CONTINUING DENTAL EDUCATION

Dalhousie Dentistry Homecoming 2016
SCHEDULE OF EVENTS
Dalhousie Dentistry Homecoming 2016
SCHEDULE OF EVENTS

FRIDAY, OCTOBER 14, 2016
12:00 pm to 4:00 pm  Heart and stroke BLS for healthcare providers (C)
   Instructor: Darryl Chickness
4:30 pm to 5:30 pm  JD McLean Lecture
   Guest Speaker: Bobby Smith, 1986 Stanley Cup Champion
5:30 pm to 7:00 pm  Panel Discussion:
   Common legal/financial challenges faced by new dentists
   Presenter: CDSPI

SATURDAY, OCTOBER 15, 2016
8:30 am to 2:30 pm  SPONSOR TRADE FAIR DISPLAYS
9:00 am to 12:00 pm  CE Courses:
   Oral Pathology 101: A refresher course for dental professionals +
   Why is there glass in my toothpaste?
   Speakers: Dr. Daniel Boyd and Prof. Brenda MacIsaac
   Bases and liners: Their use in restorative dentistry
   Speaker: Dr. Sachin Seth
1:00 pm to 4:00 pm  Obturation with warm vertical condensation
   (lecture and hands-on session)
   Speaker: Dr. Isabel Mello with Dr. Michael Bishop & Dr. Wayne Maillet
   Managing airway emergencies in the dental office
   Speaker: Darryl Chickness
6:00 pm to 10:00 pm  Dentistry Alumni Dinner
   Atlantica Hotel Halifax, NS

HOW TO REGISTER
For more information, visit dal.ca/dentistry/cde or call 902-494-1674.

Register by our Early Bird deadline (September 15) for lower prices and a chance to win a
night's accommodation at the Atlantica Hotel Halifax! To register call 902-494-1674.

Final registration deadline: October 3. (Walk-in registrations may be accepted at CE courses
after October 3, if space is available)
FRIDAY, OCTOBER 14, 2016, 12:00 - 4:00 PM

Heart and stroke BLS for healthcare providers (C)

DARRYL CHICKNESS, CCP(F), FRONTLINE MEDICAL TRAINING & CONSULTING INC.

COURSE DESCRIPTION:
This course covers CPR, AED use, and choking for patients of all ages including adults, children and infants as well as the use of the bag valve mask.
It is designed for all providers working in the healthcare field.

Limited registration: 24 participants

FRIDAY, OCTOBER 14, 2016, 4:30 TO 5:30 PM

JD McLean Lecture

BOBBY SMITH

Named after a former dean of the Faculty of Dentistry, the JD McLean Lecture is a special Homecoming presentation for students, faculty, staff, alumni and friends. This year’s speaker is Bobby Smith, a 14-year veteran of the National Hockey League and current majority owner and president of the Halifax Mooseheads hockey club. Following his retirement as a player, Smith completed his post-secondary education and pursued a career in hockey – first in management and subsequently as an owner. His talk will focus on always thinking about what will come next in your career.

FRIDAY, OCTOBER 14, 2016, 5:30 TO 7:00 PM

Panel Discussion: Common legal/financial challenges faced by new dentists

PRESENTED BY CDSPI

“ARE YOU READY FOR WHAT’S NEXT?”
This forum will provide new dentists and students with access to a panel of experts in employment law, business and tax law, financial planning and risk management, who will discuss solutions to some of the challenges faced by new dentists in their early years of practice. Each panelist will present a 15-20 minute session on key things you need to know, followed by a Q&A period.

COURSE OBJECTIVES:

• Associate/employment contracts and the fundamentals of buying a practice.
• Effective tax strategies and incorporation.
• Effectively building and managing your wealth.
• Incorporating a risk management strategy to protect you personally and professionally.
• Resources and strategies to help you most ‘when life happens’.
SATURDAY, OCTOBER 15, 2016, 9:00 AM - 12:00 PM

Oral Pathology 101: A refresher course for dental professionals + Why is there glass in my toothpaste?

DR. DANIEL BOYD, BSc, PhD AND PROF. BRENDA MACISAAC, RDH, BSc, MEd

COURSE DESCRIPTION:
9:00 to 10:00 – Oral Pathology 101: a refresher course for dental professionals

This presentation will review common and not-so-common oral lesions and conditions. It will focus on the clinical presentation and recognition of specific oral lesions, as well as how to best document these findings. This course is perfect for oral health professionals who want a refresher in oral pathology and a review of the basics. Topics include: oral ulcers; red and white lesions; papillary lesions, including HPV; and lesions that have a vesicular appearance.

COURSE OBJECTIVES:
• Identify common oral lesions by their clinical appearance.
• Decide on the best management for these various lesions and conditions.
• Accurately describe and document lesions in a way that any oral health care provider can understand.

COURSE DESCRIPTION:
10:00 to 12:00 – Why is there glass in my toothpaste?

This course will examine the basis for the inclusion of glass, as an active ingredient, in the next generation of toothpaste products. In particular, the speaker will explain some of the basic concepts behind the use of bioactive glasses in dental applications, and in particular the potential benefits associated with the inclusion of bioactive glass materials in toothpastes.

COURSE OBJECTIVES:
• Discuss, illustrate, and inform dental hygienists on why glass particles are increasingly being used in toothpastes.
• Examine the basic aspects of bioactive glass materials, so as to inform hygienists on the mechanisms by which glasses in toothpaste may be beneficial to oral health.

The Faculty of Dentistry would like to thank and acknowledge the support of our Dentistry Homecoming 2016 sponsors.
SATURDAY, OCTOBER 15, 2016, 9:00 AM - 12:00 PM

Bases and liners: Their use in restorative dentistry

DR. SACHIN SETH, BSc, DDS, MEd

COURSE DESCRIPTION:
This course will review the various bases and liners traditionally used in dentistry, their use in clinical practice, and current scientific evidence. New and emerging materials will also be presented with discussion on their future application in restorative dentistry.

COURSE OBJECTIVES:
• To know when and why you should place a base/liner.
• To be aware of the different materials available.
• To choose the best materials in a given situation.

SATURDAY, OCTOBER 15, 2016, 1:00 PM - 4:00 PM

Obturation with warm vertical condensation (lecture and hands-on session)

DR. ISABEL MELLO, DDS, MSc, PhD, FRCDC WITH DR. MICHAEL BISHOP & DR. WAYNE MAILLET

COURSE DESCRIPTION:
This course is designed for clinicians who want to learn how to fill the root canal system with the warm vertical condensation technique. The lecture component will cover evidence-based concepts in obturation and the role they play in the treatment outcome.

In the hands-on session, course experts will teach you how to use the technique and make it work efficiently and predictably for you. Participants will get to experience the concepts and technique covered in the lecture by performing obturation in simulated canals and will have the opportunity to try different obturation devices for warm vertical condensation. The dynamics of working efficiently with a dental assistant during obturation will be demonstrated.

COURSE OBJECTIVES:
• Understand the principles of obturation and acknowledge its importance in the overall endodontic procedure and treatment outcome.
• Articulate basic differences between different obturation techniques.
• Learn about root canal obturating materials available and what constitutes an ideal root canal filling material.
• Get acquainted with armamentarium for warm vertical condensation technique.
• Perform step-by-step obturation procedure with the warm vertical condensation technique, using different obturation devices.
• Apply strategies to optimize four-handed endodontics.

Limited registration: 21 participants
Managing airway emergencies in the dental office

DARRYL CHICKNESS, CCP(F), FRONTLINE MEDICAL TRAINING AND CONSULTING INC.

COURSE DESCRIPTION:
Learn how to manage some common medical emergencies you could experience in your office or clinic. Topics will include, but are not limited to:

• Vasovagal/syncope episodes
• Hypo/hyperglycemia
• Allergic reactions
• Airway emergencies and complications
• Seizures

This education session will be followed by a hands-on skills session including proper bag valve mask ventilation, oral and nasal airways, use of glottic airways including laryngeal mask airway, laryngeal tube, and I Gel airway. Equipment will also be available for the endotracheal intubation. We will review proper techniques for managing an airway with each device with ample time for hands-on practice.

An IV therapy skills station will also be available for anyone wishing to practise IV initiation.

Limited registration: 40 participants

NOTE: Course instructor biographies are available on the CDE website: dal.ca/dentistry/cde

Dentistry Alumni Dinner

ATLANTICA HOTEL HALIFAX

Join us for the biannual Dentistry Alumni Dinner, where we will celebrate our milestone reunion groups and honour the recipients of the 2016 Outstanding Alumni Awards: Dr. Ian Doyle (DDS ’78), Dr. Andrew Nette (DDS ’76) & Ms. Darcie Robichaud (DipDH ’93)

Tickets are only available until October 3 – order today!
