Wealth of Knowledge

John Langille, Chief Engineer at the AC Heating Plant has gone above and beyond the call of duty in organizing and supporting the workings of the AC central heating plant. This is including but not limited to; scheduling, part sourcing, scheduling maintenance and contracting work. He has demonstrated a wealth of knowledge and willingness to support the Power Engineers under his purview in any way at any time, day or night, weekends and holidays. His contributions are instrumental to the smooth and safe running of this facility.
