

# DONOR is IMPRESSED

Two custodial team members, **Cyndi Hoffman and June Holland** are being recognized for their incredible work in cleaning and preparing the Steele Ocean Sciences Building for a donor visit.

While the weather sadly wasn't cooperating the day of the event, the donor still mentioned that the SOSB is one of the better looking university buildings that he's been in, and he has seen several buildings. His compliment says a lot about the cleanliness and set up of the room.

His visit was an important step in building the SOSB team's relationship with the donor. They are incredibly happy and thrilled that he confirmed that he is considering making a significant investment in Dalhousie.

Incredible work!
