

University Transportation & Security

2016-17

DPMG Representative : Kurt Sampson

The University Transportation & Security Committee met monthly from September 2016 through May 2017, and will continue throughout the summer. Over that time there was a single official complaint (re. parking frustration) submitted through the DPMG membership that I presented to the committee. Other significant topics of conversation over this time have been:

- Our new University Avenue bike lane pilot project
- Winter snow removal
- Parking management (e.g. Complaints, managing around construction, pricing, etc.)
- Electric vehicle charging stations (e.g. signage & maintenance strategy)
 - A topic of particular interest to me as an early adopter of electric vehicle technology here on campus.

I will continue to serve as the DPMG representative on this committee for the 2017-18 year, so stay tuned for another report around this time next year; which should include a note on the Electric Vehicle Info Day that I hope to facilitate through this committee this summer.
