

Faculty of Science Course Syllabus**Department of Chemistry**

Chemistry 3305 / Physics 3303

Materials Science

Fall 2018

Note: *The only difference between Chemistry 3305 and Physics 3303 is that Chemistry 3305 has a lab (20 hours per term) and Physics 3303 has a term paper.*

Instructor(s):

Lectures: Dr. Mark Obrovac email: Mark.Obrovac@dal.ca office: Chemistry 315
Lab: Dr. Gianna Aleman email: Gianna.Aleman@dal.ca office: Chemistry 1051

Lectures: MWF 1035-1125 Chemistry 223

Laboratories: T 1335-1725 Chemistry 115P

Tutorials: Regular office hours to be scheduled during first class.

Course Description

This course emphasizes the principles involved in understanding physical properties of materials, such as thermal and mechanical stability, and electrical and optical properties. All phases of matter are examined: gases, liquids, films, liquid crystals, perfect crystals, defective solids, glasses. Important processes such as photography and Xerography are explained.

Course PrerequisitesCHEM 3305

CHEM 1012.03, and (CHEM 2301.03 and CHEM 2304.03) or PHYC 3200.03 (can be a corequisite) or (ERTH 2001.03 and EARTH 2002.03)

EXCLUSIONS: PHYC 3303.03, CHEM 3303.03

PHYC 3303

CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and EARTH 2002.03)

EXCLUSIONS: CHEM 3305.03

Course Objectives/Learning Outcomes

The objective of this course is to provide students with a solid introduction to materials science. Students will gain knowledge in materials at their bulk, and, where applicable, particle, subparticle and atomic level and will learn how each relates to overall physical properties: including optical, thermal, electronic, magnetic, and mechanical properties. Using this knowledge, students will learn how materials scientists, design, make, analyse, and describe new materials for various applications.

Course Materials

Required textbooks:

Solid State Chemistry and its Applications, 2nd Ed./Student Edition by Anthony R. West.

Online resources and answers to all problems at:

<http://bcs.wiley.com/he-bcs/Books?action=index&itemId=1119942942&bcsId=8612>

Physical Properties of Materials by Mary Anne White.

Online resources and answers to all problems at:

<http://www.physicalpropertiesofmaterials.com>

Lecture slides, homework and other materials will be provided on the course Brightspace website.

Course Assessment

<i>Component</i>	<i>Weight (% of final grade)</i>	<i>Date</i>
Term Paper Topic Submission (PHYS 3303)	5% of term paper grade	10:35 am, Friday, Oct. 4
Midterm Examination	25%	10:35 am, Wednesday, Oct. 23
Final Examination	40%	(scheduled by the Registrar)
Homework Assignments	15%	assigned regularly
Lab (CHEM 3305)	20%	details to be provided during the first class
Term Paper (PHYS 3303)	20%	due Tuesday, December 3 rd , at 10:35 am

Other Course Requirements

Chemistry 3305: You must pass the lab (>50%) to pass the course.

Physics 3303: You must pass the term paper (>50%) to pass the course.

For both Chemistry 3305 and Physics 3303: A minimum grade of 50% on the written test/final exam component is required in order to pass the course. This policy will apply to both Chemistry 3305 and Physics 3303, so you must have a passing grade (>50%) on the term test / final exam (i.e., weighting the term test 25 marks and the final exam 40 marks) to pass the course.

Chemistry 3305: Students must pass the online Safety Module by the deadline. Details are provided in the lab Brightspace website.

Chemistry 3305: If you are repeating the course and had a passing (>50%) lab grade the previous time you took the course, you can apply to Dr. Aleman to receive a lab exemption only if you took the course in the immediately previous academic year. Whether or not you receive an exemption is Dr. Aleman's decision.

There is no supplemental examination in this course.

Conversion of numerical grades to Final Letter Grades follows the Dalhousie Common Grade Scale

A+ (90-100)	B+ (77-79)	C+ (65-69)	D	(50-54)
A (85-89)	B (73-76)	C (60-64)	F	(<50)
A- (80-84)	B- (70-72)	C- (55-59)		

Course Policies

All assignments must be handed in on time. Answers are posted immediately after assignments are due, therefore late work will not be accepted and will receive zero marks. There are no supplemental or make-up assignments, examinations or quizzes in this class. If you are too ill to write a quiz or examination or complete an assignment in this class, please provide a Student Declaration of Absence form, as per the regulations in the University Calendar. A student who is well enough to write a test will not be allowed a re-write. However, if you are ill or experiencing an extreme personal emergency at the time of a test or an assignment, call me (lab phone: 902 494 4060 or call the main office and leave a message) or email me to inform me of the situation. In the case of an excused quiz or assignment, the others will be weighted more heavily. For an excused midterm examination, the marks for the relevant sections of the final exam will be used in place of the missed test mark. Worked solutions and marking schemes for assigned problems and for the term tests will be posted in a glassed-in bulletin board in the hallway of the third floor of the Chemistry Building. Solutions will not be made available electronically. Due to space limitations, each solution set may only be available for a limited time. It is the student's responsibility to check their work against the posted solutions as soon as work is returned to you.

Independent work is expected on all homework assignments and term papers.

It is each student's responsibility to read her/his Dalhousie email and the Brightspace website.

In the case of a weather-related closure of the University, notification will be provided on Dal Alert, the Dalhousie website and on local radio stations. If a class needs to be cancelled in another emergency, every attempt will be made to contact students via email and/or Brightspace.

No cell phone use (including no texting) in class, please.

Course Content**Part I: Introduction to Materials Science**

- atomic structure of materials
- x-ray diffraction
- defects in solids
- bonding in solids
- phase behaviour

Part II: Physical Properties of Materials (topics included as time permits)

- colour and other optical properties of materials
- thermal properties of materials
- electrical properties of materials
- magnetic properties of materials
- mechanical properties of materials
- physical adsorption of gases
- ion diffusion and intercalation in solids
- materials synthesis
- materials characterization methods

Faculty of Science Course Syllabus (Section B)
CHEM 3305 / PHYC 3303

University Policies and Statements

This course is governed by the academic rules and regulations set forth in the University Calendar and by Senate

Academic Integrity

At Dalhousie University, we are guided in all of our work by the values of academic integrity: honesty, trust, fairness, responsibility and respect (The Center for Academic Integrity, Duke University, 1999). As a student, you are required to demonstrate these values in all of the work you do. The University provides policies and procedures that every member of the university community is required to follow to ensure academic integrity.

Information: https://www.dal.ca/dept/university_secretariat/academic-integrity.html

Accessibility

The Advising and Access Services Centre is Dalhousie's centre of expertise for student accessibility and accommodation. The advising team works with students who request accommodation as a result of a disability, religious obligation, or any barrier related to any other characteristic protected under Human Rights legislation (Canada and Nova Scotia).

Information: https://www.dal.ca/campus_life/academic-support/accessibility.html

Student Code of Conduct

Everyone at Dalhousie is expected to treat others with dignity and respect. The Code of Student Conduct allows Dalhousie to take disciplinary action if students don't follow this community expectation. When appropriate, violations of the code can be resolved in a reasonable and informal manner—perhaps through a restorative justice process. If an informal resolution can't be reached, or would be inappropriate, procedures exist for formal dispute resolution.

Code: https://www.dal.ca/dept/university_secretariat/policies/student-life/code-of-student-conduct.html

Diversity and Inclusion – Culture of Respect

Every person at Dalhousie has a right to be respected and safe. We believe inclusiveness is fundamental to education. We stand for equality. Dalhousie is strengthened in our diversity. We are a respectful and inclusive community. We are committed to being a place where everyone feels welcome and supported, which is why our Strategic Direction prioritizes fostering a culture of diversity and inclusiveness

Statement: <http://www.dal.ca/cultureofrespect.html>

Recognition of Mi'kmaq Territory

Dalhousie University would like to acknowledge that the University is on Traditional Mi'kmaq Territory. The Elders in Residence program provides students with access to First Nations elders for guidance, counsel and support. Visit or e-mail the Indigenous Student Centre (1321 Edward St) (elders@dal.ca).
