

FM Helps High School Students

Thermal Plant Manager Roger Lloy shows the students the CSB roof.

Thank you to FM staff who spent the day telling high school students about their various careers in Facilities. The 4 students are in grades 11 and 12 and are part of the HRCE Co-operative education. **Roger Lloy** showed them around the CSB, **Pauline Fitzgerald** and **Sharon Josey** regaled them with stories from Client Reception. **Lloyd Bond** and **Mark Roberts** told them about the carpentry and paint shops, while **Stewart Irons** and **Dave Studley** showed them the mechanical shop. They learned about Dal's waste management plan from **Paul Hould**, **Scott Slaunwhite** and **Mike Wilkinson** and wrapped the day up with a tour of the mail room with **Bo Hansen** and **Jeff Graham**. The students enjoyed learning about the Dalhousie campus and hearing (amusing) stories from the team. They loved donning steel toe boots and other PPE for a day of real-world experience as part of their High School Co-op experience with the Faculty of Engineering.
