PEDIATRIC ANESTHESIA FELLOWSHIP

Dalhousie University and
IWK Health,
Halifax, Nova Scotia

www.nsanesthesia.ca

THE OPPORTUNITY

Expand your horizons at the IWK Health where we provide world class anesthesia care for children and youth in Atlantic Canada.

The **IWK Health** provides excellent care to children, youth, women, and newborns in Canada's Maritime provinces and beyond. Affiliated with the **Dalhousie University Faculty of Medicine**, the IWK Health is renowned for its world-class research into diseases and disorders affecting children and women and is the primary clinical resource for pediatric and obstetric teaching for health professions in the Maritimes.

We are seeking an exceptional candidate to join the IWK Health as a **Pediatric Anesthesia Fellow**. Our fellowship offers advanced clinical training and teaching in a setting that employs a full range of state-of-the-art pediatric and anesthetic services.

The one-year fellowship emphasizes a solid foundation in community pediatric anesthesia while exposing the fellow to extensive surgical services. It also offers experience in off-site anesthesia, particularly interventional cardiology and diagnostic imaging.

The major surgical services include neuro, craniofacial, spine, general, cardiac, urology, ophthalmology, ENT, orthopedics and dentistry.

As a fellow, you have the opportunity to train in the IWK Health's eight-bed pediatric intensive care unit and participate in the pediatric acute pain service and multi-disciplinary chronic pain program.

THE BENEFITS

Be part of a thriving anesthesia team that cultivates excellence and supports your educational goals.

- Strong clinical fellowship
- Support and mentorship to help you meet your clinical and education goals
- Opportunities for research project involvement
