

Inflammatory Bowel Disease (IBD)

The resident will be able to:

1. Describe common initial presentations of IBD and features in history and physical exam that suggest IBD over other, more common GI complaints
2. Describe appropriate initial investigation, management and referral
3. Differentiate Ulcerative Colitis and Crohn's colitis with particular reference to their risks and natural history
4. Develop and monitor an appropriate treatment strategy in conjunction with a gastroenterologist

Recommend appropriate follow-up for patients with IBD

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
