

Dalhousie University Bar Services - Licensed Rooms on Dalhousie Halifax Campus

Below is a summary of the calculated occupant loads of some of the buildings on the Dalhousie University Campus. The information was supplied by the Dalhousie Health & Safety Office and was reviewed by the Office of the Nova Scotia Fire Marshall. The occupant load for each space is based on floor area and exit width capacity. The set up of the room or space will directly affect the occupant load for a specific event. Items such as dance floors, buffet tables, chairs, the size and shape of any required equipment will have a significant impact on the maximum occupant load of the room or space. It is understood that under no circumstances will the occupants exceed the posted maximum occupant load for the space they are occupying. **Note: The spaces outlined below are subject to availability throughout the year based on academic and business demands and may not be available at the time of your request.**

| Building | Room # | Licensed Occupant Load |
|--------------------------------|--------------------------------|------------------------|
| CHASE | 319 | 76 |
