Live Webinar
Improving the outcome of implant-retained restorations, from planification to occlusal adjustments

Date: Saturday, April 17, 2021
Time: 9:00 AM to 12:00 PM AST
Location: GoToTrainer link will be emailed after you register
Audience: The Dental Professional
Format: Lecture
CE Credits: 3.0 lecture hours
To receive CE credits, participants are required to complete an online quiz and to achieve a score of 80%. Quiz link will be distributed at the end of the course.
Course Fees:
- DDS $149 CDN
- ADHP $139 CDN

Please register by 4:00 PM on Friday, April 16, 2021.

COURSE OUTLINE
This course will present on the restoration of single-tooth implants. Different topics, such as how to improve soft-tissue esthetics, the selection of the best type of abutments and restoration material, the selection of the best type of implant (manufacturer) for each specific case, and what to look for when adjusting occlusion, will be discussed in detail.

COURSE OBJECTIVES
At the end of this course, participants will be able to:
- Treatment plan single-unit implant restoration while optimizing the soft-tissue esthetic outcome
- Choose the best implant and components for every case
- Adjust occlusion for implant restorations

PRESENTER

PIERRE-LUC MICHAUD, DMD, MSc, Cert. Prosthо, FRCD(C)
Dr. Pierre-Luc Michaud received his prosthodontics degree from Université de Montréal in 2011. He is an associate professor and the division head of prosthodontics at Dalhousie Dentistry. Dr. Michaud teaches extensively in the Prosthodontics III & IV courses and instructs graduate periodontic residents in implant dentistry. He maintains a part-time private practice in the Dalhousie Intramural Faculty Practice, where he covers all aspects of prosthodontics.
