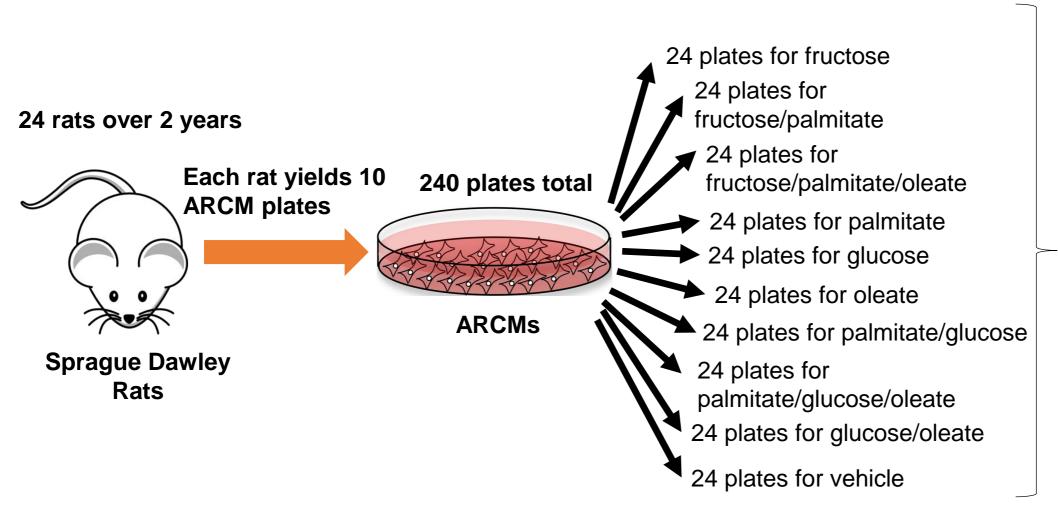

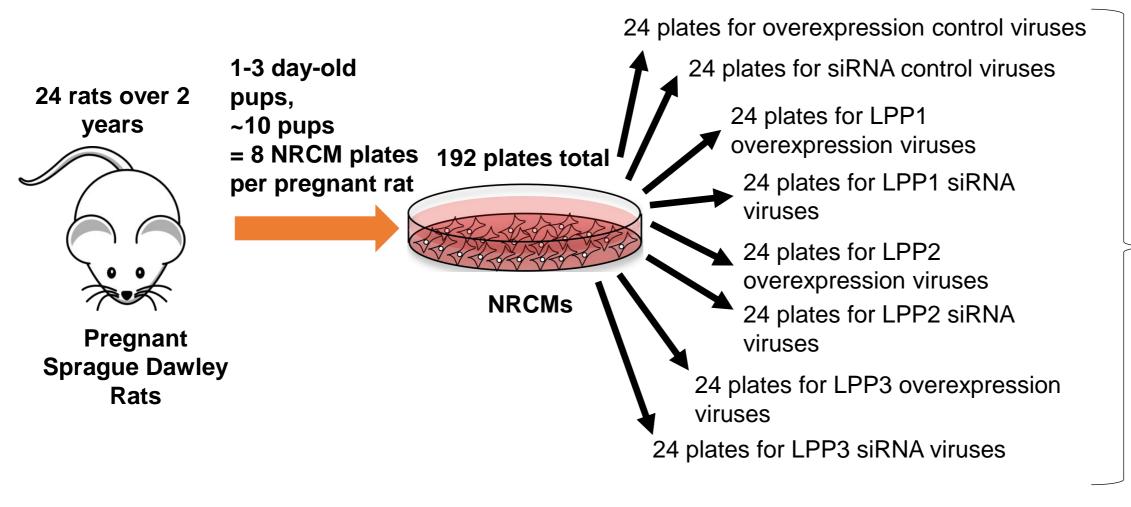

## Fig. 1. Adult rat cardiomyocyte (ARCM) baseline studies

- 8 plates/group for mitochondrial metabolism and function analysis
- 8 plates/group for contractility analysis
- 8 plates/group for biochemical analysis

## Fig. 2. Neonatal rat cardiomyocyte (NRCM) studies

- 8 plates/group for mitochondrial metabolism and function analysis
- 8 plates/group for contractility analysis
- 8 plates/group for biochemical analysis
