

## **Tupper Parkade Construction**

### **2-Week Lookahead (Feb 2 to Feb 13)**

The Tupper Parkade will be under construction for essential repairs from January to September 2026. Parking will still be available but one full level of the parkade will be closed at any given time. Most construction activities will take place between 7 a.m. and 5 p.m. on weekdays & some weekends.

### **Key Construction Activities (Feb 2 to Feb 13):**

- Removal of Slab on Grade
- Abandonment of existing sewer along with construction of new.
- Noise & Vibration testing on Friday February 6 as bedrock has been encountered, delaying progress and requiring extra coordination with building administrators.

### **WHICH LEVEL of the Parkade is closed**

Level 1 is totally closed to all pedestrians and access to upper levels is managed through a temporary driveline controlled by temporary traffic lights. This is an active construction site, and is very dangerous. No unauthorized personnel are permitted in this area during this time.

### **Entrance and Exit to Parkade**

Those who park in the parkade will continue to enter and exit as usual.

### **Traffic Signals**

There are traffic lights in place. When ENTERING you they are in the entrance tunnel. When EXITING you will see them on the second level as you approach the corner before the exit ramp. These lights must be obeyed at all times as there is no clear visibility during construction.

### **Parking Availability**

Parking officers are on site to ensure that everyone can find a spot. If no one is available and you need help please email:
