

# Efficient Reporting

**Nick Tentomas**, FM Information Technology, is always finding ways to tweak and adapt reporting methods for improved efficiency. Always appreciated, his efforts were recognized recently as relates to year end COGNOS data reporting.

*“I wanted to send a note about the new FM COGNOS reporting that was created (by Nick) this year. We appreciate the pro-active reach out on your end and the time (spent) in creating the reports which were very useful and allowed for a more efficient year end process related to capital for us.”*

**Chris LeBlanc**, Comptroller  
Financial Services  
July 2020
