COURSE OUTLINE
This course offers an introduction to implant dentistry. It includes the use of digital technology to plan and restore different cases.

COURSE OBJECTIVES
At the end of this course, participants will know more about:
• Treatment planning in implant dentistry
• Digital impression for single-implant restoration
• Screw-retained vs cement-retained implant restoration
• Splinted vs non-splinted implant restorations

PRESENTER
MOHAMED GEBRIL, BDS, MESc, MSc, Dip Prosth, FRCD(C)
Dr. Mohamed Gebril is a certified prosthodontist and a fellow of the Royal College of Dentists of Canada. Dr. Gebril is a full-time assistant professor in the Faculty of Dentistry at Dalhousie University. He has a keen interest in digital dentistry and its clinical application in prosthodontic rehabilitation.
