Proactive About Safety

Trades Supervisor **Bill Jones** is always proactive about safety. He keeps his crew informed and supplied with whatever safety gear is needed. We appreciate his efforts to keep everyone working safely. He's always consistent with his safety meetings, using relevant topics, and always reaching out to us on improving his meetings or looking for fresh ideas. There's never any pushback or reservation about new changes or ideas about any operational procedures as it relates to safety, and always puts safety of his team first.
