

# In-house made Drafting Tables and Lockers impress at the AC

FM's Carpentry and Paint shops recently created 21 drafting tables and 21 lockers for students enrolled in the AC's new Landscape Architecture program. The tables and lockers were barely in place before the compliments started rolling in. Thanks to all involved including: trades members in the picture below, **Nicola Embleton-Lake, Carl Baillie, Stephanie MacKenzie, and the entire CAD team.**

"They are gorgeous, substantial pieces of furniture that will become part of our tradition for years to come. Thanks so much for all of your work on them, and please give our regards to the carpenters who made them. I spent a full five minutes just touching the finish. Beautiful."

**Margaret Savard, Department Administrator, Department of Plant, Food, and Environmental Science**

"They are beautiful! The students should arrive any minute now and I can't wait to see the look on their faces! Very nice finishes. Thanks."

**Heather Braiden, Assistant Professor, Department of Plant, Food, and Environmental Sciences**
