Dilution of Nuclear Substances

Principle Investigator must complete the form below and submit it to the RSO. **The dilution of the isotope can only occur AFTER the RSO has entered the information into the EHSA** and has returned a signed copy to the requesting PI. Each party MUST retain a copy of the form signed by the RSO in their records book.

Principal Investigator: _____________________________________

Permit #: _____________________________________

Radioisotope: _____________________________________

Inventory # to be diluted: _____________________________________

Volume of original stock to be diluted: _____________________________________

Total volume of new dilution (including new stock and added solutions): _____________________________________

Requested Date of Transfer: _____________________________________

**Principal Investigator:**

_________________________________  _________________________  ________________

Name                                           Signature                                     Date

**RSO Approval:**

_________________________________  _________________________  ________________

Name                                           Signature                                     Date

**New Inventory #:** _____________________________________
