AGRI5710 Graduate Module Course

Topics in Animal Welfare

MODULE OUTLINE

Instructor:	Dr. Miriam Gordon
Office:	Haley Institute 100-14
E-mail:	miriam.gordon@dal.ca
Phone:	902 893 8055
Schedule:	January – February 2015

Module Description

This module will consist of discussions of recent research, directed studies, and the development and execution of two undergraduate labs in Animal Welfare. This module is intended for animal science graduate students particularly interested in developing teaching and assessment strategies on the topic of animal welfare. Each student will be required to review and critically evaluate the most recent scientific literature related to their topic in order to prepare and plan two undergraduate lab activities and assignments for undergraduate students; a 15-page review paper on the same topic area is also required and due at the end of the module.

Prerequisites:

ANSC 3005 or equivalent

Module Format

Discussion & meetings: 3 meetings at 1 hr each
Delivery of undergraduate labs: 2 labs at 3 hrs each

Evaluation

Participation (30%)
Review Paper (30%)
Lab Development & Execution (40%)
