each organ and structure of interest.
PREREQUISITES: DMUT 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

DMUT 1500 Clinical Practicum I in Diagnostic Medical Ultrasound
CREDIT HOURS: 3
This clinical practicum introduces students to Diagnostic Medical Ultrasound. Within the Diagnostic Imaging Department, students will develop a knowledge of departmental procedures, an ability to interpret and utilize requisitions and demonstrate proficiency in equipment selection and instrumentation. Students will develop clinical skills in performing abdominal and pelvic ultrasound examinations. Students will apply health professional practice skills when interacting with patients and healthcare professionals.
PREREQUISITES: DMUT 1010.03, DMUT 1020.03, HSCE 1010.03, PHYC 1320.03, HSCE 1020.03, HSCE 1030.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2000 Sonography of the Abdomen/Superficial Structures I
CREDIT HOURS: 3
This is the first of three courses related to abdomen and superficial structures. This course will focus on the pathology of the vascular system, liver, biliary system and the mammary glands. This course will provide further opportunity to develop skills and integrate knowledge from all discipline specific first year courses. The etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities will be examined. Documented ultrasound images with relevant pathology will be challenged, analyzed, and reviewed in a simulated clinical laboratory environment. This simulated environment will further provide an opportunity for students to integrate their knowledge of anatomy and pathology to formulate sonographic scanning strategies.
PREREQUISITES: DMUT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

DMUT 2010 Sonography in Gynecology
CREDIT HOURS: 3
This course focuses on the normal structure, development, and pathologies of the female genitourinary system in the non-gravid state. Sonographic scanning techniques, presentation and documentation of normal and abnormal gynecological ultrasound examinations are covered. Critical evaluation of uterine and ovarian pathologies and sonographic characteristics associated with these pathologies will be fully explored.
PREREQUISITES: DMUT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture

DMUT 2020 Principles and Instrumentation of Diagnostic Medical Ultrasound II
CREDIT HOURS: 3
This course builds on knowledge and experience gained in DMUT 1010. This course provides the student with principles and instrumentation of continuous-wave/ pulsed-wave Doppler spectral analysis and color-flow imaging. Imaging artifacts, quality assurance, and bioeffects/safety are investigated thoroughly. Application of this knowledge and the development of skills and competence needed in the clinical practice of Diagnostic Medical Ultrasound will be included in this course.
PREREQUISITES: DMUT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture

DMUT 2030 Sonography of the Abdomen/ Superficial Structures II
CREDIT HOURS: 3
This is the second of three courses related to Abdomen and Superficial Structures. The course will focus on the pathology of the: pancreas, adrenals, retroperitoneum, lymphatic system, urinary tract, thyroid and parathyroid glands. Etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities related to these body systems will be examined. Students will be challenged to analyze, formulate sonographic scanning strategies, and diagnose appropriately relevant pathology viewed in a hospital clinical environment. The course will provide students with the opportunity to integrate skills and concepts learned in previous courses and continue development of professional skills in Diagnostic Medical Ultrasound.
PREREQUISITES: DMUT 2000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

DMUT 2040 Sonography in Obstetrics I
CREDIT HOURS: 3
This course provides the learner with a comprehensive study of normal and abnormal first trimester and normal second trimester obstetrical ultrasound examinations. Critical evaluation of first trimester pregnancy complications and the sonographic appearances in a second trimester obstetrical patient essential to continuing study in DMUT 3000. Multiple gestations, infertility and assisted reproductive technologies are also explored in detail. The study of embryology is an important focus of this course and the sonographic appearance associated with the growing fetus. Ethical issues related to obstetrical ultrasound will be examined and discussed.

PREREQUISITES: DMUT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

DMUT 2500 Clinical Practicum II in Diagnostic Medical Ultrasound
CREDIT HOURS: 3
Practicum II provides students with the opportunity to continue skill development in abdominal and pelvic ultrasound examinations including the recognition, identification and documentation of pathologies. In addition, students will develop clinical skills in performing first and second trimester obstetrical ultrasound examinations. This clinical practicum requires the student to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation arrangements.
PREREQUISITES: DMUT 2010.03, DMUT 2020.03, DMUT 2030.03, HSCE 2040.03, DMUT 2040.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3000 Sonography in Obstetrics II
CREDIT HOURS: 3
This course provides a comprehensive study of the normal and abnormal second and third trimester ultrasound examinations. Critical evaluation of fetal pathologies and sonographic characteristics associated with these pathologies will be fully explored. Maternal complications associated with pregnancy and antenatal testing will also be covered.
PREREQUISITES: DMUT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

DMUT 3010 Sonography of Abdomen/ Superficial Structures III
CREDIT HOURS: 3
The third and final course DMUT 3010, Abdomen and Superficial Structures III, focuses on abdominal pathology of the gastrointestinal tract and organs of the male reproductive system, noncardiac chest, abdominal Doppler, musculoskeletal, extracranial cerebral vascular and lower extremity venous ultrasound. This course will prepare the student for a more advanced level of study and clinical practice in ultrasound interventional biopsy, aspiration techniques and procedures. An integration of previously acquired knowledge and clinical skills will be applied to a more advanced level of theoretical and clinical application using Doppler ultrasound technology.
PREREQUISITES: DMUT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

DMUT 3200 Abdominal Imaging
CREDIT HOURS: 3
This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of the abdomen under indirect supervision. This experience will enhance the student’s ability to make independent decisions and to critically evaluate images of abdominal organs and related structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare team professionals while maintaining accepted professional practice standards in an ultrasound environment.
PREREQUISITES: DMUT 3010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3210 Obstetrical Imaging
CREDIT HOURS: 3
Building on experience developed in Clinical Practicum II and knowledge and concepts learned in Sonography in Obstetrics and Gynecology I and II, this obstetrical ultrasound clinical education course enhances the student's ability to recognize, identify and document normal and abnormal obstetrical ultrasound examinations. This course provides the opportunity to reflect on their own clinical and professional skills in dealing with the obstetrical patient. Assuming responsibility for their actions and decisions in the clinical setting, the student becomes competent in performing obstetrical sonographic examinations.
PREREQUISITES: DMUT 3000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3220 Gynecological Imaging
CREDIT HOURS: 3
This clinical course allows the student to integrate knowledge, concepts and skills developed in previous courses and enhance their independent decision making skills. The expectation is for the student to achieve competency in recognizing, identifying, and documenting normal and abnormal sonographic images of the female pelvis under indirect supervision. The student will experientially reflect on their own skills and assume responsibility for their actions and decisions in the clinical setting.
PREREQUISITES: DMUT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3230 Superficial Structure Imaging
CREDIT HOURS: 3
This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses . The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of superficial structures under indirect supervision. This clinical experience will enhance the student’s ability to make independent decisions and to critically evaluate images of superficial structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare professionals while maintaining accepted professional practice standards in an ultrasound environment.
PREREQUISITES: DMUT 3010.03.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3240 Application of Ultrasound Instrumentation
CREDIT HOURS: 3
This clinical education course further expands the student's ability to analyze and process data. Integrating knowledge, concepts and skills developed in previous courses, the student will enhance their independent decision making skills. The expectation is for the student to achieve competency in their utilization of ultrasound instrumentation in a variety of ultrasound examinations. The student will experientially reflect on their own skills in their application of theory to practice.
PREREQUISITES: DMUT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3500 Clinical Practicum III in Diagnostic Medical Ultrasound
CREDIT HOURS: 3
Practicum III provides students with the clinical exposure to various specialties which include: related imaging modalities, vascular technology, echocardiography and fetal assessment (biophysicals, amniocentesis etc.). This clinical practicum will provide the student with the opportunity to correlate ultrasound imaging with other imaging specialties. This clinical practicum also allows the student to gain clinical exposure to specialty practice areas which they may choose to pursue in the fourth year.
PREREQUISITES: Successful completion of all other third year DMUT courses
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 4000 Specialty Practice I/Specialty Practice II
CREDIT HOURS: 12
NOTE: Course Details listed here also apply to DMUT 4100.
PREREQUISITES: DMUT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in DMUT. Enrolment may be limited due to clinical site availability.

DMUT 4010 Vascular Ultrasound
CREDIT HOURS: 3
This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and DMUT 3010 (Sonography of the Abdomen/Superficial Structures III). The student will review hemodynamics, physics and instrumentation, spectral analysis, colorflow imaging and the use of contrast agents in vascular sonography. Applications in vascular sonography and technology to include, examinations of the cerebral vessels, arteries and veins of the extremities and abdominal vessels will be covered.
PREREQUISITES: DMUT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor
FORMATS: Online Delivery

DMUT 4020 Cardiac Ultrasound
CREDIT HOURS: 3
This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and HSCE 2040 (Pathophysiology for Health Sciences). This course provides a comprehensive study of the normal and abnormal cardiac ultrasound examinations. The student will review anatomy and physiology and hemodynamics of the heart and relate theory to echocardiography. General principles of cardiac ultrasound, normal echo examination techniques and standard views will be covered including: two-dimensional, M-mode and Doppler. Clinical indications for echocardiography examinations will be covered as well as congenital and acquired cardiac disease processes evaluated with echocardiography.
PREREQUISITES: DMUT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor
FORMATS: Online Delivery

DMUT 4100 Specialty Practice Diag Med Ultras II
CREDIT HOURS: 6
See DMUT 4000.
PREREQUISITES: DMUT 3500.03

HSCE Health Sciences Education - Course Descriptions

HSCE 1000 Foundations of Health Care Practice
CREDIT HOURS: 3
This course introduces students in the five BHSc professions to the Canadian Health Care System and the role of the health professional within that system. The course compares the Canadian system to systems from other countries and covers diverse healthcare models such as primary care, palliative care, long term care, etc. The role of the health professional is explored through the study of professionalism, scope of practice, and risk management in an interprofessional context. The course will allow students the opportunity to develop/improve essential skills to help them study and work in a multi-disciplinary system including critical thinking, writing skills, communication and teamwork.
RESTRICTIONS: Restricted to Bachelor of Health Science students or by permission of instructor
FORMATS: Lecture

HSCE 1010 Clinical Skills for Health Sciences
CREDIT HOURS: 3
This course will further the students' understanding of working within a healthcare environment as they learn the skills required to provide patient-centered care. The course provides academic knowledge and laboratory experiences for students to develop clinical skills essential in all five professional streams of the BHSc program.
PREREQUISITES: HSCE 1000.03 and one discipline specific course
RESTRICTIONS: Restricted to Bachelor of Health Science students
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

HSCE 1020 Human Anatomy and Physiology I
CREDIT HOURS: 3
This course, along with HSCE 1030, is designed to provide the student with an understanding of the cellular, organ, and system levels of organization of the human body. It includes a comprehensive study of facts pertaining to the covering, support and movement of the human body. Topics covered will include: organization of the body, the integumentary, skeletal and muscular systems.
RESTRICTIONS: None, however priority is given to Health Sciences students.
EXCLUSIONS: ANAT 1010, ANAT 1020, PHYL 1000, PHYL 1010
FORMATS: Online Delivery

HSCE 1030 Human Anatomy and Physiology II
CREDIT HOURS: 3
This course studies the systems that serve in maintaining the human body and ensuring its continuity. Topics covered will include: cardiovascular, immune, respiratory, digestive, urinary and reproductive systems. This course will provide students with an appreciation of the complexities of the human function and form, and set the stage for understanding the integration of organ system functions.
PREREQUISITES: HSCE 1020.03
RESTRICTIONS: None, however priority is given to Health Sciences students
EXCLUSIONS: ANAT 1010, ANAT 1020, PHYL 1000, PHYL 1010
FORMATS: Online Delivery

HSCE 2000 Health Care Ethics
CREDIT HOURS: 3
This is an introductory course in healthcare ethics. Students will be provided with an overview of moral theory and principles; a chance to reflect upon and discuss contemporary ethical issues in healthcare; and an opportunity to acquire the conceptual and practical tools required to make competent ethical decisions in their own practice. Teaching methods will include lecture, group instruction and case analysis.
RESTRICTIONS: None, however priority is given to Health Sciences students
FORMATS: Online Delivery

HSCE 2020 Radiation Physics
CREDIT HOURS: 3
The purpose of this course is to build on the basic principles of the science of radiation physics with a focus on the concepts that directly apply to the medical radiation fields of nuclear medicine technology and radiological technology. Topics of study include atomic physics, radioactivity and electromagnetic radiation. The course will explain radiation interaction with matter in relation to attenuation, absorption and dosimetry. X-ray production, as well as fission and reactor production of radioactive materials used in nuclear medicine will be investigated. Students will be provided an opportunity to investigate the newest modalities connected with their fields.
COREQUISITES: PHYC 1300.03 or Equivalent
RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science; students in the professional streams of Nuclear Medicine Technology and Radiological Technology programs
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

HSCE 2030 Radiation Biology and Protection
CREDIT HOURS: 3
This course provides a theoretical overview of the bioeffects of radiation. This knowledge is linked to radiation physics principles as applied to the practice of medical radiation technology. Current regulations regarding radioactive substances and imaging and survey equipment will be presented. Emphasis will be placed on practical means of radiation protection for the technologist, the patient and the general public.
PREREQUISITES: HSCE 2020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Nuclear Medicine Technology and Radiological Technology
FORMATS: Lecture

HSCE 2040 Pathophysiology for Health Sciences
CREDIT HOURS: 3
This course is intended to provide a concentrated study of the biological and behavioural interactions of the human body in disease. Emphasis will be placed on the examination of the Pathophysiology of diseases prevalent in Canada. This course will examine various therapeutic strategies used in treating these diseases and their implications for patient care.
PREREQUISITES: HSCE 1020.03, HSCE 1030.03
RESTRICTIONS: None, however priority is given to the Health Sciences students
FORMATS: Lecture

HSCE 2050 Cross Sectional Anatomy for Multimodality Medical Imaging
CREDIT HOURS: 3
This course is intended to provide students with a foundational knowledge base of cross sectional anatomy for multiple imaging modalities. Cross sectional diagrams and images from Magnetic Resonance, Nuclear Medicine, Radiological Technology and Ultrasound will be used to identify anatomical structures of each system in different planes.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Diagnostic Cytology, Diagnostic Medical Ultrasound, Medical Lab Technology, Nuclear Medicine Technology, Radiological Technology, and Respiratory Therapy.
FORMATS: Online Delivery

HSCE 3000 Culture, Diversity and Health
CREDIT HOURS: 3
Community development, community advocacy, social justice and primary healthcare will be the theoretical frameworks for exploring the Health Science practitioner's role and practice in the context of working with populations in high risk environments. The emphasis is on understanding the issues, collaborating with those involved, and building individual and group capacities to enhance and promote the health and well-being of specific populations.

RESTRICTIONS: None, however priority is given to the Health Sciences students
FORMATS: Online Delivery

HSCE 3010 Introduction to Health Research
CREDIT HOURS: 3
HSCE 3010 is designed to help students make sense of the research they can be expected to encounter in their professional practices. By focusing on the role of research in contemporary health professional practice this course will provide the student with a sound basis in the principles underlying research theory, measurement issues, experimental, exploratory and descriptive research designs, data analysis and communication skills.
RESTRICTIONS: None, however priority is given to Health Sciences students
EXCLUSIONS: HAHP 3100.03
FORMATS: Online Delivery

HSCE 3020 Computed Tomography Instrumentation and Applications
CREDIT HOURS: 3
This course is designed to provide students with knowledge of CT instrumentation, procedures and common pathologies. CT Image acquisition, processing and quantitative image analysis will be explored in detail. Processing and post-processing of CT data will be explored and contrasted to CT data acquisition and manipulation in multi-modality instrumentation. Opportunity to apply and expand upon the knowledge gained through tutorials will be provided through clinical exposure and self directed learning sessions
PREREQUISITES: HSCE 2050.03, NUMT 2500.03 or RADT 2500.03
RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science Program, in the professional stream of Nuclear Medicine Technology or Radiological Technology
EXCLUSIONS: NUMT 3100.03, RADT 3010.03

HSCE 3600 Clinical Elective
CREDIT HOURS: 1
This clinical elective is available for visiting students only, in the health professions of diagnostic medical ultrasound, diagnostic cytology, nuclear medicine technology, radiological technology, or respiratory therapy. Contact department for details.

HSCE 4030 Leadership In Health Care
CREDIT HOURS: 3
This course will consider various elements of leadership in a complex, multi-professional and rapidly changing healthcare system, and will enable students to assess and strengthen their own leadership style. An understanding of current trends and issues in healthcare will provide a basis for the development of leadership skills. Critical thinking, decision-making processes and other leadership behaviours will be examined.
RESTRICTIONS: None, however priority is given to Health Sciences students
FORMATS: Online Delivery

HSCE 4040 Independent Study
CREDIT HOURS: 3
The student will carry out an independent study or complete a project related to health sciences. Facilitiation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4040.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enrol in the course.This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4041 Independent Study
CREDIT HOURS: 3
The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4041.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enroll in the course. This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4200 Foundations in Clinical & Professional Education
CREDIT HOURS: 3
Using an adult education theoretical perspective, this course introduces students to elements of program design, objective setting, selection of instructional methods and assessment strategies for application to their roles as preceptors, patient educators, and lifelong students. This course will discuss a variety of teaching, learning and delivery methods as well as their appropriateness to clinical and professional education.
RESTRICTIONS: Restricted to students within the Faculty of Health Professions
FORMATS: Online Delivery

HSCE 4220 Critical Research Appraisal and Practices
CREDIT HOURS: 3
This course is designed to give students and practicing professionals the opportunity to further develop and practice those skills essential to the competent translation of knowledge into clinical practice. Through evaluation and use of evidence-informed decision making and change management processes students will be prepared to assist their future workplaces in staying at the forefront of clinical practice.
PREREQUISITES: HAHP 3100 or HSCE 3010 or equivalent
RESTRICTIONS: Restricted to 4th Year Health Professions students.

MDLT Medical Lab Technology - Course Descriptions

MDLT 4000 Specialty Practice I
CREDIT HOURS: 12
NOTE: Course Details listed here also apply to MDLT 4100 .

PREREQUISITES: Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to BHSc students MDLS; Enrollment may be limited due to clinical site availability.

MDLT 4100 Specialty Practice II
CREDIT HOURS: 6
See MDLT 4000.

MRIT Magnetic Resonance Imaging Technology - Course Descriptions

MRIT 4100 MRI Physics
CREDIT HOURS: 3
The physical principles involved with Magnetic Resonance Imaging (MRI) are introduced. The course covers topics such as basic principles, image weighting and contrast, image acquisition and reconstruction, data collection and image formation, and a detailed study of MRI pulse sequences.
RESTRICTIONS: Restricted to 3rd and 4th year BHSC DMUT, NUMT or RADT students. Permission to register must be obtained by the School of Health Sciences.

MRIT 4110 Advanced MRI Physics
CREDIT HOURS: 3
Advanced MRI Physics builds on the foundations established in MRIT 4100. This course includes a comprehensive study of the artifacts encountered in magnetic resonance imaging as well as flow phenomena. The physics behind advanced imaging techniques are presented including: vascular, cardiac, functional, diffusion, perfusion, spectroscopy, interventional and breast MR. Image post processing techniques are also introduced.
PREREQUISITES: MRIT 4100.03
RESTRICTIONS: Restricted to 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4120 MRI Instrumentation, Safety and Contrast Media
CREDIT HOURS: 3
MRI Instrumentation, Safety and Contrast Media presents instrumentation and equipment, RF coil technology, quality control methods, patient monitoring, site planning for new MRI sites and new advances in MRI technology. This course will focus on the study of MRI safety as well as composition, safety, and applications of MRI contrast media in current practice.
PREREQUISITES: MRIT 4110.03
RESTRICTIONS: Restricted to 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4130 MRI Techniques and Applications
CREDIT HOURS: 3
MRI Techniques and Applications expands on the physics and theory of MRI introduced in MRIT 4100.03 and introduces students to the practice of MRI scanning. Positioning techniques, coil selection, pulse sequences, protocol development, anatomy, pathology and artifacts imaged with MRI will be discussed to prepare students for clinical practice.
PREREQUISITES: MRIT 4110.03, HSCE 2050.03
RESTRICTIONS: Restricted to 4th year BHSC DMUT, NUMT and RADT students

NUMT Nuclear Medicine Technology - Course Descriptions

NUMT 1000 Fundamentals of Nuclear Medicine
CREDIT HOURS: 3
This course is designed to provide the students with an introduction to nuclear medicine technology by exploring how radiation and detection equipment are used to perform clinical procedures. The course is divided into sections with each section containing content which builds on the previous concepts. Concepts covered include: detectors used in measuring radiation, semiconductors and scintillation detectors with a focus on the gamma camera - components, acquisition techniques, SPECT reconstruction and quality control.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

NUMT 1010 Nuclear Medicine Instrumentation I
CREDIT HOURS: 3
This course is designed to expand on the learner's knowledge of gamma camera instrumentation acquired in NUMT 1000.03. Image acquisition, processing and quantitative image analysis will be explored in detail. Special emphasis will be placed on theory, practical applications, and quality control of Single Photon Emission Computed Tomography (SPECT) as it relates to current clinical practice. Opportunity to apply and expand on the theory will be provided through laboratory and self-directed learning sessions. In addition students will cover the concept of quality assurance and gain the ability to design and critique a Nuclear Medicine quality assurance program.
PREREQUISITES: NUMT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture | Lab | Online Delivery
LAB HOURS PER WEEK: 2

NUMT 1020 Nuclear Medicine Clinical Procedures I
CREDIT HOURS: 3
In this course the student will learn the Nuclear Medicine procedures that involve the use of radiopharmaceuticals in the investigation in the function of organs in the skeletal, genitourinary and tumour/inflammatory systems.
PREREQUISITES: NUMT 1000.03, HSCE 1000.03, HSCE 2020.03, HSCE 1020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture

NUMT 1500 Nuclear Medicine Clinical Practicum I
CREDIT HOURS: 3
This clinical practicum introduces students to the Nuclear Medicine and Diagnostic Imaging Department. Students will develop knowledge of departmental procedures and demonstrate health professional practice skills when interacting with patients and healthcare professionals. Emphasis will be placed on development of clinical skills in skeletal, genitourinary and tumor/inflammatory systems. Students will also have opportunities in; image acquisition and critique, patient management/care instrumentation skills and quality control.
PREREQUISITES: HSCE 1010.03, HSCE 2030.03, NUMT 1020.03, HSCE 1030.03, PHYC 1320.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2000 Radiopharmacy
CREDIT HOURS: 3
This course encompasses all aspects of radiopharmaceutical preparation utilized in a nuclear medicine facility. Classification of radiopharmaceuticals, the production of nuclides, generator construction and elution, labeling methods and pharmaceutical standards are covered in detail. Emphasis is placed on preparing, assaying, dispensing, calculating, safe handling and storing of radiopharmaceuticals. A comprehensive quality assurance program is presented, as well as licensing and record keeping.
PREREQUISITES: NUMT 1010.03, NUMT 2010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

NUMT 2010 Nuclear Medicine Clinical Procedures II
CREDIT HOURS: 3
This course provides students with the knowledge and skills to perform Nuclear Medicine procedures in the central nervous, respiratory and gastrointestinal systems. Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.
PREREQUISITES: NUMT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture | Lab | Tutorial

NUMT 2020 Nuclear Medicine Clinical Procedures III
CREDIT HOURS: 3
In this course the student will learn the Nuclear Medicine procedures that involve the use of radioactive pharmaceuticals in the investigation of the function of organs in the endocrine and cardiovascular systems. Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.
PREREQUISITES: NUMT 1010.03, NUMT 2010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Lecture | Tutorial

NUMT 2500 Nuclear Medicine Practicum II
CREDIT HOURS: 3
This clinical practicum is designed to enable the student to integrate primary nuclear medicine and patient care principles. The student will consolidate concepts, theories and skills in performing nuclear medicine procedures. The student will be exposed to image evaluation, patient management/care as well as radiopharmaceutical preparation and quality control.
PREREQUISITES: NUMT 2000.03, NUMT 2020.03
RESTRICTIONS: RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3020 Positron Emission Tomography
CREDIT HOURS: 3
The course provides students with advanced knowledge of Positron Emission Tomography (PET) scanner physics, instrumentation, and quality control. Students will also explore cyclotron physics and radiopharmaceutical synthesis in hot cells. A section of the course content involves the use of various PET radiopharmaceuticals in clinical imaging, presented in the larger context of current PET clinical procedures. Clinical application of fusion imaging with PET/CT will also be covered.
PREREQUISITES: HSCE 3020.03, NUMT 3220.03
RESTRICTIONS: Restricted to Bachelor o f Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Tutorial

NUMT 3200 Radiopharmacy
CREDIT HOURS: 3
Students will be exposed to the daily operation of a central radiopharmacy. Generator elution, product preparation and performance of quality control procedures will be practiced. Record keeping and documentation of daily operations will be stressed. Emphasis will be on efficiency and organization in order to respond to the demands of the nuclear medicine department. Students will also have exposure to non-routine radiopharmaceutical duties: dilutions, stock-solutions, and radiopharmacy research and development. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.
PREREQUISITES: NUMT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3210 Non-Imaging Procedures
CREDIT HOURS: 3
This clinical course will allow students to apply theory to clinical practice by performing a variety of non-imaging Nuclear Medicine procedures to include: white blood cell labelling; 14C urea breath tests, and radioiodine therapeutic procedures, including ablations. Proper lab technique will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3220 General Imaging I
CREDIT HOURS: 3
Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.
PREREQUISITES: NUMT 2500
RESTRICTIONS: Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3222 General Imaging II
CREDIT HOURS: 3
Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies beyond those obtained in General Imaging I. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.
PREREQUISITES: NUMT 3220.03, HSCE 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology.

NUMT 3230 Cardiac Imaging
CREDIT HOURS: 3
Students will apply theory to clinical practice by performing procedures involving the cardiovascular system. Application and evaluation of acquisition and processing of nuclear cardiology procedures with a focus on stress imaging (treadmill and medication induced) and wall motion imaging will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.
PREREQUISITES: NUMT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3240 Pediatric Imaging
CREDIT HOURS: 3
Students will focus on nuclear medicine practice in the care of children and their families. Application and evaluation of nuclear medicine procedures relevant to the diagnosis and management of children will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.
PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3500 Clinical Practicum In Nuclear Medicine Technology III
CREDIT HOURS: 3
Clinical Practicum III is intended to consolidate nuclear medicine theory and practice covered by the end of year three. The students will be provided the opportunity to demonstrate competency in nuclear medicine practice, integrating aspects of all discipline and health science related course theory. This course allows students to expand their knowledge of the healthcare team by providing an opportunity for them to observe and experience healthcare services provided by other professionals.
PREREQUISITES: NUMT 3200.03, NUMT 3222.03, NUMT 3230.03, NUMT 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4000 Spec Practice Nuclear Medicine
CREDIT HOURS: 12
FORMATS: Lecture

NUMT 4100 Specialty Practice I/Specialty Practice II
CREDIT HOURS: 6
Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty Practice is arranged through consultation with the program advisor.
PREREQUISITES: NUMT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology. Enrolment may be limited due to clinical site availability.

NUMT 4210 Professional Practice in Nuclear Medicine Technology I
CREDIT HOURS: 3
This clinical education course provides the student with the opportunity to assume clinical responsibility and develop leadership skills through two processes. Students will apply professional skills acquired through previous courses to function as a member of the diagnostic team and perform duties associated with a team leader role. Also, through a mentorship program, students will act as role models and support first year nuclear medicine students in an effort to further develop leadership skills.
CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and NUMT 4220.02 concurrently.
PREREQUISITES: NUMT 4220.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4220 Professional Practice in Nuclear Medicine Technology II
CREDIT HOURS: 3
This clinical education course provides the student with the opportunity to assume clinical responsibility and to continue development of professional skills in nuclear medicine technology. Students will be scheduled to a variety of imaging areas where they will be responsible, with remote supervision, for functioning as an integral

member of the nuclear medicine team. This course also provides the opportunity for students to become actively involved in the education of patients, as well as the continuing education of both practicing nuclear medicine technologists and affiliate healthcare groups.
CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and 4220.03 concurrently.
PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

RADT Radiological Technology - Course Descriptions

RADT 1000 Skeletal Radiography
CREDIT HOURS: 3
This course provides the student with the knowledge required to perform basic skeletal radiography examinations. Aspects studied include: patient positioning, alignment of the radiation field, and radiation exposure factors. Radiographic images are analyzed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve sub-optimal images. Students have the ability to develop radiographic skills for positioning and image analysis in lab/tutorial sessions.
COREQUISITES: RADT 1010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

RADT 1010 Imaging Fundamentals
CREDIT HOURS: 3
This course offers an introduction to the processes involved in the production of x-radiation and use of radiation for diagnostic imaging. The basic principles and equipment involved in radiography and fluoroscopy are studied as well as an introduction to the controlling parameters for image production. A major emphasis of the course is an analysis of the radiographic image and the factors that influence its quality. Students have the opportunity to use imaging equipment during lab sessions.
COREQUISITES: RADT 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab

RADT 1020 Skeletal and Systems Radiography
CREDIT HOURS: 3
Skeletal and Systems Radiography provides the student with the knowledge required to perform radiological imaging procedures of the vertebral column, craniofacial structures, body organs and systems. Elements of the course include patient positioning, alignment of the radiation field, patient management, use of contrast media, and image analysis. Images are assessed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve image quality. Students have the opportunity to practice and demonstrate the radiographic positions in a tutorial/simulation setting. Clinical lab sessions are included in this course to link theory to practice and to provide the student with an orientation to the Diagnostic Imaging Department as well as the operating room environment.
PREREQUISITES: RADT 1000.03, RADT 1010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

RADT 1500 Clinical Practicum I in Radiological Technology
CREDIT HOURS: 3
This clinical practicum introduces students to radiological technology and a Diagnostic Imaging department. Students will have the opportunity to experience a wide variety of procedures and interact with healthcare professionals and patients. Students will develop skills in skeletal/systems radiography, image evaluation, and patient management/care.
PREREQUISITES: RADT 1020.03, HSCE 1010.03, HSCE 1030.03, PHYC 1320.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2000 Advanced Skeletal & Systems Radiography
CREDIT HOURS: 3
This course provides the students with the knowledge of advanced skeletal examinations, and imaging examinations of the gastrointestinal, genitourinary, biliary, reproductive, endocrine, cardiovascular, and central nervous systems. Learning labs in which the students reinforce their knowledge of anatomy, physiology, image quality, and radiographic criteria support this course. Clinical labs and tutorial sessions prepare the students to challenge advanced patient examinations.
PREREQUISITES: RADT 1500
RESTRICTIONS: Restricted to the Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 4

RADT 2010 Imaging Equipment
CREDIT HOURS: 3
This course covers the structure, operating principles, and quality control of the equipment involved in radiological technology. It includes a comprehensive study of x-ray generators, tubes, fluoroscopic, and processing equipment with a focus on technical parameters and clinical applications. This course also covers quality control concepts, equipment used for quality control testing and testing procedures for the imaging equipment in radiological technology.
COREQUISITES: RADT 2020.03
PREREQUISITES: RADT 1500.03, HSCE 2020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

RADT 2020 Adaption Radiography
CREDIT HOURS: 3
The Adaption Radiography course provides the student with the knowledge required to adapt imaging procedures for unique clinical situations including trauma,

mobile, and operating room examinations, and for patients with special needs (pediatric, geriatric, and disabled). Selected radiographic projections and procedures related to the topics are also studied and pertinent radiographic images are analyzed. Students will have the opportunity to develop radiographic adaption skills in clinical/learning lab sessions and clinical simulation sessions.
COREQUISITES: RADT 2010.03
PREREQUISITES: RADT 2000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 4

RADT 2500 Clinical Practicum II in Radiological Technology
CREDIT HOURS: 3
This practicum provides students with the opportunity to continue skill development in the clinical examinations/procedures introduced in RADT 1500. In addition, an introduction to specialized clinical procedures is provided, including operating room imaging, computed tomography, and pediatric radiography.
PREREQUISITES: RADT 2010.03, 2020.03, HSCE 2030.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3000 Applied Pathology in Radiological Technology
CREDIT HOURS: 3
This course provides the student with the fundamental knowledge to recognize the radiographic appearances of specific pathologies. This knowledge is directly applicable to the clinical component of the program. The course is presented by lecture and through clinical lab sessions and learning labs where the student studies a variety of images related to pathologic processes. Studies from related diagnostic modalities are reviewed when appropriate.
PREREQUISITES: RADT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology.
FORMATS: Lecture | Lab

RADT 3210 CT and Interventional Imaging
CREDIT HOURS: 3
This course provides the students with the opportunity to experience the clinical practice of computed tomography and angiography/interventional imaging. Under the direction of a preceptor, students will meet the competencies required in these imaging areas. This class allows students to apply the theory from the Specialty Practice Concepts course (RADT 3010.03) and promotes further development of professional skills and behaviors.
PREREQUISITES: RADT 3000.03, HSCE 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3220 Fluoroscopic Imaging and Special Procedures
CREDIT HOURS: 3
This clinical education course will prepare students for the clinical practice of radiological technology that involve flouroscopic imaging and other special procedures. These include gastrointestinal, genitourinary and operating room imaging as well as mammography. Under the direction of a preceptor, students will apply acquired knowledge and skills to radiological procedures. The students will develop their skills in providing a high standard of patient care, producing and evaluating images, problem solving and collaboration. FORMAT; Clinical Education Course
PREREQUISITES: RADT 2500.03 and RADT 3000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3240 General/Adaption Radiography
CREDIT HOURS: 6
This course provides the student with the opportunity to further develop general radiography skills. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica and adapt routine imaging procedures for challenging clinical situations and patients with special needs. Students will be scheduled to a variety of imaging areas where radiographic adaption is typically required: emergency, and in-patient/mobile procedures. Clinical experience on evening, night, and weekend shifts is provided in this course.
PREREQUISITES: RADT 2500.03, RADT 3000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3500 Clinical Practicum III
CREDIT HOURS: 3
Clinical Practicum III provides students with an opportunity to integrate skills and concepts from previous courses, clinical practica and the clinical education courses. Under appropriate levels of supervision, the student will assume the responsibilities of a radiological technologist and demonstrate competency in radiography and computed tomography. This practicum takes place in a Diagnostic Imaging Department outside the QEII Health Sciences Centre.
PREREQUISITES: RADT 3210.03, RADT 3220.03, RADT 3240.06
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4000 Specialty Practice I
CREDIT HOURS: 12
NOTE: Course Details listed here also apply to RADT 4100.
PREREQUISITES: RADT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology. Enrolment may be limited due to clinical site availability.

RADT 4100 Specialty Practice II
CREDIT HOURS: 6
See RADT 4000.
PREREQUISITES: RADT 3500.03

RADT 4200 Pediatric Radiography
CREDIT HOURS: 3
This course provides students with the opportunity to meet the competencies required in pediatric radiography. A wide variety of clinical experiences are scheduled at the IWK Health Centre, including mobile and operating room imaging, gastrointestinal and urinary system examinations, and general imaging. Under the direction of preceptors, students will apply theoretical principles and further develop professional skills and behaviours. Students will also have the opportunity to attend pediatric radiology rounds and observe related imaging procedures.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4210 Professional Skill Development in Radiological Technology
CREDIT HOURS: 3
This clinical education course provides students with an opportunity to integrate skills/concepts from previous courses, clinical practica, and clinical education courses and continue development of professional skills in radiological technology. Through reflection and self-evaluation, students will develop learning contracts, and under appropriate levels of supervision will perform general radiologic imaging procedures. Various themes of professionalism will also be explored.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4220 Professional Practice in Radiological Technology
CREDIT HOURS: 3
This clinical education course provides the student with the opportunity to strengthen radiological technology skills while increasing confidence and independence in clinical practice. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica to further develop clinical judgement and self-confidence. To demonstrate competence, students must successfully complete a summative clinical assessment and comprehensive competency based written examinations. Students will also plan, design, and deliver a professional development session/activity for students and/or radiological technologists.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RSPT Respiratory Therapy - Course Descriptions

RSPT 1000 Respiratory Therapy Instrumentation and Techniques
CREDIT HOURS: 3
This course provides the student with the fundamental knowledge required to understand the physical principles and concepts necessary for the safe and efficient delivery of physician prescribed therapy. Clinical skills competency through lab simulation is required.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

RSPT 1020 Respiratory Therapy Clinical Assessment and Techniques
CREDIT HOURS: 3
RSPT 1020.03 is designed as a continuation of the knowledge and concepts acquired in Term 1 and the skills competencies completed in RSPT 1000.03. Students will focus on the basic background information and psychomotor skills necessary for understanding the physical principles and concepts associated with the safe handling and efficient operation of respiratory therapy equipment. Limited clinical opportunities may be provided. Clinical skills competency testing through lab simulation is required.
PREREQUISITES: RSPT 1000.03, HSCE 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab | Tutorial

RSPT 1030 Cardiopulmonary Physiology I
CREDIT HOURS: 3
The course presents a modular approach to developing a thorough understanding of normal and abnormal cardiopulmonary function in the human body and is considered a foundation course for all RSPT specific courses in the program.
COREQUISITES: BIOC 1420.03
PREREQUISITES: RSPT 1000.03, HSCE 1020.03
FORMATS: Lecture

RSPT 1500 Clinical Practicum I
CREDIT HOURS: 3
Clinical Practicum I introduces students to clinical practice in the patient care (hospital) environment. Students will have the opportunity to apply theory to skills practice at the defined competency level.
CALENDAR NOTES: Full-time rotations in clinical settings with assigned preceptors. Shift work and weekends may be required. Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodations.
PREREQUISITES: RSPT 1020.03, RSPT 1030.03, HSCE 1010.03, HSCE 1030.03, BIOC 1420.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2000 Principles of Mechanical Ventilation
CREDIT HOURS: 3
This course will introduce the students to the delivery of mechanical ventilation by learning the terminology, physical principles and physiologic concepts associated with the application of mechanical ventilation. Equipment operation, function and troubleshooting will be investigated in the lab and clinical setting.
COREQUISITES: RSPT 2070.03
PREREQUISITES: RSPT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 2020 Application of Mechanical Ventilation
CREDIT HOURS: 3
Students will be introduced to the background knowledge necessary for understanding the physical principles and concepts governing the operation of mechanical ventilators and adjunct respiratory therapy equipment to ensure the safe and effective delivery of therapy. Clinical skills testing is required.
PREREQUISITES: RSPT 2000.03, RSPT 2030.03, RSPT 2063.03, RSPT 2070.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

RSPT 2030 Cardiopulmonary Physiology II
CREDIT HOURS: 3
This course is a continuation of the physiological concepts introduced in RSPT 1030 and will examine the intricate chemical and physiological processes of fluid and electrolyte balance, pulmonary function testing, hemodynamics and the cardiopulmonary response to unusual and changing environments. Case study presentations and patient scenarios will complement the learning environment and assist the student in integrating previous knowledge.
PREREQUISITES: RSPT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture

RSPT 2050 Health Practice for Respiratory Therapy
CREDIT HOURS: 3
This course consists of classroom work, clinical skills testing, guest presentations, and a community project. The learning environment will enhance the understanding of the role of the respiratory therapist in hospitals, healthcare facilities and the community. Basic competency level in the skills required for RSPT 2500 will be achieved through practicing the clinical skills in the lab. Students will be challenged to evaluate and integrate knowledge and skills.
PREREQUISITES: RSPT 2000.03, RSPT 2030.03, RSPT 2070.03, RSPT 2063.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

RSPT 2063 Respiratory Disease & Therapeutics I
CREDIT HOURS: 3
The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.
PREREQUISITES: RSPT 1500.03
FORMATS: Lecture

RSPT 2065 Respiratory Disease & Therapeutics II
CREDIT HOURS: 3
The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.
PREREQUISITES: RSPT 2063.03
FORMATS: Lecture

RSPT 2070 Human Pregnancy and Fetal/Newborn Development
CREDIT HOURS: 3
This course contains background information and assessment skills necessary for the progression to more advanced assessment, skills and competency levels in respiratory care of the neonate and child. The integration of this and additional required courses will allow the student to learn and to challenge the competency component of the program as it relates to neonatal/pediatric therapeutics and instrumentation, pathophysiology, applications of mechanical ventilation, pharmacology, and Neonatal Resuscitation Program (NRP).
PREREQUISITES: RSPT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream of Respiratory Therapy
FORMATS: Lecture

RSPT 2500 Clinical Practicum II
CREDIT HOURS: 3
This clinical practicum provides students with the opportunity to continue clinical skill competency development and achieve defined skills by performing in a clinical patient environment. Students will have the opportunity to rotate through assigned clinical placements through 8 and 12 hour day and night shifts including weekends, depending upon the placement requirements.
PREREQUISITES: RSPT 2020.03, RSPT 2050.03, RSPT 2065.03, RSPT 2070.03, HSCE 2000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 3000 Anesthesia Instrumentation and Clinical Techniques
CREDIT HOURS: 6
This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted by an anesthetist with focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3010 Neonatal and Pediatric Therapeutics
CREDIT HOURS: 6
This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care I and II, Pediatric Intensive Care, Birth Unit, and General Wards. Students may be assigned to clinical experiences during twelve hour day or night shifts. Students may be required to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3020 Cardiac and Pulmonary Diagnostics
CREDIT HOURS: 6
This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITES: RSPT 2500.03, STAT 1060.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3230 Critical Care Instrumentation and Clinical Techniques
CREDIT HOURS: 6
This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. Students may be assigned to any of the following critical care areas: medical, surgical, neurosurgical, cardiovascular and coronary care. Depending on availability of clinical sites, students may be expected to travel outside the Metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in both X and Y terms; Credit will be given only if both are completed consecutively
COREQUISITES: RSPT 3000X/Y.06
PREREQUISITES: RSPT 2500.03

RSPT 3250 Health Practice
CREDIT HOURS: 6
This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in both X and Y terms; credit will be given only if both are completed consecutively.
PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3500 Clinical Practicum III
CREDIT HOURS: 3
This course enables students to integrate theories and skills acquired throughout the previous three years of the program; including theory, clinical practicum and clinical education courses. Students will be evaluated on skills proficiency, time management, organizational skills, and decision-making at a high level of independence. Students will be assigned to diverse clinical areas and patient populations. Clinical experiences in this course will occur during twelve hour day and night shifts, including weekends.
PREREQUISITES: RSPT 3000.06, RSPT 3010.06, RSPT 3020.06, RSPT 3230.06, RSPT 3250.06
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 4000 Specialty Practice I
CREDIT HOURS: 12
NOTE: Course Details listed here also apply to RSPT 4100.
PREREQUISITES: RSPT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy. Enrolment may be limited due to clinical site availability

RSPT 4010 Anaesthesia Technology and Related
CREDIT HOURS: 3
The course will provide advanced knowledge of the function, operation, set-up and quality assurance issues regarding aneasthesia and related equipment. The student will be provided with the knowledge necessary to work with aneasthesia equipment in operating room and related settings.
PREREQUISITES: RSPT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4020 Anaesthesia Medication Delivery
CREDIT HOURS: 3
This course will provide in depth knowledge of the modes of delivery and action and interaction of anesthesia pharmacology. The student will be provided with knowledge regarding common medications related to the delivery of anaesthesia and monitoring their effect in the operating room and related settings.
PREREQUISITES: RSPT 3500.03 or equivalent
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4030 Clinical Anaesthesia
CREDIT HOURS: 3
This course will provide in-depth knowledge of evaluation, monitoring and interventions for patients receiving anaesthesia under varying conditions. The student will be provided with the knowledge necessary to anticipate the needs of the patient and the assistance required by the anaesthetist during different aspects of the anaesthetic process.
PREREQUISITES: RSPT 3500.03 or equivalent
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4100 Specialty Practice II
CREDIT HOURS: 6
See RSPT 4000.
PREREQUISITES: RSPT 3500.03

Course Descriptions - Interprofessional Health Education

IPHE 2201 Introduction to Aboriginal Peoples' Health and Healing
CREDIT HOURS: 3
This course provides students the opportunity to learn about Aboriginal perspectives regarding health, as well as the multiple and complex challenges facing Aboriginal peoples with respect to key health issues, such as health and social inequities, the epidemiology of disease and culturally appropriate service provision.

IPHE 4900 Interprofessional Health Education Portfolio
CREDIT HOURS: 0
This course is intended to prepare students to work in a collaborative and patient/client/community/family-centered work environments. Students in Health Professions undergraduate programs are required to maintain registration in this course for the duration of their studies. The student will be required to have completed, by the end of their program of study, a total number of different, meaningful and relevant interprofessional collaborative learning experiences (as determined and approved by the School/College) equal to two times the number of years or part of years of study in the program. At least one of these experiences will be in a practice setting (which could include a simulated practice setting). In the event there are no students from other professions in any of the student's practice settings, credit may be granted for interactions with non-student professionals which follow an approved structured format. The experiences will include interactions with undergraduate and/or graduate students from a total of at least 4 different related professions with which there are natural affinities or linkages in the professional environment, some professions of which are outside the student's home School/College. In accordance with the guidelines/requirements of the home School/College, students will prepare a portfolio (or comparable document/process) which maps their interprofessional collaborative learning experiences on to the specific requirements of the School/College. The portfolio will be graded by the School/College on a Pass/Fail basis. Successful completion of this course is a requirement for graduation in all programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions.
CALENDAR NOTES: Students must ensure they are registered for the correct section that corresponds with their school/college and should check the timetable for the appropriate section for their discipline.Health and Human Performance: section 02Health Sciences: section 03
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Health Professions students only

Introduction
The School of Nursing opened in 1949 and became a constituent part of the Faculty of Health in 1961. Currently the School offers an undergraduate Bachelor of Science Nursing program, a Bachelor of Science (Arctic Nursing), a Master of Nursing Program and a PhD (Nursing) Program.

Staff

Director and Assistant Dean (Interim) (until August 31, 2019)
Martin-Misener, R., DOCHN, BScN (Dalhousie), PhD (Calgary), NP

Associate Director, Graduate Studies
MacDonald, M., BN (UNB), MSN (S Maine), PhD (San Diego), RN

Associate Director, Undergraduate Studies
Sabo, B., BA (Manitoba), MA, PhD (Dalhousie) RN

Singleton, J., BA (Waterloo), MS (Penn State), PhD (Maryland), Associate Professor, School of Recreation, Physical and Health Education

Preceptors
Many nurses and persons in other disciplines, and settings, provide valuable assistance in the education of nursing students. Names can be obtained by contacting the School of Nursing.

School of Nursing Regulations

1. Students are required to observe the University Regulations and Academic Regulations as described in this calendar.
2. Students are assessed in each year on their aptitude and fitness for nursing. Students who, in the judgment of the faculty, fail to attain a satisfactory standard in this assessment may be required to withdraw from the School.
3. Students are responsible for ensuring that they are registered in appropriate courses throughout the program. Incorrect registration, at any time, could cause conflicts in a student's year-to-year progression and/or graduation.
4. Students in the Baccalaureate Program are responsible for (a) the purchase of uniforms including shoes and a watch with a sweep hand or a digital watch with seconds display, (b) cost of accommodation and travel while on clinical experiences. Additional expenses are incurred by students in the Basic Baccalaureate Program for field experience, books, first aid course, CPR course, graduation pin, equipment, and nurse registration examinations and recommended and/or required immunizations and/or testing. Each student must also purchase a name tag from the University.
5. Because of enrolment limits on class size, part-time students who wish to change to full-time status must present this request in writing to the Assistant Director, Undergraduate Studies by March 1.
6. Students are assigned to a faculty member from the Undergraduate Student Affairs Committee to help them plan their academic program and to discuss academic progress or difficulties.
7. Students are permitted to repeat any course (non-nursing, core nursing courses including clinical practice and electives) in the BScN program only once. A second failure in any course (whether the second failure occurs in a previously failed course, or in a course taken for the first time in the program) will result in dismissal from the program for 1 year. Students are permitted to reapply to the program. Readmission to the program is not guaranteed and the applicant must demonstrate their preparation to return to studies.
8. Students wishing to appeal a decision based on faculty regulations or decisions should follow the School of Nursing Appeal Procedure outlined in the Nursing Student Guide.
9. Supplemental exams will not be available in any nursing courses.
10. Because of the nature of the study and practice of Nursing which places Nursing students in a position of special trust, applicants will be asked to complete a screening question related to past criminal convictions which might affect the applicant's suitability for the practice of nursing. Students accepted into the nursing program who provide false information will be disciplined by the university. It is the student's responsibility to inform the Assistant Director (Undergraduate Studies) of any new criminal conviction which could affect the student's suitability for practice.

11. Once enrolled in the Nursing Program it is the students' continuing responsibility to inform the Assistant Director Undergraduate Studies of any criminal conviction or any significant personal circumstance which would adversely affect their ability to continue with their studies or which would make them ineligible for registration within CRNNS upon graduation.

School of Nursing Appeal Procedure

The University has established a system which allows students to appeal academic decisions made by faculty. Appeals can be heard at different levels within the University: At the School and at Senate. Appeals are heard in the School by the Student Appeals Committee and at Senate level by the Senate Academic Appeals Committee.

Procedure for Undergraduate Appeals

Undergraduate appeals are heard by the Student Appeals Committee of the School of Nursing. Procedures for the undergraduate appeal process are available from the School.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Degree Options (admitted Sep 2016 or later)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program http://www.dal.ca/faculty/healthprofessions/nursing/programs/arctic-nursing.html.

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies calendar.

Bachelor of Science (Nursing)

Degree Requirements

Throughout the undergraduate program students must: obtain a minimum sessional and cumulative GPA of 2.30; accumulate a minimum of 120 credit hours; successfully complete all compulsory courses, as well as the necessary number of elective courses; and, complete the degree within six years of commencing nursing courses. Credit will be given for non-nursing courses that are up to ten years old by the date the degree is completed.

Grade Point Average Standards (GPA)

The grade point average system is described in the Academic Regulations.

Grades

The following letter-grade system is used to evaluate performance. Pass in nonnursing courses: A+, A, A-, B+, B, B-, C+, C, C-, D, and P. In nursing courses students must attain a minimum of C+ in both theory and clinical/laboratory components: FM, F, and INC are failing grades. ILL and W are considered neutral.

Requirements for Promotion

Besides meeting the GPA requirements, progression in the program requires minimum D in each non-nursing course and minimum C+ or PASS in each nursing course. Progression in the program requires a GPA of 2.30 or greater (semester to semester) for all years of the program.

Normal Workload

The program consists of 120 credit hours; Students can register for a maximum of 15 credit hours per term.

Prerequisite for Course Admissions

There are a number of courses that require prerequisites (see course descriptions). Students must successfully complete the required prerequisites for each course or obtain approval from the Committee on Studies prior to registration.

Direct Entry Students

This entry option is for students coming directly from high school or who do not have the required prerequisites for the Advanced Standing option (see below). It is made up of 8 semesters over a 3-year period.

Semester 1 runs September to December and Semester 2 runs January to April. Upon completion of Semester 1 and 2, students will enter Semester 3 (May to July in Halifax, Sept to Nov in Yarmouth) of the Bachelor of Science (Nursing) Program; see Course of Study. Students will complete 3 semesters per year; Fall Semester is September to November; Winter Semester is January to March; Summer Semester is May to July. Students will have a one month break between each semester. Graduation: Halifax Direct Entry students will graduate in May, with eligibility to practice as a graduate nurse and apply to write the NCLEX-RN Licensure Examination in April; Yarmouth students will graduate in October, with eligibility to practice as a graduate nurse and to apply to write the NCLEX-RN Licensure Examination in August.

Advanced Standing Students

Advanced standing students have all of the required non-nursing courses (equivalent to semesters 1 and 2) completed with at least 30 credit hours, and will enter the program at Semester 3 in September. It consists of 6 semesters over a 2-year period. Semesters 3 to 8 are exclusively nursing courses. Fall Semester is September to

November; Winter Semester is January to March; Summer Semester is May to July. Students will have a one month break between each semester. Graduation: October, with eligibility to practice as a graduate nurse and apply to write the NCLEX-RN Licensure Examination in August.

Final Exams

Final exams for the new modified BSc Nursing program will be administered in the last week of each semester: November for Fall Semester; March for Winter Semester and July for Summer Semester.

Bachelor of Science (Nursing) Degree Program (Admitted in Sep 2016 or later)

In response to a health care system based on principles of primary health care, the Bachelor of Science (Nursing) Program prepares nurses to work in partnerships with individuals, families, groups and communities to promote, maintain and strengthen health. Graduates are prepared to respond to a range of health and illness needs in a variety of settings and organizational health care infrastructures. The curriculum is designed to enable graduates to meet the standards of nursing practice in Canada and be eligible for registration in Nova Scotia.

In addition to the Dalhousie Campus, students may complete a BScN degree on site in Yarmouth. Students interested in this option should contact the School for further information.

Program Objectives

The Bachelor of Science (Nursing) graduate will:

1. Demonstrate application of people-centred nursing art and science through critical inquiry, commitment to life-long learning and informed practice.
2. Practice competently by applying the principles of primary health care with diverse *clients in a variety of health care contexts and by responding to emerging trends, technology and concepts in health.
3. Communicate, collaborate and partner with *clients, and other members of the health care team to increase capacity and enhance health of populations.
4. Demonstrate ethical, legal and professional accountability in the practice of nursing and remain committed to professional competence through life-long learning.
5. Influence nursing and health care through a social and political analysis of current health care issues and application of leadership skills.

*(individuals, family, groups, community and/or populations)

Bachelor of Science (Nursing) (for students entering in Sep 2016)

The Bachelor of Science in Nursing degree is a 120 credit hour program. Graduates are eligible to write examinations for membership in the College of Registered Nurses of Nova Scotia.

Before commencing semester 3 all students must have the following completed:

Immunization

Students are responsible for having complete and current immunizations against diphtheria, polio, tetanus, pertussis, measles, mumps, rubella, Hepatitis B and a 2-step Mantoux. Access to clinical agencies will be denied if immunizations are not current and complete.

CPR, (HCP) and Standard First Aid Certification

Students must have CPR (Health Care Provider Level) and Standard First Aid certification. CPR (Health Care Provider Level) must be recertified biannually (or in compliance with the healthcare facility in which a student may be completing a clinical practicum). A cardio-pulmonary resuscitation (CPR) course and standard first-aid course are the student's responsibilities in time and cost. Access to clinical settings will be denied if certification is not current.

Criminal Record Check/Vulnerable Sector Search

Students are responsible for completing a criminal record check (CRC) and Vulnerable Sector Search (VSS). Access to clinical agencies will be denied if these checks are not current.

Course of Study

The Program is offered at both the Halifax and Yarmouth sites. The following is an outline of courses that are taken in each semester. Advanced standing students commence in Semester 3.

Program requirements may change with ongoing curricular revisions.

Semester 1

- PHYL 1010X.03: Human Physiology
- ANAT 1010.03: Basic Human Anatomy
- ENGL 1100.03: Writing for University
- Open elective (3 credit hours)
- Open elective (3 credit hours)

Semester 2

- PHYL 1010Y.03: Human Physiology
- BIOC 1420.03: Introductory Biochemistry for Nursing Students (recommended; or 3 credit hour Science elective)
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HAHP 2000.03: Human Growth and Development (recommended; or 3 credit hour open elective)

- MICI 1100.03: Health Science Microbiology

Semester 3

- NURS 2710.06: Nursing and Community Health
- NURS 2715.03: Clinical Integration I
- NURS 2720.03: Health and Healing I: Pathophysiology and Therapeutics
- NURS 2730.03: Foundation of Nursing Practice

Semester 4

- NURS 2725.03: Clnical Integration II
- NURS 2740.06: Nursing and Family Health
- NURS 2750.03: Health and Healing II: Pathophysiology and Therapeutics
- NURS 2760.03: Nursing Research and Evidence Informed Practice

Semester 5

- NURS 3710.06: Nursing and Episodic Illness: Preventative Care and Intervention
- NURS 3715.06: Clinical Integration III
- NURS 3720.03: Professional Formation of Nursing Practice: Leadership Perspectives

Semester 6

- NURS 3725.06: Clinical Integration IV
- NURS 3730.06: Nursing in the Context of Persistent Illness: Prevention and Recovery
- Nursing elective (3 credit hours)

Semester 7

- NURS 4710.03: Relational Practice and Advanced Clinical Reasoning
- NURS 4715.06: Exploratory Nursing Practice
- NURS 4720.03: Professional formation: Nursing and Social Responsibility
- Nursing elective (3 credit hours)

Semester 8

- NURS 4725.15: Transition to Practice

Course of Study

With the help of a Year Program Coordinator, an individual course of study is determined. Course of study may be affected by the actual courses offered in an academic year. Certain courses may have prerequisites as noted in the course descriptions. Part-time students are encouraged to complete most of the required non-nursing courses before starting nursing courses. The course of study varies considerably when the student applies transfer credits toward the degree. Transfer credit regulations are outlined under the Academic Regulations section of the University Calendar.

Degree Options (admitted prior to Sep 2016)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program http://www.dal.ca/faculty/healthprofessions/nursing/programs/arctic-nursing.html.

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies calendar.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

NURS 2710 Population Health Nursing
CREDIT HOURS: 6
The structures and relationships we live in are fundamental to the development of human potential and nursing practice. Mental and physical health concerns that have significant impact on health and social wellbeing are explored. Population health concepts essential for a healthy society are introduced
PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100, ENGL 1100, PHYL 1000X/Y.06 plus an additional 15 credit hours totalling 30 credit hours of study
FORMATS: Lecture | Tutorial

NURS 2715 Clinical Integration 1
CREDIT HOURS: 3
Integration of foundational nursing skills and practices, such as health history and assessment, safety, infection control, communication and relational inquiry occurs in clinical application settings. Students use multiple learning modalities to master fundamentals of nursing practice.
PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100, ENGL 1100, PHYL 1000X/Y.06 plus an additional 15 credit hours totalling 30 credit hours of study
FORMATS: Lab

NURS 2720 Health and Healing I: Pathophysiology and Therapeutics
CREDIT HOURS: 3
Fundamentals of health and disease patterns, the role of genetics, developmental biology and environment are explored. Cellular mechanisms, inflammatory and infectious responses and cellular biology of cancer are investigated. Diagnosis and therapeutic concepts including preventative therapies and pharmacological and non-pharmacological interventions with consideration of age and cultural variations are introduced.
PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03, MICI 1100.03, PHYL 1000X/Y.06, and ENGL 1100.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lecture | Tutorial

NURS 2725 Clinical Integration 2
CREDIT HOURS: 3
Population health, family and perinatal theoretical concepts and evidence are utilized in a variety of practice settings. Family health assessments across various family life stages including focused fetal/newborn/child and parental care in dynamic interprofessional settings enable students to apply theory to practice.
PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03
FORMATS: Lab
LAB HOURS PER WEEK: 110

NURS 2730 Foundation of Nursing Practice
CREDIT HOURS: 3
Ethical, professional, legal concepts and theories guiding professional nursing practice are examined. Professional identity, collaboration, comportment, and reasoning related to nursing practices are developed. Theories and frameworks are used to investigate health and social care constructs and the impact of hierarchal structures on individual, communal and global health.
COREQUISITES: NURS 2710.03
PREREQUISITES: PHYL 1010X/Y.06, ANAT 1010.03, STAT 1060.03 or MATH 1060.03, MICI 1100, PHYL 1000X/Y.06, ENGL 1100, plus an additional 15 credit hours totalling 30 credit hours of study
FORMATS: Lecture | Seminar | Online Delivery

NURS 2740 Nursing and Family Health
CREDIT HOURS: 6
Nurses combine knowledge from primary health care and public health, social and nursing sciences, recognizing the uniqueness and diversity in family systems to support transitions that occur across the life course. Understanding health promotion, protection and prevention of illness in the context of family development is the focus.
PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03
FORMATS: Lecture | Seminar

NURS 2750 Health and Healing II: Pathophysiology and Therapeutics
CREDIT HOURS: 3
Integrating knowledge of disease, diagnosis and person-centred management is key to successful nursing practice. Specific disease processes related to body systems are described and mechanisms of therapeutic options for management are evaluated. Evidence to support use of pharmacological, non-pharmacological, alternative and complimentary treatments is evaluated

PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03
FORMATS: Lecture

NURS 2760 Nursing Research and Evidence-Informed Practice
CREDIT HOURS: 3
Examines the methods used to generate, evaluate and apply knowledge in nursing and health care focusing on the basic processes of quantitative and qualitative research. The emphasis is on analysis, synthesis and evaluation of research and the implications for theory and evidence-informed nursing practice. Collaboration with Interprofessional research teams is described.
PREREQUISITES: NURS 2710.03 and NURS 2720.03 and NURS 2730.03 and NURS 2715.03
FORMATS: Lecture | Seminar

NURS 3381 Culture Caring and Health
CREDIT HOURS: 3
This nursing elective promotes students awareness of the international/global impact of culture on health beliefs and client access to healthcare systems. Students explore their own attitudes and approaches to international/global cultures. Through this exploration, students identify strategies for international/global healthcare practices.
PREREQUISITES: NURS 3725.03, NURS 3730.03
EXCLUSIONS: NURS 3080.03
FORMATS: Online Delivery

NURS 3710 Nursing and Episodic Illness: Preventative Care and Interventions
CREDIT HOURS: 6
Collaborating with clients across the life course during the acute phase of physical or mental illness requires a focus on preventative and curative care strategies. Utilization of evidence and application of nursing and inter-professional collaborative care and informed decision-making is examined within the context of person, family and society.
PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2750.03, and NURS 2760.03
FORMATS: Lecture | Seminar

NURS 3715 Clinical Integration 3
CREDIT HOURS: 6
Using simulation and clinical experiential learning students apply knowledge related to caring for clients with acute, episodic illnesses from birth to death. Interprofessional practice and evaluation of the impact of collaborative care will be a focus.
PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2760.03, and NURS 2750.03
FORMATS: Lab | Experiential Learning

NURS 3720 Professional Formation of Nursing Practice: Leadership Perspectives
CREDIT HOURS: 3
Leadership is integral to the practice of every nurse. Examining and applying leadership theories and behaviours enable effective practices to be evaluated. The nursing role in conflict resolution, crisis intervention and therapeutic communication to manage complex situations using multiple perspectives is examined.
PREREQUISITES: NURS 2740.03, NURS 2750.03, NURS 2760.03, and NURS 2725.03
FORMATS: Lecture | Seminar

NURS 3725 Clinical Integration 4
CREDIT HOURS: 6
Students apply theoretical and practical knowledge in caring for individuals and families from conception to death focusing on chronic and/or terminal illness. Significant issues related to life threatening illness, dying, and the promotion of quality of life using a collaborative care model will form the basis for practice
PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03
FORMATS: Lab
LAB HOURS PER WEEK: 220

NURS 3730 Nursing in the Context of Persistent Illness: Prevention and Recovery
CREDIT HOURS: 6
Using nursing and other theoretical frameworks, students focus on clients/families living with chronic and life altering diseases across the life course. Students use the nursing process, relational practice, critical inquiry and evidence to apply principles of disease management and advanced communication with a person-centred, Interprofessional approach.
PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03
FORMATS: Lecture | Seminar

NURS 4330 Self-Directed Learning
CREDIT HOURS: 3
Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.
PREREQUISITES: NURS 3710.03; NURS 3715.03; NURS 3720.03
EXCLUSIONS: NURS 5950.03

NURS 4331 Self-Directed Learning
CREDIT HOURS: 3
Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.
PREREQUISITES: NURS 4330.03

NURS 4370 Women and Aging
CREDIT HOURS: 3
This interdisciplinary nursing elective explores the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics include; aging as a process; menopause, violence against older women, older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.
PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03
CROSSLISTED: SOSA 3245.03/5245.03, GWST 3810.03, NURS 5850.03
FORMATS: Lecture | Seminar | Discussion

NURS 4371 Addictions Nursing Practice
CREDIT HOURS: 3
This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored.
CALENDAR NOTES: Students who complete NURS 4371 must also complete NURS 4372
PREREQUISITES: NURS 3710.03, NURS 3720.03 and NURS 3715.03
CROSSLISTED: NURS 5871.03
FORMATS: Online Delivery

NURS 4372 Mental Health Nursing
CREDIT HOURS: 3
Students will gain insight into individuals' experiences of mental health problems, mental disorders/psychiatric illnesses, and addictions over the life course. Multiple perspectives, including biological, nursing, sociological, philosophical and political, will guide the analysis. Treatment modalities will be critiqued. The association between nurses' relational practices and individuals' quests for life fulfillment will be examined.
PREREQUISITES: NURS 4371.03, NURS 3710.03, NURS 3720.03 & NURS 3715.03
FORMATS: Online Delivery

NURS 4380 Introduction to Epidemiology Methods in Nursing Practice
CREDIT HOURS: 3
This introductory course is intended to provide students at both the undergraduate and graduate level with a working knowledge and understanding of the basic concepts and methods of epidemiology. The main focus of this course will be to learn to analyse and interpret information about disease (i.e. both acute and chronic) and other health related occurrences at a population level (e.g. risk factors, diversity, determinants of health) within a Public and Community Health Nursing context. This course will also provide an introduction to the concepts for developing, implementing and evaluating public health programs and, for independent inquiry and decision making around public health policy. There are no prerequisites for this course though students are required to have completed their second year of their undergraduate program or have permission from the course instructor. A clinical background and a basic understanding of statistics for the Graduate students are essential but not necessary for Undergraduate students.
PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03
FORMATS: Online Delivery

NURS 4381 Public Health Nursing
CREDIT HOURS: 3
This course provides an opportunity for students to advance their introductory knowledge of public health nursing principles, roles, and functions. Public health nursing integrates knowledge from public health and nursing science to promote, protect, improve and restore the health of populations. The focus will be on advancing their understanding and application of population health, priority setting and planning approaches, partnerships, public policy literacy and health equity.
PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03
FORMATS: Online Delivery

NURS 4471 Emergency Preparedness: A Nursing Perspective
CREDIT HOURS: 3
This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.
PREREQUISITES: NURS 3710.03; NURS 3715.03 & NURS 3720.03
EXCLUSIONS: NURS 2390
FORMATS: Online Delivery

NURS 4472 Acute and Critical Care Nursing
CREDIT HOURS: 3
With the focus on acute and critical care nursing in the intensive care and emergency room areas, students will further develop, critically analyze and apply knowledge gained in previous courses with a focus on the management of critically ill clients. Emphasis includes working with clients across the lifespan and inter-professional relationships within specialty practice.
PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03
EXCLUSIONS: NURS 3320.03
FORMATS: Online Delivery

NURS 4710 Relational Practice and Advanced Clinical Reasoning
CREDIT HOURS: 3
Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.
PREREQUISITES: NURS 3730.03 and NURS 3725.03

NURS 4715 Exploratory Nursing Practice
CREDIT HOURS: 6
Students engage in a broad range of clinical, research or theoretical activities, under the direction of faculty or clinical preceptor/facilitator to complete a project relevant to nursing practice. These learning experiences will assist the student to understand the complexity of the integrated nursing ole across a range of settings.
PREREQUISITES: NURS 3730.03 and NURS 3725.03
FORMATS: Experiential Learning

NURS 4720 Professional Formation: Nursing and Social Responsibility
CREDIT HOURS: 3
Collaborating with and across professions, theoretical frameworks are critiqued and applied to gain insight into the nursing role that influences policies and practices in health care. Evaluation of the processes that influence and support change, as well as system inertia, will assist in developing strategies to improve health for society.
PREREQUISITES: NURS 3730.03 and NURS 3725.03
FORMATS: Lecture | Seminar

NURS 4725 Transition to Practice
CREDIT HOURS: 15
Students consolidate nursing knowledge and entry-to-practice competencies through intensive, reflective, mentored practice. Emphasizing the professional nursing role, collaboration, interprofessional teamwork, advocacy, time management, priority setting and leadership are key components of relational practice. Peer-to-peer mentoring and self-directed lifelong learning skill development support preparation for National Licensure examination and ongoing professional development.
PREREQUISITES: NURS 4725.03, NURS 4715.03, NURS 4720.03
FORMATS: Experiential Learning

NURS 4800 Interdisciplinary Class in Human Nutrition
CREDIT HOURS: 3
The interdisciplinary nursing elective is an interdisciplinary study of the basic principles of nutrition needs throughout the life cycle. Physiological, psychological, socio-economic, physical, educational and cultural determinants are explored to explain why the nutritional status of Canadians can vary and how this variation affects the development of chronic disease. Special emphasis is given to community nutrition in the Atlantic Region.
PREREQUISITES: BIOL 1000.06 or by faculty permission
CROSSLISTED: PHAR 4950.03, PHYT 3090.03, HPRO 2250.03, NURS 5990.03
FORMATS: Lecture

Occupational Therapy

Introduction
The Atlantic School of Occupational Therapy was established in 1982 as the only occupational therapy education program in Atlantic Canada. The School exists in response to strong regional advocacy, particularly since 1958 when a School was approved in principle by the University Senate. The regional orientation of the School fosters collaborative teaching, research and professional activities linking those at the university with occupational therapy and other service providers, government workers, and citizens in the four Atlantic Provinces. This regional mandate is combined with an international perspective linking Dalhousie with universities and communities for fieldwork and research.

Occupational Therapy is a health profession concerned with social inclusion. Practitioners enhance the occupational performance engagement, health and well-being of individuals, groups, and organizations, particularly where inequities or injustice limit opportunities for meaningful participation in daily life occupations.

Occupation is viewed broadly to include everything we do to “occupy” ourselves in enjoying life, looking after ourselves and others, and contributing to the social and economic productivity of our communities.

Health is viewed broadly as having the ability, opportunity and resources, for quality of life with meaningful occupations in supportive environments.

Occupational therapists use their understanding of occupation, enabling processes, justice and systems to enable individuals, groups and organizations to overcome obstacles that limit their ability to do things they need and want to do. Obstacles addressed by occupational therapists may include illness, injury, physical or mental disability, developmental delay, social disadvantage, old age, cultural, and physical barriers in the home, community and workplace. Using a “partnership” approach, occupational therapists work with individual families, groups, communities, organizations, populations, businesses or governments. The focus can be either on enabling individual change, or enabling change in physical and social environments, policies or legislature to enhance occupational performance and engagement in society. Practice may enable change in skills, attitudes, routines, design of buildings, use of assistive technology, policies, etc.

The role of an occupational therapist is varied and challenging. Occupational issues are never the same because no two people or environments are ever exactly the same. The challenge for occupational therapists is to plan and implement the “just right” program or strategy for each and every client so that everyone can achieve just opportunities to participate in society.

Degrees Offered
In concert with national standards and requirements for occupational therapy education, the School of Occupational Therapy at Dalhousie University only offers graduate level degree programs. For further information on our occupational therapy degree programs, please refer to the Graduate Calendar.

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate Program in Disability Management to students currently enrolled in an academic program at Dalhousie or another Canadian university. The Certificate Program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill workers to attain their maximum level of functioning and ability to return to work. Disability Management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return to work. All courses in the Certificate Program are offered completely on-line.

Please refer to the Disability Management section in this calendar for additional information.

Post Professional Certificates

These certificates are for people who are working in health, social, or community services whose professional preparation has normally included a bachelor's degree or higher in a relevant field. The following certificates are being offered in the School:

- Chronic Condition Self-Management
- Aging and Continuing Care
- Diversity and Inclusion

Please refer to the Occupational Therapy section in the Graduate Calendar for additional information.

Master of Science (Occupational Therapy) - MSc (OT): Master's Program to Enter the Profession

MSc (OT) First class accepted into the program in September 2006.

Master of Science (Occupational Therapy–Post- Professional): Post Professional Master's program for qualified occupational therapists.

1. Research Thesis Stream
2. Practice Leaders Stream
3. Single graduate courses (with instructor's permission)

PhD

Faculty in the School of Occupational Therapy welcome applications for PhD studies focused on occupational therapy or occupational science. Interested persons should contact individual faculty at the School. Applications will be submitted through the most suitable program, such as the PhD in Health, Interdisciplinary PhD program, or Biomedical Engineering PhD program. Prospective students may be eligible for funding through scholarship programs at NSERC, SSHRC, CIHR, or from the Nova Scotia Health Research Foundation (NSHRF). Within Dalhousie funding possibilities include Killam scholarships.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Note
The School does not currently offer an undergraduate degree.

We offer undergraduate courses for continuing professional development, refresher education and/or to advance one's knowledge of occupational science. Not all courses are offered each year. Please contact the School for the current course offerings and enrollment in single course.

Course Descriptions

OCCU 2000 Occupation and Daily Life
CREDIT HOURS: 3
This introductory course for students in arts, social sciences, science and other fields is designed to explore the meaning of occupation in everyday life. Typically, the

term “occupation” refers to categories of paid work. This course will explore a broader meaning of occupation; namely purposeful activity. This concept of occupation will include everything we do to look after and develop ourselves, be involved in meaningful endeavours, contribute to our communities, promote health, advocate for opportunities, generate income and more. Students will be exposed to a broad range of literature on occupation; the motivation, organization and performance of occupation; the environment as a context for occupational performance; and the promotion of health through occupation. Students will gain an appreciation of occupation as the foundation of everyday life through sociological, anthropological and narrative analysis, and experiential activities.
RESTRICTIONS: None. This course is OPEN to non-Occupational Therapy students
FORMATS: Lecture | Discussion

OCCU 2207 Occupational Development Across the Life Span
CREDIT HOURS: 3
Theories and processes that explain the complexity and dynamics of occupational development across the lifespan are introduced. The course explores typical patterns of physical, cognitive, and psychosocial development and their occupational implications, as well as contexts for occupational development including roles and environments.
PREREQUISITES: Instructor permission

OCCU 3500 Human Occupations Across the Lifespan
CREDIT HOURS: 3
Designed for students from any discipline, this course builds on basic concepts in occupational science. We explore how human development from infancy through late adulthood shapes participation, performance and meaning in occupations. Far beyond employment, ‘occupation’ means those purposeful activities that occupy time, energy, and attention.
FORMATS: Lecture

OCCU 4402 Program Design and Evaluation for Enabling Occupation
CREDIT HOURS: 3
This course enables students to critically assess, plan and design an evaluation for occupational therapy programs in a variety of settings. Students will be provided with the basic knowledge and skills of: strategic planning; program development; resource management; and program evaluation. As part of this course, students will complete a novice consulting project. This project will provide students with the opportunity to explore the provision of occupational therapy in a non-traditional setting.
PREREQUISITES: Instructor permission

OCCU 4420 Fieldwork III
CREDIT HOURS: 0
This eight week fieldwork placement introduces students to occupational therapy practice outside the Atlantic region. There are a limited number of opportunities for International options outside Canada and expanded fieldwork with an off-site occupational therapist preceptor within Atlantic Canada. Students develop competence and increased independence in integrating theoretical knowledge and skills through the full process of Occupational Therapy practice. Under supervision, students assume responsibility for a case load of approximately 40-60% of that of an entry level therapist. All expenses are the responsibility of the student including a placement fee, travel, accommodations, etc.
PREREQUISITES: Instructor permission

OCCU 4422 Fieldwork Level III (Continued)
CREDIT HOURS: 0
During this six week fieldwork experience students focus on refining professional competencies and seeking new challenges with minimum guidance from a preceptor. Students are expected to develop the capacity to carry 75% or more of the responsibilities of an entry-level occupational therapist by the completion of this fieldwork education placement.
PREREQUISITES: Instructor permission

OCCU 4500 The Science of Occupation: Dissecting Sanctioned and Unsanctioned Occupations
CREDIT HOURS: 3
This course provides a forum for students from different disciplines to critically examine, discuss and understand sanctioned and unsanctioned occupations within the context of individual, community, cultural and societal influences. Students will also critically examine debates and concepts in occupational science.
PREREQUISITES: OCCU 2000.03
FORMATS: Lecture

College of Pharmacy

Location: George A. Burbidge Building
5968 College Street
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-2378

Fax: (902) 494-1396

Website: www.dal.ca/pharmacy

Email: pharmacy@dal.ca

History
Formal pharmacy education in the Maritime provinces began in 1908, with evening classes in pharmacy and chemistry conducted in the Nova Scotia Technical College. Success of these courses encouraged the Nova Scotia Pharmaceutical Society to establish the Nova Scotia College of Pharmacy in 1911. The College was affiliated with Dalhousie University in 1912.

The New Brunswick Pharmaceutical Society and the Prince Edward Island Pharmaceutical Association were admitted to affiliation with the College in 1917 and 1950, respectively. With the affiliation of the former society, the College was renamed the Maritime College of Pharmacy.

In 1961, the Maritime College of Pharmacy was admitted into Dalhousie University as the College of Pharmacy, a constituent part of the new Faculty of Health Professions. A four-year baccalaureate program was introduced.

In 1966, a Master's program was established, followed by a Doctor of Philosophy program in 1977.

In 1972, a twelve month pharmacy residency program was initiated by Camp Hill Hospital in cooperation with the College of Pharmacy. Programs were initiated at the Halifax Infirmary in 1974, at the Victoria General Hospital in 1981 and at the Saint John Regional Hospital in 1982.

In the fall of 1968, the College of Pharmacy moved into the George A. Burbidge Pharmacy Building. This building, the former Medical Sciences Building was renamed in honour of the first Dean of the College, in recognition of his contribution to pharmacy education in the Maritimes. Present facilities accommodate approximately 360 undergraduate students.

College of Pharmacy Mission Statement

Mission

Enhancing health and wellness through pharmacy education, research and community service. Through our work, we support the conscientious use of medications in society.

Vision

The College of Pharmacy leads the profession's evolution. Our expertise, programs and graduates are sought after and valued.

Accreditation

The Bachelor of Science in Pharmacy program of the College of Pharmacy at Dalhousie University has been awarded the status of Full Accreditation by the Canadian Council for Accreditation of Pharmacy Programs for a four year term, 2016-2020.

Reeve, E., BSc (Pharm), PhD (USouth Australia)

PEP Associates
Throughout the Maritime provinces pharmacist preceptors in community and hospital pharmacies participate in structured practice experience programs (PEP). The College of Pharmacy would like to acknowledge the valuable and essential contribution that preceptors make to the education process. Sincere thanks and appreciation is extended to all preceptors for the time and energy they devote to students.

The PEP is administered by the College with the support of the provincial pharmacy regulatory authorities in the Maritimes. Second, third, and fourth year students demonstrate their knowledge and professional competency in practice rotations in community and hospital pharmacy sites.

College of Pharmacy Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this Calendar. The academic performance of each student in the College is assessed by the Student Promotions Committee.

Academic Requirements

Workload

The curriculum is composed of problem-based learning (PBL) and other courses, which may include tutorials, lectures, labs, practice experience and other components. (See IV. Programs offered). To satisfy the requirements for the degree of Bachelor of Science in Pharmacy, a student must achieve a grade of Pass in each prescribed component. PBL courses vary in length from three to seven weeks, and are weighted as either 1.5, 3, or 6 credit hours. Each academic year totals 27, 31.5, or 33 credit hours, with the program total being 123 credit hours.

Students are required to successfully complete all practice experience rotations. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

Academic Recognition

Awards

The College of Pharmacy Awards Committee administers a number of awards, each with defined criteria. Selection of award recipients described as the “student who excels” is based on a combination of performance in knowledge assessments and in tutorials. Eligibility for In-course Scholarships is determined on the basis of knowledge assessments alone.

Dean’s List

Students will be assessed for Dean’s List based on their knowledge assessments and class standing in the annual “Progress Exam.” No student who has obtained a failing grade (FM or F) will be eligible for the Dean’s List in the year in question.

Distinction

Students who have been on the Dean’s List for three of the four years of the Pharmacy Program and a cumulative GPA of 3.70 or higher will graduate with Distinction.

Assessment

1. Grading is on a Pass/Fail basis, and grades recorded on the official University transcript are “Pass”, "Marginal Fail" or “Fail” (P, FM, F). Students must pass all components of the year in which they are registered to proceed to the next year. The passing grade for knowledge assessments is 60% unless otherwise indicated.
2. Student performance will be assessed during and at the end of each PBL course. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student’s learning process throughout a PBL course and a formal assessment (student tutorial performance assessment) at the completion of a course. Knowledge/skills will be assessed as described in the syllabus provided for each course.
3. To pass a PBL course, a student must pass both the student tutorial performance assessment and the course knowledge assessment.
4. A student who fails no more than one academic course will be assigned a grade of marginal failure (FM) in that course. The student must meet with the Associate Director, Student Affairs to discuss remediation and/or support. More than one failure will result in all failed course being assigned the grade of Fail (F).
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to faculty regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.
6. Attendance at the tutorials, skills laboratory and practice experience program (PEP) is mandatory. Absence must be supported with a valid reason, such as illness with a medical certificate or other reason approved by the Undergraduate Education Committee. Other absences will be reported to the Student Promotions Committee and may be reason for failure.

Reassessment of a Grade

See Academic Regulation 16.7. In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Supplemental Assessment

1. A student who receives a grade of FM is eligible for remedial work and supplemental assessment.
2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Student Affairs. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
3. A student who fails the knowledge assessment or other requirement outlined in the syllabus of a PBL or non-PBL course will be required to do remedial work and must pass a supplemental assessment, which will be scheduled by the course coordinator in consultation with the Associate Director, Student Affairs and the students involved.
4. If a student fails one PBL or non-PBL course, the grade will be recorded as "FM" on the student's transcript. Failure to pass the remedial work and supplemental assessment will lead to conversion of the grade to "F". If the student successfully completes the remedial work and supplemental assessment, the passing grade will then be added to the transcript and recorded as “P” with a notation that the grade was earned by supplemental assessment.
5. Failure in a second course (either a PBL or non-PBL course) will negate a pass that may have been achieved by supplemental assessment in the first failed course. (See F.1.a below.)

Repeating the Year

1. Subject to eligibility, a student will be required to repeat the year if:
    a. the student has failed any two courses (PBL or non-PBL courses) or

    b. the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment.

2. To be eligible to repeat a year, a student who has failed two courses must satisfactorily complete all other year requirements except the Practice Experience Program. However, a student with two failures will not be eligible to register in the Practice Experience Program.
3. Application to repeat the year must be made in writing to the Associate Director, Student Affairs by a predetermined date.
4. Any student who withdraws voluntarily, due to illness or other personal circumstances, and is allowed to repeat the year, will be considered a student in a repeat year unless the student withdraws before the last day of the first PBL course of the academic year, or the student tutorial performance assessment, if the two do not coincide.
5. No student will be allowed more than one repeat year during the undergraduate program. All students who repeat the year will be assessed on performance in the repeated year.

Leave of Absence

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. Normally, a student who absents himself/herself from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn and will have to re-apply for admission to the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Dismissal from the Study of Pharmacy

1. Any student who fails more than two courses (PBL or non-PBL courses) of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student in a repeat year who does not meet the criteria for promotion will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

Appeals

Students who wish to raise questions or to register complaints in matters of academic appeal are advised to communicate informally with their instructor within 10 working days of the alleged unfairness or irregularity. If no resolution arises from this (these) meeting(s), the student may initiate a formal appeal.

Students wishing to initiate a formal appeal should follow the appeals procedures as set out by the College of Pharmacy, Undergraduate Student Appeals Committee, Faculty of Health. These procedures are available online, Faculty of Health Professions website, "For current students", Student Policies and Procedures. Application for a formal appeal should be made to the College of Pharmacy Chair, Undergraduate Student Appeals Committee within 20 working days of the matter giving rise to the appeal.

Programs Offered

The College of Pharmacy offers a four-year program, following at least one year of general science, leading to the degree of Bachelor of Science (Pharmacy) - BSc (Pharm).

The undergraduate program has a patient-oriented curriculum integrating clinical pharmacy with the pharmaceutical sciences. The curriculum utilizes an integrated problem-based learning (PBL) format.

Year 1 includes pharmacy law and health care ethics, biomedical and physical sciences (anatomy, biochemistry, microbiology, pharmacology and physiology) in discrete three-to seven-week courses. The pharmaceutical sciences (biopharmaceutics and pharmacokinetics, medicinal chemistry, drug metabolism, toxicology, pharmaceutics and physical pharmacy) with necessary reviews of biomedical content, are integrated in Years 2 through 4, with therapeutics, pharmacoepidemiology, pharmacoeconomics, pharmaceutical care, communications, interprofessional relations, law and ethics, social and administrative pharmacy issues, and the role of pharmacy in the health care system.

The College participates with the Nova Scotia Health Authority (Central Zone), Halifax, NS; the Horizon Health Network, Saint John and Moncton, NB; and the IWK Health Centre, Halifax, NS (Accreditation Pending) in providing a Canadian Pharmacy Residency Board (CPRB) accredited twelve-month post graduate hospital pharmacy residency program.

Through structured rotations in various areas of pharmacy practice, the program aims to prepare pharmacists for exemplary pharmacy practice. Areas of rotation include patient care, drug information, drug distribution, pharmacy administration, a research project and in-service and education. The emphasis is on providing exemplary patient care. Practitioner role models/preceptors are utilized throughout the program to mentor the necessary skills, knowledge and values required to be a pharmacist for application by the resident. A stipend is provided and a certificate is presented to candidates successfully completing the program.

Undergraduate Curriculum Structure

The PBL curriculum, within the College of Pharmacy, may be scheduled past the posted exam periods. Students are responsible for all costs associated with expenses during this time (e.g. meal plan expiration, residence closure, etc.).

Problem-Based Learning (PBL) Courses

A minimal number of classes explain difficult concepts and summarize case material.

Tutorials

The principal feature of the curriculum is PBL. Students learn together in tutorial groups of eight to ten.

Each group is facilitated by a trained non (content)-expert tutor who may be faculty, sessional tutors, practitioners or graduate students.

Two-hour tutorials are held three times a week. In tutorial sessions students are presented with a situation for which they must identify their own prior knowledge and set specific learning objectives. Students use the time between tutorial sessions for self-directed learning of the objectives that they have set. Subsequent tutorials consist of discussion and application of knowledge.

Non-PBL Courses

There are some courses in each year that may be lecture based, assignment based, or case based.

Skills Laboratory

The skills laboratory focuses on practical skill development and application of knowledge acquired in the PBL curriculum and critical appraisal series. Activities required for successful completion of the practical experience program are introduced and practiced. Content includes but is not limited to: extemporaneous compounding, prescription filling and assessment, written and verbal communication skills, patient education, device training, injection training, and jurisprudence.

A cardiopulmonary resuscitation (CPR) level HCP and standard first aid course are the students' responsibility in cost.

Practice Experience Program (PEP)

A progressive professional field experience complements the PBL curriculum as follows:

Year 1 - Community Experience Program (CEP)

- the equivalent of a half day per week in a goal-related service learning in a non-pharmacy health-oriented community site.

Year 2 - Practice Experience Program (PEP)

- PHAR 2081.03: Practice Experience Program - Hospital Rotation (two consecutive weeks)
- PHAR 2082.03: Practice Experience Program (PEP) II - Community Rotation (two consecutive weeks)

Second year rotations are completed during the months of May - August, after successful completion of all other second year courses. Each rotation is two weeks in length, at a minimum of 35 hours/week. Second year rotations provide students with an opportunity to see pharmacists practice patient focused care in both community and hospital practice settings. Time is also spent on the distributive, legislative and administrative components of pharmacy practice.

Year 3 - Practice Experience Program (PEP)

- PHAR 3080.03: Practice Experience Program (PEP) III - Community Rotation (four consecutive weeks)

This rotation is completed during the months of May - August, after successful completion of all other third year courses. This rotation is four weeks in length at a minimum of 35 hours/week and introduces students to the practical application of the pharmacist's patient care process in a community pharmacy. Rotation objectives address drug information, prescription and non-prescription medications, patient education, and health promotion presentations to community groups. This rotation is intended to provide an introductory experience to clinical activities including: monitoring patients, identifying drug-related problems, and defining and measuring patient goals and outcomes.

Year 4 - Practice Experience Program (PEP)

- PHAR 4080.045: Practice Experience Program (PEP) IV – Hospital Rotation (six consecutive weeks)
- PHAR 4085.045: Practice Experience Program (PEP) V – Community Rotation (six consecutive weeks)

These six-week rotations are the culmination of the student's study. Experiential rotations in hospital and community practice sites allow students the opportunity to apply all the knowledge, skills and values they have developed to the provision of total pharmacy care. The focus of these rotations is patient-based and primarily clinical. Each rotation is six-weeks, at a minimum of 40 hours/week.

For each rotation, from year 2 through to year 4, students are required to travel to sites outside of the Halifax area and will be responsible for any costs incurred as a result of the program.

Students should note that there are very limited PEP rotation sites outside the Maritime Provinces. All PEP rotations must take place within Canada. Students must be prepared to complete all PEP rotations within the Maritimes.

Prescribed Courses

Year 1

- ANAT 1040.03: Basic Human Anatomy for Pharmacy Students
- BIOC 1040.06: Biological Chemistry and Metabolism for Students of Pharmacy
- CHEM 2442.03: Organic Chemistry for Pharmacy Students
- MICI 1050.03: Basic Microbiology and Immunology for Pharmacy
- PHAC 1470.06: Pharmacology for Pharmacy
- PHAR 1060.015: Pharmacy Law and Health Care Ethics
- PHAR 1070.03: Pharmacy Skills Lab I
- PHAR 1080.00: Community Experience Program
- PHYL 1400.06: Human Physiology

Year 2

- PHAR 2010.03: Critical Appraisal Series II
- PHAR 2015.03: Topical Products (Dermatologicals)
- PHAR 2020.03: Topical Products (Eye and Ear)
- PHAR 2035.06: Respiratory Tract Complaints
- PHAR 2040.03: Gastrointestinal Disorders
- PHAR 2045.015: Nutrition
- PHAR 2055.015: Drug Disposition
- PHAR 2060.015: Medication Use Management
- PHAR 2070.03: Pharmacy Skills Lab II
- PHAR 2081.03: Practice Experience Program (PEP) I
- PHAR 2082.03: Practice Experience Program (PEP) II

Year 3

- PHAR 3010.03: Critical Appraisal Series II
- PHAR 3020.03: Women's Health Issues
- PHAR 3030.03: Infectious Diseases
- PHAR 3040.06: Cardiovascular Diseases
- PHAR 3050.03: Pain and Rheumatology
- PHAR 3055.06: CNS and Behavioral Disorders
- PHAR 3060.03: Endocrine Disorders
- PHAR 3070.03: Pharmacy Skills Lab III
- PHAR 3080.03: Practice Experience Program (PEP) III

Year 4

- PHAR 4010.015: Critical Appraisal Series III
- PHAR 4025.06: Pathocytologic Disorders
- PHAR 4035.06: Disorder of the Liver and Genitourinary Systems
- PHAR 4060.03: Advanced Patient Health Management
- PHAR 4070.015: Pharmacy Skills Lab IV
- PHAR 4080.045: Practice Experience Program (PEP) IV
- PHAR 4085.045: Practice Experience Program (PEP) V

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 5).** Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

General Information

Immunization

Students must show proof* of current immunization against tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, Hepatitis B, varicella (if non-immune) and a negative two-step Mantoux (TB) test prior to admission to the College.

Evidence of a negative two-step tuberculin testing (Mantoux) is required before all hospital rotations. Students are responsible for the cost of all tests and immunizations.

*Students must complete the Faculty of Health Professions' infectious disease and immunization checklist.

Each student is required to maintain their personal immunization record, and submit a copy by a set deadline for their student file. Individual sites may require students to present immunization records prior to acceptance at a practice site. Individual clinical practice sites may have additional immunization requirements. Failure to provide this information may result in a student being denied access to a placement site.

Career Opportunities

Pharmacy is a health profession in which pharmacists provide care for their patients as one member of the health care team. This care focuses on the patient from the perspective of drug therapy. The pharmacist is responsible to identify, prevent and resolve patient drug therapy problems. Specific activities include: taking medication histories, identifying goals for drug therapy, providing recommendations and education to patients regarding self-medication, providing recommendations to other health care providers on drug therapy, working with patients to maximize benefits and minimize adverse effects of drug therapy, maintaining patient drug profiles, counseling patients on prescribed medication, monitoring drug interactions, adverse drug reactions and patient compliance with their drug treatment. Other activities include the provision of information on drugs to patients and other health professionals, the preparation of suitable materials for use as medicines from natural and synthetic sources, the compounding of drugs and the dispensing of suitable medication.

Pharmacy graduates have a wide range of career opportunities. The majority enter community pharmacy practice. Hospital pharmacy also provides an interesting challenge for pharmacists, particularly in view of their expanding role within the clinical setting. The pharmaceutical industry provides opportunities for pharmacists in the fields of sales and marketing, production, research and quality control.

The increased role of federal and provincial governments in public health provides opportunities for pharmacists in analytical laboratories and in administrative position as consultants, government inspectors and health officers. Opportunities may also be available in universities as teachers and researchers.

A Bachelor of Science in Pharmacy is necessary for those who wish to practice as licensed pharmacists. For those who wish to enter research or teaching, a Master of Science degree or further postgraduate study is usually required.

Practice Requirements

1. License in Pharmacy

The College of Pharmacy, being purely educational, has no jurisdiction in matters related to licensing or to registration as a Pharmacist. These functions are entirely under the control of the provincial regulatory authority concerned; a period of practical training or apprenticeship is required by the provincial regulatory authority before a graduate in pharmacy is licensed as a pharmacist. Information regarding licensing or registration in each province may be obtained from the respective provincial regulatory authority: New Brunswick College of Pharmacists; Prince Edward Island College of Pharmacists; Nova Scotia College of Pharmacists.

2. Pharmacy Examining Board of Canada (PEBC)

The Pharmacy Examining board of Canada was created by Federal Statute on December 21, 1963, to establish qualifications for pharmacists acceptable to participating pharmacy provincial regulatory authorities. The Board provides for annual examinations and issues a certificate to the successful candidate, which may be filed with a Canadian provincial regulatory authority in connection with an application for license to practice pharmacy under the laws of that province. Baccalaureate graduates from Faculties of Pharmacy accredited by the Canadian Council for Accreditation of Pharmacy Programs are eligible to write these examinations. Successful completion of these examinations is a prerequisite to licensure in Canada.

Individuals who are not graduates of an accredited Canadian Faculty of Pharmacy must first complete the PEBC Qualifying Exam.

Student Pharmacy Society

The basic aims of the Student Pharmacy Society are to promote a closer liaison with the other societies on campus, to give the pharmacy students a strong position with regard to Student Council activities, to provide a means of communications between students and their respective provincial regulatory authorities in the Maritimes, and to provide an organizational body which plans and finances the various unique Pharmacy Society activities.

Membership in the Pharmacy Society includes membership in the Canadian Association of Pharmacy Students and Interns and membership in the Canadian Pharmacists Association.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHAR 1060 Pharmacy Law and Health Care Ethics
CREDIT HOURS: 1.5
This problem-based learning course focuses on the provincial and federal laws that regulate the practice and profession of pharmacy, and key ethical principles and considerations for the pharmacist. Students will learn through a series of mini-cases based on real-life practice scenarios, with integrated ethical components. Students will be introduced to professionalism and the associated responsibilities of a pharmacist. This course introduces students to the legal and professional framework on which all pharmacists practice. Integrated courses in future classes will build on the law and ethics introduced in this course.
FORMATS: Lecture | Tutorial

PHAR 1070 Pharmacy Skills Lab I
CREDIT HOURS: 3
Skills Lab I provides an introduction to skills required by a practicing pharmacist. These include communication skills, pharmacy computer skills, prescription processing and compounding of select dosage forms.
FORMATS: Lecture | Lab | Tutorial

PHAR 1080 Community Experience Program
CREDIT HOURS: 0
This program consists of service learning at a health-related but non-pharmacy site such as the Canadian Cancer Society, CNIB, Special Olympics etc. The purpose is to augment developing communication skills, interpersonal skills, basic work ethics including the importance of teamwork, introduction to client needs and the professional helping ethic. An inter-professional health mentor experience is also part of this course.N. Harris

PHAR 2010 Critical Appraisal Series I
CREDIT HOURS: 3
Students are introduced to a variety of drug/health information resources, including specific websites, texts, journals, bibliographic databases, and the Regional Drug Information Service. They gain experience in evaluating and using these resources efficiently and effectively through various activities including assignments. Second term focuses on the fundamentals of clinical research methodology, evaluating research papers, and biostatistics.
FORMATS: Lecture

PHAR 2015 Topical Products (Dermatologicals)
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2015 deals with common dermatological problems seen by pharmacists and the management of these problems.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Tutorial

PHAR 2020 Topical Products (Eye and Ear)
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2020 is devoted to common problems of the eye and ear, and include those of an infectious and non-infectious nature.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Tutorial

PHAR 2035 Respiratory Tract Complaints
CREDIT HOURS: 6
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and phamacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2035 deals with common infectious and non-infectious respiratory complaints, treated with non-prescription and prescription medications.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Tutorial

PHAR 2040 Gastrointestinal Disorders
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and phamacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2040 focuses on gastrointestinal ailments, and their management. Topics include acid-pepsin disease, diarrhea, constipation, and inflammatory bowel disease and anemia.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Tutorial

PHAR 2045 Nutrition
CREDIT HOURS: 1.5
Students will learn about nutritional needs of healthy clients and special populations. The roles, the daily requirements and sources of various vitamins, and pathological consequences of dietary deficiencies will be addressed. Special nutritional challenges in pregnancy, infancy, elderly, and grave illness will be examined.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Tutorial

PHAR 2055 Drug Disposition
CREDIT HOURS: 1.5
The objective of this course is to provide students with an overview of the determinants of drug disposition, including a qualitative and quantitative assessment of drug absorption, distribution, metabolism and excretion. Major topics include hepatic and renal clearance, and factors which alter pharmacokinetics such as protein binding, disease states, age, enzyme induction/inhibition, drug interactions, and obesity, gender, and genetics.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture

PHAR 2060 Medication Use Management
CREDIT HOURS: 1.5
This course introduces the pharmacy student to the "big picture" issues of the medication-use system. The three parts of the course are as follows: (1) an overview of the medication-use system, (2) discussion of the problems with the medication-use system and (3) exploration of potential solutions to these problems.
PREREQUISITES: Successful completion of all first year pharmacy
FORMATS: Lecture

PHAR 2070 Pharmacy Skills Lab II
CREDIT HOURS: 3
Skills Lab II expands upon the skills earned in Skills Lab I. Students are introduced to the Dalhousie College of Pharmacy Pharmacist's Patient Care Process. Written and verbal communication skills and patient assessment techniques are taught to support this process. Students learn to identify drug therapy problems and develop therapeutic management and monitoring plans. Knowledge obtained in the Problem Based Learning (PBL) and Critical Appraisal Series (CAS) components of the program are applied. Students will examine social, ethical and professional practice issues. Successful completion of a cardiopulmonary resuscitation (CPR) level HCP and standard first aid course is a requirement for a passing grade.
PREREQUISITES: Successful completion of all first year classes
FORMATS: Lecture | Lab

PHAR 2081 Practice Experience Program (PEP) I
CREDIT HOURS: 3
This rotation provides students with an opportunity to see patient centered pharmacy care in a hospital practice setting. Specific units focus on drug information, hospital pharmacy services provided as part of the healthcare team, sterile procedures and IV admixtures, medication safety, and interprofessional education opportunities. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of second year classes (see College of Pharmacy Regulation F2)

PHAR 2082 Practice Experience Program (PEP) II
CREDIT HOURS: 3
This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Pharmacy law, narcotics and controlled drugs, third party insurers, processing prescriptions, provincial formularies, drug information and systems management are key areas of this rotation. This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of second year classes (see College of Pharmacy Regulation F2)

PHAR 2999 Independant Elective
CREDIT HOURS: 0
FORMATS: Lecture

PHAR 3010 Critical Appraisal Series II
CREDIT HOURS: 3
This course advances and reinforces the topics learned in PHAR 2010.03. The first term focuses on research methods and biostatistics seen in various trial designs. Students learn to critically evaluate the medical literature and write a term paper reviewing the evidence behind a clinical decision. The second term will focus on applying the tenets of evidence-based clinical practice. Through a journal club setting, students will evaluate the strengths and weaknesses seen in the literature as they relate to a clinical situation. Students are expected to use these skills in their problem-based learning classes.
PREREQUISITES: PHAR 2010.03 or consent of instructor
FORMATS: Lecture

PHAR 3020 Women's Health Issues
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3020.03 deals with common women's health issues such as contraception, osteoporosis and menopause and the management of these problems.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3030 Infectious Diseases
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3030.03 is devoted to miscellaneous infectious diseases.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3040 Cardiovascular Diseases
CREDIT HOURS: 6
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3040.06 addresses cardiovascular diseases such as hypertension, ischemic

heart disease, congestive heart failure and thromboembolism, and the pharmacologic management of these conditions.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3050 Pain and Rheumatology
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3050.03 deals with the understanding and management of acute and chronic pain of various origins.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3055 CNS and Behavioral Disorders
CREDIT HOURS: 6
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3055.06 involves the study of an array of conditions ranging from depression to seizure disorders.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3060 Endocrine Disorders
CREDIT HOURS: 3
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Disorder included in PHAR 3060.03 are diabetes and thyroid conditions.
PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Tutorial

PHAR 3070 Pharmacy Skills Lab III
CREDIT HOURS: 3
Skills Lab III expands on the concepts learned in skills lab I and II. An added emphasis will be placed on written communication skills and prescription therapeutics as covered in the PBL curriculum. Students are expected to use Knowledge from CAS for the purposes of therapeutic-decision making and patient education. Lectures and device training will compliment the PBL curriculum. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam.

PREREQUISITES: Successful completion of all second year classes
FORMATS: Lecture | Lab | Seminar

PHAR 3080 Practice Experience Program (PEP) III
CREDIT HOURS: 3
This rotation focuses on the practical implementation of patient centered pharmacy care in community practice. Students will complete a variety of patient care work-ups. Provision of drug information, prescription and non-prescription medications, patient education and health promotion are integral components of this rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of third year classes (see College of Pharmacy Regulations F2)

PHAR 3999 Independant Elective
CREDIT HOURS: 0
FORMATS: Lecture

PHAR 4010 Critical Appraisal Series III
CREDIT HOURS: 1.5
This is a continuation of PHAR 3010.03. Students will combine their skills from the previous courses in this series as well as knowledge and skills derived from their problem-based learning curriculum and skills lab courses in a variety of tasks over the term. The ability to follow an evidence-based approach for supporting clinical decisions will be emphasized.
PREREQUISITES: Successful completion of all third year classes
FORMATS: Lecture

PHAR 4025 Pathocytologic Disorders
CREDIT HOURS: 6
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. This course deals with the pharmacotherapy of common cancers and includes issues such as pain control.
PREREQUISITES: Successful completion of all third year classes
FORMATS: Lecture | Tutorial

PHAR 4035 Disorder of the Liver and Genitourinary Systems
CREDIT HOURS: 6
Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. This course deals with hepatitis, various other liver disorders, renal disease and men's health issues related to the genitourinary tract.
PREREQUISITES: Successful completion of all third year classes
FORMATS: Lecture | Tutorial

PHAR 4060 Advanced Patient Health Management
CREDIT HOURS: 3
Three major areas of patient health management will be discussed in this class: (1) the Canadian healthcare system and pharmacy benefit management; (2) pharmacoeconomics and formulary decision making; and (3) human resource management and leadership principles and practices in pharmacy.
PREREQUISITES: Successful completion of third year pharmacy.
FORMATS: Lecture | Tutorial

PHAR 4070 Pharmacy Skills Lab IV
CREDIT HOURS: 1.5
Skill Lab IV expands upon the skills learned in Skills Lab I, II and III. Students must apply the knowledge learned in other components of the curriculum and specific activities include but are not limited to: patient interviewing, assessment and education. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam. Injection Training is a required component of Skills Lab IV.
PREREQUISITES: Successful completion of all third year classes
FORMATS: Lecture | Lab | Seminar

PHAR 4080 Practice Experience Program (PEP) IV
CREDIT HOURS: 4.5
This clinical rotation focuses primarily on the provision of patient focused pharmacy care in hospital or long-term care practice. The student will apply the knowledge, skills and values that have been learned in their academic study and previous PEP rotations, using a patient-centered approach. Students will serve as a member of the healthcare team incorporating professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete a full patient care work-up on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting an in-service on a relevant topic to a health professional audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: successful completion of fourth year classes (see College of Pharmacy Regulation F2)

PHAR 4085 Practice Experience Program (PEP) V
CREDIT HOURS: 4.5
This clinical rotation focuses primarily on the practical provision of patient centered pharmacy care in community practice. As with the hospital rotation, students will apply the knowledge, skills and values that have been acquired throughout academic study and previous PEP rotations using a patient-centered approach. Interaction with family physicians and other healthcare professionals in the community is a key component of this rotation. Students should have the opportunity to interact with patients in the physician's office, pharmacy and/or home environment. Students will serve as a member of the healthcare team and incorporate professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete full patient care work-ups on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting a relevant health promotion/disease prevention topic to a community audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of fourth year classes (see College of Pharmacy Regulation F2)

School of Social Work

Location: Mona Campbell Building
1459 LeMarchant Street
Suite 3201
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3760

Fax: (902) 494-6709

Website: www.socialwork.dal.ca

Email: social.work@dal.ca

Introduction
The School of Social Work's vision is a commitment to building a socially just society, defined as one that upholds and validates the values of equality, diversity, inclusiveness, democracy and concern for human welfare. We manifest and advance curricula, scholarship and school culture that are congruent with those values.

The BSW degree program is accredited by the Canadian Association for Social Work Education. It embraces a critical and anti-oppressive approach to social work practice that includes an emphasis on social policy, research skills and critical analysis, professional values, theoretical perspectives and practice methods. While the program has evolved within the context of the people, communities and service network of the Maritime Provinces, graduates are qualified to practice social work throughout Canada and beyond.

BSW Delivery Options
The BSW is a 120 credit hour degree program and is offered on campus and by distance delivery online. Both delivery methods include a 700 hour community based field placement experience. The application deadline is February 15th of each year.

Relationship to the MSW Program
The School of Social work offers a Master of Social Work degree for advanced specialized study in social work practice. The academic prerequisite for the MSW degree is a BSW. Dalhousie has historically offered a two-year option for applicants who do not hold a baccalaureate degree in Social Work, but hold a master's degree in a closely related discipline and otherwise meet the above prerequisites. However, **the structure of this two-year option is currently under review, and admission is suspended for the 2017-2018 academic year.** The program will continue to be delivered to any current students until all students have graduated, or the time allowed for program completion has lapsed, or all the students have left the program.

Continuing Education
The School offers a Continuing Education Program (non-credit) of thematic workshops.

Nova Scotia College of Social Workers
Provincial legislation requires that only persons who are licensed with the Nova Scotia College of Social Workers (NSCSW) can practice as social workers within Nova Scotia. To become fully licensed and use the title of Social Worker after award of the BSW degree, at least 3,858 hours of paid supervised social work experience is necessary. For more information please contact NSCSW at http://nscsw.org/

Professors
Karabanow, J., BA, MA (McGill), PhD (Wilfrid Laurier)
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier)
Weinberg, M., BA (Toronto), MSW (Smith College), PhD (Toronto)

Associate Professors
Brown, C., BA, MA (Manitoba), MSW (Carleton), PhD (Toronto)
Brown, M., BA, BSW, MSW (Dalhousie), PhD (Memorial)
MacDonald, J., BSW (St. Thomas), MSW (Carleton), PhD (Memorial)

Assistant Professors
Baikie, G., BSW, MSW, PhD candidate (Memorial)
Bryan, C., BA (Univ of Winnipeg) BSW, MSW (McGill), PhD (Dalhousie)
Hanrahan, C., BA (McGill), MA (Toronto), MSW (York), PhD (Toronto)
Johnstone, M., EEd (Ottawa), BSW (Carleton), MSW, PhD (Toronto)
MacDonald, N., BA, BSW, MSW, PhD Candidate (Dalhousie)
Manning, E., BA (Manitoba) BSW, MSW (Victoria), PhD (York), PhD (Simon Fraser)
Mbakogu, I., BA, MA, MSW, PhD (Univ of Ibadan), PhD (McGill)
Ross, N., BA, BSW, MSW, PhD (Bradford UK)

Adjunct Professors
Campbell, C.
Harbison, J.
Petty, M.
Wien, F.

Agency Field Instructors
Many individuals throughout the municipality, province, and country contribute to the education of Social Work students through offering and supervising student placements. They represent a wide range of agencies and organizations including: community based, non-profit, government, physical/mental health and addiction prevention and treatment services. Their invaluable assistance is gratefully acknowledged and appreciated.

Admissions

Information on academic preparation, admission and application procedures is contained in the Admission Requirements section of the calendar. Enrolment is limited to a specified number of places that are offered once a year to the best qualified candidates, selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications.

Prior Criminal Conviction

BSW applicants should be aware that a prior criminal conviction may render them unable to obtain a license in their field of study upon graduation, or unable to participate in some clinical field work experiences throughout their course of study.

Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, and persons with (dis)Abilities and for Lesbian, Gay, Bisexual, Transgender, Two-Spirit, Queer and Intersex (LGBTTQI) people. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five (30 credit hours) general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants make their request in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualifications, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

Regulations

All Bachelor of Social Work students are required to observe the University Regulations and Academic Regulations of Dalhousie University and the Faculty of Health set forth in the annual Undergraduate Calendar.

Grade Point Average Requirements

Faculty of Health's academic regulations applies to the BSW degree requirements. Students require a cumulative GPA of 2.0 to graduate. In addition, the School's grade requirements specified in Items 2 and 3 below apply to components of the Social Work curriculum.

Grade Requirements for Social Work Courses

The minimum requirements for satisfactory completion of a Social Work course is C-. In the case of a core course, a student who earns a grade of less than C-, but is otherwise still eligible to continue in the program, must repeat the course until a grade of C- is attained. In the case of an elective, a student who earns a grade of less than a C-, but is otherwise still eligible to continue in the program, must repeat the same elective or if not offered during the student's course of study, a different elective until a grade of at least C- is attained. Social Work courses are all courses taken under BSW study other than those designated as general admission credits.

Required Withdrawal: Academic Dismissal

A student who fails to meet sessional GPA standards as defined in the Academic Regulations - Faculty of Health must withdraw from the School for at least 12 months. (Please refer to Academic Regulations - Good Standing, Probation and Academic Dismissal, Dalhousie Undergraduate Calendar).

- A student who fails a repeated academic course must normally withdraw from the BSW Program.
- A student who fails SLWK 4033, Field Practicum and Seminar is required to withdraw from the BSW Program.

Required Withdrawal on Grounds of Unsuitability

See University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health.

Consideration of Readmission

Students are normally required to complete their undergraduate studies within ten years of their first registration and comply with the program requirements at the time of first registration. If a student is readmitted and cannot complete the program within 10 years they may be required to comply with the new program requirements.

A. Request for Readmission After Dismissal

Students who have been required to withdraw from the School of Social Work on the basis of academic dismissal may apply for readmission by the annual February 15 admissions deadline date that follows a minimum of 12 month's absence from the School. Due to the competitive nature of the enrolment process, readmission of students is not guaranteed.

B. Request for Readmission After Voluntary Withdrawal

Students in good standing who have not registered in the program for 36 months or less and who wish to be reinstated are required to submit a new application form to be returned with a letter to the Undergraduate Program Coordinator requesting re-admission to resume their BSW degree studies. Students in good standing who have not registered in the program for 37 months or more and who wish to be reinstated are required to reapply by the February 15 admission deadline date. The application and all supporting documentation must be accompanied by a letter explaining the reasons for the interruption in the student's studies and the decision to request readmission to the BSW degree program.

Appeals

A student wishing to appeal a decision based on School regulations, should consult with the Chair of the Committee on Undergraduate Studies for advice on appeal procedures.

Duration of Undergraduate Study

Students are normally required to complete the BSW degree within 10 years of their first registration (see Academic Regulation—Duration of Undergraduate Studies).

Workload Regular Academic Year

30 credit hours per academic year shall be regarded as constituting a normal workload for a full-time student. Permission of the Undergraduate Program Coordinator is required if this workload is to be exceeded, or if the planned workload in any one term (Fall or Winter) would amount to more than 15 credit hours per term.

On-campus, part-time students may register for a minimum of one .03 credit (three credit hours) per term. Part-time status applies to students registered for no more than a total of 2.5 credits (15 credit hours) in the Fall and/or Winter terms. All new students are required to register in the first Fall term following their acceptance in order to maintain their place in the program.

Workload Summer Session (includes May-June and July-August)

Dalhousie regulations permit students to take six credit hours in each of the May-June and July-August parts of Summer term. Social Work students may, following consultation with the Field Coordinator, register for the Field Practicum and Seminar course during this session.

The School usually offers one .03 credit Social work course in the May/June period for BSW campus students, provided that minimum enrollment requirements are met. Students in distance delivery take elective and core courses in the summer sessions. Consult the timetable for current course offerings.

Permission of the Undergraduate Program coordinator is required to exceed the two-credit limit for the two summer terms.

Students in Other Degree Programs (applicable for on-campus students only)

Students enrolled in degree programs at Dalhousie may, in conformance with their program regulations, choose their degree electives from Social Work Field of Practice electives. Permission from the instructor is required; course prerequisites and class size limitations apply. Students are able to enroll in Social Work electives only to the maximum credit value allowable for open electives by their degree requirements. Any additional Social Work courses would be considered on the same basis as "No Degree."

Special Students "Non-Degree" (applicable for on-campus students only)

Social Work courses are not available to persons on a "no degree" basis, with the exception of agency field instructors and other qualified Social Work professionals who are able to satisfy normal admission requirements. Permission of the Undergraduate Coordinator is also required.

Students enrolled in other Social Work degree programs may be permitted to enroll in specific courses, by application for admission as a visiting student with letter(s) of permission from the home university. Course prerequisites and size limitations apply. Further information may be obtained from the Student Services Coordinator.

Deferral Policy

Newly accepted applicants who, for reasons beyond their control, are unable to take up their position on the date from which they were accepted, may request a deferral of one year. No student may receive more than one deferral. Foundational courses begin in September, therefore the deferral would be from September to the following September.

Requests for a deferral of admission should be sent in writing to the Admissions Coordinator of the School of Social Work by August 15th for the year in which they were offered admission. When submitting a request for deferral, an applicant should clearly state the reason for their deferral and, where relevant or appropriate, provide additional documentation to support the request (for example, medical certificates). All deferrals are subject to the approval of the Undergraduate Program Coordinator.

Audit by Agency Field Instructors

The School of Social Work permits Agency Field Instructors to audit Social Work courses. Prior permission of the instructor concerned is required. In order for the audit to show on a University transcript, the agency field instructor must abide by the audit and fee regulations as outlined in Academic Regulation—Audit of Courses.

Tuition Fees

Detailed information concerning tuition and fees is available in Money Matters at https://dal.ca/moneymatters.

BSW Degree Program

Program Objectives

Upon successful completion of the BSW program, students will:

1. Have an understanding of equity and justice through critical analysis.
2. Develop intellectual skills, scholarly attributes, and professional characteristics and values, including but not limited to, curiosity, open-mindedness, effective communications, judgment, rigor, respect, humility, embracing of difference, acceptance, integrity, compassion, self-care and ethical action.
3. Develop insight into the complex, contextual, and sometimes contradictory nature of social work theory, practice, policy, ethics and research.
4. The development of practice theory and skills "required to analyze situations, establish accountable relationships, intervene appropriately with clients and related systems and evaluate one's social work interventions" (CASWE, 2007) This includes an understanding of a range of life events and processes that may impact peoples' development, personalities and potentials.
5. Develop a critical understanding of the personal and professional "use of self."

Program Requirements
The BSW degree is comprised of 120 credit hours

30 credit hours:
These are the basic academic pre-requisite for all applicants to the program.
These are called **Admission Credits.**

60 credit hours:
These are the credits that all students are required to complete within the Dalhousie University BSW Program.
These are called **Social Work Credits**.

30 credit hours:
These are **General Social Sciences Credits** taken outside the BSW program:

1. Some students have more than the 30 Admission Credits at a B- minimum average ***before*** beginning the BSW program. These are assessed for eligibility at the time of acceptance to the program from the last 60 credit hours completed. These are called *admission transfer credits.* They may have been completed at Dalhousie or another university. Please see the Admission Credit Transfer Policy below for requirements.
2. Some students undertake the additional 30 Liberal Arts credits ***during*** the BSW degree. These are not transfer credits. These may be taken at Dalhousie or another university and must be assessed as at or above the 2000 level by Dalhousie University. Please review the academic regulations regarding Letter of Permission in the Academic Calendar.

* Electives external to the School of Social Work or the Faculty of Health taken during the SW program must be assessed at the Dalhousie equivalency of 2000 level or above.
* For electives external to Dalhousie University taken during the SW program please review the academic regulations regarding Letter of Permission in the Academic Calendar.
* For electives external to Dalhousie University taken before admission to the Dalhousie SW program please see the Transfer Credit Policy below.

Required Courses

- SLWK 2010.03: Introduction to Community Social Work
- SLWK 2111.06: Development of Canadian Social Work and Social Welfare

- SLWK 2222.03: Advancing Social Justice
- SLWK 2333.06: Beginning Social Work Practice or SLWK 2334.03/SLWK 2335.03
- SLWK 2444.03: Life Processes: Conceptualizations and Practices for Critical Social Work
- SLWK 3030:06: Theoretical Foundations of Social Work Practice
- SLWK 3012:03: Perspectives on Social Welfare Policy
- SLWK 3085.06 (SLWK 3086/SLWK 3087): Social Work Reserch
- SLWK 3220.03: Cross-Cultural Issues in Social Work Practice
- SLWK 4010.06: Advanced Social Work Practice
- SLWK 4033.09: Field Practicum and Seminar (SLWK 4034/SLWK 4035)
- Social Work Elective
- Social Work Elective

For distance students the Beginning Social Work Practice course has two course numbers and students must register for both SLWK 2334 and SLWK 2335. The course is a combination of online study in the winter term and a two week on-campus (Dalhousie, Halifax, NS) residency component in the spring session, normally in May.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 6)** which is a shell course comprised of four interprofessional learning experiences across the BSW degree. Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health. Registration in IPHE 4900 does not constitute a course overload.

Pre-Admission Credits Transfer Policy

Suitable university credits that have been completed with a cumulative average of 2.7 (or B-) are eligible for transfer credit consideration. Community College credits, diploma and certificate work are not eligible for consideration. The following procedures guide the assignment of transfer credit:

1. Applicants who are admitted with the minimum academic requirement of 30 credit hours are not eligible to receive Pre-Admission Transfer Credits.
2. A maximum of 30 Liberal Arts transfer credits that are complete at the time of application, may be applied to those admitted with credits above the minimum academic requirements.
3. Potential pre-admission transfer credits are assessed at admissions, and only on the last 60 credit hours completed.
4. Regardless of transfer credit eligibility, all students must complete at least 60 credit hours offered by the Dalhousie SSW to complete the BSW degree.
5. The only exception to the above will be students transferring from other BSW university programs. These students will be governed under the Faculty of Health Policy regarding transfer students. To obtain a BSW degree from Dalhousie, at least half the credits must be taken at Dalhousie University. Transfer credit is assigned as fairly and appropriately as possible, although some loss of credit usually occurs.

Transfer credit assessment is completed after the admission process, and only for successful applicants. Transfer credit is assessed on an individual basis at the School of Social Work.

Course Load and Sequencing

Length of Program

Most students accepted to the BSW program have a degree on entry with the required cumulative grade point average. Such students normally require 60 credit hours to complete the BSW degree. Students studying on campus may register on a full-time basis for two years of study, or on a part-time basis (to a maximum of ten years). Distance students may register for a two-year (24 month) full-time program of study, or a three-year part-time program of study (to a maximum of 10 years).

Students registered who have only 30 credit hours on entry (usually persons with related work experience) are required to complete three full-time years of study (90 credit hours) or the part-time equivalent.

Students registered with 36 credit hours or more on entry but less than 90 credit hours, complete a two-to-three year program as determined by the number of prior credits in relation to the School's transfer credit policy.

Course load and sequencing may vary from student to student depending upon the number of transfer credits and full or part-time status.

On-Campus Delivery

- For full-time students the usual load is 15 credit hours (e.g. five .03 credit courses) in the Fall and Winter terms.
- For part-time study the course load may be as minimal as one .03 credit course per term.
- The only Social Work courses offered in the Spring semester consist of one Social Work elective and Field Practicum and Seminar.
- It is important to pay close attention to the pre or co-requisites for each course. These are indicated in the course descriptions.

Distance Delivery

Distance Students are strongly encouraged to maintain their course sequencing schedule. Any changes must be in accordance with pre- and co-requisites as outlined in the calendar and are dependent upon availability of course offerings, especially electives. Students studying by distance are assessed distance delivery fees in addition to tuition.

Registration

Registration is completed online for all students regardless of delivery method. For more information, go to http://www.dal.ca/registration and http://www.dal.ca/online.

The academic timetable is available online each year. On-campus Social Work courses have section numbers of 01 or 02. Online Distance Social Work courses have section numbers of 07 or 08.

IMPORTANT: Please note that it is not possible to transfer between onsite and the online delivery or to register for courses other than those which apply to the delivery method for which the student has been accepted.

Field Education

The Field Practicum and Seminar course consists of a 700 hour placement at a community agency **plus** participation in a concurrent integrated seminar. For a full explanation of the placement process, roles and responsibilities please download the Field Manual at http://socialwork.dal.ca/Prospective Students/

Field Placements are organized by the Field Education Coordinator at the School of Social Work.

Advising Sessions for New Students

New on campus students are expected to attend Orientation which is scheduled prior to the commencement of courses. Students can meet individually with the Student Services Coordinator to review the curriculum advising forms and ask questions pertaining to the BSW program. Distance students are provided with an online orientation and information site and should contact the Distance Education Assistant or the Manager, e-Learning regarding their program schedule and questions.

A comprehensive Field Orientation is also offered later in the 1st year for all campus BSW students and during residency for distance BSW students.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The following courses are restricted to Social Work students.

SLWK 2010.03: Introduction to Community Social Work.
SLWK 2111X/Y.06: Development of Canadian Social Work and Social Welfare.
SLWK 2222.03: Advancing Social Justice.
SLWK 2333X/Y.06 (SLWK 2334/SLWK 2335): Beginning Social Work Practice.
SLWK 2444.03: Life Processes: Conceptualizations and practices for Critical Social Work.
SLWK 3012.03: Perspectives on Social Welfare Policy.
SLWK 3030.06: Theoretical Foundations of Social Work Practice.
SLWK 3085.06 **(SLWK 3086/SLWK 3087): Social Work Research**
SLWK 3220.03: Cross-Cultural Issues and Social Work Practice.
SLWK 4010.06: Advanced Social Work Practice.
SLWK 4033.09 (SLWK 4034/SLWK 4035): Field Practicum and Seminar.

Electives

In keeping with the overall program goals of the BSW program of SSW, all elective courses are designed to help students develop a critical analysis of the major themes and current issues related to the course topic. In addition, all electives explore the differential impact of social constructs such as race, gender, class, age, sexual orientation, and ability on the particular issue or practice field.

There are no pre or co-requisites for Social Work Field of Practice Electives. The format is generally a combination of lecture, discussions and small group activities. Participation of non-social work students is dependent upon approval of their home School/Department, course enrollment and the permission of the instructor. Not all electives are offered every year; check the timetable for each year's offerings.

Possible Elective Offerings

- SLWK 3110.03: Africentric Perspectives in Social Work
- SLWK 3120.03: International Social Work
- SLWK 3130.03: Gender Based Violence
- SLWK 3135.03: Social Work and Mental Health
- SLWK 3140.03: Crisis Counseling
- SLWK 3150.03: Poverty and Inequality
- SLWK 3160.03: Social Work with Aboriginal Populations
- SLWK 3200.03: Law and Social Work

- SLWK 3245.03: Queer-Centred Social Work Practice
- SLWK 3250.03: Social Work in Corrections
- SLWK 3270.03: Social Work in Addictions
- SLWK 3290.03: Advanced Counseling in Social Work Practice
- SLWK 3320.03: Social Work and Aging
- SLWK 3330.03: Independent Study
- SLWK 3350.03: Social Work with Groups
- SLWK 3360:03: Social Work and Adolescents
- SLWK 3370.03: Child Welfare
- SLWK 4380.03: Disability Policy and Service

Course Descriptions

SLWK 2010 Introduction to Community Social Work
CREDIT HOURS: 3
Community Development within social work is the facilitation of meaningful change within communities to improve the quality of life for members of those communities. This course considers various conceptions of community, elements of change processes, and specific change strategies.

SLWK 2111 Development of Canadian Social Work and Social Welfare
CREDIT HOURS: 6
This is an introductory survey course, offering a beginning examination of topics and issues that will be examined in greater depth in other courses during the BSW program. By reviewing the historical development of the politics, principles, policies, practices, values, and ethics of Canadian social work and social welfare students appreciate the contextual, complex, and sometimes contradictory nature of the social work profession.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
COREQUISITES: IPHE 4900

SLWK 2222 Advancing Social Justice
CREDIT HOURS: 3
This course introduces students to the central concepts of a social justice perspective through a deconstruction and reconstruction of various assumptions, practices, and positionalities that advance and/or impede social justice. Rooted in processes of critically reflective analysis this course attends to cognitive, affective, and spiritual learning processes.

SLWK 2333 Beginning Social Work Practice
CREDIT HOURS: 6
NOTE: Course Details listed here also apply to SLWK 2334/SLWK 2335.
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 2334 Beginning Social Work Practice
CREDIT HOURS: 3
See SLWK 2333.

SLWK 2335 Beginning Social Work Practice
CREDIT HOURS: 3
See SLWK 2333.

SLWK 2444 Life Processes: Conceptualizations and practices for Critical Social Work
CREDIT HOURS: 3
This course critically explores a range of life events and processes that may impact peoples' development, personalities and potentials. Attention is given to how ethnicity, race, social class, ability, gender, sexual orientation, age, religion, and other social variables intersect with the individual development. The need for differential reactions from workers in response to clients varied life experiences will also be considered.
PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3012 Perspectives on Social Welfare Policy
CREDIT HOURS: 3
As an introduction to social policy analysis, this course surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary debates. The impact of policy on service users is a central theme of the course.
PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3030 Theoretical Foundations of Social Work Practice
CREDIT HOURS: 6
The central theme of this course is the integration of theory and practice, recognizing that theory guides practice and practice informs theory. The first term consists of the theoretical foundations of social work, understanding their relation to social work practice from social, political, economic and historical positions. The second term offers an in depth examination of the theoretical foundations of a variety of critical perspectives. Case applications are explored from a variety of practice situations and problem definitions.
PREREQUISITES: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3085 Social Work Research
CREDIT HOURS: 6
This is a survey course that presents the core foundations and processes of social work research from a critical perspective. The course will critically explore a diversity of research paradigms, methodologies, methods and designs in order to demystify 'doing research' and contextualize research within the social work world. NOTE: Course Details listed here also apply to SLWK 3086/SLWK3087.
EXCLUSIONS: SLWK 3083 and SLWK 3084
FORMATS: Lecture

SLWK 3120 International Social Work
CREDIT HOURS: 3
FORMATS: Lecture

SLWK 3130 Gender Based Violence
CREDIT HOURS: 3
FORMATS: Lecture

SLWK 3135 SLWK and Mental Health
CREDIT HOURS: 3
FORMATS: Lecture

SLWK 3220 Cross-Cultural Issues and Social Work Practice
CREDIT HOURS: 3
This course provides an opportunity to critically examine theoretical frameworks for viewing marginalized racial, ethnic and cultural groups in society, to examine personal values as they relate to the above groups, to develop skills in working effectively with these groups, and to understand related social policies.
PREREQUISITES: SLWK 2222, SLWK 2111, SLWK 2333, SLWK 3012

SLWK 3270 Social Work in Addiction
CREDIT HOURS: 3
FORMATS: Lecture

SLWK 3300 Independent Study
CREDIT HOURS: 3
FORMATS: Lecture

SLWK 4010 Advanced Social Work Practice
CREDIT HOURS: 6
Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.
COREQUISITES: SLWK 3030, IPHE 4900
PREREQUISITES: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444,

SLWK 4033 Field Practicum and Seminar
CREDIT HOURS: 9
NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.
COREQUISITES: SLWK 3030.06, SLWK 3012.03, SLWK 3085.06, SLWK 3220.03, SLWK 4010.06
PREREQUISITES: SLWK 2010.03, SLWK 2111.06, SLWK 2222.03, SLWK 2333.03, SLWK 2444.03

SLWK 4034 Field Practicum & Seminar
CREDIT HOURS: 4.5
See SLWK 4033.
COREQUISITES: SLWK 3030 and SLWK 4010
PREREQUISITES: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444

SLWK 4035 Field Practicum & Seminar
CREDIT HOURS: 4.5
See SLWK 4033.
COREQUISITES: SLWK 3030 and SLWK 4010
PREREQUISITES: SLWK 2111, SLWK 2444, SLWK 2222, and SLWK 2333

Faculty of Management

Location: Kenneth C. Rowe Management Building
6100 University Avenue
3rd Floor
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-2582

Website: management.dal.ca

Introduction
The Faculty of Management includes four schools - Rowe School of Business, School of Information Management, School of Public Administration, and School for Resource and Environmental Studies. The Faculty has two undergraduate program options. The Commerce degree (BComm Co-op) has a mandatory co-operative education format, whereas the Management degree (BMgmt) has an optional internship. The Rowe School of Business houses the BComm (Co-op) where BMgmt is offered jointly by all four schools.

Students wishing to enrol in programs offered by the Faculty should address themselves directly to the Schools concerned for further information or for help in planning courses of study; for the Undergraduate Programs, contact the Undergraduate Academic Advising Office by calling +1 (902) 494-3710, or by emailing uao@dal.ca.

Introduction
The Rowe School of Business provides quality programs at both the undergraduate and master's levels that prepare students to contribute to and take leading positions in business and society. Graduates of the programs are competitive in the global, diverse and continually changing workplace. Teaching, scholarship and service link theory and practice to benefit students, the University and the business community in Canada and abroad.

Specific objectives are to:

- Attract, retain and educate students of high calibre from Nova Scotia, elsewhere in Canada and internationally.
- Develop students' knowledge of key concepts and issues in business operations, as well as in-depth knowledge within specialized business disciplines.

- Develop students' analytical and decision-making skills through a mix of theoretical and applied approaches including lectures, discussion groups, individual research projects, team projects and casework, as well as comprehensive field projects.
- Enhance students' team and communication skills, which are needed to succeed in careers and management.
- Develop knowledge through research and association with the academic and professional communities.
- Maintain strong ties with both the private and public sectors.

The Bachelor of Commerce Co-op program includes studies in the humanities and social sciences as well as in the functional areas of business. It is offered on a co-operative education (work/study) basis.

Wooden, K., BComm, MBA (St. Mary's)

Bachelor of Commerce (Co-op) Program

The Rowe School of Business offers a four-year, Bachelor of Commerce (Co-operative Education) Program that is accredited by both the Association to Advance Collegiate Schools of Business (AACSB) and Co-operative Education and Work Integrated Learning Canada (CEWIL Canada). It is one of the few mandatory co-op business degree programs in Canada. Co-operative education is an academic strategy that integrates on-campus study with off-campus work experience. The schedule for the Bachelor of Commerce (Co-op) Program includes seven academic terms (AT) and three work terms (WT), as follows:

	Fall	Winter	Summer
Year 1	AT1	AT2	OFF
Year 2	AT3	WT1	AT4
Year 3	WT2	AT5	WT3
Year 4	AT6	AT7	

The co-op program in Commerce requires a broad and general range of studies, including required and elective courses provided by various Faculties within the university. The program offers students the opportunity to choose a major in a variety of special areas, and a minor in an area outside of the Faculty of Management shoudl they wish to do so. The Commerce (Co-op) program does not currently offer double majors.

The three work-terms each receive academic credit, and constitute a full work load (see the Regulations section of this calendar for “overload” limits and conditions).

Degree Requirements

- Four-year program - seven academic terms and three work-terms
- Total credit hours required - 120
- Required GPA for graduation 2.00

Note: A suitable replacement for MATH 1115.03 is MATH 1000.03

- Commerce electives - 24 credit hours
- Work-terms - 9 credit hours
- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1502.03: Core Business Applications: Introduction to Computers
- COMM 1710.03: Business Communications I
- COMM 1720.03: Business Communications II
- COMM 2202.03: Finance I
- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 2401.03: Introduction to Marketing
- COMM 2501.03: Statistics for Business
- COMM 2502.03: Predictive Analytics
- COMM 2603.03: Legal Aspects of Business
- COMM 3501.03: Production/Operations Management
- COMM 3511.03: Management Information Systems
- COMM 4351.03: Competitive Strategy
- COMM 4352.03: Strategic Management
- ECON 1101.03: Principles of Microeconomics
- ECON 1102.03: Principles of Macroeconomics
- MATH 1115.03: Mathematics for Commerce
- Non-commerce electives - 18 credit hours (of which 9 credit hours must be at or above the 2000 level) selected from all courses offered in the University other than Commerce, Management and Business.
- Free electives - 6 credit hours (can be Commerce or Management at or above the 2000 level; or non-commerce at any level)

NOTE: Students readmitted to the Commerce Co-op program will be subject to the Academic Regulations as stated in the Calendar for the year of readmission. For further information, contact the Rowe School of Business, Undergraduate Advising Office, 6100 University Avenue, Suite 2086. Phone +1 (902) 494-3710 or Email: uao@dal.ca

Program Guide

Students normally follow a fixed program of study, as outlined below:

Academic Term One

- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1502.03: Core Business Applications: Introduction to Computers
- ECON 1101.03: Principles of Microeconomics
- One non-commerce elective

Academic Term Two

- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1710.03: Business Communications I
- ECON 1102.03: Principles of Macroeconomics
- MATH 1115.03: Mathematics for Commerce
- One non-commerce elective

Academic Term Three

- COMM 1720.03: Business Communications II
- COMM 2202.03: Finance 1
- COMM 2401.03: Introduction to Marketing
- COMM 2501.03: Statistics for Business
- One non-commerce elective

Work Term I - COMM 2801.03
Academic Term Four

- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 2502.03: Predictive Analytics
- COMM 2603.03: Legal Aspects of Business

Work Term II - COMM 3801.03
Academic Term Five

- COMM 3501.03: Productions/Operations Management
- COMM 3511.03: Management Information Systems
- Three commerce electives
- One non- commerce elective

Work Term III - COMM 3802.03
Academic Terms Six and Seven

- COMM 4351.03: Competitive Strategy; and COMM 4352.03: Strategic Management
- Five commerce electives
- Two non-commerce electives
- Two free electives

During their fifth, sixth and seventh academic terms, students can either pursue a customized program of study by choosing electives from a wide range of the functional areas of business, or they can follow a more specialized program taking their elective courses towards a major. Students interested in majoring should consult the School's website and their Academic Advisor for further details before registering for their fifth academic term.

Major in Accounting

Note: An average grade of B- must be obtained between COMM 1101.03 and COMM 1102.03 to major in Accounting.

Students **must** complete the following six courses:

- COMM 3105.03: Intermediate Financial Accounting I
- COMM 3111.03: Intermediate Financial Accounting II
- COMM 3114.03: External Auditing
- COMM 3116.03: Cost Management
- COMM 4101.03: Advanced Topics in Accounting I
- COMM 4125.03: Taxation

Plus two of:

- COMM 3207.03: Canadian Securities
- COMM 4102.03: Advanced Topics in Accounting II (recommended)
- COMM 4126.03: Taxation II (recommended)
- COMM 4511.03: Business Process Integration using ERP Systems

CPA Canada requires certain academic prerequisites for admission to the CPA certification program. That is, CPA candidates must complete an undergraduate degree and cover specific prerequisite subject areas. Appropriate courses can be taken in the Rowe School of Business, as part of the Accounting Major structure, to meet these requirements. Particulars can be obtained from the Chartered Professional Accountants Canada website http://cpacanada.ca

Major in Entrepreneurship

Students **must** complete the following four courses:

- COMM 3307.03: New Venture Creation
- COMM 3308.03: Managing the Family Enterprise or MGMT 3902.03: Starting Lean
- COMM 4301.03: Managing the Venturing Process
- COMM 4523.03: Project Management

Plus two of:

- COMM 3309.03: Management Skills Development
- MGMT 3902.03: Starting Lean OR COMM 3308.03: Managing the Family Enterprise
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 3405.03: Global Marketing
- COMM 3408.03: Transportation Modes and Policy
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 4701.03: International Business Strategy

Note: At least one Work Term must either be in an approved "Entrepreneurial Setting "; OR an “Entrepreneurial Work Term " as defined by the Norman Newman Centre for Entrepreneurship and Management Career Services.

Major in Finance

Note: An average grade of B- must be obtained between COMM 2202.03 and COMM 2203.03 to major in Finance.

Students **must** complete the following three courses:

- COMM 3203.03: Financial Institutions
- COMM 3206.03: Investment and Money Management
- COMM 4240.03: Advanced Corporate Finance

Plus three of:

- COMM 3207.03: Canadian Securities
- COMM 4201.03: International Financial Management
- COMM 4202.03: Derivatives
- COMM 4250.03: Theory of Finance
- COMM 3100.03: Financial Reporting and Statement Analysis; OR COMM 3105.03: Intermediate Financial Accounting I; OR COMM 4340.03: Corporate Governance; OR ECON 2200.03: Intermediate Microeconomics; OR ECON 2201.03: Intermediate Macroeconomics

Note: Courses outside of Commerce, such as ECON, are counted as non-commerce electives or free electives

Major in International Business

Students **must** complete the following:

- Language Requirement; six credit hours (at a level appropriate to knowledge, as determined by department concerned)

Plus the following:

- COMM 3405.03: Global Marketing
- COMM 4201.03: International Financial Management
- COMM 4315.03: International and Intercultural Management
- COMM 4701.03: International Business Strategy

Plus one of the following:

- ECON 2213.03: Emerging Giants: The Economic Rise of China and India
- ECON 2219.03: Euros and Cents: From Common Market to European Union
- ECON 2334.03: Globalization and Economic Development: Current Debates

Students must also complete one academic term or one work term in a country other than their primary residence.

Note: Courses outside of Commerce, such as ECON or FREN (for example), are counted as non-commerce electives or free electives.

Major in Managing People and Organizations

Students **must** complete the following:

- SOSA 1002.03 and SOSA 1003.03; or PSYO 1011.03 and PSYO 1012.03; or PSYO 1021.03 and PSYO 1022.03
- COMM 3303.03: Introduction to Human Resource Management
- COMM 3304.03: Labour Management Relations
- COMM 3309.03: Management Skills Development
- COMM 3310.03: Reflections on Leadership
- COMM 4315.03: International and Intercultural Management
- COMM 4510.03: Corporate Communications OR COMM 4340.03: Corporate Governance

Note: Courses outside of Commerce, such as SOSA and PSYO, are counted as non-commerce electives or free electives

Major in Marketing Management

Students **must** complete the following five courses:

- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 3407.03: Logistics & Supply Chain Management
- COMM 4401.03: Marketing Strategy

Plus one of:

- COMM 3405.03: Global Marketing
- COMM 3408.03: Transportation Modes and Policy
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing

Major in Supply Chain & Logistics Management

Students **must** complete the following four courses:

- COMM 3407.03: Logistics & Supply Chain Management
- COMM 4501.03: Operations Research
- COMM 4511.03: Business Process Integration using ERP Systems
- COMM 4520.03: Supply Chain Planning & Execution

Plus two of:

- COMM 3405.03: Global Marketing
- COMM 3408.03: Transportation Modes and Policy
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 4512.03: Business Intelligence and Data Visualization

Minors

Bachelor of Commerce (Co-op) students can choose to complement their degree by declaring a minor in another subject area outside of the Faculty of Management. Students should consult with their program Academic Advisor concerning their degree requirements, and an Advisor from within their desired subject area for the minor requirements. For a current list of available minors please see Minors.

Co-op Work Terms

(For more information visit: www.dal.ca/mcs)

A work term is a period of time when a student gains practical experience in a business-related work environment. Each passed work term is an academic half credit and must meet the requirements listed below. Three passed work terms are required to graduate.

During a work term a student is considered an employee of their work term employer with reference to the conditions of their employment, and is a student with respect to academic evaluation only. The university does not accept liability for the student's work environment.

Students are remunerated according to employer policy and the labour laws of the jurisdiction in which they work.

Members of the Management Career Services team conduct mid-term reviews with both the employers and students to ensure the work term objectives are being met.

Work Term Requirements

Students receive academic credit upon completion of the following for each work term:

1. Students must register for each work term (COMM 2801, COMM 3801 and COMM 3802) via Dal Online.
2. Students must complete all mandatory requirements for co-op orientation.
3. Each work term must be completed within the designated semester with one employer. A work term must total no less than 12 weeks with a cumulative total of 42 weeks over three work terms. A work term must be a minimum of 35 hours per week.
4. All jobs, including self-developed jobs, must be approved by Management Career Services (MCS).
5. Students are responsible for finding suitable employment. Students complete a Co-op Education Program Agreement prior to the first work term accepting this responsibility. Support for the job search is provided by MCS, and job opportunities are posted on the *my*Career job posting system.
6. Employers commit to completing and submitting a final evaluation detailing the student's performance level which must be assessed as satisfactory to receive academic credit.
7. For each work term, students must submit a satisfactory work term report to the assigned faculty member in the Rowe School of Business.

Work Term Eligibility

Only students who meet the prerequisites (see **Section II**: **Courses Offered** of this calendar) are eligible to participate in a work term. Students who fail a required core course or a work term twice, and/or whose grades drop below a 1.70 GPA overall will be **dismissed** from the University. Refer to the university regulations regarding academic probation and dismissal for more information.

Co-op/Career Services Fee

Students are charged a Co-operative Education/Career Services Fee (pro-rated for part-time students). In an effort to balance the cost, the fees are charged on each academic term until completion of the degree, which includes academic semesters outside of the regular program structure after all work terms have been successfully completed. While no fee is charged for the actual work term, any student taking an academic course during the work term will be charged an additional pro-rated fee.

These fees are non-refundable after the deadline dates listed in the University Calendar. Students who transfer into the program from another department, or another institution, are responsible for back payments.

Students completing an academic term (three or more half credit courses) outside of Dalhousie on a Letter of Permission are also responsible for the payment of co-op fees. Before the Letter of Permission can be granted, students must sign a co-op fee agreement, available from the Undergraduate Advising Office.

Payment of all fees is required to obtain a Bachelor of Commerce (Co-op) Degree. Consult the Fees section of the Dalhousie University Calendar for details.

The fee supports the administration of co-op work terms as well as career services for graduating students. It covers, but is not limited to;

- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- Variety of workshops and other training
- Networking opportunities with employers (including special events, competitions, information sessions, corporate tours, mentoring, etc.)
- Online e-learning webinars
- Work term monitoring and mediation
- Work term report instruction and grading by the assigned Rowe School of Business Instructor for COMM 2801, COMM 3801, and COMM 3802
- Marketing and communications tools and activities to promote the Commerce Co-op program to employers
- Development and administration of work term and grad job opportunities
- Access to on-line job posting site (*my*Career) and job posting administration

- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity

Management Information Systems

All Faculty of Management students have access to a computer lab. All computers are based on the Intel family of processors, are fully networked, run Windows software, and the latest Windows-based applications. Students will have full access to the Internet, with a choice of printing on black-and-white or colour laser printers (direct debit with DalCard) as well as access to a full-sized color scanner (free of charge).

Exchange Programs

Dalhousie offers Bachelor of Commerce (Co-op) students the opportunity to study abroad in a variety of countries all over the world, including Denmark, France, Sweden, Norway, South Korea and China (a complete list of partnerships can be found here). While participating in this program, students develop international contacts, immerse themselves in a different culture, and gain valuable international experience. For more information, please contact our Student Exchange Coordinator by emailing rsbstudent.exchange@Dal.Ca, or by calling (902) 494-3710.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

COMM 1010 Business in a Global Context
CREDIT HOURS: 3
This course provides an introduction to the national and international context of Canadian political, economic and business activity. It presents a sampling of the most relevant issues facing managers in business, labour and public sector organizations. Emphasis is placed on developing an understanding of Canada's competitive position today, and of the historical background and current influences on this position. The focus of the course will be on lectures, the text, guest speakers, and more specifically what is said in class by your instructor as well as in tutorials by your tutorial leader and your colleagues. Leading edge ideas and concepts - many of which are not confined exclusively to any one particular text or article - will be introduced by your instructor during the lectures, and may be reinforced through hand-outs from time to time.
CALENDAR NOTES: Students in BComm Program can not receive credit for Mgmt 1000.03 or Mgmt 1001.03
FORMATS: Lecture

COMM 1101 Introductory Accounting I (Financial)
CREDIT HOURS: 3
An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context includes business, government and not-for-profit settings. The coverage includes an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.
CROSSLISTED: MGMT 1101.03
FORMATS: Lecture | Tutorial

COMM 1102 Introductory Accounting II (Managerial)
CREDIT HOURS: 3
An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities -- whether for businesses, governments, not-for-profit organizations or special projects. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.
CALENDAR NOTES: Students who have completed COMM 2102.03 cannot also receive credit for COMM 1102.03.
PREREQUISITES: COMM 1101.03 OR MGMT 1101.03
CROSSLISTED: MGMT 1102.03
EXCLUSIONS: COMM 2102.03
FORMATS: Lecture | Tutorial

COMM 1502 Core Business Applications: Introduction to Computers
CREDIT HOURS: 3
The course focuses on how business applications, notably Word Processors, Spreadsheets, Enterprise cloud systems (e.g. Data Visualization tools [Power Bi], Microsoft Azure, Amazon AWS) contribute to the management, analysis and reporting of data with respect to business processes and how they can aid in the solving of business

problems. This course begins with an overview of Management Information Systems, before proceeding through several modules that involve data-to-document transformations, along with data integration between various applications. We use spreadsheets to perform routine business calculations, and visualize the data using business digital dashboards. The analyses are then collated and summarized using features of word processors to produce a final report for each business case that is analyzed. Each successive module increases the complexity of the analyses and reports. As the course progresses, business simulations will be used in assignments to provide experiential and immersive learning opportunities. The course is taught with both in-class lectures and self-paced computer laboratory exercises.
CALENDAR NOTES: MGMT 1601.03, ASSC 1000 or CSCI 1200 will not be counted in the Commerce program.
EXCLUSIONS: COMM 1501.03, MGMT 1601.03, INFO 1601.03, ASSC 1000.03, CSCI 1200.03
FORMATS: Lecture | Lab

COMM 1700 Prepare for Study and Work in Canada
CREDIT HOURS: 3
This course is a mix of lectures, seminars, presentations, workshops and guest presentations. Activities covered in course will be targeted towards a Canadian work place environment. Students are expected to participate in class discussions, presentations and group projects. The activities in class will be based on practical applications of business communication strategies and language skills. Students will demonstrate their progress in in-class activities and take home assignments.
CALENDAR NOTES: Entrance into this course is by special permission. Please contact the Undergraduate Advising Office (uao@dal.ca) for more information
FORMATS: Lecture

COMM 1710 Business Communications I
CREDIT HOURS: 3
Students will learn how to be effective speakers and presenters. This class introduces students to communication used in the workplace and the effects of voice, body language, and word choice. The course covers strategies in finding employment (cover letters, resumes, and interview skills), maintaining professionalism, presenting in formal and informal settings, listening, working in teams, and presenting in groups. Students deliver speeches in each of the four types: impromptu, extemporaneous, manuscript, and memorized.
CALENDAR NOTES: ENGL 2100.03, ENGL 2110.03, and CSCI 2100.03 will not be counted in the Commerce program.
EXCLUSIONS: MGMT 3602.03, ENGL 2100.03, ENGL 2110.03, CSCI 2100.03
FORMATS: Lecture

COMM 1720 Business Communication II
CREDIT HOURS: 3
The primary goal of this course is to teach students how to properly prepare written business correspondence. Students will also learn about academic writing (the concept of intellectual property, library resources, and critical thinking). The course develops students' ability to work through the writing process, tailor business messages to specific purposes and audiences, and utilize techniques of persuasion. Students learn how to assess the business context and how to make strategic choices of medium, channel, form. Students write business memos, e-mail messages, letters, and informational and analytical reports.
CALENDAR NOTES: EGLA 1003.03; ENGL 2100.03, and CSCI 2100.03 will not be counted in the Commerce program.
PREREQUISITES: COMM 1710.03
EXCLUSIONS: MGMT 3602.03, ENGL 2100.03, CSCI 2100.03, EGLA1003.03
FORMATS: Lecture

COMM 2202 Finance I
CREDIT HOURS: 3
An introduction to the problems faced by business managers in the acquisition and effective use of the firm’s resources, and analytical concepts for evaluating financial decisions. Topics covered are: financial planning, time value of money, working capital management, risk and return, and valuation of debt and equity instruments.
PREREQUISITES: COMM 1101.03; ECON 1101.03 and ECON 1102.03; and MATH 1115.03 or MATH 1000.03
EXCLUSIONS: MGMT 3201.03
FORMATS: Lecture

COMM 2203 Finance II
CREDIT HOURS: 3
This course provides students with an overview of the theory of corporate finance and its application to the problems faced by financial managers. This course covers an in-depth study of capital budgeting and long term investment decisions in national and international contexts, capital structure, dividend policy, and the fundamentals of options and futures.
PREREQUISITES: COMM 2202.03
EXCLUSIONS: MGMT 3201.03
FORMATS: Lecture

COMM 2303 Introduction to Organizational Behaviour
CREDIT HOURS: 3
This course will provide an overview of organizational behaviour theory, as well as an introduction to the practical application of that theory, within the context of the external and organizational forces that impact management. Through lectures, assignments, and discussion, students will be introduced to the theoretical basis of managing people in organizations. Key topics will include individual factors, such as personality and perception; group processes, such as team development and influence; and contextual issues, such as organizational culture. Experiential exercises will be incorporated to link theory with practice.
PREREQUISITES: COMM 1010.03, and at least second-year standing.
EXCLUSIONS: MGMT 2303.03 and MGMT 2304.03
FORMATS: Lecture | Discussion

COMM 2310 Business Ethics and Corporate Social Responsibility (CSR)
CREDIT HOURS: 3
Business Ethics & Corporate Social Responsibility builds student capacity and capability for engaging difficult and complex ethical issues in today's organizations. This course examines common ethical challenges facing today's organizational leaders, and through theoretical and applied knowledge, students develop their awareness, capacity, and capability to scrutinize ethical situations and to develop useful courses of action. The course challenges students to think critically through moral visioning and imagination and prepares students to address everyday organizational ethical challenges with creativity and moral intelligence

PREREQUISITES: At least second-year standing
CROSSLISTED: MGMT 2305.03
EXCLUSIONS: PHIL 2081.03
FORMATS: Lecture

COMM 2401 Introduction to Marketing
CREDIT HOURS: 3
The objective of this course is to familiarize you with marketing's mode of inquiry-the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course. Students will work in teams and will be preparing a marketing plan to introduce a new product to the Canadian market.
PREREQUISITES: COMM 1010.03 and at least second-year standing.
CROSSLISTED: MGMT 2401.03
FORMATS: Lecture

COMM 2501 Statistics for Business
CREDIT HOURS: 3
An introduction to the principles and applications of statistics relevant to commerce students, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing, statistical software.
PREREQUISITES: COMM 1502.03 and MATH 1115.03 (or MATH 1000.03)
EXCLUSIONS: MGMT 1501.03; MATH 1060.03; STAT 1060.03; ECON 2260.03; ENGM 2032.03 NOTE: Students cannot receive credit for COMM 2501 after already receiving credit for STAT 2060.03
FORMATS: Lecture

COMM 2502 Predictive Analytics
CREDIT HOURS: 3
This course is a follow-up to COMM 2501.03. It concerns mostly the relationship of two or more measurements, with an eye to making quantitative predictions in a business context. Topics covered in detail are analysis of variance, simple and multiple regression, logistic regression and time series. Statistical software is featured prominently throughout the course for statistical computations.
PREREQUISITES: COMM 2501.03 (or MGMT 1501.03, or MATH 1060.03 or STAT 1060.03 or ECON 2260.03, or ENGM 2032.03)
CROSSLISTED: MGMT 2502.03
EXCLUSIONS: MATH 2080.03, STAT 2080.03, ECON 2280.03
FORMATS: Lecture

COMM 2603 Legal Aspects of Business
CREDIT HOURS: 3
This course provides a general understanding of how the Canadian legal system works, and the business-related aspects of the major areas of law, such as contracts, torts, property and business associations. There is special emphasis on legal risk management and dispute resolution. By the end of the course, the student will be able to analyze a business-related fact situation and apply correct legal principles to achieve sound business decision-making.
PREREQUISITES: At least second-year standing.
EXCLUSIONS: MGMT 2200.03, MGTA 2001.03
FORMATS: Lecture

COMM 2801 Work-Term One, Bachelor of Commerce (Co-op)
CREDIT HOURS: 3
Unless written permission is obtained, in advance, work term I is completed in the Winter term of the second year.
PREREQUISITES: At least 6 1/2 full credits, which must include COMM 1502.03, COMM 1710.03 and COMM 1720.03 plus at least 3 1/2 other full credits from the Core Area (COMM, ECON 1101.03 and ECON 1102.03 and MATH 1115.03 or MATH 1000.03)
FORMATS: Experiential Learning

COMM 3100 Financial Reporting and Statement Analysis
CREDIT HOURS: 3
This course is intended for students who are not majoring in accounting. The approach to the course is analytical rather than procedural, with an emphasis on a user perspective. This class is hands on, completing analysis each class from real public companies and their annual reports. Students will be required to interpret annual reports both in class and on an individual basis and will be expected to articulate their findings both verbally and in writing. Various parts of annual reports will be reviewed, including MD&A, the financial statements, as well as notes to the financials.
PREREQUISITES: COMM 1101.03 and COMM 1102.03
EXCLUSIONS: COMM 3105.03 and COMM 3111.03
FORMATS: Lecture

COMM 3105 Intermediate Financial Accounting I
CREDIT HOURS: 3
This course, and its follow-up Commerce 3111.03, are meant to provide a solid understanding of the corporate financial reporting model and related conceptual issues. The course develops expertise in financial reporting issues related to revenue and expense recognition and a wide range of asset accounting issues, including receivables, inventories, and capital assets.
PREREQUISITES: COMM 1101.03 and COMM 1102.03 with an average of at least B-
EXCLUSIONS: COMM 3100.03
FORMATS: Lecture

COMM 3111 Intermediate Financial Accounting II
CREDIT HOURS: 3
In conjunction with its prerequisite, Commerce 3105.03, this course is intended to provide an understanding of the corporate financial reporting model and related conceptual issues. The course will develop expertise in accounting and reporting issues related to liabilities and shareholders' equity, including complex debt and equity instruments, corporate income taxes, leases, pensions and other post-retirement obligations, earnings per share, accounting changes and restatements.
PREREQUISITES: COMM 3105.03 with a minimum grade of C-
CROSSLISTED: BUSI 6108.03
EXCLUSIONS: COMM 3100.03
FORMATS: Lecture

COMM 3114 External Auditing
CREDIT HOURS: 3
This course covers the theory and practice of public auditing according to generally accepted auditing standards (GAAS). The course emphasizes Canadian Auditing Standards (CASs) and considers the forces impacting on the setting of standards and the current level of standards. This includes pronouncements of the accounting profession, reporting standards, professional ethics, audit planning, risk assessment, standards for examination of internal control in both manual and computerized environments, standards for the quality of evidence, statistical sampling and the sufficiency of evidence, documentation and working papers. The course considers typical audit programs for examination of financial statement elements and fraud awareness.
PREREQUISITES: COMM 3105.03 or COMM 3100.03
CROSSLISTED: BUSI 6101.03
FORMATS: Lecture

COMM 3116 Cost Management
CREDIT HOURS: 3
The major objective of this course is to develop a deeper understanding of the key topics in cost/managerial accounting and their management control implications. The selected topics to be covered include costing systems, cost-volume-profit analysis, cost and profit variance analysis, control and performance evaluation in decentralized organizations. This course is intended primarily for students who plan to major in the accounting area.
PREREQUISITES: COMM 1101.03 and COMM 1102.03, with at least a B- average
FORMATS: Lecture | Discussion

COMM 3203 Financial Institutions
CREDIT HOURS: 3
This course is designed to introduce students to the structure and operations of financial institutions and the role they play in the growth and operation of capital markets. The class content includes reviewing the operation and functioning of various types of financial institutions and their roles in the economy. An emphasis will be put on measuring different types of risks and methods for managing these risks for financial institutions, particularly the banks. The topics include (but are not limited to) interest rate risk management, credit risk management, liquidity risk management, market risk management, and so forth. The role of derivative securities in various hedging strategies will also be reviewed.
PREREQUISITES: COMM 2202.03 and COMM 2203.03 (with a minimum average grade of B-)
FORMATS: Lecture

COMM 3206 Investment and Money Management
CREDIT HOURS: 3
This course is designed to provide the students with an overview of current investment theories and their application to the real world. In particular, a considerable effort will be made to compare and contrast the activities of money managers with the ones that are suggested in various theoretical models. The intention is to provide our students with the needed skills to successfully face the challenging world of portfolio and money management.
PREREQUISITES: COMM 2202.03 and COMM 2203.03 (with a minimum average grade of B-)
FORMATS: Lecture | Seminar

COMM 3207 Canadian Securities
CREDIT HOURS: 3
The topics covered in this course include an overview of capital markets and the financial services industry; financial statement analysis; an overview of the Canadian economy; fixed income securities; equity securities; investment funds; derivatives; security analysis; financing, listing and regulation; financial planning and taxation issues; and, portfolio management. Upon meeting the CSI's requirements, the student will earn the Canadian Securities Course designation.
CALENDAR NOTES: This course is offered via Distance Education. Students will have to register with the Canadian Securities Institute and will incur an additional fee.
PREREQUISITES: COMM 2202.03 OR MGMT 3201.03
FORMATS: Online Delivery

COMM 3303 Introduction to Human Resource Management
CREDIT HOURS: 3
The role of human resource management and administration of the personnel function are analyzed, along with the major aspects of the personnel function: job analysis, human resource planning, recruitment and selection, training, performance appraisal, compensation, labour relations, and safety and health. Knowledge of the processes is supplemented by the development of analytical skill in coping with various human resource problems and in the integration of the processes with the many other functions required in the organization. This "system and process" analysis builds upon the skill and knowledge acquired in COMM 2303.03. Cases simulate work environments.
PREREQUISITES: COMM 2303.03 or MGMT 2304.03
FORMATS: Lecture

COMM 3304 Labour-Management Relations
CREDIT HOURS: 3
Introduces students to some practical and theoretical aspects of labour-management relations in Canada. Examines historical, legal, behavioural, economic and political backgrounds of our system. Emphasis is on the key processes of industrial relations as they impinge on the activities of managers. Cases used are drawn from Canadian

sources.
PREREQUISITES: COMM 2303.03 OR MGMT 2304.03
FORMATS: Lecture

COMM 3307 New Venture Creation
CREDIT HOURS: 3
This course is about entrepreneurial thinking and acting on it. By linking theory and practice, the course will expose students to the issues, problems and challenges of developing new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas, testing their ideas assumptions, and most importantly how to act on ideas with the resources you have on hand. Experiential exercises enable the students to build their personal entrepreneurial strategy, identify an innovative idea, build their business model, gather resources, and present their business idea. The purpose of the course is to provide students a foundation from which they can act entrepreneurially for themselves or for the organization they work for.
PREREQUISITES: MGMT 2902.03; OR COMM 1010.03, COMM 1101.03 and COMM 2401.03
CROSSLISTED: MGMT 3907.03
FORMATS: Lecture | Discussion | Experiential Learning

COMM 3308 Managing the Family Enterprise
CREDIT HOURS: 3
Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and the business. The course has two purposes. First, it provides an organized framework for students to understand the dynamics and special issues of family firms. Second, it is designed to allow students to explore their interest in joining a family firm. Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.
PREREQUISITES: COMM 1101.03 and at least third-year standing
CROSSLISTED: MGMT 3308.03, BUSI 6006.03
FORMATS: Lecture | Discussion

COMM 3309 Management Skills Development
CREDIT HOURS: 3
This course will expose students to key knowledge, behaviours, skills, competencies and attitudes considered critical to managerial success. The course is designed to provide students with knowledge and an applied focus which will help ensure they understand effective management practice. Topic areas include: understanding what the successful manager needs to know, understanding the personal self, communications, interpersonal negotiations, team skills, managing innovation and change, handling conflict and anger, coaching, and leadership skills and attitudes needed for success. Significant amounts of classroom time will be devoted to putting theory into practice in terms of employing exercises, role plays, case studies, and group discussions.
PREREQUISITES: COMM 2303.03 OR MGMT 2304.03; and at least third-year standing.
CROSSLISTED: MGMT 3309.03
FORMATS: Lecture | Discussion | Experiential Learning

COMM 3310 Reflections on Leadership
CREDIT HOURS: 3
COMM 3310 introduces students to what leadership means in today's world, teaching students how to prepare and position themselves to function as useful and positive leaders within complex organizations. Students will explore how to engage an organization as a complex communicative system, to envision the fundamental skills required to engage in common complexity challenges all organizations face, and to engage difficult but continually arising ethical challenges positively and effectively. Students will complete a comprehensive assignment that crafts their own leadership philosophy, their core skills required for practicing that philosophy, and a set of plans for sustaining their practice into the future.
PREREQUISITES: At least third-year standing
FORMATS: Lecture

COMM 3401 Consumer Behaviour
CREDIT HOURS: 3
In view of the very competitive situation in modern business, the firm that is successful designs and sells products that meet the desires of specific consumer segments. Thus, analysis and prediction of consumer behaviour are increasing in importance and sophistication. An extensive body of research evidence from marketing and the behavioral sciences is explored and evaluated to assess the marketing implications of elements of consumer behaviour. Emphasis in course will be focused on how to incorporate an understanding of consumer behaviour into strategic marketing plans.
PREREQUISITES: COMM 2401.03 or MGMT 2401.03
FORMATS: Lecture | Discussion

COMM 3402 Marketing Communications
CREDIT HOURS: 3
This course is designed to provide students with an understanding of how the major types of marketing communication messages are created and delivered. This means students should come away knowing the strengths and weakness of the major marketing communication functions (e.g. advertising, public relations, direct response, sales promotion, social media marketing, web marketing, packaging, etc.) and the major media used by them. By the end of the course, the student will have the ability to: (1) establish a knowledge base of researching and evaluating a company’s marketing and promotional situations; (2) gain hands-on experiences in the creation of an integrated marketing communication campaign that impact customer relationships and brands; and (3) develop effective communication strategies and programs for real company situations. For those students who are not marketing majors, this course will also provide a basic understanding of persuasive skills which can be used no matter what vocation they choose in the future.
PREREQUISITES: COMM 2401.03 or MGMT 2401.03
FORMATS: Lecture

COMM 3404 Marketing Research
CREDIT HOURS: 3
Students learn the scientific method in solving marketing problems and creating marketing intelligence from data. Emphasis is on planning and formulating research problems, research design, application of sampling methods, and analysis of data collected. The course uses cases and a real world project to hone skills needed for a wide range of marketing positions in industry.
PREREQUISITES: COMM 2401.03 and COMM 2502.03
FORMATS: Lecture | Tutorial | Discussion

COMM 3405 Global Marketing
CREDIT HOURS: 3
This course will examine similarities and differences in international marketing structures, functions and processes as related to the socio-economic and cultural environment and the opportunities and problems associated with international marketing for Canadian firms wanting to export to overseas markets. It is designed to be a comprehensive course embodying lectures, class discussion, assignments, and case studies. Students will also complete an export marketing plan for a Canadian company wishing to explore marketing opportunities in a foreign country.
PREREQUISITES: COMM 2401.03
FORMATS: Lecture | Discussion

COMM 3407 Logistics & Supply Chain Management
CREDIT HOURS: 3
An examination of the decisions faced by managers within the supply chain: the channels of distribution, the transportation and storage of products/services, and the communications and data processing systems, in order to minimize the total cost of these activities and satisfy the marketing requirements of the firm and its customers. Topics include: the integrated logistics & supply chain management concept, customer service, transportation, distribution centres, inventory management, materials management, packaging, purchasing, order processing and information systems, financial control, logistics organization, international logistics, reverse distribution and recycling, and the strategic logistics supply chain plan.
PREREQUISITES: COMM 2401.03

COMM 3408 Transportation Modes and Policy
CREDIT HOURS: 3
This course will introduce the student to the business of managing a transport enterprise. It will focus on understanding the regulatory (policy) environment and customer requirements prior to exploring operational considerations across a number of transport modes. The intent will be to explore the impacts of policy and modal structure on marketing the transportation company and structuring it for growth. The course is suitable for students wishing to work in the transport industry, in the supply chain activities of a transport customer or, tangentially, in the strategic management of any service business.
PREREQUISITES: COMM 2401.03
CROSSLISTED: BUSI 6408.03
FORMATS: Lecture

COMM 3409 Personal Selling and Sales Management
CREDIT HOURS: 3
This course is designed to provide an understanding of the tasks and problems facing today's sales professionals and sales managers and to familiarize one with current personal selling and sales force management practices. Specifically, this course provides an exposure to personal selling concepts, techniques and procedures used in buyer-seller relations such as prospecting, sales call planning, negotiation skills, overcoming obstacles, persuasion and closing skills. It also covers sales management topics including the organization of the sales force, personnel management, selection, sales training, motivation, compensation, evaluation and supervision, budgets, quotas, territories and sales control.Sales role-plays, mock sales presentations, case studies and classroom discussion are used to extend the basic text material and examine other points of view.
PREREQUISITES: COMM 2401.03
FORMATS: Lecture

COMM 3410 Services Marketing
CREDIT HOURS: 3
Intangible services play an increasingly important role in the global economy, and most especially in the economies of developed countries. Yet, business school curriculae have customarily emphasized the marketing of tangible products in consumer and industrial markets. A basic premise of the elective course is that services (versus tangible goods) share a number of attributes that present unique challenges for marketing.The course seeks to prepare students to face those challenges. It is ideal for students who wish to work in a service industry (e.g., banking, insurance, travel, hospitality, consulting) or in a service capacity in the manufacturing sector (e.g., sales, customer relations).Emphasis will be placed on understanding the distinctive characteristics of services, the implications of these distinctions for marketing, the role of service quality as a determinant of customer satisfaction, and the measurement of these phenomena. Examples will be drawn from North American and European service industries.
PREREQUISITES: COMM 2401.03

COMM 3501 Production/Operations Management
CREDIT HOURS: 3
“Production” is one of the basic functions of any organization, whether it provides goods or services. Consequently, all managers, whatever their specialist interests, should have an understanding of some of the key concerns in managing operations, particularly if they aspire towards senior/general management positions. The purpose of this course is to provide such an understanding. It begins at a basic level by examining various types of production processes and continues by considering key aspects of inventory, supply chains and quality assurance. It concludes by examining production planning and strategy.
PREREQUISITES: COMM 1101.03, COMM 1502.03, COMM 2401.03, and COMM 2502.03
EXCLUSIONS: MGMT 3501.03
FORMATS: Lecture | Discussion

COMM 3511 Management Information Systems
CREDIT HOURS: 3
Information is a key resource for businesses, other organizations, and professionals in both the contemporary and emerging worlds. Innovative uses of information are

often keys to survival in an increasingly competitive economy. In addition, information systems account for an increasing larger share of assets in most organization. The ability to harness and manage information resources and information technologies demands a sound understanding of a broad range of concepts, terms, and challenging issues in a constantly evolving context. This course is designed to help students acquire the essential skills and conceptual background to become an effective client, user, and planner of Management Information Systems. It will help students develop a broad understanding of how information systems are used in organizations, the technologies that influence their use, their role in supporting business operations and decision making, how they need to be managed, and the impact that they can have on organizations' and professionals' competitive positions. Students will be exposed to SAP ERP systems and Business Analytics tools via hands-on lab work and exercises.
PREREQUISITES: COMM 1010.03 and at least a second-year standing
CROSSLISTED: MGMT 3511.03
FORMATS: Lecture | Lab | Discussion | Experiential Learning

COMM 3710 Doing Business in Emerging Markets
CREDIT HOURS: 3
This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.
PREREQUISITES: COMM 2303.03 and COMM 2401.03
CROSSLISTED: MGMT 3710.03
FORMATS: Lecture

COMM 3801 Work-Term Two, Bachelor of Commerce (Co-op)
CREDIT HOURS: 3
Unless written permission is obtained in advance, work term II is completed in the Fall term of the third year.
PREREQUISITES: At least 9 full credits earned, including COMM 2801.03 and at least 7 other full credits from the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03)
FORMATS: Experiential Learning

COMM 3802 Work-Term Three, Bachelor of Commerce (Co-op)
CREDIT HOURS: 3
Unless written permission is obtained in advance, work term III is completed in the Summer term of the Third year.
PREREQUISITES: At least 11.5 full credits earned, including COMM 3801.03 and at least 9 1/2 other full credits from the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03)
FORMATS: Experiential Learning

COMM 4000 Directed Reading and Research
CREDIT HOURS: 3
This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Curriculum Committee for approval. Guidelines are available from the Undergraduate Advising Office, Suite 2086, Rowe Building.

COMM 4101 Advanced Topics in Accounting I
CREDIT HOURS: 3
This course provides a theoretical framework for the study of accounting policy. Case analysis is an integral part of the course, with the bulk of the course focusing on analysis of simulated cases. Topics covered include accounting policy choice in a dynamic framework, an introduction to the impact of accounting policy choice and normalized income on business valuation partnerships, and the role of the professional accountant as part of these engagements. As well, the course may consider various practical and theoretical topics, including the role of the professional accountant working within an organization, as well as current topics as appropriate.
PREREQUISITES: COMM 3105.03, COMM 3111.03, and COMM 3114.03
CROSSLISTED: BUSI 6110.03
FORMATS: Lecture

COMM 4102 Advanced Topics in Accounting II
CREDIT HOURS: 3
This course provides an in-depth study of the interrelated topics of intercorporate investments, business combinations, consolidated financial statements, foreign currency transactions and foreign operations. The course also covers segmented reporting and bankruptcy, and not-for-profit accounting and fund accounting.
PREREQUISITES: COMM 3105.03 and COMM 3111.03
CROSSLISTED: BUSI 6109.03
FORMATS: Lecture

COMM 4125 Taxation
CREDIT HOURS: 3
This course is an introduction to the taxation system in Canada, with a focus on personal income tax. The course will be a mixture of lecture style classes and problem solving classes. The class will be interactive and student will be expected and encouraged to participate. By the end of the course students should be able to:- Calculate taxes payable for individuals- Identify and analyze tax issues both orally and in writing
PREREQUISITES: ECON 1101.03 and ECON 1102.03 and COMM 3105.03.
CROSSLISTED: BUSI 6102.03
EXCLUSIONS: COMM 4120.03

COMM 4126 Taxation II
CREDIT HOURS: 3
This course is a follow up to COMM 4125 and focuses on corporate income tax. The course will be a mixture of lecture style classes and problem solving classes. the

Class will be interactive and students will be expected and encouraged to participate. By the end of the course students should be able to:- Calculate taxes payable for corporations- Identify and analyze tax issues both orally and in writing.
PREREQUISITES: COMM 4125.03
EXCLUSIONS: COMM 4121.03

COMM 4201 International Financial Management
CREDIT HOURS: 3
This course aims at acquainting students with international aspects of corporate finance. The ultimate objective of the course is to develop your ability to understand and analyze major problems of financial management in an international context. Specifically, we will see throughout this course, how the business of the multinational corporation (MNC) - compared to that of a purely domestic firm - is affected by the changes in the international financial environment and by the presence of new variables, in particular the exchange rate risk and the political risk. Therefore, the first part of the course will provide an overview of the MNC and the international environment in which it operates and describe the functioning of the international financial markets with emphasis on the Foreign Exchange Market. We will also thoroughly examine the theories underlying exchange rate determination, as well as exchange rate risk measurement and management. Finally, we will analyze how exchange rate risk affects the pricing of capital assets.
PREREQUISITES: COMM 2203.03
FORMATS: Lecture

COMM 4202 Derivatives
CREDIT HOURS: 3
This course is an introduction to derivatives and the main applications of derivatives for both investment purposes and corporate finance use. As an introductory or first course in derivatives, the goal is to cover the central concepts and issues that will permit the student to start using the products and understanding the main advantages, as well as the issues with derivative transactions. The course covers both quantitative pricing issues, as well as the many practical qualitative issues involved with the use of derivatives. Students should be comfortable with basic statistics and algebra. Knowledge of calculus is not required for this course. Students should also be comfortable with Excel spreadsheets and basic Excel mathematical functions.
PREREQUISITES: COMM 2203.03
FORMATS: Lecture

COMM 4240 Advanced Corporate Finance
CREDIT HOURS: 3
This course will help students learn to apply fundamental ideas of corporate finance to real-life problems of business valuation and financial decision. Topics that will be discussed include valuation, mergers and acquisitions, financial distress, capital structure, payout policy, securities issuance, and corporate governance. The course builds on concepts and techniques that students have learned in finance, accounting, statistics, and economics. Case studies will be used to bridge the gap between finance theory and its applications to practical problems in corporate finance.
PREREQUISITES: COMM 2202.03 and COMM 2203.03 (with a combines average grade of B-), and COMM 3206.03
FORMATS: Lecture

COMM 4250 Theory of Finance
CREDIT HOURS: 3
With a focus on portfolio analysis and investment decisions, this course is designed to complement other finance courses. Topics include time value of money and capital budgeting, valuation and equilibrium pricing of risky securities (stocks, bonds, and derivative securities, including structured products), portfolio investment and performance analysis, real options. All theoretical models will be implemented using Excel.
PREREQUISITES: COMM 2203.03
FORMATS: Seminar

COMM 4301 Managing the Venturing Process
CREDIT HOURS: 3
Managing the Venturing Process is a capstone course that explores the strategic elements required to venture successfully. By linking theory and practice, the course is designed to familiarize students with entrepreneurial strategies for the emerging venture, for the growing venture, and for sustaining growth in the established venture. Venturing will be explored in the context of both for-profit and not-for profit objectives and will examine nurturing single entrepreneurs as well as organizational entrepreneurs. As this is a capstone course students will be expected to use knowledge acquired in others business courses.
PREREQUISITES: COMM 3307.03 or MGMT 3907.03
CROSSLISTED: MGMT 4901.03
FORMATS: Lecture

COMM 4315 International and Intercultural Management
CREDIT HOURS: 3
This senior level course is designed to provide students with the knowledge and skills necessary for effective membership and management in global as well as culturally diverse domestic workplaces. The growing importance of international business and escalating levels of involvement in global competitiveness necessitates that the manager of the 21st century acquire additional skills and abilities for effective international and intercultural interactions at home and abroad. The course content includes such topics as: introduction to comparative and cross-cultural management, variations on cultural orientations and value, cross-cultural communications, employee attitude, motivational issues in cross-cultural settings, differences in management and leadership styles, training for international assignments, cross-cultural staffing, inter-cultural negotiations, ethics and social responsibility, and expatriation and repatriation management. RECOMMENDED prior learning: COMM 3303.03 and COMM 3309.03
COREQUISITES: COMM 4351.03 or MGMT 4001.03
PREREQUISITES: COMM 2303.03 or MGMT 2304.03
FORMATS: Lecture

COMM 4340 Corporate Governance
CREDIT HOURS: 3
The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of

concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests.Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.
PREREQUISITES: COMM 4351.03
CROSSLISTED: BUSI 6315.03, MGMT 4340.03
FORMATS: Lecture

COMM 4351 Competitive Strategy
CREDIT HOURS: 3
Competitive Strategy focuses on how a firm competes at various levels; that is, functional, business and corporate. The course is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing and formulating strategy. Accordingly, the course examines the role of the general manager in the organization; environmental and industry factors; organizational resource and capability constraints; the creation of value through functional-, business-, and corporate-level strategies, and, finally, how an organization leverages its resources and capabilities to extend its product and geographic scope internationally. Building upon this foundation, students will practice formulating well thought-out strategy recommendations that are specific and actionable. Throughout the term, students will be exposed to a wide variety of organizations through readings, case studies, and experiential exercises.
PREREQUISITES: All required first, second, and third year core courses, including the three work-terms, for the Bachelor of Commerce (Co-op) program.
EXCLUSIONS: MGMT 4001.03

COMM 4352 Strategic Management
CREDIT HOURS: 3
Strategic Management builds on COMM 4351.03: Competitive Strategy. Following a brief review of firm strategy as it relates to the external environment and core competencies, the focus of this capstone course turns to the examination of the firm's organizational design. More specifically, the course is about strategic change and implementation. It enables the student to develop an appreciation for the influence of uncertainty and complexity on managerial action. The course integrates functional- and business-level strategies to understand the alignment of the firm's competitive strategy with its organizational design. Various pedagogical methods are used to enhance the student's analytical, writing, and presentation skills. It emphasizes a number of conceptual frameworks that aid in strategic decision-making while drawing upon specific concepts, tools, and techniques from other core courses in the Bachelor of Commerce (Co-op) program
PREREQUISITES: COMM 4351.03
EXCLUSIONS: MGMT 4002.03
FORMATS: Lecture

COMM 4401 Marketing Strategy
CREDIT HOURS: 3
This course is intended for marketing majors, and as a capstone course, it is designed to permit the integration of learning from other marketing courses. The aim of marketing strategy is to create superior customer value, life-time value, and customer relationships versus pushing products. Marketing strategy also involves careful competitive and market analysis, selection and development of markets in which the firm can operate with competitive advantage. Market development is particularly important for firms aiming for significant growth both domestically and internationally. Instruction is mostly through case studies of both B2C and B2B companies, report writing, and group presentations.
PREREQUISITES: COMM 2401.03, COMM 3401.03 OR 3404.03, and one other marketing course (choose from: COMM 3402.03, COMM 3405.03, COMM 3407.03, COMM 3408.03, COMM 3409.03 OR COMM 3410.03)
FORMATS: Lecture | Discussion

COMM 4501 Business Analytics for Decision Making
CREDIT HOURS: 3
The goal of this course is to provide an understanding of the major decision making tools/techniques. This course provides students opportunity to learn how decision situations can be approached scientifically and how managerial experience and judgement can be used to enhance a scientific approach. Topics include: Modeling skills, linear programming, and simulation, etc. Excel and cases are used to illustrate the main topics.
PREREQUISITES: COMM 1502 and COMM 2502
FORMATS: Lecture

COMM 4510 Corporate Communication
CREDIT HOURS: 3
By the end of this course, students will have learnt about various communication strategies adopted and deployed by corporations. Students will have competently demonstrated their ability to devise a corporate communications portfolio for stakeholders they will adopt in particular case scenarios. This portfolio will include formulating & delivering internal and external communications, developing and authoring press releases, creating a strategy document for managing press conferences and media relations, creating a post-incident marketing campaign, and writing incident and preliminary investigative reports (with financial and accounting analysis as evidence where available). Student teams will then make team presentations to possibly hostile audiences, and outline how to manage internal and external public relations, both day-to-day and in crisis conditions.
PREREQUISITES: COMM 1710.03, COMM 1720.03 and COMM 2303.03

COMM 4511 Business Process Integration using ERP Systems
CREDIT HOURS: 3
An experiential learning approach in this class that includes hands-on learning using SAP ERP, SAP Lumira and ERPSim, a game-based SAP ERP simulation. Here you will learn to manage companies from end-to-end using the actual SAP ERP in a real-time simulated competitive environment and will learn the processes, gain technical skills, with SAP and playfully learn how Enterprise Systems facilitate Business Intelligence which can be used to lead a company in a competitive environment. Since the emphasis of this class is on experiential learning, class time is focused on hands-on cases and simulations instead of lectures. There is an expectation that you complete the readings and come prepared for each class. In this course, there will be a balanced focus on both learning business process and integration between different functional areas, and on the technology that facilitates this. The class will be taught in an interactive lab through a combination of individual and group simulations interspersed with short lectures.

PREREQUISITES: COMM 3511.03 or MGMT 3511.03
FORMATS: Lecture | Lab | Experiential Learning

COMM 4512 Business Analytics and Data Visualization
CREDIT HOURS: 3
This course provides an introduction to Business Analytics using state of the art technologies. It covers the processes, methodologies and practices used to transform data into useful information to support business decision-making. Business analytics requires foundational knowledge in data Extraction, Transformation and Loading (ETL). The course will cover data models for data warehouses and in-memory systems, and teach students how to extract and manipulate data from these systems. They will also acquire basic knowledge of data mining and data analysis, with a focus on data visualization. The students will also learn to build dashboards using a variety of data design and visualization tools. The course will be made up of a combination of conceptual and applied topics with classes being held in an interactive lab. Both cloud-based and on-premise technologies will be leveraged to analyze data from a variety of sources, including Open Data, SAP BW, Teradata, and SAP HANA. Technologies used with be focused on end-user analytics and data visualization and will include state of the art tools for self-serve business analytics such as SAP Lumira Discovery, MS Excel, SAP Cloud Analytics, Tableau, SAP Business Objects Analysis, IBM Cognos Insight, SAP Predictive Analytics, and IBM Watson Analytics.
PREREQUISITES: COMM 3511.03 or MGMT 3511.03
FORMATS: Lecture | Lab | Experiential Learning

COMM 4520 Supply Chain Planning & Execution
CREDIT HOURS: 3
A Supply Chain (SC) consists of all parties involved in fulfilling a customer request. Efficient integration of suppliers, manufacturers, distribution/logistics companies, and retailers/customers is vital in managing SCs so that the right products are delivered to the right place at the right price, at the right quantity, and at the right time. Good management of a SC creates a competitive advantage. Focusing on the planning and execution of SC decisions, this course will help students have a deep understanding of SCs, acquire analytical tools necessary to solve complex SC problems, and apply managerial levers to pull in order to sustainably improve SC performance.
PREREQUISITES: COMM 3407.03, and COMM3501.03; or permission of instructor
FORMATS: Lecture

COMM 4523 Project Management
CREDIT HOURS: 3
Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.
PREREQUISITES: COMM 3501.03 OR MGMT 3501.03
CROSSLISTED: MGMT 4333.03

COMM 4701 International Business Strategy
CREDIT HOURS: 3
The objective of this course is to help the students understand why firms expand overseas and how foreign operations differ from domestic ones. It provides the students with the necessary knowledge for a career or further study in international business. The course introduces the basic concepts of international business from a manager's perspective. It examines the issues and problems that arise when business operations extend across national boundaries and become international in scope or character. The emphasis is two-fold. First, consideration is given to the characteristics and contemporary dynamics of the world economy. Second, analysis is made of the development of the multinational firm and of the adaptation of the basic managerial functions due to internationalization. The course orientation is pragmatic and managerial. Through case studies, class discussions, assigned readings, and lectures, the students are expected to develop the skills for analyzing situations and formulating solutions in an international business context.
PREREQUISITES: COMM 4351.03 or MGMT 4001.03
FORMATS: Lecture

General
The Faculty offers a curriculum of undergraduate and graduate studies designed to prepare students for careers in the fields of business, public administration, environmental and information management.

The undergraduate management degree includes studies from the humanities and social sciences as well as in the functional areas of management.

In co-operation with the School of Health and Human Performance, the Faculty also offers a combined, five-year program in which the student receives both degrees upon graduation. Please refer to the School of Health and Human Performance section for more information on the Bachelor of Science (Recreation)/Bachelor of Management.

Staff

Academic Director
Tarrant, F., BN (Memorial), MPH (Queen's), MBA (St. Mary's), PhD (Capella Univ)

Assistant Director
Skerrett, P., BMgmt, MBA (Dalhousie), PhD(c) (Capella Univ)

Program Administrator
Muise, M.

Academic Advisors
Howard, A.
Van Doninck, C.

Faculty
Faculty are drawn from all four Schools that comprise the Faculty of Management: Rowe School of Business, Information Management, Public Administration, and Resource and Environmental Studies.

Bachelor of Management

The Bachelor of Management provides undergraduate education in the management of organizations and human activities, in public sector management, environmental management, information management, and enterprise management.

This degree recognizes that managers work and move across borders between these sectors of management. Drawing on faculty from all four schools in the Faculty of Management, the program recruits students locally, nationally and internationally.

The objectives of the Bachelor of Management program are to:

- Enhance and lead organizations in diverse industries and sectors
- Analyze and assess information in context to make appropriate decisions
- Synthesize and evaluate information and ideas to make informed, creative decisions in complex, data rich, global environments
- Manage multicultural and diverse workplaces by applying theories related to diversity and inclusion
- Apply multidisciplinary management theories and tools to solve complex business problems in a dynamic environment
- Apply leadership theories in ethical, socially responsible, and innovate ways.

Degree Requirements

- Four year program
- Total credit hours required - 120
- Required GPA for graduation - 2.00
- Required core area courses - 60 credit hours:
    - ECON 1101.03: Principles of Microeconomics

- ECON 1102.03: Principles of Macroeconomics
- MGMT 1301.03: Multidisciplinary Management I
- MGMT 1302.03: Multidisciplinary Management II
- MGMT 1501.03: Statistics for Managers I
- MGMT 1601.03: Electronic Information Management
- MGMT 2101.03: Financial Accounting
- MGMT 2303.03: People, Work and Organizations: Micro Organizational Behaviour
- MGMT 2304.03: People, Work and Organizations: Macro Aspects of Organizational Behaviour
- MGMT 2305.03: Ethics and Social Responsibility
- MGMT 2401.03: Introduction to Marketing
- MGMT 2402.03: Marketing Applications in the Not-for-Profit Sectors
- MGMT 2605.03: Data Literacy
- MGMT 2801.03: Government Structure
- MGMT 3001.03: Data Analytics and Applied Research
- MGMT 3201.03: Financial Management
- MGMT 3501.03: Operations Management
- MGMT 3602.03: Professional Communications Skills
- MGMT 4003.03: Management Strategy
- MGMT 4004.03: Multidisciplinary Capstone

- Required Management electives
  - nine credit hours in management electives are required
  - six credit hours Writing Course (see Section C.)
- Open Electives
  - 45 credit hours, chosen from all courses offered in the University
  - A maximum of 18 credit hours at the 1000 level is permitted.
  - A maximum of 18 credit hours in Commerce is permitted.
  - Strongly advise students to choose a course in ethics (e.g. PHIL 2081 Business Ethics, PHIL 2485 Technology and the Environment).

Program Guide

Students will normally follow the courses as listed in the table below:

Year	Fall Sept - Dec (A)	Winter Jan - Apr (B)
Year 1	Writing Requirement ECON 1101.03 MGMT 1301.03 MGMT 1601.03 **OR** MGMT 1501.03 MGMT 1101.03	Writing Requirement ECON 1102.03 MGMT 1302.03 MGMT 1501.03 **OR** MGMT 1601.03 Open Elective.03
Year 2	MGMT 2303.03 MGMT 2401.03 MGMT 2605.03 MGMT 2801.03 Open Elective.03	MGMT 2304.03 MGMT 2305.03 MGMT 2402.03 Open Elective.03 Open Elective.03
Year 3	MGMT 3201.03 MGMT 3501.03 **OR** Open Elective MGMT Elective .03 **OR** MGMT 3602.03 Open Elective .03 Open Elective .03	MGMT 3001.03 Open Elective **OR** MGMT 3501.03 MGMT 3602.03 **OR** MGMT Elective .03 Open Elective .03 Open Elective .03
Year 4	MGMT 4003.03 MGMT Elective .03 Open Elective .03 Open Elective .03 Open Elective .03	MGMT 4004.03 Open Elective .03 Open Elective .03 Open Elective .03 Open Elective .03

Writing Course

One of the first five credits chosen should be selected from a list of courses in which written work is considered frequently and in detail. These writing courses are approved by the Writing Across the Curriculum committee and are listed under Writing Courses of the academic calendar.

Courses which satisfy the Writing Requirement are identified by the following text in their formal description (under FORMAT): Meets Writing Requirement

Combined Degree

The School of Health and Human Performance and the Faculty of Management offer a five-year program in which a student graduates with both degrees, Bachelor of Science (Recreation)/Bachelor of Management. Please consult the School of Health and Human Performance section in the calendar for more information.

Majors
During their fifth, sixth, seventh and eighth academic terms, students can either pursue a general program of study, by choosing electives from a wide range of the functional areas, or they can follow a more specialized program, taking their elective courses towards a major. Six interdisciplinary thematic majors are available to students who focus their studies in specific aspects of management.

Entrepreneurship and Innovation Major

Required Courses

- MGMT 3511.03: Management Information Systems
- MGMT 3907.03: New Venture Creation
- MGMT 4333.03: Project Management
- MGMT 4901.03: Managing the Venturing Process
- MGMT 3308.03: Managing the Family Enterprise OR MGMT 3902.03: Starting Lean

Leadership and Organization Major

Required Courses:

One of:

- SOSA 1002.03: People in Culture/SOSA 1003.03: People in Society
- SOSA 1100.06: Introduction to Anthropology
- SOSA 1200.06: Introduction to Sociology
- PSYO 1011.03/PSYO 1012.03: Introduction to Psychology and Neuroscience I and II
- PSYO 1021.03/PSYO 1022.03: Introduction to Psychology and Neuroscience I and II

Plus:

- MGMT 3309.03: Management Skills Development
- COMM 3310.03: Leadership and Strategic Change
- MGMT 3320.03: Organizational Theory OR COMM 3303.03: Human Resource Management
- COMM 3304.03: Labour Relations

Management and Globalization (This major has been suspended)

Required Courses:

- Six credit hours from second-year Political Science
- COMM 4315.03: International/Intercultural Management
- COMM 4701.03: International Management Strategy

Public Sector Management Major

Required Courses:

- MGMT 2502.03: Statistics for Managers II
- MGMT 3810.03: Government Policy towards Business
- MGMT 3802.03: Public Policy
- ECON 2216.03: Economics of Global Warming or ECON 2217.03: Women and the Economy or ECON 2218.03: Canadian Economy

Knowledge Management Major

Required Courses:

- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- INFO 6400.03: Advanced Knowledge Management
- MGMT 4540.03/INFO 6540.03: Database Management Systems **or** CSCI 2141.03: Intro to Database Systems

Environment, Sustainability and Society Major

Required courses:

- SUST 1000.06: What is Sustainability? **or** SUST 1001.06: A Sustainable Future*
- SUST 2000.06: Local Governance **or** SUST 2001.06: Global Environmental Governance
- SUST 3000.03 Environmental Decision Making **or** MGMT/SUST 3702.03: Sustainable Industried
- MGMT/SUST 3701.03: The Community as a Living Lab **or** SUST 3502.03 The Campus as a Living Lab
- SUST 4000X/Y.06: Environment, Sustainability and Society Capstone

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however; SUST 1000 also satisfies the BMgmt writing requirement and can be more easily accommodated in the first year BMgmt schedule. SUST 1001 does not satisfy the BMgmt writing requirement.

Majors - Electives

Major in Entrepreneurship and Innovation

Students need nine credit hours from list.

- COMM 3310.03: Reflections on Leadership
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 3405.03: Global Marketing
- COMM 3409.03: Sales Management
- COMM 3410.03: Service Marketing
- LEIS 4362.03: Recreational Entrepreneurship and Special Events
- MGMT 2102.03: Managerial Accounting
- MGMT 2200.03: Legal Environment of Management
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3902.03: Starting Lean

Major in Knowledge Management

Students need 12 credit hours from list.

- MGMT 3511.03: Management Information Systems
- CSCI 1107.03: Social Computing
- INFX 2601.03: Information Security
- MGMT 4300.03/INFO 6300.03: Information Resources in Government
- MGMT 4370.03/INFO 6370.03: Records Management
- MGMT 4611.03/INFO 6610.03: Information Policy
- MGMT 4620.03/INFO 6620.03: Electronic Text Design
- MGMT 4681.03/INFO 6681.03: Geospatial Informtion Management
- MGMT 4310.03/INFO 6310.03: Resources for Business Intelligence

Major in Leadership and Organizations

Students need 12 credit hours from list.

- COMM 2603.03: Legal Aspects of Business
- ECON 2217.03: Women and the Economy
- ECON 2218.03: The Canadian Economy in the New Millennium: Economic Policy Debates for the Next Decade
- ECON 3315.03: Labour Economics
- ECON 3319.03: Industrial Organization
- LEIS 2296.03: Leadership and Group Dynamics
- MGMT 2102.03: Managerial Accounting
- MGMT 2200.03: Legal Environment of Management
- MGMT 3601.03: Information In a Networked World
- MGMT 4333.03: Project Management
- PHIL 2081.03: Ethics in the World of Business
- PSYO 2080.03: Social Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2770.03: Brain and Behaviour
- SOSA 2002.06: The Sociological Perspective: Thinking and Doing Sociology
- SOSA 3005.03: Knowledge, Work and Culture in the Contemporary World
- SOSA 3006.03: Comparative Perspective on Gender and Work
- SOSA 3060.03: Social Change and Development

- SOSA 3165.03: People & Cultures/Area Study
- SOSA 3206.03: Ethnicity, Nationalism, Race
- SOSA 3284.03: Living Cities

Major in Management and Globalization (This major has been suspended)

Students need 12 credit hours from list. A minimum of three credit hours from each of columns A and B.

Column A International Development Focus	Column B International Business Focus
ECON 2213.03: Economic Rise of China and India	COMM 3405.03: Export Marketing
ECON 2334.03: Globalization & Economic Development	COMM 4201.03: International Financial Management

	POLI 3231.03: Urban Governance in Canada
	POLI 3321.03: Politics of European Union
	SOSA 2002.06: The Sociological Perspective
	A minimum 3 credit hour language course

Environment, Sustainability and Society Major

- Three credit hours SUST at 3000 level or above
- Three credit hours SUST/ESS electives at 3000 level or above

Minors

For Bachelor of Management students

Bachelor of Management students can undertake a minor from various departments within the Faculty of Arts and Social Science, the Faculty of Science or the Faculty of Computer Science. They should consult advisors in those faculties for the most current information on the requirements for particular minors.

For a current list of minors please see "Minor Programs" of the Undergraduate Calendar

For students registered in the BA, BSc, Blnf and BCSc programs

The minor in management is available to students registered in the BA, BSc, Blnf and BCSc programs. The requirements are as for the appropriate degree program with completion of the following courses:

Required courses:

- MGMT 1301.03: Multidisciplinary Management I
- MGMT 1302.03: Multidisciplinary Management II
- MGMT 1101.03: Financial Accounting

Any 18 credit hours chosen from the below list, three credit hours of which must be at the 3000 level. Please note that some MGMT courses have additional prerequisite requirements:

- MGMT 2200.03: Fundamentals of the Legal Environment
- MGMT 2303.03: People, work and organizations: Micro Organizational Behaviour
- MGMT 2304.03: People, work and organizations: Macro Organizational Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2801.03: Government Structure
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory
- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- MGMT 3802.03: Public Policy

Optional Internship

The Bachelor of Management (BMgmt) internship is a minimum of 32 weeks (approximately eight months) of consecutive, full time work experience related to your studies. Internships can be with large multi-national corporations or small offices, at a not-for-profit organization or a government department. We will work with you to help you secure your Internship.

Bachelor of Management students currently in the second year of their program are eligible to apply for the Internship Program. Please meet with your Academic Advisor to discuss your course plan. Full details on the program can be found at www.dal.ca/mcs/internship. With proper academic planning, students participating in the Internship Program are able to complete an eight month internship and still graduate from the BMgmt Program in four years. In addition, participants in the Internship Program receive 1 full credit towards their program.

Acceptance to participate in the Internship Program will be assessed on the following criteria:

1. Completion of Application Form
2. Statement of Intent
3. Resume
4. GPA of 2.70 or higher in the two terms preceding application submission, or a CGPA of 2.70
5. Positive recommendations from references
6. Personal interview with Management Career Services (to be arranged once complete application is reviewed)
7. Full participation in the Internship Prep Seminar, MGMT 4895 (no specific course fee, no credit value) which is held each fall

Internship Fee

Students accepted into the Internship Program are charged an Internship Fee. This fee is non-refundable after the last day to drop a course without a "W".

The Internship Fee covers administration of the internship including, but not limited to:

- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- MGMT 4895, the Internship Prep Seminar
- Networking opportunities with employers
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity
- Internship monitoring and mediation of unsatisfactory situations
- Marketing and communications tools and activities to promote the internship program to employers

Career Development Fee

Bachelor of Management students have access to specialized career development services through the Management Career Services unit. This service is covered through the payment of a mandatory Management Career Services Fee. This fee is prorated for part-time students. The Management Career Services team provides the following services:

- Career Related Workshops including: Resumes, Interviewing, Job Search Strategies, Networking and more
- Individual coaching appointments (See below)
- Employer Information Sessions
- myCareer job postings
- On-campus grad recruitment
- Special Events (e.g. Interview Competition, sector specific Recruiting Events and Corporate Tours, both locally and in other cities)

Career & Recruitment Specialists

There are five Career & Recruitment Specialists (CRS), each responsible for specific employment sectors. Two of the five CRS staff members are dedicated to working with Bachelor of Management students. Bachelor of Management students may also meet with another CRS if they require specific information on career interest areas of marketing, finance or accounting. Career & Recruitment Specialists work with students to guide them through a process that provides the student with the ability and knowledge needed to develop their careers. This set of skills will serve students well now, and in the future.

Career & Recruitment Specialists work with students individually or in group session to help with the following:

- Identifying student strengths, interests and priorities
- Helping students establish which career path and work environment is right for them
- Planning a job search strategy
- Writing effective resumes and cover letters
- Building and interacting with a network of contacts
- Preparing for interviews
- Providing job search assistance for graduating students

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

MGMT 1101 Introductory Accounting I (Financial)
CREDIT HOURS: 3
An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context includes business, government and

not-for-profit settings. The coverage included an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.
CROSSLISTED: COMM 1101.03
FORMATS: Lecture | Tutorial

MGMT 1102 Introductory Accounting II
CREDIT HOURS: 3
An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities--whether for business, governments, not-for-profit organizations or special projects. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.
CALENDAR NOTES: Students who have completed MGMT 2102.03 cannot also receive credit for MGMT 1102.03.
PREREQUISITES: MGMT 1101.03
CROSSLISTED: COMM 1102.03
EXCLUSIONS: MGMT 2102.03; COMM 2102.03

MGMT 1301 Interdisciplinary Management I
CREDIT HOURS: 3
The Bachelor of Management program is intended to be an interdisciplinary program with participation from the four schools (Rowe School of Business, the School of Resources and Environmental Studies, the School of Public Administration and the School of Information Management). This course will introduce students to the basic definition of management and how people and process vary across the disciplines. Students will explore basic management issues of planning, organizing, leading and controlling within a variety of venues including for-profit, not-for-profit, and public sectors. The class introduces students to management issues with an emphasis on creativity, leadership and innovation.
FORMATS: Lecture

MGMT 1302 Interdisciplinary Management II
CREDIT HOURS: 3
The Bachelor of Management program is intended to be an interdisciplinary program with participation from the four schools (Rowe School of Business, the School of Resources and Environmental Studies, the School of Public Administration and the School of Information Management). This course will build on the students understanding of the basic definition of management and how people and process vary across the disciplines. Students will apply critical thinking to basic management issues of planning, organizing, leading and controlling within a variety of sectors including both for-profit, not-for-profit, and public. The class explores current management issues with an emphasis on creativity, leadership and innovation.
PREREQUISITES: MGMT 1301.03
FORMATS: Lecture

MGMT 1501 Statistics for Managers
CREDIT HOURS: 3
An introduction to the principles and applications of statistics relevant to managers, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing and statistical software.
CALENDAR NOTES: Students enrolled in the Bachelor of Management must register for this course.
EXCLUSIONS: MATH 1060.03, STAT 1060.03, ECON 2260.03, ENGM 2032.03 NOTE: Students cannot receive credit for MGMT 1501.03 after already receiving credit for STAT 2060.03
FORMATS: Lecture

MGMT 1601 Electronic Information Management
CREDIT HOURS: 3
This course will teach students how to use computer applications to record and process data to create and communicate information and knowledge. It will show students the importance of business applications in the management environment. Students will master the word processing, spreadsheet, and presentation software in an integrated office suite. They will also learn to design and create web pages with html. It is strongly recommended that students complete this course in their first year of study.
CALENDAR NOTES: ASSC 1000 or CSCI 1200 will not be counted in the Bachelor of Management program.
EXCLUSIONS: ASSC 1000.03, CSCI 1200.03

MGMT 2200 Fundamentals of the Legal Environment of Management
CREDIT HOURS: 3
This course provides an introduction to the legal setting of management in Canada. It examines the structure of the legal system and the machinery of justice. It considers the nature and application of various areas of law that are particularly relevant to management in the early 21st century, including administrative law, the law of torts, the law of contracts, principles from equity, organizational structures, employment and labour relations, insurance, the various areas of property law, privacy and freedom of information, and environmental protection.
PREREQUISITES: At least second year standing
EXCLUSIONS: COMM 2603.03, MGTA 2001.03
FORMATS: Online Delivery

MGMT 2303 People, Work, and Organizations: Micro Organizational Behaviour
CREDIT HOURS: 3
Organizational behaviour and the study of work organizations and management draw on a number of disciplines within social sciences to help us to understand and make sense of individual behaviour and human action in groups and organizations. Through a combination of individual and group work and a blend of classroom based activities, this course will explore concepts and theories relating to micro aspects of organizational behaviour. Topics include: individual motivation, personality, perception, attitudes, cultural values, and ethics in organizations. Links will also be made to practice and processes in organizations (for example: rewards, stress

appraisal, trust and organizational commitment).
PREREQUISITES: MGMT 1302.03
EXCLUSIONS: COMM 2303.03*Students who have taken COMM 2303.03 Introduction to Managing People are currently required to take MGMT 3309.03 (Management Skills Development) for full exclusion to MGMT 2303.03 and MGMT 2304.03.

MGMT 2304 People, Work and Organizations: Macro Aspects of Organizational Behaviour
CREDIT HOURS: 3
Mgmt 2304.03 builds on the concepts and principles identified in Mgmt 2303.03. This course takes a macro perspective that will consider the relationships between structural, cultural, social, economic and political factors and managing and organizing work. Topics include: organizational structure and processes; leadership, power and politics; organizational cultures, processes of organizational change, and legal and ethical issues and frameworks. To achieve a balance between theoretical and practical learning, the teaching methods will combine mini-lectures with in-class/on-line exercises, cases, presentations and group facilitated discussions.
PREREQUISITES: MGMT 2303.03
EXCLUSIONS: COMM 2303.03 Please note: where a student is transferring from Commerce to Management and has taken COMM 2303.03, they will need to take the complementary course MGMT 3309.03 (Management Skills Development) to receive full credit for MGMT 2303.03 and MGMT 2304.03

MGMT 2305 Ethics and Social Responsibility
CREDIT HOURS: 3
Business Ethics & Corporate Responsibility builds student capacity and capability for engaging difficult and complex ethical issues in today's organizations. This course examines common ethical challenges facing today's organizational leaders, and through theoretical and applied knowledge, students develop their awareness, capacity, and capability to scrutinize ethical situations and to develop useful courses of action. The course challenges students to think critically through moral visioning and imagination and prepares students to address everyday organizational ethical challenges with creativity and moral intelligence.
PREREQUISITES: At least second year standing
CROSSLISTED: COMM 2310.03
EXCLUSIONS: PHIL 2081.03
FORMATS: Lecture | Lab

MGMT 2401 Introduction to Marketing
CREDIT HOURS: 3
The objective of this class is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course. Students will work in teams and will be preparing a marketing plan to introduce a new product to the Canadian market.
CALENDAR NOTES: Students enrolled in the Bachelor of Management must register for this course under its MGMT designation. Only students enrolled in the Bachelor of Management are permitted to take MGMT 2401.03
PREREQUISITES: MGMT 1302.03
CROSSLISTED: COMM 2401.03

MGMT 2402 Marketing Applications in the Not-for-Profit Sectors
CREDIT HOURS: 3
This course is intended to further the student's understanding of the ways in which the discipline of marketing can be applied to a number of public policy, environmental, professional and non-profit management areas. It will integrate the basic theory and concepts covered in the introductory marketing course with the knowledge gained in the introductory courses in environmental and public policy management or in introductory courses in a number of professional fields. The course will maintain an overall managerial perspective in examining the ways in which various constituencies fulfill their strategic organizational objectives through the application of marketing practices. Topic areas examined will be: micro-marketing (firm perspective) vs. macro-marketing (societal perspective); non-profit, cause-related, "green" and social marketing; de-marketing (e.g. anti-smoking, etc.); the use of marketing communications in the electoral and public policy-making process; ethics in marketing; marketing and development. The course may also examine the application of the discipline of marketing to a number of professional fields, such as sports/recreation and health sciences. Learning activities might include: lectures, videos, seminars, internet exercises, examinations and field assignments.
PREREQUISITES: MGMT 2401.03

MGMT 2502 Predictive Analyitics
CREDIT HOURS: 3
This course is a continuation of MGMT 1501. It concerns mostly the relationship of two or more measurements, with an eye to making quantitative predictions in the context of a business or other organization. Topics covered in detail are analysis of variance, simple and multiple regression, logistic regression and time series.
PREREQUISITES: MGMT 1501.03
CROSSLISTED: COMM 2502.03
EXCLUSIONS: MATH 2080.03, STAT 2080.03, ECON 2280.03

MGMT 2601 Knowledge Management
CREDIT HOURS: 3
In today's economy cutting-edge organizations in every industry are harnessing the power of knowledge as a core asset of the organization and the key to a sustainable competitive advantage. The aim of this Knowledge Management (KM) course is to provide an introductory and integrated approach to the various topics, emerging issues and perspectives in KM and organizational learning. We will explore how all types of organizations can effectively understand, analyze, measure, and manage, knowledge as an asset, i.e., manage the organization's intellectual assets and turn organizational wisdom into market value. Emphasis is placed on the development and application of both technical and people management skills within Knowledge Management environments.
PREREQUISITES: At least second year standing
FORMATS: Lecture

MGMT 2605 Data Literacy: Living and Working with Data
CREDIT HOURS: 3
People and organizations are grappling with increasing amounts of data. Modern citizens and employees will be expected to collect, manage, evaluate, visualize, analyze, and apply data in a range of domains and challenges: in short, to be data literate. This course introduces this knowledge and skillset through lectures and hands-on labs. Students will learn to use a variety of tools to find, manage, assess, extract value from, and visualize raw data.
PREREQUISITES: MGMT 1601.03
RESTRICTIONS: Student must be second year status or above
FORMATS: Lecture | Lab

MGMT 2801 Government Structure
CREDIT HOURS: 3
This course introduces students to the organizing principles and structures of the three levels of Canadian government; federal, provincial and municipal. The focus is particularly directed at the permanent public service and seeks to examine the collective "whole of government" influence on Canadian affairs. For those interested in business this is an important course as it provides an understanding of the core structures business must understand when dealing with government. As citizens this course provides a framework for understanding how you might protect your rights.
PREREQUISITES: MGMT 1302.03
FORMATS: Lecture

MGMT 2803 Management in the Public Sector
CREDIT HOURS: 3
This course provides an introduction to the principles and methods used in the management of financial, human, and information resources in public sector organizations, with an emphasis on leadership in the Canadian context. It is designed to meet the educational needs of undergraduate students who are interested in a career in public service, the arts, or non-profit organizations, and who wish an exposure to modern management practices in the public sector.
PREREQUISITES: MGMT 2801.03

MGMT 2805 Introduction to Indigenous Governance
CREDIT HOURS: 3
This course focuses on the traditional political cultures of Indigenous peoples within Canada as well as the fundamental issues facing Indigenous communities. This introductory course will provide students with the necessary background and conceptual framework that will equip them with a better understanding of Indigenous Governance.
RESTRICTIONS: Must be a second year status or above
FORMATS: Online Delivery

MGMT 2902 Innovation: An Introduction to Design Thinking
CREDIT HOURS: 3
Ever wonder how great ideas turn into innovative solutions people or organizations want to adopt? In today's highly dynamic environment, innovation has become not only a priority, but a driving force for highly successful organizations that adopt Design Thinking tools and processes that promote innovation. When done well, these tools and processes link inspiration and passion to implementation and delivery – and help individuals and organizations develop a culture that embraces and promotes innovation. This course combines theory and application and provides a hands-on practical learning experience for students as they actually design and implement innovative solutions to real world problems using creative problem solving and design thinking techniques. Students work in teams and learn how to apply these techniques to more fully understand the problem, identify novel and suitable solutions, and determine whether their proposed solution is a fit with those that will be using it.
PREREQUISITES: 2nd year students
FORMATS: Lecture

MGMT 3201 Financial Management
CREDIT HOURS: 3
This course is an introduction to the techniques and core principles for making optimal financial decisions for profit, not for profit and public sector organizations. The emphasis is on understanding the role of finance in an integrated management framework. Concepts covered include stakeholder analysis, financial planning, valuation and triple bottom line analysis.
PREREQUISITES: MGMT 1101.03, MGMT 1501.03
EXCLUSIONS: COMM 2202.03 and COMM 2203.03
FORMATS: Lecture

MGMT 3308 Managing the Family Enterprise
CREDIT HOURS: 3
Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and business. The course has two purposes. First it provides an organized framework for students to understand the dynamics and special issues of family firms. Second it is designed to allow students to explore their interest in joining a family firm. Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.
PREREQUISITES: MGMT 1101.03 and at least third year standing
CROSSLISTED: COMM 3308.03
EXCLUSIONS: BUSI 6006.03
FORMATS: Lecture

MGMT 3309 Management Skills Development
CREDIT HOURS: 3
This course will expose students to key knowledge, behaviours, skills, competencies and attitudes considered critical to managerial success. The course is designed to provide students with knowledge and an applied focus which will help ensure they understand effective management practice. Topic areas include: understanding what the successful manager needs to know, understanding the personal self, communications, interpersonal negotiations, team skills, managing innovation and change, handling conflict and anger, coaching, and leadership skills and attitudes needed for success. Significant amounts of classroom time will be devoted to putting theory into practice in terms of employing exercises, role plays, case studies, and group discussions.
PREREQUISITES: MGMT 2304.03 or COMM 2303.03 and at least third year standing
CROSSLISTED: COMM 3309.03
FORMATS: Lecture | Discussion | Experiential Learning

MGMT 3320 Organizational Theory
CREDIT HOURS: 3
This course will expose students to how organizations can be designed and structured to be most effective, and how organizations develop and change in response to forces in their internal and external environments. Theoretical and practical approaches, and frameworks that are useful for assessing organizational effectiveness will be covered. How organizational structures are designed and driven by strategy, technology, culture, and change management practices will also be primary areas of foci. The course will be structured around a combination of lectures, student presentations, and lots of in-class discussion and experiential exercises.
PREREQUISITES: MGMT 2304.03
FORMATS: Lecture

MGMT 3400 Introduction to Real Estate Management
CREDIT HOURS: 3
The purpose of this course is to provide students with an overview of the varied aspects of property management in the Canadian environment. Topics include: Residential Management, Building Operations, Environmental Programs and Initiatives, Facility Management, Law and the Lease, and Site Development.
PREREQUISITES: MGMT 1101.03 and MGMT 3201.03 or COMM 1101.03, COMM 2202.03 and COMM 2203.03
FORMATS: Lecture

MGMT 3501 Operations Management
CREDIT HOURS: 3
This course introduces the student to some of the standard techniques used in managing operations in manufacturing, services, as well as not-for profit organizations. Topics include: forecasting, inventory, supply chains, production planning, project management, quality and queueing. Cases and class examples are used to build general skills, illustrate the application of techniques and general approaches to managing operations in the public and private sector.
PREREQUISITES: MGMT 1101.03, MGMT 1501.03, MGMT 1601.03, MGMT 2401.03
EXCLUSIONS: COMM 3501.03

MGMT 3511 Management Information Systems
CREDIT HOURS: 3
Information is a key resource for businesses, other organizations, and professionals in both the contemporary and emerging worlds. Innovative uses of information are often keys to survival in an increasingly competitive economy. In addition, information systems account for an increasing larger share of assets in most organization. The ability to harness and manage information resources and information technologies demands a sound understanding of a broad range of concepts, terms, and challenging issues in a constantly evolving context. This course is designed to help students acquire the essential skills and conceptual background to become an effective client, user, and planner of Management Information Systems. It will help students develop a broad understanding of how information systems are used in organizations, the technologies that influence their use, their role in supporting business operations and decision making, how they need to be managed, and the impact that they can have on organizations' and professionals' competitive positions. Students will be exposed to SAP ERP systems and Business Analytics tools via hands-on lab work and exercises.
PREREQUISITES: MGMT 1302.03
CROSSLISTED: COMM 3511.03
FORMATS: Lecture | Lab | Discussion | Experiential Learning

MGMT 3601 Information in a Networked World
CREDIT HOURS: 3
This course provides an introduction to the economic, political, and social dimensions of today's networked information economy. It considers the historical development of information and knowledge production, issues related to control versus the free flow of information, the ethical and legal aspects of information management, and organizational use of information management for storing and processing information, managing knowledge, and making decisions.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3602 Professional Communication Skills
CREDIT HOURS: 3
This course will introduce students to the broad range of written and oral communication skills needed by managers, including how to adapt a document or presentation for a particular audience and purpose, how to select a suitable method of organization, how to make good use of graphics, how to work effectively as part of a collaborative project team. Students will have the opportunity to practice their communication skills and techniques in small groups, and in formal presentations before the whole class.
PREREQUISITES: Writing Requirement
EXCLUSIONS: COMM 1710.03 and COMM 1720.03 or EGLA 1003.03
FORMATS: Lecture

MGMT 3603 Beyond Google
CREDIT HOURS: 3
Contextually relevant information is essential to support decision making and strategic planning by individuals, groups and organizations. This course discusses the theory and practice of searching for information, from the level of needs assessment though to systematically scanning through electronic, print and human sources

efficiently, effectively and ethically. The use of technologies to streamline search processes will be emphasized, as well as the behavioural, affective and cognitive aspects of human information behaviour.
PREREQUISITES: At least third year standing
FORMATS: Online Delivery

MGMT 3701 The Community as a Living Laboratory
CREDIT HOURS: 3
This course introduces students to research, concepts and methods for analyzing community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater environmental, social and economic sustainability. Working in groups, students apply problem-solving models to case studies using qualitative and quantitative research methods to help community-based organizations grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 or SUST 2000.06 or SUST 2001.06 or MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03
CROSSLISTED: SUST 3701.03
EXCLUSIONS: ENVS 3502.03, SUST 3502.03

MGMT 3702 Sustainable Industries
CREDIT HOURS: 3
The course introduces students to concepts and methods for analyzing industrial sustainability through an interdisciplinary lens that highlights the necessity of including economic, social and environmental considerations. It also intends to deepen their understanding of: a) the business case (short term and long term) for industrial/corporate sustainability; b) the tools, techniques and strategies necessary to decouple economic growth of our business sectors from resource use and environmental degradation; and c) the key role that business and industry play in the sustainable development agenda. Using examples from various industrial settings, a range of management and policy mechanisms for ensuring resource sustainability are explored.
PREREQUISITES: MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03 or SUST 2000.06 or SUST 2001.06 or ENVS 1100.03 and ENVS 1200.03 or ENVS 1000.06
CROSSLISTED: ENVS 3702, SUST 3702

MGMT 3710 Doing Business in Emerging Markets
CREDIT HOURS: 3
This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.
PREREQUISITES: MGMT 2304 and MGMT 2401
CROSSLISTED: COMM 3710
FORMATS: Lecture

MGMT 3802 Public Policy
CREDIT HOURS: 3
This course serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3810 Government Policy Toward Business
CREDIT HOURS: 3
The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole. The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3902 Starting Lean
CREDIT HOURS: 3
This course provides real world, hands-on learning on what it's like to actually build a scalable startup company. This is a practical course - essentially a lab, not a theory course providing experiential learning. You will work in teams learning how to turn a great idea into a great company. You will learn how to talk to customers, partners, and competitors, as you encounter the chaos and uncertainty of how a startup actually works. You'll learn how to use a business model canvas to brainstorm each element of a company. You will learn the importance of customer development and customer discovery to determine whether anyone other than you would want/use your product and what your 'Minimum Viable Product' (MVP) should look like. Each day will be a new adventure outside the classroom as you test each part of your business model, then share your hard earned knowledge with the rest of the class.
PREREQUISITES: At least third year standing
CROSSLISTED: BUSI 5902.03

MGMT 3907 New Venture Creation Entrepreneurship
CREDIT HOURS: 3
This course is about entrepreneurial thinking and acting on it. By linking theory and practice, the course will expose students to the issues, problems and challenges of developing new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas, testing their ideas assumptions, and most importantly how to act on ideas with the resources you have on hand. Experiential exercises enable the students to build their personal entrepreneurial strategy. identify an innovative idea, build their business model, gather resources, and present their business idea. The purpose of the course is to provide students a foundation from which they can act entrepreneurially for themselves or for the organization they work for.
PREREQUISITES: MGMT 2902.03; OR MGMT 1302.03, MGMT 1101.03 and MGMT 2401.03
CROSSLISTED: COMM 3307.03
FORMATS: Lecture | Discussion | Experiential Learning

MGMT 4001 Strategy Formulation
CREDIT HOURS: 3
This is a capstone course which draws upon all previous courses in the Bachelor of Management Program. The course introduces students to different theoretical frameworks for the analysis and development of strategy. Moving through an analysis of the external and competitive environment of the organization and its resources and capabilities, students' progress to the formulation phase of strategy-making through lectures, case studies, and experiential exercises. Strategy is examined in the context of the four thematic areas of study and professional practice upon which the Faculty of Management has been formed. In addition to other requirements, student knowledge is consolidated through the preparation of a major individual project on a real organization.
PREREQUISITES: All required first, second, and third year core courses for the Bachelor of Management program.
EXCLUSIONS: COMM 4351.03
FORMATS: Lecture

MGMT 4002 Strategy Implementation
CREDIT HOURS: 3
This course is the second capstone course in the Bachelor of Management Program and is a continuation of MGMT 4001.03. The course is about strategy implementation. Through the course, students learn to discern and manage four important variables on the way to effectively implementing a chosen strategy: organizational structure, control systems, people management systems, and organizational culture. In addition, students learn about leadership and management in the context of creating organizational change. The course entails lecture case discussions, individual assignments, and a major team project on strategy implementation within an existing organization. Finally, the course draws on, and applies to, the four thematic areas of study and professional practice upon which the Faculty of Management was formed: the private sector, the environment, the public sector and information technology.
PREREQUISITES: MGMT 4001.03
EXCLUSIONS: COMM 4352.03
FORMATS: Lecture

MGMT 4031 Ecological Economics
CREDIT HOURS: 3
Ecological economics is an emergent, transdisciplinary field of inquiry whose primary concern is to advance the body of theory and tools to understand and manage the environmental dimensions of economic activity. It is an explicitly normative field oriented towards environmental sustainability in economic organization. Ecological economics recognizes three conditions necessary to environmental sustainability: appropriate scale (relative to biocapacity), efficient allocation, and just distribution. Given the breadth of material encompassed within the scope of ecological economics, this class will explore a subset of possible topics including the basic principles and theory of scale, efficiency, and distributive justice. In addition, the class will look at how these apply to managing real world issues in environmental management and explore the tools used by ecological economists to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to ecological economics for graduate students in environmental studies and related programs with little or no prior exposure to economics.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies
CROSSLISTED: ENVI 5031.03

MGMT 4041 Environmental Education
CREDIT HOURS: 3
Environmental education for all ages is a critical step in fostering sustainable behaviours and achieving higher level environmental goals. This course takes an interdisciplinary approach to studying environmental education, examining the cognitive and social science underpinnings of behaviour change. Through course readings and experiential "hands-on" learning opportunities, students are invited to critically evaluate how environmental educators create effective and authentically engaging programs. This course provides an overview of program evaluation techniques as well as environmental education in formal school settings, wilderness education, urban environmental education, how policy and mass media influence environmental behaviour.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies
CROSSLISTED: ENVI 5041

MGMT 4047 Biodiversity Conservation System Design
CREDIT HOURS: 3
Biodiversity conservation systems are increasingly necessary as human activities dominate the landscape, seascape and freshwater ecosystmes. Precise prescriptions for conservation design are evolving. The theory and practice of conservation system design are explored through lectures, student presentations, discussions and exercises, as an active learning module involving the students, the instructor and the broader community. Topics include representation of ecological systems, focal species, population viability, habitat suitability, landscape ecology, connectivity, road ecology and planning for species shifts in response to climate change.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies
CROSSLISTED: ENVI 5047.03

MGMT 4050 Directed Reading and Research
CREDIT HOURS: 3
This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Program Committee for approval. Guidelines are available from the Bachelor of Management Program Administrator.

MGMT 4125 Conflict Negotiation & Sustainability
CREDIT HOURS: 3
This course looks at local and global conflicts driven by: climate, politics, resource extraction, land use, and development. The class offers preparatory lectures followed by team-based simulated negotiations. Students learn techniques related to de-escalation, negotiation and debate tactics, through assuming and advocating various stakeholders perspectives.
CROSSLISTED: SUST 4125.03, PLAN 4125.03
RESTRICTIONS: Must be third year status or above
EXCLUSIONS: PLAN 6125.03
FORMATS: Lecture | Discussion

MGMT 4205 Law and Policy for Resource and Environmental Management
CREDIT HOURS: 3
This course provides students with an overview of substantive and procedural aspects of Canadian law and policy related to natural resources and the environment. The course will involve lectures, guest speakers, seminar discussions and class participation. Strong emphasis is placed on the Canadian legislative and regulatory framework and the unique character of the regulated subject areas such as toxic substances, air and water quality, fisheries, forests, agriculture, minerals, parks and biodiversity. The role of the common law in preventing or redressing environmental degradation will also be addressed.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5205.03

MGMT 4300 Government Info Resources
CREDIT HOURS: 3
Examines the structures of governments and the ways in which they produce information for their own use and for the general public. Emphasis is placed on the nature and scope of Canadian, American, and British government information as well as information of intergovernmental agencies such as that of the United Nations. Acquisition, organization, access, use and evaluation of government information are considered.
CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.
PREREQUISITES: INFO 5530.03 (recommended)
CROSSLISTED: INFO 6300.03
RESTRICTIONS: MLIS, MLIS/JD, MLIS/MPA, MLIS/MREM

MGMT 4333 Project Management
CREDIT HOURS: 3
Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.
PREREQUISITES: MGMT 3501.03 or COMM 3501.03
CROSSLISTED: COMM 4523.03

MGMT 4340 Corporate Governance
CREDIT HOURS: 3
The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests.Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board’s vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.
PREREQUISITES: MGMT 4001.03
CROSSLISTED: COMM 4340.03
EXCLUSIONS: BUSI 6315.03
FORMATS: Lecture

MGMT 4370 Records Management
CREDIT HOURS: 3
A comprehensive introduction to the field of records and information management. Topics covered include: records creation, evaluation, maintenance and control; issues relating to the maintenance, storage and disposition of records; and electronic records management.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
CROSSLISTED: MGMT 5012, INFO 6370

MGMT 4500 Socio-political Dimensions of Resource and Environmental Management
CREDIT HOURS: 3
The goal of this course is to introduce students to the social, cultural, and political dimensions regarding resource and environmental management. Key objectives are to introduce, analyze, and utilize a range of frameworks for understanding the human dynamics of resource and environmental management decision-making. Because this course is integrated with ENVI5205 (biophysical dimensions of resource and environmental management) and ENVI5505 (law/policy dimensions of resource and environmental management) in the same term as required for the MREM program, there is a focus on common case studies to demonstrate the interconnectedness of these dimensions. Student groups in this course undertake in-depth investigation of the socio-political elements of resource and environmental management cases in Atlantic Canada.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies.
CROSSLISTED: ENVI 5500.03

MGMT 4504 Management of Resources and the Environment
CREDIT HOURS: 3
Students explore key management concepts applied in managing natural resources and the environment. Topics include management paradigms, systems, principles, approaches, tools and institutions associated with a wide range of sectors such as fisheries, forests, agriculture, the coastal zone, oceans, parks and protected areas, energy, waste, water, and others. Case studies complement lectures, seminars and field trips.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5504.03

MGMT 4505 Biophysical Dimensions of Resource and Environmental Management
CREDIT HOURS: 3
This course will introduce students to techniques and tools employed in natural resource and environmental management programs and projects and engage students in case-based problem solving learning intended to understand how biophysical information is utilized in assessing resource and environmental issues and contributing to effective decision-making. Some of the tools that will be reviewed are environmental impact assessment, environmental site assessment, life cycle analysis, environmental monitoring and adaptive environmental assessment and management.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5505.03

MGMT 4507 Environmental Informatics
CREDIT HOURS: 3
This course introduces students to geospatial information management, including the nature of geospatial data; access, representation, and communication of data and information; and relevant tools and materials such as census data, spreadsheets, and geographic information systems. Special topics may include privacy, health, citizen science, or the humanities.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
EXCLUSIONS: ENVI 5507.03, INFO 6681.03
FORMATS: Lecture | Lab | Discussion

MGMT 4540 Database Managemet Systems
CREDIT HOURS: 3
Introduces the theory and practice of managing data, covering technology-driven solutions to the challenges of storing, curating, and retrieving unstructured, semi-structured, and structured data. Topics include: tabular data, assessing data management requirements, data models and schemas, relational database management systems, SQL, post-relational DBMSs, Big Data, and visualization.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
CROSSLISTED: INFO 6540, BUSI 6516

MGMT 4611 Information Policy
CREDIT HOURS: 3
Explores, in a graduate seminar setting, a range of issues currently facing information professionals and the effect of these issues on policy development. Discusses the roles of all levels of government, the private and not-for-profit sectors, and key individuals in developing policies which affect information creation, control, access, and use. Focuses on Canadian issues, and includes international affairs as appropriate to the information society.

MGMT 4620 Web Design and Architecture
CREDIT HOURS: 3
Examines the theories, techniques and processes used to create, structure, and deliver electronic text. Topics include: writing and design for the web, information architecture, and document analysis for digitization. Focuses on practical experience with HTML and CSS, TEI standards, XML, and XSLT.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
CROSSLISTED: INFO 6620

MGMT 4681 Geospatial Info Management
CREDIT HOURS: 3
This course introduces students to geospatial information management, including the nature of geospatial data; access, representation, and communication of data and information; and relevant tools and materials such as census data, spreadsheets, and geographic information systems. Special topics may include privacy, health, citizen science, or the humanities.
CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.
RESTRICTIONS: MLIS, MLIS/JD, MLIS/MPA, MLIS/MREM
EXCLUSIONS: ENVI 5507.03, INFO 6681.03

MGMT 4705 Environmental Assessment
CREDIT HOURS: 3
Students explore all aspects of environmental assessment (EA), with a focus on EA processes in Canada. The course examines professional practice in scientific, procedural and political dimensions. Current cases are studied opportunistically. Students learn the materials through case studies, seminars, group projects and research papers.
CROSSLISTED: ENVI 5001.03

MGMT 4895 Internship Prep Seminar
CREDIT HOURS: 0
Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students must register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience. Students apply to the Internship Program through Management Career Services in their second year.
CALENDAR NOTES: This course carries zero credit hours. Details on the Bachelor of Management Internship Program are available at www.dal.ca/mcs/internship

MGMT 4896 Management Internship
CREDIT HOURS: 3
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)

MGMT 4897 Management Internship
CREDIT HOURS: 3
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602.03 (Professional Communication Skills) and MGMT 4895.03 (Internship Prep Seminar)

MGMT 4898 Management Internship
CREDIT HOURS: 0
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)

MGMT 4901 Managing the Venturing Process
CREDIT HOURS: 3
Managing the Venturing Process is a capstone course that explores the strategic elements required to venture successfully. By linking theory and practice, the course is designed to familiarize students with entrepreneurial strategies for the emerging venture, for the growing venture, and for sustaining growth in the established venture. Venturing will be explored in the context of both for-profit and not-for profit objectives and will examine nurturing single entrepreneurs as well as organizational entrepreneurs. As this is a capstone course students will be expected to use knowledge acquired in others business courses.
PREREQUISITES: MGMT 3907.03 or COMM 3307.03
CROSSLISTED: COMM 4301.03

Entrepreneurial Skills Program

Location: Kenneth C. Rowe Management Building
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-3076

Email: Entrepreneurship@dal.ca or Ding.Fan@dal.ca

Introduction
Dalhousie's Norman Newman Centre for Entrepreneurship, in collaboration with the Centre for Entrepreneurship Education and Development (CEED), offers a Certificate Program in entrepreneurship – the Entrepreneurial Skills Program (ESP), which is open to all Dalhousie University students.

ESP facilitates the development, growth and success of student-run ventures. Through extracurricular, individualized, experiential learning, you will apply skills learned in the classroom to your own ventures. Students participating in the program develop personal portfolios that illustrate their entrepreneurial capabilities. At Dalhousie there is a particular emphasis on ventures that address larger societal needs in the area of sustainability and social responsibility.

What is the Entrepreneurial Skills Program (ESP)?
The program is designed to be taken over the length of your time as a student at Dalhousie and therefore shouldn't extend time to degree completion. Successful students will earn a certificate in entrepreneurship in addition to their associated Dalhousie University academic degree in their field of study. The program culminates in the development of a personal portfolio that illustrates a student's entrepreneurial capabilities which is then presented to an accreditation panel. Upon successful completion of ESP, students are accredited and receive a certificate indicating venture readiness.

How do I know if ESP is for me?
Like most things, you probably won't know till you know. What we can say is that ESP typically appeals to those students who have an interest in being the masters of their own destiny. If you've got an idea for a business that you want to start, either during University or after graduation, then you owe it to yourself to get involved with ESP.

What's in it for me? Why would I want to be part of ESP?
Being part of ESP introduces you to a network of like-minded individuals. It's no surprise that successful people surround themselves with talented, energetic and visionary people. If you want to learn more about being in business for yourself, or if you want to get better at being an entrepreneur, then ESP is a good start.

By enrolling in ESP, you become part of a growing cohort of students that are interested in making a difference in their own lives and the lives of others. Aside from networking and peer-to-peer learning opportunities, you will also have access to training subsidies, business coaching, and skills development opportunities that you can leverage to make yourself a better business owner (or make yourself more marketable as an employee). If you participate in entrepreneurship classes you may be able to pursue your venturing interests while at the same time fulfilling some of the class assignment requirements.

If I sign up, how big a commitment are we talking about?
Students enrolled in ESP are free to choose their degree of involvement. Many students become heavily involved, attending most, if not all, ESP-sponsored events. Others attend a limited number of events. ESP is flexible enough to accommodate you and your personal, academic and professional schedules.

Does Dalhousie offer ESP to other university students?
Yes. Dalhousie offers the ESP program to university students from other local universities and colleges, including Saint Mary's University, Mount Saint Vincent University.

ESP sounds like a lot of work – what if it gets too much for me?
Involvement in ESP is entirely optional. You are free to leave the program at any point. Unlike most academic programs, there's no downside risks (mark-related/academic) associated with dropping ESP.

Clinical & Basic Science Departments
Dalhousie Medical School is the cornerstone of quality health care in Maritime Canada. Whether in the classroom, in the lab, or at the bedside, the Medical School works to improve patient care and advance medical research, while reflecting the values and character of the Maritime people we serve.

Our **departments and academic units** provide opportunities for intellectual and personal growth. We celebrate the individual as well as the team.

For information about the Doctor of Medicine degree, visit the Dentistry Law Medicine academic calendar.

Introduction
Epidemiology is the core science that underpins both public health and evidence-based clinical practice. Epidemiologic research targets factors that influence the development, course and outcomes of health conditions. Included among these factors are health services and systems.

Our faculty members are responsible for an undergraduate course, CH&E 4010.03 Principles of Epidemiology and Research Methods. This course is situated in the Faculties of Science/Medicine, as part of the BSc Medical Sciences Program. Our faculty members are also engaged in tutoring, teaching and leadership within the medical school (please see the Faculty of Medicine calendar for more information).

Degree Programs
There are both MSc and PhD programs available through the department of CH&E; please see the Faculty of Graduate Studies calendar for more information.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

CH&E 4010 Principles of Epidemiology and Research Methods
CREDIT HOURS: 3
This course is intended for undergraduate Medical Sciences students (others require instructor's permission) without formal training in epidemiology. It introduces the principles of epidemiology and research methods, with examples and applications. Topics include measures of health and risk, study designs, validity, causality, generalizability and critical appraisal of health-related scientific literature.
PREREQUISITES: Priority will be given to students in the fourth year of the BSc Medical Sciences program. With the instructor's permission, the course is also available to other upper year undergraduate students. Students must have successfully completed STAT 1060 or equivalent, PHAC 3001, MICI 3115, and at least one of the following: ANAT 3010, PATH 3000, PHIL 2810, or SOSA 2503.
FORMATS: Lecture

Introduction
The Department of Medical Neuroscience fosters research and training in neuroscience that advances the understanding and treatment of diseases of the nervous system. Our faculty members contribute to undergraduate neuroscience courses in the Faculty of Science including NESC 3440: Human Neuroanatomy and NESC 4070: Chemical Neurobiology.

The Department of Medical Neuroscience is also the home for Anatomy at Dalhousie University, at the undergraduate level offering courses in basic anatomy and histology.

Course Descriptions

ANAT 1010 Basic Human Anatomy
CREDIT HOURS: 3
This course is offered by the Department of Medical Neuroscience primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions. Arts and Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: Please note that the Distance Anat 1010 section 02 course is unrestricted and open to all students.
RESTRICTIONS: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 1020 Basic Human Anatomy
CREDIT HOURS: 3
This course is offered by the Department Medical Neuroscience primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: This course is NOT offered during the summer term.
RESTRICTIONS: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 1040 Basic Human Anatomy for Pharmacy Students
CREDIT HOURS: 3
This course is offered by the Department of Medical Neuroscience to students in the College of Pharmacy. Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. There are no formal laboratory sessions.
RESTRICTIONS: Restricted to Pharmacy students
FORMATS: Lecture | Tutorial

ANAT 2160 Introduction to Human Histology
CREDIT HOURS: 3
Histology is the study of the structure of cells, tissue and organ systems, and utilized information derived from both light and electron microscopy. This course complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.
PREREQUISITES: BIOL 2020.03 or permission of instructor
CROSSLISTED: BIOL 3430.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ANAT 3421 Comparative Vertebrate Histology
CREDIT HOURS: 3
An advanced histology course surveying the whole range of vertebrate tissues and organs. The material is approached from a comparative perspective, considering tissue and organ histology throughout the major vertebrate courses.
PREREQUISITES: BIOL 3430.03 or ANAT 2160.03 or equivalent
CROSSLISTED: BIOL 3421.03
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 2

ANAT 4010 Advanced Human Anatomy
CREDIT HOURS: 3
This laboratory-centered course provides students with a high level of understanding of three-dimensional human anatomy. The course consists of hands-on study of functional anatomy through cadaver dissections and supplementary lectures and discussions. Restricted to fourth year students in the BSc in Medical Science program.
PREREQUISITES: ANAT 3010.03; Instructor permission required.
FORMATS: Lecture | Lab

Pathology

Location: Sir Charles Tupper Medical Building
5850 College Street
11th Floor
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-2091

Website: pathology.medicine.dal.ca

Email: eileen.kaiser@dal.ca

Introduction
The study of Pathology encompasses the understanding of basic responses of cells, tissues and organs to various injurious stimuli with particular emphasis on the role of such responses in the pathogenesis of inflammatory responses, neoplasia, fluid and hemodynamic derangements.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the Psychology and Neuroscience website.

Course Descriptions

PATH 3000 Introduction to Pathology
CREDIT HOURS: 3
This course provides a general introduction into the science concerned with the basis of disease. The primary focus of the course is to highlight the basic concepts that underlie disease processes. These concepts are illustrated through a range of topics including: immunopathology, neoplasia, genetic disorder, neuropathology, hematopathology and cardiovascular pathologies.
CALENDAR NOTES:
PREREQUISITES: BIOL 1011.03 or equivalent, BIOL 2020.03 or equivalent
RESTRICTIONS: Restricted to students in the Bachelor of Science in Medical Sciences Program
FORMATS: Lecture

PATH 4100 Critical Thinking in Neuropathology
CREDIT HOURS: 3
This course focuses on breakthroughs in understanding human brain function. You will learn about the inspirations and acidents that lead to seminal discoveries. You wil be ale to understand the context of these breakthroughs. You will learn to ask better questions about the process of basic and applied research.
PREREQUISITES: NESC 2470 or PHYL 2041
FORMATS: Seminar

Pharmacology

Location: Sir Charles Tupper Medical Building
5850 College Street

Email: pharmacology@dal.ca

Introduction
Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

Degree Programs
Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide courses that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology and Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the course instructor, take certain graduate specialty courses which are offered in the Department of Pharmacology.

Course Descriptions

PHAC 1470 Pharmacology for Pharmacy
CREDIT HOURS: 6
This class will provide an introduction to pharmacology, emphasizing basic mechanisms of drug action and principles of drug-receptor interactions, pharmacokinetics, and drug metabolism.
PREREQUISITES: BIOC 1040.06, MICR 1050.03, PHYL 1400.06
FORMATS: Lecture | Tutorial

PHAC 3000 Experiential Learning in Pharmacology
CREDIT HOURS: 3
This one semester course in intended to introduce students to outside-the-classroom learning experiences. Students will work closely with a supervisor to learn laboratory skills and expand their knowledge in Pharmacology. Course structure will vary, depending on the nature of the experience.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration
COREQUISITES: Phac 3001
RESTRICTIONS: Requires permission of coordinator and supervisor
FORMATS: Experiential Learning
LAB HOURS PER WEEK: 8

PHAC 3001 Pharmacology I
CREDIT HOURS: 3
This course introduces students to pharmacology, the study of the interaction of drugs and toxins with the human body. Topics include drug receptors,metabolic transformation and distribution of drugs. Lectures explore the action of clinical agents used to treat cardiovascular diseases, neurological diseases, pain, and cancer. Experts in the various fields of pharmacology present the different topics.
PREREQUISITES: BIOL 2020 or instructor's consent. A course in Biochemistry or Physiology is recommend.
RESTRICTIONS: Restricted to third year and above
FORMATS: Lecture

PHAC 4000 Directed Research Project in Pharmacology
CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.
PREREQUISITES: PHAC 3001
RESTRICTIONS: Requires permission of coordinator and supervisor
EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.
FORMATS: Other (explain in comments)
LAB HOURS PER WEEK: 8

PHAC 4001 Pharmacology II
CREDIT HOURS: 3
This course is designed to follow Pharmacology I, with further learning on the interaction of drugs and toxins with the human body. Topics include cell signaling, pain, hormones, special population pharmacology, chemical carcinogenesis, immunopharmacology, drugs of abuse, epilepsy and multiple sclerosis. Experts in various fields of pharmacology present the different topics.

PREREQUISITES: PHAC 3001 or instructor's consent
RESTRICTIONS: Restricted to third year or above
EXCLUSIONS: PHAC 5409
FORMATS: Lecture

PHAC 4100 Directed Research Project in Pharmacology
CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.
PREREQUISITES: PHAC 3001
RESTRICTIONS: Requires permission of coordinator and supervisor
EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.
FORMATS: Other (explain in comments)
LAB HOURS PER WEEK: 8

Physiology and Biophysics

Location: Sir Charles Tupper Medical Building
5850 College Street

Introduction
The Department of Physiology and Biophysics offers a wide range of undergraduate courses in addition to those restricted to students in the faculties of Medicine, Dentistry and Health Professions. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The courses listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education course PHYL 1000X/Y.06 is open to all students. PHYL 2041.03 and/or PHYL 2044.03 is/are the recommended prerequisite for science students interested in taking higher level physiology courses. Students wishing to enrol in other specialized courses require permission from the Course Director.

Course Descriptions

PHYL 1000 Human Physiology
CREDIT HOURS: 6
This online distance course in Human Physiology is equivalent to the lecture-based course PHYL 1010X/Y.06. This introductory course explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Learning activities include textbook readings, recorded lectures for more complex topics, computer-simulated labs, quizzes and collaborative review sessions. The course is normally given during the Regular session (Sept-Apr), and in the Summer session (May-June, PHYL 1000). DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course cannot be used as a prerequisite for 3rd or 4th year Physiology courses, nor as a co-requisite for PHYL 2570.03 Cellular Neurophysiology.
EXCLUSIONS: PHYL 1010X/Y.06
FORMATS: Tutorial

PHYL 1001 Human Physiology 1
CREDIT HOURS: 3
This online distance course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: This course is normally given during the Fall Semester, and in the Summer session (May) and meets the prerequisite requirement for PHYL 1002.03 (Human Physiology 2) and PHYL 1012.03. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1011.03 or PHYL 1000X/Y.06, PHYL 1010X/Y.06
FORMATS: Lecture

PHYL 1002 Human Physiology 2
CREDIT HOURS: 3
This course is a continuation of PHYL 1001.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: This course is normally given during the Winter Semester, and in the Summer session (June). This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1012.03, PHYL 1000X/Y.06, PHYL 1010X/Y.06
FORMATS: Lecture

PHYL 1010 Human Physiology
CREDIT HOURS: 6
This lecture-based course in Human Physiology is equivalent to the online distance course PHYL1000X/Y.06. This introductory course explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Learning activities include lectures, recorded lectures for more complex topics, computer-simulated labs, quizzes, in-class interactive responses using own devices, and weekly learning objective review sessions (optional). DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1000X/Y.06
FORMATS: Lecture | Lab

PHYL 1011 Human Physiology 1
CREDIT HOURS: 3
This course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: This course is given in the Fall semester and meets the prerequisite requirement for PHYL 1012.03 (Human Physiology 2) and the online distance course PHYL 1002.03. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1001.03, PHYL 1000X/Y.06, pHYL 1010X/Y.06
FORMATS: Lecture | Lab

PHYL 1012 Human Physiology 2
CREDIT HOURS: 3
This course is a continuation of PHYL 1011.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTORS: C. Penney and M.-S. Beaudoin
CALENDAR NOTES: This course is given in the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1002.03, PHYL 1000X/Y.06, PHYL 1010X/Y.06
FORMATS: Lecture | Lab

PHYL 1400 Human Physiology
CREDIT HOURS: 6
This course is designed to give Pharmacy students a broad understanding of normal human physiology using pathophysiologic scenarios. Selected topics in physiology will be presented in tutorials as case studies and in lectures. The central themes include: respiratory, endocrine/reproductive, gastrointestinal, neuromuscular, nervous system, renal and cardiovascular. Students will be provided with means for self-evaluation throughout the unit. Evaluation will be based on tutorial performance as well as mid- and end-of-unit examinations. This course is only for Pharmacy students.DIRECTOR: E. Cowley
PREREQUISITES: ANAT 1040.03
FORMATS: Lecture | Tutorial

PHYL 2041 Human Neurophysiology
CREDIT HOURS: 3
The aim of this class is to understand the functional mechanisms of the human nervous system and its clinical significance. The course covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. It reviews the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It also surveys the physiology and functional anatomy of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also covers important investigative techniques in neuroscience. The overall objective is to provide a solid, factual foundation of knowledge in neurophysiology as well as its underlying principles.
CALENDAR NOTES: PHYL 2041, a core neurophysiology class for students in the Medical Sciences program, serves as equivalent to NESC 2470.03 as prerequisite for upper level NESC courses. Medical Sciences students intending to take NESC 2470.03 in place of PHYL 2041 are advised to also enroll in NESC 2570 as a Selective. Directors: A.S. French and P.H. Torkkeli
PREREQUISITES: (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or 1021.03) and (CHEM 1012.03 or CHEM 1022.03), or equivalent
EXCLUSIONS: NESC 2470.03, PHYL 2031.03, PHYL 2030.03
FORMATS: Lecture

PHYL 2044 Human Systems Physiology
CREDIT HOURS: 3
The human body consists of cells organized into a number of organ systems. The aim of this class is to explain how six organ systems (respiratory, cardiovascular, renal, gastrointestinal, endocrine and reproductive) function to allow us to live and carry out our daily activities. Although emphasis is on normal function, there is also discussion of selected pathologies. Director: T.A. Quinn
PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012.03 OR CHEM 1022.03 or equivalent
EXCLUSIONS: PHYL 2030.06, PHYL 2032.03
FORMATS: Lecture | Tutorial

PHYL 2570 Cellular Neurophysiology
CREDIT HOURS: 3
This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience; detailed coverage of

the strictly developmental systems or molecular levels of neuroscience is provided in other courses.DIRECTOR(S): S. Adamo
PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 or SCIE 1505.18 or SCIE 1515.36, SCIE 1520.30, 1540.27 or (BIOL 1010 or BIOL 1020.03 AND BIOL 1011.03 or BIOL 1021.03 with a grade of B- or better)
CROSSLISTED: NESC 2570.03, PSYO 2570.03
FORMATS: Lecture

PHYL 3120 Exercise Physiology in Health and Disease
CREDIT HOURS: 3
The function and dysfunction of body organ systems are reviewed, and the short- and long-term responses of these systems to physical exercise are analyzed. Factors affecting physical performance are considered, and the preventive and therapeutic use of exercise for a wide range of clinical conditions is examined. DIRECTOR: M.-S. Beaudoin.
PREREQUISITES: PHYL 2032.03 or PHYL 2044.03 or permission of the class director
FORMATS: Lecture | Tutorial

PHYL 3320 Human Cell Physiology
CREDIT HOURS: 3
Events at the cellular and molecular level underlie the functions of tissues, organs and systems. This course examines key physiological principles at the molecular level, and uses the understanding developed to describe important cell and tissue functions, as well as dysfunctions in human disease states. Lectures focus on membrane transport, electrical excitability and electrical signaling, epithelial transport, signaling within individual cells, intracellular organelle function, and ion channels. DIRECTOR: P. Linsdell
PREREQUISITES: PHYL 2044.03
FORMATS: Lecture

PHYL 3420 Sensory Physiology
CREDIT HOURS: 3
This course will describe the physiological and biophysical basis of human sensory systems including vision, audition, vestibular, olfaction, gustation, and somatosensory (skin and proprioception). Emphasis will be on the transduction of physical stimuli and the early neural processing that occurs in sensory cells and immediately associated tissues.DIRECTOR: S. Barnes and guest lecturers. Next offered in 2018/2020.
PREREQUISITES: NESC 2470.03 or PHYL 2570.03/NESC 2570.03 or PHYL 2041.03 or equivalents
FORMATS: Lecture | Discussion

PHYL 3520 Core Concepts in Medical Physiology
CREDIT HOURS: 3
Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process. Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions. DIRECTOR: Y. Anini
PREREQUISITES: PHYL 2044.03 or permission of course director
EXCLUSIONS: PHYL 4504.03
FORMATS: Lecture | Tutorial

PHYL 3600 Directed Project in Physiology
CREDIT HOURS: 3
The goal of this course is to provide advanced undergraduate students with the opportunity to conduct a research project under the supervision of a faculty member in the department of Physiology & Biophysics. Projects may cover a variety of experimental approaches and topics including, but not limited to, cardiovascular physiology, neurophysiology, respiratory physiology, endocrinology and neuroendocrinology, and molecular physiology.
PREREQUISITES: PHYL 2041.03 and PHYL 2044.03
FORMATS: Lab
LAB HOURS PER WEEK: 7

PHYL 3620 Human Physiology Lab
CREDIT HOURS: 3
This course offers fundamental concepts of human physiology including neural, muscular, cardiovascular, respiratory, renal, gastrointestinal, endocrine and sensory systems. Students will learn to carry out experimental procedures such as measurement and analysis of ECG, EEG, blood pressure, pulmonary function, senses and reflexes, integrating practical knowledge with theoretical background and clinical significance.
DIRECTOR: M.-S. Beaudoin
PREREQUISITES: PHYL 2044.03 or permission of course director
EXCLUSIONS: PHYL 2031.03, PHYL2032.03, PHYL 2030.06 X/Y
FORMATS: Lab
LAB HOURS PER WEEK: 4

PHYL 4000 Current Advances in Synaptic Function and Plasticity
CREDIT HOURS: 3
Key recent research studies in cellular and systems neurophysiology are presented and discussed. Emphasis is placed on synaptic function and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications. DIRECTORS: S. Krueger and A. Fine
PREREQUISITES: NESC 2570.03/PHYL 2570.03 or PHYL 2041.03 or permission of course directors
CROSSLISTED: NESC 4185.03
FORMATS: Seminar

PHYL 4324 Endocrine Physiology
CREDIT HOURS: 3
This course is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized.DIRECTOR: Y. Anini
PREREQUISITES: PHYL 2044.03 or permission of the class director

PHYL 4504 Respiratory Physiology
CREDIT HOURS: 3
This class will provide a detailed overview of key concepts in respiratory physiology. Attention will be given to aspects of integrated physiology, as well as cellular and molecular concepts. Particular reference will be given to pulmonary diseases. Students will be expected to make presentations based on appropriate literature. Specific topics to be covered include: mechanics of breathing; gas exchange; gas transport; ventilation-perfusion ratios; pulmonary function testing; blood flow and metabolism; airway epithelial cells and transepithelial transport; mechanisms of airways host defence; control of ventilation; respiratory system under stress; cardiopulmonary response to aerobic exercise. Director: E.A. Cowley
PREREQUISITES: PHYL 2044.03
FORMATS: Lecture | Discussion

PHYL 4680 Cardiovascular Physiology
CREDIT HOURS: 3
This course provides an overview of key principles of cardiovascular physiology. Topics include cardiac anatomy/ultrastructure, cardiac pump-function, cardiac electrophysiology, excitation-contraction coupling, cardiac mechanics and regulation of the vasculature. Cardiac diseases will be addressed. Director: Staff
PREREQUISITES: One of PHYL 2044.03 or PHYL 3520.03 or permission of the course director
EXCLUSIONS: PHYL 4326
FORMATS: Lecture

Introduction
Dalhousie's Faculty of Science is the primary centre in the region for science education and research. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

We offer students the opportunity to pursue undergraduate degrees in 16 different Science programs, including disciplines in the life sciences, physical sciences, and mathematical or economic sciences. In addition, students may combine studies across science disciplines, or with subject areas from other faculties, including the Faculty of Arts & Social Sciences, the Faculty of Computer Science or the College of Sustainability. Other opportunities include the Co-op Education in Science option, where paid work terms are integrated into academic programs, opportunities to participate in research projects led by internationally renowned scientists, and the chance to work toward Certificates that recognize particular skill sets or training obtained as part of a science undergraduate education.

Details concerning particular programs of study are found in the departmental and program entries.

Departments and Programs of the Faculty of Science
The Faculty of Science offers 16 undergraduate programs:

- Actuarial Science
- Biochemistry and Molecular Biology * [c]
- Biology [c]
- Chemistry [c]
- Earth Sciences [c]
- Economics [c]
- Environmental Science [c]
- Marine Biology [c]
- Mathematics [c]
- Medical Sciences **
- Microbiology and Immunology *[c]
- Neuroscience
- Ocean Sciences
- Physics [c]
- Psychology
- Statistics [c]

* Departments belong to the Faculty of Medicine
** Offered in cooperation with the Faculty of Medicine
[c] Co-operative Education option available

Staff

Dean
Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Associate Dean (Academic)
Walde, S., PhD (Calgary), Professor (Biology)

Associate Dean (Research)
Kreplak, L., MSc (Supelec, France), PhD (Universite Paris-sud), Professor (Physics & Atmospheric Science)

Assistant Dean (Student Affairs)
Laws, P., BSc (Acadia), MSc (Dalhousie), BEd (MSVU), Senior Instructor (Chemistry)

Assistant Dean (Finance and Administration)
Jackson, D., BSc, MSc, PhD (Dalhousie), Telephone: (902) 494-2713 (on secondment)

Finance Coordinator
Hanna-Shea, D., Telephone: (902) 494-1443

Executive Assistant to the Dean
Belliveau, D., Telephone: (902) 494-3540

Administrative Secretary
White, J., Telephone: (902) 494-2373
Wood, D., Telephone: (902) 494-2765

Communications Officer
Comeau, N., Telephone: (902) 494-8443

Alumni & Donor Relations Officer
Adams, J., Telephone: (902) 483-7343

Certificates

Certificates are one way that the Faculty of Science recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student's academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any science program.

In Certificate programs, students enrol by applying to the Certificate Coordinator. Interested students are advised to enrol early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must notify the Coordinator of their intention to graduate, and provide evidence of completion of all Certificate requirements, prior to the end of the examination period of their final year. Some Certificate programs may require earlier notification; please check with your Coordinator.

Faculty of Science students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

The following Certificates are offered by the Faculty of Science. Students enrolled in one of the programs listed beside the Certificate are most likely to be able to meet the Certificate requirements within their programs. Specific Certificate requirements are described below.

- Certificate in Actuarial and Financial Mathematics (Mathematics, Statistics)
- Certificate in Animal Behaviour (Biology, Psychology and Neuroscience)
- Certificate in Applied and Computational Mathematics (Mathematics, Statistics)
- Certificate in Aquaculture and the Environment (Biology, Marine Biology)
- Certificate in Environmental Impact Assessment (Biology, Environmental Science)
- Certificate in Genetics (Biochemistry & Molecular Biology, Biology, Microbiology & Immunology)
- Certificate in Geographic Information Science (Biology, Earth Sciences, Environmental Science)
- Certificate in Information Technology (Earth Sciences, Physics)
- Certificate in Materials Science (Chemistry, Physics, Earth Sciences)
- Certificate in Medicinal Chemistry (Chemistry)
- Certificate in Neurotechnology Innovation (Psychology, Neuroscience)
- Certificate in Science Leadership and Communication(any 4-year Faculty of Science program)

Certificate in Actuarial and Financial Mathematics
Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modeling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

More information on this certificate is available at: https://www.dal.ca/faculty/science/programs/diploma-certificate-programs/actuarial-and-financial-mathematics1.html

Admission to Certificate

To enrol in the *Certificate in Actuarial and Financial Mathematics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 3340 and STAT 3360
4. Completion of either:

Financial Option: MATH 2120, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour
Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Andy Horn aghorn@dal.ca (Biology)

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

More information on this Certificate is available at: https://www.dal.ca/faculty/science/programs/diploma-certificate-programs/certificate-in-animal-behaviour.html

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (https://dalonline.da >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and have received approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of a B- is required in four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of B- in 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- BIOL 3062.03: Behavioural Ecology
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- MARI 3090.03: Marine Mammology
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning

- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3000.06/NESC 3000.06, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Applied and Computational Mathematics
Offered by: Mathematics & Statistics

Coordinator: Dr. R. Smirnov smirnov@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

More information on this certificate is available at: https://www.dal.ca/faculty/science/programs/diploma-certificate-programs/applied-and-computational-mathematics.html

Admission to Certificate

To enrol in the ***Certificate in Applied and Computational Mathematics***, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2112/CSCI 2112, MATH 2120
3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400
4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Aquaculture and the Environment
Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The *Certificate in Aquaculture and the Environment* consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

Additional information on this certificate is available at: https://www.dal.ca/faculty/science/programs/diploma-certificate-programs/aquaculture.html

Admission to Certificate

To enrol in the *Certificate in Aquaculture and the Environment*, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

To obtain the *Certificate in Aquaculture and the Environment*, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Health and growth of cultured aquatic organisms

- MARI 3603.03: Practical Aquaculture

C. Animal physiology

- MARI 3076.03: Physiology of Marine Animals Part II

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03: Experiential Learning
- * MARI 4806.03: Special Topics
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: Environment, Sustainability and Society Internship

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil **Requirement F** are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.

Certificate in Data Analytics
Offered by: Faculty of Science

Coordinator: Dr. Bruce Smith, Mathematics and Statistics bruce.smith@dal.ca

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will able to assess the performance of predictive models.

Admission to Certificate

To enrol in the *Certificate in Data Analytics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
    - BIOC 4010: Bioinformatics
    - BIOL 4062: Analysis of biological data
    - CHEM 4205: Chemometrics
    - CSCI 4146: The process of data science
    - ECON 4440: Time series analysis in economics
    - ENVS 3100: Environmental analytics
    - ERTH 4520: GIS applications
    - MARI 4600: Ecosystem modelling for aquaculture
    - OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
    - PHYC 3250: Computational methods in physics
    - PHYC 4250: Topics in numerical computing
    - STAT 4130: Bayesian data analysis
    - STAT 4350: Applied multivariate analysis
    - STAT 4550: Longitudinal data analysis
    - STAT 4620: Data analysis
    - STAT 4100: Survival analysis

Certificate in Environmental Impact Assessment
Offered by: Biology, Environmental Science, Marine Biology

Coordinator: Dr. Pat Lane patricia.lane@dal.ca

The **Certificate in Environmental Impact Assessment** is for students who are interested in, or majoring in environmental areas, and who wish to pursue additional training in EIA. This certificate is available to students in the Faculty of Science, Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia - based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes: mitigation, enhancement, compensation, and monitoring.
6. Construct a follow-up plan for residual impacts and project accountability.
7. Prepare a Strategic Environmental Assessment (SEA) y for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

- Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
- Introductory science, SUST, or IDS course (min 3 credit hours) from Table 1.
- Environmental courses with theoretical content from Table 2 (minimum 9 credit hours).
- Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours)
- Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours).

Students must obtain a minimum grade of B for all courses counted toward the certificate. Classes cannot be substituted from one table to another. Discontinued courses are no longer available for registration, but can satisfy certificate requirements if they are on your transcript.

Table 1. Introductory Courses (minimum of 3 credit hours from the following list)

- BIOL 2060.03: Introductory Ecology
- ENVS 1100.03: Foundations of Environmental Science
- ENVS 1200.03: Current Environmental Challenges
- ERTH 2410.03/ENVS 2410.03: Environmental Issues in Earth Science
- GEOG 2100X/Y.06/SOSA 2100X/Y.06: Environment and Culture
- INTD 2001.03/GEOG 2201.03: Introduction to Development 1
- INTD 2002.03/GEOG 2202.03: Introduction to Development 2
- OCEA 2000X/Y.06 (or OCEA 2001.03 + OCEA 2002.03): The Blue Planet
- SUST 2000.06: Local Governance, Citizen Engagement, and Sustainability
- SUST 2001.06: Environment, Sustainability and Governance: A Global Perspective

Table 2. Theory-Based courses (minimum of 9 credit hours from the following list)

- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3062.03: Behavioural Ecology
- BIOL 3063.03/MARI 3063.03: Resource Ecology
- BIOL 3065.03: Conservation Biology
- BIOL 3601.03: Nature Conservation
- ECON 3335.03: Environmental Economics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3601.03/ERTH 3601.03: Global Biogeochemical Cycles
- ERTH 3401.03: Hydrogeology
- ERTH 3701.03/ENVS 3701.03: Fundamentals of Hydrology
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- INTD 3114.03/GEOG 3114.03: Environment and Development
- MARI 3080.03/BIOL 3080.03: Ecology and Evolution of Fishes
- MARI 3090.03: Marine Mammalogy
- MARI 3602.03: Introduction to Aquaculture
- MARI 3761.03/BIOL 3761.03: Marine Ecology
- MGMT 3702.03: Resource and Environmental Problem Solving 2: Sustainable Industries
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3420.03/ERTH 3420.03: Geochemistry of the Aquatic Environment
- PLAN 3010.03: Urban Ecology
- SOSA 2261.03: Society, Politics and Culture
- SOSA 3060.03: Social Change and Development
- SOSA 3200.03: Environment and Society
- SUST 3000.03: Environmental Decision-Making

Table 3. Field and Methods-based Courses (minimum of 3 credit hours from the following list)

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Marine Life of Nova Scotia
- BIOL 3003.03/MARI 3003.03/OCEA 3003.03: Introduction to Field Oceanography
- BIOL 3221.03/MARI 3221.03: Diversity of Algae
- BIOL 3301.03/MARI 3301.03: Invertebrate Biology
- BIOL 3327.03: Entomology
- BIOL 3600.03/MARI 3600.03: Aquaculture (discontinued)
- BIOL 3615.03/ENVS 3615.03: Methods in Ecology

- BIOL 3620.03: Field Survey of Terrestrial Biodiversity
- BIOL 3622.03: Ornithology
- BIOL 3623.03/ENVS 3623.03/MARI 3623.03: Applied Coastal Ecology
- BIOL 3624.03/ENVS 3624.03: Urban Freshwater Systems
- BIOL 3626.03/MARI 3626.03: Field Studies of Marine Mammals
- BIOL 3627.03/MARI 3627.03: Biology and Conservation of Sharks, Skates, and Rays
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour
- BIOL 3632.03/ENVS 3632.03/MARI 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- BIOL 3634.03: Agroforestry
- BIOL 3640.03: Tropical Ecology and Biodiversity Field Class
- BIOL 3664.03/ENVS 3664.03/MARI 3664.03: Intertidal Ecology and Diversity
- BIOL 3680.03/MARI 3680.03: Scientific Diving Methods for Marine Ecology
- BIOL 3762.03: Terrestrial Ecology
- BIOL 3872.03: The Biologist's Toolkit
- BIOL 4061.03: Design of Biological Experiments
- BIOL 4062.03: Analysis of Biological Data
- BIOL 4080.03/MARI4080.03: Laboratory Studies of Fishes
- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- ENVS 2000.03: Urban Field School
- ENVS 2100.03: Environmental Informatics
- ENVS 3001.03: Environmental Science Field School
- ENVS 3225.03/BIOL 3225.03/PLAN 3225.03: Plants in the Human Landscape
- ENVS 3300.03: Contaminated Site Management
- ERTH 3402.03: Practical Hydrogeology (discontinued)
- ERTH 3500.03/ENVS 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4002.03: Advanced Field School
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Sciences
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- GEOG 2001.03/PLAN 2001.03: Landscape Analysis
- GEOG 2006.03/PLAN 2006.03: Space, Place and Geographic Information Systems
- INTD 3002.03: Development Practice
- INTD 3103.03: Participatory Development: Methods and Practice (discontinued)
- MARI 3603.03: Practical Aquaculture
- MARI 3685.03: The Gulf of Eilat Ecosystems: Coral Reef and Subtropical Sea
- MGMT 4507.03: Environmental Informatics
- OCEA 2020.03: Tools and Concepts in Ocean Science I
- OCEA 2021.03: Tools and Concepts ii
- OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4380.03: Marine Modelling
- SOSA 3096.03: Introduction to Demography
- SOSA 3403.03: Qualitative Field Methods
- SUST 3502.03/ENVS 3502.03: The Campus as a Living Laboratory **OR** MGMT 3701.03/SUST 3701.03: The Community as a Living Laboratory

Table 4. Higher-level Supplementary Courses (minimum of 6 credit hours from the following list)

- BIOL 4060.03/MARI 4060.03: Evolutionary Ecology of Marine Mammals (discontinued)
- BIOL 4065.03: Sustainability and Complexity
- BIOL 4160.03: Political Ecology
- BIOL 4500.03: The Evolution of Life Histories
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health
- ENVS 4002.03/BIOL 4002.03: The Science of Wetland Ecosystems
- ENVS 4003.03/MARI 4003.03: Coral Reefs and Environmental Change
- ENVS 4004.03: Pathways to Sustainable Energy
- ENVS 4100.03: Environmental Science Capstone
- ENVS 4210.03: Administration Environmental Law (discontinued)
- ENVS 4220.03: International Environmental Law for Scientists (discontinued)
- ERTH 4410.03: Environmental Geoscience
- ERTH 4440.03: Geomorphology and Landscape Evolution (discontinued)
- ERTH 4450.03/GEOG 4450.03: Introduction to Landscape Simulation (discontinued)
- INTD 4013.03: Environmental Conflict and Security
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- MARI 4350.03: Cutting Edge in Marine Science
- MARI 4665.03: Hacking the Blue Planet

- MGMT 4031.03: Economics for Resource and Environmental Management
- MGMT 4047.03: Biodiversity and Conservation Systems and Management
- MGMT 4205.03: Law and Policy for Resource & Environmental Management
- MGMT 4504.03: Management of Resources and the Environment
- MGMT 4505.03: Biophysical Dimensions of Resource and Environmental Management
- OCEA 4000 4000.03: Oceans and Global Change
- OCEA 4110.03/ERTH 4110.03: Geological Oceanography
- OCEA 4120.03: Physical Oceanography
- OCEA 4130.03: Chemical Oceanography
- OCEA 4140.03/BIOL 4661.03/MARI 4661.03: Biological Oceanography
- OCEA 4160.03/BIOL 4369.03/MARI 4369.03: Fisheries Oceanography
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4230.03/BIOL 4662.03/MARI 4662.03: Biology of Phytoplankton
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4330.03/BIOL 4666.03/MARI 4666.03: Benthic Ecology
- OCEA 4335.03/BIOL 4335.03/MARI 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- OCEA 4502.03: Introduction to Atmospheric Science
- OCEA 4595.03: Atmospheric Chemistry
- SUST 4000.06: ESS Capstone

Certificate in Genetics
Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:
Dr. Melanie Dobson melanie.dobson@dal.ca (Biochemistry & Molecular Biology)
Debra Grantham grantham@dal.ca (Biology)
Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology, Neuroscience)
Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

More information on this certificate is available at: https://www.dal.ca/faculty/science/programs/diploma-certificate-programs/genetics-certificate.html

Admission to Certificate

Students should enrol in the Certificate in Genetics in their third year of studies, when they are seeking approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the *Certificate in Genetics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, ***and*** have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate requirements:

1. A minimum grade of a B- in four mandatory courses:

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3036.03: Transgenic Organisms
- BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
- MICI 3114.03: Virology

- MICI 3119.03: Physiology of the Prokaryotic Cell
- NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics
- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics
- NESC 4670.03: Behavorial Neuro(epi)genetics and Genomics

3. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in three credit hours or more of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Department's Certificate Coordinator prior to the start of the research course.

- BIOC 4001.03
- BIOC 4604.03
- BIOC 4605.03
- BIOL 4806.03/MARI 4806.03
- BIOL 4807.03/MARI 4807.03
- BIOL 4900.06/MARI 4900.06
- BIOL 4901.03/MARI 4901.03
- BIOL 4902.03/MARI 4902.03
- MICI 4700X/Y.06
- MICI 4701.03
- MICI 4702.03
- MICI 4900X/Y.06
- MICI 4901.03
- MICI 4902.03
- NESC 4500X/Y.06/PSYO 4500X/Y.06
- SCIE 4101.03 and SCIE 4102.03 (or SCIE 4100X/Y.06)
- SCIE 4901.03 and SCIE 4902.03 (or SCIE 4900X/Y.06)

Certificate in Geographic Information Science (GIS)
Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:
Dr. C.S Greene csgreene@dal.ca (Earth Sciences)
Dr. C. Staicer cindy.staicer@dal.ca (Biology)
Dr. D. Rainham daniel.rainham@dal.ca (Environmental Sciences)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, ***and*** have received approval for the research component (project) from the Certificate Coordinator prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENVS 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Science

2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health

3. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

Set 1

- BIOL 4900.06/MARI 4900.06 or BIOL 4901.03/MARI 4902.03: Honours Thesis
- ENVS 4901.03/ENVS 4902.03: Honours Thesis
- ERTH 4100.06: Research Project
- ERTH 4200.06: Honours Thesis
- SUST 4800.03: Independent Study
- SUST 4900.06: Honours Thesis

Set 2

- SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Research Project Guidelines for the Certificate in Geographic Information Science
Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Information Technology
Offered by: Physics

Coordinator: Dr. Ian Folkins ifolkins@dal.ca

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the ***Certificate in Information Technology***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Materials Science
Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

- CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science
- CHEM 4302.03: Intro to Surface Science
- CHEM 4502.03: Polymer Science
- CHEM 4311.03: Fundamental and Applied Electrochemistry
- ERTH 2001.03: Earth Materials Science I
- ERTH 2002.03: Earth Materials Science II
- PHYC 3900.03: Introduction to Soft Condensed Matter Physics
- PHYC 4230.03: Introduction to Condensed Matter
- BIOE 4391.03: Polymeric Biomaterials
- BMNG 5110.03: Biocompatibility and Biomaterials Design
- MATL 3500.03: Materials Engineering
- MATL 3510.03: Extraction of Materials
- MATL 3601.03: Structure of Materials
- MATL 3611.03: Corrosion and Degradation of Materials
- MATL 3612.03: Thermodynamics of Materials
- MATL 3620.03: Introduction to Physical Metallurgy
- MATL 3621.03: Mechanical Behaviour of Materials
- MATL 4703.03: Non-Metallic Materials
- MATL 4722.03: Ferrous Alloys and Joining of Materials
- MATL 4805.03: Electrochemical Processing of Materials
- MATL 4806.03: Particulates in Materials Engineering
- MATL 4815.03: Kinetics of Materials Processing
- MATL 4823.03: Non-ferrous Alloys
- MATL 4824.03: Industrial Metallurgy
- MATL 4825.03: Solidification and Casting

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- ERTH 4201.03 and ERTH 4202.03 (or ERTH 4200.06)
- ERTH 4101.03 and ERTH 4102.03 (or ERTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medicinal Chemistry
Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the ***Certificate in Medicinal Chemistry***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300.03, BIOC 2610.03, BIOC 3700.03, BIOC 4701.03

Certificate in Neurotechnology Innovation
Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
- Neurotechnology
- Clinical and cognitive neuroscience
- Computer science
- Entrepreneurship
- Innovation and product design
- Intellectual property

For more information on this certificate seehttp://www.dal.ca/faculty/science/programs/diploma-certificate-programs/neurotechnology-certificate.html

See also the RADIANT program website (www.dal.ca/radiant).

Eligibility The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission To enrol in the ***Certificate in Neurotechnology Innovation***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. NESC 4705.03: Neurotechnology Innovation, Commercialization, and Entrepreneurship

2. NESC 2470.03: Systems Neuroscience

3. CSCI 1105.03: Introduction to Programming or CSCI 1110.03: Introduction to Computer Science or CSCI 2202.03: Computer Modelling for Scientists or CSCI 2003.03: Data Science for Everyone or PHYC 2050.03: Computer Simulations in Science.

4. Nine (9) credit hours selected from the lists below, with at least three credit hours (one course) from each category.

A. Neuroscience/Neurotechnology

- PHYC 2250.03: Physics of Biological and Medical Technology
- NESC 3137.03/PSYO 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3227.03/PSYO 3227.03: Principles of Human Neuropsychology
- NESC 3237.03/PSYO 3237.03: Drugs and Behaviour
- NESC 4070.03: Chemical Neuroanatomy
- NESC 4177.03: Theoretical Neuroscience
- NESC 4185.03: Current Advances in Synaptic Function and Plasticity
- PHAC 3001.03: Introduction to Pharmacology I

B. Computer Science/Informatics

- CSCI 1107.03: Social Computing
- CSCI 1108.03: Experimental Robotics
- CSCI 1110.03: Introduction to Computer Science (if not used to satisfy Requirement 3 above)
- CSCI 1120.03: Introduction to Computer Systems
- CSCI 2110.03: Data Structures and Algorithms
- CSCI 2132.03: Software Development
- CSCI 2141.03: Intro to Database Systems
- CSCI 2202.03: Computer Modelling for Scientists (if not used for Requirement 3 above)
- CSCI 2003.03: Data Science for Everyone (if not used for Requirement 3 above)

C. Entrepreneurship/Innovation

- ECON 2211.03: Economics of Innovation
- MGMT 2902.03: Innovation: An Introduction to Design Thinking
- MGMT 3902.03: Starting Lean
- MGMT 3907.03: New Venture Creation Entrepreneurship
- MGMT 4901.03: Managing the Venturing Process
- CSCI 4190.03: Innovation

Notes on the Computer Science course options:

- CSCI 1105.03 and 1110.03 are mutually-exclusive options for an introductory computer science class. You should take CSCI 1105 if you have no prior computer programming/coding experience, or CSCI 1110 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which class to register for, should consult with an advisor in the Computer Science program.
- CSCI 2202.03 Computer Modelling for Scientists and CSCI 2003.03 Data Science for Everyone have no prerequisites, and does not assume prior programming experience. If you choose to take CSCI 2202.03 first, you should not take CSCI 1105.03 after, as the content will be redundant. However, taking both CSCI 2202.03 and CSCI 1110.03 in either order is acceptable.

Certificate in Science Leadership and Communication
Offered by: Faculty of Science

Coordinators:
Dr. Anne Marie Ryan amryan@dal.ca (Earth Sciences)

The focus of the Certificate in Science Leadership and Communication is to develop leadership and communication skills specifically in and through the sciences, and to enable Dalhousie Science graduates to better understand the nature of science, the process of change, and to have the skills to communicate and to lead others effectively. The Certificate is available to any student in the Faculty of Science.

Admission to Certificate

Students should enrol in the *Certificate in Science Leadership and Communication* when they are seeking approval from the Certificate Coordinator for information regarding the Portfolio of Learning required for completion of this Certificate. To enrol, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinators by e-mail. To qualify for the Certificate, students must complete all course requirements, and the Portfolio of Learning.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements

Students are required to complete the following six components:

1. Leadership: Core course

- SCIE 4444.03/BIOL 4444.03: Leadership in Science

2. Communicating Science

One of the following two courses with a practicum component

- SCIE 3111.03: Communicating Science
- PSYO 3010.06: Advanced General Psychology

3. Ethics in Science

One of the following courses in ethics

- PHIL 2680.03: Ethics in Science (credit is not given for PHIL 2680 and 1050)
- PHIL 1050.03: Ethics in Science

4. Understanding the nature of science

One of the following courses

- HSTC 2400.03: Science and the Media
- HSTC 2000.06: Introduction to the History of Science
- HSTC 2204.03: The Darwinian Revolution
- HSTC 2205.03: Totalitarianism and Science
- HSTC 2206.03: Biopolitics: Human Nature in Contemporary Thought
- HSTC 3201.03: Science and Religion: Contemporary Perspectives
- HSTC 3212.03: The Biosphere: Global Perspectives in Science and Philosophy
- HSTC 3411.03: Feminism and Science
- HSTC 4301.03: History of Neuroscience
- HSTC 1801.03: Technology and Engineering: From Industrial Age to Cybernetic Age
- HSTC 4000.06: Science and Nature in the Modern Period
- BIOL 3580.03/PHIL 3580.03: Philosophy of Biology
- PHIL 2660.03: Understanding Scientific Reasoning
- PHIL 2480.03: Environmental Ethics
- ECON 3360.03: Ethics, Justice and Economics

Other courses may be considered. Please consult a coordinator.

5. Discipline-specific courses: situating your discipline

One of the following courses:

- BIOL 2040.03: Evolution
- ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
- ENVS 3501.03: Environmental Problem-solving I
- ERTH 3001.03: Field school
- BIOL 4664.03/MARI 4664.03*: History of Marine Sciences
- NESC 2007.03: Neuroscience Principles and Methods
- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 3581.03: History of Psychology I
- PSYO 3582.03: History of Psychology II
- BIOC 4510.03: Medical Biotechnology I
- MICI 2400.03 Laboratory Methods in Microbiology and Immunology
- OCEA 2020.03 Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

6. Portfolio of leadership development (SCIE 4445.00): only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation.

The portfolio is a record that can be shared with future employers, and built upon into the future. It will document, at a minimum:

- The activities undertaken in each of the above 5 components of the certificate
- Reflections on how each component fits into leadership and communication development in their discipline of study
- Reflection on the practicum components
- Record of any additional leadership aspects of employment or science-related volunteer activities

Further information is available at http://www.dal.ca/faculty/science/programs/diploma---certificate-programs/scienceleadership.html.

Co-operative Education in Science

The Co-op Program allows students to alternate three, career-focused work terms with study terms and receive a co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate.

Co-op is available to students in many of our BSc (120 credit hour) Honours or Major programs. Interested students normally apply to join Co-op at the end of their first year of study.

Further details are available from departmental Co-op Academic Advisors and from S.I.T.E..

Actuarial Science

Location: Chase Building
6316 Coburg Road
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-2572

Fax: (902) 494-5130

Email: info@mathstat.dal.ca

Introduction
Actuarial Science is the quantitative study of risk, particularly financial risk, and the methods for managing it. It is traditionally associated with insurance and pension plans, but can be applied to a wide range of other areas where there is need for assessment of risk. An Actuarial Science degree provides students with the background for a career in Actuarial Science. Course offerings provide the knowledge and techniques needed by students to prepare to write most of the Society of Actuaries preliminary examinations. Students will learn the relevant mathematical and statistical techniques, with specific applications to Actuarial Science, and acquire a basic understanding of Economics and Business.

The Dalhousie Actuarial Science program is offered through the Department of Mathematics and Statistics.

Degree Programs
The Department of *Mathematics and Statistics* offers the following degree programs in *Actuarial Science*

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in A*ctuarial Science*
- A post-baccalaureate diploma

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the **Academic Regulations** and the **College of Arts and Science Degree Requirements** sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Actuarial Science undergraduate academic advisor.

BSc (120 credit hour) Concentrated Honours in Actuarial Science

Students who obtain an Honours degree will have covered the subject material required for sitting most of the Society of Actuaries examinations. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Actuarial Science with a grade of C or better and a minimum GPA of 3.0. Honours students are required to write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of *STAT 4950.03/ACSC 4950.03*.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Actuarial science should consult with the Actuarial Science Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the *Academic Regulations*and College of Arts and Science Degree Requirements sections of this calendar, students in a BSc **Concentrated Honours program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03 : Matrix Theory and Linear Algebra I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference[2]
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest
- An additional 3 credit hours of ACSC or STAT or MATH courses at or above the 2000 level, other than the courses listed below.

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- An additional 3 credit hours of ACSC, STAT or MATH courses at or above the 3000 level, other than the courses listed below. (MATH 3900.03 Financial Mathematics recommended, with prerequisite MATH 2120.03).

4000 level

- STAT 4390.03: Time Series Analysis
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II
- ACSC 4950.03/STAT 4950.03: Honours Research Project

[1]The requirement to take STAT 1060.03 may be waived for students entering the program in their second year.

[2]Some students may take STAT 2080.03 in the first year of their degree program.

BSc or BA (120 credit hour) Combined Honours in Actuarial Science and another subject
Students who wish to study *Actuarial Science* in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For *Actuarial Science*, this requirement is satisfied through ACSC 4950.03/STAT 4950.03.

Departmental requirements

Students in a BSc **Combined Honours program in Actuarial Science** and another subject must fulfill the requirements outlined in the *Academic Regulations*and *College of Arts and Science Degree Requirements* sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level with a grade of C or better in each are the following:

- MATH 2001.03: Intermediate Calculus
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- MATH 2600/STAT 2600.03: Theory of Interest
- STAT 3340.03: Regression and Analysis of Variance

- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- STAT 4390.03: Time Series Analysis
- ACSC 4703.03/STAT 4703.03; Actuarial Models II
- ACSC 4720.03/STAT 4720.0: Life Contingencies II

If *Actuarial Science* is the **primary subject**, students will also complete

- ACSC 4950.03/STAT 4950.03: Honours Research Project

OR

- An honours thesis in another subject and an additional 3 credit hours of ACSC, STAT or MATH courses at or above the 2000 level

BSc (120 credit hour) Major in Actuarial Science

The 120 credit hour major is suited to students who want to focus on *Actuarial Science* and prepare for sitting the Society of Actuaries examinations, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the *Academic Regulations*and College of Arts and Science Degree Requirements sections of the calendar, students in a BSc **Major program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03: Matrix Theory and Linear Algebra I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference[2]
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03/MATH 2600.03: Theory of Interest

3000 level

- STAT 3340.03: Regression Analysis
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

4000 level

- STAT 4390.03: Time Series Analysis
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

[1]The requirement to take STAT 1060.03 may be waived for students entering the program in their second year.

[2]Some students may take STAT 2080.03 in the first year of their degree program.

BSc or BA (120 credit hour) Double Major in Actuarial Science and another subject
The Double Major degree program allows students to combine a study of *Actuarial Science* with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

Students in a BSc or BA **Double Major in Actuarial Science** and another subject must fulfill the requirements outlined in the *Academic Regulations* and *College of Arts and Science Degree Requirements* sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level are the following:

- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- STAT 4390.03: Time Series Analysis
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

Minor in Actuarial Science
(for students in 120 credit hour programs other than Actuarial science)

Students in other 120 credit hour degree programs may choose to include a Minor in *Actuarial science* in their program. Students taking a Minor in *Actuarial science* may also consider to take the Certificate in Actuarial and Financial Mathematics.

Departmental Requirements

A minimum of 18 credit hours in *Actuarial Science* courses at the 2000 level or higher. It is possible to count Mathematics or Statistics courses towards these requirements, so long as they are not counted towards a candidate's Major or Honours subject.

A minor degree in Actuarial Science must include the following courses:

- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3360.03/MATH 3360.03: Probability

Plus at least two of

- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

The remaining credit hours can be chosen from any ACSC, STAT or MATH courses at or above the 2000 level.

Diploma in Actuarial Science

(30 credit hours)

Students with a general 90 credit hour BSc degree in Mathematics, Statistics, Economics, or another quantitative discipline, may apply for admission into a Diploma in Actuarial Science program, provided they have completed the appropriate Mathematics and Statistics courses. A strong background in Mathematics and Statistics is necessary, and courses taken should cover multidimensional calculus (equivalent to MATH 2001: Intermediate Calculus I), matrix theory (equivalent to MATH 2030: Matrix Theory and Linear Algebra I) and basic probability theory (equivalent to STAT 2060: Introduction to Probability and Statistics).

Departmental requirements

- STAT 2080.03: Statistical Methods for Data Analysis and Inference

- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II
- STAT 4390.03: Times Series Analysis

In cases that students have already taken some of the above courses prior to entering the program, in consultation with the Actuarial Science undergraduate academic advisor, students can choose other same level ACSC, STAT or MATH courses as substitute courses to fulfil the total credit hour requirement.

After completion of the diploma program, students will be prepared to write most of the Society of Actuarial examinations.

Minors and Certificates for Actuarial Science Students

Minors available to students in Actuarial Science

Minor programs allow students to develop subject specialities in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs. Students in a BSc or BA (120 credit hour) program in ***Actuarial Science*** may choose to include a Minor selected from the list of approved *Minors* in this Calendar. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program. Minor subjects in Economics or Commerce are highly recommended subjects for Actuarial Science major students.

Certificates

In combination with a BSc or BA in Actuarial Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the **Certificate Coordinator** to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found in *the Faculty of Science* section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Actuarial science include:

- Certificate in Applied and Computational Mathematics
- Certificate in Data Science

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ACSC 3703 Actuarial Models I
CREDIT HOURS: 3
This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributiolns, deductibles and limits, and aggregate loss models, with application to insurance.
PREREQUISITES: STAT 3360.03 OR MATH 3360.03 or permission of instructor
CROSSLISTED: STAT 3703.03
EXCLUSIONS: STAT 4701.03

ACSC 3720 Life Contingencies I
CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.
PREREQUISITES: STAT 3360.03/MATH 3360.03 and STAT 2600.03/MATH 2600.03
CROSSLISTED: STAT 3720.03

ACSC 3750 Credibility Theory
CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small ver relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.
COREQUISITES: STAT 3703.03/ACSC 3703.03
PREREQUISITES: STAT 3360.03 or MATH 3360.03
CROSSLISTED: STAT 3750.03

ACSC 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity.
PREREQUISITES: STAT 3703.03 or ACSC 3703.03
CROSSLISTED: STAT 4703.03

ACSC 4720 Life Contingencies II
CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, and profit testing.
PREREQUISITES: STAT 3720.03 or ACSC 3720.03
CROSSLISTED: STAT 4720.03
FORMATS: Lecture

ACSC 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the actuarial science honours degree, this course consists of a research project under the supervision of a faculty member in the department. The project will be submitted as a written report. Students wishing to enroll in this class must obtain permission from the Actuarial Science honours advisor.

Biochemistry and Molecular Biology

Location: Sir Charles Tupper Medical Building
5850 College Street
9th Floor
P.O. Box 15000
Halifax, NS B3H 4R2

Telephone: (902) 494-6436

Fax: (902) 494-1355

Website: www.biochem.dal.ca

Introduction
Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of courses that will provide students with an up-to-date view of modern biochemistry and molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in related sciences can include courses in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry and Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology and Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the courses offered by the Department of Biochemistry and Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in course. This process culminates in fourth year, with a supervised research project required for Honours Biochemistry and Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the University Regulations in the Calendar and the Department Policy on Plagiarism.

Degree Programs
The Department offers the following degree programs in Biochemistry and Molecular Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Biochemistry and Molecular Biology
- Minor in Biochemistry and Molecular Biology

* BSc Co-op option available (see below)
* May be combined with Minors from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right and in the Undergraduate Handbook, available on the departmental website biochem.dal.ca/programs/undergraduate/. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Biochemistry and Molecular Biology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Biochemistry and Molecular Biology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18

Professors
Archibald, J. M., BSc, PhD (Dalhousie)
Bearne, S. L., BSc (Acadia), PhD (Toronto), MD CM (McGill), cross appointment in Chemistry
Blouin, C., BSc, (Laval), PhD (Dalhousie), joint appointment with Computer Science
Dellaire, G., BSc (UBC), PhD (McGill), major appointment in Pathology
Dobson, M. J., BSc (Dalhousie), DPhil (Oxon)
Doolittle, W. F., AB (Harv), PhD (Stan), Post-Retirement
Duncan, R., BSc (Guelph), MSc (Queen's), PhD (Guelph), major appointment in Microbiology and Immunology
Gray, M. W., BSc, PhD (Alta), Post-Retirement
Karten, B., MSc (Hamburg), PhD (Karl-Franzens, Austria)
Liu, P. X. -Q., BSc (Wuhan), PhD (Cornell)
Marignani, P., BSc (Windsor), MSc (Western), PhD (McMaster), EMBA (Western), cross appointment in Pathology
McLeod, R., BSc, PhD (UBC)
McMaster, C. R., BSc, PhD (Man), major appointment in Pharmacology
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto), cross appointment in Chemistry
Ridgway, N. D., BSc, MSc (Dalhousie), PhD (UBC), joint appointment with Pediatrics
Ro, H-S., BSc, PhD (McMaster)
Roger, A. J., BSc (UBC), PhD (Dalhousie)
Rosen, K. V., BSc, MSc, PhD (Moscow), joint appointment with Pediatrics
Singer, R. A., AB (Princeton), PhD (Harv)
Too, C. K. L., BSc, MSc (Malaya), PhD (Hawaii)
Waisman, D. M., BSc (Brandon), PhD (Manitoba), joint appointment in Pathology

Associate Professor
Pulinilkunnil, T., MSc (India), PhD (UBC)
Slamovits, C., BSc, PhD (Buenos Aires, Argentina)

Assistant Professors
Kienesberger, P., MSc, PhD (Graz, Austria)
Langelaan, D., BSc (Acadia), PhD (Dalhousie)
Van der Spoel, A. C., MSc (Erasmus, The Netherlands), PhD (Utrecht, The Netherlands), major appointment in Pediatrics

Senior Instructor
Briggs, P., BSc (Acadia), BEd (Dalhousie), MEd (MSVU)

Instructor
Ewart, K. V., BSc (Moncton), PhD (Memorial)

Adjunct
Cohen, A., PhD (Memorial)
Kane, D. A., PhD (East Carolina)

BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology

Students who want a challenging program that results in a broad and in-depth background in Biochemistry and Molecular Biology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Biochemistry and Molecular Biology subject courses, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of BIOC 4604.03/BIOC 4605.03. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required courses includes both subjects. Additional chemistry courses beyond those required for the honours degree may be taken as electives.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biochemistry and Molecular Biology. See Co-operative Education Program.

Admission to Honours

Students who wish to enrol in a Biochemistry and Molecular Biology Honours program should apply for admission after their second year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor
- Minimum grades of B- in BIOL 1010, BIOL 1011, CHEM 1011 and CHEM 1012 (or equivalents)

Departmental Requirements

In addition to fulfilling the requirements outlined in Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Biochemistry and Molecular Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II OR BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03 Concepts in Chemistry/CHEM 1012.03: Concepts in Chemistry: Structure and Reactivity (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry AND BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediate Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- CHEM 3601.03: Chemistry of Living Systems or one course in Biochemistry at or above the 3000 level
- BIOC 3700.03: Biomolecular Chemistry

4000 level

- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (Honours Thesis)
- Nine credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- Six additional credit hours of BIOC at the 4000 level

Other requirements:
A pass is required in the Honours Qualifying examination. Students should ensure that they enrol in any 2000 or 3000 level courses that are prerequisites for advanced courses they intend to take (see calendar entries).

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject

Students who wish to study Biochemistry and Molecular Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biochemistry and Molecular Biology, this requirement is satisfied through BIOC 4604.03/BIOC 4605.03: Research Project.

A Co-op option is available for students enrolled in BSc Combined Honours with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program below.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Combined Honours program in Biochemistry and Molecular Biology and another subject must complete the following:

Biochemistry and Molecular Biology as the primary or secondary subject

1000 level

- 1000 level as for Concentrated Honours, except MATH 1000: Differential and Integral Calculus I AND MATH 1010: Differential and Integral Calculus II required if Chemistry is the other subject

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level if Biochemistry & Molecular Biology is the second subject

4000 level

- Six credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (if Honours thesis and qualifying exam are in Biochemistry)

Consult an Undergraduate advisor for recommended courses of study.

BSc (120 credit hour) Major in Biochemistry and Molecular Biology

The 120 credit hour Major is suited to students who want to focus on Biochemistry and Molecular Biology, but wish to have a program that is somewhat less constrained than the Honours program. Biochemistry and Molecular Biology Majors complete a minimum of 45 credit hours in program courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes. Although Dalhousie

University does not require formal application for its 120 credit hour Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an undergraduate advisor from the Department of Biochemistry and Molecular Biology.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biochemistry and Molecular Biology. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Biochemistry and Molecular Biology must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium (minimum grade "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Nine additional credit hours in BIOC at or above the 3000 level

4000 level

- Six credit hours in BIOC at the 4000 level

BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject

The Double Major degree program allows students to combine a study of Biochemistry and Molecular Biology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program seek advice from advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Double Major program in Biochemistry and Molecular Biology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II OR BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry, BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level

4000 level

- Six credit hours of BIOC at the 4000 level

The same set of core courses is required in a Double Major with Biochemistry and Molecular Biology as the primary or secondary subject.

BSc (90 credit hour) Minor in Biochemistry and Molecular Biology

The 90 credit hour degree with Minor in Biochemistry and Molecular Biology is appropriate for students who want to study some Biochemistry and Molecular Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biochemistry and Molecular Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

See the **Minor in Biochemistry and Molecular Biology**section of this Calendar.

Minor in Biochemistry and Molecular Biology
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03: Cell Biology, BIOL 2030.03: Genetics and Molecular Biology, CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Contact Biochemistry and Molecular Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Biochemistry and Molecular Biology

Co-op Academic Advisor: Dr. H-S. Ro, Email: Hyo-Sung.Ro@dal.ca

Cooperative Education (Co-op) is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biochemistry and Molecular Biology, or in Combined Honours or Double Major programs with Biochemistry and Molecular Biology as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Biochemistry and Molecular Biology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biochemistry and Molecular Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/bcmb/what_will_I_learn/coop_work_terms.html.

Minors available to students in Biochemistry and Molecular Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour programs (including Co-op).

Students in a BSc (120 credit hour) program in Biochemistry and Molecular Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Biochemistry and Molecular Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at Faculty of Science - Certificates. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Major or Honours program in Biochemistry and Molecular Biology include:

- Certificate in Data Analytics
- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Notes

The Department also teaches students in Dentistry and Medicine; these courses are described in the appropriate sections of the Calendar.

Other Courses

The following courses given by other departments may be taken as a Biochemistry and Molecular Biology course toward BSc Biochemistry and Molecular Biology degrees. See course descriptions in relevant section of this calendar.

Chemistry - CHEM 3601.03, CHEM 4601.03

Microbiology - MICI 4033.03

Pharmacology - PHAC 3001.03, PHAC 4001.03

Note: CHEM 3601.03 and PHAC 3001.03 are considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4001.03 to be BIOC 4000-level courses when taken as part of Biochemistry and Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), cannot be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry and Molecular Biology.

Course Descriptions

BIOC 1040 Biological Chemistry and Metabolism for Students of Pharmacy
CREDIT HOURS: 6
The structures, significance, and metabolism of the main biologically important compounds are outlined in lectures, with some topics of particular interest studied further in the laboratory. Tutorials aim to develop students' ability to learn biochemistry on their own and in small groups.
COREQUISITES: CHEM 2442.03
RESTRICTIONS: This class is restricted to students in the BSc (Pharm) program.
FORMATS: Lecture | Lab | Tutorial
LAB HOURS PER WEEK: 3

BIOC 1420 Introductory Biochemistry for Nursing Students
CREDIT HOURS: 3
Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.
CALENDAR NOTES: This course cannot be used as a prerequisite for any other biochemistry course and is not normally accepted by Faculties of Dentistry or Medicine in fulfilment of the requirement of a biochemistry course for admission.
RESTRICTIONS: This class is restricted to students in the BScN and BHSc programs.
FORMATS: Lecture

BIOC 2300 Introduction to Biochemistry
CREDIT HOURS: 3
This course surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special aspects of biochemistry of microbes and plants is included. COORDINATOR: D. Langelaan
CALENDAR NOTES: Students are advised to also take CHEM 2401.03 and CHEM 2402.03
PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.
EXCLUSIONS: BIOC 2200.03
FORMATS: Lecture

BIOC 2610 Introductory Biochemistry Lab
CREDIT HOURS: 3
An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This course is intended for students in Biochemistry & Molecular Biology and Microbiology & Immunology Programs.
COREQUISITES: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent
PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.
EXCLUSIONS: BIOC 2200.03
FORMATS: Lab
LAB HOURS PER WEEK: 3

BIOC 3300 Intermediary Metabolism
CREDIT HOURS: 3
This course covers synthesis and catabolism of carbohydrates, lipids and some nitrogen compounds. Metabolic regulation is emphasized, including factors influencing the rate at which compounds flow through selected pathways. Compartmentalization of, inter-relationships between and environmental impact on metabolic pathways are considered. Laboratory exercises examine the techniques used to study metabolic pathways. COORDINATOR: C. Too
PREREQUISITES: BIOC 2300.03 and BIOC 2610.03 (both with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor’s consent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOC 3400 Nucleic Acid Biochemistry and Molecular Biology
CREDIT HOURS: 3
This course focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information. COORDINATOR: J. Archibald
PREREQUISITES: CHEM 2401.03 and CHEM 2402.03, BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); BIOC 2300.03; or instructor’s consent
FORMATS: Lecture | Lab
LAB HOURS PER WEEK: 3

BIOC 3610 Laboratory Research Techniques in Biomedical Sciences
CREDIT HOURS: 3
An introduction to key laboratory methods in biochemistry is presented, along with relevant theory and applications. Topics include liquid handling, protein chemistry, small molecule assays, data analysis and data management. Current context and emerging methodologies are introduced by guest speakers.
CALENDAR NOTES: This course does not count as a Biochemistry & Molecular Biology credit towards any degree with a Major or Honours in Biochemistry & Molecular Biology, but it can be counted towards a Minor In Biochemistry & Molecular Biology. Priority for enrollment will be given to students registered in the B.Med.Sci. degree program.
PREREQUISITES: CHEM 2401.03 and CHEM 2402.03; BIOC 2300.03; BIOL 2020.03 and BIOL 2030.03; all with grades of B- or higher, or instructor's permission.
FORMATS: Lecture | Lab

BIOC 3620 Experiential Learning in Biochemistry and Molecular Biology
CREDIT HOURS: 3
This course is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills. COORDINATOR: M. Dobson
CALENDAR NOTES: To register in this course, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the supervisor. Grading is Pass/Fail.
PREREQUISITES: BIOC 2300, BIOC 2610, BIOL 2020, BIOL 2030 (all with a grade of B- or higher), CHEM 2401 and CHEM 2402.
