WHO RUNS THE DIGITAL WORLD?
That's up to you...

Technology is changing the way the world works and we want you to have a say in that future.

Your creativity, your problem solving, and your perspective will make a big difference in areas that range from social media and ocean data science, to healthcare automation.

This is your opportunity to create the future you'd like to see.
WOMEN IN TECHNOLOGY SCHOLARSHIP

Through collaboration with our WeAreAllICS industry partners, our Women in Technology Scholarship not only offers $10,000 over 2 years but mentorship from women who are already influencing the world of tech and enriched internship opportunities.

Some of our current partners include TD, CGI, T4G, Techsploration and Mobia Technology Innovations.

WOMEN IN TECHNOLOGY SOCIETY

The Dalhousie Women in Technology Society (WiTS) is a group of like-minded individuals committed to increasing the opportunities of female-identifying individuals in the technology industry. WiTS is based out of the Faculty of Computer Science and seeks to expose current students to the ever-expanding possibilities in the technology industry with networking events and panel discussions. They also hope to foster an interest in technology in future students through their volunteer efforts.

"Like business and marketing, computer science is interdisciplinary...there are so many options available as to how you can learn and apply computer science depending on your interests." - Sarah Young (BACS ’18) now works at IBM as an IT and business specialist
