

Abnormal Uterine Bleeding

At the end of the seminar the residents will be able to:

1. Be familiar with the causes of abnormal uterine bleeding in non- pregnant women of reproductive age and in post -menopausal women.
2. Outline risk factors for endometrial hyperplasia and know when and how to investigate patients at increased risk.
3. Describe medical and surgical management of abnormal uterine bleeding based on etiology and patient factors.
4. Understand the importance of investigation of patients presenting with post-menopausal bleeding including which tests are indicated.

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
