21st Century Endodontics: Instrumentation, Disinfection and Obturation
(A Lecture and Hands-On Course)

Presented by: Dr. Robert S. Roda, DDS, MS

Course Outline
As new technologies arrive at an ever-increasing rate, clinicians face challenges in delivering Endodontic treatment while trying to keep up with these changes. This full day presentation with a hands-on portion will present to the attendee information about new technologies designed to enhance the quality of endodontic care while simplifying its delivery.

Course Objectives
After attending this full day course, the attendee should:
• understand the importance of reciprocal instrument motion and it’s affect on cleaning and shaping
• know the rationale for creation and maintenance of canal asepsis and how to achieve this goal using newly available irrigants
• be familiar with several methods of achieving three-dimensional obturation of the root canal system

Limited Registration:
Full day (lecture and hands-on) is limited to 30 dentists.

About the Presenter
Dr. Robert Roda received his DDS in 1981 from Dalhousie University in Halifax and practiced as a general dentist in Dartmouth, NS for 10 years. He returned to school and completed his Certificate of Specialty in Endodontics and a Masters of Science at Baylor College of Dentistry in 1993. He is a Diplomate of the American Board of Endodontics, Associate Editor of the Journal of Endodontics, and the Current Vice President of the American Association of Endodontists.
