Faculty of Science Course Syllabus (Section A)
Department of Chemistry
Chemistry 3305 / Physics 3303
Materials Science
Fall 2021

Dalhousie University is located in Mi’kma’ki, the ancestral and unceded territory of the Mi’kmaq. We are all Treaty people.

Note: The only difference between Chemistry 3305 and Physics 3303 is that Chemistry 3305 has a lab (20 hours per term) and Physics 3303 has a term paper.

Instructors:
Lectures: Dr. Mark Obrovac email: Mark.Obrovac@dal.ca office: Chemistry 315
Lab: Dr. Gianna Aleman email: Gianna.Aleman@dal.ca office: Chemistry 1051

Lectures: MWF 1135-1225 LSC-COMMON AREA C332
Laboratories (CHEM3305 only): T 1305-1655 CHEMISTRY PODIUM 115
Tutorials: Regular office hours to be scheduled during first class.
Course delivery: In person

Course Description
This course emphasizes the principles involved in understanding physical properties of materials, such as thermal and mechanical stability, and electrical and optical properties. All phases of matter are examined: gases, liquids, films, liquid crystals, perfect crystals, defective solids, glasses. Important processes such as photography and Xerography are explained.

Course Prerequisites
CHEM 3305
CHEM 1012.03, and (CHEM 2301.03 and CHEM 2304.03) or PHYC 3200.03 (can be a corequisite) or (ERTH 2001.03 and ERTH 2002.03)

PHYC 3303
CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and ERTH 2002.03)

Course Exclusion
CHEM 3305: PHYC 3303.03, CHEM 3303.03
PHYC 3303: CHEM 3305.03
Learning Objectives

The objective of this course is to provide students with a solid introduction to materials science. Students will gain knowledge in materials at their bulk, and, where applicable, particle, subparticle and atomic level and will learn how each relates to overall physical properties: including optical, thermal, electronic, magnetic, and mechanical properties. Using this knowledge, students will learn how materials scientists, design, make, analyse, and describe new materials for various applications.

Course Materials

Required textbooks:

Online resources and answers to all problems at:
http://bcs.wiley.com/he-bcs/Books?action=index&itemId=1119942942&bcsId=8612

Physical Properties of Materials by Mary Anne White.
Online resources and answers to all problems at:
http://www.physicalpropertiesofmaterials.com

Lecture slides, homework and other materials will be provided on the course Brightspace website.

All pre-lab modules and instructions pertaining to the lab will be provided on the lab Brightspace site.

Course Assessment

</tbody>
</table>

Other course requirements

Chemistry 3305: You must pass the lab (>50%) to pass the course.
Physics 3303: You must pass the term paper (>50%) to pass the course.

For both Chemistry 3305 and Physics 3303: A minimum grade of 50% on the written test/final exam component is required in order to pass the course. This policy will apply to both Chemistry 3305 and Physics 3303, so you must have a passing grade (>50%) on the term test / final exam (i.e., weighting the term test 25 marks and the final exam 40 marks) to pass the course.

Chemistry 3305: Students must pass the online Safety Module by the deadline. Details are provided in the lab Brightspace website.
Chemistry 3305: If you are repeating the course and had a passing (>50%) lab grade the previous time you took the course, you can apply to Dr. Aleman to receive a lab exemption only if you took the course in the immediately previous academic year. Whether or not you receive an exemption is Dr. Aleman's decision.

There is no supplemental examination in this course.

Conversion of numerical grades to Final Letter Grades follows the Dalhousie Common Grade Scale

<table>
<thead>
<tr>

Course Policies on Missed or Late Academic Requirements

All assignments must be handed in on time. Answers are posted immediately after assignments are due, therefore late work will not be accepted and will receive zero marks. There are no supplemental or make-up assignments, examinations or quizzes in this class. If you are too ill to write a quiz or examination or complete an assignment in this class, please provide a Student Declaration of Absence form, as per the regulations in the University Calendar. A student who is well enough to write a test will not be allowed a re-write. However, if you are ill or experiencing an extreme personal emergency at the time of a test or an assignment, call me (lab phone: 902 494 4060 or call the main office and leave a message) or email me to inform me of the situation. In the case of an excused quiz or assignment, the others will be weighted more heavily. For an excused midterm examination, the marks for the relevant sections of the final exam will be used in place of the missed test mark. Worked solutions and marking schemes for assigned problems and for the term tests will be posted in a glassed-in bulletin board in the hallway of the third floor of the Chemistry Building. Solutions will not be made available electronically. Due to space limitations, each solution set may only be available for a limited time. It is the student's responsibility to check their work against the posted solutions as soon as work is returned to you.

It is each student's responsibility to read her/his Dalhousie email and the Brightspace website.

In the case of a weather-related closure of the University, notification will be provided on Dal Alert, the Dalhousie website and on local radio stations. If a class needs to be cancelled in another emergency, every attempt will be made to contact students via email and/or Brightspace.

No cell phone use (including no texting) in class, please.

Course Policies related to Academic Integrity

Independent work is expected on all homework assignments and term papers.

Course Content

Part I: Introduction to Materials Science
- atomic structure of materials
- x-ray diffraction
- defects in solids
- bonding in solids
- phase behaviour
Part II: Physical Properties of Materials (topics included as time permits)

- colour and other optical properties of materials
- thermal properties of materials
- electrical properties of materials
- magnetic properties of materials
- mechanical properties of materials
- physical adsorption of gases
- ion diffusion and intercalation in solids
- materials synthesis
- materials characterization methods
This course is governed by the academic rules and regulations set forth in the University Calendar and by Senate

Academic Integrity
At Dalhousie University, we are guided in all of our work by the values of academic integrity: honesty, trust, fairness, responsibility and respect (The Center for Academic Integrity, Duke University, 1999). As a student, you are required to demonstrate these values in all of the work you do. The University provides policies and procedures that every member of the university community is required to follow to ensure academic integrity.

Information: https://www.dal.ca/dept/university_secretariat/academic-integrity.html

Accessibility
The Advising and Access Services Centre is Dalhousie's centre of expertise for student accessibility and accommodation. The advising team works with students who request accommodation as a result of a disability, religious obligation, or any barrier related to any other characteristic protected under Human Rights legislation (Canada and Nova Scotia).

Information: https://www.dal.ca/campus_life/academic-support/accessibility.html

Student Code of Conduct
Everyone at Dalhousie is expected to treat others with dignity and respect. The Code of Student Conduct allows Dalhousie to take disciplinary action if students don’t follow this community expectation. When appropriate, violations of the code can be resolved in a reasonable and informal manner—perhaps through a restorative justice process. If an informal resolution can’t be reached, or would be inappropriate, procedures exist for formal dispute resolution.

Diversity and Inclusion – Culture of Respect
Every person at Dalhousie has a right to be respected and safe. We believe inclusiveness is fundamental to education. We stand for equality. Dalhousie is strengthened in our diversity. We are a respectful and inclusive community. We are committed to being a place where everyone feels welcome and supported, which is why our Strategic Direction prioritizes fostering a culture of diversity and inclusiveness

Statement: http://www.dal.ca/cultureofrespect.html

Recognition of Mi’kmaq Territory
Dalhousie University would like to acknowledge that the University is on Traditional Mi’kmaq Territory. The Elders in Residence program provides students with access to First Nations elders for guidance, counsel and support. Visit or e-mail the Indigenous Student Centre (1321 Edward St) (elders@dal.ca).
