

# CARING KEITH

Facilities Management's Zone 4 is very lucky to have Keith McKinnon on their team. Keith is a plumber who has recently shown his incredible problem solving skills.

In attempting to create a temporary solution for an urgent drainage issue in the DSU main kitchen, Keith went out of his way to review existing drawings and recent updates to arrive at a brilliant temporary solution which saved time, money, and incredible inconvenience in installation and operation.

This was the extra effort Keith has displayed repeatedly for decades on campus.

Excellent work and way to go Keith!
