

# What is Assetworks?

Assetworks is a ***integrated work management system*** specifically designed for higher education facilities

Assetworks has four components:

- 1) ReADY – a portal for campus and vendor access to the system (anyone outside FM)
- 2) AiM – the enterprise system used by Facilities Management
  - a) Operations and Maintenance
  - b) Capital Planning and Project Management
  - c) Space Management
  - d) Real Estate
  - e) Energy Management
- 3) Go – the role based app for FM technicians in the field and on the go (trades, project managers, etc)
- 4) IQ – Embedded Business Intelligence.

The conceptual overview of the Operations and Maintenance segment of AiM will occur in August 2023.

Implementation of the system will be phased, with Phase I “Go Live” target in late 2024.
