Schedule:	Winter Semester 2016

---

**Module Description**

This module will consist of discussions of recent research and directed studies to coincide with the design and delivery of an undergraduate lesson with corresponding lab activities in Animal Welfare. This module is intended for animal science graduate students particularly interested in developing teaching and assessment strategies in the context of an animal welfare course. Each student will be required to review and critically evaluate the most recent scientific literature related to their topic in order to prepare and plan an undergraduate lecture and corresponding lab activities and assignment for undergraduate students taking an Animal Welfare course; a 15-page review paper on the same topic area is also required and due at the end of the module.

**Prerequisites:**

ANSC 3005 or equivalent

**Module Format**

Discussion & meetings: as needed  
Delivery of lectures: 1 class at 1.5 hr each  
Delivery of undergraduate lab: 1 lab at 2-3 hrs

**Evaluation**

Review Paper (30%)  
Development & delivery of lecture (35%)  
Development & execution of lab (35%)
