*Typically, students do not take any course in summer because the summer co-op is a full-time employment and it is difficult to curve out the time to take any courses. However, it is an option for students who wish to 'catch up' if they wanted to have a slightly lighter course load in the first year. Also note that, while Directed Studies may be possible, you are responsible for finding an instructor (School of Planning faculty member) who is willing to supervise you and formulate the course syllabus with you. If you would like to take this option, you should start planning at the beginning of Winter Year 1.
