

Shutdown Success

On August 19, 2018, the electrical team ran a full-scale power shutdown and restore. Encountering only minor incidents to learn from, for next time, this daunting task became approachable.

Although this was a team-based effort, there are three special shout-outs to be made: Kevin Hazel, Jack Roach, and Joe Beaver. These three individuals displayed dedication and hard work in a way that went above and beyond.

"Kevin Hazel was instrumental in making this shutdown a success and the project would not have gone nearly as smooth as it did without his direction and support."

Overall Kudos to you electrical team, running a full reset of Dalhousie is a large task, which was executed in a professional and timely manner.
