Small field of view cone beam computed tomography for dentistry: Applications and interpretation (lecture and hands-on)

CURTIS GREGOIRE, BSc, DDS, MD, MSc, FRCD(C)

Dr. Curtis Gregoire is an assistant professor at Dalhousie University, where he is actively involved in both undergraduate and graduate teaching in the Faculty of Dentistry. He completed his oral and maxillofacial surgery training at Dalhousie University in 2008 and a fellowship in head and neck oncology and pathology at Legacy Emanuel Hospital in Portland, OR in 2009. He is currently the program director for the Oral and Maxillofacial Surgery Residency Program at Dalhousie University and the division head of Oral and Maxillofacial Radiology.

COURSE OUTLINE
This three-day hands-on course offers both didactic and clinical hands-on instruction. The third day, March 27th, involves an introduction to a CBCT unit and a 3-hour examination. This certification course meets the PDBNS CBCT requirements. Participants will be required to read some course material in advance of the course, and, about one week prior to the course, it will be distributed electronically to them.

COURSE OBJECTIVES
At the end of this course, participants will know more about:

• Radiation biology and physics
• Radiographic anatomy
• Indications for the use of CBCT
• Radiographic approaches to different conditions
• Interpretation and case reporting
• Patient positioning
• Image prescription

LIMITED ENROLMENT: 24 participants
