

# FM Jumps in after AC Boil Water Order

On Nov 2, 2017 the AC campus was under a boil order from the province. The trades team had been diligently working to correct the issue by treating the water tower and flushing the systems. To flush the system, each and every faucet and fountain had to be run to ensure the system is safe for our clients. With short notice and no hesitation, custodians (**Elaine Jenkins, Diane Ross, Jason Williams, Shelley Green, Starla Hutt, and Sarah Traverse**) stepped up to help flush the systems throughout campus to get the job done effectively and efficiently.

Three of the campus trades persons (**Seymour Publicover, Marc Chisholm, and Joel Ogden**) stayed back after hours to assist in posting notices all over campus. They also helped with the delivery 100 cases of bottled water to each of the buildings on campus. These members showed their dedication to the campus clients ensuring that we could deliver safe water source for all of our clients. It was a lot of work done in a short period of time. Tony Fleck and his team handled this situation without requiring any guidance or assistance from Senior Management. This was the first time this situation has occurred since the merger and Tony instituted the previously established protocol and communicated it to the campus community. Great work! Thank you Tony and please pass on my thanks to your team too.

**Dr. David Gray**  
Dean, Agricultural Campus
