

Croup

At the completion of the seminar the resident will be able to:

1. Describe the key diagnostic features of croup and differential diagnosis
2. Outline the epidemiology and natural history of croup
3. Describe a strategy for assessing severity of croup (Croup Score)
4. Describe indications for investigation and typical results
5. Describe an initial approach for all patients with croup
6. Outline a treatment, disposition and follow-up approach based on severity

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
