

## Event Centre Construction Update

September 6, 2022

Site preparation work is now underway. A small trenched area from the Studley gym to the project site was created to install an electrical duct-bank. Crews will not begin removing the asphalt and then rock until late September into October. Major tenders are still open and will need to be awarded before mobilization will begin on the Event Centre structure.

All construction updates will be posted on the Event Centre website at [Dalhousie Event Centre - Facilities Management - Dalhousie University](#).

The design for the Event Centre as posted on the website and shared at Dalhousie's community meeting in July was approved by Dalhousie's Board of Governors at its June 28 meeting.
