

# Asthma

At the completion of the seminar the resident will be able to:

1. Describe the key diagnostic features of asthma and a differential diagnosis.
2. Outline the epidemiology and natural history of asthma.
3. Describe a strategy for assessing severity of asthma.
4. Describe indications for investigation and typical results.
5. Describe an initial approach for all patients with asthma.
6. Outline a treatment plan, disposition and follow-up approach based on severity.

*Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.*
