

Drew's Good Work needs to be Noted

“I want to express my appreciation for Drew Tavener, his work and the manner in which he conducts it. I am glad he is working here at Dalhousie and in my area.”

“I got to know Drew after a power outage, when he fixed a diode switch to my spectrometer within half an hour of my noticing it, with parts he had available. That speed and the professionalism with which he did it was much appreciated.”

She then needed help installing some new compressors at the same time Drew was on vacation. She was surprised to find how much work got done on the first day he came back to work.

“Lo and behold he got the parts the next day and had everything ready, for when the company came to do the installation. Every time I found Drew to be right on top of things in a timely, calm and competent manner. I much appreciated that.”
