

Gastrointestinal Bleed

At the completion of the seminar the resident will be able to:

1. Describe the key diagnostic features of upper and lower GI bleeds
2. Outline the epidemiology and natural history of GI bleeds.
3. Describe a strategy for assessing severity of GI bleeding.
4. Describe indications for investigation and typical results.
5. Describe an initial approach for all patients with GI bleeding.
6. Outline a treatment plan, disposition and follow-up approach based on severity.

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
