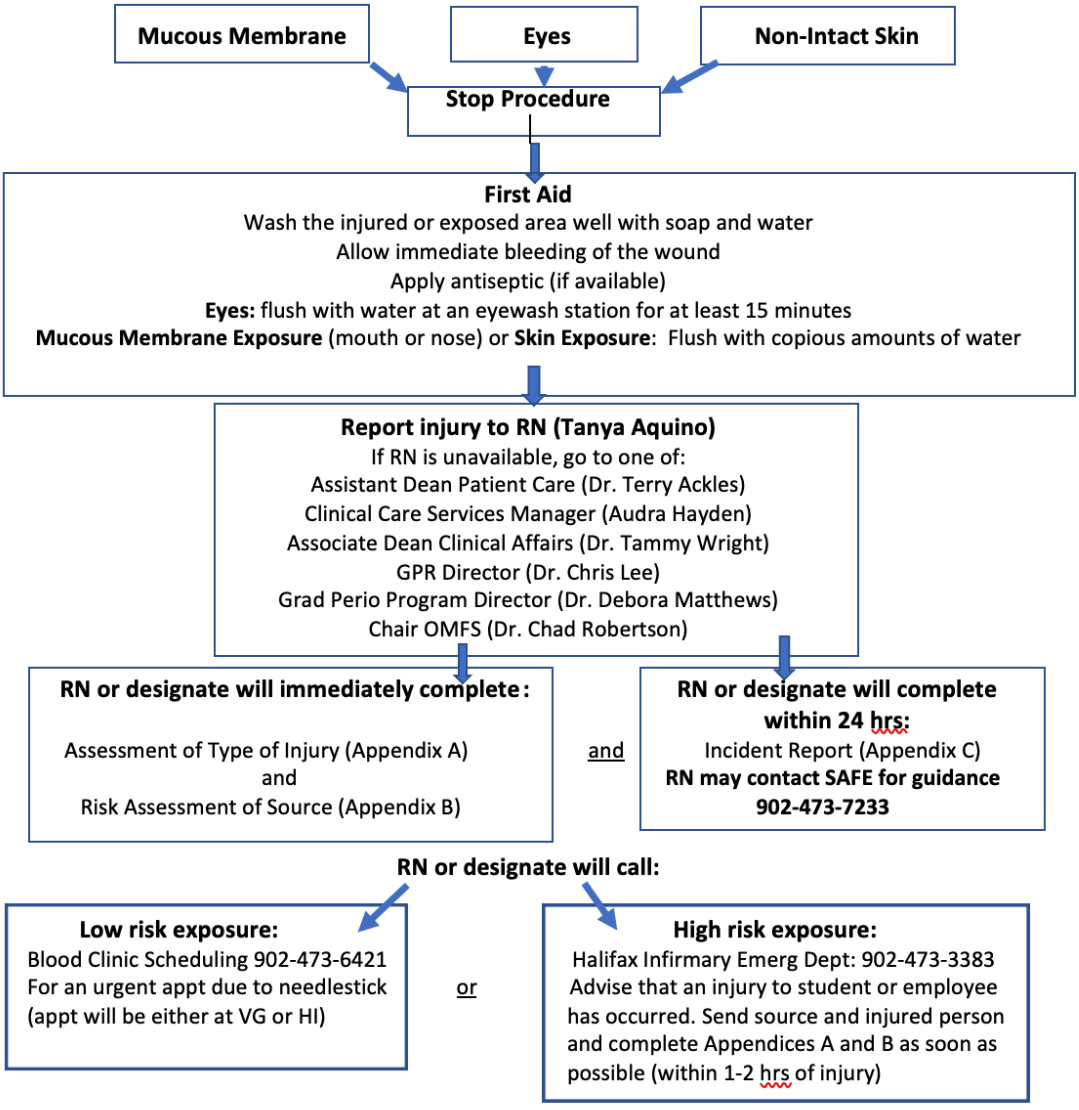
What to do when you have had an exposure to blood or body fluids by laceration, puncture wound, splatter or splash to the:



- If source pt has left the clinic, RN is to contact the patient, review Risk Assessment of source and request the pt has bloodwork completed. Blood requisition (Appendix D) to be faxed or emailed to the ER
- If the injury occurs at **off-site clinics**, the supervising Dentist or Dental Hygiene Instructor must undertake these actions. Call the RN if there are any questions or concerns.
