About us: The Community Navigator program was created and is funded by community stakeholders with the goal of recruiting and retaining physicians. Our Community Navigator Team connects with visiting medical students to ensure they have enjoyable elective experiences in our beautiful seaside community and supports our newcomer residents and physicians in navigating settlement and family supports. We showcase the many benefits of practicing in North West Nova Scotia by offering affordable student housing, assisting with site visits, hosting private and public events for medical learners and physicians, attending conferences, and advertising. Lastly, and perhaps most importantly, we strive to support our current physicians in maintaining rewarding careers with fantastic life/work balance.
