

2017 STOKER AWARD FOR TEAMWORK

“Working together for the benefit of all”

Stuart McCormack

Project Manager

“Words don’t do nearly enough justice to the job Stuart has done for us this summer. He is a superstar. He communicates both good and bad news on a timely basis, and his work is always extremely thorough. I speak for my gang to say he has our full confidence.”

Heather Sutherland
Ancillary Services

“I have great respect for Stuart McCormack. He really stands out among all of the Project Managers I have worked with. He treats us like we are his clients: he is so solicitous that sometimes I almost want to tell him to relax a little. I get the sense that he is a meticulous planner who has contingency plans backing up his first echelon of contingency plans. It seems that he has drawn the short straw this time with the D Building envelope project but I can't think of anyone else I would have wanted handling that one. He has dealt with the many issues with good humour, and I know that even those who were most inconvenienced have been impressed by Stuart's attentiveness, his effective communication, and his unwavering commitment to solving problems.”
