R2CTM – the root to crown solution: The endodontic CE solution from diagnosis to restoration (lecture and hands-on)

MATTHEW MILLER, DMD, CERT. ENDO, FRCD(C)

Dr. Matthew Miller received his DMD degree from McGill University and completed a two-year multi-disciplinary residency program at the Jewish General Hospital before obtaining his specialty degree in endodontics at Nova Southeastern University in Fort Lauderdale, Florida. He is on staff at McGill University and the Jewish General Hospital as a clinical instructor and lecturer.

COURSE OUTLINE
Each step of endodontically treating and restoring a tooth is connected. This course walks through each step of root canal therapy - with each step building on the success of the previous phase. From diagnostic protocol to coronal restoration, participants will learn the techniques needed to take the patient out of pain, restore function to the tooth while maintaining the proper aesthetic, and enhance long-term success.

COURSE OBJECTIVES
At the end of this course, participants will know more about:

• Diagnosis and treatment planning – a complete understanding of the factors of each case
• Endodontic access – creating a proper access cavity is critical
• Antibacterial dressings – inter-appointment medicaments and temporizing teeth
• Shaping using the most advanced file technology – the choices for imparting an appropriate shape to the canal
• Irrigation – the importance of removing infection-causing bacteria
• Obturation – the pros and cons of sealers and obturation techniques
• Coronal restoration of the endodontically-treated tooth – choosing between direct vs. indirect restoration
