

2017 STOKER AWARD FOR INITIATIVE

“Trusted to make things better”

Jason Conrad

Electrical Shop

Part of the renovations to Lucas Swann’s lab on Sexton included the HVAC system. During the crucial start-up period, Jason decided to remain on the site throughout the day including his lunch hours and breaks in order to assist as required. Without his help and expertise, this challenging project would have taken much longer than it was supposed to. Jason Conrad’s dedication was invaluable.
