

Competency Assessment

At the completion of the seminar the resident will be able to:

1. Understand what is meant by competence and capacity and appreciate how they can change over time and with regard to the situation.
2. Identify appropriate scenarios to initiate discussions and assessment of competency.
3. Use a standardized approach to competency assessment either informally or using a validated tool (such as ACE) and know when to refer for more challenging assessments.

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
