

Tareq Abdullah & Darryl Babin elevate Dal visitor experience!

When Tareq Abdullah, interim director campus planning, learned a young visitor on campus was fascinated with elevators, he quickly got in touch with Darryl Babin, electrical planning engineer, who paired him up for an “elevator tour” with two technicians from Thyssen Krupp who were working on campus.

“My elevator loving nephew came to visit me at @dalhousieu today and members of Facilities Management arranged for an in-depth elevator tour with Ivar and Dan (I hope I remembered that right) from @thyssenkrupp. 15 minutes out of their day means the world to us.”
