They created 21 drafting tables and 21 lockers for students enrolled in the AC’s new Landscape Architecture program. Their work was barely in place before the compliments started rolling in.

“They are gorgeous, substantial pieces of furniture that will become part of our tradition for years to come. Please give our regards to the carpenters who made them. I spent a full five minutes just touching the finish. Beautiful.”

“They are beautiful! The students should arrive any minute now and I can’t wait to see the look on their faces! Very nice finishes. Thanks.”
