

FACULTY OF MEDICINE STRATEGIC PLAN – “THE WAY FORWARD”

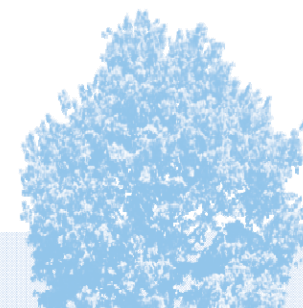

Updated: July, 2013

EDUCATION & RESEARCH EXCELLENCE, ORGANIZATIONAL & FISCAL RENEWAL

MISSION: Improve health of New Brunswickers’ through medical education and health research.

VISION: : Provide an innovative but comparable education experience across the continuum of medical education which meets or exceeds accreditation standards and is socially accountable while being fully integrated into NB communities. The academic program will be supported by collaborative biomedical, clinical and educational research activities.

VALUES: Integrity, accountability, social responsibility, evidence-based practices, collegiality, ethics, professionalism

DMNB, FACULTY OF MEDICINE – 2013/14 PRIORITIES

Educating Doctors and Researchers of the Future

- Implement first year RIM course
- Implement a new LICD Upper River Valley to open September 2014
- Develop a proposal for establishing a LICD in Moncton for September 2015
- Implement a fourth year elective clerkship program in New Brunswick
- Implement the PIER Program
- Implement the skilled clinician program and OSCE assessments
- Collaboratively establish a plan for IPE across the undergraduate curriculum at both campuses

Enhancing Patient Care and Population Health

- Initiate collaborative scholarly opportunities with Horizon Health Network for quality improvement and quality assurance activities involving students.
- Develop an interprofessional experience for LICD students in Eel Ground aboriginal health clinic
- Explore patient care improvements through clinical research capacity development supported by the academic billing number program
- Identify capacity for service learning

Advancing an Innovative Research Agenda

- Establish a graduate research program that is integrated with UNB and Dalhousie courses
- Cross appointments at UNB with supervision and grant review mechanisms
- MOU (HHN/DAL) regarding research functions with DMNB Researchers
- MOU (DAL/UNB) for the relationship with Dal (DMNB) student support and recognition/supervision
- Establish the education and research program for the Chair in Occupational Medicine
- Establish Strategic plan for capacity growth with financial sustainability for research at DMNB
- Grow health research capacity with improved access to core research services
- Collaboration with Health & Life Science New Brunswick initiative research
- Recruit the fourth Basic Science Researcher for DMNB
- Facilitate establishment of the Canadian Gairdner Lecture Series in New Brunswick
- Establish a DMNB Research Seminar series

Organizational, Operational & Fiscal Renewal

- Complete advisory committee report on the tripartite and bipartite agreement.
- Establish a sustainable administrative model for the bio-medical research lab at DMNB
- Make fully operational the DMNB multipurpose research lab and animal care facility.
- Integrate functional PGME Administration in DMNB facilities
- Establish a functional relationship for recruitment and management of donations to DMNB
- Develop a management structure for the administration of OSCE’S
- Open DMNB IT network to access hospital-based systems
- Establish a program to encourage matching of student with education options
- Official Research Lab opening
- Launch ceremony

LONG TERM VISION STATEMENTS

Graduating DMNB students see themselves as having become the best they could be - Be seen as the medical education destination of choice for New Brunswickers - Be fully integrated with the Maritimes ‘medical school while maintaining a unique identity and community relationship that is responsive to NB health needs - Double biomedical research activity in New Brunswick - Be recognized in the Faculty of Medicine for providing leadership in lifelong learning and workplace experience.

The Faculty of Medicine is committed to “Making Choices: Dalhousie’s Strategic Focus 2010-2013”
