

2017 Academic Ranking of World Universities

Released: August 15th 2017

SUMMARY

Results: Overall Placed: 301-400

The Academic Ranking of World Universities (ARWU) ranks over 1,000 universities. The universities are ranked overall, in 5 broad fields and in 5 specific subject fields.

Six objective indicators are used to produce these rankings:

- 1) Number of alumni winning Nobel Prizes and Field Medals (10%)
- 2) Number of staff winning Nobel Prizes and Fields Medals (20%)
- 3) Number of highly cited researchers (20%)
- 4) Number of articles published in journals of *Nature* and *Science* (20%)
- 5) Number of articles indexed in Science Citation index (20%)
- 6) Per capita performance with respect to the size of an institution (10%)

Universities are ranked worldwide without respect to region or size. The top 100 universities are ranked, and then the next 400 universities are separated into groups of 50. In the subject field ranking, the top 50 universities are ranked and then the next 50 are separated into groups of 35.
