

2018 VALUES AWARD FOR SAFETY & SECURITY

This award goes to a team in Truro for their response in December for an unexpected and wide spread power outage. These folks leapt into action, rolled up their sleeves and made sure a temporary back up generator was wired and operating to ensure students had a safe and warm area to eat in the dining hall. At the same time they were working to address control issues in the chicken wing to ensure the animals were safe. When the power came on a few hours later, the team was committed to getting all campus systems back online and operational for staff and students.
