

Jojo Jose Is Great to Deal with

Jojo Jose works as a System Support Technician, and he is very nice and patient. Mike Hendsbee, the Financial Systems Business Analyst, says, “I have done some testing with him over the last year and in this latest round of testing for the Banner 9 IMPL phase 2 testing, we were back and forth trying to align our schedules to get the testing down. We have finished the testing and I just wanted to say it has been great dealing with Jojo as we both learned more along the way.” Also, sometimes, “when I had to get him to redo something if I made a mistake, he would never get mad”. In general, it was a pleasure to deal with him.
