Instructor(s): Mark Stradiotto mark.stradiotto@dal.ca Chemistry 217

Lectures: MWF 10:35-11:25 am LSC Common Area C206

Office Hours: MWF 10:00-10:20 am in Chemistry 217

Tutorials/Laboratories: NA

Course Description

Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.

Course Prerequisites
CHEM 3103.03 (grade of C- or better)

Course Objectives/Learning Outcomes
Students, upon completion of the course, should demonstrate working knowledge pertaining to:
- basic organometallic structure and bonding
- fundamental reaction classes involving organometallic complexes
- mechanistic organometallic chemistry and catalysis as per the material covered in the course

Course Materials
- Provided by the instructor
Course Assessment

Tests 20% each: Three term tests (in class) on 01 Feb 2017, 06 & 29 March 2017

Final exam 40% (Scheduled by Registrar)

Assignments Self-study problem sets can be found in the course material that will be provided throughout the term. It is strongly recommended that students work through these problems, and related material in the suggested texts, in order to assess their progress in learning the course material. However, none of these problem sets will be graded.

Conversion of numerical grades to Final Letter Grades follows the Dalhousie Common Grade Scale

Course Policies

Missed tests will be made up promptly at a date that is mutually agreeable to the student and the instructor. Effective September 1, 2014, the Department of Chemistry policy is that for all Chemistry courses beyond first year, a minimum grade of 50% on the written test/final exam component is required in order to pass the course.

Course Content

The impact of organometallic transition metal chemistry on the evolution of modern synthetic chemistry practices has been profound in recent years, as evidenced by the awarding of the Nobel Prize for Chemistry in 2001, 2005, and 2010 on this topic. This advanced class seeks to develop a fundamental understanding of such chemistry, as well as to highlight fundamental and applied aspects of organometallic reactivity. As such, this advanced class in organometallic chemistry will address a range of topics including structure and bonding models, reactivity and mechanism, and applications in synthetic chemistry. Students are responsible for all material covered in the lectures, including any handouts, as well as the assigned readings. While there is no formal textbook for the course, students are encouraged to consult advanced texts covering the topics of inquiry, as well as to address the self-study problems that will be provided. Students are encouraged to review in detail the material covered in the past inorganic chemistry courses. Assumed Background for this course includes ALL material covered in Chemistry 2101 and 3103, for example: polyhedral geometries and isomerism; basic molecular orbital theory; symmetry; and the basics of d-block coordination chemistry. Students should also have the main group and transition elements of the periodic table memorized (you will need it for exams, etc.).

Suggested Texts (especially for background reading):

ACCOMMODATION POLICY FOR STUDENTS

Students may request accommodation as a result of barriers related to disability, religious obligation, or any characteristic protected under Canadian Human Rights legislation. Student Accommodation Policy: [http://www.dal.ca/campus_life/student_services/academic-support/accessibility.html](http://www.dal.ca/campus_life/student_services/academic-support/accessibility.html)

Students who require accommodation for classroom participation or the writing of tests and exams should make their request to the Advising and Access Services Centre (AASC) prior to or at the outset of the regular academic year. More information and the Request for Accommodation form are available at [www.dal.ca/access](http://www.dal.ca/access).

ACADEMIC INTEGRITY

Academic integrity, with its embodied values, is seen as a foundation of Dalhousie University. It is the responsibility of all students to be familiar with behaviours and practices associated with academic integrity. Instructors are required to forward any suspected cases of plagiarism or other forms of academic cheating to the Academic Integrity Officer for their Faculty.

Policy on Intellectual Honesty and Faculty Discipline Process: [https://www.dal.ca/dept/university_secretariat/academic-integrity.html](https://www.dal.ca/dept/university_secretariat/academic-integrity.html)

STUDENT CODE OF CONDUCT

Dalhousie University has a student code of conduct, and it is expected that students will adhere to the code during their participation in lectures and other activities associated with this course. [http://www.dal.ca/dept/university_secretariat/policies/student-life/code-of-student-conduct.html](http://www.dal.ca/dept/university_secretariat/policies/student-life/code-of-student-conduct.html)

COPYRIGHT

All members of the Dalhousie community are expected to comply with their obligations under Canadian copyright law. Dalhousie copyright policies and guidelines, including our Fair Dealing Guidelines, are available at [http://www.dal.ca/dept/copyrightoffice.html](http://www.dal.ca/dept/copyrightoffice.html).

SERVICES AVAILABLE TO STUDENTS

The following campus services are available to all Dalhousie students. Unless noted otherwise, the services are free.
