

EXCELLENT EXPERIENCE -EXEMPLARY EMPLOYEE

Working with Glen Deveau during the first phase of the electrical project in the Dunn has been an excellent experience. This project had great potential to be completely disruptive to building operations and research, and Glen navigated everyone throughout all without incident or difficulty (don't get me wrong: it was extremely difficult juggling and coordinating all of our faculty members' research activities combined with the required shut down of power, but Glen made this all happen as if it was an easy task.)

When the lead contractor left in the middle of the project, Glen always kept communications open while maintaining his steadfast leadership. Glen is professional, reliable, flexible, and patient, even when he is pulled in a million different directions elsewhere.

I look forward to working with him again, and I hope you know how lucky you are to have such an exemplary employee.

I thought it was important to pass along this feedback – we so often hear about how things have gone wrong – but I thought you should also know when things go really well, and this is one of those times.
